Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses

there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at see web link and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf), Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Lisa Leslie [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Lisa Leslie [REDACTED]
Comment ID	PSLP_1193
Response Date	04/06/21 10:30
Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village (View)
Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Lisa Leslie
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3 Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a local resident in Five Oak Green - the area that will be sandwiched between the two proposed developments in the parish of Capel and Paddock Wood. I am also a property expert. I have been a property copywriter and journalist for more than 25 years. Most of those have been spent working alongside housebuilders, such as Berkeley Homes, Fernham Homes, Crest Nicholson and Millwood Designer Homes, so I have a detailed knowledge of how planning, construction, sales and marketing works (I am the former Editor of What House? and Your New Home magazines, working alongside the NHBC for many years). I, therefore, come to this proposal not as a NIMBY but as an educated, experienced property professional.

I am, however, a local resident too - with a young family, a dog and a wonderful village lifestyle. The community here is tight-knit and friendly - we chose this location for its size, nature and ability to nurture our social and mental wellbeing.

I'm going to start with my property observations and an unanswered question - I am still waiting for an answer from the Head of Planning at Tunbridge Wells Borough Council. Who is going to buy these homes? Ahh, said Steve Baughen, there is high demand and people from London will want to buy them. Really? Today, Friday 4th June 2021, I ran a Rightmove search. There are 760 unsold properties for sale that are available within 1 mile of Tunbridge Wells and almost 1,000 are 'for sale' within 3 miles of the town. Additionally, there are 77 homes for rent within 3 miles of Tunbridge Wells. If there is such demand, why are these properties not filled? Why are people not banging on the door and snapping them up? I'm still waiting for Steve Baughen to reply on that matter. Waiting months, over a year in fact. Who cares hey? I'm just a paid up borough resident sending thousands of pounds to fund these people.

The sensible answer to why these properties remain unfilled is because prices are too high. Yes, we are a grammar school county, a green and pleasant county (maybe not for much longer) and a London commuter county. There IS a premium here but in acknowledgment of this, we are admitting that we are pricing locals out of the very homes Harry Teacher/TWBC want to build and he and TWBC are not solving the 'local housing crisis'.

My detailed knowledge of new home pricing strategies means that new homes are priced at a premium - because the builders know people will pay it. Simple as that. Yes, the Tudeley Village plan will attract London folk who are buying with cash, those downsizing from affluent areas, such as Sevenoaks, and there will be the inevitable but hush hush overseas pre-release. Kuala Lumpur, Singapore, Hong Kong. Asian currencies are strong against the pound and investors love the UK's safe-haven status. Please don't forget, I have, myself, helped housebuilders with overseas marketing strategies - it happens and you also know that.

Now onto the matter 'affordable housing? What is in place to ensure that local TWBC residents get priority? I haven't heard or read anything to suggest that borough councils elsewhere - Leeds, Birmingham, Manchester, for example - won't be offered the opportunity to buy the new homes so they can relocate out-of-area social housing residents. And on the matter of affordable housing, there is no such thing. Council houses are no longer built. Help to Build is not affordable either (are you

familiar with the structure of interest on the loan?) and I very much doubt the housebuilders will sell any homes off 'cheap'. In 25 years, I have never met one willing to sell below market value to help Mr & Mrs Smith from the next village get on the property ladder but I do know they locate their social housing quota offsite to not 'spoil' the look and feel of a prestigious development - again, not helping local people in any way. As yet, we have not seen anything that demonstrates a 'local people first' approach to all of the housing, no matter its tenure.

Another cause for concern is the habit of housebuilders to go back in for planning permission time and time again to increase the number of units it builds. We have had no reassurance that there is a fixed cap on the number of homes to be created. Take, for instance, King's Hill in neighbouring Malling. They are still building and the originally published number of new homes has been far surpassed and exceeded over the decades. Where are the cast-iron guarantees that won't happen in Capel/Tudeley? Sadly, many residents will be hoodwinked into thinking the numbers touted now are the final figures. This is usually not the case and 'village' developments turn into towns and then they become small metropolises. I must also add that professional insights prove that building more homes does not reduce the cost of buying a property.

Again, in the case of King's Hill, the development actually carries a premium, further locking out local people. I am happy to put you in touch with a local estate agent who is responsible for selling hundreds of homes in King's Hill as he has access to real-time and historical property price data. And if you are unfamiliar with King's Hill, please watch the Grayson Perry documentary about the location - he reveals the rather peculiar and not very inclusive nature of the place. In addition, I don't have to mention Poundbury to you - we all know that Harry Teacher thinks of himself as Prince Charles.

My neighbours and fellow parish resident will eloquently present facts, data and case studies on matters of ecology, historical preservation, flooding, air quality, traffic, infrastructure, loss of greenbelt/productive farmland, AONB setting, coalescence, heritage, environment, biodiversity, water supply & sewerage, lack of engagement with the public response to Reg 18, site alternatives & brownfield sites not prioritised.

