3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

8. POLICY STR/SS3: THE STRATEGY FOR TUDELEY VILLAGE

8.1. Through policy STR/SS3, the Council seeks to remove land from the Green Belt for the delivery of a new village at Tudeley.

8.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing development envisaged as detailed in the representation to policy STR9. As we do not consider that very special circumstances have been demonstrated, this is a further indication that no revision to the Green Belt should occur at Tudeley as detailed in the representation to policy STR9.

8.3. As noted in the SA, to enable the delivery of Tudeley, significant infrastructure improvements will be required. This includes provision of new offsite roads (a new link road to the A228 and A228 improvements) to serve the site together with utility services, education, community, health and leisure facilities. For these factors, no indication has been provided in the current Draft infrastructure Delivery Plan of the costs or delivery mechanism of these investments. Without this information there is no certainty that the Plan can be delivered and consequently would be effective.

8.4. The Plans prepared by both Uttlesford Council (appendix 8) and the North Essex Authorities (appendix 9) failed with respect of some of the new settlements envisaged as the costs assumed were unrealistic and did not include sufficient contingency.

8.5. The Tandridge Local Plan has significant doubts with respect of the uncertainty of funding the major new road infrastructure associated with the South Godstone Garden Village, following a rejected HIF bid (appendix 7).

8.6. Although the Council has prepared information with respect of costs and delivery mechanisms for Tudeley, as indicates earlier in this submission the new settlement is not expected to contribute towards all the necessary infrastructure i.e. the Colts Hill off-line improvement (This is only included in the financial appraisals for development at Paddock Wood) which is required alongside the Five Oak Green bypass (which Tudeley is expected to contribute towards) (See the Viability assessment schedules in Appendix II of the Stage 2 Viability Appraisal). Furthermore, and notwithstanding the financial viability assessments not including all infrastructure, development at Tudeley is not as viable as indicated under the same range of variables as other schemes. Tudeley is reliant on lower existing land values and higher property values to show it is viable. The limited evidence that development at Tudeley is viable is a further indication of the unsuitability of the current strategy.

8.7. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3

8.8. To address these matters of soundness, a range of amendments are proposed: a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and

b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

8.9. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

8. POLICY STR/SS3: THE STRATEGY FOR TUDELEY VILLAGE

8.1. Through policy STR/SS3, the Council seeks to remove land from the Green Belt for the delivery of a new village at Tudeley.

8.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing development envisaged as detailed in the representation to policy STR9. As we do not consider that very special circumstances have been demonstrated, this is a further indication that no revision to the Green Belt should occur at Tudeley as detailed in the representation to policy STR9.

8.3. As noted in the SA, to enable the delivery of Tudeley, significant infrastructure improvements will be required. This includes provision of new offsite roads (a new link road to the A228 and A228 improvements) to serve the site together with utility services, education, community, health and leisure

facilities. For these factors, no indication has been provided in the current Draft infrastructure Delivery Plan of the costs or delivery mechanism of these investments. Without this information there is no certainty that the Plan can be delivered and consequently would be effective.

8.4. The Plans prepared by both Uttlesford Council (appendix 9) and the North Essex Authorities (appendix 10) failed with respect of some of the new settlements envisaged as the costs assumed were unrealistic and did not include sufficient contingency.

8.5. The Tandridge Local Plan has significant doubts with respect of the uncertainty of funding the major new road infrastructure associated with the South Godstone Garden Village, following a rejected HIF bid (appendix 8).

8.6. Although the Council has prepared information with respect of costs and delivery mechanisms for Tudeley, as indicates earlier in this submission the new settlement is not expected to contribute towards all the necessary infrastructure i.e. the Colts Hill off-line improvement (This is only included in the financial appraisals for development at Paddock Wood) which is required alongside the Five Oak Green bypass (which Tudeley is expected to contribute towards) (See the Viability assessment schedules in Appendix II of the Stage 2 Viability Appraisal). Furthermore, and notwithstanding the financial viability assessments not including all infrastructure, development at Tudeley is not as viable as indicated under the same range of variables as other schemes. Tudeley is reliant on lower existing land values and higher property values to show it is viable. The limited evidence that development at Tudeley is viable is a further indication of the unsuitability of the current strategy.

8.7. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3

8.8. To address these matters of soundness, a range of amendments are proposed:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

8.9. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the

legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

8. POLICY STR/SS3: THE STRATEGY FOR TUDELEY VILLAGE

8.1. Through policy STR/SS3, the Council seeks to remove land from the Green Belt for the delivery of a new village at Tudeley.

8.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing development envisaged as detailed in the representation to policy STR9. As we do not consider that very special circumstances have been demonstrated, this is a further indication that no revision to the Green Belt should occur at Tudeley as detailed in the representation to policy STR9.

8.3. As noted in the SA, to enable the delivery of Tudeley, significant infrastructure improvements will be required. This includes provision of new offsite roads (a new link road to the A228 and A228 improvements) to serve the site together with utility services, education, community, health and leisure facilities. For these factors, no indication has been provided in the current Draft infrastructure Delivery Plan of the costs or delivery mechanism of these investments. Without this information there is no certainty that the Plan can be delivered and consequently would be effective.

8.4. The Plans prepared by both Uttlesford Council (appendix 9) and the North Essex Authorities (appendix 10) failed with respect of some of the new settlements envisaged as the costs assumed were unrealistic and did not include sufficient contingency.

8.5. The Tandridge Local Plan has significant doubts with respect of the uncertainty of funding the major new road infrastructure associated with the South Godstone Garden Village, following a rejected HIF bid (appendix 8).

8.6. Although the Council has prepared information with respect of costs and delivery mechanisms for Tudeley, as indicates earlier in this submission the new settlement is not expected to contribute towards all the necessary infrastructure i.e. the Colts Hill off-line improvement (This is only included in the financial appraisals for development at Paddock Wood) which is required alongside the Five Oak Green bypass (which Tudeley is expected to contribute towards) (See the Viability assessment schedules in Appendix II of the Stage 2 Viability Appraisal).

8.7. Furthermore, and notwithstanding the financial viability assessments not including all infrastructure, development at Tudeley is not as viable as indicated under the same range of variables as other schemes.

8.8. Tudeley is reliant on lower existing land values and higher property values to show it is viable. The limited evidence that development at Tudeley is viable is a further indication of the unsuitability of the current strategy.

8.9. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF.

8.10. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3

8.11. The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

8.12. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

7. POLICY STR/HA1: THE STRATEGY FOR HAWKHURST PARISH

7.1 This policy provides an overview of the allocations and development proposed for the parish of Hawkhurst. To be consistent with the amendments advocated elsewhere in these representations it is essential that the policy is revised to ensure that it reflects the changes associated with the allocation of land at Chittenden Fields, north of High Street, Hawkhurst.

9. OMISSION SITE: FAILURE TO INCLUDE ALLOCATION OF LAND AT CHITTENDEN FIELDS, NORTH OF HIGH STREET (A268), HAWKHURST AS AN ALLOCATION WITHIN THE LOCAL PLAN CONSISTENT WITH POLICY STR/HA1 (SHLAA REF 2)

9.1. Through the other representations submitted to the policies of the Plan, there is a need to allocate additional land for housing development. Having regard to those representations and the earlier

promotion of the land at Chittenden Fields, north of High Street, Hawkhurst for residential development, it is clear that this is a suitable location for allocation. The reasons for this are detailed below.

9.2. Millwood Designer Homes Ltd has a controlling interest in land at Chittenden Fields, Hawkhurst which extends to approximately 3ha. The site has been assessed in the Council's Strategic Housing and Economic Land Availability Assessment ("SHELAA") under Site Ref: 2.

9.3. Millwood Designer Homes Ltd is a local developer that has won multiple awards for its high-quality scheme designs. They are committed to securing high quality schemes that secure the best form of development for their sites.

9.4. We have undertaken a thorough assessment of the character of the site and surrounding area and consider that it affords a sustainable development opportunity for up to approximately 70 dwellings.

9.5. The site is located within the confines of existing built development. It is not within a 'gap' and forms part of the built-up area.

9.6. Overall, the site has no physical constraints, and is well-related to the existing residential development. It is in close enough proximity to Hawkhurst to be able to walk to the centre, such that it affords a sustainable location in helping to meet identified housing needs whilst providing for sustainable patterns of growth.

Landscape

9.7. The Council's SHELAA assessed the site as being unsuitable in landscape terms, which assessment draws upon the landscape analysis set out in the Landscape Sensitivity Assessment undertaken by LUC on behalf of the Council (July 2018).

9.8. The Landscape Sensitivity Assessment included the site within sub-area Ha1. Whilst it is acknowledged that the site has some landscape sensitivities (as is the case with the majority (if not all) of greenfield allocations on the edge of settlements), the site has identifiable and defensible boundaries and could be developed sensitively, with a focus on a high quality landscaping strategy which would mitigate the landscape impact.

9.9. Our client instructed consultants Lloyd Bore Ltd to undertake an assessment of the suitability of the scheme to accommodate housing development. Their findings are set out in the accompanying Landscape and Visual Statement (Nov 2019) which concludes that the site has a high landscape capacity to accommodate development. Paragraph 7.5 states as follows.

"...the site is already very well contained and screened visually from the wider landscape, and offers good opportunities for mitigation, enhancement and successful integration with the existing development pattern of the village."

9.10. Paragraph 7.6 further adds that the site is not prominent in the wider AONB landscape.

9.11. Paragraph 7.8 concludes in relation to the acceptability of developing the site for housing in landscape terms as follows:

"... the impact on the AONB of an appropriately designed development on Chittenden Field would in fact be very limited.."

9.12. This analysis addresses the landscape comments in the Council's SHELAA and sets out the landscape capacity of the site to accommodate housing development.

Highways, Accessibility and Sustainability

9.13. A Transport Assessment has been undertaken in order to assess the highway and sustainability merits of the site for housing development, which matters were set out in our previously submitted representations in November 2019 (Appendix 1 refers).

9.14. In locational terms, the merits of the site include its proximity to the main retail facilities and bus stops are located in the centre of Hawkhurst which is 790m east of Chittenden Fields and therefore within walking distance.

9.15. There is a private school near to the site and a community hospital is located about 625m west of the site.

9.16. Other facilities such as golf club, public house and a church are also located within an easy walking distance, between the site and central Hawkhurst.

- 9.17. The nearest bus stops to Chittenden Fields are located on the A268 High Street approximately 150m east of the site (both east and westbound).
- 9.18. There are also bus stops (both east and westbound) located approximately 740m to the east of the site in Hawkhurst.
- 9.19. Overall, there are at least three buses per hour passing the site. Two of these run in two directions, therefore the overall frequency of buses passing the site is five per hour (two-way) on a weekday. However, they do not all stop at the nearest bus stops to the site.
- 9.20. There is a wide highways verge on the A268 adjacent to the site and therefore, there is the ability to introduce more formal bus stops with shelters on the A268 adjacent to the site to serve the bus routes that already pass the site.
- 9.21. The proposed means of vehicular access to serve development of the site for housing could be provided from the A268 via a new simple priority junction.
- 9.22. The visibility splays achievable from the site access to the nearside of the carriageway at present are 2.4m x 120m to the left (to the east) and 2.4m x 120m to the right (to the west). This fully complies with the DMRB standard for a road subject to a 40mph speed limit.
- 9.23. The access road would be extended into the site from the southern boundary to provide a surfaced road of 5.5m wide with 2m footways on both sides to the potential development site. The access road would have an average gradient of 1 in 12 between the back of footway level and development site, which would be adequate for use by large vehicles.
- 9.24. An impact assessment has been undertaken on the assumption of developing the site for up to approximately 100 dwellings. This has been undertaken as a sensitivity test in order to ensure trip rates are assessed at a maximum level.
- 9.25. This amount of development would generate an extra circa 550 vehicle trips (two-way) per weekday (two-way).
- 9.26. On the basis of the foregoing, the site is demonstrated to be in a sustainable location.
- 9.27. We consider that part of the solution to addressing the identified shortfall is to allocate land at Chittenden Fields, north of High Street, Hawkhurst for residential development alongside consequential changes to Inset Map 15.

10. OVERALL CONCLUSIONS

- 10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.
- 10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.
- 10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.
- 10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

- 11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.
- 11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.
- 11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the policy STR/HA1

7.2 The Plan therefore as currently prepared is not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities, b) Is not justified as the evidence does not support the exclusion of the Chittenden Fields site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

7.3 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR/HA1 (and STR1 and Inset Map 15 relating to the Limits to Built Development) is amended to ensure that it acknowledges the allocation of land at Chittenden Fields, north of High Street, Hawkhurst as a development site for circa 70 dwellings, with consequential amendments made to the document reflecting its identification.

Change sought to the Local Plan.

9.28. To ensure that the plan is therefore sound as detailed in the representations, land at Chittenden Fields, north of High Street, Hawkhurst should be included as a residential allocation with consequential amendments to settlement boundaries.

9.29. The dwellings to the West of Hawkhurst, north and south of High Street, to include the omission site at Chittenden Fields (Site Ref: 2), extending to the west up to and including Hawkhurst Community Hospital, should be included within a revised settlement boundary. This represents a logical and sensible approach to defining the LBD at Hawkhurst.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the

legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

7. POLICY PSTR/BE1: THE STRATEGY FOR BENENDEN PARISH

7.1. This policy provides an overview of the allocations and development proposed for the parish of Benenden. To be consistent with the amendments advocated elsewhere in these representations it is essential that the policy is revised to ensure that it reflects the changes associated with the allocation of land west of Iden Green Road, Benenden for residential development.

10. OMISSION SITE: FAILURE TO INCLUDE ALLOCATION OF LAND WEST OF IDEN GREEN ROAD, BENENDEN AS AN ALLOCATION WITHIN THE LOCAL PLAN CONSISTENT WITH POLICY PSTR/BE1 (SHLAA ref 222)

General

10.1. Through the other representations submitted to the policies of the plan, there is a need to allocate additional land for housing development. Having regard to the representations and the earlier promotion of land west of Iden Green Road, Benenden for residential development, it is clear that this is a suitable location for allocation. These reasons for this are detailed below.

10.2. Millwood Designer Homes has a controlling interest in land to the west of Iden Green Road which extends to approximately 2.5ha.

10.3. The site has been assessed in the Council's Strategic Housing and Economic Land Availability Assessment (“SHELAA”) under Site Ref: 222.

10.4. We have undertaken a thorough assessment of the character of the site and surrounding area and consider that it affords a sustainable development opportunity for approximately 28 dwellings, to include the creation of a larger publicly accessible area of green space and reinstatement of the pond in the north east corner of the site.

10.5. We consider this would enhance the public realm and would enable a high-quality scheme for a small number of dwellings to be located within walking distance from local services and facilities, helping to further sustain and support local businesses.

10.6. Plans and particulars are enclosed in support of our representations, which seek the allocation of the site for approximately 28 dwellings as follows.

- Development of the site for housing and a large publicly accessible area of green space provides an opportunity to enhance the appearance of part of the Conservation Area through the creation of an attractive and sensitively designed residential extension to the village.

- A scheme can also be designed in relation to the desirability of preserving the setting of the listed buildings considered to be affected and the special character and appearance of the Benenden Conservation Area. • Figure 3 has been prepared following a detailed review of the landscape character of the site and surrounding area and enables the retention of substantial trees on the site, most notably the lime trees along the frontage. • A suite of ecological surveys has been undertaken across the site throughout spring and summer 2018, including an Extended Phase 1 Habitat survey, bat surveys, reptile surveys and great crested newt surveys. • The majority of the site comprises semi-improved grassland of limited ecological value. Several semi-mature trees, principally oak, are present in and around the site. These have some ecological value, offer potential bat roosting opportunities, as well as sites for nesting birds. • The pond on the northern boundary is relatively small and although it contains water, is becoming choked with sediment and debris. It also contains a large area of the highly invasive New Zealand pygmy weed. • There are ample opportunities within the site to provide ecological enhancement measures. These will need to include improvements for the slow worm population as well as improvement to the newt pond – possibly dredging it out and removing the pygmy weed. • The Parish has highlighted in their assessment of the site, the potential benefit of developing this site is enhancing the pond, which would have not only an ecological benefit, but would improve the Conservation Area, thus positively supporting the local heritage value. These benefits are unique to this site in being able to deliver environmental benefits in addition to the social and economic benefits brought about through the provision of new housing.

10.7. We consider that part of the solution to addressing the identified shortfall is to allocate land west of Iden Green Road, Benenden for residential development alongside consequential changes to the policy map.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the policy PSTR/BE1

7.2. The Plan therefore as currently prepared is not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities, b) Is not justified as the evidence does not support the exclusion of the land west of Iden Green Road site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

7.3. To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy PSTR/BE1 is amended to ensure that it acknowledges the allocation of land west of Iden Green Road, Benenden as a development site with consequential amendments made to the document reflecting its identification.

Change sought to the Local Plan.

10.8. To ensure that the plan is therefore sound as detailed in the representations, land west of Iden Green Road, Benenden should be included as a residential allocation with consequential amendments to settlement boundaries.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

PSTR/BM 1 The Strategy for Brenchley and Matfield parish

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 2)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 3)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 4)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 5)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 6)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 7)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 8)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 9)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these polices, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

7. POLICY PSTR/BM1: THE STRATEGY FOR THE PARISH OF BENCHLEY AND MATFIELD

7.1. This policy provides an overview of the allocations and development proposed for the parish of Brenchley and Matfield.

7.2. In order to be consistent with the amendments advocated elsewhere in these representations in it essential that the policy is revised to ensure that it reflects the changes associated with the allocation of land at Ashes Plantation, Maidstone Road, Matfield.

9. OMISSION SITE: FAILURE TO INCLUDE ALLOCATION OF LAND AT ASHES PLANTATION, MAIDSTONE ROAD, MATFIELD AS AN ALLOCATION WITHIN POLICY PSTR/BM1 (SHLAA SITE REF 353)

9.1. Through the other representations submitted to the policies of the Plan, there is a need to allocate additional land for housing development.

9.2. Informed by the evidence based to the regulation 18 draught local plan it is clear that the site at Ashes plantation, Maidstone Rd, Matfield should be reinstated as a housing allocation for approximately 60 dwellings.

9.3. Their site was identified as an appropriate location to accommodate housing growth under Policy AL/BM3 of the Regulation Draft Local Plan, the content of which was informed by a Sustainability Appraisal ("SA") and the 'Limits to Built development' Topic Paper (Aug 2019).

9.4. Figure 16 in the Topic Paper includes the site within the settlement boundary, the designation of which was justified through be sustainability appraisal.

9.5. The omission of the site in the Regulation 19 version of the Local Plan is not justified when assessed against the reasonable alternatives.

9.6. Page 168 of the Feb 2021 SA to the Regulation 19 Local Plan states in relation to the site as follows:

"Since Draft Local Plan stage, cumulative impact scores for landscape and heritage have been improved following the removal of Site 253 for allocation. Site 353 was a relatively large site in a location out of keeping with the existing settlement pattern with some adverse landscape impacts, as well as having regard to the overall limited services role of the settlement."

9.7. However, when the site assessment at Appendix L on page 199 of the SA to the Regulation 18 draft Local Plan is compared with the more recent version on page 335 at Appendix M of the SA to the Regulation 19 Local Plan, there has been no change to the sites score as set out in the matrices. As such, there is no sound basis or evidential support for the deletion of the site as a housing allocation.

9.8. Paragraphs 5.483 to 5.487 provide the context in support of providing further growth at Matfield, where development would, inter alia, help support and sustain local shops, public houses, and other services, including the primary school.

9.9. The site represents a logical extension to the LBD and development can be designed in a landscape setting in order that it relates well to the settlement pattern. Moreover, and in accordance with the approach set out at Policy AL/BM3 of the Regulation draft Local Plan, development can come forward that would be sympathetic to the form and character of the settlement and its rural surrounds.

9.10. As to highways, we are seeking a flexible approach to the reinstatement of Policy AL/BM3 to allow for access to be taken either from Maidstone Road or from Oakfield Road.

9.11. Overall, the opportunities provided by development of the site for housing include as follows:

- Provision of new homes that will help to support and sustain local services and facilities
- Provide much needed affordable housing to meet identified local needs
- Reducing the need to remove land from the Green Belt
- Create and enhance amenity space within the development that can be used by existing and future residents
- Create recreational walking routes within the site to provide an attractive environment for local residents whilst increasing access to the countryside

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the policy PSTR/BM1

7.3. As drafted, the Plan cannot be said to be sound having regard to the following:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities, b) Is not justified as the evidence does not support the omission of land at Ashes Plantation, Maidstone Road, Matfield as a housing allocation, when other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

7.4. To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy PSTR/BM1 (and STR1 and Inset Map 21 relating to the Limits to Built Development) is amended to ensure that it identifies the allocation of land at Ashes Plantation, Maidstone Road, Matfield as a development site for circa 60 dwellings, with policy wording akin to that set out under Policy AL/BM3 of the Regulation draft Local Plan reinstated.

Change sought to the Local Plan.

9.12. For the reasons set out above, we consider that part of the solution to addressing the identified shortfall in the provision and delivery of housing across the Borough, is to reinstate this site as a housing allocation (Reg 18 draft Local Plan Policy AL/BM3 (with a flexible approach to the means of access)) with consequential amendments to the LBD as shown on Inset Map 21.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/RU 1 The Strategy for Rusthall parish

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the

legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

7. POLICY PSTR/RU1: THE STRATEGY FOR RUSTHALL PARISH

7.1 This policy provides an overview of the allocations and development proposed for the parish of Rusthall.

7.2 In order to be consistent with the amendments advocated elsewhere in these representations it is essential that the policy is revised to ensure that it reflects the changes associated with the allocation of Home Farm, Lower Green Road.

9. OMISSION SITE: FAILURE TO INCLUDE ALLOCATION OF LAND AT HOME FARM, LOWER GREEN ROAD, RUSTHALL AS AN ALLOCATION WITHIN THE LOCAL PLAN CONSISTENT WITH POLICY PSTR/BE1 (SHLAA ref 222)

General

9.1. Through the other representations submitted to the policies of the plan, there is a need to allocate additional land for housing development. Having regard to the representations and the earlier promotion of the Home Farm site for residential development, it is clear that this is a suitable location for allocation. These reasons for this are detailed below.

9.2. Our client’s site comprising land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60) is submitted as an additional housing allocation. The Site is edged red on Plan WBP1 attached and extends to approximately 1.3ha.

9.3. We have undertaken a thorough assessment of the character of the site and surrounding area and consider that it affords a sustainable development opportunity for approximately 25 dwellings.

9.4. The site is well related to the urban area and is well contained from the wider Green Belt, which conclusion is supported by the Council's assessment of the site as set out in Appendix A of the Council's Green Belt Study (Stage 2) (LUC) (July 2017). This indicates that assessed parcel 2b of this study (which includes the Home Farm site controlled by our clients) made the following contributions to the purposes of Green Belt.

[TWBC: see full representation attached for table showing 'extract of the assessment of parcel RU1a in the Stage 2 Green Belt Study (2017)]

9.5. Consequently, the maximum contribution of the parcel including our clients' site is a "moderate contribution".

9.6. Whilst the Stage 2 assessment indicates that the maximum contribution of the site to Green Belt purposes is moderate, within the Site Assessment Study for our clients' land (SHLAA site ref 60), the conclusion is that its release would have a moderate – high harm. This is therefore inconsistent with the finding of the Council's own assessment.

9.7. Furthermore, the Site Assessment Study suggests that there is a significant concern regarding the ability to provide a safe and satisfactory means of access to the site. However, the response to the preferred options consultation (appendix 1) included details indicating that a safe and satisfactory access can readily be achieved for the site (Accompanying Plan No. P352/MDR explains how improvements to the site access can be achieved in order to provide for a safe means of access to serve development of the site for housing). Therefore, the reasons why the Council discounted the suitability are not supported by the further information submitted through the preparation of the Plan.

9.8. Development of the site for approximately 25 dwellings would enable a high-quality housing scheme to be located within walking distance from local services and facilities, including the High Street which is within an easy 0.5km walk to the south of the site.

9.9. Access can be readily achieved from Lower Green Road, and there is a pedestrian footway to the High Street which enables safe and convenient access to local services and facilities by foot.

9.10. The site is also within a short 0.25km walk to a bus stop which provides regular services to Tunbridge Wells.

9.11. The proximity of the site to local services is shown on supporting Site Context Plan No. WBP2 included with the representations.

9.12. Overall, the site has no physical constraints, and is well-related to the existing residential development. It is in close proximity to local services and facilities such that it affords a sustainable location in helping to meet identified housing needs whilst providing for sustainable patterns of growth.

9.13. We therefore consider that part of the solution to addressing the identified shortfall is to allocate land at Home Farm, Lower Green Road, Rusthall for residential development alongside consequential changes to the Policy Map.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Policy PSTR/RU1

7.3 The Plan therefore as currently prepared is not sound with respect of:

a) Not positively prepared as the policy (alongside others in the document) fails to meet the areas housing needs, including a contribution towards unmet needs of neighbouring authorities, b) Is not justified as the evidence does not support the exclusion of the Home Farm site whereas other sites are included which are inconsistent with the assessments and appraisals of the Council; and c) The policy is not consistent with national policy as it fails to deliver sufficient housing to meet the Borough's needs, including that arising in neighbouring ones.

7.4 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy PSTR/RU1 and STR1 relating to the Limits of Build development is amended to ensure that it acknowledges the allocation of Home Farm, Rusthall as a development site with consequential amendments made to the document reflecting its identification.

Change sought to the Local Plan

9.14. To ensure that the plan is therefore sound as detailed in the representations, land at Home Farm, Lower Green Road, Rusthall should be included as a residential allocation for circa 25 dwellings, with consequential amendments to settlement boundaries.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 15 Local Green Space

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

9. POLICY EN15: LOCAL GREEN SPACE

9.1. Through policy EN15, the Council seeks to define areas of local green, including our clients land west of Iden Green Road, Benenden (Referred to in plan as New Pond Corner) (Ref AS_45).

9.2. For the reasons detailed below, we object to the designation of site AS_45 as Local Green Space. Whilst the NPPF (paragraphs 99 and 100) and associated PPG (ID ref 37-005-20140306 to 37-022-20140306) provides guidance on the designation of local Green Space, as indicated in the representation to the earlier draft Local Plan (appendix 1), we do not consider that the authority has justified either the inclusion of the policy, and especially that it should not apply to our clients' land (site ref AS_45).

9.3. Whilst the NPPF and PPG recognises that local green space can be designated, it is not considered that the schedule which appraises each potential site provides the necessary robust evidence to substantiate the conclusions reached.

9.4. As outlined below, the Council has consequently not provided any justification for including site AS_45 as a local green space within policy EN15. The failure of the Council to demonstrate that AS_45 warrants designation as Local Green Space is considered to be illustrative of the unjustified nature of the policy as a whole and therefore it should be omitted from the Plan.

9.5. The Council's methodology requires that proposed Local Green Space areas must generally meet all five criteria in order to be designated as Local Green Space, unless the site is already sufficiently protected. The five criteria are summarised as

1. The site is not the subject of planning permission. 2. The site is not allocated or proposed for development other than for the inclusion of a Local Green Space. 3. The site is not an extensive tract of land (generally greater than 20 hectares). 4. The site is in reasonably close proximity to the community it serves.

5. The site is demonstrably special to the local community (because of its beauty, local historic significance, recreational value, tranquility, or richness of wildlife).

9.6. The fifth criteria is sub-divided into 5 sub-parts, the approach to which is set out on pages 6 and 7 of the Council's Local Green Space Designation Methodology (February 2021) document.

9.7. The Council's consideration of sites in Benenden is set out on pages 2 to 7 of the Local Green Space Assessment Update.

9.8. The site is assessed as Site ref AS_45 (New Pond Corner). The Council suggest the site satisfies the criteria for Local Green Space designation.

9.9. Under the assessment sub-heading "Note" the assessment states in relation to the site as follows:

While it is acknowledged that this site is within a Conservation Area, it is considered that, given the limited reference to it in the Conservation Area Appraisal, this site benefits from further Local Green Space protection. In addition, the designation is supported by the local community because of its special value to the local community. This area contributes to the character/setting and local visual amenity of the settlement, being on the border of the main settlement, by providing an important green space gap between development. This area also includes a pond, green open space, and is bordered by significant trees and hedgerows.

9.10. We dispute this analysis, including for the reasons set out in the accompanying Heritage and Local Green Space Assessment undertaken by RPS (Nov 2019).

9.11. The assessment is set out in section 2 of the Statement, which includes the following commentary in relation to Site AS_45:

"This site contributes to the conservation area in a limited way. Its contribution is associated to the sense of openness that it provides when viewed from The Street because of the narrow views through the trees and hedges that line the northern boundary of the site. There are no clear views of the site from The Street. The sense of openness is a perception of the space rather than a close or immediate experience. From within Iden Green Road, there is only a very limited sense of the field to the west because the hedges are dense and prevent views into the site. There are no public rights of way through the area and so opportunities to increase the perception of the area are not possible.

There is no historic significance to the area. It is not connected to other designated areas such as The Homestead or undesignated heritage such as The Grange. It has no role in the development or social history of the settlement.

It makes a modest contribution to the settings of nearby listed buildings and the CA."

9.12. As to whether inclusion of the site as a Local Green Space is justified pursuant to criterion 5, the RPS Statement is quite clear that it is not, concluding as follows:

"No. There is little to no townscape value to the site because it is not visible within the streetscene. There is no public access to allow any perception of the character or quality of the space. It does contribute to the significance of the CA and the nearby LBs to a limited degree but this contribution is protected already through existing designations and the PLBCAA."

9.13. For all of the reasons set out above, the proposed designation of land west of Iden Green Road, Benenden as a Local Green Space is not justified having regard to the tests of soundness at paragraph 35 of the NPPF. This includes consideration of the Conservation Area Appraisal (appendix 12) (See figures 1, 3 and paragraphs 5.6 & 5.7).

9.14. There is consequently no justification that the site achieves any of the specific requirements of paragraph 100 (b). Whilst the schedule suggests that the site is potentially special to the community, there is no evidence of how or why it is having regard to the examples provided.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Local Green Space in policy EN15

9.15. The Plan therefore as currently prepared is not sound with respect of:

c) It is not justified as there is no evidence to support the inclusion of our clients land within the policy; and d) It is also inconsistent with national policy as the Council has not followed the advice in the NPPF and PPG to substantiate the policy. It is therefore contrary to paragraph 100(b) of the NPPF.

9.16. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That in the first instance, that policy EN15 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that all local green space sites are removed from the policies map; or 2. If policy EN15 is to be retained, that our client's site on land west of Iden Green Road, Benenden (site ref AS_45) is excluded from Policy EN15 as there is no evidence to support its inclusion.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR 1 The Development Strategy

Paragraph Nos. 4.39, 4.40, 4.41, 4.48

[TWBC: see also PSLP_976 under Policy STR 3 Brownfield Land]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraphs 4.39, 4.40, 4.41, 4.48 of the Local Plan place great emphasis on maintaining the integrity of the Green Belt and High Weald Area of Outstanding Natural Beauty (AONB), confirming that these are critical considerations in the distribution of development, and that the effective use of brownfield and urban land across the borough can make a significant contribution to avoid unacceptable impacts on these protected areas, and in doing so deliver overall sustainability benefits.

As a result, the development strategy set out in Policy STR 1 has been refined from that of the Draft Local Plan to provide greater urban intensification/brownfield site development.

Given the importance that is placed on the effective use of brownfield and urban land in the NPPF1 and in the explanatory text that supports Policy STR1, it is strange that the Council is relying on a windfall allowance to deliver a considerable proportion of its development need from such a significant land use category, particularly when there are large previously developed sites such as HMP Blantyre House, Horden, Goudhurst located within the Borough that may become available for alternative development during the plan period. It should also be recognised that whilst HMP Blantyre House is located outside of the Goudhurst Limits to Built Development, it is not located within the Greenbelt or the High Weald AONB, which the Local Plan is seeking to protect.

HMP Blantyre House is in the ownership of the Ministry of Justice and is a substantial property that extends to 11.75 hectares. It has incrementally developed over time from its original use as a Fegan Home for Boys, through its conversion to a Detention Centre for young offenders, before its final conversion to a resettlement prison for long term prisoners, which was designed to prepare men for their eventual release through training, education and lifestyle skills. The Blantyre House estate is therefore much more than just the main residential accommodation; it has a range of subsidiary buildings and infrastructure that extend the developed footprint of the site comprising some 26 buildings, a swimming pool, farm area, and associated hardstanding and car parking, all of which is consistent with the definition of previously developed land contained within Annex 2 of the NPPF2.

Blantyre House officially closed as a resettlement prison in 2019 and had been vacant for more than 2 years prior to that. Substantial decommissioning of the site has also been undertaken. The Ministry of Justice is currently considering the property's appropriateness for alternative secure accommodation uses within the same use class (C2a), but the property may become surplus to requirements during the plan period, at which point it will be marketed and sold for alternative uses.

This substantial, previously developed site would, at this point in time enter a new chapter in its lifecycle, and a new future use would need to be found otherwise there is a significant risk that it will fall into dereliction, which would disbenefit local residents and harm the local environment. This would be contrary to the Council's policy direction that such land can make a significant contribution to the development needs of the Borough, thereby avoiding unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

Leaving the future of such a substantial previously developed land asset to be resolved through the windfall allowance of the Local Plan is not considered to represent positive planning, and is certainly not the most effective strategy for finding the right solution for the re-purposing/re-use/re-development of such an important previously developed site.

It is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement³, as well as a reasonable alternative development site for the settlement of Goudhurst⁴, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outturn for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of their future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site-based solutions will be able to be found that will ensure that such an important previously developed property and land asset does not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Providing positive, effective, and clear policy guidance on the future of such substantial previously developed sites approach is clearly aligned and consistent with national policy and advice, specifically paragraph 118. and 79. of the National Planning Policy Framework (NPPF) where planning policies should:

118. (a) encourage multiple benefits from both urban and rural land, including through mixed use schemes and taking opportunities to achieve net environmental gains – such as developments that would enable new habitat creation or improve public access to the countryside; 118. (d) promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained, and available sites could be used more effectively; and 79. (c) re-use redundant or disused buildings and enhance their immediate setting.

Paragraph 119 of the NPPF further supports the case for specific policy guidance for substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB. This paragraph makes it clear that local planning authorities should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites held in public ownership where this can help to bring more land forward

for meeting development needs and/or secure better development outcomes. HMP Blantyre House is currently within public ownership (MoJ) and the landowner, MoJ, has previously made it clear to the Council that the property may become surplus to requirements during the plan period.

For the Local Plan to be positively prepared and justified, specific attention must be paid to substantial previously developed sites such as HMP Blantyre House that lie outside of Limits to Development but are not within the Green Belt or High Weald AONB.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

An additional policy criterion 10. should be added into policy STR1 that safeguards substantial previously developed sites that are located in the Countryside but not within the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period.

The following wording for the additional policy criterion 10. is suggested as follows:

10. Safeguard substantial previously developed sites that are located in the Countryside but outside of the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period and can demonstrate through a site wide masterplan that there will be no material or adverse effect on the character and amenities of the surrounding area, including an assessment against criteria 3. of Policy STR3 Brownfield Land.

Supporting explanatory text should be added in support of this additional criterion, which recognises the contribution that such sites can make to the future development needs of the Borough and assist in reducing unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB and in doing so deliver overall sustainability benefits. Without such safeguards there is a significant risk that these sites will fall into dereliction, resulting in disbenefits to local residents and harm to the local environment, particularly the Greenbelt and High Weald AONB.

A new table 6. should be added to clearly identify these substantial previously developed sites that are located in the Countryside but not within the Green Belt or High Weald AONB. HMP Blantyre House should be included within this table.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

On the basis that the property may become surplus to requirements during the plan period, and as a responsible public sector landowner⁵, MoJ considers it important that every opportunity is given to exploring all reasonable approaches to achieving the optimum planning outturn for such a large previously developed site in the countryside. Having the ability for MoJ's planning advisors Cushman & Wakefield to participate in the relevant hearing sessions represents positive planning to the MoJ, particularly in working with the Council and Inspector to achieve the most effective strategy and solution for the future re-purposing/re-use/re-development of such an important previously developed site.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Reiterating our representations made in question 5. above, it is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement⁶, as well as a reasonable alternative development site for the settlement of Goudhurst⁷, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outturn for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside the concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site based solutions will be able to be found that will ensure that such important previously developed property and land assets do not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 3 Brownfield Land

Paragraph Nus. 4.68, 4.69, 4.70 and 4.71

[TWBC: see also PSLP_969 under Policy STR 1 The Development Strategy]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not positively prepared
.	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

MoJ are supportive of the principles of paragraphs 4.68, 4.69, 4.70, 4.71 of the Local Plan, which seek to make as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land that serve to protect the Borough's important heritage, landscape qualities and designations (AONB), and Green Belt.

MoJ welcomes the Council's recognition at paragraph 4.71 that brownfield/PDL sites outside of Limits to Built Development will come forward for development but within the context of land in its ownership at HMP Blantyre House, Horden, Goudhurst does not agree that the future of substantial brownfield/PDL sites located within the countryside but outside of the Greenbelt and High Weald AONB should be left to consideration as part of the Local Plan's windfall allowance.

To reiterate MoJ's response to Policy STR1, and given the importance that is placed on the effective use of brownfield and urban land in the NPPF1, Policy STR1, and Policy STR3, it is strange that the Council is relying on a windfall allowance to deliver a considerable proportion of its development need from such a significant land use category, particularly when there are large previously developed sites such as HMP Blantyre House, Horden, Goudhurst located within the Borough that may become available for alternative development during the plan period.

HMP Blantyre House is in the ownership of the Ministry of Justice and is a substantial property that extends to 11.75 hectares. It has incrementally developed over time from its original use as a Fegan Home for Boys, through its conversion to a Detention Centre for young offenders, before its final conversion to a resettlement prison for long term prisoners, which was designed to prepare men for their eventual release through training, education and lifestyle skills. The Blantyre House estate is therefore much more than just the main residential accommodation; it has a range of subsidiary buildings and infrastructure that extend the developed footprint of the site comprising some 26 buildings, a swimming pool, farm area, and associated hardstanding and car parking, all of which is consistent with the definition of previously developed land contained within Annex 2 of the NPPF2.

Blantyre House officially closed as a resettlement prison in 2019 and had been vacant more than 2 years prior to that. Substantial decommissioning of the site has also been undertaken. The Ministry of Justice is currently considering the property's appropriateness for alternative secure accommodation uses within the same use class (C2a) but the property may become surplus to requirements during the plan period, at which point it will be marketed and sold for alternative uses.

This substantial, previously developed site would, at this point in time enter a new chapter and a new future use would need to be found, otherwise there is a significant risk that it will fall into dereliction, which would disbenefit local residents and harm the local environment. This would be contrary to the Council's policy direction that such land can make a significant contribution to the development needs of the Borough, thereby avoiding unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

Leaving the future of such a substantial previously developed land asset to be resolved through the windfall allowance of the Local Plan is not considered to represent positive planning, and is certainly not the most effective strategy for finding the right solution for the re-purposing/re-use/re-development of such an important previously developed site.

It is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement³, as well as a reasonable alternative development site for the settlement of Goudhurst⁴, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the sites accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outcome for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site-based solutions will be able to be found that will ensure that such an important previously developed property and land asset does not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Providing positive, effective, and clear policy guidance on the future of such substantial previously developed sites approach is clearly aligned and consistent with national policy and advice, specifically paragraph 118. and 79. of the National Planning Policy Framework (NPPF) where planning policies should:

118. (a) encourage multiple benefits from both urban and rural land, including through mixed use schemes and taking opportunities to achieve net environmental gains – such as developments that would enable new habitat creation or improve public access to the countryside; 118. (d) promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained, and available sites could be used more effectively; and 79. (c) re-use redundant or disused buildings and enhance their immediate setting.

Paragraph 119 of the NPPF further supports the case for specific policy guidance for substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB. This paragraph makes it clear that local planning authorities should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites held in public ownership where this can help to bring more land forward

for meeting development needs and/or secure better development outcomes. HMP Blantyre House is currently within public ownership (MoJ) and the landowner, MoJ, has previously made it clear to the Council that the property may become surplus to requirements during the plan period.

For the Local Plan to be positively prepared and justified, specific attention must be paid to substantial previously developed sites such as HMP Blantyre House that lie outside of Limits to Development but are not within the Green Belt or High Weald AONB.

2 land which is or was occupied by a permanent structure, including the curtilage of the developed land and any associated fixed surface infrastructure.³ Table 27 Sustainability Appraisal of the Pre-Submission Local Plan February 2021.⁴ Table 62 and Appendix O Sustainability Appraisal of the Pre-Submission Local Plan February 2021.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

MoJ does not consider that Policy STR3 requires any amendments because it believes that its suggested amendment to Policy STR1 addresses the current Local Plan shortcomings in relation to being positively prepared and justified (as set out in MoJ's response to Policy STR1).

MoJ does however consider that a new paragraph is added to the explanatory text that precedes Policy STR3. This text should make clear the positive contribution that substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB can make to the future development needs of the Borough, which will assist in reducing unacceptable impacts on protected areas such as the Greenbelt and High Weald AONB, and in doing so deliver overall sustainability benefits.

This explanatory text should be linked back to the suggested new criterion 10. of Policy STR1, which for the purposes of comprehensiveness is repeated here:

10. Safeguard substantial previously developed sites that are located in the Countryside but outside of the Green Belt or High Weald AONB for future development, where such development will make an important contribution to meeting the development needs of the Borough over the whole of the Plan period and can demonstrate through a site wide masterplan that there will be no material or adverse effect on the character and amenities of the surrounding area, including an assessment against criteria 3. of Policy STR3 Brownfield Land.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

On the basis that the property may become surplus to requirements during the plan period, and as a responsible public sector landowner⁵, MoJ considers it important that every opportunity is given to exploring all reasonable approaches to achieving the optimum planning outturn for such a large previously developed site in the countryside. Having the ability for MoJ's planning advisors Cushman & Wakefield to participate in the relevant hearing sessions represents positive planning to the MoJ, particularly in working with the Council and Inspector to achieve the most effective strategy and solution for the future re-purposing/re-use/re-development of such an important previously developed site.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Reiterating our representations made in question 5. above, it is recognised that the Council has considered HMP Blantyre House as a reasonable alternative for a garden settlement⁶, as well as a reasonable alternative development site for the settlement of Goudhurst⁷, and have concluded that it does not merit formal allocation within the Local Plan. The principal reason for this being that the site's accessibility was not considered to be sufficiently positive.

The MoJ does not believe that this assessment outcome has considered all reasonable alternatives to finding the optimum planning outturn for such a large previously developed site in the countryside and outside the Green Belt and High Weald AONB. The Local Plan therefore fails to make appropriate provision for the proper assessment of such sites by means of an appropriate and proportionate evaluation of its future alternative use.

Table 62 in Appendix O of the Sustainability Appraisal of the Pre-Submission Local Plan (February 2021) determines that the site has a positive score against both the Land Use objective and health assessment, which should in themselves suggest that greater attention should be paid to the future of this significant brownfield asset in the Countryside. Furthermore, Table 62 identifies that setting issues and heritage asset issues may need consideration, alongside the concern surrounding its accessibility and remote location. These issues are not unsurmountable and with due care and proper consideration, sustainable site based solutions will be able to be found that will ensure that such important previously developed property and land assets do not fall into dereliction. For example, the Council recognise in the commentary on Goudhurst reasonable alternative sites on page 173 of the Sustainability Appraisal that the nearest train station at Marden is relatively near but the direct bus service is poor, which is a situation that can be positively addressed through the consideration of specific site based sustainable travel options and investment.

Positive, effective, and clear policy guidance is required on the future of such substantial previously developed sites outside of Limits to Development and not within the Green Belt or High Weald AONB, rather than leaving the future of such important assets to windfall opportunities, which is an approach that clearly leads to the risk that such valuable brownfield assets will fall into dereliction.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non-existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the next few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **"It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly"** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley, Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de-designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coupled with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion **"if possible to provide betterment"**. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in High Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is **"and where possible, improve air quality"**. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these **"The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change"**. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity **"general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth"** cannot cope now and any further new houses will compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase "active travel" be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out **"It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters"** This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development “ chops” down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very “vitality” of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development. Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and grand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on **“It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.”** Objectives should be in place to achieve this not assumptions!

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch In policy in the DLP?

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships,

this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” **“The council strongly encourages”** is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main categories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear” The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”** It must read **“it will ensure by legal means”–that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Policy STR 6

Transport and Parking (statement).

- 1 **a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:**
- 2 **The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services**

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 **Public transport.**
- 3 **"Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:**

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is " Pie in the Sky" as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where's the evidence?

Car parking

Policy TP 3: Parking Standards

To revitalise our local high street and commercial centres after Covid the Borough must implement a free parking strategy across the board including PW car parks to give a boost to our local retailers and encourage people back to the shops in our community's.

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and I object to its inclusion in the DLP.

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out the sky and then make it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.
- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.
- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Allocation policies for Paddock Wood

Land at Mascalls Farm

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breached.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt “**Life Time Home Standards**” for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is “should” relating to the policy provision and it should be replaced by “**must**”. This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

- 1 **Highway safety and access**
- 2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion

along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

3 Crime reduction

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

1 Community engagement

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a 'fabric first' approach to reduce overall CO2 emissions from buildings. Developers "**must**" replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Policy EN 3 Climate Change

Mitigation and Adaptation

I broadly support the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. "**The Strategy for Paddock Wood and east Capel and STR/SS 3**" is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Pg388 Policy EN 25

Flood Risk

Where it is proven that the mitigation is not sustainable then the development should not be allowed as part of the DLP. Failure to do so will mean increased flooding in areas such as PW and Capel and the residents will pick up the cost, not the developers or the TWBC.

Pg 397.Policy H 1 & Pg401 H 3

Housing Mix

6.326 Within this policy statement there is no mention of the provision of Social Housing in the borough. As a matter of urgency this must be included after the pandemic and covid and hopefully the rebuilding of the economy.

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Personal Note.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, past history makes me think not. PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a Paddock Wood Town Councillor and these comments are based on a personal opinion and view on the various sections and paragraphs within the Draft Local Plan. They do not represent the views of the Town Council

This Tunbridge Wells Local Plan is probably the most controversial consultation to be submitted to the residents of Paddock Wood and the whole of TWBC to date. The plan is brief and has no exact detail in the documents justification for so many proposed new dwellings in the Borough. In fact some of the policies and statements made in the DLP contradict each other and in reality build their own reasons to why the proposed new 3,590 dwellings are unsustainable around the Town.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 2: Setting the Scene

Pg21. Paragraphs: 2.4, 2.17-2.19, 2.21-2.27, 2.33, 2.34, 2.41

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the nest few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **“It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly”** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough’s recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley , Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion **“if possible to provide betterment”**. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unstainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is **“and where possible, improve air quality”**. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these **“The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change”**. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Raymond Moon
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 3: Vision and Objectives	
pg29. Paragraphs: 3.3 and 3.8	
Question 4	
Do you consider that the Local Plan:	

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity **“general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth”** cannot cope now and any further new houses with compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out **“It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters”** This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 1 - Vision

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:**
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development "chops" down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very "vitality" of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development. Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and grand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main catogories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear”The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”**It must read **“it will ensure by legal means”–that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95.This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this , rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mentioned of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Raymond Moon

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on “It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.” Objectives should be in place to achieve this not assumptions!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch in policy in the DLP?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” “The council strongly encourages” is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Question 7

Policy STR 6

Transport and Parking (statement).

- 1 a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:
- 2 The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 Public transport.
- 3 "Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is “Pie in the Sky” as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where’s the evidence?

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and I object to its inclusion in the DLP.

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out the sky and then make it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.
- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme

weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.

- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Allocation policies for Paddock Wood

Land at Mascalls Farm (AL/PW1)

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breached.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt "**Life Time Home Standards**" for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is "should" relating to the policy provision and it should be replaced by "**must**". This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

- 1 **Highway safety and access**

- 2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

- 3 **Crime reduction**

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

- 1 **Community engagement**

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a 'fabric first' approach to reduce overall CO2 emissions from buildings. Developers "**must**" replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN 3 Climate Change

Mitigation and Adaptation

I broadly support the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Raymond Moon
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 5 Heritage Assets	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. “**The Strategy for Paddock Wood and east Capel and STR/SS 3**” is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Pg388 Policy EN 25

Flood Risk

Where it is proven that the mitigation is not sustainable then the development should not be allowed as part of the DLP. Failure to do so will mean increased flooding in areas such as PW and Capel and the residents will pick up the cost, not the developers or the TWBC.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Personal Note.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, past history makes me think not. PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/SA 1 Land on the south side of Sayville, Rye Road and west of Marsh Quarter Lane, Sandhurst

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy AL/SA 1 contained within the local plan is not consistent with national planning policy, see comments in 6 below.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Allocation policies for Sandhurst Parish:

Policy AL/SA 1 contained within the local plan is not consistent with national planning policy in that it would not constitute sustainable development in the context of the National Planning Policy Framework ("NPPF"). Paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty in Areas of Outstanding Natural Beauty ("AONB") as they have the highest status of protection. The development of this site will represent the loss of a medieval field and result in a harmful level of encroachment into the countryside, resulting in significant harm to the character and appearance of the High Weald AONB. It will be harmful to visual amenity, an existing public right of way (WC295) and will cause significant harm to the rural character of the locality. In addition it would affect the setting of a Grade II listed post-medieval historic farmstead.

There is at present a planning application for the development of 15 dwellings on the land subject to Policy AL/SA 1, under which the statutory consultees have identified in their responses that the development of the site would result in harm on the following grounds:

• Significant harm to High Weald Area AONB • Harm to green belt openness • Significant harm to setting of public right of way and visual impact • Harm to Ecology (Trees) • Harm to conservation area and setting of a listed building

Paragraph 5.771 provides that the location of the site 'would form a logical extension to Sandhurst village' – this is not the case. Development of the site would adversely affect the landscape both visually and functionally by virtue of its location beyond the built-up area of Sandhurst village, which is essentially a linear settlement in character, with the existing development contained to the ridgeline. Policy AL/SA 1 would result in harmful encroachment of development far beyond the existing built environment of the village, into greenbelt and the AONB, causing significant harm to the rural character of the AONB. Indeed planning permission has previously been refused for the development of the site on account of this harm, albeit for a larger scheme.

In the light of the above, Policy AL/SA 1 should be removed from the local plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

I wish to object strongly to this planning application.

There has been zero obvious sign that the application had gone ahead. There has been zero obvious sign that proper notifications have been made to the residents who would be potentially affected by the application and therefore proper time to make representations would have been potentially missed.

Pearsons Green Road leads onto Old Hay and the entrance to the proposed site. Both Old Hay and Pearsons Green Road are used extensively by large lorries, skip lorries and private vehicles reaching homes and also the West Kent Shooting School.

Pearsons Green Road is a 60 MPH country road and is very busy, to add further traffic would be both dangerous and would further destroy the road surface. I would expect that there would be a large growth in scrap metal vans on the roads also.

The road surface due to current use is some of the worst in the county and I have on occasion had the need to make a claim to the council for damage to my vehicle, this would rise exponentially.

In addition, adding a large site in Old Hay will inevitably grow, there is no mention of stables but that would be fully expected and there would then be extremely dangerous horse buggies & trotting on roads which are totally unsuited to the sport, causing significant delays and extreme danger as horses meet 18 wheeled articulated vehicles not to mention the terrible road surface, parts of which have already collapsed in the past.

The increased disruption, traffic and road safety and noise implications mean this application should be rejected in its entirety. The immediate local infrastructure is unable to support such a large increase and residents on Pearsons Green Road.

Is sound	Don't know
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I think the highways assessment is of crucial importance in this case. When this site was first considered vehicular access depended on demolishing two garages belonging to properties on The Street on the south side. The planning department should take note of the position and rights of the tennis club, the owners of the garages and the owner of the disused paddock. Three sheep have been grazed there within the past four years so the identity of the paddock's owner /user must surely be established before any work is undertaken.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see my comments above.

Question 7

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My concern here is with the single point of vehicular access onto Common Road.

Common Road gives access on its western side to the village primary school, and so is very busy at school run times with vehicles parking against the hedge where there is no footpath, as well as in the school's parking area. It also gives access to Bramling Gardens on the eastern side. Just a short distance further north of these access points Common Road is crossed by Frittenden Road at a staggered junction. There is not enough space for another access road with adequate sight lines, I think, given the bend in Common Road. A path for pedestrians will also be necessary.

Question 6

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I believe that it is unsound in relation to housing for older people in Policy H6 particularly in point 5.

Point 5 is ambiguous on the whether sites specifically allocated for specialist housing for older people should be "in accessible locations" or not. Its wording, due to its punctuation, and length make the intentions of the policy unclear.

On this basis I think that the Policy is not yet fully in accord with the NPPF.

NPPF paragraph 127 states that "Planning policies and decisions should ensure that developments..... f) create places that are safe, inclusive and accessible and which promote health and well-being etc"

Therefore I consider that Policy H6 is not fully in accord with NPPF.

I would think that housing for older people should be sited in locations that can be accessible on foot (or in a scooter)by the residents and by their visitors for reasons of safety, inclusiveness and accessibility. For example there should be adequate all-weather pavements between the site and local amenities that would be of particular use to the residents such as medical centres, pharmacies , convenience stores and bus stops.

Re: Tunbridge Wells Pre-Submission Local Plan Consultation – Representations on behalf of Mr D Munns regarding Grosvenor Garage Mitsubishi, 123 - 125 St James' Road, Tunbridge Wells TN1 2HG

We act on behalf of Mr David Munns, the owner and operator of Grosvenor Garage Mitsubishi, 123-125 St James' Road, Tunbridge Wells, TN1 2HG (the 'Site') and have been instructed to submit representations to the current consultation on the Pre-Submission Local Plan ('the draft Local Plan').

Background

The Site is owned and currently operated by our client as a Mitsubishi car dealership. The Site will be available for redevelopment in June 2022, as Mitsubishi Motors are withdrawing from selling new vehicles in Europe in September 2021 and the current business will be wound down from then to a closure in June 2022. As such, these representations are being submitted to ensure that there is a positive planning policy framework for the Site which would support and facilitate its redevelopment.

The Site and Surroundings

The Site extends to 0.126ha and is located on the eastern corner of the Junction of St James' Road, Quarry Road and Grosvenor Bridge, located approximately 0.6 miles to the north of Tunbridge Wells Town Centre. It is located within the main urban area of Royal Tunbridge Wells as the principal town and administrative centre as defined in the draft Local Plan.

The Site is bound by St James' Road to the north, Stratford Street to the east, a residential property on Stratford Street and commercial units on Quarry Road to the south and Quarry Road to the west. Please find enclosed a site location plan (ref: SJR-TW_SLP01), showing the Site location and the extent of our client's ownership.

The Site's existing use is a car showroom/dealership (Sui Generis) and is therefore "previously developed land". The site is currently occupied by a mixture of single and double storey buildings with a forecourt fronting St James' Road and parking spaces on the roof of the building accessed via Stratford Street.

The surrounding area is predominantly residential, generally characterised by 2-3 storey residential properties on the eastern side of St James' Road and Quarry Road and more modern 6 storey apartment blocks on the western side, recently or under construction (with the latter being a consented residential development on land opposite the Site).

The Site is an accessible and sustainable location, being within walking distance of facilities and services in Tunbridge Wells Town Centre and a Neighbourhood Centre and in close proximity to the 21st Century Cycle Route.

It is therefore considered that the Site represents a significant opportunity for redevelopment as previously developed land in the urban area of Tunbridge Wells and regeneration of the prominent junction location with use and scale commensurate with the recent development in the area.

The Site's Availability, Suitability and Achievability

The National Planning Policy Framework ('the NPPF') requires that planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability with regard to meeting housing needs. It further requires that planning policies should identify a supply of specific, deliverable sites for years one to five of the plan period, and specific developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan. The NPPF defines that to be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that the housing will be delivered on the site within five years.

As confirmed above, the Site will be available for redevelopment when the current operation ceases in June 2022. With the landowner's intention to promote the Site for redevelopment now with marketing of the Site to commence within the next 5-7 months, the Site has a realistic prospect of being delivered in the first five years of the Plan period, subject to a developer being identified and necessary planning permission.

It is considered that the Site is suitable and achievable for residential development, potentially with commercial use on the ground floor for the following reasons:

- . The Site is previously developed land within the Limits to Built Development ('LBD') within the main urban area of Royal Tunbridge Wells in the adopted and the draft Local Plans, where the NPPF and the draft Local plan prioritises for meeting housing needs. Vision and Strategic Objective 1, Policy STR1 and Policy STR/RTW1 of the draft Local Plan promote the effective use of urban and previously developed land in meeting the identified housing needs.
- . The existing buildings on the Site were converted from a storage building and subsequently extended through the redevelopment of part of the Site between the 1980s and 1990s as a car showroom. Therefore, the existing buildings and the Site configuration are bespoke to the operation of the Site as a car showroom. Therefore, the optimum reuse of the Site would be achieved through redevelopment of the Site.
- . The Site is a sustainable location for residential use, as it is located within the existing residential area of the Neighbourhood Centre, within walking distance of Tunbridge Wells town centre and in close proximity to the existing cycle route.
- . The Site's existing use as a car showroom is not safeguarded as designated employment land in the existing Local Plan and the draft Local Plan. As such, in principle, the Site's redevelopment for alternative residential development does not conflict with the existing or emerging land use policy.
- . There are no known constraints which would preclude the Site's redevelopment for residential development.

The above demonstrates that the Site is available and suitable for housing development and is achievable with a realistic prospect that housing development is delivered within the first five years of

the Plan period. The Site is a deliverable housing site, which should be allocated for residential development in the emerging Local Plan in line with the NPPF and the draft policies which seek to meet the housing needs through the effective use of previously developed land in the urban area of Tunbridge Wells.

Meeting the Housing Need

The draft Local Plan proposes to meet the identified housing need from the following sources:

- . The number of dwellings that already have planning permission;
- . Sites that are already identified within the Site Allocations Local Plan 2016, but which have not yet been implemented, and
- . 'Windfall' – non-allocated sites – which are small sites that are not identified in plans but come forward in line with the general, rather than site-specific policies.

The draft Local Plan describes windfall sites as a reliable source of supply, as the occurrence of these and likely future trends has been carefully reviewed and there is compelling evidence that such sites will continue to provide a reliable source of supply. Of 12,204 dwellings identified as the housing need, the draft Local Plan relies on windfall sites to deliver 1,670 units and the minimum total allocations for 7,221 units. Furthermore, it also notes that the potential for unmet needs elsewhere outside the Borough needs to be considered. As such the number of dwellings to be delivered through allocations are the minimum requirement.

Policy STR/RTW 1 of the draft Local Plan seeks to deliver additional housing through the redevelopment and intensification of windfall development within the defined LBD in Royal Tunbridge Wells in addition to allocations. Therefore, the Site's redevelopment for housing could come forward as a windfall site. The Borough's Development Strategy Paper for Pre-Submission Local Plan (2021) identifies that the suitable previously developed land and underutilised land within the LBD have already been allocated in the adopted Local Plan documents, resulting in limiting the number of remaining such suitable sites for additional allocations in the emerging Local Plan. As the Site is previously developed land within the LBD and is a deliverable housing site as demonstrated above, it should be allocated for residential development so that the Site's opportunity to contribute to meeting the housing needs is secured through the Local Plan. The NPPF also supports this approach and states that Local Plans "should positively seek opportunities to meet the development needs of their area".

In terms of the Site's capacity, based on the Site area, context and accessibility and the density of recent residential developments in the area, it is considered that the Site has a potential to deliver circa 25 units, subject to the design process and the mix of units. The allocation of the Site would be in line with the NPPF which advises that small and medium sized sites can make an important contribution to meeting housing development of an area, and are often built-out relatively quickly. Indeed, the site allocations within the Local Plan includes sites as small as having a capacity to deliver 9 units.

Conclusion

To conclude, these representations seek the allocation of the Site for residential development on the basis that:

- . It is previously developed land within the BDL of the urban area of Tunbridge Wells in a sustainable location;
- . It is available and suitable for housing development with a realistic prospect that it is delivered within five years of the Plan period; and
- . It has the significant opportunity to contribute to meeting the housing needs.

It is therefore considered that to ensure the soundness of the draft Local Plan, the Site should be allocated so that the Local Plan is positively prepared and consistent with national policy which seeks to enable the delivery of sustainable development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To allocate the site at Grosvenor Garage Mitsubishi, 123-125 St James' Road, Tunbridge Wells for residential development (potentially with commercial use) for including in Policy STR/RTW1.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We wish to reserve our right to participate in the hearing session to explore the Inspector's Matters, Issues and Questions in relation to the proposed allocation of the site.

If you would like to attach a file in support of your comments, please upload it here. [PSLP_581_Rapleys for Mr Munns SI-1 Site location plan.pdf](#)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The National Trust supports the removal of the four proposed site allocations at Sissinghurst consulted on at Regulation 18 stage:

- . Policy AL/CRS 12 Land on the east side of Mill Lane (5-10 dwellings);
- . Policy AL/CRS 13 Land east of Camden Lodge, adjoining to Mill Lane and Sissinghurst Road (40 dwellings);
- . Policy AL/CRS 15 Oak Tree Farm, The Common, Wilsley Pound (15-20 dwellings);
- . Policy AL/CRS 16 Land at Boycourt Orchards, Angley Road Wilsley Pound (20-25 dwellings).

This will revise the proposed site allocation figure down from approximately 100-115 new dwellings to 38 dwellings at Sissinghurst which will put less pressure on the existing wastewater treatment works (WWtW) in Sissinghurst.

The existing WWtW is located on the western boundary of the Sissinghurst Castle Estate. All the wastewater from the village is treated at this WWtW prior to being discharged into the Hammer Stream which flows through the National Trust Estate. Hammer Stream currently has a status of 'moderate' under the Water Framework Directive (WFD). The National Trust needs certainty from the LPA and Southern Water that should development be delivered on the two proposed allocations at Sissinghurst that being, land south of The Street (Policy AL/CRS 6) and land at the corner of Frittenden Road and Common Road (Policy AL/CRS 7) management processes and appropriate pollution control measures will be in place to ensure that there are no direct or indirect adverse impacts on the water quality of Hammer Stream.

The National Trust therefore supports Policy EN 24 Water Supply, Quality and Conservation which seeks to protect water quality by only permitting development where it can be demonstrated that it would not result in (1.) unacceptable risk to the quality or quantity of surface and ground water resources.

The proposed Bedgebury to Sissinghurst cycle path route referred to in Policy STR/CRS 1 criterion 5 is not shown within the Borough Cycling Strategy 2016-2020 and it is therefore not clear whether the proposed route would affect National Trust land. It would be useful for the route to be shared by Kent County Council with stakeholders and interested parties to aid partnership working on this objective.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HO 2 Land south of Brenchley Road and west of Fromandez Drive

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The National Trust are the owners and custodians of Sprivers Historic Park and Garden that adjoins the proposed site allocation on its western edge. This allocation presents a number of significant opportunities for the National Trust in relation to Sprivers with potential for improved public access, new parking and greater community engagement and we would welcome constructive engagement at the pre-application design stage with the applicant. We also support criterion 5 which requires opportunities to be explored to provide a pedestrian access into the Sprivers historic park and garden from the site. The historic park is open to the public, so correction needed at paragraph 5.587 please remove '(not open to the general public)'.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

The National Trust are the owners and custodians of Scotney Castle located to the east of the proposed site allocation. We support additional wording added to criterion 4 which now required applicants to liaise with the National Trust in the delivery of a potential connection to WT380 to provide ready pedestrian (and cycle) links to Scotney Castle estate as there maybe potential operational issues which will need addressing.

The National Trust also supports criterion 7 which requires an assessment of potential adverse effects on the Scotney Castle SSSI as a result of development as part of any application and, if required, the proposal shall include adequate mitigation measures to the satisfaction of Natural England to ensure no adverse effects on the SSSI.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

The National Trust has aspirations to enhance and extend the existing green corridor from the roundabout towards Sweet Bourne stream and northwards through the Scotney Castle Estate and through future potential partnership projects with land owners alongside the Lamberhurst Bypass. We are aware that Tunbridge Wells Borough Council are seeking to produce a Green Infrastructure Supplementary Planning Document in the near future, and we would welcome dialogue and constructively inputting into your plan preparation process of this SPD.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 3: Vision and objectives

As stated at our Regulation 18 response, we support the strategic objective to 'conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature' However, our advice regarding the proposed allocations still apply as they do not fully contribute to protecting the natural environment of the Borough. Natural England's advice on landscape issues and specific allocations in relation to the High Weald AONB are provided in other sections of this letter.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts

should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While we consider the local plan to have been positively prepared, Natural England advises that we consider the local plan fails the test of soundness as its Development Strategy (STR 1) and the major development site allocations* within the High Weald Area of Outstanding Natural Beauty (AONB) **are not consistent with national policy** with regard to conserving and enhancing the landscape and scenic beauty within the AONB (NPPF Paragraphs 11 and 172).

Natural England also advises that the Development Strategy (STR 1) and the major development site allocations* within the AONB are not justified because we do not consider that it has been demonstrated that the allocation sites are deliverable without resulting in an adverse impact on the High Weald AONB, considered against reasonable alternatives.

*The major development site allocation policies that we consider to fail the test of soundness are:

- . AL/RTW 17 Land adjacent to Longfield Road
- . AL/CRS 1 Land at Brick Kiln Farm, Cranbrook
- . AL/CRS 2 Land south of Corn Hall, Crane Valley, Cranbrook
- . AL/CRS 3 Turnden Farm, Hartley Road, Cranbrook (**which is currently subject to a live Public Inquiry which Natural England is attending as a rule Six party**)
- . AL/HA 4 Land off Copthall Avenue and Highgate Hill
- . AL/BM 1 Land between Brenchley Road, Coppers Lane and Maidstone Road
- . AL/PE1 Land rear of High Street and west of Chalket Lane
- . AL/PE2 Land at Hubbles Farm and south of Hastings Road
- . AL/PE3 Land north of the A21, south and west of Hastings Road

Please see our full letter response, which we have emailed with this representation form, for detailed comments regarding our advice on soundness and improvements that could be made to the local plan.

[TWBC: response as follows]

Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation(Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations)

Thank you for your consultation on the above dated 26 March 2021 which was received by Natural England on the same date. We welcome the level of consideration that Tunbridge Wells Borough Council (TWBC) have taken to address some of the issues that we raised during the Regulation 18 consultation in our response dated 19th November 2019.

We recognise TWBC's commitment to working with us and their transparency regarding their methodology towards their updated Development Strategy (STR 1) and Site Allocations. We welcome the significant improvements that have been made such as dropping a number of major development allocations in favour of smaller developments that are more sensitive to the AONB. However, we cannot advise that the plan has met the NPPF tests; specifically due to the plan's assessment of the need for major development site allocations within the Protected Landscape and the determination of these allocations prior to them being tested through the plan-led approach, which need to be addressed before we can advise that a sound local plan can be secured.

The first section of this letter outlines a summary of our response including our comments on soundness. The following appendices provide more detailed comments to supplement our overarching response:

1. Development Strategy (STR 1)
2. Major development allocations within the High Weald AONB
3. Sustainability Appraisal
4. Strategic site allocations in the setting of the High Weald AONB
5. Habitats Regulations Assessment
6. Pre-submission local plan policies

Soundness

While we consider the local plan to have been positively prepared, Natural England advises that we consider the local plan fails the test of soundness as its Development Strategy (STR 1) and the major development site allocations* within the High Weald Area of Outstanding Natural Beauty (AONB) are **not consistent with national policy** with regard to conserving and enhancing the landscape and scenic beauty within the AONB (NPPF Paragraphs 11 and 172).

Natural England also advises that the Development Strategy (STR 1) and the major development site allocations* within the AONB are not justified because we do not consider that it has been demonstrated that the allocation sites are deliverable without resulting in an adverse impact on the High Weald AONB, considered against reasonable alternatives.

*The major development site allocation policies that we consider to fail the test of soundness are:

- AL/RTW 17 Land adjacent to Longfield Road
- AL/CRS 1 Land at Brick Kiln Farm, Cranbrook
- AL/CRS 2 Land south of Corn Hall, Crane Valley, Cranbrook
- AL/CRS 3 Turnden Farm, Hartley Road, Cranbrook **(which is currently subject to a live Public Inquiry which Natural England is attending as a rule Six party)**
- AL/HA 4 Land off Copthall Avenue and Highgate Hill
- AL/BM 1 Land between Brenchley Road, Coppers Lane and Maidstone Road
- AL/PE1 Land rear of High Street and west of Chalket Lane
- AL/PE2 Land at Hubbles Farm and south of Hastings Road
- AL/PE3 Land north of the A21, south and west of Hastings Road

Appendices 1, 2 and 3 of this letter provides more detailed comments regarding our advice on soundness and make suggestions for ways to address our concerns. Other policies referred to in this letter are not considered to be unsound and our advice regarding these is given to help the council improve the overall suitability of the local plan and to highlight policies that we support.

Exploring alternatives

We advise that the major development allocations within the AONB (listed above) should not be pursued and that alternative approaches should be further explored to avoid negative impacts on the AONB by reducing the size and scale of these allocations. This should be informed by engagement with Natural England and the High Weald AONB Unit. Policies should sensitively consider non-major development within the AONB and on any rural and edge of settlement sites in line with LVIA's, the High Weald Management Plan (2019-2024) and a landscape-led approach. This approach has been taken by Mid Sussex District Council's adopted local plan (2014-2031) which also contains a significant area that is within the High Weald AONB (see Appendix 3 for our comments regarding the Sustainability Appraisal and alternative options).

Summary of response

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Appendix 1: Development Strategy (STR 1)

Summary of Regulation 18 response

In response to the Tunbridge Wells Borough Council (TWBC) Draft Local Plan consultation (Regulation 18) in November 2019, Natural England expressed serious concern regarding the Development Strategy's allocation of numerous major development sites within the High Weald Area of Outstanding Natural Beauty (AONB). This is because we considered these allocations would cause direct, permanent and significant harm to a nationally important designated landscape, which cannot be mitigated to reduce adverse impacts to an acceptable level.

We strongly advised that the proposed Development Strategy was not justified or consistent with national policy as it did not meet the exceptional circumstances criteria set out in NPPF para 172, which states that:

"Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks and the Broads

The scale and extent of development within these designated areas should be limited' and that 'Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.' The NPPF then states that consideration of such applications should include an assessment of:

a) The need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) The cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) Any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated."

We advised that *'it is not possible to mitigate the significant adverse impacts arising from this level of development within and in the setting of the AONB. Major development should be located outside of the AONB, and designated landscapes should not be relied upon to meet housing needs within the Borough.'*

Overarching comments

We recognise and welcome the level of effort and consideration that TWBC has made to address our previous concerns by using LVIA evidence and drawing on Natural England's advice to reassess the allocation of major development within the AONB. As a result of this process, we recognise and support TWBC's decision to delete a number of major development site allocations in the AONB.

These deletions include Hawkhurst Golf Course, where a planning application at the site has recently gone to appeal due to non-determination. We fully support TWBC's decision that it would have refused planning permission for the proposed development, due, amongst other matters, to the significant adverse impact it would have on the AONB, and that the proposal failed to satisfy the exceptional circumstances tests set out within para 172 of the NPPF.

Whilst we support the positive changes that have been made to the allocations in the pre-submission local plan, we advise that the plan is unsound and not consistent with national planning policy due to

the major development allocations that are proposed to remain within the AONB. As we advised at the Regulation 18 stage of the local plan, we do not consider that AONBs are suitable locations for major development. Natural England has an in-principle objection to major development within the High Weald AONB as we consider it would result in significant harm to the purposes of designation of this nationally important landscape.