I must also mention the convoluted and downright tricky system that people have to navigate to make a representation - it's almost as if you don't want locals to have their say when it really matters. I do, however, want to end with these bullet points:

- . My road and garden have flooded recently. My neighbors and friends have flooded inside their homes so badly they have lost everything and have had to live elsewhere for over a year while their homes were rid of human sewage and brown, contaminated mud. My lovely local businesses have been forced to shut and clean up. Any loss of trees and fields will condemn us to more flooding. If you can't imagine what this is like, I'm happy to slosh the contents of my lavatory and garden around your living room and kitchen - all while you're at home in the pitch black with no electricity.
- . Our ecology here is precious. We are now charting stork sightings in the parish - a super rare bird that is carefully being reintroduced to the UK. They have chosen Capel Parish - please don't put their release and breeding program at risk.
- . Mental health and wellbeing is supercritical. This plan will subject us, our children and our grandchildren to a hideous environment with disruption, pollution and destruction for an untold number of years - decades probably. On this point alone, the plan is flawed. How can we be encouraged by the Government to take walks, open our windows for ventilation, exercise and get in touch with nature when TWBC are set on covering everything with concrete?
- . The local plan is inaccurate. They keep including a train station when all of the rail operators and rail partners have categorically stated there will not be a station in Tudeley. If this is a false representation within the plan, how are we to believe anything it contains? Can you, as the inspector, believe what you are reading too? Please stop and think about the brains behind the plan. Hand on heart, the masterplanners are not local to the parish, to Kent or even to the UK.
- . The consultation process was woefully inadequate. The 'roadshow' was held outside of the village and even outside of the parish, making it very difficult for people to attend. They should have come directly to the parish with their displays. I firmly believe TWBC also used Covid to make the comments, feedback, dialogue, consultation and response process pretty much inaccessible for everyone. How convenient we could **NOT** meet with people from the council, could **NOT** meet as a community and could **NOT** demonstrate about the plan. What a well timed pandemic. It's a smug convenience for TWBC, especially as many residents affected are elderly or not familiar with the complex planning process or online systems. I can categorically say there are many

people here who will not even know about the masterplan, let alone logged on online to make a representation.

Thank you if you have managed to get this far but this is a matter I and my fellow residents feel strongly about and we ask you to consider the impact and alternatives. There are other sensible options to explore.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

AL/RTW 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

- (a) to check the unrestricted sprawl of large built-up areas;
- (b) to prevent neighbouring towns merging into one another;
- (c) to assist in safeguarding the countryside from encroachment

Recent planning appeal half a mile away (Appeal Ref: APP/M2270/W/21/3268633) held that two new build detached dwellings would have a negative impact on the surrounding area, particularly highways, due to the reliance on private motor vehicles. Notwithstanding the closer location of site AL/RTW5 to amenities, it will generate a significant number of motor vehicle journeys on the heavily polluted A26 which is in an AQMA area.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Powered by Objective Online 4.2 - page 2

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that allocation AL/RTW5 should be removed from the Pre-Submission Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The difference between the Sustainability Appraisal assessment of site 100 and site 30 (which comprises site 100) is hard to comprehend.

Site 30 scores very poorly for air quality, climate change and noise amongst other areas. The sustainability appraisal comments that "the substantial use of private vehicles in this location causes the noise and air objectives to score very negatively. The site also has sensitive biodiversity, heritage and landscape features, and is in a parcel of Green Belt that would constitute very high harm if released for development. This causes the land use objective to be given a very negative score."

Yet a sub-section of the wider site (site 100) is scored only slightly negative, with no mention in the comments of use of private vehicles. While the overall volumes would be lower, I fail to see how these issues affecting the wider site 30 would not also impact site 100.

Development at site 100 would conflict with the provision for Air Quality Management Areas in table 140 on pg. 278 of the Sustainability Appraisal which states: "Development in this region (and any other areas with poor air quality) must not contribute to poor air quality or put sensitive receptors at risk"

Version	0.1
Question 1	

Respondent's Name and/or Organisation	Councillor Peter Lidstone
---------------------------------------	---------------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

AL/RTW 6

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Development of this scale on a small site which is backed onto by a number of nearby houses would have a detrimental impact on the amenity of both the existing and new residents. Existing issues with noise and air pollution on Upper Grosvenor Road would be deepened – with a loss of refuge, clean air and dark sky to the rear of properties facing onto 230 Upper Grosvenor Road. High blocks are required to achieve the proposed density at the site, which would result in overlooking of existing properties. The tree screen at the boundary is the single element protecting amenity of neighbouring properties. Many trees are deciduous, so would provide no effective screening during winter months

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that allocation AL/RTW6 should be removed from the Pre-Submission Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I struggle to follow how the site has scored positively in terms of sustainability when an application for two dwellings (rather than the 44 currently proposed) was rejected in 2005 because of concerns:

- "The proposal would give rise to a cramped and discordant form of backland development"
- Impact on trees including many with TPOs
- Highways risks and lack of visibility splay provision

Policy AL/BE 2 (Feoffee Cottages and land, Walkhurst Road, Benenden)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please, please do not build on the Feoffe field. We have already lost two areas of outstanding natural beauty near the centre of the village and it's becoming very hard to walk to the countryside.

43 years ago when we first moved to the village, we thought we had moved to a quiet place for our eventual retirement but in fact the opposite has happened. Ever since leaving work we have had to spend our twilight years suffering from the lorries, machinery, noise and dust of building sites.

Not only that, as we get older, it is getting harder and harder to walk anywhere for fresh air and exercise.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not effective
.	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I find that this pre-submission local plan is not legally compliant because it has not been fully consultative and democratic. TMBC have set out how they have followed the mechanics for consultation with provision for informing the public and answering questions, however, in the midst of a pandemic with enforced social distancing, when gatherings and face-to-face meetings are not allowed by law, there is no possibility of a normal community meeting.

These proposals for the extensive new development in Tudeley and Capel make huge and sweeping changes to the lives of the rural community and beyond, and should be fully exposed and debated, not passed after two months, when individuals are forcibly isolated and cannot meet as a community.

Inevitably, the lack of normal debate discriminates unfairly against those who do not have access to a computer and the internet. Neither does the pervasive news and events surrounding the pandemic allow the mental space to give TWBC planning issues a reasonable airing. People facing life-and-death worries about their elderly relatives, their own jobs, mental health and getting their family vaccinated, can find it impossible to focus and engage with responding to TWBC proposals, which on paper will seem very remote from their everyday lives, or very daunting. Being advertised in a circular, or exhibited in a Town Hall is not the same as public engagement through meetings; other measures are second-best and inadequate. Hence running this Regulation 19 consultation at this time is unfair and undemocratic.

One cannot escape the fact that language of the Local Plan increases obfuscation. It is not designed to aid transparency and help the public understand the Plan; I offer the example below:

"Within the context of a long-term vision and related objectives, it [the plan] comprises overarching strategic policies, including a new development strategy, supported by both place-specific local strategies and site allocations, and generic policies on a range of topics." (From front page of pre-Submission Local Plan website)

TWBC does not demonstrate commitment to listen to the public's views even when they speak clearly.. In the huge response to the Regulation 18 consultation, (800 or so respondents), approximately one third of these objected to the CA1 Policy to create a 'Tudeley Garden Village' development. However, when the revised 'pre-submission local plan' finally emerged in March 2021, these objections had not been taken on board and nothing had changed; alternatives were not considered.

The public's hostility to their Council's plans was demonstrated in this year's May local elections, when the Conservatives lost seats and so lost their overall control of Tunbridge Wells Borough Council. I urge the Planning Inspector to take this opportunity to recognise the public's reasonable and legitimate objections to these proposals, building over Green Belt farmland.

The Plan may not be consistent with National Policy in the post-Covid era (see Robert Jenrick, 16 December 2020)

We understand that the Government has modified its policy on national targets set for housing. The Secretary of State, Robert Jenrick, has clarified that the numbers are not set in stone, but should be applied using local understanding. This seems to recognise that in the south-east, many areas are already highly developed, and the Green belt is limited and valuable, and in these situations the use of brown-field sites and in urban centres is preferable. TWBC has failed to take this advice on board, and is set on meeting full housing targets, in a blunt and cack-handed way, even when their proposed housing numbers may not be required, and are at an environmental price that is too high.

This Local Plan is unsound because it is not justified

This Plan is unsound because it cuts across Green Belt policy for no good reason. The siting of the new development is not based on sound planning – it seems opportunistic, based on one landowner who is willing to sell.

a) To build this development, the Plan envisages de-designation of 407 hectares of green belt countryside on the High Weald across Tudeley and Capel, used for arable farming. The outstanding features of the area are described in the Local Plan in 5.262

The southern part of the parish is located within the High Weald AONB. There are significant areas of ancient woodland, areas of archaeological potential, historic parks and gardens (Somerhill School and the Postern), a Scheduled Monument (Castle Hill Iron Age Hill Fort), and ecological/wildlife designations (Tudeley Woods, Somerhill Park, parts of East Tonbridge Copses and Dykes and River Medway) across the parish.

The reasons are not justifiable for de-designation of the Green Belt in this spectacular area adjoining Tonbridge. There exist no 'exceptional circumstances' that justify this. It will create one urban sprawl, by enlarging villages between Paddock Wood and South Tonbridge (Tudeley, Capel, Five Oak Green) over a period of time, (see figures in the Plan) effectively creating one long suburb between Tonbridge and Paddock Wood. This is totally against the principle on which the Green Belt was founded: to maintain boundaries between town and countryside – and thus give town-dwellers ready access to the countryside.

b) It is not justified because there are better alternatives closer to existing development. Alternative sites been proposed, (such as land near the A21 corridor, or at Castle Hill), but do not seem to have been seriously investigated by TWBC. By adopting a more distributed approach to development, by building smaller developments across the whole Borough, there would be less dislocation of existing communities. Services could be more easily provided and new housing developments more easily absorbed.

c) TWBC have not justified their approach by seeking the co-operation of TMBC, (the adjoining authority), or by adequately considering the impact on Tonbridge. TWBC has put 'Tudeley Garden Village' at a comfortable distance from Tunbridge Wells, at the far end of its own territory and it has not thought through the real world implications of the scheme, of the disruption to existing commuter and traffic flows, and the services that would be required by a new population of this size.