Evidence for managing impacts on the AONB

Natural England welcomes the use of Landscape and Visual Impact Assessments (LVIAs) to inform the design, extent and layout of non-major development within the AONB and in the setting, but it is our view that the LVIAs do not provide adequate assurance that the effects of the development on the landscape and scenic beauty of the nationally designated and sensitive landscape of the High Weald could be sufficiently mitigated. In particular, we do not support that developing within the AONB can be justified where sites are in poor condition, have fewer AONB components or where attempts will be made to enhance retained parts of the AONB on or near site.

Natural England's advice is that the AONB's designation purpose to conserve and enhance is very difficult to achieve if significant parts of it are permanently lost to major development built directly onto it. This is because it is likely to entirely alter the landscape character across the site and, potentially, the surrounding area, especially where its character is intrinsically linked to the absence of adjacent or nearby development. In contrast, very carefully designed, smaller scale housing schemes that reflect local vernacular and settlement morphology, may achieve genuine enhancement or at least keep the level of impact on the AONB below a significant threshold.

Addressing development within the AONB and its setting

Allocations within the AONB itself may be more acceptable if their size and scale are significantly reduced such that they no longer represent major development and are consistent with the objectives of the AONB management plan. Natural England's view is that any development within the AONB must be very sensitively designed and modestly scaled. Sensitive design can include reflecting the local vernacular in terms of built design and materials, respecting existing settlement morphology, and how that settlement relates to the wider landscape both visually and in terms of physical connectivity, and supported by appropriate green infrastructure.

Natural England's concern regarding the impacts of major development on the AONB are added to by the significant pressure of development in the setting of the AONB, particularly at Tudeley Village (STR/SS 3) and Paddock Wood/East Capel (STR/SS 1). We advise that development in the setting of the AONB needs to be sensitively considered using a landscape-led approach (see Appendix 4 for our comments and suggestions).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these

allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'.

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

STR 8: Conserving and Enhancing the Natural, Built, and Historic Environment

Natural England welcome the policy in point 4 which requires development within the AONB to be managed in a way that conserves and enhances the natural beauty of the area. We also welcome the landscape-led approach outlined in point 3.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones

as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘- -’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 5: Place shaping policies

Please note that where we have not objected to, or otherwise commented on, a policy or proposal, it should not be assumed that it would not have an adverse effect on landscape or the environment because comments on individual allocations have been focused on those with the greatest risk of environmental impact on the High Weald AONB which this Regulation 19 response is most concerned with (see Appendix 1).

Advice on environmental issues which we advise are incorporated more widely into the policies is provided below.

Incorporation of Green Infrastructure into new development

We interpret the local plan as requiring the EN 14: Green, Grey and Blue Infrastructure to be referred to for all development proposals to ensure Green Infrastructure is a consistent consideration given its multiple benefits. However, our comments made at Regulation 18 still apply in that references to Green Infrastructure provision could be clearer and made more consistent throughout the local plan to give it more emphasis within strategic site allocations at the Parish level.

Landscape

We note that our Regulation 18 consultation response does not appear to have been addressed regarding preventing coalescence of development. We welcome its reference in point 6.224 and suggest that this be linked with the policy summary box EN18 more clearly to ensure it is appropriately considered as part of development proposals.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'.

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('-' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute

to the neutral score for the chosen growth strategy) are interpreted with some caution. Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 16 Land to the west of Eridge Road at Spratsbrook Farm

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11,

Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/RTW 16 - Land to the west of Eridge Road at Spratsbrook Farm

Whilst only part of this site is allocated within the AONB itself, it is considered as major development by TWBC, which is adjacent to the AONB boundary with allocated green space/buffer zone allocated for use as recreational space. Although Natural England does not advise that this policy is considered unsound for the purposes of the NPPF tests, we advise that this site should be approached very sensitively, using a landscape-led approach, in line with our advice regarding major developments in the setting of the AONB (see 'Addressing development within the AONB and its setting' in Appendix 1).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/RTW 17 - Land adjacent to Longfield Road Natural England recognises that a planning application for development at this site (19/02267/OUT), which Natural England objected to, on basis of major development within AONB, has been granted permission.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic

Environmental Assessment, but only where there are potentially significant environmental effects.’). This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Appendix 4: Strategic site allocations in the setting of the High Weald AONB (STR/SS 1 and STR/SS 3)

Natural England advises that careful consideration is made regarding the significant level of development allocated in the setting of the AONB. This includes the draft allocation for 3,490-3,590 dwellings at Paddock Wood/East Capel (STR/SS 1), and the draft allocation for 2,800 dwellings at the garden settlement at Tudeley Village (STR/SS 3). Whilst in principle we do not object to these allocations, we advise a sensitive approach be taken regarding the significant impact the proposals may have on the AONB setting.

Natural England welcomes the policy commitment to produce Framework Masterplan SPDs to set out how these strategic allocations will be designed and delivered. Natural England advises that these sites should be very sensitively designed, using a landscape-led approach informed by the AONB management plan, to ensure the impacts to the setting of the AONB are avoided and mitigated. Sensitive design can include reflecting the local vernacular in terms of built design and materials, respecting existing settlement morphology, and how that settlement relates to the wider landscape both visually and in terms of physical connectivity, and supported by appropriate green infrastructure.

Natural England recognises that further detailed policy will emerge as the master-planning work continues and the supporting SPDs are produced. We advise that improvements should be made to the proposed policies for any subsequent policy writing for these strategic site allocations. Making changes at this early stage should help to ensure that appropriate masterplans are produced and high-quality development that maximises environmental gains comes forward. This should help TWBC to achieve its stated vision of new, sustainable infrastructure and excellent service provision (point 5.179 regarding Paddock Wood) and the highest standards of design (point 5.199 regarding Tudeley

Village), while also helping to address this substantial level of development within 0.7 mile of the High Weald AONB.

We are committed to working with TWBC to help secure sensitively-designed and sustainable development for these strategic allocations and advise that TWBC also seeks and uses the advice of the High Weald AONB Unit.

Tudeley Village

We welcome the reference to consideration that should be given to key landscape characteristics (Policy point 7b). However, landscape impacts on the AONB and its setting require sensitive consideration given the scale and proximity to the AONB boundary. Therefore, Natural England advises that this policy is strengthened to make a landscape-led approach integral to the policy for this strategic development by making the following improvements:

- require a high quality and detailed Landscape and Visual Impact Assessment (LVIA) and landscape capacity study as part of the application
- strengthen wording around need for considerable detailed assessment of mitigation options, including quantum, location, density, height and design of buildings
- require an overarching Green Infrastructure (GI) strategy for the garden settlement which includes a functional assessment of existing GI assets and apply consideration of the needs of the new community. This should include what function is needed and where, and what type of GI is needed to deliver it, and how this will be managed in the long-term.

We welcome principle 8 (point 5.223) which commits to good quality green and blue infrastructure. Given the impacts and opportunities that come with this scale of development, we advise that the wording is strengthened to show a clear commitment to delivering environmental net gains. Instead of 'considers opportunities', we suggest wording that looks to embrace the opportunities by delivering environmental net gains should be used. This should be integral to this strategic development from the outset.

As part of this, we advise that this strategic site allocation is given particular consideration within TWBC's upcoming SPD for Biodiversity Net Gain (EN 9), given the opportunities for taking a nature recovery network approach when designing and planning at this scale that maximises the benefits of biodiversity net gains through connected ecological networks that support local priorities. As part of good quality green and blue infrastructure, we also advise that Sustainable Drainage Systems (SuDS) that maximise landscape and biodiversity value are prioritised and should be mentioned in the policy. Policies should also make it clear that any green infrastructure is managed and maintained. These suggested changes should be made within the policy summary itself to give them an appropriate level of emphasis.

We recognise that point 5.228 suggests that the provisional LBDs are not fixed at this point and we advise that these should be determined by landscape-led approaches and ecological considerations, including consideration of ancient woodland that is adjacent to the site. This should be supported by appropriately detailed ecological studies carried out at key stages of the masterplan and early design.

We suggest that point 5.229 should be stronger by making the following wording changes: 'The SPD will need to be adopted before any planning permissions for ~~substantial~~ new development at Tudeley Village are granted, **which would be considered to pre-empt the vision of strategic development before it has been appropriately scrutinised**, unless exceptional circumstances arise' We welcome point 5.227 and suggest this would be stronger if it directly references national and local net-zero carbon commitments and the climate emergency, to ensure it is clear what is being targeted here.

Paddock Wood and East Capel

There are several comments made regarding Tudeley Village which also apply to Paddock Wood, including our advice that environmental net gains should be an integral part of the strategic policy, the importance of taking a landscape-led approach, including for determining the LBDs, and the reference to net zero carbon targets (point 5.188).

We support point 5.161, which promotes the design principle of maintaining a strong tree belt and its connection with nearby ancient woodland (point 5.162).

We welcome the principle of using nature-based solutions that is evident in proposals for Paddock Wood Wetlands Park as a significant new area of natural open space which provides multiple benefits.

We are pleased to see the recognition that this strategic site should be a source of reducing flood risk, particularly given the land that is in flood risk zone 2/3 and advise that a policy requirement is added that will require SuDS and Green Infrastructure as an integrated part of future development due to the multiple benefits this can bring including ecological enhancement.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('-' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts

on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution. Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11,

Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 4: Strategic site allocations in the setting of the High Weald AONB (STR/SS 1 and STR/SS 3)

Natural England advises that careful consideration is made regarding the significant level of development allocated in the setting of the AONB. This includes the draft allocation for 3,490-3,590 dwellings at Paddock Wood/East Capel (STR/SS 1), and the draft allocation for 2,800 dwellings at the garden settlement at Tudeley Village (STR/SS 3). Whilst in principle we do not object to these allocations, we advise a sensitive approach be taken regarding the significant impact the proposals may have on the AONB setting.

Natural England welcomes the policy commitment to produce Framework Masterplan SPDs to set out how these strategic allocations will be designed and delivered. Natural England advises that these sites should be very sensitively designed, using a landscape-led approach informed by the AONB management plan, to ensure the impacts to the setting of the AONB are avoided and mitigated. Sensitive design can include reflecting the local vernacular in terms of built design and materials, respecting existing settlement morphology, and how that settlement relates to the wider landscape both visually and in terms of physical connectivity, and supported by appropriate green infrastructure.

Natural England recognises that further detailed policy will emerge as the master-planning work continues and the supporting SPDs are produced. We advise that improvements should be made to the proposed policies for any subsequent policy writing for these strategic site allocations. Making changes at this early stage should help to ensure that appropriate masterplans are produced and high-quality development that maximises environmental gains comes forward. This should help TWBC to achieve its stated vision of new, sustainable infrastructure and excellent service provision (point 5.179 regarding Paddock Wood) and the highest standards of design (point 5.199 regarding Tudeley

Village), while also helping to address this substantial level of development within 0.7 mile of the High Weald AONB.

We are committed to working with TWBC to help secure sensitively-designed and sustainable development for these strategic allocations and advise that TWBC also seeks and uses the advice of the High Weald AONB Unit.

Tudeley Village

We welcome the reference to consideration that should be given to key landscape characteristics (Policy point 7b). However, landscape impacts on the AONB and its setting require sensitive consideration given the scale and proximity to the AONB boundary. Therefore, Natural England advises that this policy is strengthened to make a landscape-led approach integral to the policy for this strategic development by making the following improvements:

- require a high quality and detailed Landscape and Visual Impact Assessment (LVIA) and landscape capacity study as part of the application
- strengthen wording around need for considerable detailed assessment of mitigation options, including quantum, location, density, height and design of buildings
- require an overarching Green Infrastructure (GI) strategy for the garden settlement which includes a functional assessment of existing GI assets and apply consideration of the needs of the new community. This should include what function is needed and where, and what type of GI is needed to deliver it, and how this will be managed in the long-term.

We welcome principle 8 (point 5.223) which commits to good quality green and blue infrastructure. Given the impacts and opportunities that come with this scale of development, we advise that the wording is strengthened to show a clear commitment to delivering environmental net gains. Instead of 'considers opportunities', we suggest wording that looks to embrace the opportunities by delivering environmental net gains should be used. This should be integral to this strategic development from the outset.

As part of this, we advise that this strategic site allocation is given particular consideration within TWBC's upcoming SPD for Biodiversity Net Gain (EN 9), given the opportunities for taking a nature recovery network approach when designing and planning at this scale that maximises the benefits of biodiversity net gains through connected ecological networks that support local priorities. As part of good quality green and blue infrastructure, we also advise that Sustainable Drainage Systems (SuDS) that maximise landscape and biodiversity value are prioritised and should be mentioned in the policy. Policies should also make it clear that any green infrastructure is managed and maintained. These suggested changes should be made within the policy summary itself to give them an appropriate level of emphasis.

We recognise that point 5.228 suggests that the provisional LBDs are not fixed at this point and we advise that these should be determined by landscape-led approaches and ecological considerations, including consideration of ancient woodland that is adjacent to the site. This should be supported by appropriately detailed ecological studies carried out at key stages of the masterplan and early design.

We suggest that point 5.229 should be stronger by making the following wording changes: 'The SPD will need to be adopted before any planning permissions for ~~substantial~~ new development at Tudeley Village are granted, **which would be considered to pre-empt the vision of strategic development before it has been appropriately scrutinised**, unless exceptional circumstances arise' We welcome point 5.227 and suggest this would be stronger if it directly references national and local net-zero carbon commitments and the climate emergency, to ensure it is clear what is being targeted here.

Paddock Wood and East Capel

There are several comments made regarding Tudeley Village which also apply to Paddock Wood, including our advice that environmental net gains should be an integral part of the strategic policy, the importance of taking a landscape-led approach, including for determining the LBDs, and the reference to net zero carbon targets (point 5.188).

We support point 5.161, which promotes the design principle of maintaining a strong tree belt and its connection with nearby ancient woodland (point 5.162).

We welcome the principle of using nature-based solutions that is evident in proposals for Paddock Wood Wetlands Park as a significant new area of natural open space which provides multiple benefits.

We are pleased to see the recognition that this strategic site should be a source of reducing flood risk, particularly given the land that is in flood risk zone 2/3 and advise that a policy requirement is added that will require SuDS and Green Infrastructure as an integrated part of future development due to the multiple benefits this can bring including ecological enhancement.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts

on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution. Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- It is not justified
- It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/CRS 1 - Land at Brick Kiln Farm, Cranbrook

Natural England recognises that this site allocation for 180 dwellings has extant consent from the Tunbridge Wells Site Allocations Local Plan 2016 and represents major development within the AONB. Natural England continues to object it as an allocation for major development as it is being put forward in the context of a new local plan and needs to be tested through the new local plan process.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.'). This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Respondent's Name and/or Organisation	Natural England
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/CRS 2 Land south of Corn Hall, Crane Valley, Cranbrook

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11,

Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/CRS 2 - Land south of Corn Hall, Crane Valley, Cranbrook

Whilst this site, individually, is not identified as major development by TWBC, it is considered to represent major development cumulatively with AL/CRS 1 (as part of CRS 9) and given its close proximity to AL/CRS 3. Natural England therefore objects its inclusion as an allocation but we consider that it may be more acceptable if AL/CRS 1 and AL/CRS 3 are withdrawn or significantly reduced such that they no longer represent major development, and where AL/CRS 2 is sensitively designed

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/CRS 3 - Turnden Farm, Hartley Road, Cranbrook

Natural England objected to the draft allocation of this site in our Regulation 18 response to the local plan. We also objected to a planning proposal for this site (20/00815/FULL) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Natural England considers a major development proposal at the site would result in significant harm to the AONB. We are therefore maintaining our objection to the draft allocation of this site within the local plan, consistent with both our previous advice and our response to the planning application for development at the site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'.

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('-' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute

to the neutral score for the chosen growth strategy) are interpreted with some caution. Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/HA 4 - Land off Copthall Avenue and Highgate Hill

We note the Council's recent refusal for planning permission at this site which Natural England objected to. Natural England therefore objects its inclusion as an allocation but we consider that it may be more acceptable if its size and scale are significantly reduced such that it no longer represents major development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.'). This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/BM 1 - Land between Brenchley Road, Coppers Lane and Maidstone Road

Natural England recognises that a planning application for development at this site (19/01099/OUT), which Natural England objected to on the basis of major development within AONB, has been granted permission.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.'). This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/PE1 - Land rear of High Street and west of Chalket Lane;

AL/PE2 - Land at Hubbles Farm and south of Hastings Road;

AL/PE3 - Land north of the A21, south and west of Hastings Road

Whilst these three sites, individually, are not identified as major development by TWBC, they are considered to cumulatively represent major development. Natural England therefore objects their inclusion as allocations, but we consider that they may be more acceptable if their size and scale are reduced such that, taken together, they no longer represent major development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 2 Land at Hubbles Farm and south of Hastings Road

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11,

Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/PE1 - Land rear of High Street and west of Chalket Lane;

AL/PE2 - Land at Hubbles Farm and south of Hastings Road;

AL/PE3 - Land north of the A21, south and west of Hastings Road

Whilst these three sites, individually, are not identified as major development by TWBC, they are considered to cumulatively represent major development. Natural England therefore objects their inclusion as allocations, but we consider that they may be more acceptable if their size and scale are reduced such that, taken together, they no longer represent major development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 2: Major development allocations within the High Weald AONB

Our core reason for considering the local plan as unsound is due to the proposed allocations within the AONB that have been defined by TWBC as major development. These include some sites that have been granted planning permission without the support of an allocation in the adopted local plan and we continue to object to the draft allocations for major development.

Natural England objects to the inclusion of these major development allocations sites within the AONB because we consider that these policies fail the test of soundness (see our Soundness comments above). We therefore recommend that alternative approaches are taken that avoid impacts on the designated landscape. Our specific comments regarding these allocations are outlined as follows:

AL/PE1 - Land rear of High Street and west of Chalket Lane;

AL/PE2 - Land at Hubbles Farm and south of Hastings Road;

AL/PE3 - Land north of the A21, south and west of Hastings Road

Whilst these three sites, individually, are not identified as major development by TWBC, they are considered to cumulatively represent major development. Natural England therefore objects their inclusion as allocations, but we consider that they may be more acceptable if their size and scale are reduced such that, taken together, they no longer represent major development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN1: Sustainable Design

We are pleased to see that our Regulation 18 response to remove 'where possible' in relation to achieving net gain, has been addressed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones

as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘- -’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN 9: Biodiversity net gain

We are pleased to see that our Regulation 18 response has been incorporated in the updated policy as it now includes a measurable net gain figure (10%).

We welcome the overall Biodiversity Net Gain (BNG) policy, which makes numerous positive requirements and references to helpful guidance. We agree that further detail regarding the approach to BNG should be incorporated within an SPD, especially as national policy and legislation relating to BNG continues to emerge. Therefore, we are supportive of the clear link to the SPD directly in the policy to help make this SPD impactful once it is available.

There are several wording improvements that we also suggest to help make this policy stronger in the interim and to further reflect current good and best practice that continues to emerge since the Regulation 18 draft local plan:

- We support the principle of prioritising on-site measures to achieve net-gain. However, in some cases, off-site measures can achieve more meaningful net-gains if on-site opportunities are limited. Therefore, we consider the reference in point 6.135 to only accepting off-site measures in 'exceptional circumstances' is too strong. Instead, we suggest that the wording should require major developments to 'exhaust all reasonable opportunities to achieve measurable and meaningful biodiversity net-gain on-site before considering off-site measures, in line with the Good Practice Guide jointly produced by CIEEM CIRIA and IEMA that is referenced elsewhere in the policy'. The wording used regarding non-major development should also apply to major development: 'where it offers the best outcome for biodiversity, is in reasonably close proximity to the application site, and follows the mitigation hierarchy.'

- The Environment Bill is expected to require Biodiversity Net Gain on non-major developments as well as major developments. Therefore, we advise that point 6.135 should state that BNG will be expected to be achieved on non-major developments, when Defra's Small Site Metric is adopted and when legislation requires this. This is something that the upcoming SPD for BNG should cover in more detail.
- We welcome the reference to the Defra Biodiversity Metric throughout. In EN 9 policy point 1, we suggest further strengthening the policy by advising that the Defra Biodiversity Metric be used in line with the latest guidance from Defra/Natural England.
- Point 6.125 refers to 'offsetting' as part of non-major development. This term should be removed as it is open to misinterpretation and is not consistent with the terminology used for Biodiversity Net Gain which refers to 'off-site' measures that are more clearly defined.
- Point 6.120 should refer to delivering 'measurable' net gains

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'.

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA

conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('-' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN10: Protection of Designated Sites and Habitats

We welcome the addition of management and maintenance in relation to this policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones

as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘- -’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 5: Habitats Regulations Assessment (HRA)

We welcome the incorporation of our Regulation 18 advice to align policy EN 11 'Ashdown Forest Special Protection Area and Special Area of Conservation' with the established SANG/SAMM strategic approach to avoiding adverse effect on the integrity of Ashdown Forest SPA and SAC from recreational disturbance.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones

as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘- -’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 12 Trees, Woodland, Hedges, and Development

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11,

Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN12: Trees, Woodlands, Hedges and Development

We note that our Regulation 18 consultation feedback does not appear to have been addressed, regarding on-site mitigation and compensation measures. We advise that where unavoidable tree loss occurs on site, efforts to compensate for this should be prioritised on site as well as off site where this is needed. This is because there is a risk that looking first or only to securing tree planting off-site will contradict aims for securing both net gains for nature and providing urban Green Infrastructure.

This policy could be further improved by considering opportunities to maximise ecological benefits in terms of the right species in the right place, as well as any other benefits (e.g. air quality, carbon sequestration).

Throughout site allocation policies, there are requirements for design and layout to 'have regard' for mature/veteran trees and hedgerows. We advise that this wording should be stronger and that existing trees and hedgerows should be actively integrated within the design and layout of the application and removal should be avoided where possible. Approaches should also be informed by the AONB Management Plan where sites are within the AONB or its setting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's

view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

‘Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.’).

This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest

SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN13: Ancient Woodland and Veteran Trees

We are pleased to see that our Regulation 18 comments have been addressed which advised that the principles relating to exceptional circumstances for impacts to ancient woodland or veteran trees are removed and the clarification that they cannot be considered in net gain calculations.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts

should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN 14: Green, Grey and Blue Infrastructure

We are pleased to see that our Regulation 18 comments have been addressed regarding the strengthening of wording to maximise the benefits of Infrastructure. However, the change made to address our previous comment regarding connectivity could be made clearer by adding 'ecological' where indicated as italics in this sentence: 'Proposals for new green, grey, and blue infrastructure should aim to improve ecological connectivity and be informed by, and respond to:'. Without this addition, 'connectivity' could be interpreted as referred to how people connect with their surroundings (which should also be encouraged).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic

Environmental Assessment, but only where there are potentially significant environmental effects.’). This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

‘The term ‘preferable’ is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar’

We also refer to Paragraph 11(b) of the NPPF which states that:

“(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:

i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;”

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated.

It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified.

Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score (‘+++’) for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for environmental factors, including ‘slightly negative’ (‘-’) for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative (‘-’ in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change (‘-’ in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 19 The High Weald Area of Outstanding Natural Beauty

[TWBC: Incorrectly stated as EN 21 on representation]

[TWBC - Full representation attached as Supplementary Information]

[TWBC: This representation has been input against Policies PSTR1, AL/RTW17, AL/CRS 1, AL/CRS 2, AL/CRS 3, AL/HA 4, AL/BM 1, AL/PE 1, AL/PE 2, AL/PE 3, AL/RTW 16, STR/SS1, STR/SS3, EN11, Section 3, STR 8, Section 5, EN1, EN9, EN10, EN12, EN13, EN14 AND EN19 – see Comment Numbers PSLP_1444, PSLP_1459, PSLP_1460, PSLP_1462, PSLP_1489, PSLP_1463, PSLP_1464, PSLP_1465, PSLP_1466, PSLP_1467, PSLP_1468, PSLP_1469, PSLP_1470, PSLP_1472, PSLP_1478, PSLP_1480, PSLP_1481, PSLP_1482, PSLP_1483, PSLP_1484, PSLP_1485, PSLP_1486, PSLP_1487, PSLP_1488]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Appendix 6: Pre-submission Local Plan Policies

Section 6: Development Management Policies

EN 21: High Weald Area of Outstanding Natural Beauty (AONB)

[TWBC: Should read EN 19]

Natural England welcome the overall intention of this policy but advise that some changes should be made to strengthen the policy wording to ensure an appropriate level of consideration for this important landscape and to better recognise the great weight that should be given to its conservation and enhancement according to national policy.

Natural England welcome the requirement for major developments within the AONB to be accompanied by an LVIA and assessment against the AONB Management Plan Policies (point 6.238). However, we advise that this policy should be stronger to ensure that appropriate levels of landscape assessments, including against the AONB Management Plan and its associated guidance, should be carried out for any non-major development proposals within the AONB, or its setting, where they are expected to significantly impact the AONB.

We also advise that the following changes should be made:

- Make the following wording change: 'All development within, or affecting the setting of, the High Weald Area of Outstanding Natural Beauty (AONB) shall ~~seek to~~ conserve and enhance its landscape

and scenic beauty, having particular regard to the impacts on its character components, as set out in the High Weald AONB Management Plan.'

- Placing the policy in point 6.238 within the Policy EN 19 summary box to give it more emphasis and to make it clear that this is not an optional consideration, or add specific reference to these supporting notes (6.234 to 6.238) in the summary box itself (as has been done for EN 9 Biodiversity Net Gain for example)
- Add a requirement for LVIAs to be in line with the most recent edition of the good practice Guidelines for Landscape and Visual Impact Assessment.
- Strengthen the wording to make it clear that the recommendations from the landscape assessments should inform the proposal's design and layout as part of ensuring suitable measures are in place to avoid or mitigate negative impacts on the AONB landscape. Proposals with impacts that cannot be adequately mitigated should not be accepted except in exceptional circumstances (NPPF para 172, footnote 55)

Natural England's specific suggestions regarding sensitive, landscape-led approaches are outlined in Appendices 1, 3 and 4 of this letter.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Natural England welcomes the reduction in scale and number of major development site allocations within the AONB since the Regulation 18 stage of the draft local plan, but we do not consider the current draft local plan to be sound and have highlighted our reasons in our full response letter for this regarding the remaining major development allocations within the AONB. We advise that these allocations should not be pursued, and alternative options should continue to be explored. While we have objected to major development proposed within the AONB, we remain committed to the plan-led scrutiny of the proposals to ensure soundness of approach, which enhances the High Weald's highly valuable and special landscape for future generations. We wish to work with TWBC to help ensure the best possible outcomes for the AONB and the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Natural England are a statutory consultee for local plan consultations and, under the CROW Act, have powers regarding AONBs. The development strategy and major development allocations within the AONB are the core reason for why we consider the local plan as unsound.

In addition, Natural England objected to a planning proposal (20/00815/FULL) for the Turnden Farm site (AL/CRS 3) in 2020 and requested that the decision by TWBC to approve the development was called in by the Secretary of State. The proposal is now subject to a Public Inquiry which Natural England is engaged in as a Rule 6 party.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Appendix 3: Sustainability Appraisal

There are several alternative growth strategy options within the Sustainability Appraisal (SA) and the Council has chosen a growth strategy with significant negative landscape impacts. Natural England's view is that the preferred approach should afford sufficient weight to environmental factors. This is supported by NPPF Paragraph 8 which states that economic, environmental and social objectives need to be pursued in mutually supportive ways to support net gains across each of these objectives. Paragraph 32 also states that (emphasis added):

'Local plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements (The reference to relevant legal requirements refers to Strategic Environmental Assessment. Neighbourhood plans may require Strategic Environmental Assessment, but only where there are potentially significant environmental effects.)'. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). However, the SA appears to prioritise social and economic considerations over environmental ones as Section 6.2.19 states:

'The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar'

We also refer to Paragraph 11(b) of the NPPF which states that:

"(b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless:
i. the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area;"

Given the provisions of paragraph 11 (and consequently paragraph 172), we consider that the weight afforded to protecting nationally designated landscapes has not been sufficiently considered as part of exploring alternative options and the environmental value of the AONB has been underestimated. It is our view that significant impacts have not been avoided as far as possible and, as outlined in other sections, we advise that major development within the AONB has not been appropriately justified. Given the above, we are concerned that the underpinning assessment and recommendations of the SA are not giving an appropriate level of consideration for the environmental benefits associated with alternative growth strategies, especially given the great weight that should be afforded to designated landscapes.

Natural England has significant concerns that the SA underestimates the value of avoiding major development within the AONB and the scale of impact of including it. The chosen growth strategy achieves a very positive score ('+++') for housing as it assumes it will meet standard housing need and local housing needs across the borough. However, it scores neutral or negative scores for

environmental factors, including 'slightly negative' ('-') for Landscape, despite the scale and size of major developments directly within the AONB and its setting including the large strategic sites at Tudeley and Paddock Wood.

As outlined in other sections of this letter, our view is that we consider that securing effective enhancement and mitigation measures for major development within the AONB is very challenging and therefore scores for environmental/landscape factors are likely to be overstated in the SA conclusions. Similarly, the SA finds that sites such as Turnden (AL/CRS 3) are still allocated despite scoring a very negative score for landscape (Appendix J, Page 321).

Furthermore, for Growth Strategy 2 (no major development within the AONB), climate change is scored as negative ('- -' in table 14) despite having lower growth in the AONB and Borough compared with Growth Strategy 13 (adopted approach for Pre-Submission Local Plan) which includes higher growth and major development within the AONB but only scores slightly negatively for climate change ('-' in table 25). It is our view that Growth Strategy 2 would reduce carbon emissions associated with transport and new dwellings as well as carbon sequestration (which is not mentioned in the SA) when compared with Growth Strategy 13.

Given the scale of development within the AONB and its setting in the chosen growth strategy, we also question the neutral score given for biodiversity. While we support biodiversity net-gain, approaches should be in addition to applying the mitigation hierarchy which should aim to avoid negative impacts on biodiversity in the first instance. As the SA states that nature conservation designations are more common in the AONB, we advise that any benefits for biodiversity (including those which contribute to the neutral score for the chosen growth strategy) are interpreted with some caution.

Finally, point 3.2.8 does not reflect the findings of the HRA and mitigation proposed for Ashdown Forest SPA (see the HRA section below). We advise this section of the SA is amended to reflect the findings of the HRA.

Future Notifications

Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am particularly concerned about the plan for a sports hub/concentrating sporting facilities/football pitches in one place rather than distributed across the town and borough close to where people live and want to use them. This will mean more traffic, pollution, noise, disruption, cost at a time when we should be building local communities, protecting our green spaces and spending money most effectively.

By building this football centre of excellence/stadium/sports hub you will be destroying green belt land, an area of outstanding natural beauty, a popular place where many, many people walk every day (High Woods Lane), the environment around the Sherborne sheltered housing and Cleve Avenue. Floodlighting and noise from use of the pitches will destroy this peaceful space.

You will be making the traffic and parking situation unbearable around Hawkenbury which will bring pollution and health and safety issues. These have been noted by your own transport team. There is insufficient public transport or cycle routes to the area.

You will have to get CPOs for farmer's field(s) and private road - which will go against the wishes of the local farming community. It is an area subject to flooding which will exacerbate this issue for local residents, walkers, joggers etc.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Keep the football/sports pitches local to the communities that use them and use some money to improve them.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation Gregg Newman

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I strongly object to "The Strategy for Capel Parish" (Policy STR/CA1).

I refer you to my comments in full contained in my response to the Draft Local Plan Consultation Response Form and Sustainability Response Form all submitted in detail in October 2019.

To reiterate for emphasis.

This is an ill thought out and ill-conceived proposal that will forever be a stain upon the consciences of any and all who are concerned should it become reality.

You dare to pay lip service to protecting the environment, whilst at the same time destroying the habitats of innumerable plant and animal species. Although on a smaller scale, there is no difference between your plans and the Brazilian Government's policy towards the Amazon Rain Forest (which you have doubtless wrung your hands over!).

Your plan will turn the area not into some idyllic "garden villages. It will tarmac and concrete over ancient woodland, and contribute to global warming and flooding. No amount of platitudes, half-truths and cynical distortions of facts in your so called plan will alter what this really is. Turning the Garden of England, the heart of our Green and Pleasant Land, into a soulless waste land of identical poorly constructed house with inadequate infrastructure, a ghetto well enough hidden from the residents of Tunbridge Wells so as not to offend their sensitivities.

Your plan will also, undoubtedly, result in injuries or even deaths to children who will have to travel miles on poor roads, in darkness, to get to and from school.

I could write reams, but it seems pointless. Everything has been said over and over again. Please, TWBC, deeply examine your consciences and show yourselves to be above the Westminster gerrymandering that is destroying our country, take a stand and protect England and this beautiful planet and all its inhabitants, not only human but plant and animal too.

I look forward to you restoring my faith in human nature, thank you.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Dear Sirs,

I believe that the planning is not effective in that it does not take into account a number of things. Firstly – infrastructure – roads and secondly flooding.

The B2017 is not fit for purpose to receive another 2000 houses/possible 4000 cars along this road going into Tonbridge. Even now, as we come out of lockdown the traffic is tailing back from Tonbridge for over a mile to the village of Tudeley. 18 months ago, before lockdown in the rush hour and during school pick up/drop off times there is too much traffic.

There is also a long queue of cars joining the B2017 at Tudeley Church, Hartlake Road. Mainly consisting of school parents, and workers who are trying to avoid Tonbridge (which is gridlocked) and who are trying to get to work in Tunbridge Wells and further south. The A26 has also long queues going back 2 miles towards Hadlow – hence people cutting through Hartlake Road.

There is talk of a pavement from Tudeley to Tonbridge – that will never happen as KCC refuse to even put in a pavement along the A26 from Hadlow to Tonbridge which is less than a mile in length. There is no way that this or a cycle path will be built.

Hartlake Road continues to flood every year as it is on the Medway floodplain. This puts added pressure on the B2017 as cars cannot cut across to Sevenoaks, Tonbridge North or any of the northern towns.

[TWBC: Photo attached as Supporting Information]

In the recent Rivers report highlighted by Ian Botham is showed that the sewage from both Tonbridge and Tudeley frequently overflows into the River Medway due to an old system and to too many people using the service and the river being too high.

How is the large community of Tudeley going to cope with this. According to Southern Water they have no plan to expand this or to improve it.

Tunbridge Wells Council and Hadlow Estates who are going to build this mini town in Tudeley also state that there will be a railway station. There is an old station which will never be reopened. This has been confirmed by senior personnel at SE Railways. So if only ¼ of the working population at this new town of Tudeley decide to work in London (which a majority in the vicinity do) they will have to drive to either Tonbridge or Paddock Wood to get a train. At the present time there is limited car parking and a waiting list. So this is not viable.

The new town of Kings Hill which was built many years ago on the old airfield had both houses and offices/industry on the same site. The idea being that people worked locally and could walk to their offices. If you travel to Kings Hill you will see that this is not the case. The majority of people in Kings Hill work elsewhere – travelling to the M20 or into Tunbridge Wells/Tonbridge and the offices employ people from Kent and Surrey/Sussex who drive in. The result being that in the rush hours the traffic does not move.

Putting another 6000 houses into the Paddock Wood/Capel/Tudeley area will cause a greater strain on the Kings Hill roads as everyone tries to get through Mereworth or along Seven Mile Lane to reach the M20.

Tunbridge Wells Council have said that they will widen the A228 by Colts Hill to take the extra traffic. However they have been talking about this for over 20 years and nothing has happened. Exactly like the A21 – which took over 30 years to get completed by the government. There is not the money for this project by KCC or by English Highways. So until all these roads have been widened and improved only then can Tunbridge Wells think about putting in more houses.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Roads – as above

Sewage – as above

Flooding – as above

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mrs Joanna Newman

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Dear Sirs,

I believe that the planning is not effective in that it does not take into account a number of things. Firstly – infrastructure – roads and secondly flooding.

The B2017 is not fit for purpose to receive another 2000 houses/possible 4000 cars along this road going into Tonbridge. Even now, as we come out of lockdown the traffic is tailing back from Tonbridge for over a mile to the village of Tudeley. 18 months ago, before lockdown in the rush hour and during school pick up/drop off times there is too much traffic.

There is also a long queue of cars joining the B2017 at Tudeley Church, Hartlake Road. Mainly consisting of school parents, and workers who are trying to avoid Tonbridge (which is gridlocked) and who are trying to get to work in Tunbridge Wells and further south. The A26 has also long queues going back 2 miles towards Hadlow – hence people cutting through Hartlake Road.

There is talk of a pavement from Tudeley to Tonbridge – that will never happen as KCC refuse to even put in a pavement along the A26 from Hadlow to Tonbridge which is less than a mile in length. There is no way that this or a cycle path will be built.

Hartlake Road continues to flood every year as it is on the Medway floodplain. This puts added pressure on the B2017 as cars cannot cut across to Sevenoaks, Tonbridge North or any of the northern towns.

There is an NPPF presumption in favour of sustainable development. This is not specifically defined but the NPPF does have specific policies for 'Proposals affecting the Green Belt'. Paragraph 145 states that 'A local planning authority should regard the construction of new buildings as inappropriate in the Green Belt. Exceptions to this are: (c) the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building.' Hence, it is clear that such development is regarded as sustainable. As Green Belts largely comprise rural areas it is therefore also clear that the extension and alteration of buildings within rural areas is considered to be sustainable development. Furthermore, The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) permits extensions to residential premises in all parts of the country, including rural areas. It is therefore implicit that such extensions are considered to be sustainable development as unsustainable development would presumably not be so permitted.

The NPPF does not have specific policies relating to extensions in rural areas outside the Green Belt but it would seem unlikely that extensions to residential premises outside of the Green Belt would be subject to a more restrictive test at a National policy level than that within a Green Belt; this being that extensions do not result in disproportionate additions over and above the size of the original building.

I would therefore contend that extensions to residential premises in areas outside the limits of built development are acceptable under the NPPF if they do 'not result disproportionate additions over and above the size of the original building', with the possible exception of extensions on any Article 2(3) land; which in the case of Tunbridge Wells Borough Council would include the High Weald Area of Outstanding Natural Beauty.

The question which then needs to be addressed is what is meant by 'disproportionate'. As this is not defined in the NPPF the meaning must be that in common use. Disproportionate is defined in the Cambridge Dictionary as 'too large or too small in comparison to something else, or not deserving its importance or influence'. Consequently, an extension to a residential premises would be disproportionate to the original residential premises if it was too large in comparison to the original residential premises. This is a matter of architectural judgement which will take into account such matters as design, siting, layout, size, mass, height and form of the proposed extensions. However, proposed policy H11 of the Pre-Submission Local Plan goes much further than this by suggesting that arbitrary volumetric limits are also relevant in determining what is and isn't disproportionate.

Paragraph 6.427 of the Pre-Submission Local Plan states that 'In order to protect the intrinsic beauty and landscape character of the countryside and the openness of the Green Belt outside the LBD, the erection of extensions and other outbuildings will be strictly controlled.' Whilst this text relates solely to the Green Belt and not other rural parts of the Borough outside the Green Belt I would contend that such strict control can be no stricter than that set out in the NPPF, particularly in rural areas outside the Limits of Built Development.

Paragraph 6.428 sets out reasonable criteria for assessing extensions outside the Limits of Built Development.

Paragraph 6.429 purports to state the policy contained in the NPPF as it would relate to residential premises. However, in the first line it says that 'The NPPF advises that the limited extension of existing dwellings.....' whereas the NPPF in fact makes no reference to 'limited'.

Paragraph 6.430 introduces a proposed definition of 'original' for the purposes of the proposed policy H11. This definition appears to be a carry over from the 2006 Local Plan policy H11 definition of 'original' as it related to buildings within the Green Belt (See paragraph 6.114 of 2006 Local Plan – copy attached). As, neither paragraph 145 of the NPPF nor the glossary of terms in the NPPF provides a definition of original building, these words in the NPPF can only be interpreted literally. It is therefore inappropriate for the Pre-Submission Local Plan to provide an alternative definition of 'original' which is contrary to the NPPF meaning.

Paragraph 6.431 states that 'In terms of assessing whether proposals (in both the Green Belt and other areas outside the LBD) would be in accordance with the above advice,...'. However, the advice in the NPPF only relates to Green Belt areas so it is misleading for this paragraph to imply that the NPPF policy relating to the Green Belt also applies to non-Green Belt areas (ie other areas outside the LBD), as it does not. However, if the same test is to be adopted for both Green Belt areas and non-Green Belt areas, which seems eminently reasonable, then the Pre-Submission Local Plan should make clear that this is the Borough's conscientious decision.

Paragraph 6.431 also sets out the Local Planning Authorities proposed approach to determining whether a development proposal would be in accordance with the NPPF policy at Paragraph 145 (c). Paragraph 6.431 states that any extension with a gross volume of greater than 50% of the original building (based on the proposed definition) or 250 m³ (if less than 50%) will be regarded as being disproportionate to the original building.

These limits have effectively been rolled forward from the supporting text to policy H11 in the 2006 Local Plan (see paragraph 6.115) which sought to define 'modest' for the purposes of complying with policies relating to extensions in the countryside in the Kent Structure Plan 1996 and the Kent and Medway Structure Plan 2006. As these structure plans are no longer relevant, the volume limits which sought to define modest in the 2006 Local Plan are therefore no longer relevant and certainly they have no relevance to the meaning of disproportionate as referred to Paragraph 145 (c) of the NPPF, just as they had no relevance to the meaning of disproportionate in the context of PPG2 as referred to in paragraph 6.114 of the 2006 Local Plan.

To put the proposed volume limits into perspective/context; a two storey detached house with a square footprint of 8m x 8m (gross external), floor to ceiling heights of 2.7m and a 45 degree gable ended pitched roof would have a gross volume of approx 500m³. The gross external floor area of this house would be 128m² and based on a gross internal to gross external ratio of say 90%, the gross internal area of the house would be 115m². Based on the proposed policy H11, a 50% gross volume extension to this house would hit the upper limit of 250m³. As a house of 115m² is relatively small this means that for all medium and large houses the maximum permissible extension of 250m³ would equate to a smaller percentage of the original building volume with the reduction in the percentage increasing as the original building size increases.

This is clearly inequitable and in the context of the NPPF policy for determining the acceptability of extensions in the Green Belt (which does not seek to discriminate against medium and larger size houses) is also inappropriate as the limits have no relevance to what is and is not a proportionate extension to the original house. Indeed, the 50% limit even without an upper limit of 250m³ is an entirely arbitrary limit and is no reflection of the upper limit of what may be a proportionate extension to a building.

Furthermore, both the proposed 50% and 250m³ volume limits will in many instances restrict the size of development to less than would be permitted under the Town and Country Planning (General Permitted Development) (England) Order 2015 as amended. By way of example, if the 500m³ detached house referred to above was not located on Article 2(3) land and was not impacted by plot size or boundary proximity considerations then, subject to the neighbour consultation scheme requirements, it could be extended under Class A by 8 metres to the rear and half the width of the house (4m) to the side up to a maximum single storey height of 4m. This would produce an additional volume of 384m³ (ie (8x8x4) + (8x4x4)) equating to 76.8% of the original house size. In addition, up to 50m³ could be added to the roof space under Class B taking the total additional volume to 434m³, this being some 86.8% of the original building volume. It is unclear whether a detached house could have two side extensions under Class A but in the event this were permitted the total volume of new space would increase to 562m³, this being some 112% of the original building volume. Aside from being in excess of the limits proposed in policy H11 such a Permitted Development would result in box like side and rear extensions which would not meet the other design criteria proposed in policy H11. Hence the

proposed volume limits would preclude well designed extensions where they fall within the limits of Permitted Development Right but outside the proposed policy H11 limits.

For the reasons stated above I do not believe policy H11 in its current form is sound as it is not in accordance with the NPPF and seeks to introduce limits which are at odds with the Government's view on the extent of development which does not require a planning application as detailed in the Town and Country Planning (General Permitted Development) (England) Order 2015 as amended.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make the policy sound the last 16 lines of the proposed policy should be deleted and a new numbered paragraph should be inserted after numbered paragraph 4 to read:

'5. The scale, form and massing of the proposal would not result in a disproportionate addition over and above the size of the original dwelling and would not detract from its rural setting and the visual amenities of the surrounding countryside.'

The supporting text to proposed policy H11 will also require amending accordingly.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

The following comments are provided on specific policies in relation to general practice provision for completeness.

Policy AL/RTW 15 - Land at Showfields Road and Rowan Tree Road

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential providing approximately 155 additional dwellings and health and community uses. As this development would comprise the redevelopment of an estate, affordable housing provision should be in accordance with Policy H 4: Estate Regeneration.

Development on the site shall accord with the following requirements:

1. A comprehensive redevelopment of the site to include the re-provision and enhancement of the existing residential dwellings alongside enhanced and improved community facilities, to include a new medical centre. The community and health facilities to be provided in accordance with an agreed timetable, relative to the phasing of the residential element of the development;

Comment: The statement regarding a new medical centre in Policy AL/RTW 15 is noted as an opportunity to inform the planning for primary medical care services in Tunbridge Wells.

Question 7

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Paragraph Number: 5.189

[TWBC: this representation has been input against Policies AL/RTW 8, AL/RTW 15, STR/CRS 1, AL/HA 5, STR/SS 3, PSTR/HO 1, PSTR/BM 1, STR/SS 1, PSTR/GO 1 and AL/HO 3– see Comment Numbers PSLP_1550, PSLP_1551, PSLP_1552, PSLP_1553, PSLP_1556, PSLP_1568 PSLP_1570, PSLP_1554, PSLP_1559 and PSLP_1569]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Paddock Wood and Tudeley

Paddock Wood, including land at east Capel Overview

5.189 The infrastructure required to support an expanded settlement of this scale in the location proposed has been identified. This includes education provision, health facilities, and required drainage and utility services.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel Significant growth around Paddock Wood and east Capel is proposed to deliver approximately 3,490-3,590 houses, as defined on the Policies Map. The development strategy for Paddock Wood and east Capel is to: e. provision of a health centre: there is potential for this to be co-located with the sports and leisure hub;

Comment (covering Paddock Wood and Tudeley):

The above policies recognise the need for additional primary medical care provision and infrastructure. The infrastructure and delivery/timing requirements for this will need to be further developed. Please note the CCG position reflected in the IDP which highlights the need for facilities in both areas of development – both Paddock Wood and Tudeley. Of specific note (as detailed in the IDP) is the CCG's view that the population of Tudeley will flow to practices in the Tonbridge area in order to register with

a GP, however there is not the capacity in these practices to accommodate this growth. Whilst more detailed planning is required it is considered that a medical centre facility should be provided for within Tudeley Village.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Cranbrook and Sissinghurst

5.280 The project for delivering a new community hub at Wilkes Field is being led by Cranbrook and Sissinghurst Parish Council and includes the provision of a new library for the parish to replace the existing library. The project includes the provision of meeting spaces, new library provision, and parish council offices. A new medical centre will also be provided as part of this project.

Comments: The CCG can confirm that support in principle (Stage 1 of CCG governance process) has been provided to enable existing general practices to engage in the proposed medical centre project on this site. A business case and plans will be developed and considered through CCG governance. To clarify it is the intention that a new medical centre will be replacing existing GP facilities within Cranbrook.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Brenchley and Matfield

5.487 The Howell Surgery provides main general medical service provision for the parish and has premises in Brenchley (main) and Horsmonden (branch). The existing premises do not have capacity to accommodate the estimated growth of registered patients within Brenchley and Matfield (and Horsmonden). To meet the increased demand identified, land has been identified and safeguarded for the provision of a new health centre/doctors surgery as part of the wider development of the site Land to the east of Horsmonden (at Horsmonden village; site allocation Policy AL/HO 3) as part of a wider development. This will serve the wider area, including the parish of Brenchley and Matfield.

Comments (Horsmonden, Brenchley and Matfield): To clarify the delivery of services from a single site for the practice population has not been considered at this time. The CCG has highlighted that an allocation or safeguarding of land for a doctors practice in Horsmonden may be required to ensure delivery of required infrastructure in the future. It is however important to stress that a more detailed discussion and assessment is required in this area to define any future requirements; specifically noting that the majority of housing growth proposed in Horsmonden is expected in the latter part of the plan period.

The statement regarding safeguarding of land for a new health centre in Policy AL/HO3 is noted as an opportunity to inform the planning for primary medical care services in the area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Goudhurst

5.536 The IDP identified that the GP practice serving Goudhurst (the practice that serves the Horsmonden/Lamberhurst/Brenchley/Matfield/Goudhurst cluster area) will require new practice premises to serve this area.

Comment: To clarify the CCG has not identified a need for a new premises requirement for Goudhurst. It is a separate general practice and has a separate catchment area to Howell Surgery where a potential need was originally identified and detailed in the IDP. This information provided by the CCG in the IDP has been misinterpreted and can be updated to further clarify this point. The reference to 'cluster areas', now Primary Care Networks, is simply recognising that practices work in a network with other practices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The following point should be removed from the Local Plan as it is a misinterpretation of the information provided by the CCG detailed in the IDP. See comment above in Section 5.5.536 **The IDP identified that the GP practice serving Goudhurst (the practice that serves the Horsmonden/Lamberhurst/Brenchley/Matfield/Goudhurst cluster area) will require new practice premises to serve this area.**

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Horsmonden

Horsmonden Overview5.563 The Howell Surgery provides main general medical service provision for the parish and has premises in Brenchley (main) and Horsmonden (branch). The existing premises do not have capacity to accommodate the estimated growth of registered patients within Horsmonden and Brenchley and Matfield. To meet the increased demand identified, land has been identified and safeguarded for the provision of a new health centre/doctors surgery has been identified as part of a wider development of Policy AL/HO 3: Land to the east of Horsmonden (at Horsmonden village). This will serve the wider area, including the parish of Brenchley and Matfield.

Comments (Horsmonden, Brenchley and Matfield): To clarify the delivery of services from a single site for the practice population has not been considered at this time. The CCG has highlighted that an allocation or safeguarding of land for a doctors practice in Horsmonden may be required to ensure delivery of required infrastructure in the future. It is however important to stress that a more detailed discussion and assessment is required in this area to define any future requirements; specifically noting that the majority of housing growth proposed in Horsmonden is expected in the latter part of the plan period.

The statement regarding safeguarding of land for a new health centre in Policy AL/HO3 is noted as an opportunity to inform the planning for primary medical care services in the area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	NHS Kent and Medway Clinical Commissioning Group
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HO 3 Land to the east of Horsmonden

[TWBC: this representation has been input against Policies AL/RTW 8, AL/RTW 15, STR/CRS 1, AL/HA 5, STR/SS 3, PSTR/HO 1, PSTR/BM 1, STR/SS 1, PSTR/GO 1 and AL/HO 3– see Comment

Numbers PSLP_1550, PSLP_1551, PSLP_1552, PSLP_1553, PSLP_1556, PSLP_1568 PSLP_1570, PSLP_1554, PSLP_1559 and PSLP_1569]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I can confirm that the CCG has been engaged in the local plan development process in order to assess implications for primary medical care provision. The impacts are set out in the IDP and will be regularly reviewed and updated in line with the CCG's GP Estates Strategy. The following comments are provided on specific policies in relation to general practice provision for completeness.

Policy AL/HO 3 Land to the east of Horsmonden This site, as defined on the Horsmonden Policies Map, is allocated for residential development providing approximately 115-165 dwellings, safeguarding of land for future expansion of Horsmonden Primary School, new health centre/doctors surgery, and a community orchard and open space.¹⁴ A suitable legal mechanism shall be put in place to ensure that the provision of the new health centre/doctors surgery is tied to the delivery of the housing, at a suitable stage of the development, to be agreed at the planning application stage;

Comments (Horsmonden, Brenchley and Matfield): To clarify the delivery of services from a single site for the practice population has not been considered at this time. The CCG has highlighted that an allocation or safeguarding of land for a doctors practice in Horsmonden may be required to ensure delivery of required infrastructure in the future. It is however important to stress that a more detailed discussion and assessment is required in this area to define any future requirements; specifically noting that the majority of housing growth proposed in Horsmonden is expected in the latter part of the plan period.

The statement regarding safeguarding of land for a new health centre in Policy AL/HO3 is noted as an opportunity to inform the planning for primary medical care services in the area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: No, I do not wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Joanna Nightingale
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I live in Whetsted with my husband and two children and have done so for 14 years. We moved here from a town because we wanted to live in a country village. If I had wanted to live in a community like Kings Hill I would have moved there. I work in London and commute by train and there is no way that the Southeastern network will be able to cope with any extra passengers let alone thousands. The roads around here can't cope with the traffic we already have. It can take 10 mins or 30 mins just to get into Tonbridge and there us no rhyme or reason to the congestion just SWOT.

I am writing to object to "The Strategy for Paddock Wood including east Capel" (Policy STR SS 1)

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change. Flood mitigation measures may help, but I believe that flood risks will increase. Covering farmed fields with houses and roads will make the Medway flood more often and cause increased flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. There will be an increase in air, light and noise pollution that will spread across the boundary in to Tonbridge & Malling and create a visual scar across the landscape. Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, bus lanes and sit next to a busy road in sight of a big roundabout. That will cause great harm to its value as a heritage asset of world renown (due to the complete set of Marc Chagall windows).

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.

In addition to this the quarry in Whetsted Road is being re-opened anyway with plans (which I have objected to also) to expand massively. Whetsted Road can't cope with the amount of HGV's going in and out of Scripps as it is. This traffic has increased hugely sine we moved in 2007. It is damaging the road and our houses with these HGVs rumbling along 7 days a week. It can't cope with any more traffic.

Stop the plans please. They are insane.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel for 26 years, having brought up young children to adulthood with education in the local area. I worked during my entire residence here, until retirement over 2 years ago. I have many local connections, including a local music ensemble and local cricket club. I enjoy working as a local activist in key issues.

During my years commuting to outer London via the A21, the traffic congestion has become very much worse. The journey time to access the A21 doubled in duration. Serious local flooding has occurred regularly while we have lived here and has had an enormous impact on the local community. Many households and businesses have been damaged due to repeated local flooding, with many householders having to find alternative accommodation and several businesses closing permanently. In some cases, insurance companies have not paid out.

I strongly object to the Borough Council's draft local plan to build housing developments at Tudeley Village (Policy STR/SS3) and at Paddock Wood including land at East Capel (Policy STR/SS1) because the proposed development is overwhelmingly inappropriate for such a rural location and there are strong specific arguments against the proposals, as follows...

1. Climate change - This is the greatest emergency ever to face the planet. It will impact all life, which is interdependent. Building 4,800 houses in the local area will generate an estimated 17,000 metric tonnes of carbon dioxide, due solely to producing the concrete for the foundations alone. This does not take into account the cement used for internal structures such as flooring, shingles, roadways, pavements and parking spaces. This scale of construction will increase the borough's claimed 3,4743 tonnes of carbon dioxide emissions in 2018/19 to over 20,000 of carbon dioxide, which includes the existing emissions. Given the climate emergency, and it is now an emergency, the Borough Council must live up to its commitment on climate change and alter its housing development strategy to further reduce the borough's emissions. Existing, vacant buildings in the centre of Tunbridge Wells could and should be regenerated and converted to housing. These brownfield sites have mistakenly not been prioritised, but this would be an ambitious strategy and it will have a much lower carbon burden on the borough. In addition, the immediate loss of trees and green vegetation due to the scale of building will add even further to the climate emergency by reducing the capacity of the local biosphere to act as a carbon sink. Planting new trees will not be enough to compensate; it will take 30 years to achieve any redress due to the vast loss of green vegetation in the local countryside.

2. Land subsidence - The British Geological Survey has recently published new data that shows that Kent is one of the key areas that will be affected by ground shrinkage due to climate change. The hotter and drier summers being driven by global heating mean that the ground under houses will shrink and crack, resulting in increased instances of property subsidence. Kent has extensive underlying clay formations which make it one of the four most vulnerable areas to loss of moisture. About a million homes were at risk in 1990 and this rises to 2.4m in 2030 and 4m in 2070. (<https://www.bgs.ac.uk/datasets/geoclimate-ukcp09-and-ukcp18/>). With increasing climate change

and repeated flooding and the potential for subsidence, this area is clearly not suited for housing development on this scale. Subsidence can lead to increased insurance premiums, depressed house prices and in some cases, require engineering work to stabilise land or property and the replacement of utility pipe-works. In 2019, the UK's official advisers, the Climate Change Committee, said it was shocked at the lack of proper plans for protecting people from heatwaves, flash flooding and other impacts of the climate crisis. Alternative sites should be sought with a lower shrink-swell risk rating.

3. Flooding/water supply - The local area has suffered many instances of flooding over a long period. The proposed new town is in close proximity to the natural flood plain of the River Medway and there is a risk that flooding could well impact Yalding, which already suffers regularly in times of heavy rain. The whole of the South East region is prone to lack of water; the reservoir at Bewl Water frequently suffers low levels in summer. Clarification is needed that proper professional research has been done to secure an adequate water supply for the region if the extra demand from the new town and 4,800 extra homes comes on stream.

4. Pollution - The proposed development will undoubtedly result in increased levels of many classes of pollutants. These include traffic-related tailpipe emissions, road dust, dust from tyre and brake wear, and noise pollution. In addition, light pollution and water runoff from concreted areas are also known hazards. All of these are known to cause serious damage to human health and to the ecosystem. The development itself, with new roads and increased traffic volumes will increase the levels of these pollutants. There is no level of air pollutants which can be safely breathed. It is hard to understand how the increased levels of any of these pollutants can be truly mitigated by Tunbridge Wells Borough Council's local plans, because no details as to how the Council will reduce any of these pollutants (as is their stated goal) are provided. Limits on pollutants will only become more stringent due to ongoing research. A landmark legal ruling in December 2020 by a London Coroner concluded that air pollution contributed to the death of 9-year-old Ella Kissi-Debrah. Following this ruling, it is only a matter of time before litigation and/or class action lawsuits against local authorities ensues. This will be driven by tighter levels on limits of pollutants, and fuelled by growing public awareness of the impact of pollution on public health, due to the failure of local authorities to adequately measure and adhere to legal limits on tailpipe-emitted pollutants.

5. Protection of green belt land - Certain areas of countryside are designated as green belt in order to protect it. With the current climate emergency and Covid-19 pandemic, there is increasing awareness of the importance of green spaces to the mental wellbeing of the population. Green belt land must be preserved. If not protected, zealous development will result in the permanent destruction of the green belt and further depletion of the associated carbon sink. This carbon sink is crucial for protecting the environment against carbon overload by converting carbon dioxide to oxygen. Even part of the AONB will be destroyed by the draft local plan. The local community values and cherishes its green belt land.

6. Affordable housing - A major benefit claimed by many councillors for the proposed development is the provision of affordable homes for local young people. The proposed development will not deliver such low cost housing, given that 3-, 4- and 5-bedroom houses form a significant part of the scheme. With closer proximity to Tonbridge rather than Tunbridge Wells, we can expect overspill from London and large towns to add greatly to the local population. Incomers will be attracted here to live in new housing, rather than young local people, resulting in a new commuter belt adjacent to the A21 and Tonbridge rail station with fast links to London. The development will add heavily to the congestion on the already busy local roads and highways, especially close to Tonbridge. Overall, the proposed development is overwhelmingly inappropriate for a such a rural location. A much more appropriate alternative site is available, situated at Castle Hill. This is closer to Tunbridge Wells town and is adjacent to much more appropriate and existing infrastructure, i.e. the A21.

7. Lack of engagement - The engagement of the Borough Council with the local community regarding these proposals has been completely inadequate. The Borough Council appears still to be withholding some critical documentation. It has therefore not been possible for many to understand the full scope and impact of the draft plan, and also to understand how to raise objections. In addition, many residents in the local community do not have access to the internet and so many of the public cannot be easily appraised of all the intricacies and workings of the process in order to understand and comment on the proposals. The Borough Council has not done nearly enough to compensate for this. Due to the Covid-19 pandemic restrictions, public meetings and protests have not been allowed. All this has conspired to put the Borough Council in a very advantageous and, frankly, unfair position to pursue the development, compared to the local community. Importantly, it must be stressed that many borough

councillors admitted publicly to being unable to access the necessary briefing documents before voting for the proposals. How can this be a fair and proper process!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Given the arguments I raised in Question 5, the following modifications to the plan would be necessary make it sound...

1. Climate change - Given the climate emergency, and it **is** now an emergency, the Borough Council must live up to its commitment on climate change and alter its housing development strategy to further reduce the borough's emissions. Existing, vacant buildings in the centre of Tunbridge Wells could and should be regenerated and converted to housing. These brownfield sites have mistakenly not been prioritised, but this would be an ambitious strategy and it will have a much lower carbon burden on the borough.

2. Land subsidence - The British Geological Survey has recently published new data that shows that Kent is one of the key areas that will be affected by ground shrinkage due to climate change. The hotter and drier summers being driven by global heating mean that the ground under houses will shrink and crack, resulting in increased instances of property subsidence. Kent has extensive underlying clay formations which make it one of the four most vulnerable areas to loss of moisture. Alternative sites should be sought, in line with the British Geological Survey data, to identify more suitable locations with a lower shrink-swell rating and reduced risk of subsidence.

3. Flooding/water supply - Proper flood risk assessment needs to be carried out because of the persistent and costly flooding in the local area. Clarification is also needed that proper professional research has been done to secure an adequate water supply for the region if the extra demand from the new town and 4,800 extra homes comes on stream.

4. Pollution - The proposed development will undoubtedly result in increased levels of many classes of pollutants. These include traffic-related tailpipe emissions, road dust, dust from tyre and brake wear, and noise pollution. In addition, light pollution and water runoff from concreted areas are also known hazards. All of these are known to cause serious damage to human health and to the ecosystem. By regenerating vacant properties in the town centre, there will be less pollution all-round (tail-pipe emissions, brake, tyre and road dust) as public transport becomes the main mode of mass transit. Light pollution due to new developments would not occur in green belts areas. The risk of litigation and/or class action lawsuits against local authorities would be lessened if cognisance of that risk is realised and avoidance action taken.

5. Protection of Green Belt Land - Green belt land is supposed to be protected. There is increasing awareness of the importance of green spaces to the mental wellbeing of the population. Green belt land must be preserved in order to support human wellbeing and this can be achieved by building in alternative and more appropriate existing brownfield sites.

6. Affordable housing - A major benefit claimed by many councillors for the proposed development is the provision of affordable homes for local young people. The proposed development will not deliver such low cost housing, given that 3-, 4- and 5-bedroom houses form a significant part of the scheme. More affordable locations for young people should be considered with multiple occupancy properties created in the town centre from existing brownfield sites.

7. Lack of engagement - The engagement of the Borough Council with the local community regarding these proposals has been completely inadequate. Many issues, such as the Covid-19 pandemic impact on public gatherings, and the complexity of the process for lodging objections have conspired to put the Borough Council in a very advantageous and, frankly, unfair position to pursue the development, compared to the local community. Importantly, it must be stressed that many borough councillors admitted publicly to being unable to access the necessary briefing documents before voting for the proposals. How can this be a fair and proper process!

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	John A Nimmo
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR SS 3 for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel for 26 years, having brought up young children to adulthood and through education in the local area. I worked during my entire residence here, until retirement over 2 years ago. I have many local connections, including a local music ensemble and local cricket club. I enjoy working as a local activist in key issues.

During my years commuting to outer London via the A21, the traffic congestion has become very much worse. The journey time to access the A21 doubled in duration. Serious local flooding has occurred regularly while we have lived here and has had an enormous impact on the local community. Many households and businesses have been damaged due to repeated local flooding, with many householders having to find alternative accommodation and several businesses closing permanently. In some cases, insurance companies have not paid out.

I strongly object to the Borough Council's draft local plan to build housing developments at Tudeley Village (Policy STR/SS3) and at Paddock Wood including land at East Capel (Policy STR/SS1) because the proposed development is overwhelmingly inappropriate for such a rural location and there are strong specific arguments against the proposals, as follows...

1. Climate change - This is the greatest emergency ever to face the planet. It will impact all life, which is interdependent. Building 4,800 houses in the local area will generate an estimated 17,000 metric tonnes of carbon dioxide, due solely to producing the concrete for the foundations alone. This does not take into account the cement used for internal structures such as flooring, shingles, roadways, pavements and parking spaces. This scale of construction will increase the borough's claimed 3,4743 tonnes of carbon dioxide emissions in 2018/19 to over 20,000 of carbon dioxide, which includes the existing emissions. Given the climate emergency, and it is now an emergency, the Borough Council must live up to its commitment on climate change and alter its housing development strategy to further reduce the borough's emissions. Existing, vacant buildings in the centre of Tunbridge Wells could and should be regenerated and converted to housing. These brownfield sites have mistakenly not been prioritised, but this would be an ambitious strategy and it will have a much lower carbon burden on the borough. In addition, the immediate loss of trees and green vegetation due to the scale of building will add even further to the climate emergency by reducing the capacity of the local biosphere to act as a carbon sink. Planting new trees will not be enough to compensate; it will take 30 years to achieve any redress due to the vast loss of green vegetation in the local countryside.

2. Land subsidence - The British Geological Survey has recently published new data that shows that Kent is one of the key areas that will be affected by ground shrinkage due to climate change. The hotter and drier summers being driven by global heating mean that the ground under houses will shrink and crack, resulting in increased instances of property subsidence. Kent has extensive underlying clay formations which make it one of the four most vulnerable areas to loss of moisture. About a million homes were at risk in 1990 and this rises to 2.4m in 2030 and 4m in 2070. (<https://www.bgs.ac.uk/datasets/geoclimate-ukcp09-and-ukcp18/>). With increasing climate change

and repeated flooding and the potential for subsidence, this area is clearly not suited for housing development on this scale. Subsidence can lead to increased insurance premiums, depressed house prices and in some cases, require engineering work to stabilise land or property and the replacement of utility pipe-works. In 2019, the UK's official advisers, the Climate Change Committee, said it was shocked at the lack of proper plans for protecting people from heatwaves, flash flooding and other impacts of the climate crisis. Alternative sites should be sought with a lower shrink-swell risk rating.

3. Flooding/water supply - The local area has suffered many instances of flooding over a long period. The proposed new town is in close proximity to the natural flood plain of the River Medway and there is a risk that flooding could well impact Yalding, which already suffers regularly in times of heavy rain. The whole of the South East region is prone to lack of water; the reservoir at Bewl Water frequently suffers low levels in summer. Clarification is needed that proper professional research has been done to secure an adequate water supply for the region if the extra demand from the new town and 4,800 extra homes comes on stream.

4. Pollution - The proposed development will undoubtedly result in increased levels of many classes of pollutants. These include traffic-related tailpipe emissions, road dust, dust from tyre and brake wear, and noise pollution. In addition, light pollution and water runoff from concreted areas are also known hazards. All of these are known to cause serious damage to human health and to the ecosystem. The development itself, with new roads and increased traffic volumes will increase the levels of these pollutants. There is no level of air pollutants which can be safely breathed. It is hard to understand how the increased levels of any of these pollutants can be truly mitigated by Tunbridge Wells Borough Council's local plans, because no details as to how the Council will reduce any of these pollutants (as is their stated goal) are provided. Limits on pollutants will only become more stringent due to ongoing research. A landmark legal ruling in December 2020 by a London Coroner concluded that air pollution contributed to the death of 9-year-old Ella Kissi-Debrah. Following this ruling, it is only a matter of time before litigation and/or class action lawsuits against local authorities ensues. This will be driven by tighter levels on limits of pollutants, and fuelled by growing public awareness of the impact of pollution on public health, due to the failure of local authorities to adequately measure and adhere to legal limits on tailpipe-emitted pollutants.

5. Protection of green belt land - Certain areas of countryside are designated as green belt in order to protect it. With the current climate emergency and Covid-19 pandemic, there is increasing awareness of the importance of green spaces to the mental wellbeing of the population. Green belt land must be preserved. If not protected, zealous development will result in the permanent destruction of the green belt and further depletion of the associated carbon sink. This carbon sink is crucial for protecting the environment against carbon overload by converting carbon dioxide to oxygen. Even part of the AONB will be destroyed by the draft local plan. The local community values and cherishes its green belt land.

6. Affordable housing - A major benefit claimed by many councillors for the proposed development is the provision of affordable homes for local young people. The proposed development will not deliver such low cost housing, given that 3-, 4- and 5-bedroom houses form a significant part of the scheme. With closer proximity to Tonbridge rather than Tunbridge Wells, we can expect overspill from London and large towns to add greatly to the local population. Incomers will be attracted here to live in new housing, rather than young local people, resulting in a new commuter belt adjacent to the A21 and Tonbridge rail station with fast links to London. The development will add heavily to the congestion on the already busy local roads and highways, especially close to Tonbridge. Overall, the proposed development is overwhelmingly inappropriate for a such a rural location. A much more appropriate alternative site is available, situated at Castle Hill. This is closer to Tunbridge Wells town and is adjacent to much more appropriate and existing infrastructure, i.e. the A21.

7. Lack of engagement - The engagement of the Borough Council with the local community regarding these proposals has been completely inadequate. The Borough Council appears still to be withholding some critical documentation. It has therefore not been possible for many to understand the full scope and impact of the draft plan, and also to understand how to raise objections. In addition, many residents in the local community do not have access to the internet and so many of the public cannot be easily appraised of all the intricacies and workings of the process in order to understand and comment on the proposals. The Borough Council has not done nearly enough to compensate for this. Due to the Covid-19 pandemic restrictions, public meetings and protests have not been allowed. All this has conspired to put the Borough Council in a very advantageous and, frankly, unfair position to pursue the development, compared to the local community. Importantly, it must be stressed that many borough

councillors admitted publicly to being unable to access the necessary briefing documents before voting for the proposals. How can this be a fair and proper process!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Given the arguments I raised in Question 5, the following modifications to the plan would be necessary make it sound...

1. Climate change - Given the climate emergency, and it **is** now an emergency, the Borough Council must live up to its commitment on climate change and alter its housing development strategy to further reduce the borough's emissions. Existing, vacant buildings in the centre of Tunbridge Wells could and should be regenerated and converted to housing. These brownfield sites have mistakenly not been prioritised, but this would be an ambitious strategy and it will have a much lower carbon burden on the borough.

2. Land subsidence - The British Geological Survey has recently published new data that shows that Kent is one of the key areas that will be affected by ground shrinkage due to climate change. The hotter and drier summers being driven by global heating mean that the ground under houses will shrink and crack, resulting in increased instances of property subsidence. Kent has extensive underlying clay formations which make it one of the four most vulnerable areas to loss of moisture. Alternative sites should be sought, in line with the British Geological Survey data, to identify more suitable locations with a lower shrink-swell rating and reduced risk of subsidence.

3. Flooding/water supply - Proper flood risk assessment needs to be carried out because of the persistent and costly flooding in the local area. Clarification is also needed that proper professional research has been done to secure an adequate water supply for the region if the extra demand from the new town and 4,800 extra homes comes on stream.

4. Pollution - The proposed development will undoubtedly result in increased levels of many classes of pollutants. These include traffic-related tailpipe emissions, road dust, dust from tyre and brake wear, and noise pollution. In addition, light pollution and water runoff from concreted areas are also known hazards. All of these are known to cause serious damage to human health and to the ecosystem. By regenerating vacant properties in the town centre, there will be less pollution all-round (tail-pipe emissions, brake, tyre and road dust) as public transport becomes the main mode of mass transit. Light pollution due to new developments would not occur in green belts areas. The risk of litigation and/or class action lawsuits against local authorities would be lessened if cognisance of that risk is realised and avoidance action taken.

5. Protection of Green Belt Land - Green belt land is supposed to be protected. There is increasing awareness of the importance of green spaces to the mental wellbeing of the population. Green belt land must be preserved in order to support human wellbeing and this can be achieved by building in alternative and more appropriate existing brownfield sites.

6. Affordable housing - A major benefit claimed by many councillors for the proposed development is the provision of affordable homes for local young people. The proposed development will not deliver such low cost housing, given that 3-, 4- and 5-bedroom houses form a significant part of the scheme. More affordable locations for young people should be considered with multiple occupancy properties created in the town centre from existing brownfield sites.