The site it has chosen is geographically anomalous, because it is only 2 miles distant from Tonbridge and 6 miles distant from Tunbridge Wells. The existing village of Tudeley has its closest links to Tonbridge (pre-1972, it was part of Tonbridge Borough Council). This proposed new development has huge implications for Tonbridge which have not been adequately considered. The greatly increased traffic flows into Tonbridge resulting from 4000 new houses will have a huge impact on Tonbridge, and big implications for Kent County Council highways provision (but would scarcely affect Tunbridge Wells).

d) This approach by TWBC to fulfil its housing target seems unsound and unbalanced. Now national policy seems to recognise that in the south-east, many areas are already highly developed; that the Green belt is limited and valuable, and in these situations the use of brown-field sites and in urban centres is preferable. (Jenrick, 16 Dec 2020) TWBC has adopted a blunt and simplistic approach in its interpretation of national policy, by calculating the maximum number of houses it should build over the stated period, and have made a decision to build the majority in one place, to create 'Tudeley Garden Village' or 'New Town'.

e) Taking into account the points above, I think this Green Belt site has not been chosen for sound planning reasons, but rather, for opportunistic reasons. The site offers TWBC a straightforward negotiation with a single landowner, the owner of the Hadlow Estate. Because it is a greenfield site it will be attractive to developers, and present few problem for builders, and substantial profits. Unfortunately, it takes little account of the impact on lives of residents in this part of Kent – not just in these villages directly affected, but also in adjoining villages along the access roads - and in Tonbridge, where I live. These impacts have not been included in the costings.

The Local Plan, with specific reference to 'Tudeley Garden Village' is unsound and not effective - because the finer detail has not been adequately evaluated. Costs should be included of mitigating adverse effects (flooding, air pollution, loss of habitat and bio-diversity) and supplying new infrastructure. Much of the loss is irreplaceable: for example, the heritage value of views over Kent countryside and oast houses from All Saints Church and churchyard, Tudeley (with its Chagall stained glass, drawing visitors from over the world.) There is the amenity value of the network of woodland and footpaths, that has proved so essential to personal well-being during the Covid crisis, and the dark skies, lost to fluorescent street lighting and traffic signals.

The costs of creating a New Town (next to Tonbridge) have been glossed over and not factored in: provision of infrastructure and public services; the costs of flood protection, utilities, water and sewerage and improving roads and parking, and schools, leisure and health facilities. A sizeable portion of these indirect costs will fall on Tonbridge as it is the nearest major town offering a range of services and a station to London. TMBC will not automatically receive any council tax from the new residents to offset these costs.

Train services in Tonbridge and associated parking are already at capacity. Details need to be supplied from the Railway Authority as to how these rail needs will be met, and also from Kent County Council, regarding upgrading the road network. More traffic will generate higher air pollution, that also has a health cost. Tunbridge Wells already is the borough with the 8th worst level of air pollution in Kent, which is poor for a mostly rural area. (NB. It seems a forlorn hope that Tudeley will have a new rail station, with only a 7 minute journey time now between Tonbridge station and Paddock Wood.)

As an example of a unfactored impact on Tonbridge, we can use our own road, Goldsmid Road, which will be a main carrier of additional traffic from Tudeley to the town centre and Tonbridge station. It already has commuter traffic and school traffic at peak times contributing to congestion and air pollution in the road - and there are 4 schools within half a mile with many pedestrians. Parking either side of the road makes for bad visibility; in addition, a narrow one-way tunnel at the bottom adds to the congestion, as do large vehicles, such as school buses and 'bin lorries'. This situation will be made much worse by additional traffic from 'Tudeley Garden Village' but this has not been taken into account.

TWBC give no evidence of carrying out the 'Duty to Co-operate'

In this proposal to build a 'New Town' of 4000 or more houses, it would be expected that TWBC, would prepare the ground by consulting and co-operating with the neighbouring Borough Council, Tonbridge and Malling who are closest to the new development and will bear the impact (see discussion of this above). To my knowledge, no overtures of co-operation have taken place. The same 'duty to co-operate' should be applied to co-operating with Network Rail and the train operators, as here, there will be a major impact; also more co-operation is needed with Kent County Council, regarding the road network, where guarantees are needed that the necessary infrastructure will be put in place. No details on this are given in the Local Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 Any decision on STR 1 and STR 3 (Tudeley and Capel) in this Local Plan should be postponed until further evaluation of requirements and impact costings has taken place and until further data is available. The response of TMBC is essential and should be a central part of the process. Also further details need to be made available from KCC on provision of a road network; also a response from the Rail authority is needed on what rail provision will be made.
- 2 Numbers of dwellings required should be re-evaluated in the light of latest Government policy and revised down if possible, recognising this area is already highly developed.
- 3 More alternative housing options should be explored to meet housing needs. These should include more distributed development and brownfield sites, and development of existing urban centres, such as Paddock Wood. The enlargement of Tudeley and Capel should be abandoned.
- 4 We have argued above that the consultation process during the pandemic has been essentially undemocratic. When further information is available, and society returns to its normal arrangements, the consultation should be set up to run again, on the basis of a revised Plan.
- 5 TWBC should publicly accept the intrinsic importance of Green Belt land adjoining Tonbridge and recognise its value in the post-Covid era for the contribution it makes to bio-diversity and people's mental health.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	David & Jane Lloyd
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: this representation has been input against Policies STR/SS1 and STR/SS3 – see Comment Numbers PSLP_927 and PSLP_934]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I find that this pre-submission local plan is not legally compliant because it has not been fully consultative and democratic. TMBC have set out how they have followed the mechanics for consultation with provision for informing the public and answering questions, however, in the midst of a pandemic with enforced social distancing, when gatherings and face-to-face meetings are not allowed by law, there is no possibility of a normal community meeting.

These proposals for the extensive new development in Tudeley and Capel make huge and sweeping changes to the lives of the rural community and beyond, and should be fully exposed and debated, not passed after two months, when individuals are forcibly isolated and cannot meet as a community.

Inevitably, the lack of normal debate discriminates unfairly against those who do not have access to a computer and the internet. Neither does the pervasive news and events surrounding the pandemic allow the mental space to give TWBC planning issues a reasonable airing. People facing life-and-death worries about their elderly relatives, their own jobs, mental health and getting their family vaccinated, can find it impossible to focus and engage with responding to TWBC proposals, which on paper will seem very remote from their everyday lives, or very daunting. Being advertised in a circular, or exhibited in a Town Hall is not the same as public engagement through meetings; other measures are second-best and inadequate. Hence running this Regulation 19 consultation at this time is unfair and undemocratic.

One cannot escape the fact that language of the Local Plan increases obfuscation. It is not designed to aid transparency and help the public understand the Plan; I offer the example below:

"Within the context of a long-term vision and related objectives, it [the plan] comprises overarching strategic policies, including a new development strategy, supported by both place-specific local strategies and site allocations, and generic policies on a range of topics." (From front page of pre-Submission Local Plan website)

TWBC does not demonstrate commitment to listen to the public's views even when they speak clearly.. In the huge response to the Regulation 18 consultation, (800 or so respondents), approximately one third of these objected to the CA1 Policy to create a 'Tudeley Garden Village' development. However, when the revised 'pre-submission local plan' finally emerged in March 2021, these objections had not been taken on board and nothing had changed; alternatives were not considered.

The public's hostility to their Council's plans was demonstrated in this year's May local elections, when the Conservatives lost seats and so lost their overall control of Tunbridge Wells Borough Council. I urge the Planning Inspector to take this opportunity to recognise the public's reasonable and legitimate objections to these proposals, building over Green Belt farmland.

The Plan may not be consistent with National Policy in the post-Covid era (see Robert Jenrick, 16 December 2020)

We understand that the Government has modified its policy on national targets set for housing. The Secretary of State, Robert Jenrick, has clarified that the numbers are not set in stone, but should be applied using local understanding. This seems to recognise that in the south-east, many areas are already highly developed, and the Green belt is limited and valuable, and in these situations the use of brown-field sites and in urban centres is preferable. TWBC has failed to take this advice on board, and is set on meeting full housing targets, in a blunt and cack-handed way, even when their proposed housing numbers may not be required, and are at an environmental price that is too high.

This Local Plan is unsound because it is not justified

This Plan is unsound because it cuts across Green Belt policy for no good reason. The siting of the new development is not based on sound planning – it seems opportunistic, based on one landowner who is willing to sell.

a) To build this development, the Plan envisages de-designation of 407 hectares of green belt countryside on the High Weald across Tudeley and Capel, used for arable farming. The outstanding features of the area are described in the Local Plan in 5.262

The southern part of the parish is located within the High Weald AONB. There are significant areas of ancient woodland, areas of archaeological potential, historic parks and gardens (Somerhill School and the Postern), a Scheduled Monument (Castle Hill Iron Age Hill Fort), and ecological/wildlife designations (Tudeley Woods, Somerhill Park, parts of East Tonbridge Copses and Dykes and River Medway) across the parish.

The reasons are not justifiable for de-designation of the Green Belt in this spectacular area adjoining Tonbridge. There exist no 'exceptional circumstances' that justify this. It will create one urban sprawl, by enlarging villages between Paddock Wood and South Tonbridge (Tudeley, Capel, Five Oak Green) over a period of time, (see figures in the Plan) effectively creating one long suburb between Tonbridge and Paddock Wood. This is totally against the principle on which the Green Belt was founded: to maintain boundaries between town and countryside – and thus give town-dwellers ready access to the countryside.

b) It is not justified because there are better alternatives closer to existing development. Alternative sites been proposed, (such as land near the A21 corridor, or at Castle Hill), but do not seem to have been seriously investigated by TWBC. By adopting a more distributed approach to development, by building smaller developments across the whole Borough, there would be less dislocation of existing communities. Services could be more easily provided and new housing developments more easily absorbed.

c) TWBC have not justified their approach by seeking the co-operation of TMBC, (the adjoining authority), or by adequately considering the impact on Tonbridge. TWBC has put 'Tudeley Garden Village' at a comfortable distance from Tunbridge Wells, at the far end of its own territory and it has not thought through the real world implications of the scheme, of the disruption to existing commuter and traffic flows, and the services that would be required by a new population of this size.