7. Lack of engagement - The engagement of the Borough Council with the local community regarding these proposals has been completely inadequate. Many issues, such as the Covid-19 pandemic impact on public gatherings, and the complexity of the process for lodging objections have conspired to put the Borough Council in a very advantageous and, frankly, unfair position to pursue the development, compared to the local community. Importantly, it must be stressed that many borough councillors admitted publicly to being unable to access the necessary briefing documents before voting for the proposals. How can this be a fair and proper process!

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Margaret Nimmo
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR SS1 for Paddock Wood including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel Parish for 26 years with my husband and our two children, who were raised here and attended local schools. As a family, we participated in many activities around the village, including walking, cycling and sports. I enjoy retirement in the village, and I am an active member of Capel Cricket Club Ladies' Team.

I strongly object to both Policies STR/SS 1 Strategy for Paddock Wood including land at east Capel and STR/SS 3 Strategy for Tudeley Village. There are several key points which I would like to address in relation to this objection...

Green belt - 4,800 houses will be built on land which is currently designated as Green Belt, supposedly protected. The plan will require the Green Belt to be downgraded and destroyed in order to construct this development. In view of the recent Covid-19 pandemic and increasing awareness of the benefit of green spaces towards mental health needs, local communities require green spaces to support mental health and promote community wellbeing.

Local roads and transport - Existing local public transport is poor, with only a limited service due to infrequent buses. Due to the level of housing in the proposed development, an increased number of vehicles will use the local roads, adding to the existing congestion at peak times. This added congestion will be exacerbated by the new secondary school planned. The resulting poor traffic flow is very likely to have a negative impact on local businesses.

A new road is proposed between Five Oak Green and Capel, the so-called "Five Oak Green by-pass". This would also be entirely on Green Belt land, resulting in yet more destruction of the natural environment. If such a road is constructed, it will partition the Parish communities of Capel, Five Oak Green and Colts Hill. This will result in a separation of the three communities, thereby acting as a barrier to our community life. The villagers will be unable to walk to the only shop in the village, the local primary school and the village Community Hall.

This road will impinge onto Sychem Lane, and will likely require the compulsory purchase of working farmland used for grazing cattle, sheep and growing crops. If this land is taken, this will mean that the farmers using this land will lose their livelihoods as a result.

Hospital capacity / medical care - A new town with the proposed number of new homes in Capel will put much more pressure on the services at the Kent & Sussex hospital at Pembury. Adequate medical centres, fully and professionally staffed, will be necessary to support the greatly increased size of the local community. It is critical that the capacity of the hospital and medical centres are enabled to cope. Extra funding will be necessary for this, in order to cope with the increased local population, and it is not clear whether the funding will be made available in time. This needs to be in place first.

Flooding / water supply - Parts of Capel parish have long suffered from flooding. The proposed new town is in close proximity to the natural flood plain of the Medway. Runoff downstream is a further likely consequence. There is a risk that flooding could well impact both the existing and new development.

The whole of the South East is prone to water shortage; the reservoir at Bewl Water frequently suffers low levels in summer. There is likely to be serious pressure on demand at critical periods of low rainfall in the year, when the extra demand from the new villages and 4,800 extra homes comes on stream.

Natural environment - the destruction of the green belt land will adversely impact the natural environment and wildlife in the area. Loss of habitat and a reduction in the number of species will be unacceptable.

Air quality, light and noise pollution / mental health and wellbeing - the extra housing, cars, street lighting, water runoff and all that goes with a new development will lead to increased levels of pollutants in the air, resulting in poorer air quality. The carbon footprint will unquestionably increase, and this will be a contributor to climate change. In addition, noise and light pollution will increase in what is currently a rural, Green Belt area. The quality of the environment in Capel will be irreparably damaged and changed for the worse, and forever, despite the growing awareness of the importance of green spaces to human health and wellbeing. It is hard to imagine that this is consistent with a desire for betterment of the parish, and it certainly will irreparably damage our existing local way of life.

Architectural heritage - the historic church at Tudeley is located beside where the proposed new housing development will be sited. All Saints' Church at Tudeley has windows designed and created by Marc Chagall, the world-renowned artist. Tudeley is internationally famous as the only church in the world having stained glass windows designed by Chagall, within its setting in the green fields of Kent. This precious architectural heritage will deteriorate when the surrounding fields are destroyed and the church is surrounded on three sides by the new town at Tudeley. This is just one example of the planned environmental vandalism.

Housing density - the amount of housing planned for Tudeley and East Capel is disproportionately located, with more than 50% of all new housing in the Borough of Tunbridge Wells being within Capel Parish. This means that the construction will negatively impact more upon the nearby Borough of Tonbridge and Malling, yet the income from the extra council tax will benefit Tunbridge Wells.

The houses planned include 3, 4, and 5 bedrooms. This will not be affordable housing which is what is required in the local area.

In conclusion - I contest that this draft Local Plan and the concept of the new town to be built on Green Belt land in Capel parish has been poorly thought out and rushed through. There has been little to no communication and consultation with the local community. It is an expedient answer towards meeting government-imposed targets, rather than being a solution which addresses true local needs. Further, there can be no justification for the destruction of Green Belt land and for ignoring the long-established legal precedents to protect the Green Belt.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This development is in the wrong place and has been rushed through with little consultation with local people and our needs. We have not been able to congregate during the Covid-19 pandemic to discuss together with our local community. There are alternative brownfield sites in the borough which have not been properly prioritised. Vacant offices and shops in Tunbridge Wells could be regenerated into homes which would help reduce the carbon footprint and help rejuvenate the town.

In addition, the Castle Hill site alongside the A21, which would be more suitable as the infrastructure is already in place, has been completely dismissed out of hand by TWBC with no sound justification.

Also, the proposal amounts to a disproportionate number of houses (over 50% of all new housing) in Capel parish compared with the other 19 wards in the TW borough. Tonbridge, the nearest town to a large part of the proposed development, will be greatly and negatively impacted by the vast increase in housing, while there will be minimal impact on the rest of TW borough. In addition, TWBC will benefit greatly from the increased revenue from council tax, but Tonbridge and Malling will not.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel Parish for 26 years with my husband and our two children, who were raised here and attended local schools. As a family, we participated in many activities around the village, including walking, cycling and sports. I enjoy retirement in the village, and I am an active member of Capel Cricket Club Ladies' Team.

I strongly object to both Policies STR/SS 1 Strategy for Paddock Wood including land at east Capel and STR/SS 3 Strategy for Tudeley Village. There are several key points which I would like to address in relation to this objection...

Green belt - 4,800 houses will be built on land which is currently designated as Green Belt, supposedly protected. The plan will require the Green Belt to be downgraded and destroyed in order to construct this development. In view of the recent Covid-19 pandemic and increasing awareness of the benefit of green spaces towards mental health needs, local communities require green spaces to support mental health and promote community wellbeing.

Local roads and transport - Existing local public transport is poor, with only a limited service due to infrequent buses. Due to the level of housing in the proposed development, an increased number of vehicles will use the local roads, adding to the existing congestion at peak times. This added congestion will be exacerbated by the new secondary school planned. The resulting poor traffic flow is very likely to have a negative impact on local businesses.

A new road is proposed between Five Oak Green and Capel, the so-called "Five Oak Green by-pass". This would also be entirely on Green Belt land, resulting in yet more destruction of the natural environment. If such a road is constructed, it will partition the Parish communities of Capel, Five Oak Green and Colts Hill. This will result in a separation of the three communities, thereby acting as a barrier to our community life. The villagers will be unable to walk to the only shop in the village, the local primary school and the village Community Hall.

This road will impinge onto Sychem Lane, and will likely require the compulsory purchase of working farmland used for grazing cattle, sheep and growing crops. If this land is taken, this will mean that the farmers using this land will lose their livelihoods as a result.

Hospital capacity / medical care - A new town with the proposed number of new homes in Capel will put much more pressure on the services at the Kent & Sussex hospital at Pembury. Adequate medical centres, fully and professionally staffed, will be necessary to support the greatly increased size of the local community. It is critical that the capacity of the hospital and medical centres are enabled to cope. Extra funding will be necessary for this, in order to cope with the increased local population, and it is not clear whether the funding will be made available in time. This needs to be in place first.

Flooding / water supply - Parts of Capel parish have long suffered from flooding. The proposed new town is in close proximity to the natural flood plain of the Medway. Runoff downstream is a further likely consequence. There is a risk that flooding could well impact both the existing and new development.

The whole of the South East is prone to water shortage; the reservoir at Bewl Water frequently suffers low levels in summer. There is likely to be serious pressure on demand at critical periods of low rainfall in the year, when the extra demand from the new villages and 4,800 extra homes comes on stream.

Natural environment - the destruction of the green belt land will adversely impact the natural environment and wildlife in the area. Loss of habitat and a reduction in the number of species will be unacceptable.

Air quality, light and noise pollution / mental health and wellbeing - the extra housing, cars, street lighting, water runoff and all that goes with a new development will lead to increased levels of pollutants in the air, resulting in poorer air quality. The carbon footprint will unquestionably increase, and this will be a contributor to climate change. In addition, noise and light pollution will increase in what is currently a rural, Green Belt area.

The quality of the environment in Capel will be irreparably damaged and changed for the worse, and forever, despite the growing awareness of the importance of green spaces to human health and wellbeing. It is hard to imagine that this is consistent with a desire for betterment of the parish, and it certainly will irreparably damage our existing local way of life.

Architectural heritage - the historic church at Tudeley is located beside where the proposed new housing development will be sited. All Saints' Church at Tudeley has windows designed and created by Marc Chagall, the world-renowned artist. Tudeley is internationally famous as the only church in the world having stained glass windows designed by Chagall, within its setting in the green fields of Kent. This precious architectural heritage will deteriorate when the surrounding fields are destroyed and the church is surrounded on three sides by the new town at Tudeley. This is just one example of the planned environmental vandalism.

Housing density - the amount of housing planned for Tudeley and East Capel is disproportionately located, with more than 50% of all new housing in the Borough of Tunbridge Wells being within Capel Parish. This means that the construction will negatively impact more upon the nearby Borough of Tonbridge and Malling, yet the income from the extra council tax will benefit Tunbridge Wells.

The houses planned include 3, 4, and 5 bedrooms. This will not be affordable housing which is what is required in the local area.

In conclusion, I contest that this draft Local Plan and the concept of the new town to be built on Green Belt land in Capel parish has been poorly thought out and rushed through. There has been little to no communication and consultation with the local community. It is an expedient answer towards meeting government-imposed targets, rather than being a solution which addresses true local needs. Further, there can be no justification for the destruction of Green Belt land and for ignoring the long-established legal precedents to protect the Green Belt.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This development is in the wrong place and has been rushed through with little consultation with local people and our needs. We have not been able to congregate during the Covid-19 pandemic to discuss together with our local community. There are alternative brownfield sites in the borough which have not been properly prioritised. Vacant offices and shops in Tunbridge Wells could be regenerated into homes which would help reduce the carbon footprint and help rejuvenate the town.

In addition, the Castle Hill site alongside the A21, which would be more suitable as the infrastructure is already in place, has been completely dismissed out of hand by TWBC with no sound justification.

Also, the proposal amounts to a disproportionate number of houses (over 50% of all new housing) in Capel parish compared with the other 19 wards in the TW borough. Tonbridge, the nearest town to a large part of the proposed development, will be greatly and negatively impacted by the vast increase in housing, while there will be minimal impact on the rest of TW borough. In addition, TWBC will benefit greatly from the increased revenue from council tax, but Tonbridge and Malling will not.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore
Question 3	

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 2 Land at Hubbles Farm and south of Hastings Road

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation broadly supports the draft Local Plan strategy and in particular the allocation (Policy AL/PE2) of land at Hubbles Farm and South of Hasting Road, Pembury.

However, a minor alteration to the policy would ensure it is fully effective and justified in meeting the soundness tests.

Please see attached statement

[TWBC: the below text is from the statement, which has also been attached to this comment as a supporting document]

TUNBRIDGE WELLS BOROUGH COUNCIL PRE-SUBMISSION LOCAL PLAN

REPRESENTATIONS BY OBSIDIAN STRATEGIC ASSET MANAGEMENT LIMITED LAND AT HUBBLES FARM AND SOUTH OF HASTINGS ROAD, PEMBURY POLICY AL/PE2

We act on behalf of Obsidian Strategic Asset Management Limited ('our client') and have been instructed to submit representations to Tunbridge Wells Borough Council (TWBC's) Draft Local Plan (Regulation 19) Consultation ('the Draft Plan'). This follows previous representations submitted to Tunbridge Wells Borough Council's Draft Local Plan (Regulation 18) Consultation in November 2019.

This representation broadly supports the draft Local Plan strategy and in particular the allocation (Policy AL/PE2) of land at Hubbles Farm and South of Hasting Road, Pembury ('the Site') for residential

development. However, our client seeks a minor alteration to the draft policy to ensure it is fully effective and justified in meeting the soundness tests.

Site and Policy Context

The Site currently lies immediately outside the 'Limits to Built Development' (LBD) Boundary of Pembury. It falls within the wider Metropolitan Green Belt, wider High Weald AONB and wider Kent Special Landscape Area. However, it is a relatively contained site with the A21 to the south providing a clear and defensible boundary.

The National Planning Policy Framework (NPPF) is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits (Paragraph 11).

It also confirms at Paragraph 136, that Green Belt boundaries can be altered through the preparation of, or review of, the Local Plan, albeit these should only be altered in exceptional circumstances.

In deciding whether exceptional circumstances exist, local authorities must first consider whether housing needs can be accommodated by:

- a) Making as much use as possible of suitable brownfield sites and underutilised land;
- b) Optimising density of development, including promoting a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and
- c) discussing with neighbouring authorities about whether they could accommodate some of the identified need for development.

The Draft Local Plan confirms that TWBC has suffered from a significant shortfall in housing supply and experiences acute affordability issues.

We are aware that the Council has undertaken detailed urban capacity work and has had discussions with neighbouring authorities to ascertain whether they could assist in accommodating housing requirements. However, in order to fully address the housing need, it has rightly been concluded that there is a requirement to couple high density development within 'urbanised areas' with the release of Green Belt land.

To this end, the sequential approach has been applied, and exceptional circumstances exist to justify changes to the Green Belt. We support this approach and the clarity of this decision making, which is apparent through the Evidence Base.

Green Belt Review

Having established the need to review Green Belt boundaries to meet housing needs, the Council needs to ensure that it complies with Paragraph 138 of the NPPF and promote sustainable patterns of development, including first looking at previous developed land and/or land that is well served by public transport. It should also set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt Land.

The Site is a sustainable location for development given its accessibility to existing services and facilities within Pembury and the wider Tunbridge Wells area. The sustainable attributes of the Site are considered in further detail below.

Furthermore, as concluded within the Green Belt Review (GBR) Stage Two (July 2017) and the Strategic Housing and Economic Land Availability Assessment (SHELAA) – Jul 2019 (Site Ref 50), the Site (falling within land parcel PE1), performs '*relatively weakly*' in meeting the purposes of the Green Belt. Accordingly, the level of harm resulting from the Sites release from the Green Belt is found to be '*low*', and that '*the A21 would represent a stronger boundary than the existing settlement edge*' in seeking to define boundaries of the Green Belt in stronger and more permanent terms (- objective of Para 139 of the NPPF).

The Stage Three 'Assessment of Green Belt Allocations' (November 2020) provided a more focused assessment of emerging allocations against the five Green Belt purposes, which included consideration of the Site (AL/PE2). This assessment concluded similarly that the release of the Site would '*replace an existing weak Green Belt boundary (rear gardens of residential properties) with a strong boundary (the wooded cutting of the A21)*'.

In addition, it was noted that the proposed AL/PE2 allocation would include a landscape buffer to the south, which would further strengthen this boundary feature and that the presence of this strong boundary will limit the impact of release on adjacent Green Belt land to the south, concluding that the overall level of impact on adjacent Green Belt resulting from the release of AL/PE2 will be negligible.

Finally, the SHELAA (January 2021) also concluded that:

'The site is sustainably located and would result in only low harm if released from the Green Belt. The scale of development is considered appropriate for its location in the AONB'.

The basis for this finding was that the Site:

'...lies partly within/mostly adjacent to the settlement edge, and as such is considered sustainable in that context. The site in conjunction with other sites, lies between the existing settlement and the A21 embankment, and allocation would represent a modest infilling, appropriate in this AONB landscape. Furthermore, these parcels are not well connected with other agricultural land. This combined with low harm if released from the Green Belt means the site is a suitable site'.

To supplement the above considerations, additional assessment work was carried out within the LBD (September 2019) and Distribution of Development (September 2019) Topic Papers. This set out the possible contributions the proposed allocations (including the Site) can make to Green Belt and AONB objectives in terms of improving access, providing locations for outdoor sport, landscape and visual enhancement, increasing biodiversity and improving damaged and derelict land.

A requirement to safeguard land for the potential future expansion of St Peter's cemetery, in addition to improved accessibility and landscaping, was identified.

Overall, the evidence base demonstrates in a logical and transparent manner why the release of this Site from the Green Belt is a justified decision in seeking to meet the identified housing needs of the Borough.

Appropriateness of Additional Development in Pembury

Pembury is the principal settlement in the parish that includes the areas of Lower Green, Henwood Green, and Romford. It is located approximately 3.4 miles from Royal Tunbridge Wells to the south west, which is defined within the settlement hierarchy (ED 8) as the Primary Regional Town Centre.

As such, Pembury is well positioned to accommodate housing growth for the Borough, in accordance with the Development Strategy outlined at Policy STR1, having regard to its role and function, constraints, and opportunities.

Reflective of its position as the parishes' principal settlement, Pembury has access to a range of key services, including local shops, public houses/restaurants, places of worship, primary schools, and a doctor's surgery. The main Tunbridge Wells Hospital is also located within the parish.

The Council's spatial development strategy for additional housing in Pembury is therefore supported and will provide additional housing in close proximity to services, jobs and community facilities. The requirement to provide affordable housing (identified within the wording of policy AL/PE2) offers a significant opportunity to meet the needs of the local community, including key workers, such as hospital and/or emergency service staff.

Furthermore, Pembury possesses excellent transport connectivity, with High Brooms and Royal Tunbridge Wells mainline rail stations both approximately 3.5 miles from Pembury, and Paddock Wood railway station approximately 4.7 miles from the village.

There are regular bus services that currently run to destinations including Royal Tunbridge Wells, Paddock Wood, and Maidstone. There are also several Public Rights of Way that run through the parish, including within and around Pembury village itself. The National Cycle Route (Sustrans) 18 from Canterbury to Royal Tunbridge Wells (using existing highways) runs through the parish, north of the A21.

Accordingly, Pembury is considered a highly sustainable location within which to locate an appropriate level of housing growth to meet identified needs.

Suitability of Site Allocation AL/PE2

Site allocation AL/PE2 adjoins existing residential properties located to the north of the Site along Hastings Road. To the west lies the cricket pitch and Pembury Cemetery (associated with the Upper

Church of St Peter to the north). To the south lies the A21 within a landscaped cutting. The allocation presents a logical and contained extension to the settlement.

Furthermore, the Site presents an opportunity to facilitate the expansion of the adjacent cemetery, and, along with Policies AL/PE 1 and AL/PE 3, to upgrade the existing footpath/cyclepath network, including the establishment of a bridleway link with PRoW WB43 by upgrading WT240 which runs along Chalket Lane.

The feasibility of developing the Site has already been investigated and a design concept for its development establishes a residential layout surrounding a central green space, with strong landscape buffers comprising the peripheries of the Site. This initial concept has been informed by a landscape visual impact assessment prepared by EnPlan (as required by Policy AL/PE2) and would generate no fundamental landscape impact concerns. The Site is classed as having a low landscape sensitivity. No built development is proposed to the south of the existing Pembury Cemetery as required by the draft Policy.

The Site already benefits from direct vehicular access from Hastings Road and this will be modified to support a 'circular' internal road arrangement. A 'single point of access' junction design on Hastings Road has been produced (by dha Transport) in collaboration with Kent Highways and can satisfactorily accommodate the scale of development proposed.

A Transport Feasibility Study, prepared by dha Transport, has also been undertaken to demonstrate that the traffic impact of the Site (as well as the cumulative impacts of the neighbouring allocations) does not lead to traffic issues on the wider highway network. The conclusions show the highway network can accommodate the development and where overcapacity at junctions has been identified, mitigation can be provided that would deliver a positive impact when compared to the existing traffic situation.

A Flood Risk Assessment (June 2018) prepared by Glanville, confirms the low flood risk potential of the Site. It also identifies the Groundwater Source Protection Zone, which affects only a small proportion to the north of the Site. A drainage strategy can therefore be produced which includes an element of infiltration as well as managed accumulation and discharge.

An Ecological Survey (prepared by Aspect Ecology) has also been produced and demonstrates that there are no significant ecological constraints affecting the Site that would hinder development coming forward. It concludes that the Site offers potential for roosting and foraging bats, dormouse and reptiles, but a well-designed scheme retaining boundary planting (as proposed) and provided enhanced landscaping could provide ecological enhancements and mitigate impacts.

The Site can also achieve appropriate noise criteria for homes. A noise assessment undertaken by Cole Jarman identifies mitigation requirements such as a 3.5m acoustic fence within the southern landscaped boundary (to the north of the A21) will ensure that appropriate internal and external residential noise levels can be achieved.

Finally, sufficient infrastructure capacity has been identified to accommodate the development of the Site and discussions are ongoing with utility providers such as Southern Water to agree an appropriate servicing strategy.

Other Site Specific Considerations

Site Capacity

Policy AL/PE 2 allocates the Site for a mixed use scheme including the provision of approximately 80 dwellings, of which 40 percent shall be affordable housing, together with an area to allow the extension of the Pembury Cemetery.

While this allocation is supported, it is considered that, as shown on the enclosed illustrative masterplan, that the Site has capacity to accommodate up to around 120 dwellings if required.

In order to ensure that the opportunity to provide additional housing (should it be required) is not discouraged or lost, it would be more effective for the Policy to state 'no fewer than 80 dwellings' rather than 'approximately 80 dwellings' to make clear this should be a minimum provision.

Landscaping

In accordance with the requirement of Policy AL/PE 2 the illustrative layout plan has been informed through the development requirements within the draft policy wording, alongside analysis of the wider

site context, including immediate land uses, setting of adjacent Pembury Conservation Area and landscape impact.

All existing trees and hedgerows on the Site are identified to be retained with further enhanced planting along the southern boundary

The proposals provide an opportunity to contribute to the landscape character of the area and allow enhanced public access.

Cycle and Pedestrian Linkages

The design and layout of the scheme has explored a segregated east-west cycle route, connecting with the adjacent site allocation Policies AL/PE 1 and AL/PE 3 and with the existing cycle way network, including the A264 Pembury Road cycle route into Royal Tunbridge Wells town centre. The Policy requirement to contribute towards upgrading the cycle path along Chalket Lane (WT240) and the link to the east side of Royal Tunbridge Wells at Hawkenbury is also supported.

Cemetery Expansion

Draft Policy AL/PE 2 seeks to secure a suitable legal mechanism that will allow the provision of land for the expansion of Pembury Cemetery at a time when housing is delivered on the Site.

This is supported in principle and an agreement of a suitable time can be made through a Section 106 Agreement associated with any planning permission.

Summary and Conclusions

Overall, we are supportive of the Council's overarching development strategy, spatial vision and strategic objectives for the borough and welcome the Council's aspirations to address the housing need through the combination of high-density development within 'urbanised areas' and the release of Green Belt Land to provide new strategic development opportunities.

We support this approach and the clarity in which TWBC has pursued the [sequential] requirements of the NPPF (paragraph 137) in demonstrating that exceptional circumstances exist to support Green Belt release in order to meet local housing needs.

We further support the strategy to release Green Belt land at Pembury. Pembury is a highly sustainable location in which appropriate levels of growth can be accommodated. The proposed allocations would also ensure an effective long-term Green Belt is maintained and its boundaries strengthened.

Finally, we support the specific inclusion of site allocation Policy AL/PE2 within the Local Plan as a logical extension to the settlement.

Proposed development at the Site would meet the three overarching objectives of sustainable development (in accordance with the NPPF) as follows:

- . **Economic Benefits** - It will provide local economic benefits including increased population expenditure, construction jobs and expenditure as well as Council tax and new homes bonus receipts for the Council. Resident expenditure will in turn contribute to the vitality of local amenities and services.
- . **Social Benefits** – The proposed development will make a significant and meaningful contribution to meeting local housing needs through the provision of at least 80 units (of which 40% would be affordable homes). The proposed development would also contribute to improvements to community infrastructure through the provision of recreation/open space, land for future cemetery expansion, and enhancement of cycle routes and footpaths.
- . **Environmental Benefits** – The proposed development would utilise land of limited agricultural and environmental value. Enhancement of site buffers and retention of the existing natural environment on the site will provide suitable habitat delivering biodiversity gains.

The Site presents an available, suitable and deliverable opportunity to provide new residential development within a sustainable and accessible location, meeting the objectives and commitments of the Development Plan.

We therefore support Policy AL/PE2. However, in order to ensure that the opportunity to provide additional housing (should it be required) is not discouraged or lost, the first paragraph of the policy should be refined to refer to a minimum provision of 80 dwellings as follows:

"This site, as defined on the Pembury Policies Map, is allocated for a mixed use scheme. This shall provide residential development providing approximately no fewer than 80 dwellings, of which 40

percent shall be affordable housing, and an extension of the Pembury Cemetery on land shown safeguarded on the site layout plan...”

This will ensure the policy is effective in delivering its requirement of 80 dwellings (and no less) and ensure the policy does not unnecessarily prevent the potential to make more efficient use of land as encouraged and justified by the NPPF (paragraph 8c).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy AL/PE2 (first paragraph) should be refined to refer to a minimum provision of 80 dwellings as follows:

“This site, as defined on the Pembury Policies Map, is allocated for a mixed use scheme. This shall provide residential development providing approximately no fewer than 80 dwellings, of which 40 percent shall be affordable housing, and an extension of the Pembury Cemetery on land shown safeguarded on the site layout plan...”

This will ensure the policy is effective in delivering its requirement of 80 dwellings (and no less) and ensure the policy does not unnecessarily prevent the potential to make more efficient use of land as encouraged and justified by the NPPF (paragraph 8c).

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

As the promoters of development at AL/PE2 it will important to be able answer any questions relating to this policy.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1836 Barton Willmore for Obsidian Strategic SI-1 Letter of Representation.pdf](#)

If you would like to attach a file in support of your comments, please upload it here.

STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The amount of housing allocated to Paddock Wood is completely disproportionate and will completely overwhelm the local roads and infrastructure. The area is also prone to surface water flooding and further building is likely to significantly exacerbate this, despite promised flood mitigation measures. Valuable agricultural land will be lost, as well as countryside for residents to enjoy. Insufficient attention was paid to Reg 18 comments and there are a lack of earlier engagement and consultation with the local community. Many residents did not become aware of plans until far too late in the process. The plan does not sufficiently address local housing need nor have adequate proposals for traffic or other transport infrastructure.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The creation of a new Garden Village at Tudeley will result in an enormous increase in the population Capel and loss of Green Belt/agricultural land. The amount of housing proposed is totally excessive and will result in traffic congestion and pressure on infrastructure such as water supply and sewerage.

The impact on the local environment will be enormous with loss of trees, farmland, and loss of AONB land.

Consultation with local residents has been very poor and far too little attention was paid to the many comments at Reg 18 stage. Insufficient effort has been paid to prioritise development of brownfield sites elsewhere in the Borough.

It appears that there has been insufficient effort to co-operate with TMBC which will have to provide services for many of the new homes.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Consideration could be given to the Castle Hill site as an alternative to Tudeley Village.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I read with stunned amazement of the proposal to close the Paddock Wood railway bridge to traffic, it is the dumbest proposal I have hear of in many years. The inconvenience, cost and damage to local people and their businesses would be significant and the benefit at best an illusion.

I suggest if this proposal is not binned immediately it is put to a local referendum, the verdict is not in my mind open to doubt.

Question 7

Response to Question 5

We have been resident in Five Oak Green for 30 years, married in Tudeley Church and raised our son in the village, who attended local schools and was a member of the local Scout Group, which we both assisted with as adults.

We know from current experience that traffic on the B2017 is disrupted outside Capel School at the start and close of the school day, and that it is not uncommon for the early morning traffic jam from the Somerhill Roundabout and adjacent school can back up to The Turmeric Gold Indian restaurant, a distance of approximately 1.5 miles.

Five Oak Green and the surrounding area has flooded several times in the last decade, and our house being only 50 yards from the Alders stream, was lucky to avoid it. Flooding in the village is only now avoided by swift action by the Environment Agency who monitor and clear debris as necessary where the Alders Stream passes under the B2017 in the village. Our neighbours at Brook Cottage were flooded last year by the sewer that passes through their and our properties. During heavy rain the sewer often needs days of tankers pumping out a holding tank adjacent the B2017 at the Alders stream crossing point.

Although there is a lack of "affordable" housing within the parish, recent local developments – Foalhurst Woods for example, do nothing to address the problem – all any Developer will do is to provide the minimum required by law, and their definition of what is "affordable" leaves much to be desired, leaving most young people unlikely to ever afford to buy a house.

If the proposed developments at Tudeley and/or East Capel were to take place, these issues of traffic congestion, lack of infrastructure and potential flooding would only be exacerbated. Post Covid, there is now a greater emphasis on wellbeing, and the benefits of getting into the countryside, exercising and experiencing its nature and tranquillity. The peaceful rural landscape amenity that is currently available for everyone to enjoy would be destroyed by these developments which would effectively join Tonbridge, Capel and Paddock Wood as one sprawling entity.

We understand that Tunbridge Wells Borough Council (TWBC) have been set totally unrealistic requirements for new housing, by ill-advised Government targets, but they have conspired by choosing Tudeley as the location for this highly inappropriate development to place it right on their boundary with Tonbridge & Malling Borough Council (TMBC), who would have to bear the brunt of the vast majority of the increased traffic for both commuters, schools and the increased burden on local resources and infrastructure, Doctors, School places etc. We have not seen any evidence of a thorough consultation with TMBC or that its plans for increasing resources and infrastructure are commensurate.

The concern is broader than just the response of TWBC to the new housing demand, there is an issue with the demand itself. A borough with such a high proportion of land in AONB, heritage towns (RTW

itself) and green belt should have its target adjusted to take the quality of its land into account. TWBC should query this rather than slavishly accepting the unrealistic targets it has been set.

The loss of Greenbelt, its affect on the nearby AONB's and the loss of productive farmland would be unforgivable. Given the current fight to reduce global warming, and the need for more of the UK's food requirements to be home grown, thereby reducing our "food miles", paving over these areas should not even be considered.

Although undoubtedly the new developments would incorporate all the latest sustainable drainage systems (which are fine until they inevitably silt up), and the new housing would be protected from flooding by raising ground floor levels etc, they are being built on large areas of floodplain. The concern is the effect on all the existing properties in the area, which have seen flooding in the past, of paving over all these acres of land thereby reducing the ability of the land to absorb rain.

TWBC do not seem to have actively pursued other sites within the Borough, as the proposed scheme at Tudeley ticks all their boxes and the land has been offered to them on a plate by the landowner – Hadlow Estates, who unfortunately have a long history locally of selling off land/ properties in their ownership to the detriment of the local community, for financial gain.

As a consequence of these proposed developments it would appear that Five Oak Green needs a bypass. WHY? Given that most traffic from the Tudeley development would head into Tonbridge for the station, shopping, schools etc and that from East Capel would head into Paddock Wood for the same services, we would question the need for this. We believe the traffic analysis has been based on faulty assumptions about the direction in which the traffic will flow from each of the developments. Furthermore, post Covid travel patterns have changed so the traffic forecasts need a fundamental reassessment.

Siting a roundabout right next to Capel School on the B2017, which already has traffic problems seems to be dangerous for school children, not to mention the health effects on them from increased fumes. The route of the bypass would cut off Sychem Lane to vehicular traffic. The bypass route then cuts the last remaining commercial hop garden in the village in two. This hop garden has been expanded in recent years due to increased demand, and two local breweries use the hops from this field. When we arrived here 30 years ago the village was surrounded by hop gardens, now there is one left (for how long?). This not only represents local heritage, but heritage for Kent as a whole. High quality farmland is being lost.

This bypass then joins the proposed Colts Hill bypass (A228) at a roundabout. We thought that the whole point of the Colts Hill bypass was to improve traffic flow along the busy route that links Maidstone and Tunbridge Wells, and for the many emergency vehicles that use it daily accessing the hospital at Pembury. We do not see how traffic flow will be eased by having 3 roundabouts in half a mile (the existing one at the junction of the A228 and the B2017, the one at the end of the proposed Five Oak Green bypass and yet another proposed where Alders Road meets the Colts Hill bypass)

Alders Road carries a lot of traffic at peak times, and still will, Five Oak Green bypass or not. People currently use it to avoid the long queues of parked cars outside Capel School at morning drop off and afternoon collection, and delays in Five Oak Green due to on street parking, & bus routes/ stops. The proposed development and bypass would only serve to increase the traffic on this country road further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Joanna Osborne
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Response to Question 5

We have been resident in Five Oak Green for 30 years, married in Tudeley Church and raised our son in the village, who attended local schools and was a member of the local Scout Group, which we both assisted with as adults.

We know from current experience that traffic on the B2017 is disrupted outside Capel School at the start and close of the school day, and that it is not uncommon for the early morning traffic jam from the Somerhill Roundabout and adjacent school can back up to The Turmeric Gold Indian restaurant, a distance of approximately 1.5 miles.

Five Oak Green and the surrounding area has flooded several times in the last decade, and our house being only 50 yards from the Alders stream, was lucky to avoid it. Flooding in the village is only now avoided by swift action by the Environment Agency who monitor and clear debris as necessary where the Alders Stream passes under the B2017 in the village. Our neighbours at Brook Cottage were flooded last year by the sewer that passes through their and our properties. During heavy rain the sewer often needs days of tankers pumping out a holding tank adjacent the B2017 at the Alders stream crossing point.

Although there is a lack of "affordable" housing within the parish, recent local developments – Foalhurst Woods for example, do nothing to address the problem – all any Developer will do is to provide the minimum required by law, and their definition of what is "affordable" leaves much to be desired, leaving most young people unlikely to ever afford to buy a house.

If the proposed developments at Tudeley and/or East Capel were to take place, these issues of traffic congestion, lack of infrastructure and potential flooding would only be exacerbated. Post Covid, there is now a greater emphasis on wellbeing, and the benefits of getting into the countryside, exercising and experiencing its nature and tranquillity. The peaceful rural landscape amenity that is currently available for everyone to enjoy would be destroyed by these developments which would effectively join Tonbridge, Capel and Paddock Wood as one sprawling entity.

We understand that Tunbridge Wells Borough Council (TWBC) have been set totally unrealistic requirements for new housing, by ill-advised Government targets, but they have conspired by choosing Tudeley as the location for this highly inappropriate development to place it right on their boundary with Tonbridge & Malling Borough Council (TMBC), who would have to bear the brunt of the vast majority of the increased traffic for both commuters, schools and the increased burden on local resources and infrastructure, Doctors, School places etc. We have not seen any evidence of a thorough consultation with TMBC or that its plans for increasing resources and infrastructure are commensurate.

Policy H 9 Gypsies and Travellers

Table 11

Policies Map (Inset Map No(s)) 82 – Greenfields Farm

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy H9 and specifically the Greenfields Farm allocation which seeks to allocate further land for a travellers/gypsy site.

The Plan is not sound because insufficient consideration has been given towards the resultant traffic impacts, suitability of the site and other Local Plan conflicts. As such it has resulted in a Plan which is unsound not effective and not justified. Nor is it consistent with Planning Policy. The following explains the objections in more detail.

It is noted in the draft Plan as a footnote on page 415 that the Greenfields site is a new site submitted after the Regulation 18 draft Plan. It has no context in terms of being a historic gypsy site and as such must be considered on the basis of a new allocation in the countryside.

On behalf of the objector's we take the view that the site is wholly unsuitable for residential uses of the type envisaged based on the character of the area. It will be clear on the site visit that the access is narrow and already serves a number of non conforming land uses such as a scrap yard (Scrapco Metal Recycling and waste transfer business), CJ Enterprises which specialise in material processing including bulk deliveries and export of materials with HGV's, a car body repair business (Riverdale Body Repair Centre), various other automotive companies, including Osmonds a road planings company that results in heavy plant using the lane, and other HGV Transport and tyre services. Although there are some residential properties along the access lane, they experience noise and disturbance that affects their residential amenity. Given the B2 type industrial uses and the fact that there is a metal recycling business close by, the noise and disturbance is clearly unsuited to a residential allocation. The site is therefore clearly unsuitable for further residential uses such as a gypsy or traveller sites on amenity grounds and the Plan is therefore unsound.

The level of traffic along this access road is significant and the access is unsuited to additional traffic generated by the allocation given its single width character. The nature of the traffic along this access

road comprises HGV's, high sided vehicles and skip lorries at very regular intervals. There is a shooting club, which uses a site off this access and generates significant traffic. The sheer volume of traffic is such that the access and junction is at over capacity. Congestion along this access road and especially at the junction where large vehicles cannot pass results in an unsafe existing situation. This, together with the limited visibility on the 60mph Pearsons Green Road leads us to conclude that any further intensification of the access and junction by this allocation is wholly undesirable and puts highway safety at issue. The proposed allocation is not supported by a road safety audit to confirm that both Pearsons Green Road and the access track/junction is safe for the additional traffic proposed and neither is there evidence that the roads have sufficient capacity by way of a Transport Assessment. In the absence of this information, the site cannot reasonably be allocated as it would result in an unreasonable intensification of the uses.

The Policy criteria of H9 fail to consider either the amenity of those expected to use the Traveller site or the suitability of the access. In the absence of these criteria it is the case that this Policy is unsound and not effective.

The site that is to be allocated is significantly larger than the 3 pitches that are allocated in Table 11. This suggests that the draft Policy is not sound. It invites additional pitches notwithstanding criterion 1 of Policy H9.

The site is unsustainable in its location. There is no opportunity to access local facilities or public transport and although the site is for a Travellers site there should be an expectation that some services and facilities could be accessed by foot. Shopping and schools would require additional car journeys. The NPPF explains that sustainability comprises both environmental, social and economic matters and in all respects the site does not comply with these guiding principles.

The objector notes that there is evidence of surface water flooding near the site and given this, it would be unsustainable for an allocation to progress unless evidence is provided to demonstrate that flood risk is not an issue. Residential uses within zones of flood risk are not supported by planning policies in the NPPF.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify H9 and Table 11 to delete the proposed allocation at Greenfields Farm (Inset Map 82) and to consider additional land at the other sites to compensate.

To amend Policy H9 to require residential amenity and highways access safety and capacity to be specific criteria for this Policy.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Given the significant objections in relation to amenity, highways, sustainability and flood risk it is considered that the sustainability appraisal has erroneously supported the allocation. The evidence suggests that the site is completely unsustainable and should be deleted as a allocation.

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Vision and Strategic Objectives

1.4.4 The Pre-Submission Local Plan (PSLP) is underpinned by vision and strategic objectives.

1.4.5 The vision is set out below:

[TWBC: PSLP Vision duplicated here - see full representation attached]

1.4.6 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives duplicated here - see full representation attached]

1.4.7 Response

1.4.8 We broadly support the general thrust of the vision and these objectives. In particular, we especially welcome the recognition that the planned increase in housing should also be matched by a proportionate expansion in employment opportunities across the borough.

1.4.9 The master-planned approach to the strategic expansion of Paddock Wood is also welcomed. However, please also note our comments on Policy EN3 in the relevant section below.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: the full representation attached has been divided between Policy STR/SS1 (PSLP_2076), Vision and Strategic Objectives (PSLP_2078), Policy STR1 (PSLP_2079), Policy STR4 (PSLP_2080) and Development Management Policies (PSLP_2081)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and

- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies

1.4.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 1: The Development Strategy

1.4.11 We **SUPPORT** the aims and objectives of Policy STR 1, especially in relation to the proposed major, transformational expansion of Paddock Wood.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Strategy and Strategic Policies

1.4.10 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

Policy STR 4: Ensuring Comprehensive Development

1.4.12 We have **NO OBJECTION** to the aims and objectives of Policy STR 4, which seeks a holistic and fully integrated approach to the urban expansion of Paddock Wood.

1.4.13 We would however **COMMENT** that whilst the principle of masterplanning the expansion of the town is agreed, it is noted that the initial masterplanning work already undertaken by David Lock Associates, to which we have also contributed, it is proposed to undertake further work which will result in the publication of Supplementary Planning Documents (SPDs) in due course.

1.4.14 The proposed employment development at Land East of Transfesa is in line with the masterplanning work which has been carried out to date. Given the importance of ensuring that employment proposals come forward at an early stage, to increase the prospects of expanded employment opportunities being available to existing and future residents as soon as possible, if necessary this site should be able to come forward in advance of the publication of a future SPD, so long as:

- the proposals are generally in accordance with the aims and objectives of existing masterplanning work and the emerging Local Plan, unless there are good planning reasons to depart from these;
- the proposals do not conflict with the aim set out at PSLP paragraph 4.77 of the PSLP, which states that "the key requirement should be to ensure that a coordinated approach to new developments which

have a clear inter-relationship is taken to achieve the efficient use of land, providing for different land uses in most appropriate places, and overall good planning.”

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Place Shaping Policies

1.4.15 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

Policy STR/PW1

1.4.16 Policy STR/PW1 sets the Strategy for Paddock Wood and states that approximately 3,490-3,590 dwellings and accompanying infrastructure will be delivered via the planned extension to Paddock Wood.

1.4.17 We have **NO OBJECTION** to Policy STR/PW1.

Policy STR/SS1

1.4.18 Policy STR/SS1 sets the detailed strategy and states, amongst other things:

[TWBC: PSLP Policy STR/SS1 duplicated here - see full representation attached]

[TWBC: PSLP Extract of proposed proposal map for Paddock Wood - see full representation attached]

Comments in relation to Land East of Transfesa

1.4.19 My client SUPPORTS the proposals for employment development at Land East of Transfesa, which falls within the northern parcel (edged red) as shown on Map 27. This site represents a large part of site PW1_6 as identified in the Strategic Sites Masterplanning and Infrastructure Main Report.

1.4.20 In particular, my client **SUPPORTS** the inclusion of Land East of Transfesa within the proposed Policy STR/SS1 allocation and within the Provisional Limits to Built Development as shown on the Policies Map.

1.4.21 He confirms that in relation to this site, it is deliverable over the plan period. My client's proposals will help to deliver additional high quality employment in the manner envisaged, including a mix of employment types and sizes in order to support the balanced economic and employment growth of Paddock Wood. The vast majority of the site is outside of Flood Zone 3, and over half of my client's ownership falls within Flood Zone 1, which has the lowest risk of flooding.

1.4.22 My client's land is capable of being developed in accordance with the principles set out in the PSLP. This land can be developed to provide additional high quality employment provision, and is easily accessed on foot and cycle from the town centre and railway station via existing roads and footpaths. There is already very good access to the station via the network of footpaths to the south of the site.

1.4.23 The Strategic Sites Masterplanning and Infrastructure Main Report identifies that sewage capacity and the existing network's propensity to flood during storm Southern Water, it reports that there is likely to be a need to upgrade the sewage works capacity at Paddock Wood to accommodate planned growth. Whilst the scope of these works is as yet unknown, it could include additional land requirements taken from PW1_6. My client is agreeable to this in principle, on the basis that if some or all of the land is no longer required for this use, it should be allowed to be developed for further employment-generating development.

1.4.24 Whilst viability work has been undertaken in relation to the residential parcels at Paddock Wood, it is not clear whether a similar exercise has been undertaken in relation to the employment development. Planning policies should take account of the fact that there are a number of landscape, flood risk, biodiversity and other constraints on these sites and that development requirements, for example sustainability requirements such as those set out in Policy EN3, need to be reasonably balanced in order to ensure that development can sensibly proceed (see further discussion below).

1.4.25 Whilst the benefits of Design Review are recognised, and we do not object to the use of Design Review Panels being encouraged through policy, we do question whether their input at both the pre-application and post-submission stages for all applications within the SS1 masterplan area should be mandatory in all cases, regardless of the scale and nature of the proposal – which appears to be the case as Policy STR/SS1(5) is currently worded.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Owners of Land east of Transfesa, Paddock Wood
Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 6: Development Management Policies

[TWBC: the full representation attached has been divided between Policy STR/SS1 (PSLP_2076), Vision and Strategic Objectives (PSLP_2078), Policy STR1 (PSLP_2079), Policy STR4 (PSLP_2080) and Development Management Policies (PSLP_2081)]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction and Context

1.1.1 These representations have been prepared by DHA Planning on behalf of the owner of land at Land East of Transfesa in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 These representations relate to a 20 acre parcel of land at land East of Transfesa, Lucks Lane (part of Call for Sites site 218) that forms part of the employment allocations proposed for the expansion of Paddock Wood.

1.1.3 Based on the current national and local planning context, we consider this the site to be suitable for development.

1.2 Local Plan Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and

based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and• Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission comment on the plan having regard to these tests of soundness as well as wider legal compliance.

1.3 Legal Compliance

1.3.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.3.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.3.3 From a wider perspective, and having regard to the duty to cooperate, there is concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. In this context, and owing to such concerns, it is essential that consented uses are maximised to their full potential.

1.4 Assessment of Soundness

1.4.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough. It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.4.2 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.4.3 This representation comments on the following elements of the plan:

- Vision and Strategic Objectives;
- Development Strategy and Strategic Policies;
- Place Shaping Policies; and
- Development Management Policies.

Development Management Policies

1.4.26 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.4.27 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.4.28 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. Furthermore, many aspirations result in inevitable conflict. On this basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.4.29 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.4.30 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if

supported on wider environmental and planning grounds. As drafted the policies fail to be succinct and instead are overly prescriptive.

1.4.31 Furthermore, Policy EN2 sets out challenging BREEAM requirements for non-residential developments of more than 5,000sqm, with BREEAM Excellent required as mandatory in every case, with no flexibility provided within the policy to take account of specific circumstances. Whilst the importance of sustainable development is understood and agreed, as is the need for high sustainability standards on new developments, as highlighted elsewhere there are several competing constraints to be taken into account.

1.4.32 There is a significant danger that a policy requiring mandatory standards which go beyond those set at a national level without any scope for flexibility could have the unwanted side effect of preventing or deterring job-creating development from coming forward in a short timescale. At the very least, if it is to be retained, policy EN2 should include wording to recognise that sustainable design standards should be the highest that can be reasonably achieved in the circumstances of the site and taking into account viability considerations.

1.4.33 We therefore **OBJECT** to policies EN1, EN2 and EN3 on this basis.

1.4.34 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a support SPD not policy. We **OBJECT** to Policy EN4 on this basis.

1.4.35 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We fully support the proposed expansion of Paddock Wood to create a balanced mix of housing and employment development, including employment development at Land East of Transfesa. We confirm that our client's land is available, much of it is in Flood Zone 1, and that they are also willing to allow necessary expansion of the sewage works on the site.

1.5.3 We do however object to the detail of some of the development management policies as set out above, which we are concerned unnecessarily replicate the NPPF, whilst providing detail which could have the unwanted side effect of unnecessarily limiting and frustrating beneficial development.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link

with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the next few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need **"It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly"** There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley , Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion “**if possible to provide betterment**”. If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is “**and where possible, improve air quality**”. If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these “**The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change**”. The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity “**general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth**” cannot cope now and any further new houses will compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “ active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out “**It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters**” This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many

more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development “ chops” down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees where saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very “vitality” of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are in practical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development.

Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and g

rand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on **“It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.”** Objectives should be in place to achieve this not assumptions!

Policy STR 3

Brownfield Land (Statement)

Where is the real evidence that Brownfield land is being considered across the Borough rather than Greenfield build in PW and Capel?

a-g. These list all the reasons why Brownfield development could be unacceptable but logically they should also apply to the proposed new dwellings in PW. Within the plan they seem not to apply. Why the mismatch In policy in the DLP?

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must **make** proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery **must be** secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” **“The council strongly encourages”** is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main categories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 **“The Local Plan Vision is clear”** The local plan **Vision** is far from clear, rather than expected **“expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”** It must read **“it will ensure by legal means”—that future infrastructure etc.** To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Policy STR 6

Transport and Parking (statement).

- 1 **a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:**
- 2 **The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services**

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge, restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Town's residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 **Public transport.**
- 3 **"Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:**

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is “Pie in the Sky” as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where’s the evidence?

Car parking

Policy TP 3: Parking Standards

To revitalise our local high street and commercial centres after Covid the Borough must implement a free parking strategy across the board including PW car parks to give a boost to our local retailers and encourage people back to the shops in our community’s.

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 3. Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and PWLP objects to its inclusion in the DLP.

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The

most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out of the sky and then made it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.
- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.
- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Allocation policies for Paddock Wood

Land at Mascalls Farm

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breached.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt “**Life Time Home Standards**” for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation

including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is “should” relating to the policy provision and it should be replaced by “ **must**”. This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

1 Highway safety and access

2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

3 Crime reduction

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

1 Community engagement

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a ‘fabric first’ approach to reduce overall CO2 emissions from buildings. Developers “**must**” replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Policy EN 3 Climate Change

Mitigation and Adaptation

PWLP broadly supports the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. **“The Strategy for Paddock Wood and east Capel and STR/SS 3”** is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Pg388 Policy EN 25

Flood Risk

Where it is proven that the mitigation is not sustainable then the development should not be allowed as part of the DLP. Failure to do so will mean increased flooding in areas such as PW and Capel and the residents will pick up the cost, not the developers or the TWBC.

Pg 397.Policy H 1 & Pg401 H 3

Housing Mix

6.326 Within this policy statement there is no mention of the provision of Social Housing in the borough. As a matter of urgency this must be included after the pandemic and covid and hopefully the rebuilding of the economy.

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Note. From PWLP.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, the PWLP thinks not and PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

This submission is made on behalf of Paddock Wood Labour Party of which I am presently Chair.

This Tunbridge Wells Local Plan is the most controversial consultation to be submitted to the residents of Paddock Wood and the whole of TWBC to date. The local Labour Party has made submissions to every local plan over the last 40 years. This plan is brief and has no exact detail in the documents justification for so many proposed new dwellings in the Borough. There are numerous contradictions within the document so it must have the most serious scrutiny and any objections and answers must be considered closely at the hearing stage.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Section 2: Setting the Scene

Pg21. Paragraphs: 2.4, 2.17-2.19, 2.21-2.27, 2.33, 2.34, 2.41

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 2 Setting the Scene.

The settlements of the borough

Pg21 2.4 Paddock Wood. This opening statement highlights the many reasons why the amount of the proposed new dwellings 3,590+ are not sustainable within the area of Paddock Wood (PW). This number represents over 50% of the proposed Borough allocation and disproportionate to the allocation to other parishes and Towns in the Borough. Its is unfair and unjustified and damages the environment. There is no present bus station in Paddock Wood and the present mainline station has no direct link with the provision of bus routes needed to tempt present and future motor vehicle users to use public transport or cycles as we lead into a Zero carbon future. Our present secondary school Mascals can not sustain the present developments in PW and neither 3,590 new houses. Our present sports centre at Putlands is not adequate and the proposed new centre appears to serve Capel rather than the new residents of PW. We need a new police station to replace our present one which was demolished to make way for more housing in the town.

The strategy of the North of PW serving Large employment appears to have been abandoned in favour of new residential development. These new houses are in a high flood risk area and would create a pinch point over the present railway bridge if residents wish to use the present towns services ie. retail and access to schools, surgery's the present sports centre. There is a present HGV weight restriction on the bridge in appreciation of the increased traffic over the years. More houses North of PW will only make matters worse.

Housing affordability:

2.17 this paragraph highlights the worsening provision of the affordability of housing in PW where present house prices make many new houses in PW unaffordable to local residents. Present new 1 bed apartments in PW are priced at £252k to £275k beyond the reach of local residents. Social housing at 60% of market value is basically non existent and the social housing allocation should be nearer 100% to cope with future housing needs after the economic consequences of the pandemic start to kick in over the nest few years in PW and the Borough. Paragraphs 2.17 – 2.19 give the evidence that

the affordable housing is far from affordable! The Draft Local plan does not adequately address this problem in the Borough and unfairly burdens PW with the new housing allocation.

Housing Types.

2.21. No mention is made to the new provision of any suitable bungalow type houses in the plan for PW. With have an ageing population and to reduce pressure on all our health services we should be planning for more of these types of houses. We have a real shortage in PW.

Infrastructure Key Issue/ challenge.

This particular serious issue in PW only warrants two paragraphs 2.22- 2.23.

2.22. The present 3 new developments approved in PW are seriously lacking in new infrastructure to sustain them in the future and the proposed new 3,590 dwellings need a new integrated network for the present residents and new residents in the years ahead covered in the plan.. The present incompetence of the provision provided by Southern Water (SW) for these new developments gives no one in the Town the confidence that SW will deliver on these new houses. Table 2. Lists some fine promises of the types of infrastructure to be delivered but the residents are still waiting on previous promises. Words are not enough, we have been failed and will not accept failure again. We need guarantees in the plan that the Utilities will deliver before any more houses are built in PW.

2.24 -2.26. The present borough council has not worked with our present developers in delivering the conditions imposed at the last public enquiry and the present Councils Infrastructure Delivery Plan only glosses over the need "It is recognised that there are different infrastructure needs for different settlements and parishes across the borough, such as flood mitigation, sport and recreation provision, and internet accessibility, especially in rural areas; these will need to be considered and addressed accordingly" There are no concrete proposals in the plan to address these complex issues and problems.

Natural, built, and historic environment Key issue/challenge: Green Belt, conserving and enhancing the borough's recognised heritage and environmental assets, and achieving net gains for nature.

2.27. Much of the land around PW is designated Green Belt Land (GBL) including land surrounding our local villages such as Capel, Horsmonden, Brenchley, Matfield. The prospect of PW linking directly with Tonbridge via Capel is a real possibility and unsustainable. Urban sprawl is a real possibility and 407.576Ha of GBL will be de designated. 148.194Ha of this in the borough will be allocated for PW and East Capel. Foal Hurst Wood owned by Paddock Wood Town Council has resident Dormouse and other wildlife and a natural habitat for plants which has no mention of future protection in the plan. Coup[led with the present unfair allocation of new dwellings represents a massive destruction of our present Green and Open spaces and existing footpaths in the surrounding countryside.

Flooding Key issue/challenge: ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, if possible, to provide betterment.

A key element of objection in this statement is the suggestion "if possible to provide betterment". If you are providing new housing on high Flood risk areas in PW and the Borough than it is only logical that it is not sustainable unless improvements are made in the infrastructure.

2.33. Much of the allocated land especially North of the railway line has been put in Hgh Flood Risk areas category 2 and 3a. The present 3 developments in PW have added to the flooding issues and the proposed mitigation for the new houses is again unsustainable. A promised masterplan at the last public enquiry to co ordinate flood protection and mitigation was not implemented. In stead of bland promises the residents of PW need actions and real infrastructure.

Transport Key issue/challenge: promoting different transport options to accommodate future growth, ease congestion, and where possible, improve air quality

Again a key element of objection to this statement is "and where possible, improve air quality". If any potential road improvements in PW to sustain the new 3,590 dwellings are proposed then our existing air quality should not be reduced but improved.

2.34. How will TWBC address these "The borough faces significant transport challenges, particularly in terms of managing existing congestion and future growth, as well as needing to respond to the impacts of air quality and climate change". The existing pinch point over the railway line bridge is not addressed and no proposal put forward that make sense or provision for the future. HGV traffic around

our local lanes and roads is causing present massive congestion and air pollution and with the projected increase of commuters in the Town will also mean more congestion and air pollution and inadequate parking at the PW mainline station. More housing in our local villages will put more pressure on the present parking in PW.

Economy Key issue/challenge: supporting the needs of the local economy so that it can continue to be competitive, and creating a range of local job opportunities

2.41 As we come out of a pandemic our National and Local economy has been devastated and this aspect needs to be seriously addressed in the plan. To put it bluntly we have plenty of words but no detail or how we intend to create more local jobs in the PW area or rebuild the High Street (Commercial Road). A user friendly High Street has not been addressed for the future and with the recent approval of a new area behind the Commercial Road for housing places the whole future of the High Street in jeopardy. The best place to improve the economy is North of the railway line and this has been ignored in the plan.

In short Section 2. Setting the Scene, creates its own statement and doubts to question the sustainability of the new 3590 houses in PW and the size of the unfair allocation. The whole plan regarding PW should be revisited and provide more detail and sustainability for the future 30 years.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 3: Vision and Objectives	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 3. Vision and Objectives.

Pg29. Vision.

3.3 section 2.

This section highlights the many reasons why Paddock Wood cannot sustain the proposed new dwellings in the plan. With the present new dwellings being built in the Town the infrastructure capacity “general concerns about the infrastructure capacity (water supply, sewerage, schools, health, and leisure facilities, etc.) to support growth” cannot cope now and any further new houses with compound the problem. If the TWBC cannot get it right with these present new houses how can it give the residents the confidence that it will get it right for 2030. Can the phrase “ active travel” be explained in relation to reduce carbon emissions by 2030 a target set by TWBC.

3.8. Paddock wood is picked out “It has a distinct identity and the potential to enhance these and its supporting services and facilities through growth, subject to due care in relation to connectivity and flood risk matters” This very sentence gives a sound argument that these various points are a very good reason why the new dwellings in PW are unsustainable. The character of Paddock Wood will disappear and the flood risk will increase so how on ever can PW be suitable for so many more new houses. TWBC are just attempting to justify their quota at the detriment of the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Vision and Strategic Objectives 1

Vision (Statement)

“Local ambitions are: “

“for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding”

“for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design”

Once again this statement appears to be purely designed to justify the number of houses to be allocated to PW and Capel and no real detail in the Plan to inform the residents how it will be achieved without harm to the present character of the present communities and indeed the new residents. PW and Capel are just filling the TWBC quota and the provision not being balanced across the Borough.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Vision and Strategic Objectives 2

Strategic Objectives (Statement)

- 1 Where is the evidence for this that it is achievable in PW? The present approved development in the town is not sustainable now, so what hope in the future with this plan.
- 2 We need more Social Housing in the Borough and the proposed affordable housing in relation to present prices in PW supplied by TWBC figures will make any future affordable housing out of the range of local residents and Key workers such as those working in the NHS.
- 3 The proposed garden settlement in Capel is not sustainable as regards the new infrastructure required and the threat to our Green and Open spaces in the Borough. Where is the justification to dump it on Capel's residents and not to consider other locations in the Borough.
- 4 Every new development "chops" down existing trees and they should be incorporated into the design layouts. Cough Cooper houses built in the 1960's in PW where all built on orchards but many of the trees were saved and left in the new houses back gardens. We should demand that happens now and not see houses crammed in to meet the financial needs of the developers.
- 5 Over the years in PW with all the new housing the infrastructure has never been completed before the houses are built! The failure to achieve this threatens the very "vitality" of the communities.
- 6 With the proposed new residents our present road networks will not cope and the suggested proposals are impractical. The very presence of a Railway Line bridge at the heart of the town limits the number of houses PW can sustain without overcrowding the Town centre and making it a transport nightmare.
- 7 Please explain how?
- 8 Please explain how TWBC proposes to protect Foal Hurst Wood (FHW) our local Nature reserve owned by PWTC with the proposed new development surrounding it. Has light pollution been considered and the threat to wildlife migration across our Green and Open spaces. What threat is there to the present Dormouse population in FHW?
- 9 GB land is being released in this plan to solely meet the quota for TWBC. Show us where these tests have been made to justify it.
- 10 Climate change is making the risk of flooding more likely in PW so why build houses on the existing flood plain and enhance the impact of Climate change in the future and the residents pay the price for the Boroughs allocation.
- 11 This objective has been totally ignored to this day with past development in the town with the PWTC and residents ignored on many issues such as future surface water management and waste water management.

Everyone of these objectives are unachievable within the supporting documents in the DLP and seem only designed to support the plan and not address the real issues associated with the new development.

Decide where we can put the new houses then adjust the objectives to suit that proposal. Its not honest or sustainable.

Question 7

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4: The Development Strategy and Strategic Policies

Introduction

4.2 “One of the principal functions of the Local Plan is to set out the amount of future development being planned for, where it is to be located, and its nature, following the Vision and Strategic Objectives”By considering the failures in the plan in Section 3 Vision and Objectives this section logically is therefore flawed and unsustainable for the same reasons mentioned in the last section. Decide where we can put the new houses then build the argument with the attached documents to provide them. This approach is not sustainable for the future growth of PW.

The Development Strategy

Housing needs.

4.10 The figures provided by the TWBC are potentially over stated and the evidence is not conclusive with the need for 12,200 new dwellings in the Borough and an unfair proportion for PW and Capel.

4.11. The Council states it has considered alternative approaches and alternative locations so if the present allocation is unsustainable then it must object to the national default standard method. We need more houses for our children and g

rand children but with out the improved infrastructure before any houses are built it is unsustainable for the future. Draft local Plans are designed to achieve this and this one fails on so many levels.

Economic needs.

4.19. There is no mention of the effects of Covid on the local economy and unemployment is likely to rise. There should be no new residential housing North of the railway only retail as in previous Local Plans. The flood risk a very good reason with the real threat of Climate change in the future.

4.39. Where is the real evidence that all of the Brownfield sites have been considered. In the Borough and real note made of the windfall sites.

4.44. PW is not a a logical choice for strategic growth and the previous comments made concerning the sustainability of the allocation in PW reinforce this view. The very presence of the railway bridge hinders this growth so only retail development North of the railway is the logical choice. No mention of a possible new bridge?

Infrastructure and Connectivity

4.88 Mention is made that the Infrastructure has been separated into 3 main catogories:

“Physical infrastructure (such as highways and public realm improvements); community infrastructure (such as schools, adult social services, and cultural facilities); and green, grey, and blue infrastructure (such as play spaces, natural and semi-natural open space, and sports pitches, as well as other essential infrastructure such as flood mitigation, utilities, and digital connectivity)”

All of the three colour designations mention aspects of the infrastructure to be implemented but no reference to the utilities that will monitor or police, that these improvements are actioned within the plan.

4.91 “The Local Plan Vision is clear”The local plan Vision is far from clear, rather than expected “expected that future infrastructure to mitigate the impact of development, or in the case of the strategic sites at Paddock Wood to deliver 'betterment' in flooding terms to particular areas, should be largely funded by development to ensure that the development is acceptable in planning terms.”It must read “it will ensure by legal means”—that future infrastructure etc. To date in PW, TWBC and the utilities have failed on this objective relating to improving the infrastructure by betterment. The present situation regarding the utility Southern Water provision is late and totally inadequate for the present and future needs of the Town. This must not happen in the future with this DLP.

4.95. This paragraph mentions critical and essential projects to be in place before development takes place, but how do TWBC intend to implement this, rather than just “words”? Transport and Education has not been detailed and the present proposals have not been fully agreed with KCC. What legal powers do TWBC have against developers and utilities and the ability to challenge when they do not deliver key aspects of this plan.

Health

This mentions provision of new medical facilities or expansion in PW but where is the guarantee that it will happen to sustain the new houses. It is a must!!

Water

Who is going to pay for additional capacity at the present water treatment works to accommodate the new houses in PW and Capel? Where are the plans for new locations and funding requirements. Words are not enough we need concrete commitments not empty promises.

Sport and Recreation: Where is mention made of a new sports hub in PW as it appears it will serve PW and Capel of which they should have their facilities within the DLP. Sharing will cause access problems on our already congested roads travelling between the two locations to a shared sports hub. There is also no mention of the present proposed PW NHP provision currently in negotiation with TWBC.

Transport and Parking

4.98 The present NPPF states that significant development should be focused on locations that can be made sustainable by limiting travel and offering choice of transport modes. With the Railway bridge playing a significant pinch point to access to the town it is not feasible or practical to limit access to South of the railway just to justify the sustainability of the new housing within in the plan. There is at present a petition asking residents to object to the proposals concerning restricted access to the town and its lack of consultation with PW residents. It's a clear case of implementing solutions to just get the end result, more houses in PW that are just not sustainable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 1

The Development Strategy (statement)

Over the period of 2020-2038 the brunt of the allocation of 12,204 is being imposed on PW and Capel and is clearly unsustainable.

The proposed expansion of PW and Capel is within existing flood risk areas so what solutions are proposed other than more ponds on new developments that then feed into existing infrastructure networks that cannot cope. At present in PW Southern Water has failed the residents in every count on the present construction of 3 developments at Church Road, Green Lane and Badsell Road.

4.58. No draft plan should be based on “It is also assumed that existing employment space will essentially be retained (with a small reduction at Paddock Wood, just to the north of the train station) and that there is scope for the intensification or extension of some of these to help meet more local needs.” Objectives should be in place to achieve this not assumptions!

Policy STR 4

Ensuring Comprehensive Development (Statement)

“A comprehensive approach to site development will be expected to ensure the good planning of the area and, in relation to allocated sites, to ensure that the policy provisions, read as a whole, are achieved. Where sites have several land use elements or are in multiple ownerships, this will be secured by an appropriate means of masterplanning, the form of which will include consideration of”

the strategic significance of the proposal

the extent of different land uses proposed across the overall site

whether there are multiple land ownerships forming the allocation.

Within this part of the DLP, mention is made of Masterplans and these must make proper consideration of the proposed urban expansion of Tudeley village and Paddock Wood and provide a joined up masterplan to link the two proposals together. In all circumstances full consideration must be given to the policy requirements such as access and connectivity, open space, drainage and other infrastructure, as well as affordable housing) relating to the site as a whole, with a phasing plan where appropriate, will be achieved. Delivery must be secured through a legal agreement with all the Utilities and stakeholders such as KCC schools provision, the developers, being required to sign a legal agreement to ensure they are in place before any development takes place within the Masterplan. Deadline dates must be included in this legal agreement. A previous masterplan was promised by TWBC and it never happened!

“The Council strongly encourages, and will have regard to, the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the preparation of masterplans or similar framework documents.” “The council strongly encourages” is not strong enough to ensure the masterplans are acted on and completed as part of the DLP. The council must ensure legally that the level of engagement of relevant stakeholders, including the local community, town or parish councils, service providers, environmental organisations, and other interested parties, in the

preparation of masterplans or similar framework documents, commit to the plans Vision and Objectives. Failure to do so will result in unsustainable development in PW and Capel.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 6

Transport and Parking (statement).

- 1 a) Active travel. Active travel (walking and cycling, and emerging electrical personal vehicles) will be prioritised through:
- 2 The development and delivery of the strategic sites (Paddock Wood and east Capel, and Tudeley Village) proposed in this Local Plan will have integrated active travel as a fundamental element to their layout and design, so that settlements are easy to navigate on foot or by bike, both in new development and through existing areas of settlements to access their centres and services

The provision of this section relates to the Borough "Council's Local Cycling and Walking Infrastructure Plan". The implementation of this infrastructure plan proposes restrictions to the access to the Town via the Railway Bridge , restricting vehicle use and HGV use which already has a weight restriction. This plan appears to propose various new initiatives concerning pedestrian access and cycle access but in reality they are being implemented to justify the new development North of the railway. The bridge is a pinch point and clearly represents a barrier to the number of houses that are sustainable in the DLP. The new Cycling and walking plan is designed to mitigate this barrier and total disregard of the resulting consequences for the Towns residents. No car access means a journey into the Town centre via the Badsell road which will in turn cause more congestion into the Town from that direction. Buses will be allowed but PW does not have an integrated bus station with the rail station to try and tempt residents away from cars and use public transport. The strategy is clearly not joined up and the walking infrastructure plan has not gone to consultation to the local residents especially those living at present North of the Railway. Another good reason not to have new residential housing North of the railway which is part of the DLP. The only reason it has been proposed is to meet the allocation from TWBC. It plainly does not make common sense and should be opposed.

- 1 Who will pay for these new provisions as we come out of the Covid pandemic? The national debt is massive and many councils and utilities' will just not have the finances. There has to be a funding commitment via Government who are imposing the housing allocations across the country. Failure to do this should mean no new development in PW or within the whole Borough.
- 2 Public transport.
- 3 "Establishing rapid bus/transport links, including from Paddock Wood to Royal Tunbridge Wells, Paddock Wood to Tonbridge (via Tudeley Village), and Royal Tunbridge Wells to

Tonbridge, and ensuring that the design of these strategic sites provides for attractive bus services with convenient access to the highway network:

Who is going to fund these rapid bus/transport links within this DLP and ensure we have attractive bus services with convenient access to existing highway networks. Will the service be subsidised by KCC or is it again just words and no real substance in the proposals?

- 1 Working with network rail again is “Pie in the Sky” as they have their own agenda but it seems convenient to suggest it can happen in the future as part of this DLP. Has there been any negotiations with Network Rail and any commitment to provide capital funds to make it happen in the future as part of this DLP. Where’s the evidence?

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 7

Climate Change (statement)

The Borough must implement these changes as part of its net zero target by 2030.

1 Implementing proactive policy on climate change adaptation

“a. protecting existing green spaces and creating new, appropriate green infrastructure whilst balancing the need for built development”

Show us the proposals and evidence that this is achievable with the present dwelling allocation for PW within the DLP. Where are these sustainable Drainage Systems at present in PW?

1 Partner engagement

This looks great on paper but in reality it has never happened yet in PW with all the new houses over the last 50 years. Who is going to lead and integrate these partner engagements? At present Southern Water and the present developers ignore the residents of PW and PWTC when dealing with the failures of these partners to provide present sustainable development in PW and stick to their previous promises made in past Local Plans to previous Inspectors and recent planning applications. The Borough is failing the residents of PW.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 9 Green Belt	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 9

Green Belt (statement)

The Borough's Green Belt

4.128 Overall, some 5.71% of the Green Belt within the borough has been de-designated. Table 6 Green Belt Sites Policy Number Site Address S

STR/SS 1 Paddock Wood (including land at Removed -148.194 2.077 east Capel)

STR/SS 3 Tudeley Village Removed

To accommodate the boroughs housing allocation the above areas of GBL have been removed and there is no evidence or justification to agree to the reduction of our green and Open Spaces. This removal is purely designed to allow the TWBC to meet the new dwelling allocation and again highlights the unsustainability of the present proposals in the DLP.

Within the NPPF the proposed new development within the Green Belt is inappropriate and will harm the GB. Once you have lost Green Open Space in the GB it takes years to replace and is not viable. The only reason to take GBL is to meet the housing allocation and ignore the future damage. This use of GBL is inappropriate and PWLP objects to its inclusion in the DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Section5: Place Shaping Policies Introduction

Paddock Wood

Pg 166. The Strategy for Paddock Wood.

5.239 This paragraph clearly states the importance of identifying the flood risk in the area and the importance to recognise this when agreeing planning applications and the policies in this DLP. The most risk is North of the railway and no residential development should be allowed in this allocation as in previous Local Plans with only commercial development being acceptable.

5.240 The release of the GBL west of Paddock Wood and none of the exceptional circumstances justify this release set out in Policy STR/SS 1. The only justification is to allow the allocation of new dwellings to meet the TWBC allocation and the unchallenged Government Allocation.

5.241 This is a false statement regarding the number of presently agreed houses which is at least 1400 new dwellings within the last Local Plan. It should also take into account the number of windfall houses built in PW during that time and the pressure put on the existing inadequate infrastructure.

5.242 The significant growth planned for PW 3,490-3,590 dwellings will significantly change the existing character of the Town and is not sustainable as regards the present provision of medical facilities and capacity at the primary school and Mascalls School. The present Town centre will also not be able to sustain the new houses. In short the allocation is disproportionate to the overall TWBC allocation and this document seeks to justify the figures by false statements and attached documents. The number was picked out the sky and then make it sustainable.