The site it has chosen is geographically anomalous, because it is only 2 miles distant from Tonbridge and 6 miles distant from Tunbridge Wells. The existing village of Tudeley has its closest links to Tonbridge (pre-1972, it was part of Tonbridge Borough Council). This proposed new development has huge implications for Tonbridge which have not been adequately considered. The greatly increased traffic flows into Tonbridge resulting from 4000 new houses will have a huge impact on Tonbridge, and big implications for Kent County Council highways provision (but would scarcely affect Tunbridge Wells).

d) This approach by TWBC to fulfil its housing target seems unsound and unbalanced. Now national policy seems to recognise that in the south-east, many areas are already highly developed; that the Green belt is limited and valuable, and in these situations the use of brown-field sites and in urban centres is preferable. (Jenrick, 16 Dec 2020) TWBC has adopted a blunt and simplistic approach in its interpretation of national policy, by calculating the maximum number of houses it should build over the stated period, and have made a decision to build the majority in one place, to create 'Tudeley Garden Village' or 'New Town'.

e) Taking into account the points above, I think this Green Belt site has not been chosen for sound planning reasons, but rather, for opportunistic reasons. The site offers TWBC a straightforward negotiation with a single landowner, the owner of the Hadlow Estate. Because it is a greenfield site it will be attractive to developers, and present few problem for builders, and substantial profits. Unfortunately, it takes little account of the impact on lives of residents in this part of Kent – not just in these villages directly affected, but also in adjoining villages along the access roads - and in Tonbridge, where I live. These impacts have not been included in the costings.

The Local Plan, with specific reference to 'Tudeley Garden Village' is unsound and not effective - because the finer detail has not been adequately evaluated. Costs should be included of mitigating adverse effects (flooding, air pollution, loss of habitat and bio-diversity) and supplying new infrastructure. Much of the loss is irreplaceable: for example, the heritage value of views over Kent countryside and oast houses from All Saints Church and churchyard, Tudeley (with its Chagall stained glass, drawing visitors from over the world.) There is the amenity value of the network of woodland and footpaths, that has proved so essential to personal well-being during the Covid crisis, and the dark skies, lost to fluorescent street lighting and traffic signals.

The costs of creating a New Town (next to Tonbridge) have been glossed over and not factored in: provision of infrastructure and public services; the costs of flood protection, utilities, water and sewerage and improving roads and parking, and schools, leisure and health facilities. A sizeable portion of these indirect costs will fall on Tonbridge as it is the nearest major town offering a range of services and a station to London. TMBC will not automatically receive any council tax from the new residents to offset these costs.

Train services in Tonbridge and associated parking are already at capacity. Details need to be supplied from the Railway Authority as to how these rail needs will be met, and also from Kent County Council, regarding upgrading the road network. More traffic will generate higher air pollution, that also has a health cost. Tunbridge Wells already is the borough with the 8th worst level of air pollution in Kent, which is poor for a mostly rural area. (NB. It seems a forlorn hope that Tudeley will have a new rail station, with only a 7 minute journey time now between Tonbridge station and Paddock Wood.)

As an example of a unfactored impact on Tonbridge, we can use our own road, Goldsmid Road, which will be a main carrier of additional traffic from Tudeley to the town centre and Tonbridge station. It already has commuter traffic and school traffic at peak times contributing to congestion and air pollution in the road - and there are 4 schools within half a mile with many pedestrians. Parking either side of the road makes for bad visibility; in addition, a narrow one-way tunnel at the bottom adds to the congestion, as do large vehicles, such as school buses and 'bin lorries'. This situation will be made much worse by additional traffic from 'Tudeley Garden Village' but this has not been taken into account.

TWBC give no evidence of carrying out the 'Duty to Co-operate'

In this proposal to build a 'New Town' of 4000 or more houses, it would be expected that TWBC, would prepare the ground by consulting and co-operating with the neighbouring Borough Council, Tonbridge and Malling who are closest to the new development and will bear the impact (see discussion of this above). To my knowledge, no overtures of co-operation have taken place. The same 'duty to co-operate' should be applied to co-operating with Network Rail and the train operators, as here, there will be a major impact; also more co-operation is needed with Kent County Council, regarding the road network, where guarantees are needed that the necessary infrastructure will be put in place. No details on this are given in the Local Plan.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 Any decision on STR 1 and STR 3 (Tudeley and Capel) in this Local Plan should be postponed until further evaluation of requirements and impact costings has taken place and until further data is available. The response of TMBC is essential and should be a central part of the process. Also further details need to be made available from KCC on provision of a road network; also a response from the Rail authority is needed on what rail provision will be made.
- 2 Numbers of dwellings required should be re-evaluated in the light of latest Government policy and revised down if possible, recognising this area is already highly developed.
- 3 More alternative housing options should be explored to meet housing needs. These should include more distributed development and brownfield sites, and development of existing urban centres, such as Paddock Wood. The enlargement of Tudeley and Capel should be abandoned.
- 4 We have argued above that the consultation process during the pandemic has been essentially undemocratic. When further information is available, and society returns to its normal arrangements, the consultation should be set up to run again, on the basis of a revised Plan.
- 5 TWBC should publicly accept the intrinsic importance of Green Belt land adjoining Tonbridge and recognise its value in the post-Covid era for the contribution it makes to bio-diversity and people's mental health.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Section 5 - Royal Tunbridge Wells

[TWBC: this representation has been input against Section 5 - Royal Tunbridge Wells, Policies ED 2, STR/SS 1, STR/SS 3 and STR/RTW 1– see Comment Numbers PSLP_1855, PSLP_1864, PSLP_1865, PSLP_1866 and PSLP_1867. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC LOCAL PLAN REG. 19 REPRESENTATIONS

HERMES HOUSE, ST JOHN'S ROAD, ROYAL TUNBRIDGE WELLS

1.0 INTRODUCTION & OVERVIEW

1.1 These representations are made on behalf of Logistics UK in respect of their headquarters at Hermes House, St John's Road, Royal Tunbridge Wells TN4 9UZ and the land to the rear ('the Site': see Site Location Plan (drawing reference 2104/FS/001) enclosed at Appendix 1) and are submitted to the Regulation 19 consultation on the emerging Tunbridge Wells Borough Council ('TWBC') Local Plan (Pre -Submission Local Plan, undated).

1.2 The Site currently comprises offices in employment use (albeit currently only sparsely / rarely occupied) with associated car parking, accessed from St John's Road, and an area of grassland to the rear. The Site is not located within a conservation area and there are no known designated or non-designated heritage assets on or in proximity. The Site falls within Flood Zone 1 and is not known to be subject to any ecological designations.

1.3 Logistics UK have occupied Hermes House since 1975. The older building on site is understood to have originally been constructed as church and used for religious purposes before being converted to offices. It has an unusual circular plan form that does not lend itself to modern office use and results in inefficient use of the space, both in terms of the area of unused space and the ability to lay out the

useable space in a manner conducive to modern working practises . Moreover, Logistics UK run training and conferencing events from Hermes House which again does not lend itself to this purpose owing to the number of structural supports/ columns.

1.4 An extension was constructed in the late 1980s to provide two floors of office accommodation on a more regular plan form. Whilst at the time the extension functioned well it is now dated and requires significant upgrade works including replacement of all windows, a new heating system and air conditioning. There are also difficulties providing heating and cooling across the two elements of Hermes House as both differ significantly in their construction and design. This creates further inefficiencies.

1.5 A number of Logistics UK's staff travel to work by train. Hermes House is accessible by car but is some 1.8 km from the nearest train station (Tunbridge Wells) and is located outside of designated town centre/ employment areas. The Site is not in a sustainable employment location. Moreover, it is located in a predominantly residential area where adopted and emerging policy would resist new employment uses owing to the impact on residential amenity, issues of neighbourliness and incompatibility of land use.

1.6 As a result of the poor quality of the existing employment accommodation and its poor public transport accessibility and location within a residential area, Logistics UK has been planning to vacate Hermes House and relocate to a more appropriate premises and location within Tunbridge Wells. This process has been expedited owing to the pandemic and shift to a greater proportion of staff working from home thus requiring a smaller area of employment floorspace in any event.

1.7 Given the location of Hermes House in a residential area, residential has been identified as the most appropriate and compatible use moving forward. Moreover, TWBC has been unable to demonstrate a five-year supply of housing land for the most recent monitoring years and has a worsening Housing Delivery Test score despite having an Action Plan in place. The emerging Local Plan provides the opportunity to address the current and historically poor housing delivery in the Borough. However, the heavy reliance of the emerging Local Plan on two large strategic sites to meet almost 75% of its housing need over the Plan period is a high-risk strategy. Moreover, delivery of new homes on these strategic sites is not anticipated for four years (in our view at the earliest). The Council should, therefore, seek to allocate additional small/ medium scale sites for residential development to address historically unmet need, provide fluidity in five -year housing land supply and ensure short -term delivery of homes to mitigate the risk of delays from the strategic sites.

1.8 There are Borough-wide benefits of including additional site allocations that are deliverable in the first five years of the Plan. There are also local benefits to Royal Tunbridge Wells which has relatively few proposed site allocations that are expected to yield new homes in the initial five year period. A steady supply of new homes is required in key settlements to provide choice and variety in the market and to mitigate against increasing issues of affordability. The Council should consider additional residential allocations in Royal Tunbridge Wells that are deliverable in the short-term to maintain a steady supply of new homes in this principal settlement.

1.9 In addition to the above, allocation of a previously developed site in an established urban area such as Hermes House reduces the pressure on greenfield development and reduces the need for Green Belt release. NPPF paragraph 137(a) requires LPAs 'to make as much use as possible of brownfield and underutilised land' before concluding that exceptional circumstances exist to justify release of land from the Green Belt for development. Hermes House is a brownfield, underutilised site and whilst this Site alone would not remove the need for some Green Belt release to meet TWBC's housing needs, it ought to be considered as an option for allocation before Green Belt sites in the sequential approach to identifying land to meet residential development needs through the emerging Local Plan.

1.10 Redevelopment of Hermes House alone would yield relatively few dwellings. As such Logistics UK has also reviewed the potential of the land immediately to the rear. The land to the rear is currently in educational use but does not serve a specific educational or recreational function, nor has it been identified as a suitable location for future educational development being distant from the main school campus. In short, this area of land forms part of the school grounds but is incidental to the educational/ recreational function of the school.