5.244 There is frequent mention of a Masterplan through out this whole document to again support the allocation of 3,590 houses and there is no detail of the plan and the legal requirement put on developers and other utilities and stakeholders in the Town. A previous masterplan was promised for PW and it did not happen. The detail of the masterplan must be presented and agreed in this DLP.

Policy STR/PW 1

The Strategy for Paddock Wood

- 1 Mention is made to Affordable housing but no mention of the need for Social housing as we come out of the Pandemic. The affordable housing in PW not affordable to many residents even with

the present TWBC policy on its provision to developers. The TWBC is missing its target on this provision. We need more Social housing.

- 2 Flood mitigation at present on the existing new developments predominantly relies on drainage ponds which is not sustainable in the future as we experience Climate Change and more extreme weather events. The fact is they are being built on high Flood risk areas and should not be allowed. There has to be a limit to how many houses that are sustainable within the present infrastructure.
- 3 No mention is made to protection of Foal Hurst Wood nature reserve owned by PWTC as more houses are built around its boundary. Light pollution is a major threat to the present wildlife that exist in the wood including resident Dormouse.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Allocation policies for Paddock Wood

Land at Mascalls Farm

5.253 The protection of Foal Hurst Wood and the link to Brick Kiln Wood should be included to protect the present Dormouse population in FHW.

5.255 The site allocation of 400 homes is over intensive and unsustainable within the DLP

5.256, 5.257 These statements highlight the probability that the allocation of 3,590 will be exceeded as the duration of the plan progresses and the limit of 3590 must not be breached.

Policy AL/PW 1

Land at Mascalls Farm

This development already has planning permission so why is it in the DLP and appears to be open to consultation, it is not!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Section 6: Development Management Policies

Policy EN 1

Pg 324.Sustainable Design

- 1 This mentions the needs of occupiers in relation to their changing circumstances as they grow older or life changes at any age, without needing to move House. New dwellings as part of TWBC policy should adopt “**Life Time Home Standards**” for all new build across the Borough in the DLP. This also should include the inclusion of new bungalows in any new development allocation including Social Housing. Developers need to be forced to include new Bungalow dwellings in the DLP allocation.

Within this whole policy the main theme is “should” relating to the policy provision and it should be replaced by “**must**”. This gives a clear commitment to ensure that the policy statements are not just words to be ignored but to be acted on.

- 1 **Highway safety and access**

- 2 Due to the unfair allocation of 3,590 new dwellings in PW it will result in a massive impact, with congestion around the town including Badsell Road. The Local Cycling and Walking Infrastructure Plan Phase 2 has proposals to ban cars using the Railway bridge to access the Town centre. The rerouting of traffic via the Badsell road to access the Town centre will increase congestion along the Badsell Road. This proposal has also not been subject to direct consultation with the residents of PW. This should be implemented by TWBC before this DLP Consultation is reviewed after the closing date of Friday 4th June 2021.

- 3 **Crime reduction**

Paddock Wood has just seen its present Police station demolished for new housing and results in no direct police presence in the Town. With the proposed 3,590 new dwellings there is a clear need for a new police station to serve the increasing community. This should form part of the need within the DLP.

- 1 **Community engagement**

At present numerous planning applications are ignored by TWBC when PWTC and residents clearly object to them regarding past policy on local plans. The recent approval of the Churchill development in the town centre clearly went against previous policy and PWTC objections. We need closer liaison with TWBC planning office and our elected Borough Councillors who make the real decisions and to stop us being continually ignored. We live local and need to be listened to and supported.

Design checklist to support the design criteria in Policy EN 1 1. Design, character, and site context

All of these questions look fine on paper but what is the process if any have the answer of no! Hopefully if only one is not met then the design of any new development would be rejected.

The residents again need that commitment from TWBC as part of the DLP.

Climate Change Mitigation and Adaptation

Climate change mitigation

6.32 The statement is to be supported identifying the greatest challenge the world and our local communities in the Borough face in the near future up to 2030 and beyond. The modelling produced by the Utilities need to be challenged and subject to rigorous scrutiny as regards events over a 100 years etc. These events are occurring more often and any new development must have the required infrastructure to cope with these extreme events.

6.36 This statement is not forceful enough when : The Local Authority **expects** developers to undertake a 'fabric first' approach to reduce overall CO2 emissions from buildings. Developers "**must**" replacing the expects to implement these policy statements.

As part of this statement it should include the policy to ensure that all the Towns including Paddock Wood and Parishes within the Borough implement a local A Carbon Free Footprint to meet the Borough target of 2030. This policy should be implemented with subsidies from the Borough to help the communities create their local policies in support of the Borough policy of carbon free by 2030.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN 3 Climate Change

Mitigation and Adaptation

PWLP broadly supports the Policy EN3 but enforcement is the key with any new development being subject to scrutiny and enforcement from the Borough. It is responsibility of TWBC to implement this and not the Town and Parish clerks. Who is meant to ensure that any conditions imposed on developers as a result of these fine words in the DLP are actually complied with?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy EN 5

Heritage Assets

Within this policy statement the Wesley Centre in Paddock Wood should be clearly mentioned and protected for the future.

Pg 353.Natural Environment

Requirements and processes for planning applications

6.138 These are fine policy statements but who again enforces the developers to put them into practice. Within the DLP allocation of 3590 new houses in PW all of this development is on present green and open space and existing countryside. That environment is destroyed with no regard to the resident wildlife and natural trees and plants. TWBC should demand the developers provide such elements as hedgehog highways between the dwellings to help the Hedgehogs adapt to their new environment. Existing trees must be incorporated into the design of the new developments.

Pg357 Protection of Designated Sites and Habitats

Local sites

6.153 The local nature reserve owned by Paddock Wood Town Council PWTC **must** be mentioned in this policy statement to protect the woodland and its resident wildlife and habitat against over development and encroachment on its existing boundary's.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Pg381. Policy EN 21

Air Quality

TWBC must implement this policy statement across the borough as more and more houses are built in this DLP including PW. The present bus services in the rural areas are totally inadequate and an integrated bus and railway network will encourage more public transport use and improve air quality.

Pg 387 Development and Flood Risk

6.277 This statement needs to be reviewed as most of the proposed new development in PW within this DLP is in a high area of flood risk. **“The Strategy for Paddock Wood and east Capel and STR/SS 3”** is totally unsustainable and supports the argument the allocation of 3,590 is not sustainable when considering all the policy statements in this DLP. The number of new dwellings is not proportionate to the rest of the Borough in meeting its total allocation of 12,000 plus new dwellings. Paddock Wood just cannot cope with this large number of new houses and it should be reduced.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy H 3 Affordable Housing	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Pg 397.Policy H 1 & Pg401 H 3

Housing Mix

6.326 Within this policy statement there is no mention of the provision of Social Housing in the borough. As a matter of urgency this must be included after the pandemic and covid and hopefully the rebuilding of the economy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Pg 428 Policy ED 1

The Key Employment Areas

Paddock Wood Eldon Way and West of Maidstone Road

Paddock Wood Transfesa Road East and West

Both of these locations identify the present local key employment areas in PW and should be maintained. The proposal within the DLP to provide residential dwellings North of the railway bridge in PW contradicts this policy. This type of Commercial development is more suited to high risk flood areas in PW as describe in the DLP and not for new residential development in the same area.

Pg 466 Public Car Parks

The introduction of free parking should be implemented as part of this DLP for all the Borough public car parks. To rebuild the local economy across the borough and support our local retailers after the Pandemic and Covid. We need our residents to shop local and this policy will support that goal.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Pg468 Policy TP 5

Safeguarding Railway Land

The former Paddock Wood to Hawkhurst (Hop Pickers) line

This policy is fully supported within the DLP and supports PWTC in setting out a strategy to try and enhance and improve the route for future recreational use including walking along the route, where possible to Hawkhurst.

Note. From PWLP.

When considering all the various statements included in these sections of the DLP it is so plainly obvious that many of the statements contradict themselves in justifying the new housing allocation. The Borough has quite frankly built the reasons why the allocation in PW and Capel is not sustainable and across the Borough. The point is will the safe guards be implemented in the DLP and the fine words acted on in the future, the PWLP thinks not and PW will change for the worse for ever!!! The Borough must stand back and review its present DLP.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

1 Plan Period

1.1. The Local Plan period of 2020 – 2038 is insufficient to cope with the extent of the strategic proposals contained within the Local Plan. The NPPF states that “*Strategic policies should look ahead over a minimum 15-year period from adoption (except in relation to town centre development)*”¹ and the Local Plan makes reference to this where it states “*In accordance with national policy...this Plan runs from 2020 to 2038, following anticipated adoption in June 2022*”². However, there is no justification provided by TWBC as to why 2020 – 2038 is the selected plan-period. Given the Council's proposed change of its current development strategy of focusing development on its key urban areas (Royal Tunbridge Wells and Southborough) to directing the majority of its growth to an area with high flood risk (Paddock Wood) and a location in the middle of the countryside (Tudeley) there is clearly a need for more lead in time to plan for this proposed new strategy which will require an enormous amount of funding, due diligence, community / stakeholder engagement and joined up planning in order to properly plan and deliver.

1.2. MHCLG recognises the need for longer plan periods in its recent consultation on proposed changes to the NPPF (30th January – 27th March 2021) where it proposes to amend paragraph 22 of the NPPF to require a minimum of 30 years where larger-scale development is proposed. The consultation document refers to new settlements specifically and the explanatory text in the consultation clarifies that ‘major urban extensions’ are also included as part of this (see excerpts from the consultation below). Whilst MHCLG's consultation on the proposed changes to the NPPF provide a clear direction of travel for plan-making and that authorities will need to plan ahead for at least 30 years, the NPPF is already clear that 15 years is a minimum period and given the scale and complexity of growth proposed in this Local Plan we consider (and provide evidence in our representations) that the Local Plan period should cover at least 30 years from adoption. Although TWBC considers the Local Plan will be adopted in 2022 we consider this to be highly optimistic due to the issues that will need to be examined at the Examination in Public (EiP) and we would suggest that this be pushed to 2023 at the earliest.

1.3. TWBC's proposed plan-period is ‘driving’ the Local Plan's suggested delivery rates and phasing for the proposed strategic allocation at Paddock Wood and Tudeley which are entirely unrealistic.

TWBC's evidence³ claims that the entirety of the proposals at Paddock Wood will be completed by 2036/37 and that delivery at Tudeley will extend beyond the plan period with 2,100 to be delivered by 2038 and 700 beyond the plan period. We go into more detail on these unrealistic delivery rates and development phasing assumptions in our representations however it is important to capture this in these representations on the plan-period as this appears to be what is driving the Council to adopt such an unreasonable approach to its Development Strategy which is an extremely unwise decision by TWBC.

1.4. Therefore, the plan period should be changed to 2020-2053. As a result of this change in the plan-period the majority of the Council's evidence base will need to be reviewed and updated. Given the extent of time that will be required to update the evidence base and proposed policies we suggest that TWBC not proceed with submission of the Local Plan in order to save the Council, the taxpayers and other key stakeholders a considerable amount of time and resources that will result from a Local Plan which is clearly unsound and not legally compliant.

[TWBC: for figures, please see full representation attached as a supporting document]

1 Duty to Cooperate

2.1. TWBC has not complied with the Government's legal test for discharging its Duty to Cooperate. Local authorities must fulfil the legal requirement to cooperate with the Duty to Cooperate prescribed bodies by "engaging constructively, actively and on an ongoing basis"⁴ on cross boundary strategic matters from the commencement of preparing the Local Plan to submission of the Local Plan to the Secretary of State for examination. TWBC has also failed to comply with the Town and Country Planning (Local Planning) (England) Regulations 2012⁵ which states that:

"(6) Where a local planning authority have co-operated with another local planning authority, county council, or a body or person prescribed under section 33A of the Act, the local planning authority's monitoring report must give details of what action they have taken during the period covered by the report."

The only TWBC Authority Monitoring Report (AMR) available on TWBC's website is the 2019-2020 Authority Monitoring Report⁶ so it is impossible to determine what Duty to Cooperate monitoring was or was not published in early Monitoring Reports. The 2019-2020 AMR does not detail actions TWBC has taken in relation to the Duty to Cooperate. It simply states that there has been progress on statements of common ground during the year and up to date and that these are set out in the Council's Duty to Cooperate Statement produced in support of the 'merging Local Plan'. It states that *"Perhaps the prime strategic matter at present is the capacity of the borough, as well as neighbouring authorities to meet housing needs"* and that *"this is subject to ongoing assessment through the preparation of the new Local Plan"*. It explains that *"it is likely that it is possible to meet its local housing need under the Standard Method, but not the uncapped housing need figure or to contribute to meeting wider housing needs"*. It finally states that *"Of note, dialogue with Sevenoaks District Council is continuing to clarify whether it will be meeting its own need"*⁷.

2.2. The above outline of the contents of the Council's AMR 2019-2020 does not comply with the regulations as there is no detail provided regarding the Duty to Cooperate activities undertaken. Simply stating that there has been progress on statements of common ground and that Sevenoaks DC is continuing to clarify whether it will meet its own development needs is not sufficient detail to comply with the regulations.

2.3. Furthermore, TWBC's Statement of Community Involvement (October 2020) commits to reporting *"on how it meets the Duty Cooperate in its Authority Monitoring Report"*⁸, however as explained above its AMR 2019-2020 does not provide the details of the actions undertaken. The SCI misunderstands the regulations as it not about reporting how the Council claims it meets the duty, it is instead supposed to provide a clear log of the actions undertaken.

2.4. Section 33A of the Planning and Compulsory Purchase Act 2004, as inserted by section 110 of the Localism Act 2011⁹ requires the council to cooperate with other local planning authorities and other 'prescribed' bodies in preparing and developing development plan documents and other local development documents so far as it relates to a strategic matter.

2.5. Despite TWBC preparing a document of near 560 pages seeking to evidence that it has discharged the duty, the document has a considerable amount of 'padding' and lacks substantive evidence that 'active', 'ongoing' and 'constructive' cooperation took place from the start of the preparation of the Local Plan up to submission. If further evidence of cooperation were to be submitted by TWBC in the

lead up to, or after submission of the Local Plan then this would clearly demonstrate that the Local Plan and its policies were not informed by this engagement – which is, after all, the entire reason for the Duty to Cooperate as explained in the NPPF: “*effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy*” 10. The purpose of the duty is not to have a Statement of Common Ground, an SOCG is simply a way to demonstrate that effective and on-going work has informed the preparation of the Local Plan.

2.6. In any case Planning Practice Guidance (PPG) states that authorities should make any statements of common ground (SOCG) available on their website by the time they publish their draft plan so that communities and stakeholders have a transparent picture of how they have collaborated:

*Authorities should have made a statement of common ground available on their website by the time they publish their draft plan, in order to provide communities and other stakeholders with a transparent picture of how they have collaborated.*¹¹

As we set out in the table below there are no published SOCGs with Tonbridge & Malling BC or with Kent CC to support the Pre-Submission Local Plan.

We have also reviewed the Interim Duty to Cooperate Statement for the Draft Local Plan (Regulation 18)¹² and there was only one up to date SOCG published at that stage which was with Sevenoaks District Council 13. However, the validity of this SOCG cannot be relied upon as Local Plan was found by the Inspector in the same year (2019) to be unsound and not legally compliant due to SDC having not met the Duty to Cooperate¹⁴.

The other SOCG with a neighbouring authority was a 2016 SOCG with Maidstone Borough Council¹⁵ which to be fair has very little substance on which TWBC could rely upon to demonstrate the tests of the duty at that stage.

2.7. Turning to the current Duty to Cooperate Statement supporting the Regulation 19 Local Plan, it is difficult to see how TWBC has moved much further forward in a meaningful way with most of its neighbouring authorities.

2.8. The Duty to Cooperate engagement records in the TWBC document indicate that there are multiple gaps of 5 months or more with the other Local Authorities. There are no details about what the SOCG with Tonbridge & Malling BC will include and what are the actions in relation to joint evidence base, strategic policies and/or cross-boundary issues.

2.9. Further to this point regarding no SOCG with Tonbridge & Malling BC, we are aware that a number of TMBC Councillors have recently sent a letter to TWBC (dated 2nd June 2021) reiterating its opposition to several aspects of the Local Plan with particular regard to the Tudeley Village proposals which it considers will have an impact on Tonbridge “*above and beyond all recognition*”. The letter expresses in detail the disappointment with TWBC to address TMBC’s points raised previously (including the 2019 Local Plan consultation). There are a number of specific points raised in the letter which are summarised below and which were discussed at the TMBC Extraordinary Planning and Transportation Advisory Board on 17.05.2021 which available for public viewing online¹⁶:

- . TMBC last week rejected a planning application for another supermarket at Tonbridge Retail Park on Cannon Lane due to concerns about the ability of the road network to cope. Cannon Lane was originally build as the ‘mini-bypss’ in Tonbridge yet is frequently gridlocked. Thousands of homes just over the border in Tunbridge Wells borough would only lengthen queues across the south east of Tonbridge and make it harder for children to travel to the excellent schools in town.
- . The TMBC response to the Tunbridge Wells Local Plan (Regulation 19), as agreed at the Transportation Advisory Board meeting (June 2021) will include a number of accurate and extremely pressing comments:
- . Most relevant is the inability of TWBC to fully model forthcoming development in Tonbridge as part of its assessment as residents will look toward the town of Tonbridge much more than any other of the identified retail centres in Tunbridge Wells borough for services, shops and schools. Consequently TMBC would have expected to see a complete list of proposed mitigations (if even possible) within Tonbridge to cope with this however none have been put forward in the Local Plan process.
- o TMBC does not think the reduction in car use arising from the development is realistic.

o The development proposed near the border of Tonbridge will have landscape impact including rural roads and public footpaths which would link the proposed development at Tudeley with Tonbridge. This detrimental impact has not modelled. The Landscape and Visual Impact Assessment only applies to sites located within the High Weald AONB. This underplays the wonderful landscape that is visible within Tonbridge and to Tonbridge from notable landmarks. TMC would have expected the assessment to account for the character of the area within TMBC as well.

. TMBC strongly argues that the inclusion of STR/SS3 (Tudley Village) is unsound as it does not meet the NPPF's tests of soundness. It is not positively prepared because the cumulative impact of development on Tonbridge and Malling has not been assessed. It is not justified because reasonable alternatives have not been considered fully. It is not effective because significant infrastructure improvements will be needed, which are not forthcoming. It is inconsistent NPPF because the severe impacts on traffic cannot be mitigated.

. TMBC requests that TWBC removes the allocation from the Local Plan.

2.10. The above describes a letter and some of the discussion from TMBC's Advisory Board meeting in May however it is not TMBC's official response to the Regulation 19 Local Plan. It does provide some important indication as to how TMBC is likely to respond to the Local Plan and demonstrates the lack of cooperation by TWBC with TMBC.

2.11. With no signed SOCG with TMBC and the grave concerns it has about the evidence and unsoundness of the Local Plan, as well as the lack of constructive engagement, it is clear that TWBC has not discharged the Duty to Cooperate in relation to TMBC (or the other prescribed bodies).

2.12. We have prepared a table below to help summarise the status of SOCGs that TWBC does or in most cases does not have in place. We have included in the table, Kent County Council as it is considered that they are a key body in the preparation and delivery of the Local Plan and it seems reasonable that TWBC should prepare an SOCG with KCC to clarify what cooperation has taken place, what is agreed and what is not agreed. Given the scale of strategic proposals at Paddock Wood and Tudeley surely an SOCG with KCC is critical.

2.13. We have included 'Strategic Site Promoters / Landowners' in the table given that the delivery of the strategic growth at Paddock Wood and Tudeley is dependent to a very great extent on the developers. There needs to be public clarity about what is agreed between TWBC, KCC and the developers in a SOCG. Such an SOCG cannot wait until the planning application stage as the Local Plan examination is the opportunity to deal with difficult issues using a plan-led approach rather than storing up issues for a later day.

2.14. The PPG explains what a Statement of Common Ground should contain¹⁷. The PPG also states that *"The level of cooperation detailed in the statement is expected to be proportionate to the matters being addressed. The statement is expected to be concise and is not intended to document every occasion that strategic policy-making authorities meet, consult with each other, or for example, contact prescribed bodies under the duty to cooperate. The statement is a means of detailing key information, providing clear signposting or links to available evidence on authorities' websites."* Most of the Statements of Common Ground included in the TWBC Duty to Cooperate Statement for Pre-Submission Local Plan refer to meetings and discussions on crossboundary issues, however they often lack the documentation of the preparation of joint evidence base and strategic policies¹⁸ to ensure development is coordinated, (such as the distribution of unmet needs or policies relating to county matters).

2.15. It is not clear from the Duty to Cooperate Statement what are the additional (if any) joint studies commissioned, besides the ones in partnership with Sevenoaks District Council.

2.16. TWBC's Statement of Community Involvement states that *"The Council will meet the spirit and letter of the legislation and supporting guidance in collaborating on strategic matters affecting the borough"* however it clearly has not met the spirit or the letter of legislation and national policy.

[TWBC: for table, please see full representation attached as a supporting document]

1 Garden Settlement Principles

15.1. We consider that the Local Plan's multiple references to 'Garden Settlement Principles' is unjustified.

15.2. The NPPF states that local authorities should *"set clear expectations for the quality of the development and how this can be maintained (such as following Garden City principles) and ensure that a variety of homes to meet the needs of the different groups in the community will be provided"*⁵⁰.

15.3. The Local Plan states that “at the heart of the creation of a sustainable community is the delivery of the new settlement based on garden settlement principles”⁵¹. It then lists ten “qualities”. Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel) states that “The development strategy for Paddock Wood and east Capel is to: (6) Ensure the development embeds the garden settlement principles. Planning applications need to demonstrate consideration of the associated key qualities as outlined in the supporting text”. We note that the proposed ‘Garden Settlement Principles’ are identical to the “Garden community qualities” set out in the Government’s Garden Communities Prospectus (2018)⁵². Whilst we share TWBC’s ambitions for the quality development that would result from planning and delivering development in line with these principles we seriously question how these principles have been considered in the Council’s evidence base and how deliverable they are.

15.4. For instance, the Council’s viability evidence talks about the garden settlement principles where it states regarding development at Paddock Wood and Tudeley: “In the context of the aspiration to deliver these strategic sites on garden settlement principles, however, it is recognised that the site works and infrastructure costs will be significant. Accordingly, there will need to be an approach to finding the right balance to both ensure the provision of the necessary infrastructure to support growth, and secure affordable housing delivery in accordance with policy to the fullest extent possible”⁵³. To translate this paragraph from the viability evidence, it is effectively saying that ‘Garden Settlement Principles’ are aspirational and that the proposals at Paddock Wood and Tudeley will struggle to deliver the infrastructure requirements and affordable housing requirements before one can even consider the aspirations of the ‘Garden Settlement Principles’.

15.5. Although the viability evidence supporting the Local Plan claims to include assumptions about the additional costs associated with applying ‘Garden Settlement Principles’ we cannot identify where these additional costs are set out in the evidence.

15.6. The Inspectors of the Uttlesford Local Plan – which proposed multiple new garden settlements and stated that the new settlements would need to be developed in line with ‘garden city principles’ found that there were no mechanisms in place to ensure that the garden city principles could and would actually be delivered by the developers. They stated in their letter: “Without assurances that the necessary mechanisms outside the plan would be put in place, we cannot be content in principle that the new proposed settlements would be true Garden Communities, or that the plan’s stated vision for these new settlements would be met. This is a serious concern.”⁵⁴. We have the same concerns for the Tunbridge Wells Local Plan in respect of the purported application of ‘Garden Settlement Principles’ with no concrete mechanisms for actually delivering development in this way and no evidence to justify it.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan

Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

3. Sustainability Appraisal / Strategic Environment Assessment

General

3.1. Through scrutinising the Sustainability Appraisal (SA), it became apparent that the justification for the preferred development strategy is unsound, as the preferred development strategy would involve the loss of Green Belt and the AONB. As such, this approach does not comply with paragraph 118 of the NPPF which emphasises the benefits of developing suitable brownfield, under-utilised land and buildings and airspace above existing residential and commercial premises for new homes. In contrast, the nontechnical summary states that “following the maximisation of sustainable development in settlements across the borough, the preferred development strategy embraces the creation of a new garden settlement, together with a major urban extension based on garden settlement principles. Both of these proposals would involve significant loss of Green Belt land, it being found unreasonable for such large growth to occur in the AONB and there being no sustainable opportunities outside of the AONB. However, these are justified in part on meeting development needs, given the limited capacity for this scale of growth to be otherwise distributed across the borough.”

3.2. The above SA statement indicates that the loss of Green Belt is justified via the ‘exceptional circumstances’ case, whereby, in accordance with paragraph 37 of the NPPF, “strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development”. Paragraph 37 of the NPPF clarifies that this can be justified if the following can be justified:

“a) makes as much use as possible of suitable brownfield sites and underutilised land;
b) optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and
c) has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground.”

3.3. TWBC have clearly not fulfilled the NPPF's criteria set out above. First and foremost, the preparation stage of the Local Plan should be informed by a suite of evidence documents. Given that the borough is largely constrained by Green Belt and the AONB, it is unclear as to why TWBC did not undertake further urban capacity studies and small sites studies. The outputs of this work would likely unlock new growth potential in areas deemed appropriate for higher density development within the borough, as in accordance with the NPPF. In the absence of this it is noted that the Brownfield and Urban Land Topic Paper¹⁹ concludes that “a review of brownfield sites now proposed for allocation shows that high densities are being proposed on all but two sites (on Land at Benenden Hospital.) While these sites have a relatively low density, this reflects the constraints and location of the site. There are regarded as appropriate densities in line with paragraph 122 of the NPPF. The other proposed brownfield site allocations are achieving densities well above 30 dwellings per hectare with particularly high densities on sites in Royal Tunbridge Wells, showing the Pre-Submission Local Plan will seek to optimise the use of sites in the town centre and other accessible locations.”

3.4. The above summary is concerning as it highlights TWBC's lack of regard for the Green Belt. It is clear that the proposed loss of Green Belt and AONB conflicts with paragraph 133 and 11bi) of the NPPF and also provides that TWBC have not fully evaluated potential sources of supply. With regard to paragraph 37 of the NPPF (as set out above), it is clear that there has been no thorough review of under-utilised land nor has there been sufficient regard for sites in town centres and near public transport where constraints exist but there is potential for them to be overcome.

3.5. With reference to clause c) of paragraph 37 of the NPPF, TWBC's Statement of Common Ground states that (our emphasis added) “In September 2020, TWBC wrote to MBC indicating that they are exploring all potential options to meet the need of the borough. In this letter, TWBC formally requested that MBC accommodate some or all of the housing proposed in the Draft Local Plan within the Green Belt, or as major development in the AONB, and at least 14 hectares of employment land. An initial response was issued by MBC in December 2020. This stated that MBC could not accommodate any

of TWBC's need, as it was proving very challenging to accommodate the extra homes needed until 2037, necessitating growth to be focused on two 'garden communities'". The above statement severely undermines the legitimacy of TWBC's approach, as TWBC did not engage constructively with MBC and instead sought only to accommodate housing needs in the Green Belt and AONB within MBC. As such, this approach does not comply with paragraph 37) of the NPPF on the grounds that TWBC's and MBC's collaborative evaluation of the potential sources of housing supply was entirely unsatisfactory.

3.6. It is worth acknowledging that the above matter was a key issue within the St Albans City and District Local Plan examination, where the Examiners' (Letter from Examiners dated 14th April 2020) recommended the withdrawal of the Plan and stated that (our emphasis added) "the Council's approach to the Green Belt is also of concern to us in relation to the DtC. The Plan proposes substantial Green Belt boundary alterations to enable land to come forward for development. Paragraph 137 of the Framework requires that before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic planning authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. It has not been demonstrated that the Council's approach to the Green Belt has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through a statement of common ground (SoCG)". Similarly, it cannot be demonstrated that TWBC have been informed by discussions with MBC. On the contrary, TWBC did not show any flexibility or openness in their approach to meeting their identified housing needs. It is important to note that the St Albans City and District Local Plan was subsequently withdrawn on 19th November 2020 due to the Examiners' concerns that there was "inadequate evidence to support the Council's contention that exceptional circumstances exist to alter the boundaries of the Green Belt".

Horsmonden

3.7. Table 27 also assesses Horsmonden as a potential location for further assessment. However, the explanations states that Horsmonden is not situated within the Green Belt or AONB, however it won't be taken forward based on access and landscape sensitivity issues. This is unjustifiable, as such issues are afforded less weight than Green Belt and AONB matters within the NPPF. This decision undermines the entire SA as it provides evidence that TWBC have not accorded within the NPPF when decision-making.

Sustainability Appraisal: Paddock Wood – Draft Local Plan scenario

3.8. With regard to Table 27 of the SA (which sets out which development options are to be progressed and considered further, the approach for the Draft Local Plan Paddock Wood and East Capel allocations was explained as "Land is outside of the AONB and has useful rail and road transport links. There is potential for the existing town to benefit from the substantial investment that new development would bring including resolution of existing flooding problems. The site is partially Green Belt and the most recent Green Belt Study concludes the overall harm rating of releasing this land from the Green Belt is high. However, there is scope for compensatory measures such as new hedgerow planting, enhanced pedestrian routes or conversion of fields from arable to grassland. For these reasons, this site was considered to warrant further examination as a reasonable alternative."

3.9. In contrast, the Iden Green site was explained as "the site is wholly very rural and within the AONB and its landscape impacts were considered too severe to warrant further consideration as a reasonable alternative." Whilst the need to protect AONBs is set out under paragraph 11bi) of the NPPF (whereby "strategic policies should, as a minimum, provide for objectively assessed needs for housing, unless [...] the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area"), the protection of the Green Belt is established through Chapter 13 of the NPPF and is afforded the same weight as the protection of AONBs. With that in mind, it is evident that the interpretations made in the SA are entirely subjected and do not align with the higher-level policies of the NPPF. As such, the SA is unsound.

3.10. The above summary is concerning as it highlights TWBC's lack of regard for the Green Belt. It is clear that the proposed loss of Green Belt and AONB conflicts with paragraph 133 and 11bi) of the NPPF and also provides that TWBC have not fully evaluated potential sources of supply. With regard to paragraph 37 of the NPPF (as set out above), it is clear that there has been no thorough review of under-utilised land nor has there been sufficient regard for sites in town centres and near public transport where constraints exist but there is potential for them to be overcome.

3.11. The methodology which underpins Table 29 (SA scores for the four urban extension growth options at Paddock Wood including land in east Capel) is entirely unclear and inconsistent. Under

some SA Objectives, the relative impacts between different 'options' (the scale of development proposed) was considered, whereas the SA Housing Objective reasoning states major positive across all options as "despite offering varying quantities of new dwellings, the 4 options are not differentiated on this objective because, even the option with the lowest numbers would still make a significant difference." This method is unsatisfactory as there is no real quantitative analysis as to what the potential impacts are and what thresholds feed into the scoring matrix. On this basis, the SA is entirely unsound as there is no real evidence to support the SA scoring.

3.12. The justification provided to explain the "?" (mixed) impact on water across all options for the Paddock Wood and East Capel options is inaccurate. The SA states that "mixed water scores is applied equally across the options as all would represent a substantial demand for water and wastewater treatment, and all would provide significant benefits to Paddock Wood and Capel in the form of reductions in existing flood risk. The benefits could be slightly greater in options 2 and 4 where development is directed to the areas of flood zone 2 and 3 west of Paddock Wood (in east Capel). An improvement to flooding issues for existing residents is one of the key justifications for the proposed release of this Green Belt land on the west side of the settlement." It is clear that the development options will not lead to any benefits in water/flood risk. The IDP confirms that flood mitigation measures will be provided as part of these schemes, however, these measures are intended to ensure that flood risk is not heightened across the wider area (i.e. there will be no added benefits). Therefore, the SA's mixed scoring is inaccurate and unsound.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 1 Vision

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you lease include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Vision and Objectives

4.1. The Local Plan Vision and Objectives section of the Local Plan is confusing, lacks local distinctiveness and lacks ambition.

4.2. The opening line of the Vision states that "growth in new homes, jobs and supporting infrastructure will be achieved over plan period in a manner that respects the distinctive qualities of the borough". We question what it means by 'respect' and it is entirely unclear from this statement what the Council considers to be the 'distinctive qualities of the borough' that should be respected.

4.3. Following the first line, the second line states that "*the Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure and cultural opportunities for all the borough's residents*". This is quite a generic statement about how the Council will work with stakeholders which it is obliged to do in any case. There is nothing locally distinctive about this statement and could be about 'anyplace'.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Development Strategy

5.1. Policy STR1 (The Development Strategy) of the Local Plan is not positively prepared, not justified, not effective and inconsistent with national policy.

5.2. The proposed Development Strategy and the distribution of allocations bears no relationship to the Council's Settlement role and Function Study (February 2021). The policy is not justified in relation to the settlement study as evidenced below:

- . **Royal Tunbridge Wells** is the 'main settlement of the borough' with 42% of the borough's population (as of 2011) yet with proposed allocations of 1,536 dwellings this represents just 16% of the growth (9,381 dwellings) proposed in the borough.
- . **Southborough** scored the highest in the Council's settlement study and has the borough's second highest population yet only 42 dwellings are proposed in Southborough in the Local Plan which equates to 0.4% of the growth proposed in the borough.
- . **Cranbrook** scored second in the settlement study due to its excellent services and retail in the town centre and is proposed as Group B settlement yet just over 400 dwellings are proposed here. Very little development has taken place in Cranbrook in previous years, it is not affected by flooding, has capacity within the town boundaries and sites previously approved but have not been built out.
- . **Paddock Wood** was ranked third in the settlement study yet 43% of the borough's housing growth is proposed at Paddock Wood.
- . **Hawkhurst**, despite being ranked just below Paddock Wood in the settlement study only has 170 dwellings proposed representing just 2% of the housing growth planned in the borough.

5.3. The Council's Development Strategy Topic Paper (February 2021) fails to provide a clear and logical explanation as to how the Council decided on its preferred Development Strategy.

1 Settlement Role and Function

6.1. The Council's evidence and approach to determining the role and function of the borough's settlements is not justified, not effective and inconsistent with national policy.

6.2. The Settlement Role and Function Study (February 2021) does not include Royal Tunbridge Wells. It gives the reason for this as "*its status as the main settlement of the borough*". Surely the fact that it is the main settlement of the borough should have led to it being assessed as part of the study. After all the 'Purpose of the Study' in addition to "*providing an updated evidence base to help inform the settlement hierarch of the borough... is to also give an indication of each settlement's level of*

sustainability and potential to accommodate further growth” 21. How can it possibly be that the role of the main settlement of the borough hasn’t been assessed against the other settlements? Is the Council concerned that including such an analysis would clearly demonstrate the mismatch of the settlement hierarchy and its preferred development strategy whereby the main settlement of the borough is earmarked for very considerably less development than less sustainable settlements such as Paddock Wood?

6.3. To further confuse matters, Southborough is “jointly considered as the main urban area” for the borough however unlike Royal Tunbridge Wells was assessed as part of this study. The study concludes that Southborough is in the ‘Grouping B’ along with Cranbrook, Paddock Wood and Hawkhurst whilst Royal Tunbridge Wells is placed in ‘Grouping A’ on its own. This is extremely confusing.

6.4. The study’s method for creating settlement ‘groupings’ is not sufficiently explained and not really explained at all apart from a few lines in the ‘Conclusions’ section of the study. It states the following regarding the groupings:

- . *“rather than simply categorising the settlements in order of size, the settlements are identified by grouping them in terms of their characteristics, focusing on the range of services and facilities they currently provide”.*
- . *“The findings of this updated Study show that larger settlements also tend to score more highly across the range of sustainability indicators identified in terms of the level of provision of services and facilities”*
- . *“Based on the scores and evidence collected in this Study, a revised table of settlement groupings is set out in Table 6 below. These groupings give an indication of the level of sustainability and appropriateness of these settlements to accommodate further growth in terms of access they provide to services and facilities that their support their sustainability”²²*

[TWBC: for table, please see full representation attached as a supporting document]

6.5. This explanation given regarding the method for determining the groupings is wholly inadequate. It explains that it looks beyond just the ‘size of settlements’ however the study does not set out the size of each settlement either in population or in area. In order to understand population figures for the settlements one must refer to the superseded 2017 Settlement Role and Function Study (see below). However, the population assumptions provided are at the parish level and do not reflect the populations of the settlements themselves.

[TWBC: for table, please see full representation attached as a supporting document]

6.6. Referring to the population table, it is difficult to conclude that Southborough should be in the same grouping as Paddock Wood, Cranbrook and Hawkhurst. Southborough has a population of 12,459 whereas Paddock Wood has the next largest population at 8,253 some 4,206 less residents. Southborough is more than 2.5 times the size of Hawkhurst in population.

6.7. Turning to the assessment of the settlements in the 2021 study Southborough scores the highest here as well followed by Cranbrook with Paddock Wood in third and then Hawkhurst:

- . Southborough (presumably behind Royal Tunbridge Wells) received the highest score / ranking in the study at 100 using the ‘new weighted method’ and using all previous scoring systems as well.
- . Cranbrook trails Southborough in scoring coming in second place with 90 points.
- . Paddock Wood scores 82 points coming third.
- . Hawkhurst scores 71 points coming in fourth.
- . Rusthall scores 59 points coming in fifth.
- . Pembury scores 55 points coming in sixth.

[TWBC: for table, please see full representation attached as a supporting document]

6.8. We make a number of additional critical observations and shortcomings about this important piece of work which claimed to inform the Local Plan’s development strategy:

- . Royal Tunbridge Wells is not included in the Study despite it being the ‘Main Urban Settlement of the borough’ (see above).
- . The methodology is unclear as to how it has arrived at a number of the scores for the ‘new weighted method’ for the 2021 study including but not limited to the scores for bus services.
- . The study does not include population figures for the settlements and relate this back to the level of services and facilities that are present in each settlement. In other words, particular services could be more or less adequate dependent on the population they are serving however the study

provides no indication as to what services and facilities (and investment) are required to make them more sustainable.

- . There is no analysis of the level of public transportation serving the settlements. The study simply says whether there is a bus service at least once an hour Monday – Saturday and whether there is a train station.
- . The study is not locationally specific about any of the infrastructure or services and includes no mapping making it impossible to understand in spatial terms which areas of the borough are and are not well served by services and facilities.
- . The study does not consider cycling and walking which should be seen as the focal point of considering sustainability and planning for healthy places.

6.9. It is extremely difficult to follow the logic of how the Settlement Role and Function and Study has informed the Development Strategy and proposed Local Plan allocations. Our analysis of this is set out in the 'Development Strategy' section of our representations.

[TWBC: for table, please see full representation attached as a supporting document]

1 Housing Need

7.1. TWBC considers that the Housing Need assumptions will need to be carefully examined at the Local Plan Examination in Public and we wish to take part in those hearings, particularly given that the Council's evidence on housing used to support the Local Plan dates back to 2015 (SHMA) with a 2017 update to the SHMA and then a separate 2018 Housing Needs Study and then finally a 2020 Review of Local Housing Needs. These studies were undertaken by multiple consultants, so it is unclear whether the methodologies align and what informed the Council's housing needs assessment at each stage of preparing the Local Plan.

7.2. We note there could be several factors that could require TWBC to update its evidence and reconsider its housing needs assessment such as the impact of Brexit, the impact of the Covid pandemic and potential changes to MHCLG's method for determining housing needs which has changed a number of times in recent years. We also wanted to make TWBC and the Inspector(s) aware of the Office for Statistics Regulation (OSR) report²³ on the robustness of ONS' population projections which was initiated in response to concerns raised by campaigners regarding the accuracy of population projections and mid-year population estimates. It found that the sub-national accuracy of estimates is 'variable' depending on the size and mobility of the population in a given area. It will be important to closely monitor whether the findings of this report result in changes to the assumptions for TWBC and the wider housing market area.

7.3. Policy STR1 (The Development Strategy) sets its housing target at 12,204 dwellings yet the Housing Supply and Trajectory Topic Paper for the Pre-Submission Local Plan shows a delivery of 13,257. Whilst we do not consider this housing delivery figure to be credible as we set out elsewhere in these representations, the Council is effectively planning for an additional 8.6% dwellings more than is required. The only explanation provided is in the topic paper which states that *"this 8.6% buffer is considered helpful to allow for the potential delay/non-delivery of sites and, potentially for otherwise contributing further to meeting housing needs"* (paragraph 7.1). Presumably the reference to 'contributing further to meeting housing needs' is in reference to Sevenoaks however the Sevenoaks Local Plan has been found unsound so any assumptions about their potential housing shortfall cannot be relied upon for the Tunbridge Wells Local Plan.

1 Housing Trajectory and Housing Delivery Assumptions

8.1. The Council's evidence and approach to determining the housing trajectory and housing delivery assumptions is not justified and not effective and inconsistent with national policy.

8.2. Paragraph 73 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites"*.

8.3. Paragraph 75 of the Framework states: *"To maintain the supply of housing, local planning authorities should monitor progress in building out sites which have permission. Where the Housing Delivery Test indicates that delivery has fallen below 95% of the local planning authority's housing requirement over the previous three years, the authority should prepare an action plan in line with national planning guidance, to assess the causes of underdelivery and identify actions to increase delivery in future years"*.

8.4. TWBC has prepared a Housing Supply and Trajectory Topic Paper for Pre-submission Local Plan (February 2021) which informs the Council's spatial strategy. In 2018, TWBC had met 88% of its

housing need (monitored between 2015 and 2018), including the 5% buffer on its housing land supply position as required by the NPPF and the standard method.

8.5. According to the Lichfields Review of the new Standard Method (2020)²⁴, in Tunbridge Wells there has been no deviation from the delivery rates set out under the Standard Method in 2017, which remains at 678 dwellings per annum (an increase of 278 dwellings per annum from the adopted Local Plan requirement).

8.6. TWBC is seeking to deliver most of its housing need for the Plan period through a smaller selection of larger sites, focused primarily on Paddock Wood (and Capel) and a new garden settlement at Tudeley. The Council is particularly reliant on the cooperation of developers and landowners around Paddock Wood to meet its annual housing targets and therefore, the timeframe for the implementation of this development strategy must be supported by clear and convincing evidence.

[TWBC: for table, please see full representation attached as a supporting document]

8.7. Figure 7.1 above outlines the proposed delivery rate. For Tudeley STR/SS 3, TWBC sets a delivery rate of 150 units for the first 10 years of delivery from 2025/26, then rising to 200 per annum from 2035/36 (total of 2100 dwellings in 13 years). For Paddock Wood STR/SS 1, TWBC outlines a proposed delivery rate of 300 units per annum, reducing to 240 dwellings in 2036 (total of 3540 dwellings in 12 years). This phasing methodology is set at 299 dwellings per annum. Land at Mascalls Farm is projected to deliver 103 dwellings distributed between 2024 and 2027.

8.8. Within the Reg 19 Local Plan, TWBC recognises the higher degree of complexity associated with the delivery of larger sites, advising that *“Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites.”*

8.9. TWBC does not already have any sites that are allocated or have extant planning permission for more than 2000 dwellings, and therefore, relies on national and other local evidence to inform its phasing assumptions. The Council has based its buildout rates on an analysis of the gap between historic permissions granted and historic site buildout rates across the borough, and on discussions with developers, and evidence gathering as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA).

Nationally recognised evidence and studies on lead times in construction include:

- . the Letwin Report and Independent Review of Buildout Rates (Letwin, 2018)
- . Start to Finish: How Quickly do Large-Scale Housing Sites Deliver? (Lichfields, 2016)
- . Housing Supply Research (CPRE, 2014)
- . Permissions to Land: Busting the myths about house builders and land banking (HBF, 2014)
- . Urban Extensions Assessment of Delivery Rates (Savills, 2014)
- . MHCLG Independent Review of Build Out Rates (2018)

[TWBC: for table, please see full representation attached as a supporting document]

8.10. PWTC considers that TWBC has failed to appropriately outline how a housing figure of 3,540 (average) homes is deliverable within the Plan period and is concerned that there has been insufficient regard to the time taken for new developments to pass through both the planning and construction phases. Figure 2 demonstrates that, prior to the substantive construction phase, there is already a significant delay with the grant of permission for larger sites of between 3 and 7 years.

8.11. The Lichfields ‘From Start to Finish’ Review Second Edition (2020) and the Letwin Review (2018) also highlight the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of housing trajectory that are beyond the immediate control of a local planning authority.

8.12. For larger sites (2000+ homes), the Lichfields Review (2020) outlines an average lead time of 8.4 years for the average time from validation of the first planning application to the first dwelling being completed²⁵. This is based on an average build-out rate of 160 dwellings per annum. In the case of Paddock Wood, it would take 22.5 years to deliver the upper figure of 3590 dwellings. This corroborates the Town Council's position that the Plan period is short-sighted, and not supported by appropriate evidence to justify this rate of delivery within such a constrained timeframe.

[TWBC: for figure, please see full representation attached as a supporting document]

8.13. The Letwin Review (2018) is also helpful in outlining a median build-out rate for large sites at 15.5 years, which is 3.5 years longer than TWBC's proposed build-out rate for Paddock Wood sites.

8.14. TWBC makes the case that the delivery of the Paddock Wood urban expansion is set purposefully higher than identified in the Letwin Review, given the extent of masterplanning work carried out by David Lock Associates involving input from the four main housebuilders (Crest Nicholson, Dandara, Redrow and Persimmon).

8.15. However, there is a total of 8 developers with control of the land around Paddock Wood, and whilst 4 of these developers are working with the Council, the masterplan is still lacking on any prescriptive detail on how each site would be released with cooperation from each developer and landowner. A lack of transparency in this regard casts further doubt on TWBC's ability to monitor both the quality and deliverability of larger sites. If development phasing remains poorly structured at the Regulation 19 stage, this risks setting unrealistic expectations of developers and stakeholders for the rest of the Plan period.

8.16. PWTC also considers that it is impossible to enforce such an even distribution of housing each year (300 dwellings per annum for 11 years). TWBC's housing supply and trajectory figures fail to reflect the lead times associated with various stages of the planning process, including:

- . The preparation of relevant Supplementary Planning Documents which aid the delivery of larger sites;
- . The Pre-application process, including consultation and engagement with relevant consultees and stakeholders;
- . Potential delays in determining Outline planning permissions;
- . Approval of Reserved Matters and agreement of relevant phasing;
- . The discharge of conditions;
- . The preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement;
- . Securing of relevant funding (including S106 and CIL); and
- . Delivery of on-site and off-site infrastructure, (associated with larger sites and the creation of a new Garden Settlement).

8.17. TWBC has also failed to have sufficient regard to Green Belt and Flood risk constraints affecting land surrounding Paddock Wood to the north and the west. It is still not clear how the masterplan will tackle such an important issue of flood risk and the triggers for necessary flood engineering and SuDS, which do not appear to have been incorporated into the housing trajectory.

8.18. The Regulation 19 Local Plan highlights that the Green Belt surrounding the key settlement, including the western edge of Paddock Wood "*contributes significantly to the discrete identity of and setting of settlements*" (page 26), and yet, there is still very limited justification for the development of this scale. The TWBC Development Strategy Topic Paper (2021) highlights that STR/SS 1 Land at Capel and Paddock Wood and STR/SS 3 Tudeley Village are both classed as having an overall harm rating of 'High'.

8.19. Delivery will also rely on cooperation with adjoining authorities and liaison and negotiation with statutory consultees. Even the slightest delay in the start date will result in a slower performance, which is then likely to render the assumed delivery rates of a wider allocation unachievable.

8.20. Overall, the Town Council believes that a further review of housing trajectory is urgently needed, considering a more realistic and steadier rate of delivery. Given the broader concerns relating to the appropriate length of the Plan period - where there is a reliance on large-scale development and new settlements - the TWBC's housing trajectory must be reconsidered. Further evidence gathering should also assess whether TWBC should be considering a larger number of smaller sites to meet housing delivery across the Local Plan period.

8.21. Notwithstanding the technical evidence undertaken by TWBC, it remains the case that the Council is seeking to deliver a significant proportion of its overall housing need within a wholly unrealistic timeframe, against Green Belt and Flood Risk constraints.

8.22. The proposed delivery of up to 3,590 homes in one location will inevitably flood the housing market within one location, resulting in a negative impact on sustainable growth across the borough as a whole.

8.23. The Council's poorly thought-out assumptions regarding housing delivery and trajectory render the Local Plan unsound, as it fails the tests of being justified, effective and consistent with national

policy, contrary to the requirements of paragraph 35 of the NPPF. Further evidence gathering and analysis is required to determine the most appropriate spatial strategy for the delivery of housing across the borough.

1 Employment

9.1. PWTC considers the Local Plan's policies in relation to proposed employment need and allocation to be unsound.

9.2. The Local Plan (Policy STR1 – The Development Strategy) proposes 14 hectares of employment land (Use Classes B and E). This employment land figure is taken directly from the 2016 Sevenoaks and Tunbridge Wells Economic Needs Study²⁶ as confirmed in the Local Plan (see paragraphs 4.20-4.21). Not only is this study out of date prepared nearly five years ago, and obviously before the Covid pandemic, it also does not align with the plan period.

9.3. This point regarding the plan period is confirmed in the Local Plan (see paragraph 4.22) which states *"While the study considered needs up to 2035, rather than 2038, this is regarded as being an appropriate minimum target for the Local Plan period, as both the base date and the end of the plan period have been rolled forward"*. This is reason enough to bring into serious question the employment land figure proposed in the Local Plan. The 2016 study states (see paragraph 20) that *"it is imperative for the Council to monitor its employment land position to ensure the borough remains responsive to changes in the pattern of supply and demand..." and that the assessment of sites should be kept up-to-date as part of the Council's monitoring and updated annually..."*. It also states that *"a comprehensive assessment of economic needs is undertaken at least every five years. An early review to take account of changes in economic circumstances and forecasts arising from Britain's decision to leave the European Union may be appropriate"*. We have not been able to locate employment floorspace monitoring data on the Council's website that should be published at least annually. There was no 'comprehensive assessment of economic needs' undertaken within five years of the 2016 despite the clear recommendation that this would be even more important due to Brexit notwithstanding the Covid pandemic, the radical changes to the Use Class Order and the Sevenoaks Local Plan being found unsound.

9.4. There are many other additional fundamental issues to point out without even needing to delve further into the technical evidence which we set below:

- . The end date of the 2016 study is 2033/2035 which is different to that of the Local Plan which is 2038 (also see our points regarding the need for a longer plan-period of at least 30 years).
- . The start date of the 2016 study is 2013 opposed to the 2020 start date of the Local Plan so the baseline is some seven years different between the key evidence used for employment needs and the start of the plan period.
- . The 2016 study uses the 2015 SHMA to help determine and balance housing and employment needs – the SHMA is now clearly out of date.
- . The Local Plan proposes employment land as Use Classes B and E whilst these uses were not in existence in 2016 so cannot be assumed to be directly comparable.
- . The 2016 study was a joint study with Sevenoaks DC and its evidence base however the Sevenoaks Local Plan was found unsound at examination.

9.5. The Local Plan states (see paragraph 4.24) that *"converting a land target into a floorspace target is difficult...however based on the study's assessment of the mix of business uses, an approximate estimate of the floorspace associated with 14 hectares of land would be of the order of 80,000-120,000sqm. As the recommendation is a minimum, the higher level is preferred"*. It is unclear where this estimate even comes from and how TWBC arrived at this floorspace calculation let alone attempting to understand why the upper end of the range of floorspace is justified. Given that there is a difference of 40,000sqm between the upper and lower estimates this a critical assumption that has no explanation behind it apart from that creating a floorspace target "is difficult".

9.6. At paragraph 4.25 of the Local Plan attempts to explain what type of employment land will be delivered and it explains that *"a range of supply is envisaged: for offices, light manufacturing, general industry, and warehousing, as well as related use not in a specific use class"*. This is an insight into the lack of understanding and strategy TWBC has regarding economic and employment land.

9.7. Paragraph 4.26 of the Local Plan points out that *"It is notable that the recommendations assume that existing well-located employment land and premises be retained in that use"* which suggests that it is not RWBC's intention to take a serious up-to-date look at its employment land (as recommended

by the 2016 study) to positively assess its potential for release to alternative uses such as housing before it looked to meet its housing needs in Paddock Wood and Tudeley.

9.8. Policy STR1 itself is vague about employment land and simply says that 14 hectares of employment (Use Classes B and E) land are developed. It doesn't say where or what the breakdown of the uses. Table 5 of the Local Plan then shows 26.5 hectares of employment land being allocated including 11.2 hectares on two sites in Paddock Wood. This clearly doesn't tally with the 14 hectares across the borough stated in Policy SRT1 and does not explain why the Local Plan is allocating more than double what its stated need is and what the policy says. It then states at paragraph 4.57 that there will be additional floorspace at Tudeley Village and the sites will be proposed in the SPD. Surely any additional land / floorspace would be included in the assumptions.

9.9. Policy STR/SS1 (Paddock Wood), is unjustified as it states that 2,000sqm of commercial floorspace will be provided in three neighbourhood centres and that significant new land for a mix of employment uses on sites to the north and south of Lucks Lane, and to the east of Transfesa Road. The policy does not state the amount of land required for the commercial centres and the employment allocations do not state what type of employment or floorspace. It is impossible to determine how these figures tally against the Development Strategy policy and the 2016 study.

1 Key Diagram

10.1. The proposed Key Diagram in the Local Plan is difficult to read and interpret. The resolution of the proposals makes the accessibility of the Key Diagram very poor and the 'Map Legend' is difficult to interpret on the Key Diagram itself. The Diagram is missing important designations such as Flood Zone 2.

[TWBC: for diagram, please see full representation attached as a supporting document]

10.2. For instance, we make the following critical observations about the Key Diagram and how it is ineffective and is not positively planned:

- . The Map Legend shows three circles for 'existing settlement' and 'scale of growth' which appear to range from 100, 5,000 to 10,000 however it is not possible to understand how this correlates to the settlements on the diagram. Does this refer to the population or existing number of dwellings for instance?
- . The Map Legend includes asterisks next to the 'existing settlement' and 'scale of growth' with fine print below however it is not possible to read the fine print.
- . The Key Diagram only shows Flood Zone 3 whereas it should also show areas covered by Flood Zone 2 as a constraint. Given that Flood Zones do not stop at the administrative boundary the Key Diagram should also show Flood Zones 2 and 3 in neighbouring authorities to give a more realistic and strategic view of the extent of the flood risk facing the north of the borough and the locations where TWBC is proposing the majority of its strategic growth (see Environment Agency Flood Risk Map below showing Flood zones 2 and 3).

[TWBC: for map, please see full representation attached as a supporting document]

- . The Key Diagram should include the existing settlements and proposed growth for the areas in the neighbouring authorities given the extent of cross boundary strategic matters that TWBC has with its neighbours.
- . The Key Diagram includes a number of 'on-line' and 'off-line' road improvements. These are not terms used in the NPPF and are not included in the Local Plan's Glossary. The terms 'on-line' and 'off-line' should be explained in the Local Plan.
- . There are no railway stations shown on the Key Diagram.
- . There is no indication of the proposals for the regeneration of Paddock Wood Town Centre.
- . It does not identify Tudeley as a New Village, it simply shows growth and where the Green Belt is proposed for removal.

1 Policies Map

11.1. TWBC has failed to comply with its own Statement of Community Involvement (SCI) and the Local Plan Regulations in relation to its proposed Policies Map. The Policies Map consists of a series of 'inset' maps for a number of settlements and there is one 'Borough Overview' map provided. However the 'Overview Map' is not a 'Policies Map' as set out in the Local Plan Regulations²⁷ which requires the authority to set out what changes to the Policies Map would result from adoption of the Local Plan. There are entire sections of the borough missing and they have no designations whatsoever shown in the 'Borough Overview' map.

[TWBC: for map, please see full representation attached as a supporting document]

11.2. Even by the Council's own proposed definition the Local Plan maps fail to meet the Council's definition: "Shows on a map all the site-specific policies and proposals set out in Development Plan Documents"²⁸.

11.3. From what the Council has provided it is not possible to ascertain what changes are being proposed to the existing adopted Policies Map.

11.4. Given the points we have raised regarding the 'Policies Map' published for Regulation 19 consultation, we submit that TWBC has failed to clarify what changes are being proposed to the existing Policies Map and has failed to show what the resulting Policies Map and designations are for most of the borough.

11.5. This contravenes TWBC's own Statement of Community Involvement (October 2020) which states that at the Publication State of the Local Plan (Regulation 19) that the Policies Map will be published "showing any changes that would result from the adoption of the plan, are also published"²⁹

11.6. The SCI states that following the Regulation 19 stage that "The Council will consider any points raised during the publicity period and will make minor changes where required. If there are significant issues the Council may withdraw the plan and return to stage 3"³⁰. Unless TWBC can demonstrate that it has shown all the changes to the Policies that would result from the adoption of the plan, it has failed to comply with its SCI and it should run its Regulation 19 stage again to enable all residents and interested parties to respond to its proposed designations throughout the borough.

[TWBC: for table, please see full representation attached as a supporting document]

11.7. We also note that the Local Plan does not identify which current development policies will be replaced by new policies so it has not been possible to comment on the suitability of proposed 'replacement policies' in our representations.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Infrastructure

General

13.1. TWBC has failed to comply with paragraph 20b) of the NPPF, as the Local Plan's Development Strategy (Policy STR1) fails to set out the key infrastructure projects to be delivered over the Plan period. This is a fundamental oversight, which, contrary to paragraph 20 of the NPPF, fails to provide details on how *"strategic policies [...] make sufficient provision for [...] infrastructure"*. It is therefore evident that the Development Strategy is underpinned on an unsustainable development pattern as it solely focuses on the delivery of homes.

13.2. In the absence of details regarding infrastructure needs and delivery in Policy STR1, it is expected that Policy STR5 (Infrastructure and Connectivity) of the Local Plan sets out the strategy for development, including how the Plan makes *"sufficient provision"* for infrastructure, as per paragraph 20 of the NPPF. However, this is not the case. Policy STR5 merely confirms that infrastructure will be delivered during the Plan period yet fails to address what the specific needs are and how they will be met. For example, in terms of healthcare, Policy STR5 states that *"ensure that essential healthcare infrastructure is provided as part of new development in the form of new or expanded healthcare facilities"*. The above statement is grossly inadequate as it indicates a clear level of ambiguity from TWBC which could result in an undersupply of healthcare facilities. As such, this is a clear dereliction of duty from TWBC whereby the Local Plan strategic policies fail to comply with paragraph 22 of the NPPF, which stipulates that *"strategic policies should look ahead over a minimum 15-year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure"*.

INFRASTRUCTURE REQUIREMENTS

Education

13.3. PWTC is concerned that the IDP and Local Plan's strategy for Tudeley Village will result in an unsustainable pattern of development, where infrastructure projects deemed 'essential priority' in the IDP will not be phased in alignment with the timeframes set out in the IDP.

13.4. Within Kent County Council's Regulation 18 representation, they stated that *"the policy referring to Land to east of Tonbridge/west of site for Tudeley Village (Policy AL/CA 2) relates to land proposed for the establishment of a new six form entry secondary school. The establishment of a new school is wholly required to support the proposed level of growth."* The IDP infrastructure schedule includes an

entry for the aforementioned 6 form-entry as “essential priority, timing dependent on a number of factors (2024-2028), indicative cost £31,931,850, funding position KCC/developer funding”. Local Plan Policy STR/SS3 (The Strategy for Tudeley Village, 2a) states that “approximately 2,800 dwellings (2,100 by 2038)” will be delivered. As part of the proposal for this site, the developer has produced a Delivery Strategy⁴⁴ which states that the six form-entry secondary school will be delivered in the fourth phase (of six) of the scheme. Whilst no indicative dates are provided within this document, it does state that “580 new homes will be delivered during this phase, increasing the total number of dwellings at Tudeley to 1900”. Based on the wording of Policy STR/SS3, it is therefore reasonable that Phase 4 of Tudeley Village will be delivered in the latter years of the Local Plan period, as Phase 4 housing delivery falls just 200 homes short of the 2100 home Local Plan target delivery by 2038. This is extremely concerning as, based on the developer’s own delivery strategy, the secondary school will likely not be delivered until the mid-2030s. This is an approximate 7-year delay based on the timeframes set out in the IDP. This oversight illustrates TWBC’s haphazard approach to infrastructure delivery, which, if delivered upon, would result in a considerable borough-wide undersupply in secondary school places. As such, this example demonstrates TWBC’s non-compliance with paragraph 22 of the NPPF, as the longterm education requirements for the borough (based on the level of growth proposed at Paddock Wood, East Capel and Tudeley Village) will not be sufficiently met.

13.5. Further to the above, the funding position of the new Tudeley Village secondary school (six form-entry) is uncertain, as Kent County Council’s earlier Regulation 18 representation stated that “the school will need to be wholly funded by development and therefore the financial contributions from contributing developments would need to be increased to cover the additional costs derived from both the site’s abnormalities and the likely need to deviate from the Department of Education’s baseline design.” Despite this, the IDP stipulates that the project will be funded by “KCC/developer contributions”. Therefore, it is unclear as to whether the abnormal site constraints have been overcome and whether Kent County Council has since agreed to part-fund the site. If this is not the case, the proposal is unviable as there is no clarity as to whether the site will be wholly funded by the developer.

13.6. The current round of development at Paddock Wood planned to pay for a primary school (2 Form entry) on the Persimmon site. This was supposed to open this year. KCC is yet to take ownership of the land to enable the Tenax Academy Trust to begin and have not submitted a planning application yet.

Wastewater

13.7. Wastewater requirements have not been adequately detailed within the TWBC Local Plan. It is acknowledged that issues relating to wastewater infrastructure requirements were raised by Greg Clarke MP in a House of Commons debate in October 2019. Greg Clarke MP⁴⁵ stated that “Plans to upgrade the sewerage network in Paddock Wood, despite repeated discussions with Paddock Wood Town Council, have come to nothing. Residents of Paddock Wood now see development happening that they were assured would take place only when the sewerage system had been upgraded to deal with the current overuse and problems and to remove the worsening of that situation, let alone cope with the planned development”. Furthermore, the SFRA (Levels 1 and 2 combined, July 2019)⁴⁶ also states that “Paddock Wood has been identified as an area which has experienced a number of surface water flood events associated with small watercourses, sewerage and private drainage systems. The Paddock Wood Stage 1 Surface Water Management Plan (SWMP), undertaken in 2011 identified that reported instances of flooding have occurred due to surface water and minor watercourses, often occurring relatively rapidly from the onset of heavy rainfall.”

13.8. With the above in mind, it is entirely inappropriate for the IDP infrastructure schedule to state that in Paddock Wood “additional wastewater treatment capacity required over the Plan Period [is] to be determined” and “safeguarding of land around the existing wastewater treatment works at Paddock Wood for future expansion works” are both to be delivered over a “short, medium and long” timeframe. No details on wastewater infrastructure are provided in Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel). Given the above, it is evident that TWBC have failed to address concerns relating to previous deficits and issues with the existing sewerage system, and this is likely to accentuate the potential flood risk within Paddock Wood. As such, it is clear that the growth proposed in Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel) is entirely unsustainable, as supporting infrastructure is unable to meet the needs of the present and future local community. Therefore, Policy STR/SS1 (the Strategy for Paddock Wood, including land at east Capel) does not comply with paragraph 22 of the NPPF, which clarifies that infrastructure requirements and opportunities over a minimum 15-year period should be addressed in strategic policies.

13.9. Given that the IDP states that “*additional wastewater treatment capacity required over the Plan Period [is] to be determined*” it also unclear as to how the Local Plan’s Viability Study (Stage 2, Appendix 2a47) has established an approximate construction cost of £450,000 (Paddock Wood Shared Costs, Appraisal 1) for sewerage work upgrades and foul water new connections and diversions. Due to the omission of specific wastewater infrastructure requirements within the IDP, it is not possible to cross-reference the viability testing outputs with infrastructure that is proposed within either the Local Plan or IDP. This could therefore result in several inaccuracies, which, in turn, could have implications for the overall viability of the scheme.

13.10. There is no land available for expanding the existing wastewater treatment works and PWTC has confirmation from Southern Water even before the current proposals that that treatment works were already at capacity.

13.11. PWTC has, for at least six years, been requesting that Southern Water deal with surcharged sewer network in town based on the current growth. PWTC has argued that their proposals for dealing with additional waste from the three current developments are not adequate and will result in even more sewer flooding. There has been no engagement by Southern Water to assess infrastructure needs for the development proposed in this Local Plan. Southern Water refuse to work up plans unless there is ‘planning certainty’ – and it has turned out that even then they do not plan anything under the site are under construction and do not enable the developers to design in areas needed for pipework and kit such as pumping stations.

Health

13.12. The IDP states that one new GP practice will be required to support the level of growth proposed in Paddock Wood and East Capel. The Strategic Sites Masterplanning and Infrastructure Study highlights that, under scenario 1 (both sites come forward), there are three potential sites for the new GP practice, as shown below (potential GP sites circled in orange). It is noted that all potential site options lie in the western area of Paddock Wood and two of three site options are situated within the East Capel Site Allocation. This does not constitute sustainable development, as, if developed, those residing in the Paddock Wood Eastern Extension would have inadequate access to healthcare, as they would have to travel approximately over 1km with no direct active travel means such as walking and cycling infrastructure. As such, TWBC have failed to comply with paragraph 8b) of the NPPF as “*communities’ health, social and cultural well-being*” would not be supported (our emphasis added).

13.13. It is important to note that with the current three developments in Paddock Wood, they relied on the Howell Surgery In Brenchley (four miles away) taking the excess demand. Howell Surgery is now closed to new patients from Paddock Wood as rolls are full. Woodlands Surgery in Paddock Wood does not have capacity either. East Peckham Surgery located nearby in Maidstone Borough lost its surgery last year.

[TWBC: for map, please see full representation attached as a supporting document]

Cemeteries

13.14. PWTC has calculated a potential requirement for an additional 3 acres of land suitable for cemetery space to provide for the additional population in Paddock Wood and has sought a discussion and confirmation of this with TWBC but has never had a reply. This is a particularly important issue given that cemeteries cannot be located on land susceptible flooding. The Local Plan does not address this issue.

Transport – A228/Colts Hill bypass

13.15. The Colts Hill/A228 bypass is classified as ‘*critical priority, medium timing, £30 million scheme funded solely by developer funding*’ in the IDP. The costs of this scheme align with the Stage 2 Local Plan Viability Study (Appendix 11a)48, as appraisal one for Paddock Wood (with shared costs) and Tudeley (with shared costs) amount to £20 million (£11,040,000 and £8,960,000 respectively). It is worth noting that the Paddock Wood assumptions are based on all strategic allocations coming forward within Paddock Wood. This in itself presents a significant level of risk, as if one development proposal was to be refused planning permission, funding for the A228 Colts Hill bypass would not be secured. This concern is also reflected in the Stage 2 Viability Study, which states that “*the results of any viability process at this stage can only indicate a likelihood of delivery rather than anything more specific. As discussed above, a small change in one assumption can have a relatively large impact on the outcome / result*”. Given that both policies (and allocations) STR/SS1 (The Strategy for Paddock Wood and East Capel) and STR/SS3 (The Strategy for Tudeley Village) are due to be built-out from 2025/2026

onwards (as based on evidence within the Housing Supply and Topic Paper for Pre-Submission Local Plan)⁴⁹ and the Tudeley Village site has an expected completion date after the Plan period (i.e., post-2038), it is unclear as to how funding for the A228 bypass will be fully secured by the 'medium' project timeframe set out in the IDP. The IDP provides no definition for a 'medium' timeframe, however, it is assumed that 'medium' would be within the middle years of the Local Plan period i.e., from 2026-2032. PWTC therefore question the assumptions stated within the IDP, as the proposed phasing/timeframe is unrealistic as developer contributions are likely to be staggered at certain trigger points throughout the development timeline and will therefore not all be available throughout the 'medium' timeframe stated.

13.16. The above issue is exceptionally concerning, as evidence provided the Local Plan's supporting Transport Assessment confirms that baseline and 2038 scenario testing found that the A228 Maidstone Road/B2017 Badsell Road Paddock Wood roundabout would remain at >95% capacity. This assessment also found that, despite the provision of the new Colts Hill/A228 bypass, further mitigation will be required to reduce congestion on the proposed bypass. With this in mind, the Local Plan has adopted an unsatisfactory approach to highway infrastructure planning, as delivery timescales (as stipulated in the IDP) are unrealistic and unlikely to be met. This would result in unsustainable travel routes and non-compliance with paragraph 102a) of the NPPF on the grounds that the potential impacts of development on the transport network have not been addressed (our emphasis added).

13.17. The signalised junction at Badsell /Maidstone Rd was to be funded by the current three developments in Paddock Wood. This is not on the KCC list of works for this financial/council year and Berkley Homes (a corner of whose site was required for the works) are at odds with KCC whose inaction is delaying the finalisation of design and construction of that section of their site.

Transport –congestion in Paddock Wood

13.18. Concerns regarding congestion within Paddock Town Centre have not be adequately addressed within the Local Plan. It is acknowledged that the IDP details three improvements to the B2160 (Maidstone Road). These include:

- . *Improved B2017 Badsell Road/B2160 Maidstone Road signalised junction*
- . *Improved A228 Maidstone Road/Whetsted Road priority junction*
- . *Improved A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road roundabout*
- . *Improved B2160 Maidstone Road/Commercial Road priority junction*
- . *Widening at junction of B2160 and Lucks Lane*

13.19. It is clear that the above infrastructure projects will not alleviate congestion on the B2160, as the above measures focus on allowing those using private vehicles residing in the proposed urban extensions to access the centre of Paddock Wood. Maidstone Road is a narrow B-road which narrows into a single carriageway in places. Access in and out of the town centre to the north at the A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road junction is particularly concerning, as the Local Plan's Transport Assessment indicates that this junction will be overcapacity at 104% (volume over capacity) under the Local Plan scenario, equating to an increase of 12% volume compared to the 2018 baseline. It should also be noted that both the 'highways mitigation' and 'sustainable mitigation' scenarios (whereby additional transport improvements are modelled) also lead to congested roads, equating to 102% and 101% volume over capacity figures respectively. This confirms that planned highways infrastructure is not capable of supporting the level of growth earmarked for the proposed strategic allocations within Paddock Wood and Capel Parish. This oversight does not accord with paragraph 108c) of the NPPF, as significant impacts from the development on the transport network (in terms of capacity and congestion) cannot be cost effectively mitigated to an acceptable degree (our emphasis added).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 7 Climate Change

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Flood Risk

12.1. We consider that the Local Plan, its overall development strategy, evidence and policies in relation to Flood Risk to fail the NPPF tests of soundness as it has not been positively prepared, is not justified, not effective and not consistent with national policy. These Local Plan policies include STR1, SRT7, STR5, STR/SS1, EN25, EN26

12.2. PWTC raised its strong concerns and objections with TWBC at the Regulation 18 Local Plan stage (Draft Local Plan) regarding the inadequate evidence and assessment of flood risk matters due to the extensive flood risk existing at Paddock Wood. However, these concerns were never addressed despite the SFRA prepared for the Draft Local Plan being entirely inadequate. We attach PWTC's representations to the Regulation 18 Local Plan consultation which should be included as part of our submission to the Secretary of State.

12.3. Apart from the factual errors and therefore doubt of accuracy of the SFRA's modelling (which is covered in PWTC's Regulation 18 representations), the flooding at Paddock Wood is from surface water and not fluvial, primarily from down hill flows from High Weald farmland to the South of Town adding to nitrate pollution entering the common water courses that flow into the Medway. High flood levels in Paddock Wood are usually several hours after rainfall for this reason. The only fluvial contribution is when the Medway is in surge and all the common watercourses that drain north into it from the area back up and spread out sideways over their banks adding to the surface water. No detail is provided of specific build flood mitigation measures that might be employed, other than standard local level SUDs, so it is entirely unclear how mitigation costs have been calculated or factored.