1.11 The Site has an area of approximately 0.65 hectares. A capacity study (enclosed at Appendix 2: drawings reference 2104/FS/010) indicates that circa 48 homes could be accommodated at a density of 74 dwellings per hectare. Combining Hermes House with the land to the rear allows the number of

new homes to be optimised and also for a more varied mix of homes of different sizes suitable for a range of households (including apartments and houses) in addition to a greater number of affordable homes.

1.12 The Hermes House part of the Site currently falls within the Limits of Built Development as per the Policies Map (2016). The Council has imposed Article 4 Directions on a number of existing employment buildings to prevent them from changing from office to residential under current Permitted Development regulations. These 'protected' employment buildings are largely those falling within accessible town centre and/ or established/ designated employment locations. Hermes House falls within a solely residential area and has not been 'protected' through an Article 4 Direction. Subject to meeting the requisite criteria, Hermes House could therefore be converted to residential. However, as set out above, the, inter alia, awkward plan form, inherent issues with heating and cooling and poor standard of the building would make for poor/ substandard homes which prevents this from being an option.

1.13 The southern part of the land to the rear also falls within the Limits of Built Development with approximately 0.15 hectares falling outside and within the area currently designated as Rural Fringe.

1.14 Logistics UK consider the Site to be ideally placed to deliver a range of high -quality new homes in an established residential area, with only a minor adjustment to the existing boundary of the Limits of Built Development required to facilitate this. It is Logistics UK's position that the Site should be included within the emerging Local Plan as a residential site allocation to deliver circa 50 new homes. The Site is deliverable in the short -term and will assist in diversifying the type and scale of site allocations thus reducing reliance on large -scale strategic allocations that require significant new infrastructure and risk delay, with the consequential impact on housing land supply and delivery.

1.15 The Site is deliverable in the short -term as per the NPPF definition (Annex 2):

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years'

1.16 The Site comprises previously developed land (Hermes House) with very little landscaping and mown/ managed grass on the land to the rear. There is very limited ecological potential with no trees/ hedges that would pose a constraint to development as proposed. There are also no national designations that would impede the development such as Green Belt, flood risk or heritage. Access is established from St John's Road.

2.0 CURRENT USE

Employment

2.1 Hermes House was converted from its previous religious use to offices prior to Logistics UK's occupation. The older building has an unusual circular plan form and includes an amphitheatre - style space. This space has historically served a function for seminars/ conferences but the structural supports/ columns are not ideal for this purpose and the resulting office floorspace is awkward and inefficient and cannot be considered to provide modern, functional or flexible office accommodation.

2.2 In an attempt to improve the quality of the employment accommodation on site Logistics UK constructed an extension in the late 1980s (LPA reference 84/01473/FUL) facilitated by the demolition of a residential property. Whilst providing a more regular plan form, this extension is now over 25 years old and requires significant upgrade works to allow it to continue to function as office floorspace. For example, the large areas of glazing make the space too hot in summer but too cold in winter. The extension does not benefit from air conditioning and the heating system is inadequate. Both are required along with new windows. However, there are inherent difficulties providing heating and cooling systems to serve the older part of the building and the extension. This further adds to the inefficiency of the current buildings.

2.3 In addition to the above, Hermes House is located in a predominantly residential area outside of a designated town centre and employment location. It is accessible by car but some 1.8km from Tunbridge Wells train station. Several members of staff travel to work at Hermes House by train, a proportion that Logistics UK consider would be higher if the offices were located in a more convenient location in proximity to the train station.

2.4 There is also the issue of compatibility of land use. Hermes House is surrounded on three sides by residential properties, being located on a residential road in a predominantly residential

neighbourhood. Logistics UK runs software that requires a constant (24/7) power supply and generators. Care is taken to minimise noise from the generators but they are not ideal in a residential area. Moreover, the heating and cooling systems required to address the inherent issues with the current buildings and allow the employment use to continue will further add to the noise emitted. These issues, coupled with vehicle movements, staff outside use (including from the smoking shelter) and the types and scale of signage required, are present with the existing employment use and any likely future employment use.

2.5 It is on the basis of the above that Logistics UK consider that Hermes House should be returned to its former residential use as this would be more compatible with the established residential use and character within the area. Moreover, in line with adopted Core Strategy (2010) Core Policy 7, employment uses, particularly of the scale of Hermes House, are more appropriately sited in sustainable and accessible town centre and employment locations.

Education

2.6 Approximately 60% of the land to the rear of Hermes House is located outside of the Limits of Built Development and within the Rural Fringe, with the southern portion (circa 40%) within the Limits of Built Development. It is all within educational use forming part of the grounds of an neighbouring school.

2.7 This land has been included within the Site as it forms a logical extension to the Hermes House site and allows for an improved residential layout that facilitates the delivery of a higher number of homes that includes a greater variety of homes of different sizes (including apartments and houses) and a higher number of affordable homes.

2.8 Whilst this land is within educational use, it does not have a defined educational or recreational function. It is laid to grass and forms an incidental part of the wider school grounds. When the school has previously expanded this land has been reviewed as an option but discounted owing to its location remote from the main core of the school. It is also not easily accessible from the public highway (although it would be accessible from St John's Road through Hermes House if the sites were to be combined as proposed). In short, this land does not form a specific educational or recreational function and it is