12.4. The NPPF³¹ is very clear about the approach that local planning authorities must take regarding climate change and flood risk when preparing local plans and strategic policies. However, TWBC has unfortunately failed to comply with the NPPF in respect of its approach to preparing its development strategy. The Council's approach to its Local Plan is particularly incongruous given that TWBC declared Climate Emergency³² so one would expect or at least hope the Council would have paid particular attention to the NPPF in relation to Climate Change and Flood Risk given it's declared 'emergency' however this has not been the case as we explain below.

[TWBC: for figure, please see full representation attached as a supporting document]

12.5. The current NPPF has a great deal to say about climate change and flood risk and the role of planning / plan-making to support the transition to a low carbon future in a changing climate and the

need to take full account of flood risk and coastal change including minimising vulnerability and improving resilience of places, converting existing buildings and supporting renewable and low carbon energy and associated infrastructure³³. Instead of following the NPPF's policy on climate change the Local Plan instead 1) fails to take into the full account of flood risk in the borough by not preparing suitable evidence base and ignoring its evidence base regarding flood risk in Paddock Wood and the north of the borough; 2) seeks to maximise the vulnerability of the areas of the borough already vulnerable to flood risk and future climate change such as Paddock Wood; 3) making the borough less resilient to climate change and flooding and more prone to the risks of climate change by proposing to put development in the highest risk area of the borough in terms of climate change.

12.6. In terms of planning for climate change the NPPF states³⁴ the following, however the Local Plan and its evidence fail to take into account the long-term implications of flood risk and instead of relocating vulnerable development and infrastructure the Local Plan proposes to deliver new development in the most vulnerable locations:

- . *"Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk";*
- . *"Policies should support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts, such as providing space for physical protection measures, or making provision for the possible future relocation of vulnerable development and infrastructure"*

12.7. The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*³⁵. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk. Simply put, why did TWBC select a development strategy that clearly contravenes the fundamentals of national policy? The Council was clearly aware of the significance of the high risk of flooding at Paddock Wood as it states this as one of the Local Plan's key Issues or Challenges, where it states that *"the areas to the north and west of Paddock Wood are particularly prone to flooding"* and that a key issue is *"therefore ensuring that the proposed growth strategy can be accommodated without further harm and risk to areas that are vulnerable to flooding, provide betterment"*. This statement misunderstands national policy which is to avoid directing development to areas at highest risk (whether existing or future) in the first place.

[TWBC: for figure, please see full representation attached as a supporting document]

12.8. The NPPF explains³⁶ that *"all plans should apply a sequential, risk-based approach to the location of development – taking into account the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

- 1 *a) applying the sequential test and then, if necessary, the exception test as set out below;*
- 2 *b) safeguarding land from development that is required, or likely to be required, for current or future flood management;*
- 3 *c) using opportunities provided by new development to reduce the causes and impacts of flooding (where appropriate through the use of natural flood management techniques); and*
- 4 *d) where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

12.9. However, TWBC and its consultants appear to have avoided applying a 'sequential test' in respect of the whole borough. This is despite the Strategic Flood Risk Assessment (SFRA – Level 1 & Level 2 combined) (Juley 2019) stating as its first recommendation: *"The NPPF supports a risk-based and sequential approach to development and flood risk in England, so that development is located in the lowest flood risk areas where possible; it is recommended that this approach is adopted for all future developments within the borough"*³⁷.

12.10. Despite the SFRA consultants recommending that a sequential approach to development and flood risk is utilised for all future developments within the borough, the same SFRA consultants explain that the SFRA has not performed the Sequential Test of potential development sites but that it provides a summary at Table 13.1 summarising the flood risk to the potential development sites which can assist with completion of the Sequential Test (see figure below). As it explains at Paragraph 13.1 the SFRA does assess all 472 sites within the borough identified through the SHELAA and Call for Sites

process though. The SFRA does not explain why it does not undertake the Sequential Test – were the consultants asked not to undertake it as TWBC may not like the conclusions? It is entirely unclear from the evidence but it explains that the assessments will “assist the Council when they undertake the Sequential Test”.

12.11. The SFRA states that (see below) “The majority of sites are located within Flood Zone 1”.

[TWBC: for figure, please see full representation attached as a supporting document]

12.12. As the SFRA concluded that the majority of sites in the SHELAA and Call for Sites process are located within Flood Zone 1, how is that the most strategic growth was directed towards Paddock Wood which has the highest level of flood risk in the borough? As PPG sets out in its guidance for the application of the Sequential Test for Local Plan preparation (and as stated in the NPPF) if development can be steered towards areas in Flood Zone 1 then the sequential test is passed and it does not need to be examined further and an exceptions test is not required.

12.13. Nowhere in TWBC's evidence can we find a statement confirming that a Sequential Test was undertaken by the Council. The Local Plan itself makes no mention of a Sequential Test being undertaken as required by the NPPF. This is a fundamental flaw in the Local Plan process and evidence base and the Local Plan can clearly not continue until such a study is undertaken and consulted on.

12.14. Despite no Sequential Test being undertaken, the SFRA undertakes a Level 2 Assessment of strategic parcels as “potential development locations have been provided by the council to be assessed in the SFRA”. Twelve strategic parcels were assessed which presumably means that regardless of what a Sequential Test may have concluded, that the twelve parcels had been pre-determined as potentially preferred sites by TWBC. There is no summary map indicating where the development parcels are located or how they were selected. The evidence simply jumps from the recommendation that a Sequential Test be undertaken by TWBC to an assessment of twelve strategic development parcels.

[TWBC: for figures, please see full representation attached as a supporting document]

12.15. The Council's Development Strategy Topic Paper explains that, in relation to Sequential Testing, “the aim is to steer development to Flood Zone 1. Where there are no reasonable available sites in Flood Zone 1, guidance states that LPAs should take into account the flood risk vulnerability of land uses and consider reasonable available sites in Flood Zone 2”³⁸. It goes on to state that the Level 1 SFRA considers how the sequential test should be carried out by TWBC in preparing its Local Plan. However this Sequential Test was never undertaken.

12.16. The Topic Paper states that “It is accepted that it is often the case that it is not possible for all new development to be allocated that is not at risk from flooding”³⁹. However, this is precisely the role of the Sequential Test as stated in the NPPF to direct development to Flood Zone 1 which TWBC has blatantly ignored at arriving at its conclusion that it should locate its strategic growth in the area of the borough with the highest flood risk.

12.17. It does not take an expert to conclude from looking at the Environment Agency's ‘Flood map for planning’⁴⁰ that Paddock Wood is located within Flood Zones 2 and 3 and is an inappropriate location for strategic development. The yellow marker on the map has been dropped at Paddock Wood Railway Station which we have clarified as one cannot read the text map showing the name ‘Paddock Wood’ due to the extent of the flood risk covering the town.

[TWBC: for figure, please see full representation attached as a supporting document]

12.18. When one compares the EA flood map with that of the inset Policies Map for Paddock Wood (which one must do himself as TWBC has not overlaid the flood risk mapping with the proposed site allocations) it is striking to visualise the correlation of Flood Zone 2 and 3 covering the proposed strategic site allocations at Paddock Wood. With this very simple visualisation it is baffling for one to attempt to comprehend how the Council could have settled on the development strategy it did, selecting Paddock Wood for the location of its strategic growth.

[TWBC: for map, please see full representation attached as a supporting document]

12.19. Turning to the Local Plan policies which concern Flood Risk, it is considered that these are entirely inadequate to meet the NPPF tests of soundness. We make the following critical observations demonstrating how the Local Plan policies are unsound:

- . **Policy STR1 (The Development Strategy):** No mention of flood risk or infrastructure required to attempt to address flood risk in the borough.
 - . **Policy STR5 (Infrastructure and Connectivity):** The policy does not specify any measures or specific flood risk attenuation infrastructure. It simply states that *“Close liaison is required with Kent County Council as the lead local flood authority and the Environment Agency to ensure that adequate consideration is given to any development in flood prone areas and that appropriate mitigation and compensatory measures are put in place where necessary in accordance with Policies EN25 (Flood Risk) and EN26 (Sustainable Drainage)”*. The policy should provide far more certainty about what flood related infrastructure is going to be provided, when, and by whom rather than just liaising with the flood authorities. It talks about ‘adequate consideration’ being given to any development in flood prone areas – what does the Council even mean by this?
 - . **Policy STR7 (Climate Change):** It is rather shocking to read that the Local Plan’s policy on Climate Change does not mention flooding or how it plans to address its significant flood risks in the borough over the life of the plan. The only mention that comes close is its stated aim of not increasing and reducing surface water runoff: *“not increasing, and wherever possible reducing, surface water runoff through the use of permeable surfaces and Sustainable Drainage Systems”*. This is an inadequate policy to deal with the climate change risks facing the borough particularly in relation to flood risk.
 - . **Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel):** This policy mentions flooding in two places.
 - o At (j) it states that *“a Paddock Wood ‘Wetland Park’ to the north of the western parcel (land edged in blue on Map 27), to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks”*.
 - o At paragraph 13 it states the need to *“Ensure a drainage strategy is in place in consultation with the LPA, Kent County Council, the Drainage Authority, and Southern Water prior to the grant of planning permission for any substantial development on the site”*. Having a drainage strategy in place is standard practice for any proposed development site so this policy is effectively meaningless.
 - . **Policy EN3 (Climate Change Mitigation and Adaptation):** This policy takes the plan no further in respect of specifying how flood risk is addressed. It states under *“Climate change adaptation that development must incorporate measures that adapt to the impacts of climate change”* and that *“these could include” (2) Reduction in flood risk and provision of infrastructure to protect vulnerable communities and habitats and minimisation of water consumption”*. This policy is ineffective.
 - . **Policy EN25 (Flood Risk):** Policy EN25 is the Council’s proposed development management policy regarding flood risk. It contains within it text which seems to be taken for the most part directly from the NPPF so one should question whether it has any place in the Local Plan. In any case, the policy states that *“The sequential test and exception tests established by the NPPF will be strictly adhered to across the borough”*. Given that TWBC has not undertaken an Exception Test to support the Local Plan it has failed against its own policy.
- 12.20. It is important to note MHCLG’s proposed changes to the NPPF in relation to flood risk of which there are numerous. The Local Plan does not refer to these proposed changes and whilst they are still only proposed changes to the NPPF there is a clear direction of travel emerging from MHCLG in relation to flood risk which further strengthens and tightens the policies in the NPPF in relation to flood risk. As we have already set out, the Council’s approach to flood risk is clearly at odds with the NPPF in its existing and likely future form. MHCLG explains its reasoning behind the proposed changes to the NPPF which are as follows⁴¹:
- . The changes proposed are in part, an initial response to the emergent findings of our joint review with the Department for Environment, Food and Rural Affairs (Defra) of planning policy for flood risk. The government’s Policy Statement on flood and coastal erosion risk management sets out a number of actions to maintain and enhance the existing safeguards concerning flood risk in the planning system. Informed by this, we will consider what further measures may be required in the longer term to strengthen planning policy and guidance for proposed development in areas at risk of flooding from all sources when our review concludes. The Policy Statement is informed by a number of key consultations and advice:
 - o Environment Agency’s consultation exercise on the updated National Flood and Coastal Erosion Risk Management Strategy
 - o results of the government’s flood and coastal erosion: call for evidence in 2019

- o an evidence review of the concept of flood resilience
- o advice from the National Infrastructure Commission and the Committee on Climate Change
- o The Secretary of State for the Environment has written to Sir John Armitt, Chair of the National Infrastructure Commission, about the government's policies to create a nation that is more resilient to future flood and coastal erosion risk.
- . On planning and flood risk, new paragraphs 160 and 161 have been amended to clarify that the policy applies to all sources of flood risk.
- . New paragraph 160(c) has been amended to clarify that plans should manage any residual flood risk by using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management).
- . The Flood Risk Vulnerability Classification has been moved from planning guidance into national planning policy (set out in Annex 3 and referred to in paragraph 162). It is considered that this classification is a key tool and should be contained in national policy.
- . New paragraph 163 has been amended to clarify the criteria that need to be demonstrated to pass the exception test.
- . New paragraph 166(b) has been expanded to define what is meant by "resilient".

12.21. We note that the Council's SFRA identifies a number of Nitrate Vulnerable Zones (NZVs) covering considerable areas of the borough including Paddock Wood and its surrounding area (within and outside the borough). The SFRA states that these areas are "*at risk from agricultural nitrate pollution...nitrate levels in waterbodies are affected by surface water runoff from surrounding agricultural land entering receiving waterbodies*". Yet, despite identifying these NZVs the SFRA seems to almost dismiss the seriousness of the NZV designation by saying that the level of contamination will potentially influence the SuDS and should be assessed as part of the design process. We consider this matter of NZVs needs much more careful research and analysis. It is well known from other parts of the country such as Hampshire whereby nitrate mitigation has become perhaps the defining topic for planning and development due to the need to protect the water environment and conserve habitats and species. One of the ways to mitigate the likely significant effects of development is through ensuring development is 'nutrient neutral' which is part of the strategy being employed by local authorities and the Partnership for South Hampshire as it needs to be addressed at a cross-boundary level. More details about the approach being taken in Hampshire can be found on PfSH's website⁴² along with Natural England's 'nutrient calculator' and updated guidance on achieving nutrient neutral housing development⁴³.

12.22. We note that there is no mention of nitrates in the Local Plan despite this NZVs having been identified and designated in considerable parts of the borough including at Paddock Wood where strategic development is planned.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-PSLP_1456, PSLP 1461, PSLP_1471]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Green Belt

Land at Capel and Paddock Wood

16.1. The NPPF affords great weight to Green Belts. Chapter 13 of the NPPF sets out policies which relate to the protection of the Green Belt. Paragraph 133 of the NPPF states that *"the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."*

16.2. It is acknowledged that the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) concludes that the harm of removing strategic allocation ALP/PW1 would be 'high' as *"AL/PW1 makes a Strong contribution to the prevention of encroachment on the countryside and a Relatively Weak contribution to preventing neighbouring towns merging into one another; and the impact of its release on the adjacent Green Belt will be Moderate. Harm resulting from the release of AL/PW1 will be High"*. The above highlights that the proposed strategic allocation does not comply with the NPPF, as it is evident that its removal for the Green Belt would result in significant encroachment on the countryside.

16.3. Furthermore, it is evident that the justification of removing the Green Belt to fulfil identified local housing need does not constitute 'exceptional circumstances' (as per paragraph 136 of the NPPF). Indeed, in 2015, Brandon Lewis MP (former Minister for State for Housing and Planning) stated that *"the National Planning Policy Framework makes clear that most development in the Green Belt is inappropriate and should be approved only in very special circumstances. Consistent with this, this Statement confirms the Government's policy that [...] unmet need are unlikely to clearly outweigh harm to the Green belt and any other harm as to establish very special circumstances"*. For reasons set out in our 'Sustainability Appraisal' section, it is evident that TWBC (the strategic policy-making authority) have not demonstrated that it has examined fully all other reasonable options for meeting its identified need for development. As such, the proposed removal of the Green Belt is entirely unwarranted as it is based on unsound evidence and does not align with paragraph 136 and 137 of the NPPF.

16.4. We are unconvinced from TWBC's evidence that it has demonstrated that it has examined fully all other reasonable options for meeting its identified need for development⁵⁵ before concluding it has exceptional circumstances. The NPPF requires that strategic policies are informed through this examination of other reasonable options and the Council's strategy much do the following:

a) **Makes as much use as possible of suitable brownfield sites and underutilised land.** TWBC's brownfield land potential has not been fully explored or evidenced. The brownfield land it includes for development in the Local Plan is mainly in Tunbridge Wells and this settlement along with the rest of the borough needs much further investigation for development opportunities including the opportunity for releasing more of its employment land for housing.

b) **Optimises the density of development in line with policies in chapter 11 of the NPPF including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport.** This work has not been undertaken by TWBC with any rigor. For instance there are only 30 dwellings identified within Paddock Wood Town Centre despite it being well served by public transport. There are likely many other opportunities to increase development and densities in centres across the borough.

c) **Has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground.** As we set out in the Duty to Cooperate section of these representations the Council has failed to discharge the duty which is evidenced by a lack of SOCGs with most of its neighbouring authorities.

16.5. Furthermore, the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) adds that *"the masterplan indicates that built development would be located to the north-west of the allocation site in close proximity to Whetsted Road (A228) which would bring the new inset edge close to washed over development in Whetsted"*. This evidence highlights that the removal of this Green Belt parcel would result in the non-compliance of Purpose 2 (paragraph 134, clause b) of the NPPF on the grounds that the westward movement of the inset edge of Paddock Wood would lead to the coalescence of Paddock Wood with Whetsted.

Tudeley Village

16.6. The Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) concludes that the harm of removing strategic allocation AL/CAL1 from the Green Belt would be 'high' as *"AL/CA1 makes a strong contribution to the prevention of encroachment on the countryside and a relatively weak contribution to preventing neighbouring towns merging into one another; and the impact of its release on the adjacent Green Belt will be Moderate. Harm resulting from the release of AL/CA1 will be High."* Whilst PWTC agree that the risk of removing the land from the Green Belt would be high, it is also abundantly clear that the strategic allocation would also result in 'high' harm to Purpose two (paragraph 134b of the NPPF) as the development would result in the merging of neighbouring of Tudeley Village and Five Oak Green. In relation to Purpose 2 of the NPPF (preventing neighbouring towns merging), the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) establishes that *"it has a strong distinction from existing inset settlements, meaning that development will be more intrusive on the settlement gap than would be the case if the allocation area related more strongly to an existing inset settlement, but the size of the gap means that it makes a Relatively Weak contribution to preventing neighbouring towns merging". The Study adds that "this will, without mitigation, weaken the strength of separation between the inset edge of Tudeley Village and existing inset development at Five Oak Green, although will still provide a level of distinction between the two settlements"*.

16.7. PWTC strongly dispute the above statement, as the eastern boundary of the proposed Tudeley Village consists of a tree line which includes a significant gap for east-west access. As highlighted below, this treeline is not uniform and varies in width. The aforementioned gap is highlighted in red. This Google Streetview imagery was taken looking north-west and north-east off Five Oak Green Road from the field gate that is approximately 150m west of Capel Primary School. As shown, it is evident that there will be limited distinction between the two settlements due to the significant reduction in gap between settlements, the topographic gradient sloping down eastwards and the presence of weak field boundaries. As such, there is very little visual separation between the two settlements. It should also be acknowledged that the lack of visual separation will be significantly worse in winter months when tree cover is limited. In conclusion, it is clear that the above statement made within the Green Belt Study Stage Three (Draft Allocation Sites Harm Assessment) is inaccurate as it does not reflect the true level of Green Belt harm resulting from the proposed development.

[TWBC: for images, please see full representation attached as a supporting document]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Growth Proposed at Paddock Wood (including Masterplan Issues)

Overall

14.1. David Lock Associates produced work on the town centre masterplan and it was sent to PWTC Councillors and the Neighbourhood Plan Group however it was sent on a confidential basis and PWTC and the Neighbourhood Plan Group has not been able to share it more widely. We question Why is this not available in the PSDLP particularly given that the masterplan meeting was on the 25th of February 2021.

14.2. We understand that the masterplanning work relies heavily on the burden of paying for infrastructure such as flood mitigation, education, Colts Hill bypass, sports facilities being shared equally over all the development sites by all the developers. It is also assumed that the viability impact of some sites being capable of a high density of development and others having to be low density due to land being required for SuDS,, swales and other built mitigation features will again be equally shared. We question what the mechanism is for achieving this coordination and delivery without external oversight. The phasing and viability of this approach has not practically been testing in the viability evidence which is quite a blunt instrument for testing development viability and does not capture the complexity of the strategic development proposed at Paddock Wood and Tudeley.

Sports Hub

14.3. Through work on the Neighbourhood Plan the Paddock Wood NDP Steering Group has set up a sports sub-group to liaise with sports clubs and associations in Paddock Wood. The group has worked diligently on preparing a strategy for future sports provision in the town and which proposed a new sports hub to the north of the railway line at Eastlands. Such proposals have been made clear to TWBC and their consultants through production of the Strategic Sites Masterplanning document. However, and despite this, that report identifies land for a sports hub to the south west of the Paddock Wood growth area. This is reflected in Policy STR/SS1 of the Local Plan, which has little flexibility in the location of such a use.

14.4. There is no real rationale for the approach taken, with the reasons provided also being good reasons not to locate a sports hub here.

14.5. The Strategic Sites masterplanning presents the preferred growth strategy for Paddock Wood in Option 1. Justification for the Sports hub in the south west corner is as follows:

- . It will maximise accessibility within Paddock Wood by active means. However, the Town Council suggests that its location on the very periphery of the growth area that it will be far removed from many people, both existing and new residents, including major areas of growth to the north of the railway line.
- . The site is in the floodplain and is therefore an appropriate use for that land. However, the Town Council also notes that land it suggests for a sport hub at Eastlands is also in the floodplain (and so there is no difference between either of these locations), but that the masterplanning process instead suggests that housing would be suitable at Eastlands. The Town Council does not agree that housing is an appropriate use within the floodplain.
- . Its location on the south western edge along a revision to the Green Belt boundary would create a soft edge and a buffer between Paddock Wood and Capel. The Town Council suggests that this appears to be the primary reason for the location of the sports hub, rather than wider considerations of accessibility, integration with the built-form and appropriateness of land uses.

14.6. Option 2 of the Strategic Sites masterplanning process presents an alternative option that matches the aspirations the community expressed in consultation on the masterplan, but this was dismissed for the following reasons:

- . It would create excessive north south vehicular traffic, placing pressure on the single road bridge in the town. However, the Town Council points out that with the significant scale of growth proposed to the north of the railway line, people will be travelling north south in any event, and a location either north or south of the town will not change that. Indeed, the only approach that would change that would be to limit any development to the north of the railway line. Indeed, and recognising that major growth is proposed both north and south of the railway line, the masterplan proposes delivery of new rail crossings, and that these would enable access to the northern part of the town. The assumption made by TWBC would appear to be that residents will use active travel means to access a sport hub in the south west periphery of the town, but will use vehicular means to use alternative locations.
- . Concerns that there will be traffic cutting through residential areas from those outside of Paddock Wood travelling to the sports hub. However, the Town Council points out that the preferred location on the edge of the growth area will result in people travelling across Paddock Wood in any event to access the sports hub. The Town Council also points out that sports clubs and organisation in Paddock Wood have indicated that importance of public transport and the role of the train station in bringing people to sports events and activities from outside the town. The preferred location indicated in the masterplanning report is far removed from this, where as a location at Eastlands will support access by sustainable modes of travel.
- . Flooding would cause the pitches to become inundated with water. However, the Town Council points out that one of the reasons for the south west site being the preferred location is that it is also in the floodplain and is considered an appropriate use.
- . Impact of the hub (a large building) on the landscape setting. However, the Town Council points out that the preferred masterplan indicates housing and or a school building in this location and that such development would have the same if not more significant impact than a sports hub.

14.7. Option 3 of the masterplanning work indicates the sports hub being in the same location as option 1. Option 4 proposes instead that existing facilities should be retained and improved, but that this was result in an under-delivery of sports provision. Thus, a new sports hub is required.

14.8. The preferred approach runs the risk of creating a 'lop-sided' town with all facilities to the south and west, irrespective of the significant growth taking place all around Paddock Wood. The Town Council's view is that the aspiration should be to create a fully integrated and cohesive community, with good access to all facilities for people of all ages and abilities. Paddock Wood already benefits from a number of sports facilities, including those at Putlands and the Memorial Field. These are clustered to the south of the town. To help create an integrated and inclusive community it is important to balance provision across town. Indeed, the scale of growth to the north of the railway line will generate a need for sports provision in its own right. Locating a new sports hub at Eastlands will meet these requirements and balance sports provision across town in accessible locations. The Town Council suggests that the only reason offered by TWBC for locating the sports hub in the south west is to act as a landscape buffer between Capel and Paddock Wood. The Town Council contends that this does not constitute good placemaking.

14.9. The Town Council would also like to point out to the Inspector(s) that they are keen to take on the running and management of such a facility, but that locating this in the south west periphery of the growth area would preclude this as the site falls outside the boundary of the Town Council and is

instead located within Capel Parish (whom has confirmed to the Town Council that they do not wish to have the burden of potentially having to manage such a facility).

In summary:

14.10. The preference for a sports hub to be located in the south west periphery of Paddock Wood is not supported. It is not justified by evidence. The Town Council, working with sports clubs and organisations, has identified an alternative location at Eastlands which should be recognised in changes to the Local Plan policy and which would align with work undertaken with the community through the emerging Neighbourhood Plan.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 2 The Strategy for Paddock Wood Town Centre

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

Town Centre

14.11. Policy STR/SS 2 of the draft Local Plan presents the strategy for Paddock Wood Town Centre.

14.12. Supporting text to this policy quite rightly states that with the scale of planned growth proposed around Paddock Wood, there is an opportunity to invest in and enhance the role of the town centre.

14.13. Both the policy and supporting text state that a Supplementary Planning Document will be prepared for the town centre.

14.14. This is despite efforts by Paddock Wood Town Council to prepare a Neighbourhood Plan, progress of which has been stalled by TWBC, and within which the future of the town centre is a key area of focus.

14.15. Paddock Wood commenced work on the production of a Neighbourhood Plan in 2015. A Regulation 14 draft was prepared in 2018, although this was not subject to consultation as publication of the emerging Local Plan introduced proposals for significantly more growth around Paddock Wood than originally envisaged.

14.16. Work on the Neighbourhood Plan was paused to enable review and consideration of the Local Plan, and how the Neighbourhood Plan should respond, such that it conforms to the emerging strategic objectives and policies of the Local Plan.

14.17. Work on the Neighbourhood Plan has since recommenced but has been delayed once again in the absence of more detailed information from TWBC on their proposal for and evidence to support change in the town centre.

14.18. The information prepared by TWBC to date in support of the town centre policies in the Local Plan remains limited and by delaying publication of this further to production of a future SPD the Council is frustrating the Neighbourhood Plan process. Indeed, TWBC will be aware that, once made, a Neighbourhood Plan will form part of the development plan and carry more weight than a SPD. TWBC should thus be supporting the Neighbourhood Plan process.

14.19. Policy STR/SS 2 lacks detail and supporting evidence and should link to the NDP to provide that information. The Paddock Wood Economic Opportunities Report (SQW, December 2020) prepared as part of the Strategic Sites Masterplanning Report does not specifically comment on the town centre, beyond referring to other evidence base documents prepared in support of the Local Plan. It does

though note that given existing policies in the adopted 2016 Local Plan as well as those preceding that in the 2006 Local Plan, that there has been a *'long standing aspiration for a comprehensive and masterplanned approach to the development of the town centre'* but this has not materialised (see para 4.12 of SQW report). The draft Local Plan does little to address this, delaying this process to a SPD which has yet to be forthcoming.

14.20. The TW Retail, Commercial, Leisure & Town Centre Uses Study Update (Nexus for TWBC, Feb 2021) is primarily focused on Tunbridge Wells town centre. In respect of Paddock Wood, it notes that the vacancy rate has increased significantly between the 2016 Town Centre study and the 2021 update. However, this can be attributed to land in the control of Churchill Homes which has been granted planning permission and where shop front retail use will be replaced as part of that scheme. The study identified a number of issues for Paddock Wood town centre but does not expand upon this to provide recommendations as to actions or interventions that should take place (beyond establishing a quantum of new retail floorspace that it suggests could be accommodated in the town centre or within a neighbourhood centre as part of the growth of the town).

In summary:

14.21. The draft town centre policy is limited in its effectiveness. It does not set out a clear strategy. There is limited information to support proposed changes to the town centre. This is instead deferred to production of a SPD. This has delayed and frustrated work on the NDP, within which the improvements to the town centre are key to the future of the town. The Local Plan should recognise the role of the NDP and the weight this will have.

Access and Movement

14.22. Policy STR 6 (Transport and Parking) of the draft Local Plan notes that, for Paddock Wood, the development and delivery of strategic sites will have integrated active travel within their layout and design. This is welcome and supported.

14.23. The Town Council notes that a Local Cycling and Walking Infrastructure Plan (LCWIP) has been prepared as evidence to the Local Plan (PJA, Phase 2 report, March 2021). This recommends *'reducing through traffic access in Paddock Wood'*, which, it says, *'would help significantly with improving conditions for walking and cycling'*.

14.24. The report includes a number of suggestions to existing routes and junctions in paddock Wood which are supported by the Town Council. A set of additional measures are also set out. It is noted that these are *'ambitious'* and would produce *'transformational changes'* (see section 4.12 of report).

14.25. These complementary measures include the suggestion that Paddock Wood should become a 'low traffic town', involving closure of the Maidstone Road railway bridge to all vehicular traffic except buses. As the report notes, this is the only vehicular bridge across the railway line in Paddock Wood.

14.26. Although the masterplan for the growth area proposes new bridges across the railway, these are primarily for walking and cycling, and are not in the town centre.

14.27. Whilst the Town Council welcomes ideas and solutions to improve walking and cycling conditions, this needs to be balanced with the needs of all and restricting vehicular traffic from using the Maidstone railway bridge would have wider impacts, including on emergency vehicles, the mobility impaired, services and deliveries. It is also important to recognise that the railway line is a barrier to movement and by restricting access across this could increase severance between communities.

In Summary:

14.28. The Town Council supports measures that improve walking and cycling conditions across Paddock Wood. Policy STR/SS1 and Policy STR/SS2 of the draft Local Plan note the need to improve connections across the railway line. IN particular, Policy STR/SS 2 (5) notes the need for 'additional and improved linkages across the railway line for vehicles, pedestrians and cyclists'. This is supported. The policies do not include reference to the closure of the Maidstone Road railway bridge to vehicular traffic as suggested in the LCWIP. The exclusion of this from policy is supported. Inclusion of such a policy clause would be objected as being unjustified.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you lease include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Viability

19.1. Please note we raise a number of points regarding Local Plan viability in the 'Infrastructure' and 'Garden Settlement Principles' sections. Viability of the Local Plan and particularly proposals at Paddock Wood and Tudeley will need to be fully tested at Local Plan Examination and we wish to take part in those hearings. The scale of infrastructure required to support at Paddock Wood and Tudeley will need to be justified in terms of viability and there must be absolute clarity on the phasing and timing of such infrastructure, the amount of funding that will need to be in place when, who will be responsible for the delivery of the infrastructure and contingency plans. The Development Strategy and Infrastructure Delivery Plan lack details and certainty on all the key elements required to ensure sustainable development can be delivered.

19.2. Given the above, the Local Plan viability study should take a 'worst case scenario' view on viability – there are countless examples across the country where viability matters for strategic proposals have not been scrutinised closely enough which has resulted in stalled sites and a lack of sufficient infrastructure to support the communities being planned. Given that the Local Plan proposes that the strategic development at Paddock Wood and Tudeley should be delivered using Garden Settlement Principles, and given the exceptional need for flood risk mitigation infrastructure and new infrastructure to support this growth, TWBC and its residents cannot afford for the viability study to be a 'high level' assessment which lacks all the finer grain detailed and analysis that everyone knows is required to fully understand the challenges presented by TWBC's development proposals.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Growth Proposed at Paddock Wood (including Masterplan Issues)

Overall

14.1. David Lock Associates produced work on the town centre masterplan and it was sent to PWTC Councillors and the Neighbourhood Plan Group however it was sent on a confidential basis and PWTC and the Neighbourhood Plan Group has not been able to share it more widely. We question Why is this not available in the PSDLP particularly given that the masterplan meeting was on the 25th of February 2021.

14.2. We understand that the masterplanning work relies heavily on the burden of paying for infrastructure such as flood mitigation, education, Colts Hill bypass, sports facilities being shared equally over all the development sites by all the developers. It is also assumed that the viability impact of some sites being capable of a high density of development and others having to be low density due to land being required for SuDS,, swales and other built mitigation features will again be equally shared. We question what the mechanism is for achieving this coordination and delivery without external oversight. The phasing and viability of this approach has not practically been testing in the viability evidence which is quite a blunt instrument for testing development viability and does not capture the complexity of the strategic development proposed at Paddock Wood and Tudeley.

Sports Hub

14.3. Through work on the Neighbourhood Plan the Paddock Wood NDP Steering Group has set up a sports sub-group to liaise with sports clubs and associations in Paddock Wood. The group has worked diligently on preparing a strategy for future sports provision in the town and which proposed a new sports hub to the north of the railway line at Eastlands. Such proposals have been made clear to TWBC and their consultants through production of the Strategic Sites Masterplanning document. However, and despite this, that report identifies land for a sports hub to the south west of the Paddock Wood growth area. This is reflected in Policy STR/SS1 of the Local Plan, which has little flexibility in the location of such a use.

14.4. There is no real rationale for the approach taken, with the reasons provided also being good reasons not to locate a sports hub here.

14.5. The Strategic Sites masterplanning presents the preferred growth strategy for Paddock Wood in Option 1. Justification for the Sports hub in the south west corner is as follows:

- . It will maximise accessibility within Paddock Wood by active means. However, the Town Council suggests that its location on the very periphery of the growth area that it will be far removed from many people, both existing and new residents, including major areas of growth to the north of the railway line.
- . The site is in the floodplain and is therefore an appropriate use for that land. However, the Town Council also notes that land it suggests for a sport hub at Eastlands is also in the floodplain (and so there is no different between either of these locations), but that the masterplanning process instead suggests that housing would be suitable at Eastlands. The Town Council does not agree that housing is an appropriate use within the floodplain.
- . Its location on the south western edge along a revision to the Green Belt boundary would create a soft edge and a buffer between Paddock Wood and Capel. The Town Council suggests that this appears to be the primary reason for the location of the sports hub, rather than wider considerations of accessibility, integration with the built-form and appropriateness of land uses.

14.6. Option 2 of the Strategic Sites masterplanning process presents an alternative option that matches the aspirations the community expressed in consultation on the masterplan, but this was dismissed for the following reasons:

- . It would create excessive north south vehicular traffic, placing pressure on the single road bridge in the town. However, the Town Council points out that with the significant scale of growth proposed to the north of the railway line, people will be travelling north south in any event, and a location either north or south of the town will not change that. Indeed, the only approach that would change that would be to limit any development to the north of the railway line. Indeed, and recognising that major growth is proposed both north and south of the railway line, the masterplan proposes delivery of new rail crossings, and that these would enable access to the northern part of the town. The assumption made by TWBC would appear to be that residents will use active travel means to access a sport hub in the south west periphery of the town, but will use vehicular means to use alternative locations.
- . Concerns that there will be traffic cutting through residential areas from those outside of Paddock Wood travelling to the sports hub. However, the Town Council points out that the preferred location on the edge of the growth area will result in people travelling across Paddock Wood in any event to access the sports hub. The Town Council also points out that sports clubs and organisation in Paddock Wood have indicated that importance of public transport and the role of the train station in bringing people to sports events and activities from outside the town. The preferred location indicated in the masterplanning report is far removed from this, where as a location at Eastlands will support access by sustainable modes of travel.
- . Flooding would cause the pitches to become inundated with water. However, the Town Council points out that one of the reasons for the south west site being the preferred location is that it is also in the floodplain and is considered an appropriate use.
- . Impact of the hub (a large building) on the landscape setting. However, the Town Council points out that the preferred masterplan indicates housing and or a school building in this location and that such development would have the same if not more significant impact than a sports hub.

14.7. Option 3 of the masterplanning work indicates the sports hub being in the same location as option 1. Option 4 proposes instead that existing facilities should be retained and improved, but that this was result in an under-delivery of sports provision. Thus, a new sports hub is required.

14.8. The preferred approach runs the risk of creating a 'lop-sided' town with all facilities I the south and west, irrespective of the significant growth taking place all around Paddock Wood. The Town Council's view is that the aspiration should be to create a fully integrated and cohesive community, with good access to all facilities for people of all ages and abilities. Paddock Wood already benefits from a number of sports facilities, including those at Putlands and the Memorial Field. These are clustered to the south of the town. To help create an integrated and inclusive community it is important to balance provision across town. Indeed, the scale of growth to the north of the railway line will generate a need for sports provision in its own right. Locating a new sports hub at Eastlands will meet these requirements and balance sports provision across town in accessible locations. The Town Council suggests that the only reason offered by TWBC for locating the sports hub in the south west is to act as a landscape buffer between Capel and Paddock Wood. The Town Council contends that this does not constitute good placemaking.

14.9. The Town Council would also like to point out to the Inspector(s) that they are keen to take on the running and management of such a facility, but that locating this in the south west periphery of the growth area would preclude this as the site falls outside the boundary of the Town Council and is

instead located within Capel Parish (whom has confirmed to the Town Council that they do not wish to have the burden of potentially having to manage such a facility).

In summary:

14.10. The preference for a sports hub to be located in the south west periphery of Paddock Wood is not supported. It is not justified by evidence. The Town Council, working with sports clubs and organisations, has identified an alternative location at Eastlands which should be recognised in changes to the Local Plan policy and which would align with work undertaken with the community through the emerging Neighbourhood Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 3 Climate Change Mitigation and Adaptation

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Flood Risk

12.1. We consider that the Local Plan, its overall development strategy, evidence and policies in relation to Flood Risk to fail the NPPF tests of soundness as it has not been positively prepared, is not justified, not effective and not consistent with national policy. These Local Plan policies include STR1, SRT7, STR5, STR/SS1, EN25, EN26

12.2. PWTC raised its strong concerns and objections with TWBC at the Regulation 18 Local Plan stage (Draft Local Plan) regarding the inadequate evidence and assessment of flood risk matters due to the extensive flood risk existing at Paddock Wood. However, these concerns were never addressed despite the SFRA prepared for the Draft Local Plan being entirely inadequate. We attach PWTC's representations to the Regulation 18 Local Plan consultation which should be included as part of our submission to the Secretary of State.

12.3. Apart from the factual errors and therefore doubt of accuracy of the SFRA's modelling (which is covered in PWTC's Regulation 18 representations), the flooding at Paddock Wood is from surface water and not fluvial, primarily from down hill flows from High Weald farmland to the South of Town adding to nitrate pollution entering the common water courses that flow into the Medway. High flood levels in Paddock Wood are usually several hours after rainfall for this reason. The only fluvial contribution is when the Medway is in surge and all the common watercourses that drain north into it from the area back up and spread out sideways over their banks adding to the surface water. No detail is provided of specific build flood mitigation measures that might be employed, other than standard local level SUDs, so it is entirely unclear how mitigation costs have been calculated or factored.

12.4. The NPPF³¹ is very clear about the approach that local planning authorities must take regarding climate change and flood risk when preparing local plans and strategic policies. However, TWBC has unfortunately failed to comply with the NPPF in respect of its approach to preparing its development strategy. The Council's approach to its Local Plan is particularly incongruous given that TWBC declared Climate Emergency³² so one would expect or at least hope the Council would have paid particular attention to the NPPF in relation to Climate Change and Flood Risk given it's declared 'emergency' however this has not been the case as we explain below.

[TWBC: for figure, please see full representation attached as a supporting document]

12.5. The current NPPF has a great deal to say about climate change and flood risk and the role of planning / plan-making to support the transition to a low carbon future in a changing climate and the

need to take full account of flood risk and coastal change including minimising vulnerability and improving resilience of places, converting existing buildings and supporting renewable and low carbon energy and associated infrastructure³³. Instead of following the NPPF's policy on climate change the Local Plan instead 1) fails to take into the full account of flood risk in the borough by not preparing suitable evidence base and ignoring its evidence base regarding flood risk in Paddock Wood and the north of the borough; 2) seeks to maximise the vulnerability of the areas of the borough already vulnerable to flood risk and future climate change such as Paddock Wood; 3) making the borough less resilient to climate change and flooding and more prone to the risks of climate change by proposing to put development in the highest risk area of the borough in terms of climate change.

12.6. In terms of planning for climate change the NPPF states³⁴ the following, however the Local Plan and its evidence fail to take into account the long-term implications of flood risk and instead of relocating vulnerable development and infrastructure the Local Plan proposes to deliver new development in the most vulnerable locations:

- . *"Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk";*
- . *"Policies should support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts, such as providing space for physical protection measures, or making provision for the possible future relocation of vulnerable development and infrastructure"*

12.7. The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*³⁵. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk. Simply put, why did TWBC select a development strategy that clearly contravenes the fundamentals of national policy? The Council was clearly aware of the significance of the high risk of flooding at Paddock Wood as it states this as one of the Local Plan's key Issues or Challenges, where it states that *"the areas to the north and west of Paddock Wood are particularly prone to flooding"* and that a key issue is *"therefore ensuring that the proposed growth strategy can be accommodated without further harm and risk to areas that are vulnerable to flooding, provide betterment"*. This statement misunderstands national policy which is to avoid directing development to areas at highest risk (whether existing or future) in the first place.

[TWBC: for figure, please see full representation attached as a supporting document]

12.8. The NPPF explains³⁶ that *"all plans should apply a sequential, risk-based approach to the location of development – taking into account the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

- 1 *a) applying the sequential test and then, if necessary, the exception test as set out below;*
- 2 *b) safeguarding land from development that is required, or likely to be required, for current or future flood management;*
- 3 *c) using opportunities provided by new development to reduce the causes and impacts of flooding (where appropriate through the use of natural flood management techniques); and*
- 4 *d) where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

12.9. However, TWBC and its consultants appear to have avoided applying a 'sequential test' in respect of the whole borough. This is despite the Strategic Flood Risk Assessment (SFRA – Level 1 & Level 2 combined) (Juley 2019) stating as its first recommendation: *"The NPPF supports a risk-based and sequential approach to development and flood risk in England, so that development is located in the lowest flood risk areas where possible; it is recommended that this approach is adopted for all future developments within the borough"*³⁷.

12.10. Despite the SFRA consultants recommending that a sequential approach to development and flood risk is utilised for all future developments within the borough, the same SFRA consultants explain that the SFRA has not performed the Sequential Test of potential development sites but that it provides a summary at Table 13.1 summarising the flood risk to the potential development sites which can assist with completion of the Sequential Test (see figure below). As it explains at Paragraph 13.1 the SFRA does assess all 472 sites within the borough identified through the SHELAA and Call for Sites

process though. The SFRA does not explain why it does not undertake the Sequential Test – were the consultants asked not to undertake it as TWBC may not like the conclusions? It is entirely unclear from the evidence but it explains that the assessments will “assist the Council when they undertake the Sequential Test”.

12.11. The SFRA states that (see below) “The majority of sites are located within Flood Zone 1”.

[TWBC: for figure, please see full representation attached as a supporting document]

12.12. As the SFRA concluded that the majority of sites in the SHELAA and Call for Sites process are located within Flood Zone 1, how is that the most strategic growth was directed towards Paddock Wood which has the highest level of flood risk in the borough? As PPG sets out in its guidance for the application of the Sequential Test for Local Plan preparation (and as stated in the NPPF) if development can be steered towards areas in Flood Zone 1 then the sequential test is passed and it does not need to be examined further and an exceptions test is not required.

12.13. Nowhere in TWBC's evidence can we find a statement confirming that a Sequential Test was undertaken by the Council. The Local Plan itself makes no mention of a Sequential Test being undertaken as required by the NPPF. This is a fundamental flaw in the Local Plan process and evidence base and the Local Plan can clearly not continue until such a study is undertaken and consulted on.

12.14. Despite no Sequential Test being undertaken, the SFRA undertakes a Level 2 Assessment of strategic parcels as “potential development locations have been provided by the council to be assessed in the SFRA”. Twelve strategic parcels were assessed which presumably means that regardless of what a Sequential Test may have concluded, that the twelve parcels had been pre-determined as potentially preferred sites by TWBC. There is no summary map indicating where the development parcels are located or how they were selected. The evidence simply jumps from the recommendation that a Sequential Test be undertaken by TWBC to an assessment of twelve strategic development parcels.

[TWBC: for figures, please see full representation attached as a supporting document]

12.15. The Council's Development Strategy Topic Paper explains that, in relation to Sequential Testing, “the aim is to steer development to Flood Zone 1. Where there are no reasonable available sites in Flood Zone 1, guidance states that LPAs should take into account the flood risk vulnerability of land uses and consider reasonable available sites in Flood Zone 2”³⁸. It goes on to state that the Level 1 SFRA considers how the sequential test should be carried out by TWBC in preparing its Local Plan. However this Sequential Test was never undertaken.

12.16. The Topic Paper states that “It is accepted that it is often the case that it is not possible for all new development to be allocated that is not at risk from flooding”³⁹. However, this is precisely the role of the Sequential Test as stated in the NPPF to direct development to Flood Zone 1 which TWBC has blatantly ignored at arriving at its conclusion that it should locate its strategic growth in the area of the borough with the highest flood risk.

12.17. It does not take an expert to conclude from looking at the Environment Agency's ‘Flood map for planning’⁴⁰ that Paddock Wood is located within Flood Zones 2 and 3 and is an inappropriate location for strategic development. The yellow marker on the map has been dropped at Paddock Wood Railway Station which we have clarified as one cannot read the text map showing the name ‘Paddock Wood’ due to the extent of the flood risk covering the town.

[TWBC: for figure, please see full representation attached as a supporting document]

12.18. When one compares the EA flood map with that of the inset Policies Map for Paddock Wood (which one must do himself as TWBC has not overlaid the flood risk mapping with the proposed site allocations) it is striking to visualise the correlation of Flood Zone 2 and 3 covering the proposed strategic site allocations at Paddock Wood. With this very simple visualisation it is baffling for one to attempt to comprehend how the Council could have settled on the development strategy it did, selecting Paddock Wood for the location of its strategic growth.

[TWBC: for map, please see full representation attached as a supporting document]

12.19. Turning to the Local Plan policies which concern Flood Risk, it is considered that these are entirely inadequate to meet the NPPF tests of soundness. We make the following critical observations demonstrating how the Local Plan policies are unsound:

- . **Policy STR1 (The Development Strategy):** No mention of flood risk or infrastructure required to attempt to address flood risk in the borough.
 - . **Policy STR5 (Infrastructure and Connectivity):** The policy does not specify any measures or specific flood risk attenuation infrastructure. It simply states that *“Close liaison is required with Kent County Council as the lead local flood authority and the Environment Agency to ensure that adequate consideration is given to any development in flood prone areas and that appropriate mitigation and compensatory measures are put in place where necessary in accordance with Policies EN25 (Flood Risk) and EN26 (Sustainable Drainage)”*. The policy should provide far more certainty about what flood related infrastructure is going to be provided, when, and by whom rather than just liaising with the flood authorities. It talks about ‘adequate consideration’ being given to any development in flood prone areas – what does the Council even mean by this?
 - . **Policy STR7 (Climate Change):** It is rather shocking to read that the Local Plan’s policy on Climate Change does not mention flooding or how it plans to address its significant flood risks in the borough over the life of the plan. The only mention that comes close is its stated aim of not increasing and reducing surface water runoff: *“not increasing, and wherever possible reducing, surface water runoff through the use of permeable surfaces and Sustainable Drainage Systems”*. This is an inadequate policy to deal with the climate change risks facing the borough particularly in relation to flood risk.
 - . **Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel):** This policy mentions flooding in two places.
 - o At (j) it states that *“a Paddock Wood ‘Wetland Park’ to the north of the western parcel (land edged in blue on Map 27), to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks”*.
 - o At paragraph 13 it states the need to *“Ensure a drainage strategy is in place in consultation with the LPA, Kent County Council, the Drainage Authority, and Southern Water prior to the grant of planning permission for any substantial development on the site”*. Having a drainage strategy in place is standard practice for any proposed development site so this policy is effectively meaningless.
 - . **Policy EN3 (Climate Change Mitigation and Adaptation):** This policy takes the plan no further in respect of specifying how flood risk is addressed. It states under *“Climate change adaptation that development must incorporate measures that adapt to the impacts of climate change”* and that *“these could include” (2) Reduction in flood risk and provision of infrastructure to protect vulnerable communities and habitats and minimisation of water consumption”*. This policy is ineffective.
 - . **Policy EN25 (Flood Risk):** Policy EN25 is the Council’s proposed development management policy regarding flood risk. It contains within it text which seems to be taken for the most part directly from the NPPF so one should question whether it has any place in the Local Plan. In any case, the policy states that *“The sequential test and exception tests established by the NPPF will be strictly adhered to across the borough”*. Given that TWBC has not undertaken an Exception Test to support the Local Plan it has failed against its own policy.
- 12.20. It is important to note MHCLG’s proposed changes to the NPPF in relation to flood risk of which there are numerous. The Local Plan does not refer to these proposed changes and whilst they are still only proposed changes to the NPPF there is a clear direction of travel emerging from MHCLG in relation to flood risk which further strengthens and tightens the policies in the NPPF in relation to flood risk. As we have already set out, the Council’s approach to flood risk is clearly at odds with the NPPF in its existing and likely future form. MHCLG explains its reasoning behind the proposed changes to the NPPF which are as follows⁴¹:
- . The changes proposed are in part, an initial response to the emergent findings of our joint review with the Department for Environment, Food and Rural Affairs (Defra) of planning policy for flood risk. The government’s Policy Statement on flood and coastal erosion risk management sets out a number of actions to maintain and enhance the existing safeguards concerning flood risk in the planning system. Informed by this, we will consider what further measures may be required in the longer term to strengthen planning policy and guidance for proposed development in areas at risk of flooding from all sources when our review concludes. The Policy Statement is informed by a number of key consultations and advice:
 - o Environment Agency’s consultation exercise on the updated National Flood and Coastal Erosion Risk Management Strategy
 - o results of the government’s flood and coastal erosion: call for evidence in 2019

- o an evidence review of the concept of flood resilience
- o advice from the National Infrastructure Commission and the Committee on Climate Change
- o The Secretary of State for the Environment has written to Sir John Armitt, Chair of the National Infrastructure Commission, about the government's policies to create a nation that is more resilient to future flood and coastal erosion risk.
- . On planning and flood risk, new paragraphs 160 and 161 have been amended to clarify that the policy applies to all sources of flood risk.
- . New paragraph 160(c) has been amended to clarify that plans should manage any residual flood risk by using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management).
- . The Flood Risk Vulnerability Classification has been moved from planning guidance into national planning policy (set out in Annex 3 and referred to in paragraph 162). It is considered that this classification is a key tool and should be contained in national policy.
- . New paragraph 163 has been amended to clarify the criteria that need to be demonstrated to pass the exception test.
- . New paragraph 166(b) has been expanded to define what is meant by "resilient".

12.21. We note that the Council's SFRA identifies a number of Nitrate Vulnerable Zones (NZVs) covering considerable areas of the borough including Paddock Wood and its surrounding area (within and outside the borough). The SFRA states that these areas are "*at risk from agricultural nitrate pollution...nitrate levels in waterbodies are affected by surface water runoff from surrounding agricultural land entering receiving waterbodies*". Yet, despite identifying these NZVs the SFRA seems to almost dismiss the seriousness of the NZV designation by saying that the level of contamination will potentially influence the SuDS and should be assessed as part of the design process. We consider this matter of NZVs needs much more careful research and analysis. It is well known from other parts of the country such as Hampshire whereby nitrate mitigation has become perhaps the defining topic for planning and development due to the need to protect the water environment and conserve habitats and species. One of the ways to mitigate the likely significant effects of development is through ensuring development is 'nutrient neutral' which is part of the strategy being employed by local authorities and the Partnership for South Hampshire as it needs to be addressed at a cross-boundary level. More details about the approach being taken in Hampshire can be found on PFSH's website⁴² along with Natural England's 'nutrient calculator' and updated guidance on achieving nutrient neutral housing development⁴³.

12.22. We note that there is no mention of nitrates in the Local Plan despite this NZVs having been identified and designated in considerable parts of the borough including at Paddock Wood where strategic development is planned.

[TWBC: for figures, please see full representation attached as a supporting document]

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Heritage

17.1. The Council's evidence base in relation to Heritage is unsound and severely lacking particularly in relation to the fact that TWBC has not prepared Heritage Impact Assessments on the proposed allocations and their alternatives to comply with the NPPF and Historic England's Advice Notes.

17.2. The Council prepared a 'Historic Environment Review' in 2018. This review states at paragraph 1.1.2 that Part 1 *"draws together the existing information and guidance regarding the Borough's historic environment, identifies heritage themes and assesses the significance of heritage assets"*. It explains that Part 2 *"is policy focused and makes recommendations for draft policies to be included in the emerging Local Plan...and sets a framework for the positive conservation and enjoyment of the Borough's heritage assets"*. However, there appears to only be a Part 1 of this study available on TWBC's website so it is only possible to comment on the Part 1 study.

17.3. The Part 1 study explains that there are 2,251 nationally listed buildings in the borough which it says can be viewed online. This is disappointing as one would have expected this study to at least set out the listed building across the borough. There is not even a detailed list or map in the study to illustrate where the listed buildings are located or a breakdown of their listing (I, II*, II). So, the baseline to understand where the heritage assets are located in the borough and their value does not appear to exist in the Council's evidence base. Paddock Wood has approximately thirty listed buildings⁵⁶ and there are a considerable number of listed buildings in the area surrounding Paddock Wood including around Tudeley (see Historic England listed building maps⁵⁷ below).

[TWBC: for maps, please see full representation attached as a supporting document]

17.4. Policy T5 of the Local Plan includes provisions for the safeguarding of the former Paddock Wood to Hawkhurst (Hop Pickers) line which is welcomed. However it does not mention the important heritage of this line in the Local Plan despite the Council's joint extensive Historic Environmental Assessment of the line which is a nine part study published on the Council's website⁵⁸. We request that this study is added to the Local Plan evidence base and that more is made of this important heritage asset in the Local Plan.

17.5. Historic England has prepared a number of Advice Notes with its guidance on how authorities should approach heritage in the Local Plan and in their selection of potential sites including the potential impacts on heritage that might result from the proposals. There are two of these Advice Notes we would like to bring to the attention of TWBC:

- . The Historic Environment and Site Allocations in Local Plans (Historic England Advice Note 3) October 201559. This note
- . Statements of Heritage Significance: Analysing Significance in Heritage Assets (Historic England Advice Note 12) October 201960

17.6. There is no evidence available in the Local Plan or its supporting documents that sets out how the Local Plan process has complied with the NPPF (and the Historic England guidance) in respect of heritage (including archaeological, architectural, artistic or historic, or a combination of these) in terms of considering which development options to select and then the need to assess the heritage impact from these proposals. At a minimum the Council should have undertaken the following staged approach as set out in Advice Note 12 (see paragraph 6):

- 1 Understand the form, materials and history of the affected heritage asset(s), and / or the nature and extent of the archaeological deposits
 - 2 Understand the significance of the assets
 - 3 Understand the impact of the proposal on that significance
 - 4 Avoid, minimise, and mitigate negative impact, in a way that meets the objectives of the NPPF
 - 5 Look for opportunities to better reveal or enhance significance
- [TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Landscape

18.1. The evidence supporting the Local Plan in respect of landscape is disproportionate in its focus on the areas of the borough which are not the focus of strategic growth. Conversely the Local Plan lacks sufficient evidence for the areas where the majority of growth is planned in the borough – Paddock Wood and Tudeley. The 'Landscape Sensitivity Assessment' appears to be the key evidence base used to inform the Local Plan. It was prepared in two separate parts:

- . Landscape Sensitivity Assessment of Countryside around Tunbridge Wells (February 2017); and
- . Landscape Sensitivity Assessment of additional settlements in Tunbridge Wells (Paddock Wood, Horsmonden, Hawkhurst, Cranbrook) (July 2018)

18.2. It is unclear why the studies were prepared separately and in different years but one could make an assumption that the Council's original focus of growth was perhaps Royal Tunbridge Wells and Southborough but that it changed its mind and then focused on potential other areas. As far as we can tell Tudeley is not assessed in either of the studies.

18.3. There is unfortunately no overall concluding recommendations by the consultants to understand what was concluded taking both studies into consideration.

18.4. We do note however that the Paddock Wood assessment appears to score similarly to Royal Tunbridge Wells / Southborough and is perhaps even more sensitive to development given the number of green, yellow and shading compared with that of Paddock Wood. Clearly further evidence needs to be prepared comparing the landscape impact of different options in the borough. Tudeley has not even been assessed in the study.

[TWBC: for tables, please see full representation attached as a supporting document]

18.5. The Council's Landscape and Visual Impact Assessment of Proposed Allocations study (November 2020) unfortunately restricts the assessment to proposed allocations within the High Weald AONB and does not include the locations where the most strategic growth is proposed at Paddock Wood and Tudeley.

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Flood Risk

12.1. We consider that the Local Plan, its overall development strategy, evidence and policies in relation to Flood Risk to fail the NPPF tests of soundness as it has not been positively prepared, is not justified, not effective and not consistent with national policy. These Local Plan policies include STR1, SRT7, STR5, STR/SS1, EN25, EN26

12.2. PWTC raised its strong concerns and objections with TWBC at the Regulation 18 Local Plan stage (Draft Local Plan) regarding the inadequate evidence and assessment of flood risk matters due to the extensive flood risk existing at Paddock Wood. However, these concerns were never addressed despite the SFRA prepared for the Draft Local Plan being entirely inadequate. We attach PWTC's representations to the Regulation 18 Local Plan consultation which should be included as part of our submission to the Secretary of State.

12.3. Apart from the factual errors and therefore doubt of accuracy of the SFRA's modelling (which is covered in PWTC's Regulation 18 representations), the flooding at Paddock Wood is from surface water and not fluvial, primarily from down hill flows from High Weald farmland to the South of Town adding to nitrate pollution entering the common water courses that flow into the Medway. High flood levels in Paddock Wood are usually several hours after rainfall for this reason. The only fluvial contribution is when the Medway is in surge and all the common watercourses that drain north into it from the area back up and spread out sideways over their banks adding to the surface water. No detail is provided of specific build flood mitigation measures that might be employed, other than standard local level SUDs, so it is entirely unclear how mitigation costs have been calculated or factored.

12.4. The NPPF³¹ is very clear about the approach that local planning authorities must take regarding climate change and flood risk when preparing local plans and strategic policies. However, TWBC has unfortunately failed to comply with the NPPF in respect of its approach to preparing its development strategy. The Council's approach to its Local Plan is particularly incongruous given that TWBC declared Climate Emergency³² so one would expect or at least hope the Council would have paid particular attention to the NPPF in relation to Climate Change and Flood Risk given it's declared 'emergency' however this has not been the case as we explain below.

[TWBC: for figure, please see full representation attached as a supporting document]

12.5. The current NPPF has a great deal to say about climate change and flood risk and the role of planning / plan-making to support the transition to a low carbon future in a changing climate and the

need to take full account of flood risk and coastal change including minimising vulnerability and improving resilience of places, converting existing buildings and supporting renewable and low carbon energy and associated infrastructure³³. Instead of following the NPPF's policy on climate change the Local Plan instead 1) fails to take into the full account of flood risk in the borough by not preparing suitable evidence base and ignoring its evidence base regarding flood risk in Paddock Wood and the north of the borough; 2) seeks to maximise the vulnerability of the areas of the borough already vulnerable to flood risk and future climate change such as Paddock Wood; 3) making the borough less resilient to climate change and flooding and more prone to the risks of climate change by proposing to put development in the highest risk area of the borough in terms of climate change.

12.6. In terms of planning for climate change the NPPF states³⁴ the following, however the Local Plan and its evidence fail to take into account the long-term implications of flood risk and instead of relocating vulnerable development and infrastructure the Local Plan proposes to deliver new development in the most vulnerable locations:

- . *"Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk";*
- . *"Policies should support appropriate measures to ensure the future resilience of communities and infrastructure to climate change impacts, such as providing space for physical protection measures, or making provision for the possible future relocation of vulnerable development and infrastructure"*

12.7. The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*³⁵. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk. Simply put, why did TWBC select a development strategy that clearly contravenes the fundamentals of national policy? The Council was clearly aware of the significance of the high risk of flooding at Paddock Wood as it states this as one of the Local Plan's key Issues or Challenges, where it states that *"the areas to the north and west of Paddock Wood are particularly prone to flooding"* and that a key issue is *"therefore ensuring that the proposed growth strategy can be accommodated without further harm and risk to areas that are vulnerable to flooding, provide betterment"*. This statement misunderstands national policy which is to avoid directing development to areas at highest risk (whether existing or future) in the first place.

[TWBC: for figure, please see full representation attached as a supporting document]

12.8. The NPPF explains³⁶ that *"all plans should apply a sequential, risk-based approach to the location of development – taking into account the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

- 1 *a) applying the sequential test and then, if necessary, the exception test as set out below;*
- 2 *b) safeguarding land from development that is required, or likely to be required, for current or future flood management;*
- 3 *c) using opportunities provided by new development to reduce the causes and impacts of flooding (where appropriate through the use of natural flood management techniques); and*
- 4 *d) where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

12.9. However, TWBC and its consultants appear to have avoided applying a 'sequential test' in respect of the whole borough. This is despite the Strategic Flood Risk Assessment (SFRA – Level 1 & Level 2 combined) (Juley 2019) stating as its first recommendation: *"The NPPF supports a risk-based and sequential approach to development and flood risk in England, so that development is located in the lowest flood risk areas where possible; it is recommended that this approach is adopted for all future developments within the borough"*³⁷.

12.10. Despite the SFRA consultants recommending that a sequential approach to development and flood risk is utilised for all future developments within the borough, the same SFRA consultants explain that the SFRA has not performed the Sequential Test of potential development sites but that it provides a summary at Table 13.1 summarising the flood risk to the potential development sites which can assist with completion of the Sequential Test (see figure below). As it explains at Paragraph 13.1 the SFRA does assess all 472 sites within the borough identified through the SHELAA and Call for Sites

process though. The SFRA does not explain why it does not undertake the Sequential Test – were the consultants asked not to undertake it as TWBC may not like the conclusions? It is entirely unclear from the evidence but it explains that the assessments will “assist the Council when they undertake the Sequential Test”.

12.11. The SFRA states that (see below) “The majority of sites are located within Flood Zone 1”.

[TWBC: for figure, please see full representation attached as a supporting document]

12.12. As the SFRA concluded that the majority of sites in the SHELAA and Call for Sites process are located within Flood Zone 1, how is that the most strategic growth was directed towards Paddock Wood which has the highest level of flood risk in the borough? As PPG sets out in its guidance for the application of the Sequential Test for Local Plan preparation (and as stated in the NPPF) if development can be steered towards areas in Flood Zone 1 then the sequential test is passed and it does not need to be examined further and an exceptions test is not required.

12.13. Nowhere in TWBC's evidence can we find a statement confirming that a Sequential Test was undertaken by the Council. The Local Plan itself makes no mention of a Sequential Test being undertaken as required by the NPPF. This is a fundamental flaw in the Local Plan process and evidence base and the Local Plan can clearly not continue until such a study is undertaken and consulted on.

12.14. Despite no Sequential Test being undertaken, the SFRA undertakes a Level 2 Assessment of strategic parcels as “potential development locations have been provided by the council to be assessed in the SFRA”. Twelve strategic parcels were assessed which presumably means that regardless of what a Sequential Test may have concluded, that the twelve parcels had been pre-determined as potentially preferred sites by TWBC. There is no summary map indicating where the development parcels are located or how they were selected. The evidence simply jumps from the recommendation that a Sequential Test be undertaken by TWBC to an assessment of twelve strategic development parcels.

[TWBC: for figures, please see full representation attached as a supporting document]

12.15. The Council's Development Strategy Topic Paper explains that, in relation to Sequential Testing, “the aim is to steer development to Flood Zone 1. Where there are no reasonable available sites in Flood Zone 1, guidance states that LPAs should take into account the flood risk vulnerability of land uses and consider reasonable available sites in Flood Zone 2”³⁸. It goes on to state that the Level 1 SFRA considers how the sequential test should be carried out by TWBC in preparing its Local Plan. However this Sequential Test was never undertaken.

12.16. The Topic Paper states that “It is accepted that it is often the case that it is not possible for all new development to be allocated that is not at risk from flooding”³⁹. However, this is precisely the role of the Sequential Test as stated in the NPPF to direct development to Flood Zone 1 which TWBC has blatantly ignored at arriving at its conclusion that it should locate its strategic growth in the area of the borough with the highest flood risk.

12.17. It does not take an expert to conclude from looking at the Environment Agency's ‘Flood map for planning’⁴⁰ that Paddock Wood is located within Flood Zones 2 and 3 and is an inappropriate location for strategic development. The yellow marker on the map has been dropped at Paddock Wood Railway Station which we have clarified as one cannot read the text map showing the name ‘Paddock Wood’ due to the extent of the flood risk covering the town.

[TWBC: for figure, please see full representation attached as a supporting document]

12.18. When one compares the EA flood map with that of the inset Policies Map for Paddock Wood (which one must do himself as TWBC has not overlaid the flood risk mapping with the proposed site allocations) it is striking to visualise the correlation of Flood Zone 2 and 3 covering the proposed strategic site allocations at Paddock Wood. With this very simple visualisation it is baffling for one to attempt to comprehend how the Council could have settled on the development strategy it did, selecting Paddock Wood for the location of its strategic growth.

[TWBC: for map, please see full representation attached as a supporting document]

12.19. Turning to the Local Plan policies which concern Flood Risk, it is considered that these are entirely inadequate to meet the NPPF tests of soundness. We make the following critical observations demonstrating how the Local Plan policies are unsound:

- . **Policy STR1 (The Development Strategy):** No mention of flood risk or infrastructure required to attempt to address flood risk in the borough.
 - . **Policy STR5 (Infrastructure and Connectivity):** The policy does not specify any measures or specific flood risk attenuation infrastructure. It simply states that *“Close liaison is required with Kent County Council as the lead local flood authority and the Environment Agency to ensure that adequate consideration is given to any development in flood prone areas and that appropriate mitigation and compensatory measures are put in place where necessary in accordance with Policies EN25 (Flood Risk) and EN26 (Sustainable Drainage)”*. The policy should provide far more certainty about what flood related infrastructure is going to be provided, when, and by whom rather than just liaising with the flood authorities. It talks about ‘adequate consideration’ being given to any development in flood prone areas – what does the Council even mean by this?
 - . **Policy STR7 (Climate Change):** It is rather shocking to read that the Local Plan’s policy on Climate Change does not mention flooding or how it plans to address its significant flood risks in the borough over the life of the plan. The only mention that comes close is its stated aim of not increasing and reducing surface water runoff: *“not increasing, and wherever possible reducing, surface water runoff through the use of permeable surfaces and Sustainable Drainage Systems”*. This is an inadequate policy to deal with the climate change risks facing the borough particularly in relation to flood risk.
 - . **Policy STR/SS1 (The Strategy for Paddock Wood, including land at east Capel):** This policy mentions flooding in two places.
 - o At (j) it states that *“a Paddock Wood ‘Wetland Park’ to the north of the western parcel (land edged in blue on Map 27), to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks”*.
 - o At paragraph 13 it states the need to *“Ensure a drainage strategy is in place in consultation with the LPA, Kent County Council, the Drainage Authority, and Southern Water prior to the grant of planning permission for any substantial development on the site”*. Having a drainage strategy in place is standard practice for any proposed development site so this policy is effectively meaningless.
 - . **Policy EN3 (Climate Change Mitigation and Adaptation):** This policy takes the plan no further in respect of specifying how flood risk is addressed. It states under *“Climate change adaptation that development must incorporate measures that adapt to the impacts of climate change”* and that *“these could include” (2) Reduction in flood risk and provision of infrastructure to protect vulnerable communities and habitats and minimisation of water consumption”*. This policy is ineffective.
 - . **Policy EN25 (Flood Risk):** Policy EN25 is the Council’s proposed development management policy regarding flood risk. It contains within it text which seems to be taken for the most part directly from the NPPF so one should question whether it has any place in the Local Plan. In any case, the policy states that *“The sequential test and exception tests established by the NPPF will be strictly adhered to across the borough”*. Given that TWBC has not undertaken an Exception Test to support the Local Plan it has failed against its own policy.
- 12.20. It is important to note MHCLG’s proposed changes to the NPPF in relation to flood risk of which there are numerous. The Local Plan does not refer to these proposed changes and whilst they are still only proposed changes to the NPPF there is a clear direction of travel emerging from MHCLG in relation to flood risk which further strengthens and tightens the policies in the NPPF in relation to flood risk. As we have already set out, the Council’s approach to flood risk is clearly at odds with the NPPF in its existing and likely future form. MHCLG explains its reasoning behind the proposed changes to the NPPF which are as follows⁴¹:
- . The changes proposed are in part, an initial response to the emergent findings of our joint review with the Department for Environment, Food and Rural Affairs (Defra) of planning policy for flood risk. The government’s Policy Statement on flood and coastal erosion risk management sets out a number of actions to maintain and enhance the existing safeguards concerning flood risk in the planning system. Informed by this, we will consider what further measures may be required in the longer term to strengthen planning policy and guidance for proposed development in areas at risk of flooding from all sources when our review concludes. The Policy Statement is informed by a number of key consultations and advice:
 - o Environment Agency’s consultation exercise on the updated National Flood and Coastal Erosion Risk Management Strategy
 - o results of the government’s flood and coastal erosion: call for evidence in 2019

- o an evidence review of the concept of flood resilience
- o advice from the National Infrastructure Commission and the Committee on Climate Change
- o The Secretary of State for the Environment has written to Sir John Armitt, Chair of the National Infrastructure Commission, about the government's policies to create a nation that is more resilient to future flood and coastal erosion risk.

- . On planning and flood risk, new paragraphs 160 and 161 have been amended to clarify that the policy applies to all sources of flood risk.
- . New paragraph 160(c) has been amended to clarify that plans should manage any residual flood risk by using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management).
- . The Flood Risk Vulnerability Classification has been moved from planning guidance into national planning policy (set out in Annex 3 and referred to in paragraph 162). It is considered that this classification is a key tool and should be contained in national policy.
- . New paragraph 163 has been amended to clarify the criteria that need to be demonstrated to pass the exception test.
- . New paragraph 166(b) has been expanded to define what is meant by "resilient".

12.21. We note that the Council's SFRA identifies a number of Nitrate Vulnerable Zones (NZVs) covering considerable areas of the borough including Paddock Wood and its surrounding area (within and outside the borough). The SFRA states that these areas are "*at risk from agricultural nitrate pollution...nitrate levels in waterbodies are affected by surface water runoff from surrounding agricultural land entering receiving waterbodies*". Yet, despite identifying these NZVs the SFRA seems to almost dismiss the seriousness of the NZV designation by saying that the level of contamination will potentially influence the SuDS and should be assessed as part of the design process. We consider this matter of NZVs needs much more careful research and analysis. It is well known from other parts of the country such as Hampshire whereby nitrate mitigation has become perhaps the defining topic for planning and development due to the need to protect the water environment and conserve habitats and species. One of the ways to mitigate the likely significant effects of development is through ensuring development is 'nutrient neutral' which is part of the strategy being employed by local authorities and the Partnership for South Hampshire as it needs to be addressed at a cross-boundary level. More details about the approach being taken in Hampshire can be found on PfSH's website⁴² along with Natural England's 'nutrient calculator' and updated guidance on achieving nutrient neutral housing development⁴³.

12.22. We note that there is no mention of nitrates in the Local Plan despite this NZVs having been identified and designated in considerable parts of the borough including at Paddock Wood where strategic development is planned.

[TWBC: for figures, please see full representation attached as a supporting document]

Flood risk

13.20. Keeping in mind our earlier comments regarding flood risk on the strategic site allocations, preventative flood mitigation is critical. A key shortcoming of the Local Plan and its supporting documents is that the flood risk mitigation measures detailed within the IDP for Paddock Wood total "*£9 million approximate cost (excluding groundworks*". Referring to the Viability Study Stage 2 (Appraisal IIa), flood risk costs including enhanced/new channels in SFRA, flood defences, raised platform and SUDS total £8,661,975, resulting in a funding gap of £338,025. At current, it is unclear as to whether the funding gap will be met through additional funds from elsewhere, and as such the Local Plan does not accord with paragraph 156 of the NPPF as it cannot be considered that strategic policies had "*managed flood risk from all sources*".

[TWBC: for full representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Powered by Objective Online 4.2 - page 2

We request that you lease include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Settlement Role and Function

6.1. The Council's evidence and approach to determining the role and function of the borough's settlements is not justified, not effective and inconsistent with national policy.

6.2. The Settlement Role and Function Study (February 2021) does not include Royal Tunbridge Wells. It gives the reason for this as *"its status as the main settlement of the borough"*. Surely the fact that it is the main settlement of the borough should have led to it being assessed as part of the study. After all the 'Purpose of the Study' in addition to *"providing an updated evidence base to help inform the settlement hierarch of the borough... is to also give an indication of each settlement's level of sustainability and potential to accommodate further growth"* 21. How can it possibly be that the role of the main settlement of the borough hasn't been assessed against the other settlements? Is the Council concerned that including such an analysis would clearly demonstrate the mismatch of the settlement hierarchy and its preferred development strategy whereby the main settlement of the borough is earmarked for very considerably less development than less sustainable settlements such as Paddock Wood?

6.3. To further confuse matters, Southborough is "jointly considered as the main urban area" for the borough however unlike Royal Tunbridge Wells was assessed as part of this study. The study concludes that Southborough is in the 'Grouping B' along with Cranbrook, Paddock Wood and Hawkhurst whilst Royal Tunbridge Wells is placed in 'Grouping A' on its own. This is extremely confusing.

6.4. The study's method for creating settlement 'groupings' is not sufficiently explained and not really explained at all apart from a few lines in the 'Conclusions' section of the study. It states the following regarding the groupings:

- . *"rather than simply categorising the settlements in order of size, the settlements are identified by grouping them in terms of their characteristics, focusing on the range of services and facilities they currently provide".*
- . *"The findings of this updated Study show that larger settlements also tend to score more highly across the range of sustainability indicators identified in terms of the level of provision of services and facilities"*
- . *"Based on the scores and evidence collected in this Study, a revised table of settlement groupings is set out in Table 6 below. These groupings give an indication of the level of sustainability and appropriateness of these settlements to accommodate further growth in terms of access they provide to services and facilities that their support their sustainability"*22

[TWBC: for table, please see full representation attached as a supporting document]

6.5. This explanation given regarding the method for determining the groupings is wholly inadequate. It explains that it looks beyond just the 'size of settlements' however the study does not set out the size of each settlement either in population or in area. In order to understand population figures for the settlements one must refer to the superseded 2017 Settlement Role and Function Study (see

below). However, the population assumptions provided are at the parish level and do not reflect the populations of the settlements themselves.

[TWBC: for table, please see full representation attached as a supporting document]

6.6. Referring to the population table, it is difficult to conclude that Southborough should be in the same grouping as Paddock Wood, Cranbrook and Hawkhurst. Southborough has a population of 12,459 whereas Paddock Wood has the next largest population at 8,253 some 4,206 less residents. Southborough is more than 2.5 times the size of Hawkhurst in population.

6.7. Turning to the assessment of the settlements in the 2021 study Southborough scores the highest here as well followed by Cranbrook with Paddock Wood in third and then Hawkhurst:

- . Southborough (presumably behind Royal Tunbridge Wells) received the highest score / ranking in the study at 100 using the 'new weighted method' and using all previous scoring systems as well.
- . Cranbrook trails Southborough in scoring coming in second place with 90 points.
- . Paddock Wood scores 82 points coming third.
- . Hawkhurst scores 71 points coming in fourth.
- . Rusthall scores 59 points coming in fifth.
- . Pembury scores 55 points coming in sixth.

[TWBC: for table, please see full representation attached as a supporting document]

6.8. We make a number of additional critical observations and shortcomings about this important piece of work which claimed to inform the Local Plan's development strategy:

- . Royal Tunbridge Wells is not included in the Study despite it being the 'Main Urban Settlement of the borough' (see above).
- . The methodology is unclear as to how it has arrived at a number of the scores for the 'new weighted method' for the 2021 study including but not limited to the scores for bus services.
- . The study does not include population figures for the settlements and relate this back to the level of services and facilities that are present in each settlement. In other words, particular services could be more or less adequate dependent on the population they are serving however the study provides no indication as to what services and facilities (and investment) are required to make them more sustainable.
- . There is no analysis of the level of public transportation serving the settlements. The study simply says whether there is a bus service at least once an hour Monday – Saturday and whether there is a train station.
- . The study is not locationally specific about any of the infrastructure or services and includes no mapping making it impossible to understand in spatial terms which areas of the borough are and are not well served by services and facilities.
- . The study does not consider cycling and walking which should be seen as the focal point of considering sustainability and planning for healthy places.

6.9. It is extremely difficult to follow the logic of how the Settlement Role and Function and Study has informed the Development Strategy and proposed Local Plan allocations. Our analysis of this is set out in the 'Development Strategy' section of our representations.

[TWBC: for table, please see full representation attached as a supporting document]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Paddock Wood Town Council

Question 2

Agent's Name and Organisation (if applicable) Troy Planning & Design

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 9 Gypsies and Travellers

[TWBC: for other comments by Paddock Wood Town Council, please see Comment Numbers PSLP_1448-1456, PSLP_1461, PSLP_1471, PSLP_1474, PSLP_1475-1477 and PSLP_1479]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Pre-Submission Local Plan – Paddock Wood Town Council Representation

Please find enclosed our representations to the Council's Pre-Submission Local Plan. These Representations are prepared and submitted on behalf of Paddock Wood Town Council (PWTC) and the representations are supported by the Paddock Wood Neighbourhood Plan Steering Group.

We also enclose the Council's Representation Form with our signature confirming that we do wish to take part in the Local Plan Examination Hearings.

We would like to point out that the majority of PWTC's representations to the Regulation 18 consultation were not addressed by TWBC. Given that the Local Plan has changed very little between that earlier consultation and the current period of representations on the Regulation 19 Local Plan we enclose these earlier representations and request that TWBC takes these into account and ensures they are supplied to the Secretary of State if the Council decides to proceed to submission stage.

We request that you please include this letter as part of our formal representations.

Our representations conclude that the Local Plan and its evidence base fail all the tests of soundness set out in the National Planning Policy Framework (NPPF) and that the Local Plan is not legally compliant.

Our representations go to the heart of the soundness and legality of the Local Plan, its policies, and the process TWBC has undertaken in preparing its Local Plan. We therefore consider that the entirety of the Local Plan is unsound as it is not legally compliant. Whilst we have singled out a number of specific policies that we consider to be unsound it would simply not be possible to comment on every single policy in the Local Plan which is a 515-page document.

We trust that TWBC appreciates the importance of the Local Plan proposals to the Paddock Wood community in terms of the inappropriateness of the proposals which would, if the Local Plan in its current form were to be implemented, have irreversible negative impacts on Paddock Wood and the wider area.

We urge TWBC to reconsider its development strategy which is set to fail at Local Plan Examination in Public and to restart the Local Plan process using an evidence base led approach which would conclude that Paddock Wood is an unsuitable and unsustainable location for strategic housing growth. Such an approach would save TWBC, the taxpayers and all the stakeholders involved in the Local Plan process an enormous amount of time and resources debating a Local Plan which is clearly unsound and not legally compliant.

1 Gypsies and Travellers

20.1. We consider the Local Plan's approach to identifying locations for Gypsy and Traveller accommodation to be unclear and unjustified. This includes Policy H9 (Gypsies and Travellers) and Policy STR/SS1.

20.2. Policy H9 states that the accommodation needs for Gypsies and Travellers will be met on the additional pitches as identified in Table 11. For Paddock Wood this states that there are no existing authorised pitches, no outstanding permissions and three potential additional pitches.

20.3. Yet, the Policies Map identifies three potential existing Gypsy and Traveller sites with potential for regularisation and / or intensification. These sites proposed are of a significant scale and would clearly accommodate more than one pitch each.

20.4. The Council's Gypsy and Traveller Accommodation Assessment was published nearly 3.5 years ago and is clearly out of date. Furthermore, the study explains at Paragraph 3.2 that there are several weaknesses with the reliability of the data used to determine the need for accommodation. It also states at Paragraph 3.7 that the data used in the study is from January 2015 to January 2017. The evidence being used is unreliable and dates from nearly 6.5 years ago. We consider this to be an unreliable on which to base local plan policy and allocations.

[TWBC: for figures, please see full representation attached as a supporting document]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Paddock Wood Town Council confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Paddock Wood and nearby at the proposed new settlement, its extensive representations, and its role as a statutory consultee, PWTC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to respond to other evidence and arguments put forward.

Question 1	
Respondent's Name and/or Organisation	Charles May/ Paddock Wood U3A Climate Change Group
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 1 Sustainable Design	
[TWBC: comment on Policy EN3 has been duplicated to PSLP_1345]	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Is this where I make comments on EN1? It is really very confusing.

The provisions of this policy are to be applauded, and I am gratified that the Local Plan places emphasis on environmental sustainability and climate change issues.

What I would like to see amended is the form of language that provides too much leeway for the avoidance and disregard of the climate change imperatives.

Just a few examples: EN1.1 'Should' make efficient use.... 'where practicable' EN1.3 Must 'respect' site characteristics EN1.4 'Should' be compatible EN1.7 'Should' be designed to be adaptable 'where appropriate' EN1.9 'Should include'..... 'where possible' EN1.10 'Should' incorporate measures.. EN1.11 'Should' encourage positive behavioural change EN3 Statement concerning energy reduction in new buildings to reduce operational CO2 emissions by 15% This requirement can evidently be ignored if the development becomes 'non-viable'. No. This is an absolute commitment that cannot be dodged to suit the developer's profit margins

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	No, I do not wish to participate in examination hearing session(s)
--	--

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Is this where I make comments on EN1? It is really very confusing.

The provisions of this policy are to be applauded, and I am gratified that the Local Plan places emphasis on environmental sustainability and climate change issues.

What I would like to see amended is the form of language that provides too much leeway for the avoidance and disregard of the climate change imperatives.

Just a few examples:

EN1.1 'Should' make efficient use.... 'where practicable'
EN1.3 Must 'respect' site characteristics
EN1.4 'Should' be compatible
EN1.7 'Should' be designed to be adaptable 'where appropriate'
EN1.9 'Should include'..... 'where possible'
EN1.10 'Should' incorporate measures..
EN1.11 'Should' encourage positive behavioural change
EN3 Statement concerning energy reduction in new buildings to reduce operational CO2 emissions by 15%
This requirement can evidently be ignored if the development becomes 'non-viable'. No. This is an absolute commitment that cannot be dodged to suit the developer's profit margins

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having grown up in the local village of Hadlow and lived in Tudeley since 2016, I know the Parish of Capel and the surrounding area well.

Positively prepared

The Local Plan has not been positively prepared, as it has not taken a realistic view on the cumulative impact of the Tudeley development on Capel, Tonbridge, and the surrounding area. It places a disproportionate burden on one area of the borough and is not supported by the community.

The level of engagement undertaken with neighbouring local authorities, other agencies and residents has been inadequate, with important documents being very difficult to locate. It has also been felt that representations have been generally disregarded.

Justified

The Local Plan is not justified, as inadequate consideration has been given to alternative brownfield sites or other locations within the borough. The provision of approximately 2,800 houses has not been proposed in response to local need and will target people who wish to move out of London.

The proposal also does not present the exceptional circumstances needed to justify development on designated Green Belt.

Effective

The Local Plan is not effective, as the proposal is unsustainable. The effect of the increase in traffic along already busy roads and lanes, that are without lighting or pathways, has not been properly addressed. Intended measures to mitigate environmental damage, the loss of Green Belt and increased risk of flooding are also unrealistic.

It does not acknowledge the high number of listed heritage buildings and farmsteads, that are affected by Tudeley Garden Village. The development will cause irreversible damage to much of their historic setting; with the fabric of many buildings being put at risk by the increase in traffic and heavy freight, and by road widening schemes and the increased risk of flooding.

The Local Plan will destroy the historical, rural setting of All Saint's Church, which receives visitors from all over the world. The future integrity of the Grade 1 listed building and its unique Chagall windows will also be put at risk through the urbanisation of the surrounding ancient farmland and associated increase in footfall.

Consistent with national policy

The Local Plan is not consistent with the national planning policy framework. It is also in direct contravention of TWBC's own policies for landscape, environment, and sustainability.

It makes inadequate and unrealistic proposals for mitigating the departure from national policies concerning climate change, and for the need to protect the natural environment and wildlife which will be under threat from Tudeley Garden Village.

The response by TWBC to national planning guidance is illustrated by the proposal to build a major roundabout on the B2017, directly opposite Capel Primary School. This will be contrary to current guidance to avoid schools being located near busy roads, and will be detrimental to the health and wellbeing of pupils and staff as air quality is affected by pollution from the increase in vehicles and heavy freight.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposal for the Tudeley Garden Village should be removed from the Local Plan. Greater consideration should be given for sustainable housing on existing brownfield sites and in smaller sustainable low-impact development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

None.

---------------------------------------	-------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

3.6

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not effective
<input type="checkbox"/>	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I object to the plan on the grounds that it is unsound. My main concerns are that the plan presents a disingenuous picture of Tunbridge Wells as the cultural, commercial and retail hub of the county and does not do enough to protect the distinct nature of the smaller towns and villages and the local countryside from over development.

I believe the plan is unsound in its argument that the bulk of the housing development should be located in Tudeley, East Capel and around Paddock Wood, whilst failing to address the considerable planning issues facing Tunbridge Well's town centre (locally referred to as the grot spot) and the traffic jams that regularly stifle the area.

The hub and spoke model this strategy advocates will not deliver the type and location of housing needed by the young, old and affordable demographic identified in the objectives.

The use of greenbelt and flood risk land is an unacceptable solution to a poorly conceived vision that fails to grasp what the people of the whole Borough want, namely unspoilt countryside and a vibrant and accessible cultural hub where there is affordable housing within walking distance of cafes, shops railways and employment.

Please find referenced points below:

I believe the Local Plan should be rejected on the grounds that it is unsound for three main reasons:

1) The plan is built on a faulty presentation of Tunbridge Wells being a vibrant hub to the Borough

The strategy puts forward the model of a central commercial, leisure and cultural hub (Royal Tunbridge Wells Ref Point 3.6) and housing developments in villages and a new settlement, whilst at the same time protecting the character and countryside of the Borough (Points 2.27) and the Green Belt which helps it retain its distinctive character. (Point 2.28)

However, Tunbridge Wells, far from a vibrant centre, has increasing become a provincial backwater due to poor planning and traffic management dating back to at least 2014 when the town's cinema and retail outlets, connecting the station to the centre of town, were demolished. (Ref Page 80: "A prominent site which has been vacant for many years and in need of redevelopment".) This site in the centre of the town has remained behind hoardings and is well known as the town's grot spot.

The conceptual use for the town centre is not at the heart of the plan, as it should be, to support the whole strategy, but is relegated to an afterthought (ref point 5.26.) The idea that people will want to travel into Tunbridge Wells as a retail and cultural hub are flawed. Why would we want to encourage more car use on already congested and polluting roads to sit in traffic jams in and out of a town where you have to pay to park, when it is easier to go to the North Farm industrial estate locally or Bluewater for a far superior retail provision? The Royal Victoria shopping centre is past its useful function and in light of increased online shopping trends this is only likely increase, with more outlets becoming vacant.

2) The plan will not meet the housing needs of the groups it aims to provide for

The plan states that the council will improve access to suitable, affordable housing including for local young people and older households. (ref Vision and Strategic Objectives 1 para 3.)

However, this strategy places the vast majority of the housing development for the Borough in a new 'garden settlement' (that has little infrastructure and none of the amenities young and older people will

need) or in what will be great swathes of concrete estates encircling Paddock Wood, which already has limited amenities. Affordable housing, suitable for the demographics described, need to be placed close to shops and cafes and well within walking distance of a town centre and mainline railway. Young and older people do not want to live in isolated 'garden settlements' or sprawling community-less estates, where they are reliant on a car for access to shops, entertainment, cafes and culture and work.

3) The plan does not protect the natural environment and specific characters of the landscape and smaller towns and villages

The plan states that it wants to protect the character of the Borough which includes areas of outstanding Natural Beauty, greenbelt and a living and working countryside (ref point 3.12.)

One of the Boroughs most beautiful and ancient landscapes is Tudeley and Capel. My friends, on a visit from Australia a few years ago, stood transfixed by what they described as stepping back in time into a countryside narrative, worthy of special status. To build on this area would be a terrible act not just for the current community but for future generations. Likewise, the encircling of Paddock Wood, which is in a flood risk zone and building on the greenbelt that maintains its character, whilst preserving car parks in Tunbridge Wells (Ref point 5.11) is planning gone mad!

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make this plan sound in meeting it's vision and objectives it should be modified to accommodate a much greater proportion of the accommodation required close to the main centre of Tunbridge Wells, where there is access to amenities and car ownership is not essential. The civic centre site, currently proposed for redevelopment, the 'grot spot' and the underused Royal Victoria Centre are all sites which could be considered. A new vision putting urban living opportunities in the heart of Tunbridge Wells will both revitalise the town and preserve the natural beauty of the surrounding countryside.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like the opportunity to contribute.

Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I do not consider that the Local Plan has been positively prepared, as it has not taken a realistic view on the cumulative impact of the Tudeley development on Capel, Tonbridge, and the surrounding area. Councils have been advised to press ahead with their Local Plan process, but TWBC has made little concession to the fact that this is during a pandemic. It has been very difficult to discuss the proposals within the community or engage with the Council's Planners. No on-line "Zoom" meetings or surgeries have been offered to help navigate the Reg 19 process or the vast and highly complex documentation. The on-line exhibition is only concerned with the Local Plan process and does not explain proposals. The documents available on the TWBC website are extremely confusing to a layman, with poor search facilities and conflicting information provided. There has been a lack of transparency in the process with multiple, sometimes conflicting documents, seemingly randomly published at different times – to the extent that residents now have very different interpretations of the proposals and no easy way to find clarity, eg regarding the position of new roads.

Representatives of the Council have shown a breath-taking arrogance by advising residents that the village will definitely go ahead and there is little point in opposing it. Opposition from residents and the neighbouring authority of Tonbridge have largely been ignored. Early in the process TWBC attempted to by-pass the usual consultation process by omitting Tudeley village from incarnations of the Local Plan and only revealing it very late due to the persistence of the Parish Council. They then ignored the many thousands of objections submitted by the public, adjacent local authorities and other consultees at Regulation 18.

I do not consider the proposals to be justified in that there is no demonstrable local need for the new Tudeley village. There is not a local housing crisis, which would be demonstrated by widespread overcrowding and homelessness, but the proposed village will accommodate migration from the capital where out of control property prices, increased working from home and ease of commuting are causing residents of London to move into outlying areas. The majority of house sales in the Tunbridge Wells area over the last year have been to those leaving London rather than meeting a local need. I do not believe that Capel, or other villages in the South-East, should be sacrificed because of a failure in housing policy elsewhere.

I do not consider the proposals for Tudeley will be effective in maintaining a clear identity and separation of communities. The new village will result in over development between Tonbridge and Paddock Wood, with little to separate communities. I believe the highway proposals will be ineffective in managing the increased traffic movements resulting from the development, which will damage existing heritage

buildings, create pollution and harm well-being. The highway proposals will cause traffic to reach the queues entering Tonbridge or Tunbridge Wells faster, rather than resolve the actual problem. In the case of Tonbridge, this will shift the problem to the neighbouring authority to resolve. The Plan does not put forward plausible solutions to obvious key problems which will result from the construction of Tudeley Village relating to transport, climate change, heritage and ecology, but instead either states that these vital matters will be considered later in the process, or appears to be wishful thinking eg the Chief Planner advising a public meeting that highway problems will be resolved by the widespread use of the electric bicycle, or that existing wildlife will be happy to reside in wildlife corridors or bird boxes in the new residents' gardens.

The plans for Tudeley are against Government guidelines in that designated Greenbelt land should only be built upon in exceptional circumstances and then brownfield or redundant land might be considered. No compelling evidence has been provided that the only option available to TWBC is to sacrifice working farmland, with little or no existing infrastructure close by. The plan for Tudeley village is also at odds with Government commitments to climate change, protecting ecology and "home grown" food in a post-Brexit world. All Saints Church is stated to receive special treatment, but there are plans to surround it with new development, with a tiny buffer. Tudeley village is dressed up as being sustainable, but this is at the expense of existing sustainability.

Tunbridge Wells Borough Council's strap line "Love Where You Live" is redundant to the residents of Tudeley – we already do. However, for the last two years during a tumultuous time for the UK, we have had the additional stress of battling with our Council which rather seems to "Hate Where We Live" and is hell bent on destroying great swathes of our rural Green Belt community, with all its history, beauty, ecology, dark skies and ancient woodland which their predecessors have preserved for generations by enforcing statutory and policy procedures. The transformation of our farmsteads and hamlets into a new town is the latest in a series of low grade, poorly thought through projects through which TWBC displays its contempt for the communities it should serve. Alternatives have been ignored, including brown field sites and proportionate development of existing settlements with established infrastructures, in favour of building on a large swathe of virgin, agricultural land in the ownership of one landowner.

I have been a resident of Tudeley for the last five years with my family and I have no hesitation in saying that I love the beauty and character of where I live. I acknowledge that time cannot stand still, however, the ill thought through, but convenient, proposals to create Tudeley Village will destroy what is special and unique about our Parish, with no clear justification other than to meet a housing target in the easiest way possible. It is to be sincerely hoped the HM Inspector will direct the Council to draw up a new sustainable and sensible plan to the benefit of existing and future residents.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plan should be modified to remove Tudeley Village and replaced with proportionate development in existing settlements and brownfield sites.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

The plan for Tudeley village is also at odds with Government commitments to climate change, protecting ecology and "home grown" food in a post-Brexit world. All Saints Church is stated to receive special treatment, but there are plans to surround it with new development, with a tiny buffer. Tudeley village is dressed up as being sustainable, but this is at the expense of existing sustainability.

Tunbridge Wells Borough Council's strap line "Love Where You Live" is redundant to the residents of Tudeley – we already do. However, for the last two years during a tumultuous time for the UK, we have had the additional stress of battling with our Council which rather seems to "Hate Where We Live" and is hell bent on destroying great swathes of our rural Green Belt community, with all its history, beauty, ecology, dark skies and ancient woodland which their predecessors have preserved for generations by enforcing statutory and policy procedures. The transformation of our farmsteads and hamlets into a new town is the latest in a series of low grade, poorly thought through projects through which TWBC displays its contempt for the communities it should serve. Alternatives have been ignored, including brown field sites and proportionate development of existing settlements with established infrastructures, in favour of building on a large swathe of virgin, agricultural land in the ownership of one landowner.

I have been a resident of Tudeley for the last five years with my family and I have no hesitation in saying that I love the beauty and character of where I live. I acknowledge that time cannot stand still, however, the ill thought through, but convenient, proposals to create Tudeley Village will destroy what is special and unique about our Parish, with no clear justification other than to meet a housing target in the easiest way possible. It is to be sincerely hoped the HM Inspector will direct the Council to draw up a new sustainable and sensible plan to the benefit of existing and future residents.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposals for Tudeley village should be removed from the Local Plan and replaced with sustainable development of brownfield sites or the extension of existing settlements.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

No

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Amanda Parkes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I do not believe this part of the Plan should even be considered.

The proportion and scale of it is vast and would swamp the local area with a disproportionate amount of housing for this small rural parish.

I do not believe all avenues have been explored. There are countless Brown Field sites ready for redevelopment – they are just more expensive, and smaller sites. But surely this is what all Councils should be looking at – with so many disused urban buildings, we should be enhancing these empty buildings and their surroundings, and spreading the houses across the whole of the TWBC Borough. This would then allow the agricultural land to be used for its purpose, and the other green space surrounding it, for the enjoyment, and physical and mental health of all local residents.

I believe TWBC have been lazy and greedy – putting 50% of their perceived housing needs for the whole area into one tiny parish, as in this part of the Plan they only have to deal with one landowner, and one site. And it does not escape any of the local resident's notice that all the Council Tax would be taken by TWBC, but the impact to services would land on TMBC.

It is outrageous that the local population would be increased by 500%!

Many of the local residents, including myself, moved from London because we wanted a different life, with clean air, green space and less noise. Whilst I appreciate the need for housing, this level of increase is wholly unacceptable.

All the housing is to be built on Green Belt land.

The Green Belt was put in place to protect urban sprawl, and the vastness of this proposal would eradicate nearly all of it, and essentially link Tonbridge to Paddock Wood.

What is the point of designating land as Green Belt, if that means nothing? I work as a local estate agent, and used to be able to say to potential buyers "this is Green Belt, it won't be built on". Now, it appears, I can never say that, as Green Belt is no longer protected as such. The words are worthless, and more and more Green Belt is sacrificed to concrete.

This land is valuable agricultural land, and there is need for local agriculture

There is a great need for crops, grazing, orchards, hops etc to supply the local community with food. This in turn also creates many jobs for local people. In order to cut greenhouse gases, food should be supplied locally, as far as possible. This avoids transportation and pollution, and gainfully employs the local residents. The land in Tudeley has been farmed for hundreds of years.

Local Employment

Local residents have been employed in agriculture for generations, with those particular skills. All these people would then have to retrain for jobs, if the agriculture was not there – not always possible if they do not have the right education or skill sets, and it would be dependent on other local jobs being available, which is unlikely, particularly after the pandemic, with unemployment being at an all time high. TWBC may argue that the housebuilding itself would create local employment, but you can't simply switch from being a fruit grower to an electrician.

Flooding

This land soaks up, and uses efficiently, potential flood water. TWBC claim that they have invested in surveys, professional expertise, and many reports, to try to reassure us that this won't be an issue. Nature defies algorithms. I am not assured or confident that anyone can precisely predict what will happen with global warming and wetter winters. I have lived in my house for 20 years. In the last two years water has come right up to my doorstep – something I've not had in the preceding 18 years. My house sits on a slight slope, but the road on the North East side of my house, where there is a slight dip, fills with deep water during heavy rainfall, which is hazardous, particularly on dark nights. If all the surrounding land is built on, the 400 acres of farmland allocated for this part of the Plan will not be there to absorb it, nor the trees, that suck up gallons of it. I think the increased risk of flooding will be huge. There are many surrounding villages, such as Hadlow and Yalding that already have a problem. Tonbridge also floods now, in the Sainsbury's car park. However many drains are put in place, if all the avenues are already full, and the River Medway, there will be nowhere for the water to drain to.

Lack of engagement with local residents and TMBC

I found it absolutely incredible that TWBC claimed they engaged with local residents, communities and surrounding Councils. This proposed development has been shrouded in secrecy until the 11th hour. It has been in the planning for years, and yet local residents heard about it just two months before Regulation 18 was going to take place. I am incensed that they have the gall to state this – it has been cloak and dagger all the way and for as long as it was legally possible. None of the local residents (me included) heard anything about these proposals until May 2019, when there was very little time to respond.

I attended a TMBC Council meeting in November 2019, when local Councillors were discussing it. 17 local Councillors stood up and berated this plan, saying there had been no cooperation or discussions, and were furious that all the burden would be borne by them and not TWBC, who would be benefiting from all the Council Tax. They pointed out that most of the new residents would be commuters – all coming into Tonbridge on one already overcrowded road – the B2017 – all trying to park in the station car parks, which were already full, all shopping in Tonbridge, which does not have the capacity to cope, all wanting the grammar schools, doctors surgeries etc. Tonbridge cannot cope with the increase of population that 'Tudeley Garden Village' will have. So no cooperation or engagement was evident from TWBC with local residents or adjoining Councils. Quite the opposite.

Roads and Infrastructure

As I have mentioned above, there is only one main road going into Tonbridge from Tudeley – the B2017. This road is already overburdened with an enormous amount of traffic, and during school rush hour times it comes to a standstill. I live on this road. At busy times it is impossible to get anywhere fast. In non rush hour it has a constant stream of fast moving traffic, making it dangerous at times for me to get out.

As TWBC have not disclosed any firm plans for infrastructure it is difficult to object to them! However, I believe their plans may be to widen this road to include a bus lane. Firstly, I do not know how they would do this as there are so many houses along this road, making it impossible unless they compulsorily purchase many of them, although Hadlow Estate (who are offering all of this land) own a great many of them as they have been the workers cottages. Many of them are now rented by local people. Even if widening was possible, I'm not sure what it would achieve, except to increase the number of vehicles all converging more quickly and bottle necking into one road going into Tonbridge.

On a personal level, quite apart from the noise of even more vehicles going past my house, it would make it even more dangerous for me to get in and out of my house. I would have to cross two lanes of fast moving traffic if I turn right, plus join fast moving traffic. It would be a death hazard. The only alternative is that I would have to turn left, up to the also possible proposed roundabout at the junction of Hartlake Road, and then come back on myself, causing me massive inconvenience, and essentially living on a dual carriageway. The thought of it is horrendous.

Traffic

I have made some of my points of above, but this only concerns one particular road – the B2017, which is already overloaded with local traffic. To add the cars from another 2,800 houses, it will become as busy as a motorway, or a standstill log jam during school and rush hour times. But the whole area round Tudeley, Five Oak Green, Paddock Wood, and all the surrounding areas will become unbearable. The pollution will cause real problems to most of us, and getting anywhere fast will become a distant memory. This small rural area served by narrow country lanes will not be able to cope with the vast increase of traffic.

With the building of houses, and quarrying in the area, the roads will constantly have not only cars, but never ending lorries and heavy machinery traversing all of the narrow roads in the area. The vibrations of heavy vehicles literally make my house shake – my house has no solid foundations and I worry that consistent and increased heavy vehicles will cause physical damage to my property.

TWBC are suggesting cycle lanes. This is honestly the most ridiculous dream they have come up with yet. To cycle from Five Oak Green to Tonbridge or Paddock Wood is approximately 5 miles. Do they seriously think that a commuter is going to do this at 7am or 7pm, in the winter, in the dark and the cold? Or that a parent, taking their young children to school is going to do this? Or even a teenager going to school, with all their books and games kit? Or builders going to work with all their kit in the back of their vans? I actually can't think of a single category of people who will hop on their bikes to go anywhere. Even a fit middle aged person is not going to do this, to go and get their weekly shop from the supermarket. In percentage terms of people deciding to opt for the 'Green' option of cycling, I should imagine it would be less than 1%. So in reality, as well as all the construction vehicles, using our country lanes for the next 15 years, there will also be all the cars from 2,800 new homes. That's approximately 6,000 extra cars, using the few small roads, that will all converge into Tonbridge, Paddock Wood or a few to T.Wells.

Noise and air pollution

As noted above, with regards to traffic, the local neighbourhood will have to endure 15 years of heavy vehicles, machinery and building works. The noise from all this will be horrendous, plus all the dust and the dirt. This isn't just a few houses, over a year, being built on Brown Field sites – this will be years and years of industrial destruction and pollution.

Wildlife and Nature

We are so lucky to be surrounded by a diverse selection of protected wildlife, flora and fauna – birds and animals, reptiles, ancient and mature woodland to name but a few. These precious and irreplaceable assets form the very essence of our rural community. The wildlife and heritage landscape will be changed and eradicated for evermore, the whole area will be concreted over. It is so important to keep the balance of nature, and this will be totally destroyed. Our whole planet is being destroyed by humanity, and I, and millions of others, are trying desperately to give nature a fighting chance. This should be a top priority, not only in our area, but worldwide.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Mr N Parmar
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
AL/RTW 6	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- Loss of bio-diversity
- Trees are protected and I cannot see how they would not be effected by the build
- Other plans have been rejected before and some on a much smaller scale
- The area would be over populated and density os already very high
- The main road is already very busy and any additional traffic would be unbearable to local residents making life very unpleasant from a health and noise point of view
- Danger to proposed site access from the main road, the corner is a blind corner
- The proposal is too large and not in keeping with the area, the building would be a fire trap
- Not integrated with the local surroundings and building styles
- Overflow of traffic in an already heavily populated car area
- Increase in population would have a devastating impact on the natural environment
- Danger to children as the road already has a speeding problem with cars
- Loss of privacy as the build will over look into properties
- Noise increased by excess people in proposed building

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I do not believe there should be any modifications as it simply shouldn't go ahead

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I'm trying to protect a much loved area by its local residents becoming over populated and the danger of (what I see) is a building built solely for monetary gains which will be a very unpleasant place for the proposed residents to live in.

The build is wholly inncorrect and must be opposed

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

N/A

I object to "The Strategy for Paddock Wood including land at East Capel" (Policy STR/SS 1).

The land proposed to be developed is in the Green Belt and should only be built upon if "exceptional circumstances" exist, what are these? Utilising this green belt will effectively create an urban sprawl from Paddock Wood with Five Oak Green, something the greenbelt designation is designated to prevent and with the proposed development in Tudeley will effectively join Paddock Wood with Tonbridge, a huge urban sprawl. The land is on a recognised flood plain, building here, even with flood risk mitigation and "betterment", of which there are no details, could have disastrous consequences. The measures being looked at in theoretical terms are apparently based on old out of date data that does not fully consider the up to date information and the additional impact of climate change.

There are many important listed heritage assets such as Badsell Manor for one example, which should be protected along with their setting. The proposed development at East Capel will surround this one important asset along with many typical rural Kentish farmsteads located within the proposed area of development and beyond. No amount of mitigation can replace this important rural landscape.

Being a rural area, East Capel is blessed with a diverse and important list of birds and wildlife, many on the European red list of protected species and some endangered such as Bats, Great Crested Newts, Turtle Doves and field nesting birds such as Skylarks, Linnets and Yellowhammers. This legacy cannot be just brushed aside by statements that they will be relocated to somewhere else, this is wishful thinking and a complete fantasy. The birds and wildlife will just decline in numbers and finally disappear into extinction. Hedgerows will disappear leaving a barren and lifeless "man made" landscape devoid of wildlife, is this something planners will be proud to leave as a legacy for the future? Putting bird and bat boxes on houses, leaving some green spaces and other fanciful "conservation measures" in place, is only paying lip service to biodiversity net gain. Moreover the cumulative effect of this proposal, the proposed development at Tudeley and the gravel extraction plans at Stonecastle and Moat Farms will have a devastating overall destruction of a rural parish, effectively changing it into an ugly urban landscape.

The Leader of the Council, in his forward to the PSLP, states " the Council feels that it has got the overall balance right".....????? What sort of scales are they using when they propose to dump more than 50% of the apparent housing need in Capel parish which currently comprises 2% of the borough population, please explain the logic.

In summary, this proposed part of the Pre-Submission Local Plan has been ill thought through, in indecent haste without any regard to the needs or comments of the community of Capel. There are other alternatives that should have been given the same due consideration, but the so called responsible

Officers of the Council hastily “nodded through” this unacceptable plan. The process of community engagement and consultation, Reg18, resulted in an unprecedented number of responses which have been totally ignored in this latest iteration of the Local Plan. No exhibitions or public consultations have taken place due to the Covid pandemic, only online “tick box” information cards masquerading as the “public consultation” process. Furthermore, council elections took place in the middle of this whole Reg19 process and as a result the composition of the Council has radically changed mid way, how can this be democratic? Lastly, the whole formal process of responding to the Reg19 consultation has been made extremely difficult, particularly to many elderly people within our parish without access to the Internet. How can this be a fair process for this

life changing proposal.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I wish to strongly object to "Strategy for Tudeley Village" (Policy STR/SS 3)

I have lived in the small hamlet of Tudeley with my wife for 35 years and we have two married grown up children who live locally with their families.

As senior citizens unfamiliar with planning policies and planning law and further overwhelmed by the sheer number of "planning speak" documents issued by TWBC for their Pre-Submission Local Plan Reg19 consultation, we find it very difficult to comment on the technicalities of the Plan. However anyone with any degree of common sense at all can see that this gross plan to dump 2,800 new houses along with the necessary infrastructures and civic amenities in a heritage rich greenbelt farming rural landscape is unsustainable, irresponsible, unviable and quite simply madness.

I believe an isolated so-called "garden settlement" vanity plan at Tudeley by the arrogant landowner, to build 2,800 dwellings is inappropriate and does not follow the principles of garden settlements defined by the Government as the settlement will be divided in two by the main line London/Dover railway line. Furthermore this proposed isolated settlement would significantly increase traffic flow into Tonbridge along the B2017, exacerbating the current extreme traffic congestion that exists on this road every morning and evening. This additional traffic will cause increased levels of air and noise pollution as the residents of this new settlement will want to use their private vehicles for the convenience of getting into their nearest town of Tonbridge, even with a proposed public transport bus link. People will not give up the independence of a private car.....fact.

Local housing need in Capel does not require 2,800 new houses therefore the majority of this new development would inevitably be taken up by people being drawn into the area, effectively becoming a heartless isolated commuter settlement. Many of these people will want to travel to London by trains which are already at capacity. I therefore consider this proposal to build a new isolated settlement on the Tudeley site to be unsustainable as it has no tangible transport hub, connectivity infrastructure or basic utilities such as sewerage treatment, water or electricity, nor any outline details of how this might be achieved. Furthermore, it has been reported that in the year ending 2020 there were almost 500 empty properties within the TW borough, an increase of nearly 50% above the 2019 figure. Why are these properties not occupied if there is a housing shortage? The Leader of the Council, in his forward to the PSLP, states "the Council feels that it has got the overall balance right".....????? What sort of scales are they using when they propose to dump more than 50% of the apparent housing need in Capel parish which currently comprises 2% of the borough population, please explain the logic.

Destroying valuable good quality grade 2 and 3 food producing agricultural farmland located in the middle of the Green Belt is reckless and irresponsible in the extreme and must never be allowed under any circumstances. In fact I understand that the Government requires there to be "exceptional

circumstances” before green belt can be considered for development, where are these “exceptional circumstances”???. By allowing this vanity project to go ahead it will deprive our future generations of this valuable and irreplaceable asset forever. Additionally, we must protect productive agricultural land to provide our food, and we also need precious green spaces for our well-being both physically and mentally as has been proven during the current Covid pandemic. Why destroy this important precious rural asset just because it is an easy planning option for the council planners based purely on one greedy landowner who is willing to sacrifice his privileged heritage purely for financial gain.

At this stage there are no proposals whatsoever being put forward by the Hadlow Estate for comment on infrastructure for roads, sewerage, water, electrical supply, etc. All very “finger in the air” strategy which we are constantly being told is normal at this stage of the planning process and will be sorted out later with a Masterplan. Yet other parts of the Borough would appear to have more details available for comment and already have much of the necessary infrastructure in place. The Tudeley site is a suspiciously late addition to this Local Plan process, being the easy option for a massive disproportionate portion of the apparent local housing need. TWBC planning department have passed on the complete design and development of this site to an inexperienced landowner (Hadlow Estate) with no apparent input or coordination with the other site in East Capel or the surrounding areas. There are numerous Brownfield and alternative sites within the Borough, including the urban regeneration of the town centre, which have been totally ignored but these are not so profitable for developers or land owners.
DEVELOPERS RULE?????

The Police, Fire and Ambulance services are already at capacity and often overstretched so the proposed creation of a large new town will only make this situation even worse. Furthermore, health and dental services within the area, to accommodate the possible additional 9,000 to 10,000 extra people, will be passed on to the adjoining Tonbridge and Malling Borough council, I am sure they will be very unhappy with this additional burden.

FACT...climate change is occurring and the introduction of 2,800 new houses and the necessary additional infrastructure and civic amenities, will add to this global catastrophe. By adding more carbon emitting sources and reducing the carbon sequestration of the land and associated flora and fauna will only exacerbate the situation. TWBC have signed up to be carbon neutral by 2030, how???. Additionally, much of Tudeley is located on a floodplain with risk assessments apparently based on old and out of date data; locating houses on or near a floodplain is irresponsible and deceitful as new unsuspecting homeowners will never get insured against flooding.

Due to the openness and topography of the area, the proposed dumping of 2,800 houses into this landscape, will destroy this beautiful and historic part of our Borough, including AONB setting, heritage sites, listed buildings and the many traditional ancient Kentish farmsteads. All Saints Church in Tudeley is the only church in the World to be the proud custodians of all stained glass windows designed by the renowned Russian artist Marc Chagall. These were commissioned by the Goldsmid family, owners of the Hadlow Estate, in tribute to their daughter who died in a tragic boating accident, and is buried in the family cemetery. People visit from all over the world to view these amazing windows and enjoy the wonderful views across the Kent countryside which inspired Chagall to undertake this commission in the first place.

No-one would want to view a housing development bordering the church graveyard. Furthermore the landscape has survived by successive farming over centuries to remain as northwest Europe's most intact medieval landscape, yet another important heritage asset to preserve for our future generations to cherish, protect and enjoy.

Being a rural area, Tudeley is blessed with a diverse and important list of birds and wildlife, many on the European red list of protected species and some endangered such as Bats, Great Crested Newts, Turtle Doves and field nesting birds such as Skylarks, Linnets and Yellowhammers. This legacy cannot be just brushed aside by statements that they will be relocated to somewhere else, this is wishful

thinking and a complete fantasy. The birds and wildlife will just decline in numbers and finally disappear into extinction. Ancient and established woodlands, currently located within farmland, will be surrounded by housing developments, a most unnatural environment which is surely going to affect the health of these important arboreal assets. Hedgerows will disappear leaving a barren and lifeless “man made” landscape devoid of wildlife, is this something planners will be proud to leave as a legacy for the future? Putting bird and bat boxes on houses, leaving some green spaces and other fanciful “conservation measures” in place, is only paying lip service to biodiversity net gain.

In summary, this proposed new town plan has been ill thought through, in indecent haste without any regard to the needs or comments of the community of Capel. There are other alternatives that should have been given the same due consideration, but the so called responsible Officers of the Council hastily “nodded through” this unacceptable plan cooked up between the TWBC planning department and a greedy landowner. The process of community engagement and consultation, Reg18, resulted in an unprecedented number of responses which have been totally ignored in this latest iteration of the Local Plan. No exhibitions or public consultations have taken place due to the Covid pandemic, only online “tick box” information cards masquerading as the “public consultation” process. Furthermore, council elections took place in the middle of this whole Reg19 process and as a result the composition of the Council has radically changed mid way, how can this be democratic? Lastly, the whole formal process of responding to the Reg19 consultation has been made extremely difficult, particularly to many elderly people within our parish without access to the Internet. How can this be a fair process for this life changing proposal?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Version	0.1
Question 1	
Respondent's Name and/or Organisation	Alec Pelmore
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I think this is the wrong development plan in the wrong location - specifically the local impact on the neighbouring villages will be immense:

Impact on traffic. I live on Hartlake Road (which runs north from Tudeley) which is very narrow in places; has two bridges one of which is very narrow; and in several places runs between ditches on both sides. It is a key cut-through for traffic on the A26 looking to get round the Cannon Way route round Tonbridge at peak times; and also takes a lot of traffic delivering children to the Somerhill schools. Thus at peak times (7.45 to 9.00 in the morning, 4.15 to 5.30 in the evening) it is extremely busy with traffic driving too fast for the hazards – we often see cars on their sides in the ditches and I spend my time picking up broken wing mirrors when I go litter-picking. In addition, cars parked on the side of the road when the Poacher is busy bring an extra hazard. The impact of the planned extra houses in Tudeley will almost certainly result in a major increase in this traffic and it will become more dangerous. The developers/council may respond that they will just close Hartlake Road which of course would seriously inconvenience locals, The bridge is the only crossing point of the river between Cannon lane and Branbridges some 10km - it would mean I would need to drive 10km to get to my neighbours!

the site should be in the AONB. The lines for the AONB were drawn rather arbitrarily and the land is only just outside the line. If you go east along Crockhurst Street past the Turner Gold and look north you will see one of the finest vistas of natural beauty in Kent; as worthy of AONB designation as anywhere in the county.

Impact on Tonbridge. The traffic in Tonbridge and the pressure at the moment on Tonbridge station and the railway are at bursting point. The planned extra housing will have a dramatic impact on this . Extensive Infrastructure in Tonbridge should be put in place and paid for by the developers before any housing development starts.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I see no problem with some small-scale in-fill development around Tudeley, but the scale of the plan is just too large.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

This is the formal response from the Pembury Neighbourhood Plan Steering Group to the consultation on the Pre-Submission (Regulation 19) Tunbridge Wells Local Plan.

The comments relate to site AL/PE3, for which there are three concerns. Two concerns relate to how the site has been assessed:

- 1 Value of the western half of the site to the community of Pembury as an area of open space;
- 2 The detrimental impact development on the eastern part of the site would have on local character and the Area of Outstanding Natural Beauty.

The third is a concern about the way in which comments received on the Draft Plan have been considered, in terms of housing numbers within Pembury:

- 1 The significant uplift in housing numbers for Pembury parish since the draft Plan.
- The Steering Group consider that Site AL/PE3 should not be developed. However if unavoidable, the developable area should be significantly reduced to take account of the concerns raised.

About the Pembury Neighbourhood Plan Steering Group

The Steering Group, comprising both local councillors and volunteers from the local community, was established by the Parish Council in July 2020 to oversee the development of a Neighbourhood Plan for Pembury. To date, it has set up a series of Working Groups, comprising volunteers, who have been exploring issues facing the parish relating to housing, character and design, green spaces and the environment, the local economy, community facilities and local transport. A community survey was undertaken in December 2020 seeking views on the most pressing issues for those living in Pembury.

In addition, the Steering Group has commissioned AECOM to undertake a Design Guidance and Masterplanning exercise, focussing in particular on sites along the A21 that are proposed for allocation in the emerging Local Plan. The findings of this work to date has formed the basis of this response.

Our response focuses in particular on site AL/PE3 (Land south and west of Hastings Road), which has attracted a great deal of debate locally.

Wider concerns are considered to be captured within the response submitted by Pembury Parish Council, which is fully supported by the Neighbourhood Plan Steering Group.

Policy AL/3: Land north of the A21, south and west of Hastings Road

The site has been assessed by the local authority as suitable for development to accommodate approximately 90 dwellings, subject to the findings of additional assessments including on statutory infrastructure, transport, landscape, topography and visual impact.

The Steering Group considers that the assessments of the site to date have not fully considered particular aspects that could impact its suitability for allocation in the Pre-Submission Plan. These aspects relate to the use of the site by the community as an open space and the negative impact development would have on the character and amenity of the village and the wider Area of Outstanding Natural Beauty.

Further details are set out below:

1. Value of the western half of the site to the community of Pembury as an area of open space

The Neighbourhood Plan process has revealed the considerable significance of the site to the local community as an accessible open space.

The site – particularly the **western** part nearest to the footpath - is extremely well-used by local people for informal recreation including walking and dog-walking, sledging (in winter), and free, creative play for children. This has been the case for many years. There is a public right of way on the western side of the site (WT237) and informal paths around the edge, the use of which has increased considerably as a result of the Covid-19 pandemic, demonstrated by footfall counts and local observations.

The site, particularly towards the southern (east and west) end, is elevated and is the only area of open space within the village where the sunrise and sunset can be seen from one place, with sweeping east-west views across the High Weald. It is appreciated that this use is one of custom but for the other issues discussed below should be considered as protected by designation.

The site is also valued for its health and well-being purposes. Indeed the Government's 25 Year Environment Plan[1] sets out the value of accessible green within communities: "Spending time in the natural environment – as a resident or a visitor – improves our mental health and feelings of wellbeing. It can reduce stress, fatigue, anxiety and depression. It can help boost immune systems, encourage physical activity and may reduce the risk of chronic diseases such as asthma. It can combat loneliness and bind communities together".

The Sustainability Appraisal prepared to support the Pre-Submission Plan considered that development of the site would have a neutral effect on health and well-being; this is disputed in light of the information provided above and in light of the Pre-Submission Plan's overview, which acknowledges the lack of sufficient open space, sport and recreation provision within Pembury. This is particularly important in light of the fact that the Borough Council has not yet adopted the community infrastructure levy, which would have enabled the Parish Council to prioritise expenditure on facilities considered important locally. In the absence of this, there is no guarantee that section 106 monies will either be spent locally or that the community will be able to influence how it is spent.

Whilst public use was not mentioned in relation to this site specifically in the Parish Council's earlier response to the Draft Plan, the need to retain public access was included as a general point relating to all the sites. Since then, however, it has become obvious through observations, replies to local surveys, footpath counts and discussions with the community that many people regularly use and value the land at this location for the purposes of informal recreation. Indeed the opportunity presented by national planning policy to designate local green spaces has led to this part of the site being cited on numerous occasions as a potential candidate for the neighbourhood plan.

The Steering Group are concerned that the contribution of the site to local recreation and amenity was not adequately assessed as part of the site assessment process. Loss of public access to the site - would be sorely felt by the existing and future residents of Pembury.

2. The detrimental impact development on the eastern part of the site would have on local character and the Area of Outstanding Natural Beauty

To inform the policies of the emerging neighbourhood plan, the Steering Group has commissioned AECOM to undertake work to establish principles for design within Pembury, to reflect local character.

Part of this includes reviewing the proposals for site allocations AL/PE1 to 3, and developing masterplanning, which can inform both the emerging Local Plan and discussions with the site promoters.

The work is being undertaken by a small team headed by Luis Juarez PhD, a principal urban designer with AECOM-URS. His areas of expertise are masterplanning, urban design and design coding, with experience of major regeneration schemes across the UK.

[1] First review of 25 Year Environment Plan published - GOV.UK (www.gov.uk)

Having visited the sites, the AECOM team have suggested that, from a design and land-use perspective, the **eastern** part of the site should be considered as unsuitable for development because of the impact development here would have both on the AONB and the character of Pembury. The topography of the site in particular is such that development in this section of the site would be very visible and would negatively impact the AONB.

From observation, it is close to 4 to 5 metres higher than the road level, making the developable area of the site quite visible and exposed. The advice to the Steering Group is that it would be very difficult to minimise this by planting alone, as suggested in Policy AL/PE3. Development on this higher ground would also negatively impact the scale and privacy of the existing houses located lower down on the northern part of Hastings Road.

Furthermore, the advice provided suggests that services and utilities would also be difficult to install given the site's topography. Surface water flooding is already an issue in Pembury and there have been reports of drainage issues in this part of the village.

Finally, pockets of high road noise were recorded within the site assessment for AL/PE3; the eastern part of the site is located closest to the A21 junction with the Henwood Green Road/Hastings Road where noise is likely to be particularly high.

3. The significant uplift in housing numbers for Pembury parish since the draft Plan

The Pre-Submission Local Plan has provided a significant uplift in housing allocations within Pembury, when compared with the previous draft Plan: 389-471 new dwellings (Regulation 19) compared to 294-304 dwellings (Regulation 18), as shown below. The columns on the left shows the proposed allocations included in the Draft Local Plan (2018) and the columns on the right show the proposed allocations in the Pre-Submission Plan (2019). There is some cross

[TWBC: for table, please see full representation attached as a supporting document]

This constitutes an uplift in dwelling numbers since the previous consultation of between 32% and 55%. The Steering Group question the justification for this. In addition to this, the hospital's proposal for residential training units is in planning discussion now, so could add further dwellings.

Given the overall uplift in housing numbers attributed to Pembury, and for the reasons noted above, the Steering Group would consider site AL/PE3 unsuitable for development.

The Steering Group would be grateful for these comments to be considered by the Borough Council and is also in contact with the site promoter to discuss the emerging neighbourhood plan and how it might impact the site. The very purpose of the neighbourhood plan process is to offer the local community a greater say in the way their community evolves and develops, and it is hoped that their views thus far will be carefully considered.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is acknowledged that any reduction of housing proposed at AL/PE3 may need to be addressed elsewhere in the Plan. The Steering Group, consider that this could be achieved in one of three ways:

Option 1: Identifying alternative sites elsewhere in the Borough, where the housing numbers could be redistributed: This would chime with the Parish Council's response, which underlined the size of and impact of the proposed target for new housing on this Parish, and has expressed the concerns set out above in respect of site AL/PE3.

Option 2: Redistributing the housing allocation to other sites in Pembury - for instance by enabling denser development, where this does not compromise local character, provision of green space and amenity. This could be beneficial in ensuring that a mix of housing is developed within Pembury, to include more affordable homes suited to young couples and families, homes suited to those wishing to down-size, in addition to larger family homes. The need for such a mix has been demonstrated through the neighbourhood plan engagement process to date.

Option 3: Restricting development to the western side of the site AL/PE3: This would retain the sensitive eastern field as open space, which could be offered as community use, to acknowledge the existing use (albeit currently on the western side). Dwellings would need to be sympathetic to local character and amenity in terms of design, height and massing. They would also need to deliver a housing mix to address local housing needs. The community would wish to be involved in this process, for instance using the neighbourhood plan as the vehicle to do so. The provision of cycle access, as set out in the Pre-Submission Plan, would be achievable, linking the space to the other sites proposed along the A21. The tree buffer along the eastern side is very thin along Hastings Road here would need to be improved.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Pembury Neighbourhood Plan Steering Group would like to participate in the hearing sessions relating to Pembury. Work on the neighbourhood plan is evolving and we would welcome the opportunity to input into discussions relating to Pembury to:

(a) ensure that evidence collected at the very local level – that may not have been gathered at the strategic level - is considered by the Examiner. This is particularly important, particularly in relation to discussions on the sites, as demonstrated by our submission above, and is a key benefit of the neighbourhood plan process; and

(b) to keep abreast of discussions that will be relevant to our neighbourhood plan, as we seek to synchronise it with the emerging strategic policies of the Local Plan.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1458 Pembury Neighbourhood Plan Steering Group Representation.pdf](#)

On behalf of Pembury Parish Council, I write to register its formal response to the Draft Pre-Submission Local Plan ('The Plan'). This response largely follows the text of our comprehensive response to the earlier Draft Local Plan; however, we have made changes where we feel it is appropriate:

Strategy for Pembury Parish – Policy PSTR/PE1

1 Housing

We do not agree with the proposed target of 254-264 new private dwellings, which we still feel is somewhat excessive for our village. 90% of development falls within the Metropolitan Green Belt (MGB) which, if lost cannot be replaced elsewhere within our parish. TWBC also do not propose to replace lost MGB elsewhere in the borough which we strongly object to. We do not readily accept that 'Exceptional Circumstances' exist to warrant loss of so much irreplaceable MGB which the borough should be seeking to protect not sacrifice.

89% of development within Pembury falls within the High Weald Area of Outstanding Natural Beauty (AONB) and is contrary to the aims of the AONB designation. It is essential that developments on allocated sites previously in the MGB/AONB should be developed in line with adopted High Weald AONB Beauty Design Guide with housing densities appropriate for MGB/AONB land.

We would not want to see any significant number of houses being built without the essential infrastructure (see (2) below) being in place first.

For all of the allocated sites to be developed for housing, we would want Affordable Housing targets met (% as indicated by TWBC in The Plan) and conditions to ensure that those with a strong connection to Pembury are given a high priority.

The embryonic Neighbourhood Development Plan (NDP) for Pembury will focus on such important issues as housing design and master planning for the relevant allocated sites.

Whilst the Parish Council (also the NDP) have no intention of suggesting additional or alternative sites for allocation, in future we would wish to see brownfield sites in the borough given preference over sites in MGB/AONB for housing development.

1 Infrastructure

Our overriding concern, shared by many residents, is that Pembury already suffers from an infrastructure deficit, such that if some or all of the proposed sites were developed, Pembury would be unable to cope. Such infrastructure shortfalls need to be fully assessed in advance, and resources found to remedy them.

These are the main infrastructure issues:

2.1. Roads and Traffic

We would remind you that in TWBC's Core Strategy Site Allocations Local Plan (July 2016), policy TP4 states: "Proposals will be permitted provided (inter alia) the road hierarchy and the function of routes have adequate capacity to cater for the traffic generated, and the traffic generated by the proposal does not compromise the safe and free flow of traffic or the safe use of the road by others".

We would welcome the proposed A228 Colts Hill relief road if built, and the highway improvements 'along the A228/A264 junctions, including junction capacity improvements at Woodsgate Corner, and a roundabout at Pembury Road/Halls Hole Road/Blackhurst Lane'. Nevertheless, we remain concerned about the ability of the local road system to cope with the extra traffic generated by developments at Pembury, plus those very significant developments proposed at Capel and Paddock Wood.

The Draft Pre-Submission Local Plan for Capel and Paddock Wood includes the provision of over 6,000 new homes, employment, social and physical infrastructure (such as schools and health facilities) and retail development in Paddock Wood centre. These proposals seem destined to have very significant implications for transport along the A264, A228 corridor between Tunbridge Wells, Pembury and Paddock Wood. Additional homes in Pembury, focused behind the High Street and Hastings Road, will further exacerbate the problem.

The National Planning Policy Framework (NPPF) (February 2019) seeks to "promote sustainable transport and patterns of movements, streets, parking and other transport considerations are integral to the design of schemes and contribute to making high quality places" and the Parish Council does not believe that The Plan will deliver this requirement.

The A264 Pembury Road already suffers from severe traffic congestion at any time throughout the day, causing knock-on traffic problems for roads such as Pembury High Street, Cornford Lane and both the A21 and A228. Pembury Road traffic congestion (with its associated pollution) needs to be properly addressed (e.g. by the afore-mentioned Woodsgate Corner improvements and Pembury Road roundabout in lieu of Halls Hole Road traffic lights) before there are any new major developments in Pembury.

Extra traffic within Pembury will potentially impact on the safety of road users and pedestrians. We would like there to be well executed traffic calming measures, including official 20 mph speed restrictions by the Primary School, possibly extended throughout Pembury.

We would dispute that there is capacity for the additional traffic generated by over 250 new homes in this area. The existing road network currently compromises the safe and free flow of traffic and therefore the additional traffic movements caused by the new homes will only make the situation worse.

The junction of Hastings Road and the A21 at Bo Peep Corner is a notorious accident blackspot. Insufficient signage for the entrance at the junction may have played a part in the recent fatality after a road traffic accident. Speeding vehicles through the village are a regular occurrence. Additional houses here will compromise road safety to an unacceptable level.

Problems on the A21 inevitably lead to rat-running through the country lanes in and around Pembury such as Kings Toll Road and Romford Road. The current problems experienced here will get significantly worse as a result of the proposed developments and mitigation must be put in place to address this problem.

We note that the possible full route of the Colts Hill Bypass would, if built, join the existing A228 at the junction with Maidstone Road to the north of Pembury village. The cumulative effect of traffic generated from Colts Hill to the A21 from the large, proposed developments in Capel and Paddock Wood and elsewhere needs to be modelled to show the impact on the A21 junctions and Woodsgate Corner before we can comment further.

The Parish Council remains concerned about the ability of ambulances to safely negotiate around congestion at Woodsgate Corner and the A21 slip roads with such significant amount of development

proposed. The hospital has major Accident and Emergency and Trauma units for a wide geographical area and access must be maintained at all times.

2.2. Air Pollution

Most of the proposed housing (*sites PE1, 2, 3, also PE6) will back on to the A21 and be affected more with poorer air quality than existing houses. It is also likely that increased traffic from the additional development in Pembury, Capel and Paddock Wood will lead to increased air pollution. Stationary traffic at Woodsgate Corner will also contribute to the problem. The Parish Council request that current base line air quality is assessed (in post lockdown normal times for accuracy), particularly at Woodsgate Corner and along the A21, in order to monitor the air quality in future.

*These sites are also likely to be affected by noise pollution mainly emanating from the A21, such that environmentally friendly buffer zones should be incorporated in order to mitigate this as far as possible.

2.3. Parking

There is currently a dire shortage of on/off-street car parking available within Pembury, which discourages people from being able to make use of various outlets so trade is affected. Any new housing developments should provide sufficient car parking for their new occupiers which should comply with or, preferably, exceed the Kent Design Guide Interim Guidance Note 3. Pembury is a rural village and residents rely on their cars.

We would like to see additional parking created near the Village Hall (site PE1 suggests up to 30 spaces, but this may not be enough for future demand) and at the Hospital* as overspill parking from both sites currently creates significant problems on Pembury High Street and adjacent roads. (*We note the current undetermined application for a training building alongside the Hospital if, as it appears, there is insufficient parking, will only exacerbate parking problems in the vicinity of the hospital).

2.4. Medical Facilities

An inevitable consequence of so many extra households (plus all the residents who will occupy the proposed care type homes) would be additional pressure on the already limited local medical resources. We are concerned that there has not been enough research in regard to the number of new patients generated and what extra medical facilities will be needed. We hear complaints from residents about the difficulties of booking an appointment at present. We surmise that our GPs will need to extend their current surgery by two or three consultation rooms and associated additional staffing requirements, all of which will require extra funding.

The Hospital struggles to service West Kent's swelling populace and demand may accelerate unsustainably when one factors in the effect of the Capel and Paddock Wood developments. Current waiting times are at unacceptable levels, not helped of course by the Covid pandemic.

The most recent Care Quality Commission (CQC) report published in March 2018 states that "from August 2016 to July 2017 the trust reported 364 "black breaches" (at Tunbridge Wells Hospital), with an upward trend over the period. A black breach is said to have occurred when the emergency department is unable to take over the care of a patient and release the ambulance crew to attend other jobs within 60 minutes of their arrival. It goes without saying that the hospital will require significant investment into the expansion to cope with the increased population.

2.5. Schooling

Pembury's Primary School should be consulted to ensure they can cope with the growth in population proposed and that their needs are met. Any increase in pupil numbers will have a negative impact on road safety, and parking and mitigation measures are required. The proximity of the school to the junction from Church Road onto Maidstone Road is also a concern especially as the proposed development (PE4) at Downingbury Farm would be accessed via Church Road.

2.6. Public Transport

Local bus services are insufficient to encourage less car usage in a rural village. They need to be more frequent, with better services to run later into the evening. Existing services stop before 7pm Monday to Saturday and by 4pm on a Sunday when there is a greatly reduced service.

2.7. Sewerage

We are concerned (as are local residents) that the large number of houses planned for sites PE1, PE2 and PE3 could overstretch Pembury's existing sewerage system which has already shown some signs

of strain. Also, development of site PE4 could exacerbate the sewerage problems already existent in the lower part of the village.

Additionally, there have been concerns expressed about surface water drainage issues, particularly at site PE3 which is difficult to drain. It is therefore essential that in-depth assessments of required sewerage and drainage capacity is carried out prior to development commencing, and if there is a deficit in the current systems this will need to be addressed.

2.8. Retail

As stated in our response to the Draft Local Plan, it is imperative that Pembury retains its local supermarket at Woodgate Corner; there was much concern about its future should the motor village proposal have progressed.

2.9. Cycling

We note favourably the proposal for an east-west cycle route through allocated sites PE1, PE2 and PE3, with safe access and egress with regard to junctions with the road system.

2.10 Sport and Recreation

The Parish Council is particularly concerned at the suggestion that Section 106 contributions from Pembury would be diverted to the mooted Hawkenbury Sports Hub and other recreation and play areas on the site. Both the Parish Council and Pembury Athletic Youth Football Club (PAYFC) consider this site would be unreasonably difficult for Pembury children to access as it is located on the opposite side of Tunbridge Wells.

PAYFC have previously commented on the problems that would occur. Every route that children could use to travel to the sports hub and recreation grounds is notoriously congested. The A264 into Tunbridge Wells, Halls Hole Road, and Cornford Lane, which is a narrow, often single-track, rural lane renowned as a rat-run, are most likely to be made worse by the significant development proposed in this part of the borough. Therefore, contributions for sports and recreation provision for Pembury residents should ideally focus on Pembury itself.

The Plan's Overview acknowledges the lack of sufficient open space, sport and recreation provision within Pembury. It is vital that the Borough addresses these issues bearing in mind the extra demand from new residents living in the village as a result of the proposed developments. (See comments below about loss of open space in site PE3)

2.11 Environmental issues

The Parish Council want TWBC to pay high regard to measures to mitigate against the Climate Emergency in their Local Plan. The NPPF requires that the planning system should "support the transition to a low carbon future" and "contribute to radical reductions in greenhouse gas emissions". All development should be required to support this aim.

1 **Section 106 Contributions**

We completely support the principle of developers being required to mitigate the impact of their developments by making appropriate Section 106 contributions. The Parish Council consider that developers should be obliged to make a contribution rather than this be an expectation. We are also concerned that developers will try to avoid many contributions due to "lack of viability".

As so much of the development is proposed in this part of the borough, Pembury Parish Council believe that the majority of Section 106 contributions should be focused within our parish to mitigate against the development.

For such developments that might proceed within Pembury, we would particularly want to include the following as beneficiaries of Section 106 contributions:

3.1 Highways Improvements particularly at the A21 junctions, Woodgate Corner and Bo Peep Corner; improvements to cycle routes and speed reduction initiatives **within Pembury**.

3.2 Primary School Education

3.3 Contribution for Secondary School education

3.4 Health and medical facilities

3.5 Provision of amenity/natural green spaces; children's and youth play spaces **within Pembury**

3.6 Improvements to public woodlands **within Pembury**

3.7 Improvements to public transport provision

3.8 Improved sports and recreation facilities **within Pembury**.

1 Allocated Sites

Taking each allocated site in turn, our updated comments are as follows:

4.1. AL/PE1 Land Rear of Pembury High Street

The main problem here is determining the most appropriate access to Pembury High Street. There had previously been a suggestion that this could be via the narrow driveway to the Village Hall (in combination with no. 51 High Street), we would reiterate that the Parish own that existing driveway and would not consider allowing vehicle access along it to the land behind on safety grounds.) We note that the Site Layout Plan now shows an indicative vehicle access point at 55 High Street, this being the Parish's preferred access point, but it is understandable that the precise location needs to be informed by a traffic assessment.

We are pleased that the site now has additional parking provision of c.30 spaces, but would prefer more to satisfy future demand, to serve the village hall and wider public, with separate pedestrian access to the High Street. We also favourably note that the proposed density of housing has been reduced and that an east-west cycle route is proposed, which we regard as essential.

Nevertheless, we still regret the loss of MGB and development in the AONB and retain significant concerns about the impact onto the existing road network.

4.2. AL/PE2 Land at Hubbles Farm

Again, the suggested access point is problematic as it is opposite Belfield Road which is a dangerous junction. The sight lines are not good and egress from the site to the narrow Hastings Road is dangerous.

We strongly support the intention that land is to be safeguarded for an extension of the cemetery. We favourably note the small reduction of the proposed housing density and that, if feasible, an east-west cycle route is proposed.

As before we regret the loss of MGB and development in the AONB and retain significant concerns about the impact onto the existing road network.

4.3. AL/PE3 Land south and west of Hastings Road

It is still not clear where the access point would be, but as previously stated it seems imperative that the A21 junction (with Hastings Road and Henwood Green Road) is completely remodelled to allow for safe egress and access of the proposed development site.

We favourably note the small reduction of the proposed housing density and that, if feasible, an east-west cycle route is proposed. The Site Layout Plan seems to show a proposed open space and landscape buffer. We would want this area safeguarded given that at present the majority of the land has for many years been informally used for recreation by the local community.

We regret the loss of MGB and development in the AONB, moreover any significant loss of open space amenity would be unacceptable.

4.4. AL/PE4 Land at Downingbury Farm

We favourably note that there is no longer any business use proposed on the site, replaced by the safeguarding of some MGB land for possible future expansion of the Hospice.

There are still concerns that the residential dwellings would be accessed off Church Road. The precise access point will need to be chosen carefully.

4.5. AL/PE5 Land at Sturgeons

Given that planning permission has already been granted for housing on this site, with work seemingly about to start, we make no further comment.

4.6. AL/PE6 Woodsgate Corner

Bearing in mind the overwhelming public and Pembury Parish Council opposition to the original proposed use of this site for a huge car showroom and workshop complex, we were naturally delighted when TWBC refused the associated planning application.

We reluctantly accept that the site will not remain undeveloped and that there does not appear to be an economic case for part of the site to be used for Park and Ride. In this circumstance the proposed allocation for specialist housing for older people and others with care needs is definitely preferable. Even so, we have some concerns about traffic generation in an already congested area, so it is essential that the conclusions of the proposed traffic assessment should be taken into account when determining suitable mitigation measures for the transport network.

4.7 AL/PE7 Land at Cornford Court

Given that planning permission has already been granted (albeit no work yet commenced), we make no comment beyond recording that we objected to the application.

4.8 AL/PE8 Owlsnest, Tonbridge Road

Given that planning permission has already been granted, we make no comment.

1 **In Conclusion**

Whilst we understand that TWBC is in a difficult position trying to allocate sites to match arbitrary Government imposed targets for housing, we do not wish to see Pembury's fragile infrastructure overwhelmed by an unsustainable, excessive allocation of housing.

We resent the significant loss of irreplaceable MGB that these allocations represent and the lack of relevant mitigation within the parish.

We have significant concerns about the highway network's ability to cope with increased traffic (generated by developments in Pembury, Capel and Paddock Wood) and the lack of strategic planning to mitigate against the proposed development in the Draft Pre-Submission Local Plan.

Where any new housing is permitted, we would want the essential infrastructure to be in place first, for issues such as density, access and egress, traffic etc., to be fully considered. Wherever possible, the relevant sites should include public open spaces and the environment protected and enhanced (e.g. with landscaping and tree planting).

In order to address climate change issues, building plans need to include clear and definite ways in which developers build for the future. Renewable energy is a major issue and various heat sources need to be essential planning requirements, not just suggestions.

The NDP for Pembury, once adopted, will supplement the Local Plan and hold developers (and the Borough as the Planning authority) to account in respect of future developments in our parish. Development on sites previously within the MGB/AONB should be developed in line with adopted High Weald AONB Beauty Design Guide with housing densities appropriate for MGB/AONB land.

Pembury is still a clearly defined village; it would be an irreversible mistake to allow any ill-considered developments that would have the effect of Pembury losing its identity and becoming a suburb of Tunbridge Wells.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Question 1

Respondent's Name and/or Organisation Pembury Parish Council

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/PE 1 The Strategy for Pembury parish

Allocation Policy Number A/L PE8

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 1 Land rear of High Street and west of Chalket Lane

Paragraph Number 5.665

Policies Map (Inset Map No(s)) Map 64

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Pembury Village Hall Management Committee considers that the 2nd requirement for this policy re additional parking 'to serve the adjacent village hall and the wider public' is not justified. This new proposal for a facility to include public car parking was not mentioned in the Draft Local Plan. PVHMC considers it is not an appropriate strategy because:

- (a) the site is too far from the centre of the village to meet the wider demand for public parking,
- (b) the public parking spaces would be used by residents of the new houses instead,
- (c) it would be impractical to manage the village hall car park extension on this basis,
- (d) it would be difficult for the many different village hall users to find their way to a vehicular car park access via the development site,
- (e) the proposed arrangement is not in the interests of village hall users,
- (f) the inclusion of a few public parking spaces on this site would not provide enough benefit to form a significant part of the required exceptional circumstances for construction of 50-60 dwellings on the Green Belt.

If the facility was exclusively an overspill car park for village hall users only this could be achieved far better with a one way system, IN from the existing village hall car park and OUT via the development access road. It would still be of some wider benefit for the village as it would help reduce the amount of on-street parking in the High Street when the hall is busy.

Creating a pedestrian link for the wider public is an unnecessary complication with very little benefit in terms of walking distance compared to using the development access road. There is enough room for hall users to drive carefully and safely past pedestrians walking back up to the entrance to the hall.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested revised wording of AL/PE1, section 2:

There shall be additional overspill parking provision of approximately 30 spaces within the design of the scheme, to serve the adjacent village hall, the area for which is shown indicatively on the site layout plan. This land shall be transferred to the Trustees of Pembury Village Hall upon completion. Vehicular access to this shall be IN from the existing village hall car park and OUT via the development site itself, thereby enabling children and other hall users to be dropped off safely at the entrance to the hall rather than in the High Street.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The revisions of the Draft Local Plan Policy AL/PE1 contained in the Pre-submission Local Plan would have a material adverse impact on the management of Pembury Village Hall.

The development should only include an overspill car park for the village hall, whose Trustees do not accept that public parking spaces on this site would provide enough benefit to justify the exceptional circumstances for construction of 50-60 dwellings on the Green Belt.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel for 33 years. All my three children were born at Pembury Hospital. I have volunteered as a debt, housing and welfare benefit adviser at Paddock Wood Community Advice Centre since it was founded in 2012 and before that I worked for the Citizens Advice Bureau in Paddock Wood.

I object to the two policies written below.

Policy STR/SS 3 Strategy for Tudeley Village

I OBJECT TO the proposal to build a new town of nearly 3,000 homes at Tudeley in the parish of Capel on Greenbelt land.

The draft local plan is **NOT “Sound”**; It is **NOT “Justified”** and because it has **fundamental inconsistencies with National planning policy** it is **NOT “Effective”**.

TWBC has said that “if the draft local plan is agreed it will allow the Council to meet government-imposed housing targets in the way that is considered to be the most appropriate for the borough as a whole”.

How can the total destruction of Green Belt and AONB in the Parish of Capel be appropriate for the borough as a whole? It is totally disproportionate to put 5,000 new homes into one singular rural parish within the Borough and which currently only has 918 homes. Once these developments have been allowed then the number of future homes being built on the area will increase. The damage will have been done. Tonbridge, Five Oak Green and Paddock Wood will be joined together and therefore the buffer zone which greenbelt land provides will have been destroyed. We will have one urban sprawl. TWBC are not protecting our heritage but are destroying it.

The plan preparation process did not include Tudeley (sites CA1 and CA2) until after the Issues and Options Process in 2017. This means that the largest housing area in the plan did not go through most of the plan preparation process. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation.

The housing need calculated by the government can be reduced if it requires development of Green Belt land unless “exceptional circumstances” exist. The NPPF clearly states in paras 133 to 147 that green belt should only be released in exceptional circumstances BUT that housing need is NOT able to be used as “exceptional circumstances” to overrule AONB/Green Belt. TWBC has not shown what the exceptional circumstances are that would allow them to build on AONB and Green Belt.

TWBC commentated that the proposed site at Tudeley was more preferable to anywhere else in the Borough because they could deal with only one landowner.

TWBC has not shown that they have considered brownfield sites across the borough to build additional housing. Social housing is the highest priority for extra housing not 5 bedroom executive homes. Brownfield sites provide a far better site for social and affordable housing because they are close to existing amenities and public transport.

TWBC Greenbelt Study Stage 3 (March 2021) recorded that the impact on the destruction of greenbelt to be **VERY HIGH HARM AT TUDELEY VILLAGE AND CAPEL EAST**

The infrastructure has not been addressed sufficiently and the proposed Colt's Hill ByPass will destroy AONB land and cause further polluting and congestion on the minor roads in the Parish. The developer has included a train station in the plans for Tudeley New Town and National Rail have specifically stated that they will not build an additional station between Tonbridge and Paddock Wood.

TWBC received over 1000 comments on their proposed plan for a new town at Tudeley, 97% of these comments were objections. By including it in their Draft Local Plan they have shown a complete lack of engagement with the public response to Reg 18.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

I object to the inclusion of land for development in East Capel in "The Strategy for Paddock Wood" (Policy STR/PW1). It is disingenuous for TWBC to include this land within its strategy for Paddock Wood in order to pretend that it is not dumping 5,000 houses in the parish of Capel. The site is in the parish of Capel not Paddock Wood.

This land is Green Belt land and should only be built upon if an "exceptional circumstance" exists. TWBC's own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel. The comment above about coalescence and the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land's use as a flood plain. Building here, even with flood risk mitigation and "betterment" could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove Tudeley New Town and development at East Capel as they are being built on greenbelt and place the necessary housing on brownfield sites and within the town centres which need regeneration

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

TUNBRIDGE WELLS BOROUGH

DRAFT LOCAL PLAN (REGULATION 19)

Consultation 26 March to 04 June 2021

Name: Martin Pengelley

Responding as: An individual and local resident of 33 years

Address: Capel, Tonbridge, Kent TN12 [TWBC: part of postal address redacted to protect personal data]

OVERVIEW COMMENTS

Policy STR/SS 3 Strategy for Tudeley Village

I OBJECT TO the proposal to build a new town of nearly 3,000 homes at Tudeley in the parish of Capel and **OBJECT TO** the proposals for even more housing on Greenbelt land.

The draft local plan is **NOT "Sound"**. It is **NOT justified** and has **fundamental inconsistencies with national policy**, thus it is **NOT effective**.

The land to be used is Greenbelt and adjacent to AONB. To use Greenbelt land there needs to be "exceptional circumstances" and housing need is NOT sufficient to overrule Greenbelt.

In the press in 2019, TWBC has been quoted as saying "If the Draft Local Plan is agreed it will allow the Council to meet government-imposed housing targets in the way that is considered to be the most appropriate for the Borough as a whole." This confirms that the Council have been lead by the government targets, NOT by local housing needs. There is insufficient evidence that the local housing needs exist such that a new town at Tudeley, on Greenbelt land, is justified. The draft local plan does not provide evidence of the "exceptional circumstances" required to develop Greenbelt land.

Any consideration of this ill-thought through plan should take account of the fact that it comes from a council that proposed running up significant debt to finance a hugely costly theatre, a reckless proposal that was palpably not wanted by the people of the borough.

Taken together, **Policy STR/SS 3 Strategy for Tudeley Village** and **Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel** would lead to nearly 5,000 new homes in the parish of Capel. As the parish currently has around 900 homes, this level of development is NOT proportionate and is insensitive development for a rural parish.

FULL COMMENTS

We have lived in our home in Capel for 33 years. Our children were all born at Pembury hospital and have grown up here. The parish is a rural one, predominantly made up of Greenbelt or AONB countryside. That is what attracted us to move here and why we have enjoyed our lives here in the countryside. We are shocked that our local council can propose that the character of such a beautiful place to live should be destroyed. And that it should be done through ignoring the longstanding policy of protected Greenbelt land, simply due to central government direction rather than through a thorough assessment of actual local needs.

I OBJECT TO the Policy STR/SS 3 Strategy for Tudeley Village proposal to build a new town of nearly 3,000 homes at Tudeley in the parish of Capel and **OBJECT TO the Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel** proposals for even more housing on Greenbelt land in the parish of Capel.

The draft local plan is **NOT “Sound”**. It is **NOT justified** and has **fundamental inconsistencies with national policy**, thus it is **NOT effective**.

The land to be used is Greenbelt and adjacent to AONB. To use Greenbelt land there needs to be “exceptional circumstances” and housing need is NOT sufficient to overrule Greenbelt.

In press/BBC TV in Oct 2019, **TWBC** has been quoted as saying “If the Draft Local Plan is agreed it will allow the Council to meet government-imposed housing targets in the way that is considered to be the most appropriate for the Borough as a whole.” This confirms that the Council have been lead by the government targets, not by local housing needs. There is insufficient evidence that the local housing needs exist such that a new town at Tudeley, on Greenbelt land, is justified.

Jake Berry (Minister DHCLG) stated in April 2019 that: “the housing need figure is not a mandatory target. Local Authorities should make a realistic assessment of the number of homes their communities need, using the standard method as the starting point in the process. Once this has been established planning to meet that need will require consideration of land availability, relevant constraints and whether the need is more appropriately met in neighbouring areas... **The NPPF is clear that only in exceptional circumstances may a Green Belt boundary be altered, through the Local Plan process. Last year we strengthened Green Belt policy in the revised NPPF**”.

Brandon Lewis (Housing Minister 2015) stated clearly that “maintaining strong protection for the Green Belt is national policy and LAs are required to observe this. In the context of planning applications or appeals, **the policy is that unmet housing need alone will not amount to the “very special circumstances” to justify planning permission for inappropriate development on Green Belt.** We have repeatedly made clear that demand for housing alone will not change Green Belt Boundaries.”

- . 69% of the Tunbridge Wells borough is designated as an Area of Outstanding Natural Beauty (AONB)
- . There are 10 Sites of Special Scientific Interest (SSSI)
- . 22% of the borough's land is designated as Green Belt (Source: TWBC website, Key Borough Statistics)

Consequently, Government imposed housing targets are **disproportionate** for a borough with such a high proportion of land being Greenbelt and/or AONB.

Government targets are based off 2014 ONS data not the updated 2016 numbers which are at a lower level.

Roger Gough, leader of Kent County Council, has said about housing plans in Kent: “the consensus is housing has moved ahead of infrastructure. We are talking about roads, we are talking about schools.....we do need to work together to present to government what is required in terms of a balanced approach. People must not feel that housing is coming on such a scale in places that it is not balanced with the infrastructure that comes with it.” (**Courier October 11, 2019**, page 14)

Greenbelt land. The concept of Greenbelt land was established specifically to stop the spread of towns into adjoining countryside so that different towns merged to form larger conurbations. By building the new town in Tudeley, **Policy STR/SS 3**, and expanding Paddock Wood on the Greenbelt land to its west, **Policy STR/SS 1**, the effect will be to create a large conurbation/built up area incorporating Five Oak Green and Tonbridge. Precisely against the intended purpose of Greenbelt land.

TWBC's own study, Green Belt Study Stage Three produced by LUC in November 2020, states that the “garden village” at Tudeley “is large enough to be considered a town”. The report concludes that for both the new town at Tudeley and the land at East Capel near Paddock Wood would have “high

harm” on the greenbelt, with material parts producing the highest negative test of “very high harm” on a scale of seven categories of affect on the greenbelt.

The proposed developments are NOT Proportionate.

- 1 The parish of Capel has around 900 homes. **Policy STR/SS 3** and **Policy STR/SS 1** add nearly 5,000 homes to the parish of Capel. That is absolutely NOT proportionate. Why has the draft local plan chosen to separately account for the homes in the single parish between those in the new town at Tudeley and those west of Paddock Wood? The planning officer has said that it is to “avoid double counting”. Those words of qualification immediately suggest a deceit. To avoid double counting, one could equally as well have said that nearly 5,000 homes are in Capel but, of these, some 2,000 are accounted for in the plans for Paddock Wood. Is this sleight of hand to try and deliberately hide the actual impact on the parish of Capel of the, NOT proportionate, greater than quintupling in the number of homes?
- 2 By another measure the proposed development is NOT proportionate. Over half of the planned housing development for TWBC will be in just one of its twenty council wards.
- 3 Taking a measure of the number of inhabitants shows the development planned is NOT proportionate. There are currently less than 2,500 residents of the parish of Capel. This will grow to around 6 times that number when all these proposed houses are built. A parish with around 2% of the population of TWBC will get over 50% of the planned housing development.

Local needs. What level of diligence has been applied to the work to identify local needs? Not just in numbers of houses, but also in the type of housing? Building a new town at Tudeley is highly likely to generate executive homes which are far more profitable for the developer, than social or affordable housing. Yet the local need is for affordable or social housing.

Has TWBC undertaken its work to identify all the brownfield sites with similar diligence as they have asked landowners to put up greenfield sites for development? Did they initiate visits to potential land owners to encourage the provision of brownfield land, as they did for greenfield categories? **Para 137 NPPF** requires local planning authorities to “examine fully all other options for meeting its identified need for development” before concluding whether exceptional circumstances exist to justify changes to Green Belt boundaries. If TWBC used greater efforts in seeking out landowners for greenfield land than brownfield, the draft plan fails that test.

Enfield is an example showing that the process that councils use to assess brownfield land is often inadequate. The council in Enfield identified a brownfield register for 2,700 homes. Local resident groups identified non-green sites and visited each site to assess its suitability as brownfield. This found space for 37,000 homes.

Housing density. What assumptions have been used by TWBC on housing density in the new town at Tudeley? The destruction of protected Greenbelt land should certainly justify a high level of housing density to reduce the irreversible loss of the valuable natural landscape. Insufficient housing density is a ground for refusal of a Local Plan.

Transport considerations. Para 138 NPPF states that: “Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport.” It is quite obvious that the new town at Tudeley is not well served by existing public transport. Extra car usage will be generated on roads, many of which are narrow enough not to have a white line lane divider, that are already congested at peak hours. Today the road at the primary school at Five Oak Green is congested at school opening and closing hours. That school has around 200 pupils and the proposed secondary school on an adjacent site will have around 2,000 pupils. What will that mean for the congestion in the future?

Whilst a new road is proposed south of Five Oak Green, this too is in Greenbelt land, resulting in yet more destruction of the protected natural environment. The roundabout at the Colt’s Hill end of Alders Road will encourage ease of access onto the proposed Colt’s Hill bypass, thus driving traffic down Alders Road at peak times rather than along the proposed new road south of Five Oak Green. Additionally, the proposed Colts Hill bypass is in both Greenbelt and AONB land.

What unremovable protections have TWBC put in place that any proposed transport alleviation measures WILL be put in place at the same time as any new developments proceed? There is plenty of evidence that planned undertakings are not enforced once planning has been granted (eg Marden station lift for disabled access).

Sustainability assessment. As per TWBC's own Sustainability Assessment, the housing objective is compatible with only 5 of the 19 sustainability objectives and is incompatible with 9 of them. By TWBC's own standards, this shows a dramatic lack of sustainability and poorly thought through planning.

Hospital capacity and extra needs. A new town and 4,000 new homes in Capel will put great pressure on the services at the Kent & Sussex hospital at Pembury. What work has been done to assess the extra demand and the current capacity of the hospital to cope with this? How can TWBC guarantee the extra resources needed to fund the necessary hospital expansion?

Natural environment. The destruction of greenfield land and Greenbelt land will impact adversely on the natural environment and the wildlife in the area. There is an RSPB nature reserve south of Alders Road less than one mile from the proposed new town in Tudeley. The rise in birds of prey, Buzzards and Sparrow Hawks in particular, that we have witnessed and evidenced within the last few years, will be impacted adversely given the range of land they cover. The agricultural heritage of the parish will be lost for ever.

Flooding and water supply. There is already much known about the issue of flooding in Five Oak Green and other parts of Capel parish. The proximity of the new town to the natural flood plain of the Medway should be properly assessed, including the impact downstream of faster run off. How much increase is there in the likelihood of damaging floods in Yalding, which already suffers regularly in times of heavy rain?

As well as flooding considerations, research should be done on water supply. The whole of the South East is a region of stress for water supply. What professional research has been done on the extra demand from the new town and 4,000 extra homes. Where will the water supply come from? Are there sufficient supplies available?

Air quality, light and noise pollution. The extra housing, cars, street lighting and all that goes with a new town, will lead to increased levels of pollutants in the air and poorer air quality, coupled with noise and light pollution in what is now a rural, Greenbelt area. The quality of the environment in the parish of Capel will be irreparably damaged and changed for the worse; for ever. Is this consistent with a desire for betterment of the parish? It is certainly a total destruction of the existing way of life.

Listed buildings and historic site of Tudeley church. Marc Chagall is a world-renowned artist and only one church in the world has all its windows designed by him; Tudeley church. A key contributor to the ambience of this historic church is its setting in the green fields of Kent. This will be lost when the fields are destroyed and the church is surrounded on three sides by the new town at Tudeley. Has there been a proper assessment on this historic site and the other listed buildings in the parish and its surroundings?

Soil quality. The Greenbelt, agricultural land that will be forever destroyed is of what quality? What proportion of the good quality agricultural land in the TWBC area will be lost? Has there been sufficient consideration of such issues?

Mitigating climate change. There is little evidence that adequate weighting has been given to the topic that is getting widespread coverage now, that of climate change. As the ultimate threat from climate change is negative for every human being, everything that can be done to mitigate the adverse impact from development on climate change should be done. Under government NPPF guidelines, proposed development needs to consider the impact of climate change. In the area of the proposed new town for Tudeley, flood risk is an issue for consideration. As well as the impact of extra carbon emissions in the construction of the new town and the existence of greater population density afterwards. Has sufficient work be done by TWBC on this issue?

Regulation 18 responses ignored. There were over 1,000 comments objecting to the draft local plan at Regulation 18. How many changes to the draft local plan were made in direct response to these specific objections to the new town at Tudeley? The supposed consultation with the local community is a sham; a process of consultation in name only to get round the legal need to "consult", with no account being taken of the significant body of objections or any action being taken to revisit the plan for a new town and development concentrated in just one area of the borough.

CONCLUSION FOLLOWS ON NEXT PAGE

CONCLUSION

In conclusion, I contend that this draft Local Plan and the concept of the new town to be built on Greenbelt land in Capel, has been poorly thought through, is a 'convenient' solution to meeting government imposed targets rather than addressing local needs and provides no "exceptional circumstances" to justify the destruction of Greenbelt land and riding roughshod over the long established precedents to protect the Greenbelt.

Any consideration of this ill-thought through plan should take account of the fact that it comes from a council that proposed running up significant debt to finance a hugely costly theatre, a reckless proposal that was palpably not wanted by the people of the borough.

The draft local plan is **NOT "Sound"**. It is **NOT justified** and has **fundamental inconsistencies with national policy**, thus it is **NOT effective**.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removing from the draft local plan the proposed new town at Tudeley would be a start.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability assessment.

As per TWBC's own Sustainability Assessment, the housing objective is compatible with only 5 of the 19 sustainability objectives and is incompatible with 9 of them. By TWBC's own standards, this shows a dramatic lack of sustainability and poorly thought through planning.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The area plan for Tunbridge Wells Borough has been prepared on the basis that most of the future housing requirement will be located in Paddock Wood and Capel parishes, rather than being spread across the whole borough. The result is an uneven proposal that will lead to very major issues in the Paddock Wood and Capel areas.

Particular issues that will arise as a result of this centralised approach are:

. **Loss of Green Belt.**

The Metropolitan Green Belt was established as a policy to control urban growth with the fundamental aim of preventing urban sprawl. A very high percentage of the proposed development in Paddock Wood and East Capel requires the sacrifice of green belt land. This goes against the very principals of the creation of green belt. No development should be taking place on green belt land. The proposal fails four of the five stated purposes of green belt:

- i It does not check the sprawl of large built up areas, exactly the opposite.
- ii It does not prevent the merging of Paddock Wood with Five Oak Green. The two centres would abut each other as a result of this plan.
- iii The policy would mean that the countryside is encroached by development.
- iv It does not assist urban regeneration as it does not encourage the recycling of derelict and other urban land.

. **Flood Plain**

Despite the 'green' areas contained in the plan, the whole of the proposed development is on flood plain. It will be impossible to entirely mitigate against the impact of this loss on either existing or new properties. At the moment the area is prone to flooding on a regular basis and further development will make this considerably worse.

. **Infrastructure**

During the consultation we have been advised by the planning officer that it will not be possible to deal with infrastructure issues prior to the development taking place, as the costs of this are reliant on s106 monies. The planning officer has also used the words 'life will be hell in Paddock Wood for fifteen years, but that can't be helped.' If the necessary developments were spread across the Tunbridge Wells Borough, with lots of smaller projects, whilst difficult, it seems feasible for much of the necessary infrastructure to be added after development. With the proposals for Paddock Wood the town will

grind to a halt without infrastructure issues being dealt with prior to development. The burden of the proposed massive expansion of houses on roads, health and education would be disastrous. At the moment the level of additional development that has taken place recently, is already creating serious infrastructure issues that have not been addressed.

The Council have not put in sufficient thought into the issues that will occur if infrastructure is not dealt with in advance of development. The plan should be changed either to one where the housing is spread across the whole borough or alternatively the council commits to funding very major infrastructure improvements well before development starts, taking on board the possibility that they may not be able to recover these monies.

Consultation

Whilst the Borough Council has gone through the normal consultation, most recently through the section 18 process, they have taken no notice of the very high number of comments and objection to the plan, as it impacts Paddock Wood and Capel. It appears that the council never had any intention of altering their plans, in the light of public feedback, as the response was so overwhelming and has not led to changes. The council have followed the formal procedures that are required to consult on a local plan, without entering into the spirit of the process.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . The plan should be re-drawn removing all development in green belt land and alternatively spreading development across the borough, with greater emphasis on brown field sites.
- . Development should not be allowed on the flood plain.
- . If the plan goes forward in substantially the current format, then the council should be compelled to put in place the necessary infrastructure prior to development commencing.
- . The plan should be amended to take account of the very high level of public comments and suggestions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am the owner of Badsell Manor, located in the area covered by the policy. Badsell Manor is the property identified in the plan as a site of historic interest to be protected.

Badsell Manor is a medieval moated manor house whose origins go back almost 900 years and is the most important historic building lying within the scope of this policy. A listed building, the property has had a colourful history having been the home to eminent historic owners. A full history of the property is documented on the website www.badsellmanor.co.uk.

In preparing the plan the Borough Council do not appear to have taken into full account Historic England's guidance contained in 'The Historic Environment and Site Allocations in Local Plans' under Historic England Advice Note 3.

Under s72 Planning (Listed Buildings and Conservation Areas) Act 1990, the local plan should set out a positive strategy for the conservation and enjoyment of the historic environment, in which the desirability of sustaining and enhancing the significance of heritage assets should be considered (NPPF paragraph 126). The plan does not properly protect Badsell Manor and its important moated curtilage.

Development will be expected to avoid or minimise conflict between any heritage asset's conservation and any aspect of the proposal, taking into account an assessment of its significance (NPPF paragraph 129.) I do not believe that the Borough Council have properly assessed the importance of this site and have certainly not visited the site to help evaluate its importance. Under NPPF paragraph 132 consideration should have been given to the importance of this site.

Any proposals that result in harm to heritage assets need to be fully justified and evidenced to ensure that they are appropriate, including mitigation or compensation measures. This patently has not been done with development being proposed within the very area (which I consider has been wrongly calculated) which the Council themselves have designated as a site of historic interest to be protected.

The inadequate assessment of the historic site, on which Badsell Manor is situated has led to the council simplistically applying an area of historic importance of 300 metres centred on the Badsell Manor building. This is a negligent approach that takes no account of the setting, where the Southerly aspect is less important to protect due to other listed buildings and the road B2017 but the Northerly

aspect has great importance. Of particular relevance is the working moat which runs to within 50 metres of the curtilage. The plan simply provides for a very thin strip of woodland beyond this, with a cycle path running immediately beyond this. This does not comply with the advice from Historic England which states that 'Buffer zones and set distances can be a useful starting point but may not be appropriate or sufficient in all cases.'

The property has historically enjoyed a rural setting, surrounded by open fields. The area plan would permanently destroy this setting. The plan has identified the importance of this site and nominally has provided a three hundred metre circle surrounding the house, as a site of historic interest to be protected. The plan does not however properly protect the property. Changes could be made, having little impact on the development provisions of the plan, whilst helping to mitigate the impact on this historic site. Particular attention should be paid to:

- . The area highlighted as being a 'site of historic importance to be protected' should not be a simple 300 metre radius from the Badsell Manor as a building and should take into account the curtilage of the site. Of particular historic interest is the unusual working moat that lies principally to the North of Badsell Manor; centring the protective area on just the house ignores the importance of this feature. It is of the greatest importance to protect the North of the site, where the area highlighted in the plan is only 50 metres from the curtilage of the property and 75 metres from the moat.
- . The South West corner of the sports hub significantly ingresses on the site of historic importance. This clearly fails to protect this historic site and demonstrates that the Council have not researched and taken proper account of the site.
- . The most southerly pedestrian / cycle route passes within 50 metres of the curtilage of the site of Badsell Manor. This should be moved to the North.
- . Within the circle identified as being of historic importance there is residential development clipping inside the historic site. This makes a mockery of attempting to protect this important listed building.
- . The green landscape corridor lying to the North of Badsell Manor would better serve to protect the historic site as well as being positive environmentally, if it was to be designated as woodland to be planted.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- . The site of historic importance should be extended so that it extends to 300 metres North of the curtilage of the site, not just 300 metres from the centre of the manor house.
- . The site of historic importance should be respected by changing the proposed sports hub area so that it does not encroach on this area. The planting of mixed woodland would go some way to protect the historic site as well as being environmentally positive.
- . The site of historic importance should be respected by changing the proposed residential building inside this area (lying to the North East of Badsell Manor) so that it does not encroach on this area. The planting of mixed woodland would go some way to protect the historic site as well as being environmentally positive.

- . The green landscape corridor to the North of Badsell Manor should be planted with mixed woodland to help protect Badsell Manor and for positive environmental reasons including flood plain management.
- . The proposed pedestrian / cycle route lying to the North of Badsell Manor, should be moved 250 metres to the North to protect the site of historic importance.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

The calculations for affordable housing are flawed since you rely on submissions from Parish Councils, who in the main are either filled by NIMBY Councillors or are too idle to undertake a survey . Hence you only have 4 areas showing wanting such housing . As a resident of Bidborough for example I know this to be true.

The Borough should undertake an independent survey of their own .

Similarly there does not appear to be any provision for suitable retirement homes . Again, for example in Bidborough the vast majority of houses are large. And a high proportion of these householders would like to down size, thus freeing up more suitable family homes – which are in short supply as there is no space to build more. If you allowed small retirement dwelling to be built on the outskirts it would achieve both objects .

I urge the Council to consider these thoughts .

John Perry (ex Kent County Councillor ex planning committee)

Dear Sir/Madam,I am having to email my objection to further developments around Paddock Wood area as I am not computer trained and have wasted a lot of time trying to understand what to click on etc and going round in circles as I grew up in the pre computer era so have never had any training ,this is about my limit.

I would like to object for several reasons one being most of the new houses are being built on floodplain with obvious results in the future in wetter times it has already happened in Badsell Road,and raw sewage floods gardens in Dimock Close / Ballards Way all this is only going to make it worse .

The green belt is being cut up and built on when it is supposed to be protected as Tunbridge wells claims to be green ?? Yet Hundreds of trees have been felled including many ancient Oaks,not to mention the loss of A grade farmland and Orchards.

There is not the local infrastructure in place the local doctors is over subscribed as are the dentist and nothing has been built first to allay this ,there is talk of shutting the rail bridge over the railway which is hardly a green idea as people will drive an extra 3 miles each way to get around .

None of the local roads are designed for all the extra traffic ,each house built will have at least 2 cars each, times that by the number of houses proposed it will be gridlock and extra pollution.

I would be grateful if this objection can be added I know I am not the only one who does not do computers

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Persimmon Homes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HO 3 Land to the east of Horsmonden

Policies Map 62

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 Introduction

1.1 These representations have been prepared by Persimmon Homes South East (PHSE) in response to the Regulation 19 Pre-Submission Publication Consultation on the Tunbridge Wells Borough Council (TWBC) Draft Local Plan (hereafter referred to as the Draft Plan). These representation should be read alongside the following supporting submissions:

- . Framework Plan (Drawing Number 1519.SK01.0) prepared by FINC Architects;
- . Transport Appraisal (Dated 3rd December 2020) prepared by Markides Associates;
- . Letter from KCC Highways (Dated 14 January 2021)

1.2 In preparing these representations we have assessed the Draft Plan against the relevant legislation and national policy requirements for 'plan making'. Notably the requirement that the Plan must be 'sound'.

1.3 PHSE are broadly supportive of the Draft Plan.

1.4 In particular PHSE are supportive of the allocation of our Land at Bassetts Farm (hereafter referred to as the Site) with the 'Policy AL/HO3 Land East of Horsmonden' an allocation for "residential development providing approximately 115-165 dwellings, safeguarded land for future expansion of Horsmonden Primary School, new health centre/doctors surgery and a community orchard and open space".

1.5 As these representation demonstrate the Site is in a sustainable location and can deliver gains across all three dimensions of sustainable development in accordance with the requirements of the NPPF and broadly in accordance with allocation AL/HO3. These representations also demonstrate that the Site is deliverable, and can deliver dwellings within the early part of the Plan period.

1.6 Whilst we remain broadly supportive of the Draft Plan, we request some detailed amendments to the Draft Plan, in particular Policy AL/HO3 to ensure that the allocation is deliverable, and thereby sound.

1.7 Critically, the emerging site specific survey work suggest that indicative diagram presented in the Draft Plan for Policy AL/HO3 does not accurately or appropriately reflect the sites constraints and opportunities. We are thereby requesting that Policy AL/HO3 is amended to explicitly confirm that the diagram is indicative only, and that proposals for the site will be assessed against site specific surveys and assessments.

1.8 The structure of the document is as follows:

- . Section 2 provides a detailed overview of the Site and surroundings;
- . Section 3 sets the vision and development potential of the Site, demonstrating deliverability;
- . Section 4 sets out our observations on the emerging Development Strategy Policy AL/HO3 and sets out several recommendations to enhance the robustness and soundness of the Development Strategy policy;
- . Section 5 provides commentary on the development management policies in the Draft Plan; and
- . Section 6 provides a summary and conclusion.

2.0 The Site

2.1 The Site is located in a sustainable location on the north eastern edge of Horsmonden, within walking distance of the village's services and facilities including local bus stops, a village shop, post office, pharmacy, doctor surgery, public house, nursery and primary school.

2.2 The Site extends to approximately 14.7ha and comprises two distinct areas: an orchard area to the north; and to the south-west a complex of former farm buildings (including a Listed Building) and a former orchard. Outline Planning Permission has been granted for the redevelopment of the former farm buildings (this is considered further below).

Orchard Land

2.3 The Site is positioned on the side of a very gently sloping valley; Goudhurst Road runs along the valley contours, therefore in terms of topography the application Site slopes upwards from south to north. A Public Right of Way (PROW) traverses the Site north to south; and PROW also runs along the northern boundary.

2.4 The north boundary of the Site is defined by a field boundary and a Beyond the northern boundary is agricultural land which is currently given over to orchards. To the east of the Site is an area of woodland which enclose the site to views from the east. The western boundary is defined by a former railway line which is now heavily vegetated by mature trees and hedgerows. Beyond the former railway line is a mature residential area which comprises a range of 2 - 2.5 storey semidetached and detached units constructed in the last 20 years. The palette of materials is varied, including red/brown brick, timber weather boarding, cream painted render and tile hanging. To the south of site is situated a terrace of housing and a large detached property situated in extensive grounds.

Adjacent Consented Development Site - Bassetts Farm

2.5 Outline Planning Permission has been granted for development for up to 30 no. residential dwellings on land immediately to the south of the proposed allocation (reference TW/15/505340/OUT). The consented site, which is known as Bassett Farm, is owned and controlled by Persimmon Homes.

2.6 The consented development includes detailed approval for a site access (simple junction arrangement) with Goudhurst Road. As is discussed in Section 5, the approved junction arrangement could provide access to the allocated land and is of sufficient scale to accommodate the traffic generated by the proposed allocation.

2.7 It is envisaged that the consented site and the (proposed) allocated site could be brought forward together to deliver a well-designed sustainable extension to the village. This is discussed further in Section 5 below.

Planning History

2.8 The northern part of the site has no recent planning history of relevance nor a history of unimplemented permissions.

2.9 Outline Planning Permission has been granted for development of up to 30 no. residential dwellings on land immediately to the south of the proposed allocation (under reference TW/15/505340/OUT). The consented land is owned and controlled by Persimmon Homes.

2.10 A Reserved Matters application (reference 19/03657/REM) was submitted to Tunbridge Wells Borough Council in December 2019 for the erection of 20 dwellings, and includes the discharge of a number of conditions related to affordable housing, hard and soft landscaping, arboriculture, foul and surface drainage, biodiversity mitigation and enhancement, tracking and turning, renewable energy, water and energy conservation, boundary treatment and refuse storage. This application is currently awaiting a decision.

2.11 There have also been recent submissions for the discharge of condition 17 (Parts 1, 2 and 3) as well as for the removal of condition 9, both of which are attached to the outline consent. These applications are awaiting validation from the Tunbridge Wells Borough Council Planning Department.

SHELAA

2.12 The Site has been assessed through the submission to the Call for Sites process, and the subsequent Site Assessment, which have fed in to the creation of a Strategic Housing and Economic Land Availability Assessment (SHELAA, 2021). The SHELAA has been utilised as part of the evidence base for the emerging Local Plan and identifies the site as Parcels 297 and 82.

2.13 The assessment of the Site found that the Site has pedestrian access to the Village centre and is situated adjacent to the Limits to Built Development (LBD) area. Whilst there was varying ecological, highway, landscape and heritage sensitivity identified in the assessment this was not a precursor to the Site not being suitable for coming forward for development. The assessment concluded that this site is considered suitable as a potential site allocation.

2.14 As a national housebuilder Persimmon Homes intention to develop the Site. This confirms that the Site is available and achievable.

3.0 Constraint & Opportunities

3.1 Persimmon Homes control the majority of the land allocated under Draft Policy AL/HO3. It is our intention to bring forward the Site for development broadly in accordance with the draft Policy AL/HO3 (subject to some detailed amendments to the draft policy wording which are discussed in more detail in Section 4 below).

3.2 To this end Persimmon Homes are undertaking some surveys and assessment of the Site to inform a preliminary master planning exercise. The following provides a summary of the Sites constraints and opportunities as they are understood at this stage.

Landscape

3.3 James Blake Associates (JBA) are in the process of conducting a full Landscape & Visual Impact Assessment of the Site, factoring its current state, its position and relationship with the surrounding countryside, and the impact that any development may have on the Site and the surroundings.

3.4 We have been advised of the following landscape sensitivities/characteristics and opportunities:

- . Landform: the landform within the Site follows a shallow valley with the land rising to the Just beyond the Site to the north lies to ridgeline at approximately 75m AOD. Any proposed development should avoid breaking the skyline.
- . PRoW network: PRoW WT340A, PRoW WT338 and PRoW WT341 run through or abut the site boundary. These connections should be retained and provision enhanced through the introduction of additional connecting footpaths;
- . Visibility and Views: From the northernmost boundary of the Site there are panoramic views across the wider landscape. Views towards the Site are also possible from the other side of the shallow valley to the south. Again, any development on Site should avoid breaking the ridgeline;
- . Woodland structure including ancient woodlands: The Site boundaries include some strong tree belts in places. These features should be retained, enhanced and reinforced with native buffer planting;
- . Listed Buildings: The National Heritage List for England (NHLE) indicates that there are a number of Listed Buildings in close proximity to the Site. The setting of these buildings will need to be carefully considered.

3.5 Overall, JBA have advised *“The Site is considered to be a suitable location in landscape and visual terms for development subject to some landscape considerations”*.

3.6 JBA consider that the Site could suitably accommodate an appropriate development scheme, broadly in line with the requirements of Policy AL/HO 3. This would be best achieved through the implementation of our sensitively designed masterplan which incorporates the following key design principles:

- . The location of proposed development areas should respond to the landscape features and characteristics that give the landscape its sense of place and local distinctiveness.
- . The built form should reflect the local settlement with the use of vernacular style materials wherever possible.
- . Hard and soft landscaping materials should be complementary to the proposed dwellings and the local vernacular design.
- . The use of dark/earthy tones will help to integrate the proposed development into the wider landscape, particularly any proposed dwellings towards the north of the Site.
- . Proposed dwelling could adopt a vernacular style, or be more contemporary in style but with vernacular references in their design or materials.
- . Existing boundary vegetation should be retained wherever possible and reinforced where necessary by new structural planting to provide screening value and create a wooded backdrop to the proposed development.
- . Groups of trees should be used within open space and Green Infrastructure corridors, this will help soften the built form and integrate providing connectivity across the Site
- . The Site should look to provide opportunities for multi-functional green infrastructure to provide landscape, visual, ecological, climate and recreational benefits.
- . Residential streets and buildings should reflect the existing settlement form, with a transition in density and building height, creating a lower density settlement edge to the north and east.

Trees

3.7 Tree surveys are underway and are being conducted by arboriculture consultants PJC in order to better understand the Site and inform the masterplan.

3.8 PJC have so far found that the existing apple trees that make up the commercial fruit farm on the main part of the Site are individually not of high quality or high value.

3.9 We have been advised by PJC that the key arboriculture features to be retained and protected on the site are restricted along the boundaries. Surrounding the site boundaries are a number of individual trees, hedges and woodlands which should be retained and respected.

Ecology

3.10 The Ecology Partnership are undertaking a number of Ecological Surveys which have so far found that the *‘The majority of the habitats on site are common and widespread, or of low ecological value due to their intensive management regimes’*.

3.11 The areas of ecological value are primarily located on the boundaries of the site. These areas include, dormouse suitable habitat, reptile suitable habitat and badger setts on the edges of the site that require a buffer from the proposed residential area. Persimmon Homes is seeking to achieve the Council's aspiration to enhance the biodiversity value of the site as well as mitigating any ecological impacts. Overall, we have been advised that *‘several enhancements can be made to the final development to help reduce potential ecological impacts, as well as to try and achieve 10% biological net gain’*.

Access

3.12 Markides Associates have a Transport Appraisal (TA, dated December 2020) to assess the accessibility of the allocated land, alongside the adjacent committed site, and prepared a robust proposed transport strategy for the Site. This is included at Appendix 2.

3.13 The TA establishes that the site is an appropriate place for residential development, benefiting from being located within close proximity of a range of social infrastructure within the village that acts as typical trip attractors for residential land uses, ensuring residents are not wholly reliant on travel by private car to access essential services such as primary education, health and convenience retail.

3.14 Horsmonden also benefits from being served by a number of existing bus services that provide access to higher order settlements such as Royal Tunbridge Wells and Paddocks Wood, from which there are opportunities to access National Rail Services.

3.15 The TA demonstrates that the vehicular and pedestrian access from Goudhurst Road, approved as part of the Bassett Farm planning permission (reference TW/15/505340/OUT) is suitable to serve the whole development. The proposed site access junction has also been demonstrated to operate within capacity, with no material impacts on through traffic on Goudhurst Road.

3.16 In terms of potential traffic impact, Markides Associates have found that with 175 dwellings and the Health Centre the Site has the potential to generate approximately 133 vehicle movements during the AM peak and 119 vehicle movements during the PM peak, with 1218 vehicle movements across the day (07.00-19.00). This level of vehicular movement is not considered to be a significant and as such would not result in a 'severe' impact on the wider highway network as referenced in the NPPF (2012) paragraph 109.

3.17 Regarding pedestrians the TA demonstrated that the site can be suitably accessed from Goudhurst Road, with additional pedestrian accesses accommodated via Back Lane to the north-west, providing an alternative, and in some cases shorter, walking route to existing social infrastructure within the village centre such as Horsmonden Primary School. Persimmon Homes is also in the process of submitting details to TWBC pursuant to condition 5 of the outline consent at Bassetts Farm, Horsmonden (TW/15/505340/OUT) that would mean the provision of a pedestrian link is provided along Goudhurst Road. This would shorten the walking distance into the village centre and greatly benefit the site.

3.18 The report has therefore concluded that the proposals comply with all relevant Government and local transport planning policies, and that the proposals should not result in significant detrimental impacts to the existing transport network. Therefore, allocating the Site for development in the Draft Plan is acceptable in transport terms.

3.19 In summary, the TA has reviewed emerging transport related planning policy within the Draft Local Plan and concluded that residential development of the envisaged scale at this site would be in compliance.

3.20 This has been reflected in the positive discussions between KCC Highways, Persimmon Homes and Markides Associates as of 20th October 2020. KCC Highways have subsequently confirmed (in a letter dated January 2021, see **Appendix 3**) their *'agreement with the contents and summary detailed in the 'Transport Appraisal' document dated 3rd December 2020'* and that the *'proposals are welcome and should be further explored (along with scheme drawing and RSA1) at application stage as part of the mitigation package'*.

Flood Risk

3.21 The Site is located within Flood Risk Zone 1 (less than 0.1% annual probability of tidal and fluvial flooding), which is the lowest zone in terms of probability of flood. This is confirmed by the Environment Agency flood maps.

Summary

3.22 In summary, Persimmon Homes are in the process of preparing surveys and assessment of the Site to inform our preliminary master planning exercise. Initial feedback from these surveys identified the following key constraints and opportunities which will inform the master planning of the site:

- . Retention of existing vegetation on and around the site boundaries, including the hedgerows and mature trees;
- . Protection and enhancement of existing ecology on and around the site;
- . Respect views to the Site, particularly from the south across the tributary valley, and from adjacent visual receptors, including PRowWs, local roads and residential properties; and
- . Capacity to provide a vehicular access from Goudhurst Road to serve the whole site.
- . Opportunities to provide pedestrian connections along the existing Public Rights of way to the north and also via the new pedestrian footpath being provided along Goudhurst Road as part of our consent scheme.

Masterplan

4.1 Having regard to the Site's opportunities and constraints, PHSE have prepared a 'concept masterplan' for the Site, which accompanies these representations (appendix 1).

4.2 The concept masterplan demonstrates that the Site could sensitively accommodate approximately 150 units, a 0.25ha medical centre site, extensive public open space, vehicular access on to Goudhurst Road and enhanced walking and cycling connections.

4.3 It is important to highlight that the preliminary masterplan suggests a different form and layout of development for the site than is indicated on Map 62 'Site Layout Plan' which is included in the Draft Plan (see image below). Specifically our emerging Preliminary Masterplan proposes:

- . A strong east/west Green Infrastructure Corridor is included through the site to help screen views of the development from the south, and also providing;
- . Natural Buffers along the edges of the site which take consideration of ecological, arboricultural, heritage and landscape constraints;
- . Swales along the northern edge of the development to capture field run off from the POS to the north;
- . Low density housing in the north east section of the site in accordance with Policy AL/HO3;
- . Eased frontage as a sweeping belt following the contours of the site;
- . Potential location for the proposed medical centre (including access); and
- . Long stretches of roads have been broken to allow for an appropriate street hierarchy in line with the local context of Horsmonden.

Open Space and GI Framework

4.4 In accordance with the requirements of the Landscape and Visual Appraisal, the development has been landscape-led with substantial amounts of soft landscaping ensuring that the built development would be sympathetic to the semi-rural character of the surrounding area.

4.5 The existing trees and landscaping have been carefully considered and integrated into the development. In particular, the Framework Plan has sought to provide visual separation between residential areas. This has been achieved through the introduction of green space which follows a central east/west line. This area offers a belt of intervening tree line that would help soften the view from afar whilst creating a central focal theme through the development. As is shown on the Framework Plan, there is also the potential for the SuDS to be positioned throughout the site so that any development can be appropriately attenuated. The retention and strengthening of established landscape features will help ensure the scheme sits comfortably within its surroundings.

4.6 In accordance with Policy AL/HO3, the masterplan shows the scope by which we can deliver large areas of open space and formal recreation land, as well as providing for the Community Orchard.

4.7 There is a real opportunity to open up public access to the site, making best of use of connections into the public right of way that runs through the site, but also pedestrian links west towards the village centre.

Residential

4.8 Sensitively prepared, the masterplan has been informed by site constraints, residential development is proposed in those areas which are least sensitive in terms of ecological, arboricultural, visual and landscape constraints.

4.9 The existing residential properties (particularly New Bassetts Villas) and Old Bassetts Cottages (Grade II listed) located to the south of the site will inform the design approach for the residential use areas.

4.10 Although indicative at this stage, we would propose a traditional, high quality design approach. It is envisaged that dwellings would be constructed from materials that will have a reduced impact on the environment, drawn from a mixed palette of traditional vernacular materials.

4.11 It is also worth noting that in line with New Local Plan Policy H3, 40% would be proposed as affordable, the remainder being market housing for private sale.

Health Centre

4.12 As noted by comments made by NHS West Clinical Commissioning Group in representations to the Reg 18 Draft Local Plan (comment number DLP_8300), *'The existing premises do not have capacity to accommodate the estimated growth of c 1100 registered patients within the area (Brenchley, Matfield and Horsmonden); the majority of this growth is expected in Horsmonden'*.

4.13 Accordingly Policy AL/HO3 requires the delivery of a site for a Health Centre/GP surgery as part of the development of the Site. We have identified a site for a Health Centre/GP surgery on the

Preliminary Masterplan; it is located in the centre of the Site providing good vehicular access whilst also providing good pedestrian connectivity.

4.14 Thereby the development would help redress the imbalance in the Borough's healthcare provision providing a site for a Health Centre/GP surgery. Thereby this development would support delivery of sustainable services for existing and future residents of Horsmonden

Access Strategy (Pedestrian and Vehicular)

4.15 Vehicular access is to be created from Goudhurst Road as an improved simple priority junction. The TA demonstrates that visibility splay can be provided be in accordance with the requirements set out in the manual for streets for a 30mph road.

4.16 The development proposals will also include additional pedestrian access via the established public right of way network that runs north of the site via Back Lane.

4.17 The development proposals will be designed in accordance with Manual for Streets and Kent Design Guide principles, future proofing connections with proposed infrastructure such as the Hop Pickers route to Paddock Wood, which runs adjacent to the site, and which will offer convenient and safe cycle access on traffic free routes.

4.18 The development proposals will also support and encourage sustainable travel via the implementation of a Travel Plan and is of a scale of development that will potentially be able to deliver improved public bus services and/or the creation of a demand responsive bus service that is branded to the site.

5.0 Land East of Horsmonden Policy AL/HO3

5.1 The Site has been allocated within Policy AL/HO3 sets out that the Site is allocated for residential development, providing approximately 115-165 residential (C3) dwellings and land for the expansion of Horsmonden Primary School, new health centre/doctors surgery, and a community orchard and open space. Persimmon Homes is broadly supportive of Policy AL/HO3. This notwithstanding we are seeking some minor amendments to Policy AL/HO3 to ensure it is deliverable and makes that anticipated contribution towards the Borough's housing land trajectory.

Map 62 Site Layout

5.2 As noted above our Preliminary Masterplan for the Site differs to 'Map 62 Site Layout' which has been included in the Draft Plan in support of Policy AL/HO3. The divergence between our Masterplan and the Site Layout has been driven by a better understanding of the Site constraints.

5.3 In light of this difference we seek formal confirmation that the Map 62 (Site Layout) is intended to provide guidance as to how the Site is to be brought forward, and that future applications can, subject to reasoned justification, vary from this. We say this as detailed site investigations associated with site promotions will inevitably bring to light matters that were not known to Council whilst doing their desk top work, and because as discussions with various statutory consultees evolve so will the future scheme. Thus, it would be counterproductive to suggest that Map 62 (Site Layout) is the only option that can be taken forward. As long as the principles enshrined in the Policy are adhered to / addressed then there should be scope for variations from the proposed Map 62 (Site Layout) and Policy AL/HO3 should be clear in this regard (see below).

Policy Text

5.4 Whilst Persimmon Homes are supportive of Policy AL/HO3 we request some amendments to the Policy text to ensure that the site is deliverable in the timescale required. Please see table below for comments on specific elements of Policy AL/HO3:

Requirement

Compliance

Requested amendment

1. The number and location of vehicular accesses to be informed by a Highways assessment"

Persimmon Homes have undertaken a Highways Assessment and submitted this to Kent County Council Highways in support of a formal pre-app for the Site. The Highways Assessment is submitted in support of these representation. Having reviewed our Highways Assessment in detail KCC Highways confirmed that the Site can be accessed via a single vehicular access point from Goudhurst Road.

We consider that the policy should be amended to confirm that vehicular access will be taken via Goudhust Road.

2. Provision of pedestrian links into the village and footway

Our masterplan shows this and we can deliver it.

N/A

3. Provision of link to PROW

Our masterplan shows this and we can deliver it.

N/A

4. Residential development shall be located on the areas identified for residential and doctors surgery use on the site layout plan [Map 62]

Our masterplan does not reflect the 'Site Layout Plan (Map 62)'. Our emerging LVIA indicates that the areas shown for development on the 'Site Layout Plan' (Map 62) does not effectively respect landscape sensitivities and is not the most appropriate layout.

We consider that the policy should be amended to require an LVIA is submitted in support of an application for the Site to inform the master planning process and ensure that landscape sensitivities are properly understood and respected whilst also ensuring efficient use of the land.

5. No built development on the route of the Hop Pickers Line

Our Masterplan respects this requirement.

N/A

6. The layout and design of the scheme to give full consideration to any impact upon the setting of the High Weald Area of Outstanding Natural Beauty

Our Masterplan has been prepared with due consideration of the AONB, in accordance with a Landscape Appraisal prepared by JBA.

N/A

7. Regard shall be given to existing hedgerows and mature trees on site

The masterplan has been prepared following extensive Arboricultural Survey work undertaken by PJC and fully considers the existing hedgerows and mature trees

on site.

N/A

8. Built development on the eastern area of the site to be at a lower density and informed by a landscape and visual impact assessment

Our masterplan is informed by an LVIA. Whilst this does indicate that the north eastern area is visually sensitive, it does not suggest that lower density development is required to address this sensitivity. Rather an appropriate layout of development is required.

This requirement should be removed.

9. The provision of an archaeological assessment as part of any planning application

An archaeological consultant has been appointed to undertake the appropriate assessments.

N/A

10. The scheme to take account of, and respect, the setting of New Bassetts cottages

The Masterplan shows consideration of the setting of New Bassetts cottages

N/A

11. The scheme to take account of, and respect, the character and appearance of nearby listed buildings

This is shown in the Masterplan and will be reviewed by the appointed archaeological consultant

N/A

12. Land to the north of the site for future school expansion

The Masterplan shows the area allocated for future school expansion and is deliverable.

N/A

13. Provide on-site amenity/natural green space and children's and youth play space, and a community orchard that will be managed and maintained for this use

In accordance with the policy our Masterplan shows a community orchard, children's and youth play spaces as well as on-site amenity area/natural green space.

14. A suitable legal mechanism shall be put in place to ensure that the provision of the new health centre/doctors surgery is tied to the delivery of the housing

Our masterplan shows a *health centre/doctors surgery site*. However Persimmon Homes cannot be expected to provide the facility itself; this will be delivered by third parties.

The policy needs amending to confirm that provision of the health centre/doctors surgery site must not be tied to the delivery of the housing, but that the facility itself will be delivered by third parties. This must be explicit in the Policy. Requiring a development of no more than 175 homes to deliver a health centre site and facility would not be fair and reasonable and would not be CIL 122 compliant.

15. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PSTR/HO 1

We will provide all CIL compliant contributions to mitigate the impact of the development.

N/A

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhust Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Written Representations accompanying this form for more detail.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Persimmon Homes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 2 Sustainable Design Standards

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

EN2 - Sustainable Design Standards The policy is unsound as it is not consistent with national policy. Persimmon Homes does not consider this policy to be consistent with national policy.

Please see Written Representations accompanying this form for more detail.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

EN2 - Sustainable Design Standards

6.2 The policy is unsound as it is not consistent with national policy. The Council are advocating the use of just one approach within the policy whereas the paragraph 129 of NPPF makes no such prescription. The Council must be clear in policy that it encourages the use of a range of assessment frameworks and remove the specific reference in policy to the encouraged minimum design standards based on Homes Quality Mark and that it pays equal consideration to the outcome of any such assessment. In addition, the Council should remove the phrase until national policy allows otherwise. If national policy is to change to allow the implementation of alternative standards such as HQM through the local plan it will be for the Council to justify such a requirement through a focussed review of the local plan. Councils cannot seek to pre-empt national policy in this manner.

6.3 The Council should also amend the third paragraph which could cause confusion for applications and decisions makers as outlines the evidence required to demonstrate compliance with this policy. As outlined above paragraph 129 of the NPPF states that the Council can consider the outcome of any such assessment process, but it cannot dictate the assessment used nor require the assessment

to be undertaken in the first place. High quality and sustainable development can arise without the use of such assessment tools.

6.4 We recommend that The Council remove the specific encouragement to meet the HQM standards set out in the policy. In addition, given that the policy, as it relates to residential development, is one that seeks to encourage not require as such there is no need to demonstrate compliance with these standards. The paragraph should be amended to read:

- . *Compliance with the sustainable design requirements for non-residential development should be demonstrated via the following certificates (or future equivalent):*
 - 1 *'Pre-assessment estimator' at application stage;*
 - 2 *'Design stage' certificates prior to construction;*
 - 3 *Final certificates for all schemes six months post-completion*

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhust Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhust Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Written Representations accompanying this form for more detail.

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 3 Climate Change Mitigation and Adaptation

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H 2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

EN3 – Climate Change Mitigation and Adaptation: Energy reduction in new buildings

6.5 The Written Ministerial Statement (WMS) published in March 2015 stated the Government's intention to introduce improved energy efficiency requirements through Building Regulations. It went on to state that Councils should not seek to apply standards higher than those set out in building regulations other than the published optional technical standards. Some interim flexibility was provided allowing Councils to seek improvements in energy efficiency through local plans that were the equivalent of level 4 of the Code for Sustainable Homes until new regulations had been introduced.

6.6 However, following the publication of the WMS the Government did not take forward the legislation as indicated leaving the interim guidance in place which allows for a maximum improvement of 20% in relation to part L of the building regulations. The situation has now been clarified further within 6-012 PPG reiterating the Government's position as set out in the WMS. However, the Council's policy as set out in EN3 would result in some developments having to deliver energy efficiency improvements of greater than 15%. As such we would suggest that part 2 of the Energy reduction in new buildings section within Policy EN3 is amended to require total reduction of 15% using a combination of fabric first and renewables.

6.7 The Council will also need to monitor progress with regard to the Future Homes Standards which will see the improvements being suggested by the Council being brought into building regulations and as such make policies such as EN3 unnecessary.

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhurst Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Policy EN 9 Biodiversity Net Gain

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H 2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

EN9 – Biodiversity Net Gain Part b of the policy is unsound as it is not consistent with national policy.

Please see Written Representations accompanying this form for more detail.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

EN9 – Biodiversity Net Gain

6.8 Part b of the policy is unsound as it is not consistent with national policy. Firstly, the Council's policy approach to biodiversity net gain should not deviate from the Government's proposals on biodiversity gain as set out in the Environment Bill. This legislation will require development to achieve a 10% net gain for biodiversity. This is not set out as a minimum and to ensure clarity in decision making, we would suggest this prefix is deleted. It is the Government's opinion that 10% strikes the right balance between the ambition for development and reversing environmental decline. A 10% gain provides certainty in achieving environmental outcomes, deliverability of development and costs for developers. Removing the term minimum will not place a cap on the aspirations of developers who want to voluntarily go further but it will ensure that decision makers do not seek to go beyond 10%.

6.9 Secondly the Council cannot require a higher level of net gain through supplementary planning document (SPD). The relevant legislation defining the difference between Local Plans and SPDs is the Town and Country Planning Regulations (2012). This defines an SPD in regulation 2 as 'any document of a description referred to in regulation 5 (except and adopted policies map or statement

of community involvement) which is not a local plan.' Therefore, it can be concluded that whilst SPDs are Local Development Documents they are not local plans. Regulation 5 in turn states:

5(1) For the purposes of section 17(7)(za)(1) of the Act the documents which are to be prepared as local development documents are—

(a) any document prepared by a local planning authority individually or in cooperation with one or more other local planning authorities, which contains statements regarding one or more of the following—

(i) the development and use of land which the local planning authority wish to encourage during any specified period;

(ii) the allocation of sites for a particular type of development or use;

(iii) any environmental, social, design and economic objectives which are relevant to the attainment of the development and use of land mentioned in paragraph (i); and

(iv) development management and site allocation policies, which are intended to guide the determination of applications for planning permission;

6.10 Taken together these regulations mean that a local plan is a document that contains statements as to the:

- . development and use of land which the local planning authority wish to encourage during any specified period;
- . allocation of sites for a particular type of development or use; and
- . development management and site allocation policies, which are intended to guide the determination of applications for planning permission.

6.11 Therefore, any supplementary guidance being proposed cannot include anything that is intended to guide the determination of applications for planning permission – such as a level of biodiversity net gain above that required by legislation. Such policies can only be adopted in a local plan following the prescribed process. We would recommend that the phrase '*or greater where required by supplementary planning guidance*' should be deleted from policy EN9.

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhust Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Written Representations accompanying this form for more detail.

Policy EN 26 Sustainable Drainage

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H 2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

EN26 – Sustainable Drainage

6.12 We would expect a development to deliver a net reduction in runoff but it would seem that the Council are expecting, in some cases, significant improvements which may see developments having to reduce run off to rates below those on green fields. This would appear to be inconsistent with current guidance produced by Defra on this matter which suggests that a brownfield development must be as close as practicable to greenfield run off rates. This recognises that in some situations a development will not be able to deliver green field run off rates and that in such a situation it should seek an improvement over the existing run off rates on any previously developed site. Given the Government's focus on delivering more development on brownfield sites we would suggest it is essential that greater flexibility is provided in this policy. We would suggest that the policy is amended to require an applicant to show a net reduction that is as close as practicable to green field run off rates.

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhurst Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Written Representations accompanying this form for more detail.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Persimmon Homes
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 1 Housing Mix

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H2 and H 6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

H1 Housing Mix and H2 Housing Density

6.13 We note that policies H1 and H2 are concerned with housing mix and density. However, we are concerned about the real lack of detail on the Council's requirements. We would appreciate greater clarity as to the Council's aspirations for these policies.

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhurst Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Policy H 6 Housing for Older People and People with Disabilities

[TWBC: this representation has been input against Policies AL/HO 3, EN 2, EN 3, EN 9, EN 26, H 1, H2 and H6 – see Comment Numbers PSLP_2014, PSLP_2035, PSLP_2083, PSLP_2084, PSLP_2085, PSLP_2086, PSLP_2087 and PSLP_2088. The full representation is attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

H6 – Housing for older people and people with disabilities Parts 2 and 4 of this policy is unsound as it has not been justified.

Please see Written Representations accompanying this form for more detail.

6.0 Other DM Policies

6.1 The draft Plan includes a full suite of draft Development Management policies. Whilst many of these policies seem reasonable in their approach and requirement, we have some detailed concerns in respect of several of these policies.

H6 – Housing for older people and people with disabilities

6.14 Parts 2 and 4 of this policy is unsound as it has not been justified. Whilst it would appear likely that part M4(2) will be made mandatory through proposed changes to the Building Regulations this is still to be confirmed by the Government and as such it is important that the Council's requirement in H3 that all new homes are built to part M4(2) of the Building Regulations is justified. Persimmon Homes consider it the case that new homes built to the mandatory part M4(1) will be suitable for a significant proportion of the population throughout their lifetime. However, we recognise that there will be a need for some new homes to be built to higher accessibility standards.

6.15 The Council have provided evidence on the need for such homes in its Housing Needs Study and the consider this to be sufficient to support the proposal that all new homes should be built to part M4(2) of the Building Regulations. However, when considering the implementation of the optional standards it is important to note that footnote 46 in paragraph 147 in the NPPF states that policies on adaptable and accessible housing should be used "... where this would address an identified need

...". This would suggest that any policy should seek to address an identified need and there must be clear evidence as to how many such homes are needed.

6.16 The Housing Needs Study indicates that 30.8% of households contained at least one person with impaired mobility over the plan period. However, the study also states that only 8.1% of all households had a physical or mobility impairment and as such more likely to need a more accessible home. This position is not dissimilar to that seen nationally in the English Homes Survey. The study examined the need for adaptations in 2014/15 and noted that 9% of all households in England had one or more people with a long-term limiting illness or disability that required adaptations to their home. The survey also found that in 2014-15, 81% of households that required adaptations in their home, due to their long-term limiting disability, felt their current home was suitable for their needs and that only 10% of those households whose home required an adaptation were trying to move somewhere more suitable.

6.17 Therefore, whilst we recognise that with an ageing population there will be more people with mobility problems in future it does not necessarily lead to them needing a new home built to the M4(2) standard nor provide sufficient justification to require all new homes to be built to that. Indeed, for many older people a home built to current mandatory standard, which is significantly better than homes built prior to this standard, will be sufficient to meet their needs throughout their lifetime. Persimmon Homes recommends that the proportion of new homes required to be built to part M4(2) be reduced.

7.0 Summary and Conclusions

7.1 Persimmon Homes are broadly supportive of the Draft Plan and in particular Policy AL/HO3 which allocates our Site 'Land East of Horsemonden' for residential development.

7.2 Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- . Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- . Remove the requirement for the eastern area of the site to be at a lower density.
- . Confirm that vehicular access for the development will be taken via Goudhurst Road.
- . Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see Written Representations accompanying this form for more detail.

Notwithstanding our broad support for the Plan, we would ask for the following key changes to the Policy AL/HO3 to ensure that the Site is deliverable:

- Confirm that the Map 62 (Site Layout) is only intended to provide guidance as to how the Site is to be bought forward, and that future applications can, subject to reasoned justification, vary from this.
- Remove the requirement for the eastern area of the site to be at a lower density.
- Confirm that vehicular access for the development will be taken via Goudhurst Road.
- Confirm that the development is only expected to provide a health centre site and not deliver a health centre/building facility.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Persimmon Homes have an interest in land east of Horsmonden – Policy AL HO 3. Persimmon is also active elsewhere in the Borough and have an interest in ensuring the legality and soundness of the Local Plan. Persimmon should therefore wish to participate in the examination.

Question 8

Policy AL/BE 3: Land at Benenden Hospital (north of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_107, PSLP_108 and PSLP_124]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

"The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.."

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites "within settlements" and in "sustainable locations."

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development."

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6)

it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is **ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance.** Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: “...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4

already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Amanda Petch
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

PSTR/BE 1: The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_109, PSLP_110 and PSLP_111]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to

the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses

scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground.

AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall,

tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds,

sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these

reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.**

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA

suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. There are likely to be many people who will give up before they even get started.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, Not Stated data inputter to tick 'not stated' box.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Amanda Petch
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_109, PSLP_110 and PSLP_111]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and

beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate,

at Clevelands Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit**

(which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. There are likely to be many people who will give up before they even get started.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Amanda Petch
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 5.410 to 5.470

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_107, PSLP_108 and PSLP_124]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

"The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.."

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites "within settlements" and in "sustainable locations."

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development."

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create

links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap

fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Amanda Petch
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 5.410 to 5.470

Policy AL/BE 3: Land at Benenden Hospital (north of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 and 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_107, PSLP_108 and PSLP_124]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

"The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.."

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites "within settlements" and in "sustainable locations."

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development."

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create

links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap

fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_109, PSLP_110 and PSLP_111]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was

submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is

not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground.

AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall,

tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds,

sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes: The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these

reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : “....*In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.*”

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.**

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA

suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. There are likely to be many people who will give up before they even get started.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	William Bernard Phillips [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	William Bernard Phillips [REDACTED]
Comment ID	PSLP_229
Response Date	09/05/21 18:33
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.2
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Phillips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Policies AL/BE1, AL/BE3 and AL/BE4

Inset Map 18

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed* views that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses

on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that

residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for

the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- . The NPPF section 2 para 11 states: *“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.

2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good

reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Philips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish
Paragraph Nos. 5.410 to 5.470
Policies AL/BE 3 and AL/BE 4
STR 1-3 & 5-8
Inset Maps 17 & 18

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides: "*where within these Regulations a person may make representations on any matter or document, those representations may be made—*
(a) *in writing, or*
(b) *by way of electronic communications*".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been

told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

Amenities:

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: “...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	William Bernard Phillips [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	William Bernard Phillips [REDACTED]
Comment ID	PSLP_230
Response Date	09/05/21 18:33
Consultation Point	Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden (View)
Status	Processed
Submission Type	Email
Version	0.2
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Phillips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policies AL/BE1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC comment: Representation copied against policy PSTR/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses

on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that

residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for

the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- . The NPPF section 2 para 11 states: *“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.

2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good

reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	William Bernard Phillips [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	William Bernard Phillips [REDACTED]
Comment ID	PSLP_231
Response Date	09/05/21 18:33
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.3

Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Phillips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policies AL/BE3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC comment: Representation copied against policy PSTR/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses

on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that

residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for

the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- . The NPPF section 2 para 11 states: *“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Philips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End
Paragraph Nos. 5.410 to 5.470
Policies AL/BE 3 and AL/BE 4
STR 1-3 & 5-8
Inset Maps 17 & 18

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides: "*where within these Regulations a person may make representations on any matter or document, those representations may be made—*
(a) *in writing, or*
(b) *by way of electronic communications*".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been

told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

Amenities:

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: “...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Data inputter to enter their initials here	KJ
Question 1	
Respondent's Name and/or Organisation	Mr William Bernard Philips
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End
Paragraph Nos. 5.410 to 5.470
Policies AL/BE 3 and AL/BE 4
STR 1-3 & 5-8
Inset Maps 17 & 18

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides: "*where within these Regulations a person may make representations on any matter or document, those representations may be made—*
(a) *in writing, or*
(b) *by way of electronic communications*".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been

told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

Amenities:

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." **This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance.** Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: “...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy AL/BE4	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No
Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC comment: Representation copied against policy PSTR/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
 - . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
 - . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses

on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that

residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for

the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- . The NPPF section 2 para 11 states: *“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the

hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.

2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good

reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Question 1	
Respondent's Name and/or Organisation	Philip Pickard
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 14
5.91, 5.92, 5.93, 5.94

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Yes

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed “emergency exit” will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk). Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested ‘North’ secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit ‘extra access’ immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council’s planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area. *2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;* Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.
2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the "no cycling" rule there.
3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.
4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;* The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access. *7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Very significant road re-engineering will need to occur both at the Eridge Rd entrance (possibly involving the railway bridge as well) and at the proposed northern 'emergency access' exit on/near the corner of Hungershall Park and High Rocks Lane, where at the very least major parking restrictions would need to be applied. I do also wonder how long the latter exit would remain emergency only (it has a 'thin end of wedge' feel about it) and what that would mean for 'rat runs' and even greater traffic issues.

Flood issues are significant as has been noted. Again for our purchase in the area, the flood risk assessment shows some risks to the area of proposed development and indeed there is a form of levee (certainly not a natural feature) in the woods at the north-western extreme of this planning proposal that would appear to be designed to prevent water flow south-eastwards. A full plan would be needed to manage this in the event of any development.

Road widening/damage on the northern exit would likely be significant and create further restrictions for householders at the bottom of Cabbage Stalk Lane and into Hungershall Park Close. It is very difficult to see how this can be mitigated in any reasonable way.

Animals in the area would be significantly affected. We recently found a deer antler on a walk through the woods from the garden centre to the proposed 'emergency exit' in High Rocks Lane. We have seen deer walking down from the fields between Nevill and Hungershall Park and across the road into the woods on the south side of High Rocks Lane. These and other wildlife would be severely affected by loss of habitat on the scale proposed. Additionally, it is likely that diversity of fauna would also be lost. Again, it is difficult to see how this can be mitigated within the plan for this area.

I totally accept the need for a mix of new housing, but this cannot be so fixed as to need a greenbelt area (until recently) to be ploughed down when there are fallow areas in town. In this regard I am not just talking about the ones detailed in this planning proposal, but the new ones that are becoming more apparent as changes, not least retail, have accelerated through the Pandemic. Repurposing and redevelopment of some central areas could help reinvigorate suffering parts of TW at the same time as preserving green areas. Retail loss could be residential gain?

Finally, as someone who has recently moved more permanently into the TW area as a result of changes in the last year, I trust a major expansion of infrastructure and services will run alongside this development, or any that is finalised. I am struggling to find a GP surgery that has availability and I strongly suspect that a dentist will be equally difficult to secure. There is no point building the houses if the breadth of services needed by families are not expanding at least in proportion. I trust that is in hand?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It matters to me that a sensible balance is reached and not one that serves a limited constituency.

I believe major re-planning is necessary in the area and am not convinced the council is alert to all the opportunities (as well as risks) for our amenity of life in the Borough and in TW in particular. Having listened to a recent council meeting it was clear that some things were being pursued reasonably sensibly, but there seem to be huge longer term issues which are not really being faced, but with good planning are surmountable and would help regenerate the area.

I would like to contribute constructively if I can.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I believe I have made the necessary comments above, so will not repeat here bar one further comment. As part of a planning application I recently undertook in the vicinity I had to give detailed plans for landscaping involving tree planting, hedging (where types consistent with the area were (rightly) required), hiberniculae for invertebrates and other factors to encourage and maintain the local wildlife and fauna. I wonder to what end if a major swathe of established woodland that is directly connected to the land I am landscaping and to the wider greenbelt is to be ploughed down for housing and the increased traffic that will accompany it.

Question 1

Respondent's Name and/or Organisation Mrs Susan Pickett

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

Policy STR/SS3 The Strategy for Tudeley Village

[TWBC: this representation has been input against Policies STR/CA1 and STR/SS3 – see Comment Numbers PSLP_444 and PSLP_470]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.262 The land proposed for 'Tudeley Village' is within green belt and is also partly High Weald AONB. This proposal has not been thought through. So many additional houses would burden this countryside area. And although situated in Tunbridge Wells Borough Council, it is blatantly obvious that Tonbridge would bear the brunt of a larger population which it is not able to bear, IE doctors, dentists, schools etc Tonbridge rail station is nearer, also, than Tunbridge Wells. more cars for less parking availability. This development would alter irreparably the very important rural setting that it now enjoys. Think again please! The proposed site will encircle all Saints Church, Tudeley which has stood on its foundations for centuries. People coming and visiting this unique church with its rare chagall windows will not have a view over the Medway River valley to the North Downs which is currently available. Who wants to look at modern housing when out for the day?

also what about noise and light pollution? We are supposed to be reducing these things - not adding to them. To many cars and traffic on lanes and roads too small to take them. There is no infrastructure to accommodate this increase in population.

Flooding Over the past few years, flooding has been a problem that has increased. Concreting over vast areas of land which helps take water away will inevitably mean more 'run off'. Concrete is not absorbant. It is a known fact our climate is changing. We have far more rain now and for longer periods. Flooding is an ever increasing problem.

Nature What of the animal, insect and bird life which will be detrimentally affected by this development? Years of building works (and it will take years) can only do more harm than good. Please take into account the natural environment which will be irretrievably damaged should this development go ahead.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This proposed development is not acceptable. It is thoroughly ill-conceived and not thought through as I have previously stated. Ore land owner is beneficial to the Council but not to the environment.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.199 to 5.229 The whole of this proposal is objected to. It is misconceived; it is a massive development in the wrong place. It is dissected by a railway (5.204) - entirely inappropriate for a new settlement with no station, a school and other facilities.

All Saints Church (5.206) would be swamped by the development, and the extensive views to the north would be destroyed forever.

5.207 - Flooding The land proposed to be developed lies within Flood Zones 1 and 2. new run-off will only worsen the situation.

Please see the above comments for paragraphs 5.262 to 5.266 which have a direct bearing on the whole of the "Tudeley Village" proposal. [TWBC: for response to paragraphs 5.262 to 5.266 see PSLP_425].

Infrastructure should come first in any proposal of this magnitude.

Looking at the map on p.164, I cannot see an explanation for the large purple circles on Tudeley Road (3 in all) nor the smaller ones on the railway line (4 in all). What do they signify? They cannot be the "Junction improvements" as on the map legend, as they aren't at junctions. Please clarify. Maps 33 & 34 are relevant to this question.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

There are no modifications which would make these proposals acceptable. The development proposed is in the wrong place for the reasons I have set out. It is ill-conceived in its entirety.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mr Norman Pickett

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 The Strategy for Capel parish

Paragraphs 5.262 to 5.266

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.262 The land proposed for "Tudeley Village" lies within green belt and is partly High Weald AONB. There are no "exceptional circumstances" to justify a new settlement on this land. The proposal for the new village is misconceived and entirely inappropriate. A significant increase in the local population (currently some 950 souls) by some 2800 new houses would overburden ancient woodland and completely change for ever the rural setting and way of life.

5.263 Flooding Five Oak Green, Capel, The Postern and surrounding areas are susceptible to flooding. Some of the land proposed to be built upon lies within Flood Zones 1 & 2. It is inevitable that a huge development will massively increase run off and thereafter existing homes already regularly inundated, particularly at Five Oak Green. In times of flood, the River Medway is flowing at capacity and beyond. Increasing run-off will only worsen this.

5.264 Rural Lanes The existing network of designated rural lanes will be overburdened by an inevitable increase in traffic. They are already running at capacity. The proposal of new roads (under Policy STR/SS3) is mis-conceived as they will do nothing to take traffic away as they run in the wrong direction - most people will want to access Tonbridge facilities, including the station, not go towards Colts Hill.

5.265 "Tudeley Village" proposal is in the wrong place - it's too close to developments towards Paddock Wood, areas of AONB, green belt and agricultural land. The Council has failed to consider properly an alternative proposal at Castle Hill - close to the A21 and with good access to shops, leisure facilities and transport connections. Tunbridge Wells Borough Council may prefer to deal with a single landowner (The Hadlow Estate) for their proposed new "Garden Village", which makes life easier as to contracts, conveyancing etc, and also because a development at Tudeley is far from the centre of Tunbridge Wells, on the extremity of its Borough - in fact closer to Tonbridge Town Centre, than Tunbridge Wells Town Centre.

5.266 "Land to the east of Capel ..." "... part of a significant extension to Paddock Wood for 3490-3590 new homes". This is a colossal increase to the existing populations of both Paddock Wood and Capel, and is unacceptable for a relatively small rural area. It would damage irretrievably the locality and its rurality. This is why any further proposed development at Capel "The Garden Village" would be simply too much. It is urbanisation on a massive scale. Light and noise pollution will be increased dramatically, even without the Tudeley Garden Village proposal.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

There are no modifications which would make these proposals acceptable. The development proposed is in the wrong place for the reasons I have set out. It is ill-conceived in its entirety.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Pickhill Developments Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Pickhill Developments Ltd control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft. The Pickhill land is site 70.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

1.3.2 It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.3 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.4 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Vision and Strategic Objectives

1.3.5 The pre-submission plan is underpinned by vision and strategic objectives.

1.3.6 The vision is set out below:

[TWBC: PSLP Vision was duplicated here - see full representation].

1.3.7 In order to deliver the vision the plan sets a number of strategic objectives:

[TWBC: PSLP Strategic Objectives were duplicated here - see full representation].

1.3.8 Response

1.3.9 We broadly support the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes. However, the vision and objectives could be more positive and set a framework whereby suitable development opportunities are actively embraced. As drafted, the message is clear that meeting need is somewhat enforced.

1.3.10 Indeed, we would suggest some minor modification to ensure that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read.

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.11 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.12 With the above modifications, the objectives and vision will then be positively prepared.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Pickhill Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village. 1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

[TWBC: for further representations on Policy STR/CRS 1 and Policy STR1, please see PSLP_1957 and PSLP_1958 respectively].

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.3.10 Indeed, we would suggest some minor modification to ensure that that the plan is positively prepared and fully aligned with the provisions of the National Planning Policy Framework ('NPPF'). Indeed, we consider that the vision should be modified to read:

'Growth in new homes, jobs, and supporting infrastructure to meet boroughwide needs will actively be pursued in full and in a manner that best compliments the distinctive qualities of the borough'.

1.3.11 We consider that objective 2 should be modified to read:

'To significantly boost the supply of all forms of housing to meet the full needs of our population, with particular emphasis on affordable housing'

1.3.12 With the above modifications, the objectives and vision will then be positively prepared.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Pickhill Developments Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Pickhill Developments Ltd control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft. The Pickhill land is site 70.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.2 Land at Gate Farm, Hartley Road, Hartley (Cranbrook)

1.2.1 The site to which this representation relates is located on the northern side of Hartley Road/A229 and is approximately 0.23 hectares in area. It is located to the south west of Cranbrook outside built confines but adjacent to the built up area of Hartley. The site is deliverable, would provide affordable dwellings and the application is supported by the Parish Council.

[TWBC: for site plan please see full representation attached].

1.2.2 The land sits immediately adjacent to residential development to the north. The site falls entirely within the High Weald Area of Outstanding Natural Beauty AONB.

1.2.3 There are several listed buildings in the vicinity of the site, including:

(i) Hartley Gate Farmhouse (Grade II listed);(ii) Hartley Farmhouse (Grade II listed);(iii) Bull Farm House (Grade II listed); and(iv) Barn 50 Yards North of Bull Farmhouse (Grade II listed).

1.2.4 The surrounding area is characterised by the settlements of Hartley and Cranbrook, residential development with in and around those settlements, commercial land.

1.2.5 To the northeast are residential properties. Opposite the site is the well-established Hartley Dyke Commercial Centre, consisting of Juniors Day Nursery, the Hartley Dyke Coffee House and Farm Shop and several other commercial premises.

1.2.6 In terms of public transport, there are two bus stops located approximately 160m to the east of the site providing a service to Maidstone Town Centre, Loose, Staplehurst, Cranbrook and Hawkhurst. Staplehurst, approximately 10km to the north of the site, provides a regular train service to London, with up to 3no. trains per hour in peak periods (travel time under 1 hour to London Charing Cross and Cannon Street).

1.2.7 The site is not subject to any wider policy designations. The Environment Agency mapping also confirms that the site does not fall within a flood risk zone.

1.2.8 The site has been subject to previous smaller scale development proposals as follows:

- 84/00175/OUT - Outline application for 8 semi detached dwellings -Refused; and
- 96/00283/FUL - 3 Detached dwellings – Refused.
- 17/03481/FULL - Proposed erection of 8no. dwellings with access, parking, landscaping and replacement of TPO tree T2.

1.2.9 Planning Application ref: 17/03481/FULL subsequently went to appeal (APP/M2270/W/18/3203543). The appeal was dismissed, but in doing so the Inspector narrowed the sole issue to the effect of the proposed vehicular access on highway safety (i.e. it was suitable in all other respects). The Inspector endorsed the principal of development and had no issue with the impacts of that scheme on the AONB, the character and appearance of the area and on settlement morphology.

1.2.10 As part of the appeal process, a Statement of Common Ground (SoCG) was agreed by the appellant and Tunbridge Wells Borough Council.

1.2.11 The Statement of Common Ground confirmed that the appellant and the LPA agreed that:

i. the site and the proposal represented sustainable development;ii. that the Landscape Officer had no objections to the appeal scheme and any impact on the locality would be localised and would need to be viewed in the wider context of housing need;iii. there are no significant long-range views of the site and only glimpsed medium views of the site;

iv. KCC Highways raised no objections in terms of parking or capacity grounds;v. there were no objections to the proposed development based on impacts on protected species;vi. there was no objection to the appeal proposal in relation to trees or arboricultural impact, subject to the retention of the TPO Tree T1;vii. there were no objections raised on the loss of agricultural land at the site;viii. there were no objections raised to the loss of agricultural land at the site;ix. there were no objections to the appeal based on flood risk or drainage grounds;x. there were no objections to the appeal based on heritage grounds; andxi. the proposal did not constitute major development within the AONB.

1.2.12 In addition to the above, Cranbrook and Sissinghurst Parish Council had supported the application. We reiterate that the proposed development would provide truly affordable 2 bed terraced housing and 3 bed semi detached housing which are of high demand in the vicinity.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

1.3.2 It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.3 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.4 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Pickhill Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village. 1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

[TWBC: for further representations on Section 3: Vision and Strategic Objectives and Policy STR1, please see PSLP_1957 and PSLP_1958 respectively].

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Pickhill Developments Ltd in respect of the Tunbridge Wells Borough Council Regulation 19 Local Plan consultation.

1.1.2 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.1.3 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.1.4 This submission comments on the plan having regard to these tests of soundness as well as wider legal compliance. However, for context, we first provide an overview of the land within Pickhill Developments Ltd control, which was included in the Regulation 18 Draft Local Plan as an allocation (draft policy AL/CRS 6) for residential development (Known as 'Gate Farm, adjacent to Hartley Road and Glassenbury Road, Hartley (plus Bull Farm) (SHELAA reference: Sites 59, 70, 323 & 345, and Late Site 53)' but subsequently omitted from the pre-submission draft. The Pickhill land is site 70.

1.1.5 Based on the current national and local planning context, we object to the site's omission, which was not based on sound planning grounds but as a basis to help defend against a s78 planning appeal. The outcomes of that appeal, and the commentary of the Inspector, provides a clear basis to conclude that the land is a suitable location for proportionate plan led growth.

1.3 Wider Assessment of Soundness

1.3.1 The TWBC Draft Local Plan (herein referred to as 'the plan') sets out the spatial vision, strategic objectives, and overarching development strategy for the borough.

1.3.2 It details overarching place shaping policies for each parish and settlement, as well as site specific allocations to deliver the strategy and detailed policies to be applied to all new development.

1.3.3 The plan will set the agenda for development across the borough to 2038 and replace the current Development Plan, which comprises the Local Plan 2006 (saved policies), the Core Strategy 2010, and the Site Allocations Local Plan 2016.

1.3.4 This representation comments on the following elements of the plan:

• Vision and Strategic Objectives; • Development Strategy and Strategic Policies; • Place Shaping Policies; and • Development Management Policies.

Development Strategy and Strategic Policies (Policy STR1)

1.3.13 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.3.14 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.3.15 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Government's standard method and the 2014-based household projections. We support this approach.

1.3.16 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.3.17 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: Figure 5 Key diagram duplicated here from PSLP - see full representation attached].

1.3.18 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: Policy STR1 duplicated here from PSLP - see full representation attached].

1.3.19 By way of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.3.20 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.3.21 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.3.22 The full proposed distribution of development is set out below.

[TWBC: Table 4 Distribution of housing allocations duplicated here from PSLP - see full representation attached].

Response

1.3.23 We agree that TWBC is capable of meeting its need in full and support this approach to plan-making. However, given its role in failing to fulfil the duty to cooperate with its West Kent

Neighbours, we consider the review process should cease and a cohesive and coordinated approach be progressed with the relevant surrounding authorities. Failing to work with the West Kent Authorities represents a rejection of any form of genuinely strategic thinking and planning and opportunities to meet the full needs of the housing market area is likely to be lost. By not assisting in this process the plan is not positively prepared, is not justified and is therefore not sound or legally compliant.

1.3.24 We broadly support the general thrust of the development strategy, which proposes a strategy to meet the housing needs of the borough with a dispersed growth approach. Nonetheless, we have concerns regarding the deliverability of the strategy. The Council's Housing Trajectory Topic Paper states that for Tudeley Village (STR/SS 3), it is proposed that for the first 10 years of delivery from 2025/26, 150 units are expected per annum, increasing to 200 per annum during the years after. For the plan period, 2,100 homes are allowed for.

1.3.25 Based on this statement, we say that the proposed trajectory is potentially over optimistic and the assumption that a new village is likely to be found to be acceptable via the examination process, be masterplanned, obtain planning consent, deliver key infrastructure and to commence delivering 150 dwellings per annum from the period 2025/26 is wholly unrealistic.

1.3.26 In this regard, we would draw attention back to the 2016 document published by Nathaniel Lichfield's and Partners (NLP) - 'Start to Finish: How Quickly do Large-Scale Housing Sites Deliver', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on a large number of sites across England and Wales. It identifies that the average lead in time for the submission of a planning application is 3.9 years, from the date the site is first identified. In terms of the planning approval period, for larger scale sites (2,000 + homes) this is circa 6 years. In summary, based on real life case studies, and the scale of development proposed, housing is unlikely to be delivered at Tudeley until circa 8 years after the first planning permission is approved.

1.3.27 After planning permission is granted, larger sites start to deliver within a year and the average build out rate thereafter is 161 dwellings per annum, although it can be as high as 301 dwellings per annum.

1.3.28 On the basis of this research, if the Local plan is adopted by 2022, planning permission approved by 2024 and delivery commences within 6 years (2030), the likely deliver for the plan period would be significantly less than envisaged by the Council, with minimal units being delivered within the current plan period.

1.3.29 Taking the above into account, our view is that the Council has applied an overly optimistic development trajectory for the delivery of strategic sites, both in terms of the start date for completions and the expected build out rates.

1.3.30 Given the absence of any similar scale strategic sites in Tunbridge Wells Borough as a point of comparison, one could have regard to similar scale delivery in neighbouring authority Tonbridge and Malling Borough. In this respect, we provide evidence below of its three key strategic sites and the associated delivery rates (derived from the Tonbridge and Malling BV Annual Monitoring Report).

1.3.31 Kings Hill is an extremely prudent example to consider in the context of the Paddock Wood extension and new garden village at Tudeley, how deliverable this would be. Indeed, Kings Hill was a new village started in 1989 near land previously occupied by RAF West Malling. The concept was for a multipurpose site of both residential and office business space. The development is still being delivered some 30 years later, despite having multiple national housebuilders delivering different phases concurrently. Based on the most up-to-date delivery data for the last decade, Kings Hill has only delivered 131 dwellings per annum, despite being a highly desirable location and multiple developers delivering concurrently. Furthermore, the earlier delivery phases we delivered at lower rates given the need to front load infrastructure.

1.3.32 Therefore, we consider that whilst some development may come forward in the plan period from the two proposed strategic sites, in reality these strategic allocations are longer term aspirations that will extend beyond 2038.

1.3.33 Having regard to paragraph 11 of the NPPF, plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change.

1.3.34 The over reliance upon Tudeley Garden Village is such that if it is not delivered as planned there is no flexibility to address any resulting shortfall in housing. Accordingly, the plan is unsound on the basis it conflicts with paragraph 11 and lacks sufficient strategic flexibility.

1.3.35 Notwithstanding our objection, the over reliance of the site within the trajectory need not be fatal. In order to remedy it, we consider that any delivery from Tudeley should be assumed to come forward in the next plan period, once there is a greater degree of certainty that the scheme will be progressed and is acceptable from a Green Belt perspective. In the intervening time, further sites such as our client's land should be added to offset the loss of the housing relied upon from Tudeley.

1.3.36 In respect of the wider, strategy, we support the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area. Nonetheless, we do not accept the Council's conclusion that there is very little scope for adding much in the way of further housing numbers to the rural settlements. To the contrary, the objective of the planning system is to deliver the right homes in the right locations.

1.3.37 As the borough is covered by more than 60% AONB designation, it is clear that a vast number of its residents wish to live in a village setting and within the eastern aspect of the borough. As such, the needs of these people must be met in the most sustainable manner possible. It is not reasonable to assume that residents in these areas, and those that cannot afford their own homes, wish to be displaced to the more built up non-Green Belt areas nor to congregate in the Paddock Wood/Tudeley corridor.

1.3.38 Indeed, it can be seen by the Core Diagram that the proposed strategy is to direct development to the west of the borough with far more limited growth to the east.

1.3.39 Accordingly, we would encourage the Council to increase the balance of small and medium sized sites to the eastern of the borough. Many of these sites, including our client's land, can deliver quickly and usually require limited intervention to infrastructure.

1.3.40 As explained, our client's land is suitable, available and achievable and was, in our view, removed as response to our client's planning appeal rather than as a result of and robust planning evidence.

Green Belt vs AONB Release

1.3.41 Policy SRT9 sets out that exceptional circumstances justify the proposed release of Green Belt land for development.

1.3.42 We broadly support this conclusion and agree that some greenfield Green Belt release is needed to meet housing need in the areas of the borough affected by that designation. However, we disagree with the scale of Green Belt release as an alternative to sensitive redevelopment of AONB land.

1.3.43 The Council's unmet housing need is sufficient to amount to exceptional circumstance to justify a review of Green Belt boundaries. Indeed, this approach has been endorsed by the Court in the Hunston High Court judgment in St Albans where judge stated:

'Having identified the full objectively assessed needs figure the decision maker must then consider the impact of the other policies set out in the NPPF. The Green Belt policy is not an outright prohibition on development in the Green Belt. Rather it is a prohibition on inappropriate development in the absence of very special circumstances. It is entirely circular to argue that there are no very special circumstances based on objectively assessed but unfulfilled need that can justify development in the Green Belt by reference to a figure that has been arrived at under a revoked policy which was arrived at taking account of the need to avoid development in the Green Belt.'

1.3.44 It should also be noted that neighbouring authorities such as Sevenoaks, Tonbridge and Malling and Tandridge are all instigating Green Belt reviews based on need being the driver of Exceptional Circumstances.

1.3.45 However, as set out above, we are concerned with the Council's approach to the scale of the Green Belt release vs that of AONB land.

1.3.46 From a Green Belt context, *Calverton Parish Council v Nottingham City Council, Broxtowe Borough Council and Gedling Borough Council* [2015] EWHC 1078 (Admin)) provides very clear guidelines for determining whether exceptional circumstances exist.

'planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters:

(i) the acuteness/intensity of the objectively assessed need (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;(iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt;(iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and(v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent'.

1.3.47 Considering these parameters, the acuteness of the local housing need is clear. The Council's housing need (12,200 for the plan period) is more than double of that previously been required (6,000 between 2006 and 2026) and many urban sites have been depleted since the last plan review. However, it must also be recognised that only 22% of borough lies within the Metropolitan Green Belt and designated area.

1.3.48 In respect of the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced, this is to be judged on a site by site basis and small scale release can be mitigated with relative ease given many have limited role in fulfilling the requirements of the Green Belt. However, the same cannot be said of a new settlement within the Green Belt whereby the impact by way of loss of openness would be substantial.

1.3.49 Taking the above into consideration, it is our view that the Calverton judgement sets out very clear parameters for assessing whether Exceptional Circumstances exist and that a sound case could be made for releasing some Green Belt land in line with NPPF guidance. However, we do not consider the evidence exists to justify the scale currently proposed within the plan, at least not until all reasonable alternatives have been assessed.

1.3.50 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.3.51 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.3.52 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.3.53 The above being the case, we believe that the housing currently being pursued on Green Belt land at Tudeley could potentially be disbursed across the wider extent of the non-Green Belt areas of the borough in a manner that is not major development and thus not requiring an exceptional circumstance test to be met. For example, on the sites like our clients that were wrongly omitted.

1.3.54 Turning to the requirements of paragraph 172, there is an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous difficulties in keeping pace with delivery has term with a deficit in five year supply.

1.3.55 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.3.56 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

- Ancient Woodland (approximately 16% of the borough)- Circa 60 Local Wildlife Sites (approximately 11% of the borough)- Ten Sites of Special Scientific Interest (SSSI)- Five Local Nature Reserves (including one Community Woodland)- One Regionally Important Geological Site, at Scotney Castle Quarry.

1.3.57 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.3.58 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.3.59 Given the above constraints, it is acknowledged that planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the Green Belt and AONB is patently met and with every development comes an opportunity to moderate the effects of development, including substantial areas of landscaping and associated ecological and heritage buffers and the opportunity to increase public access to the land.

1.3.60 Ultimately it is our view that the Council has wrongly taken the AONB designation and treated it as a 'higher bar' or more significant constraint to development than Green Belt. We consider this approach to be wrong and inconsistent with the NPPF.

1.3.61 As a fundamental principle of planning, there is no barrier to development within AONB. It is a landscape designation and indeed much of the AONB is characterised by built up areas, including villages and towns such as Matfield, Hawkhurst and Cranbrook that are washed over by the designation. In planning terms it is entirely possible to develop within, or adjacent to these (and other AONB) settlements and have development sensitively integrate within the protected landscape. In contrast, Green Belt is an absolute constraint and exists to fulfil a strategic planning role. Once encroachment occurs, of any scale or quality, permanent harm is caused.

1.3.62 The NPPF tells us that the Government attaches great importance to Green Belts and the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. The essential characteristics of Green Belts are their openness and their permanence. In releasing land within the Green Belt the ability to mitigate the impact does not exist in the same manner as it does within the AONB.

1.3.63 The above context in mind, whilst we support a level of Green Belt release, we object to the soundness of the Council's plan on the assumption that Green Belt has been treated as a lesser constraint than the AONB area of the borough. This assumption has dictated the entire growth strategy and renders the strategy inconsistent with the NPPF, not justified and not positively planned.

1.3.64 The over estimation of harm to the AONB, and under estimation of the strategic impact of Green Belt release, is such that this matter can only be addressed through main modification and the redistribution of some of the proposed growth.

1.3.65 Finally, it is important to address that demographically the eastern AONB extent of the borough, characterised by rural villages, represents some of the most affluent part of the borough. Accordingly, there is a risk that the strategy as drafted seeks to concentrate development to the more deprived areas so as to preserve the status quo in the more affluent villages whilst not delivering housing of all tenures throughout the entire borough meeting the borough wide housing need.

Housing Delivery

1.3.66 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.3.67 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where

a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.3.68 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area.

1.3.69 Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.3.70 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times to ensure the new plan is sufficiently flexible.

1.3.71 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.3.72 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.3.73 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that a far more significant buffer or contingency is needed if the new plan is to be effective.

Maintaining a Five Year Housing Land Supply

1.3.74 The continued need to deliver more houses is reflected within the NPPF. In particular, paragraph 11 reiterates the presumption in favour of sustainable development and that plans should positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. Furthermore, strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas.

1.3.75 The NPPF requires Local Planning Authorities to ensure that their Local Plan meets the full needs for market and affordable housing. Policies for the supply of housing should not be considered up to date if the Local Planning Authority cannot show a robust five year supply of housing land and cannot fulfil the requirements of the Government's Housing Delivery Test.

1.3.76 It is common ground that the LPA is not currently able to demonstrate a robust five year housing land supply pending the outcome of the development plan review process. Indeed, based on the latest published update is agreed that the Tunbridge Wells Borough Council Five-Year Housing Land Supply Statement 2019/2020 (September 2020) that the supply to be 4.83 years, an improvement on the 4.69 years published for the period 2018/2019.

1.3.77 Nonetheless, we would express our caution in accepting there has been a material improvement in position over the last monitoring year and that the Council is close to achieving a robust supply of land. Published data shows that within the latest monitoring year the annual housing delivery target was missed by 204 units and the published supply only increased by 82 homes. As such, the overall supply context actually worsened by 122 homes. Indeed, the projected supply is a single unit more than it was when the 2017/18 updated position was published suggesting little genuine progress in increasing the supply of land.

[TWBC: for table showing information extracted from the LPA's published supply statements, see full representation attached].

1.3.78 Based upon the evidence, the Council's supply position appears much more robust than it really is owing to the repeated resetting of the base date upon which the five year supply calculation is based. The justification for this is the Standard Method takes into account previous delivery so there is no need to separately address any previous under-supply.

1.3.79 Whilst we do not challenge the fact that guidance permits this, the underlying effect of resetting the base date is to disguise a worsening situation as an improvement. This allied with a persistent failure to meet historic targets means that there must be a clear basis for assuming that adoption of the pre-submission Local Plan will result in an immediate step change in decision making and delivery therefore the plan fails the test of being both positively prepared and effective.

Affordable Housing Need

1.3.80 There is a chronic affordable housing need within the Borough. In this respect, The LPA's SHMA (2015) finds that the borough would need 341 affordable homes per annum to meet their housing needs.

1.3.81 The more recent Housing Needs Study (2018) prepared to accompany work on the pre-submission Local Plan, further assessed affordable requirements by taking into account the need from existing and newly-forming households within sub-areas of the borough of Tunbridge Wells, and comparing this with the supply of affordable housing. This assessment reveals that there is a net annual imbalance of 443 affordable dwellings across the Borough.

1.3.82 The LPA's Local Plan Housing Need Assessment Topic Paper (2019) concludes that the corrected affordable housing need over a 15-year period is actually 391 dwellings/year.

1.3.83 In terms of past delivery, Table 26 of the Annual Monitoring Report 2018/19 outlines the completion rates for affordable units, with an annual average delivery rate of just 82.5 affordable units per annum for the period 2006 to 2019.

1.3.84 Based on this context, immediate delivery of onsite affordable housing is a significant benefit that should weigh heavily in devising a new strategy. In this regard, the absence of a cogent strategy for a new garden village places grave uncertainty as to whether it can deliver at the same rate as non-strategic sites. Even if it would, there is likely to be a long delay with any affordable being delivered towards the back end of this current plan period. In the context, the plan fails to put in place a robust strategy to meet affordable need and is therefore ineffective, not justified and inconsistent with National Planning Policy.

1.3.85 This being the case, removing the reliance of delivery of Tudeley Garden Village in this plan period, and supplementing the plan with genuinely immediately deliverable sites, capable of providing affordable housing, would be an appropriate remedy.

Place Shaping Policies

1.3.86 The place shaping policies establish the spatial priorities for different areas in the borough, organised according to non-parish and parish areas. For each area, there is an overarching policy that development should adhere to and details are provided for individual allocated sites that will deliver the quantum of development proposed. The site-specific allocations provide both strategic and development management guidance.

1.3.87 Policy STR/CR1 sets the proposed strategy for Cranbrook and Sissinghurst parish and states that Approximately 415 to 429 net new dwellings will be allocated. This represents a substantial reduction on the 718-803 new dwellings that were proposed as part of the Regulation 18 plan. Furthermore, the draft allocations for Hartley have been removed in their entirety.

[TWBC: for extract of proposed proposal map for Cranbrook see full representation attached].

1.3.88 Based on the above context, the place shaping aspects of the strategy are unsound and require modification, including the redistribution of housing proposed at Tudeley to genuinely deliverable sites like our client's land at Hartley that is not major development and is not requiring of an 'exceptional circumstances' case for the land to be released.

1.3.89 As outlined above, Hartley is a moderately sustainable location as found by the Inspector during the course of the recent appeal. Indeed, it is situated within the heart of the hamlet of Hartley and in close proximity to the range of services available in Cranbrook.

1.3.90 The site benefits from good access to public transport links. The bus stops in closest proximity to the site are located on the A229 Hartley Road, approximately 3 minutes' walk to the south of the site access. From these bus stops, Routes 5 and 349 are accessible providing links to Maidstone and Hastings. Further bus stops are located approximately 5 minutes' walk to the north of the site access, again on the A229 Hartley Road. In addition to Routes 5 and 349, Routes 267 and 268 can also be accessed providing links to Tonbridge and Tunbridge Wells. Accordingly, there are opportunities for access to services and facilities without reliance upon private vehicle.

1.3.91 Staplehurst Railway Station is located approximately 11km to the north of the site (via the A229 Hartley Road), equating to a 14-minute drive. From this station, Priory can be accessed, with trains departing to and from London up to six times per hour during weekday peak periods. Additionally, Etchingham Railway Station is located approximately 12km to the west of the site by road and provides access to regular train services between Hastings, Tunbridge Wells and London.

1.3.92 Within the vicinity of the site, there are a number of Public Rights of Way (PRoW) provided, as shown in Figure 2.2 of the supporting Transport Statement [CD6.10]. These routes provide safe, pleasant off-carriageway access to the surrounding countryside. National Cycle Route 18 routes along Park Lane and Water Lane, approximately 1.1km to the south of the site access. This route provides a link between Canterbury and Tunbridge Wells, via Ashford and Tenterden.

1.3.93 In addition to transport linkages, there is access to services by foot. Hartley Farm House and Coffee Shop are accessible from the site in under a five-minute walk. Additionally, a number of services and amenities can be accessed in nearby Cranbrook. These services include further public transport facilities, a supermarket, places of worship, primary and secondary schools, a doctors' surgery, dental practices, banks, a pharmacy, a post office and several public houses. Cranbrook can be accessed via a 25-minute walk, a 6-minute cycle, a 9-minute bus journey or a 4-minute drive.

1.3.94 From a wider perspective, achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives). These being economic, social and environmental objectives.

1.3.95 In this respect, the site is suitable, sustainable, available and deliverable for development, and would help contribute to the borough's immediate housing need in a timely manner. We note that paragraph 68 of the Framework supports the development of small and medium sized developments as they can often be 'built out' quickly.

1.3.96 Household expenditure generated by future residents will help to support economic activity locally and help to sustain the jobs and services within the local area. The new dwellings will also contribute to the public purse in respect of Council Tax and the New Homes Bonus. The scheme will also be capable of contributing to local services and infrastructure.

1.3.97 The site has the opportunity to provide for a quality residential development to meet the needs of the local population. The proposed development can provide circa 8-10 additional homes to meet this supply. This includes a policy compliant mix of market and affordable units.

1.3.98 Having regard to these matters, we challenge the LPA's deletion of the site. Paragraph 103 of the NPPF is clear that the planning system should actively manage patterns of growth and development should be focused on locations which are or can be made sustainable through limiting the need to travel and offering a genuine choice of transport modes. The close proximity of the site to Cranbrook and the services offers residents far greater access to facilities than many of the smaller rural settlements that have defined LBD such as Benenden, Brenchley and other tier three settlements. Accordingly, in a boroughwide context, the appeal site is sustainable.

Development Management Policies

1.3.99 In addition to our comments on the strategy, we have reviewed the proposed replacement development management policies as set out in chapter 6 of the document.

1.3.100 In general terms, we would refer back to paragraph 15 of the NPPF that promotes succinct and up-to-date plans, which provide a positive vision.

1.3.101 As a general comment, there are large numbers of policies that effectively seek to provide a localised policy approach that mirrors the NPPF. For example, good design, protection of heritage assets etc. Not only are these policies repetitive, but many are of such prescriptive detail that they are neither positively prepared nor flexible enough to allow for a range of different circumstances. On this

basis, we would recommend that the majority of proposed policies are deleted where they offer nothing beyond the guidance already contained in the NPPF. This will also avoid the plan being quickly rendered out of date in the event of a change to the NPPF.

1.3.102 Turning to detailed policies, there are a number of contradictory elements that need to be remedied. For example, policy EN1 seeks to ensure development must respect the established character and surrounding form. However, policy EN3 places significant emphasis on measures to radically reduce greenhouse gas emissions.

1.3.103 The provision of a step change towards more sustainable construction and climate change is, inevitably going to result in a need for a change in attitude towards design, material and construction. Accordingly, a cohesive policy approach is needed that allows innovative and different design if supported on wider environmental and planning grounds. As drafted the policies fail to provide clear direction to the user.

1.3.104 A number of policies also seek to provide guidance rather than policy. For example, policy EN4 seeks to clarify what information is needed in order to assess a heritage proposal. This level of information is already established via the NPPF and should instead feature within a supporting SPD not policy.

1.3.105 Turning to housing policies, policy H2 states that development should make efficient use of land, having full regard to the context of the site, including its character, landscape setting, topography, surrounding built form, and access to infrastructure and services.

1.3.106 In our view, this policy adds nothing beyond the advice contained in the NPPF and therefore adds little. It also goes against the principle of preparing succinct Local Plans.

1.3.107 The Council will be aware of wider country wide discussions regarding the viability of providing social rented accommodation as part of a wider offer. Such provision is becoming increasingly difficult and without robust policy in place that addresses this matter, this matter is likely to significantly slow delivery.

1.3.108 In summary, whilst this overview is not exhaustive, we do have concerns about the nature of the proposed policy framework and the degree to which it appears to be trying to limit and frustrate development. Accordingly, in the interests of positive planning, we recommend that the policy framework is simplified and refined and subject to further detailed consultation and focussed on planning matters.

1.3.109 Finally, paragraph 6.335 has regard to development viability and places the onus on the Developer to demonstrate the 'price paid for land' when testing viability. It also requires applicants to factor in on site mitigation measures as well as measures to mitigate the impact of development. By way of response, viability assessments should be based upon Benchmark Land Value in accordance with the NPPF/NPPG guidance. Furthermore, the detailed constraints and infrastructure needs are not always known at the outset, nor is it possible to make informed decisions on mitigating matters such as biodiversity net gain until late in the development process. As such, viability cases must be assessed in an open manner based on the merits and unique circumstances of the sites on their own merits. Failure to recognise this means that the plan is neither positively prepared nor effective.

1.4 Legal Compliance

1.4.1 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.4.2 The Council has undertaken public consultation at various stages. Furthermore, it has liaised with the development industry via Agents Forums and as such we raise no objection to this aspect of legal compliance.

1.4.3 From a wider perspective, and having regard to the duty to cooperate, there is grave concern in respect of the degree of cross boundary working and the extent to which Tunbridge Wells Borough has genuinely sought to assist with unmet housing need arising from neighbouring authorities. Indeed, the Sevenoaks, Tonbridge and Malling and Wealden Local Plans have all recently failed to pass through

independent examination because of inadequate efforts to work collectively. Given these failures, it is difficult to conclude that Tunbridge Wells Borough Council should be absolved of similar criticisms.

1.4.4 Indeed, within the Duty to Cooperate Topic Paper the Council confirms that it relies upon the Statements of Common Ground (SOCG) agreed with Sevenoaks DC in May 2019, yet this agreement was deemed inadequate for Sevenoaks to have properly discharged its duty to cooperate. It was seen as too little too late.

1.4.5 The topic paper then states that an updated SoCG between TWBC and SDC is currently being prepared, but is delayed due to ongoing legal action by SDC following an adverse decision by the High Court (note this was Court of Appeal) in relation to its own Local Plan. That Court of Appeal judgement has now been handed down and reinforces the failure to discharge the duty.

1.4.6 Having regard to the above, we are concerned about the degree to which the Council has complied with the statutory framework for preparing a new plan, albeit we will reserve our position on this matter until all final consultation documentation and statements of common ground have been published.

1.4.7 In any event, the deletion of a vast number of suitable sites at the Regulation 19 stage would suggest that there are opportunities to meet the needs of the adjacent and potentially more constrained neighbours and that this is a matter that should be address via the plan making process, collectively with the West Kent neighbouring authorities, rather than Tunbridge Wells proceeding ahead in isolation.

1.5 Summary and Conclusions

1.5.1 In summary, this representation has been prepared on behalf of Pickhill Developments Ltd in response to the Tunbridge Wells Borough Council Pre-submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy ahead of Examination.

1.5.2 We support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Nonetheless, we object to the exclusion of our client's land at the late stage of the process, the deletion of which is unsubstantiated and based on unsound conclusions. Furthermore, we object to the reduced growth promoted around Cranbrook and Hartley.

1.5.3 Finally, we consider that the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. Moreover, the Council have applied overly optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village. 1.5.4 In our view, further small to medium sites are needed to remedy these matters or soundness and such additional sites should be directed to sustainable locations such as Cranbrook and Hartley.

[TWBC: for further representations on Policy STR/CRS 1 and Section 3 Vision and Objectives, please see PSLP_1956 and PSLP_1957 respectively].

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Adrian Pitts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 Strategy for Paddock Wood, including land east of Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived with my wife and two (now adult) children in Paddock Wood for 22 or more years, working locally in Tonbridge. I directed the Paddock Wood Choral Society for 10 years and was a Governor at the Paddock Wood Primary School. Over that time the congestion on the route between Paddock Wood and Tonbridge has become increasingly difficult particularly at school start and finish times. In the main shopping area there has been less and less monitoring of traffic and congestion by traffic wardens leading to frequent double parking and congestion. The 'improvements' to cycling and pedestrianisation rushed in 2020 with no consultation with local people was even worse, and had to be suspended due to the road works going on in the town. The already approved developments are expensive and although my daughter has trained to become a teacher locally, she will be unable to afford the housing being built now. Through a genetic condition we all have to wait many days to gain an appointment at the GP (Woodlands) and dentist services. Most serious in some ways is the increase in flooding in recent years - the main sewer for Allington Road is outside our house. For us it is surface flooding but all around us is road and field flooding. Despite the environment agency maps delivered to my door showing the problem, houses are and from the plan will be built on flood plains.

Traffic - the Badsell Road development has already led to months of traffic lights and road works. The local plan will make this worse through evidence submitted being out of date as the new partially constructed development sites would not have been taken account of in any traffic monitoring. The road from Five Oak Green to Tonbridge is already a busy minor road, with Somerhill School causing congestion at one end (Tonbridge) backed up to Tudeley most mornings. The established corridor between Tonbridge, Paddock Wood and Tunbridge Wells (KCC Schools travel) also means this is a vital conduit. TWBC estimates about 20 years of on-going disruption during the lifetime of the plan. The proposals to make the centre a 'low traffic' town through closure of the Maidstone Road bridge would not reduce the number of vehicle trips to the town from that end. The dentist and other businesses are located there, and would create more traffic on Badsell Road and other cut throughs as it does when there is an accident at the Hop Farm roundabout. Sending traffic past the development being completed (where there is already planned traffic management eg queuing lane etc). Bus only access on a limited weight bridge coupled with the plan for Commercial Road would further restrict access to the Railway Car park. I am very concerned that the car parking should be taken away as approved development at Bell's Chip Shop cites them as part of the approval for the flats proposed there. The temporary removal of access and through traffic arrangements were very unpopular with locals. Very few pupils cycle to Mascalls school, as they come by train from a wide area. Overdevelopment will create more traffic not less. Most houses will have 2 cars per house.

Loss of green belt/productive farmland - the plan may emphasise the 'village' and low traffic nature of the ideas behind the building work, but as Government policy has recognised the importance of countryside with established trees and water systems the replacement with thousands of homes will take years to replace and establish, with most infrastructure coming at the end after the homes have been sold.

Flooding - a serious concern as the plan does not seem to take account of development already in progress with consequent destruction of fields, trees and bio-diversity. There needs to be much more

detail on flood mitigation and drainage. Coupled with an ageing and stretch water supply system the plan does not currently provide for futureproof supply and adequate sewerage disposal.

The council have shown little engagement with the public negative response to Reg 18 and the consultation process here is long, legal and jargon-istic. The Facebook discussion opportunities with the planning team do little more than refer you to a detailed part of the plan which is not in plain English and is very dense to unpick. Specific questions are answered very generally. Paddock Wood Town Council has objected to the Plan several times on behalf of residents this also has been ignored at Borough level.

Paddock Wood is already in the throes of development and potential overdevelopment. The quotas proposed increase the population of the town significantly. The plan gives an unfair burden of development in a largely rural area. Together with proposals by the Hop Farm considered by Maidstone Council, the developments between Capel and Tonbridge the existing rural character and attractive lanes for cyclists will be congested and have a negative impact on the environment and climate (carbon emissions). A no idling policy is not a replacement in an AONB setting.

Because of the lack of engagement with locals for Reg 18, Paddock Wood seems to be focus for all the housing requirements for TWBC sacrificing its rural nature and small urban town nature fundamentally. The level of housing, including unwelcome provision for Gypsies and Travellers is disproportionate and unsound as so much is on a flood plain.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Growth strategy 3 - capped housing at 678 with large Paddock Wood Extension.

Should be based on up to date proportionate growth distributed across existing settlements. We believe this plan is disproportionate.

I am resident in Paddock Wood West Ward. A local teacher. I have been a governor at PW Primary School. During in the 22 years I have lived here I have been concerned by growing traffic congestion between PW and Tonbridge on the schools corridor and PW and Maidstone. My GP surgery wait times have lengthened which means you rarely get a timely appointment. Outside our house we have experienced flooding issues which were supposed to be once in a generation events quite regularly.

I am concerned about increased traffic that is evident from existing and already approved overdevelopment of Paddock Wood. Badsell Road queuing system has not been built for the FoalHurst estate and the crazy proposals for shutting the Railway bridge effectively cuts off half of the town in addition to routing traffic from Laddingford Yalding etc into Badsell Road. I believe the local plan is not currently sound on account of changing national policies of green belt development. It does not take account of the intervening approvals between its development and consideration. The assessed needs for homes had changed significantly since it was developed. Last week councillors from TMBC have objected to proposals revealing an outdated consultation as a duty to cooperate. The plan has not been positively prepared to take sufficient objective account of building approvals without sufficient prior investment in infrastructure - sewage treatment and water supply concerns.

Traffic evidence cited seems to be without taking in to account current and already approved building work in PW. The small road from PW via Five Oak Green to Tonbridge carries school traffic almost always clogged at the Somerhill end. With a plan envisaging another school and no infrastructure the thoroughfare will be confested still further.

Affordable housing for the young people in PW has been a cited reason for building approval in the past by TWBC. Rarely are the houses affordable for young people and I believe the current plan will not be effective in delivering this aim. The engagement with the town over our responses to Reg 18 consultation was very poor. The lack of any consultation over rushed pedestrian and cycling measures in the town centre in 2020 that were subsequently withdrawn lead me to suspect this plan also is not sound on community engagement or represents local views accurately. Cycling on Kent's lanes is a popular pastime. Most students attending Mascalls secondary school are local or come by train. Car parking in the town and at the station serves a wide community beyond PW. More traffic wardens would be a more cost effective solution to much of the issues in the town centre. Putting retirement homes where shops had been is not an effective way to regenerate the town.

long term flooding in PW is not effectively addressed by the plan which is clearly already being build on Environment Agency flood plains. - attenuation pools and neutral impact over time will put incredible stress on the systems which are overdue renewal and replacement.

lastly the environment and climate change has become a government priority this plan is therefore not now consistent with the government policy

Sustainability Appraisal

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE4, EN1 and Sustainability Appraisal – see Comment Numbers PSLP_1847, PSLP_1850, PSLP_1851, PSLP_1852 and PSLP_1853]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Wildlife Sites for AL/BE3 and AL/BE4 should be consistently recognised across the Pre-Submission Local Plan, Benenden Neighbourhood Plan and the Benenden Healthcare Society development plans. Any development plans cannot be taken into consideration until these are accurately recorded in all documents.

The sustainability of adding additional housing to sites AL/BE3 and AL/BE4 has not fully been taken into consideration when comparing potential development sites which are closer to the centre of Benenden Village. The effect on the surrounding rural lanes of significant additional housing has not been taken into account.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses with special regard to maintaining the safety of Local Wildlife sites. Site AL/BE4 already has 18 semi-detached houses on it and would benefit from redevelopment with minimal additional houses to the existing 18. The remaining additional housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Sustainability Appraisal

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE4, EN1 and Sustainability Appraisal – see Comment Numbers PSLP_1847, PSLP_1850, PSLP_1851, PSLP_1852 and PSLP_1853]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Wildlife Sites for AL/BE3 and AL/BE4 should be consistently recognised across the Pre-Submission Local Plan, Benenden Neighbourhood Plan and the Benenden Healthcare Society development plans. Any development plans cannot be taken into consideration until these are accurately recorded in all documents.

The sustainability of adding additional housing to sites AL/BE3 and AL/BE4 has not fully been taken into consideration when comparing potential development sites which are closer to the centre of Benenden Village. The effect on the surrounding rural lanes of significant additional housing has not been taken into account.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses with special regard to maintaining the safety of Local Wildlife sites. Site AL/BE4 already has 18 semi-detached houses on it and would benefit from redevelopment with minimal additional houses to the existing 18. The remaining additional housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy STR/SS3 - Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Postern Lane Residents' Association (PLRA) is an unincorporated association of 33 households on Postern Lane (a private road between Tonbridge and Tudeley). These comments are on behalf of the lane residents.

The PLRA objects to Policy STR/SS3 for the reasons summarised below.

SUSTAINABILITY

The new town has been proposed in a wholly unsustainable rural location. Residents of this new settlement would regularly travel to Tonbridge and Paddock Wood, the two local centres. How would they do so?

The obvious answer is that most of them will go by car, because (a) all the evidence shows that that is what people do unless there is a very attractive and convenient public transport alternative, and (b) the new settlement will not have any serious public transport at all. There is no train station and there is no evidence that one ever would be agreed by Network Rail. The "four bus an hour" service vaguely floated by TWBC will never attract enough market share to reduce car usage to the necessary levels (and is not financially viable, and no doubt would be quietly withdrawn as loss-making after a few years). Nor will sufficient numbers of people cycle or walk: the distances are too great and the inconvenience too high (eg for school runs, for larger shopping trips, for the elderly or even when it is raining).

So what will happen when the residents of this new settlement turn to their cars, as they inevitably will? TWBC's own evidence shows that the answer is gridlock. Tudeley's major road connection is a B road (the B2017) which is already overloaded. Many of our residents do not exit the southern end of Postern Lane onto the B2017 in the morning rush hour as it is already a traffic jam, and that is before a single new house has been built.

Without a major road building programme (which TWBC acknowledges would be economically and environmentally unacceptable) the traffic which the new settlement would generate would overwhelm the local infrastructure.

The new settlement would thus be wholly car-dependent in an area with poor road connections. This is not sustainable planning.

What is more, TWBC is seeking to meet around 25% of the housing proposed by the Plan through this one single site. With such a complex project complications and delays are almost inevitable, and because of the heavy reliance on the Tudeley site to deliver, that will mean that the predicted housing need will not be met.

AGRICULTURAL LAND

The new settlement is mostly on Grade 2 agricultural land (See TWBC Development Constraints Study October 2016, Figure 5) and Grade 2 land is rare in the Borough (See TWBC Agricultural Land Classification Study 2014). The NPPF states that *“Planning policies and decisions should contribute to and enhance the natural and local environment by ... recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land”* (see NPPF para 170(b); “best and most versatile agricultural land” includes Grade 2 - see Glossary, p65). NPPF footnote 53 adds that *“Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality”*. There is no evidence that TWBC has considered seeking out poorer quality land and it is obvious that building on 180ha of prime agricultural land will not contribute to or enhance the natural and local environment.

GREEN BELT

TWBC could only lawfully remove this very large amount of land (182ha) from the Green Belt if it could positively show that “exceptional circumstances” exist justifying this course of action: NPPF para 137. It cannot begin to do so.

NPPF para 143 protects the Green Belt from inappropriate development and paragraph 144 requires substantial weight to be given in planning decisions to “any harm to the Green Belt”. TWBC’s own assessment of harm, in 2016/7, stated that removal of Green Belt land in this location would cause “Very High” harm to the Green Belt: see Table 6.1 of *Tunbridge Wells Green Belt Study, Stage Two Final Report* prepared for TWBC by Land Use Consultants Limited July 2017.

That, of course, was before TWBC had decided that it could solve all its housing problems by dumping them into this giant housing estate. After that decision, TWBC’s consultants miraculously decided that the harm to the Green Belt could after all be downgraded to “High” (Green Belt Study Stage 3, LUC, issued Nov 2020, Rev 1 (corrected) March 2021). It is impossible to avoid the suspicion that this conclusion was reached because it was the desired answer, rather than the right one. It is obviously wrong and the methodology used to reach it is obviously unsound. The short point is that this new settlement goes right up to the edge of Five Oak Green and in effect will create a giant new “super-settlement” running from Hartlake Road in the west through to the eastern edge of Five Oak Green. It will thus occupy the bulk of the 6km gap between Tonbridge and Paddock Wood and in doing so will actively contribute to neighbouring settlements merging.

TWBC has not even bothered to undertake a Landscape and Visual Impact Assessment, which is an extraordinary omission. The site is virgin Green Belt land of the highest landscape quality, very vulnerable to development. No vague talk of “improvements” elsewhere could compensate for its loss (and to seek to justify the destruction of prime Green Belt land by improving other land, necessarily of lower quality, is a bizarre strategy in any event).

AONB

Creation of a substantial new settlement on the very edge of the AONB will create both indirect harm to the AONB (by damaging its setting) and also direct harm (by adversely affecting its tranquillity and by creating light pollution over its dark skies).

CONCLUSION

Policy STR/SS3 is unsustainable and inconsistent with national policy; it is not sound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is hard to provide a modification to the local plan when it is so fundamentally flawed. We suggest a removal of STR/SS3 (The Strategy for Tudeley Village), from the local plan and instead we invite TWBC to plan a number of smaller developments, spread around the Borough, and adjacent to existing communities.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal is fundamentally flawed and has not accurately nor sufficiently assessed the likely environmental effects, nor the social or economic effects, of the Local Plan. They have worked with one landowner for convenience but this does not amount in itself to a sustainable strategy. TWBC have failed to consider reasonable alternatives.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

We are John Potter and Jan Roberts

xxxx

TONBRIDGE

TNxx xxx

Home tel: xxxx

[TWBC: full address and phone number redacted for data protection purposes]

We have already written to you concerning the effect of the proposed local plan by TWBC.

This letter is to reiterate our, and we believe many others, horror, at the ill-thought out intention to “grow” Tunbridge Wells beyond what you can actually cope with. For so many years the major site opposite the Council Offices has been left undeveloped. And there are probably more than enough other “brown field” sites in your town that can be used for housing etc. Ones that you should be concentrating on instead of scarring the beautiful Kentish landscape.

Your plan to build across from the old people’s accommodation near Woodgate Way was abhorrent and we understand that mercifully you have had the grace to drop this thoughtless idea.

You are aware that Tonbridge has a large number of schools within the town and that pupils are brought in from far and wide. Regularly the town is gridlocked with pupils and the resulting increased traffic. Any new housing developments in the area which will contribute to this situation will, of course, result in extra congestion.

Lastly, and most important, green fields sites are environmentally SO important to everyone’s well being and need to be preserved and not be available to those building developers who are happy to grease the palms of whoever will give them carte blanc to destroy them.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I live on the Somerhill Green development, off the A26 (Woodgate Way) and I am writing to strongly object to your Strategy for development in Tudeley and Capel Parish.

Creating a garden settlement of so many residential dwellings at Tudeley will cause immense harm not only to the existing residents of the Parish of Capel but also to the residents of Tonbridge and in particular residents of Somerhill Green. There will be a significant increase in traffic into Tonbridge from the B2017 (Tudeley Road). This road is already heavily congested, particular in the mornings and late afternoons. This makes it very difficult to leave the Somerhill Green site onto the A26 via the roundabout. This is the only vehicle access into and out of Somerhill Green residential development and The Bishops Chavasse primary school. The A26/B2017 roundabout on Woodgate Way is difficult for traffic to enter due to its layout. There is a blind spot when leaving the residential/primary school developments and you cannot see traffic coming from the Vauxhall roundabout until the last minute. The construction of all these new dwellings in this area is a recipe for disaster, with the increased volume of traffic causing not only gridlock, but a vast increase in pollution.

Many of the people living in the new houses will use Tonbridge Railway Station for commuting, where will they park ?. The additional traffic will be more than the roads can cope with. The towns roads are already full at peak times, the trains are already packed. With all the new houses at Tudeley and at East Capel it could mean a very large increase in the number of additional cars on the narrow lanes. I don't believe this proposal is sustainable. There will also be a big impact on health services and other amenities in the Tonbridge area.

Concreting over farmed fields will have a large impact on flood risk. Much of the Medway floodplain will be lost. I believe that flood risks will increase. The developments will make the Medway more likely to flood more often and cause increased flood risks in the whole area of Tonbridge to Yalding.

Creating such a large development and destroying so much Green Belt land will kill wildlife and ruin the habitat for many others, with increased noise and light pollution. We should be protecting our woodland, hedgerows and the environment. Future generations will not thank you for vandalising the countryside.

I would ask you to please think very carefully before adopting this environmental unfriendly plan. Destroying acres of pristine Green Belt land, teeming with wildlife and rich in biodiversity is not in keeping with todays thoughts for reducing climate change and helping to protect our planet for the children of the future. There must be a better way forward, what about utilising all the empty property in the borough and brown field land left vacant ?.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Pre-Submission Local Plan Introduction – Draft Local Plan – para 1.19 - p.15 The list of issues is incomplete. Representations made in response to the Regulation 18 consultation referred to the failure to undertake proper assessments of the proposed Tudeley Village site before including it in the Draft Plan. This meant that the largest housing area in the plan didn't go through most of the plan preparation process. There was no Green Belt Study for the site, no Landscape and Visual Impact Assessment, no Biodiversity Assessment. I made representations that the Draft Local Plan was not complete enough to be ready for public consultation when the land for such a big proportion of the housing had not had the same level of assessment as the rest of the plan. The Issues and Options process led to most people (60%) wanting a growth corridor led approach. Less than half wanted a garden settlement and that was when no one knew that the garden settlement would involve destruction of Green Belt and attractive countryside. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation.

PSLP Population Projections –para 2.16 p.23 Table 1 shows that, by and large the population is shrinking apart from the over 65s. The projected overall increase is due entirely to a rise of 9450 in the 65+ group. For the overall increase of 6155 the Plan proposes to build some 12200 new dwellings and a range of house types (more than one per person for the projected population increase). Clearly the intention is not to meet local needs but to cater for significant inward migration.

PSLP Natural, built and historic environment – para 2.32 p.26 This is a key point. It says that it is recognised that there will be direct impacts on landscape and environmental assets and their settings. It is confirmed that “full account needs to be taken of the landscape and environmental sensitivities of each site, as well as respecting local distinctiveness and providing for enhancements”. It will be demonstrated in this submission that the Plan fails to do this, in particular in relation to the proposed Tudeley Village and its associated infrastructure. For this reason the PSLP is unsound.

PSLP The Development Strategy Housing Needs para 4.10 p.35 The figure for local needs does not acknowledge the projected reduction in population in all sectors apart from the age group 65+. The Plan has taken the housing need figure calculated using a standard method despite having strong grounds to lower it due to the population projections as well as the large amount of Green Belt and AONB land in the borough. The NPPF makes provision for councils to have a choice in the provision of the standard calculation. If provision of these houses is really only possible by sacrificing Green Belt land and harm to the identified local environment then the NPPF makes it perfectly possible for TWBC to say that this is not achievable. TWBC have chosen not to do so. The number of houses delivered by the Local Plan should be reduced by removing any houses planned for Green Belt and sites where the environmental impact, when properly assessed, is not adverse.

PSLP Formulating the Development Strategy para 4.47 p.40 This fails to acknowledge the impact on the local environment in the vicinity of the proposed garden settlement, the landscape and rural character of the area, and is contrary to the vision and strategic objectives. In this respect the Plan is unsound and should not proceed. Furthermore the Council failed to reassess the Strategy in the light of the damage that it would do to the local environment. There is no evidence that there was any reconsideration of the Strategy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove the policies and sections proposing the new garden settlement at Tudeley and the proposed Five Oak Green By-Pass.

This comment and objection has concentrated on the proposed garden settlement at Tudeley and in particular on the failure to properly assess the impact of the development especially in relation to landscape and visual amenity. That should not be taken to mean that other aspects of the PSLP are considered acceptable. As an individual with limited resources there may well be significant concerns regarding other aspects but the fact that the Plan is unsound as demonstrated should mean that it is withdrawn and the whole strategy reconsidered.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like the opportunity to ask Council officers to respond to the points and objections i have raised.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal adds little or nothing. The summary for the Capel garden settlement site at Tudeley demonstrates that there was no landscape and visual amenity assessment only that it ticked a box for being outside the AONB. In relation to Air Quality the high risk for deterioration is recorded yet a mixed score is given on the possibility of discouraging private car use. Landscape is scored negatively but only apparently because of impact on the AONB. There is no visual impact assessment or assessment of impact on rural character and amenity or the features identified in the Council's own Landscape Character Assessment.

The score in relation to biodiversity should be very negative. For example; in the garden settlement of 2800 dwellings there could be hundreds of cats. Cats have a strong intrinsic hunting urge, even those that are well fed, and in a rural environment prey items will be more abundant. A cat will roam to hunt; farm and country cats will range anywhere from 100m to 3km. A recent Mammal Society study found that 987 cats over a period of 5 months brought home 11,537 items of prey including a minimum of 20 species of wild mammal, 44 species of wild birds, furs species of reptile and three species of amphibians. The RSPB nature reserve at Tudeley Woods is 750m from the proposed garden settlement. The following specifically protected species are on site CA1: Noctule, serotine, brown long-eared, common pipistrelle and soprano pipistrelle bats (recorded flying). There is evidence of BAP, KRDB or other notable species on site: House sparrow (red list & KRDB), Peregrine falcon (KRDB), Spotted flycatcher (red list & KRDB). Kent Ornithological Society Records show that 70 species of birds regularly rely upon the area within the proposed Tudeley site boundary either over winter or during the breeding season. 53 bird species are considered to breed within the proposed site. 12 of the breeding species are Species of Principle Importance as listed under section 41 (England) of the NERC Act (2006). These species need to be taken into consideration by a public body when performing any of its functions with a view to conserving biodiversity. 10 of the species breeding within the proposed site are also red list Birds of Conservation Concern (BoCC), largely due to significant population decline as a result of habitat loss and change in agricultural practices. Yellowhammer, linnet and skylark (all Species of Principle Importance and Red List BoCC) occur within the proposed site in high densities and all three species are undergoing significant population declines. Four species of owl also occur in the area – Tawny, Little, Barn and Long-eared - itself an unusually high number. There are only a few breeding pairs of Long eared owls recorded in Kent, two of which may be resident in the area. This would represent a significant number and would be a serious consideration for developers. There is no up-to-date Biodiversity Assessment of the site to support this allocation. This should be completed and assessed before such a large development is included.

Climate Change The score in relation to the impact on Climate Change is given as slightly negative. This is incorrect. The impact on Climate Change should be "Very Negative" as soils, mature hedgerows and mature trees will be destroyed during the development to be replaced by housing consuming energy in their construction and subsequent use. This will happen regardless of the green spaces and clusters of mature trees retained in masterplanning. To facilitate the development link roads and road within the settlements will result in soils being covered in hard surfaces and mature trees and hedgerows being destroyed. If Tunbridge Wells Borough Council really is in a "Climate Change emergency" then building thousands of houses on open countryside, including new roads is contrary to that declaration. Travel The score for the impact on Travel is given as Positive. This is incorrect. The score for Travel should be Negative. 58% of Capel residents have 2 or more cars (according to the Transport Evidence Base). The site is at least a 45 minute walk from the nearest train station. Network Rail have ruled out building a train station at Tudeley. Many of the new households will have 2 private cars. Many residents will commute to London. Very few commuters (less than 1%) use bikes and buses to get them to the station each day. This won't change. Their behaviour is based on anxiety over missing their trains (they can control private car use more easily than bus timetables/capacity) and the weather (riding a bike in January? Clothing, footwear and bags?).

It is maintained that the site is unsuitable for a garden settlement because it has a main railway line running through the middle of it. No amount of crossings can join the garden settlement in to one settlement. The proposal is for two settlements divided by a railway line, neither of which satisfy garden settlement principles.

The NPPF states "Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting (my emphasis), should require clear and convincing justification". (Paragraph 194). In its consideration of planning applications, TWBC

requires an assessment of the impact of the proposed development on all heritage assets within a kilometre. Applying its own metric to its own development proposals the following approximate numbers of heritage assets in, or within a kilometre of CA1 are; 2 Grade 1, 1 Grade 2* and 70 Grade 2 listed heritage assets. This is a high number of assets that should be protected. Tudeley is particularly sensitive in terms of heritage around All Saints Church, which is a Grade I listed building and the only church in the world with all of its stained glass windows designed by Marc Chagall. Significant consideration should have been given to the heritage and conservation impact of the development proposed in this area on the setting of this unique global heritage asset.

There are clearly a significant number of considerations that need to be taken into account when deciding on a significant allocation for a garden settlement but the evidence set out above demonstrates that the PSLP has failed to comprehensively assess the site at Tudeley. For this reason the Plan is unsound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	Lee Prebble
---------------------------------------	-------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

3.13 and 3.15 Vision and Strategic Objectives

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSLP Vision and Strategic Objectives 1(Section 3) p.30 The Vision is not consistent. It does not respect the distinctive qualities of the Borough that are identified in the Council's own studies. The proposed garden settlement does not reflect local character in particular as identified in the Borough Landscape Character Assessment SPD. The actual impact on the landscape and visual amenity has not been assessed. Moreover the new settlement will not be well connected with nearby towns and will adversely impact on the rural character and amenities of the area. The countryside in the vicinity of the proposed Tudeley development will not retain the landscape, biodiversity and historic character of the area. It is entirely unclear why there is this inconsistency in treatment between the proposed garden settlement and other settlements – why is Tudeley chosen as a place not to retain the essential local character and why is the countryside in the vicinity not to have its landscape, biodiversity and historic character retained?

PSLP Vision and Strategic Objectives 2 p31 Objective 3 is not consistent with the remainder of the Plan. There is no apparent concern at the possible impact on the existing settlement of Tudeley and its highly valued environmental qualities and amenities. There is no apparent intention to conserve and enhance the historic, built and natural environment of the locality where the proposed garden settlement and its associated infrastructure will have such a significant and devastating impact. The objective should be revised to ensure that if there is to be a garden village full and proper account is taken of the impact on the existing settlement and surrounding countryside and landscape.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposal to include the new garden settlement and its associated infrastructure should be removed and all policies relating to it unless and until a full and proper assessment of the effects and implications are undertaken. Proposals should be consistent with the policies and strategy for protection of the countryside, landscape and other assets.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

to question the officers to ascertain how the proposals are considered to be consistent with the policies.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
4.19, STR1, STR9	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSLP Economic Needs p36 There is no acknowledgement of the sea change arising from the Covid pandemic in working patterns. In this respect the 2016 Study is significantly out of date and cannot have anticipated the dramatic changes that have taken place in 2020. (There is a parallel in commercial premises which was acknowledged to some extent in the RCLTCU Study Updates 2020/1). For this reason the Local Plan is unsound and needs to be reconsidered.

PSLP The Development Strategy Policy STR1 p.41 As set out above the Strategy is wrong to seek to develop so many houses without proper consideration of actual local needs and the impact on the high quality landscape and environment of the Borough. The Strategy is inconsistent with the vision and inconsistent in the treatment of the land in the vicinity of Tudeley compared with the approach of the Plan to the remainder of the countryside. This policy is not consistent with Policy STR2 1 in that the development at Tudeley will not respond positively to the local character and preserve and enhance the quality of the existing community and its environs. It is not consistent with Policy STR 3 in that it will not conserve and enhance assets of historic, landscape or biodiversity value in the vicinity of the Tudeley development. The policy is not consistent with Policy STR8 in that the development at Tudeley will not conserve or enhance the natural, built and historic environment of the borough. It does not conserve or enhance the landscape assets, biodiversity geodiversity or habitats of the area. It does not retain or enhance key characteristics or valued landscape features and qualities identified in the Borough Landscape Character SPD. It does not accord with the objectives of that SPD. The allocation of the garden settlement at Tudeley, together with the associated infrastructure, has not been informed by a clear understanding of the landscape context, either on or off-site. There is no demonstration of how the characteristics and landscape features of the area have been incorporated or how harm to the landscape has been avoided or minimised. In these respects the Policy is unsound.

PSLP Policy STR9 p.70 It is not accepted that proper justification has been provided for the removal of areas of Green Belt. For much of the land identified for removal there has been no proper landscape, visual amenity or other environmental impact assessment.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposals for a new garden village at Tudeley and its associated infrastructure should be removed. Before any plan is adopted a full assessment of the landscape and visual impact should be undertaken and detailed impact studies relating to impact on biodiversity and heritage assets should be carried out.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to ask officers about the processes undertaken and why no proper LVIA was carried out in relation to large housing site allocations including the proposals for Tudeley Village

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This comment and objection has concentrated on the proposed garden settlement at Tudeley and in particular on the failure to properly assess the impact of the development especially in relation to landscape and visual amenity. That should not be taken to mean that other aspects of the PSLP are considered acceptable. As an individual with limited resources there may well be significant concerns regarding other aspects but the fact that the Plan is unsound as demonstrated should mean that it is withdrawn and the whole strategy reconsidered.

Question 1	
Respondent's Name and/or Organisation	Lee Prebble
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS3, STR/CA1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSLP Policy STR/SS3 Strong objection to this policy for the reasons set out elsewhere in my submissions. It is contrary to strategic policies STR2, STR3 and STR8. It is inconsistent with the approach of the Plan in respect of the countryside in general and to other proposed sites. It is inconsistent with the approach of the Plan in relation to other developments. There is no assessment of the proposed development in respect of Policy EN18. Policy STR/SS3 makes no attempt to respond positively to the local character or conserve and enhance environmental assets such as the landscape, visual amenities and biodiversity of the area. As such this policy is unsound and should be deleted. Furthermore the suggestion that there will be compensatory improvements to the Green Belt has not been demonstrated. There has been no proper assessment of the impact of the proposed Five Oak Green By-pass which is deemed to be essential infrastructure for the development. The absence of proper environmental impact assessment, including the impact on the local landscape, visual amenities and biodiversity makes the proposal unsound.

The Strategic Sites Masterplanning and Infrastructure Report refers to the TCPA Garden City Principles including:

“Development that enhances the natural environment, providing a comprehensive green infrastructure network and net biodiversity gains, and that uses zero-carbon and energy-positive technology to ensure climate resilience.”

There does not appear to be any assessment as to how this objective is achieved in relation to Tudeley. That SSMI Report assesses the viability of the Five Oak Green By-Pass but provides no environmental impact or sustainability assessment. In response to a query the Local Plan Team could only advise that in looking at the route they considered ‘existing landscape constraints’ but could provide no evidence of an actual Landscape and Visual Impact Assessment in accordance with normal practice.

The Tudeley Village Baseline Review makes no reference to the impact on landscape and visual amenity or rural amenity in general as a key development constraint. It does not appear to consider PSLP Strategic policies STR8 or Policies EN8 Outdoor Lighting and Dark Skies, EN18 Rural Landscape, or EN19 the High Weald AONB.

The Strategic Housing and Economic Land Availability Assessment (SHELAA) for this site appears to have been based on a decision that there has to be a garden village site regardless of any further assessment of the impact. This is evidenced by the first bullet point of para 3.32 confirming that remoteness assessment assumes the development of a new Garden Village. The approach to this site is not consistent with the approach to other sites across the Borough.

Other sites are rejected because of “landscape concerns” (e.g. sites 48, 143, 207, 329, 331, 355, 447) but no real consideration appears to have been given to the impact of the proposed garden settlement on the landscape of the Tudeley locality.

The Landscape Character Assessment 2017 states in Chapter 2 page 20 that it is a guide “to help consider landscape character when planning change”. It sets out objectives in Chapter 3 broadly to

conserve, enhance and restore the landscape. It refers to detractors and these include developments that would result in loss of landscape features. One of the pressures is the loss of a sense of remoteness including by artificial light pollution (figure 7 gives an assessment of light pollution at the time and shows the Tudeley site as being a current darker gap in the lighter skies of Tonbridge, Five Oak Green and Paddock Wood – the garden settlement will destroy this).

The Assessment also refers to the intrusion of transport infrastructure (such as the Five Oak Green by-pass?).

At Chapter 5 it says *“The quality of the landscape across the whole borough is high with much of it very high, and has been identified by residents as one of its main assets.”* and *“The description of the landscape character areas within the borough will assist in assessing whether development is acceptable in a particular location.”*

The Tudeley site is in Character Area 13. The report for the area includes features and qualities considered to be of particular landscape and visual value to the character area including

“4) Areas which retain a sense of the historic landscape, where the irregular and sinuous field boundaries are overlaid on more undulating slopes, divided by hedgerows and trees – particularly around the small hamlets of Tudeley and Capel.

5) The hamlets of Tudeley and Capel which retain strong vernacular character as well as views to the surrounding countryside.”

Under *Detractors and Opportunities* it lists:

“ 1) Extensive suburban residential development at Paddock Wood and, to a lesser extent, at Five Oak Green, often with a flat and open urban/rural interface. The settlements are frequently ringed by poorly managed urban fringe countryside. Large buildings on the edge of Paddock Wood are visually conspicuous due to their white or light colour which contrasts with the surrounding green/ brown landscape.

New development around the edge of existing settlements should be unobtrusive and tie in with the local landscape character through appropriate planting treatments. It would be beneficial to target landscape enhancements anywhere but most importantly along the transport corridors and settlement margins.”

The *Strategy* states:

“The Local Character Area should be considered in the context of the High Weald AONB, particularly the role the character area plays in the setting of the AONB. The valued features and qualities of the landscape should be conserved and enhanced.

Respect the vulnerability of the slopes rising up to the south to new developments/land use change. New developments can be highly visible over a wide area on these slopes and detract from the essential countryside character”

It is entirely unclear how the content of the Landscape Character Assessment and its strategy has been taken into account in the assessment of the proposed development at Tudeley. The available evidence is that the Council has only considered landscape designations and not actual landscape and visual impact. In this respect the assessment for the Tudeley site is incomplete and the decision to include the allocation is unsound.

To return to the SHELAA assessment other sites are rejected for impact on heritage assets (297, 329 and 321), lack of pavement (377), being disproportionate to the size of the settlement (144), and railway noise (329, 330 and 331). Garden settlements at Frittenden and Horsmonden are rejected for being very rural and remote and impact on landscape and heritage. It is entirely unclear why these concerns do not apply to Tudeley.

PSLP Policy STR/CA1 (The Strategy for Capel Parish) p.174 This strategy is totally unacceptable and inconsistent with Strategic policies STR2, STR3 and STR8 as set out above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove the allocation for a new settlement at Tudeley and all policies that promote it. Reconsider the Plan once full and proper assessments of the impact of proposed developments have been undertaken.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I wish to have an explanation as to how allocations have been made without first undertaking proper impact assessments.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This comment and objection has concentrated on the proposed garden settlement at Tudeley and in particular on the failure to properly assess the impact of the development especially in relation to landscape and visual amenity. That should not be taken to mean that other aspects of the PSLP are considered acceptable. As an individual with limited resources there may well be significant concerns regarding other aspects but the fact that the Plan is unsound as demonstrated should mean that it is withdrawn and the whole strategy reconsidered.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Catriona Prynne [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Ms Catriona Prynne [REDACTED]
Comment ID	PSLP_494
Response Date	27/05/21 12:00
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Catriona Prynne
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

Inset Map 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_494, PSLP_]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
 - . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a

hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.** (i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School ." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Catriona Prynne
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Inset Map 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_494, PSLP_504, PSLP_505 & PSLP_506]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is: "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a

hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.** (i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School ." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Catriona Prynne [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Ms Catriona Prynne [REDACTED]
Comment ID	PSLP_505
Response Date	27/05/21 12:00
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Catriona Prynne
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Inset Map 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_494, PSLP_504, PSLP_505 & PSLP_506]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
 - . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a

hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.** (i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School ." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Catriona Prynne
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 1, AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_494, PSLP_504, PSLP_505 & PSLP_506]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a

hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 **The PSLP is unsound because of inconsistencies in the treatment of different sites.** (i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School ." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on

Climate Change and Travel, yet these are the sites promoted for most houses.

3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Comment

Consultee	Michael Purton ([REDACTED])
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Michael Purton ([REDACTED])
Comment ID	PSLP_1304
Response Date	04/06/21 15:12
Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village (View)
Status	Processed
Submission Type	Web
Version	0.3

Question 1

Respondent's Name and/or Organisation	Michael Purton
---------------------------------------	----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 Strategy for Tudeley Village

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I work as a freelance classical recording producer and have an editing studio in my garden at home. My wife and I moved to Five Oak Green from central Tunbridge Wells in 2013 (we moved to Tunbridge Wells in 1993) seeking relative peace and tranquility. This tranquility has been gradually eroded.

During our 28 years in the Borough, we have seen house prices go beyond the reach of our children and indeed most local people not on high incomes.

We have also seen an exponential increase in traffic over the years, including during our time at Five Oak Green, indeed the current amount of traffic through Five Oak Green is far heavier than is safe for our roads. The B2017 through Five Oak Green is used as a rat run and there is an unacceptably high number of HGVs already using this route. The stretch near Capel School is very dangerous, especially at the beginning and end of the school day. Speeding is frequent.

The stretch of the B2017 near Tonbridge is frequently jammed morning and evening and there are often long tailbacks. The proposed development would increase traffic hugely and unfortunately the development is not within easy walking distance of a railway station, of shops or of other facilities. Residents will be compelled to use cars to travel locally. I understand there is no possibility of a railway station in the proposed development.

I am aware from my GP in Paddock Wood that it will be nigh impossible to establish and more importantly staff a health centre in the proposed development at 'Tudeley Village'.

The proposed development at Tudeley Village is adjacent to a large area of land which is at risk of flooding, from streams, rivers and reservoirs, which is compounded by a frequent inability for the land to absorb rainwater, which often results in surface flooding, which we have experienced at our own house. Building close to this area that is prone to flooding and concreting over a large area of ground will increase severely the risk of additional flooding in Five Oak Green.

The policy of the Green Belt aims to check urban sprawl and ensure that neighbouring towns do not merge. This proposal does not comply with this aim, there is a real danger of an urban sprawl joining Tonbridge, Five Oak green and Paddock Wood.

Another aim is to safeguard the countryside from encroachment and to preserve the setting and special character of local communities. This proposal fails to safeguard and preserve our local communities.

Access to open countryside will be reduced, attractive landscapes will be lost forever, Nature conservation interests will be severely damaged and precious agricultural land will be lost forever.

The B2017 borders the High Weald AONB. The considerable increase in traffic and ensuing noise will further impact the peaceful character of this AONB.

TWBC has failed to engage with the public response to Reg. 18, we do not consider that the Council has invested appropriately in its own Town Centre and in providing affordable houses. Building this development at Tudeley will impact severely on the residents of Tonbridge. Indeed I am aware that a number of Tonbridge and Malling Councillors have already written to TWBC expressing deep concern about the major negative impact of the proposed development on their Borough and the fact that it does not reflect the Statement of Common Ground between the two Boroughs.

Finally, I believe that the proposed development is purely speculative and has nothing to do with the wellbeing and needs of residents of this part or indeed any part of the Borough. It appears that with the land offered up by the Hadlow Estate, TWBC have found an easy way to fulfil their perceived new housing obligations and to make a great deal of profit for the Hadlow Estate by creating an ineffective and inappropriate development that would destroy forever an area of Green Belt and indeed the wonderful local community that is Five Oak Green.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?
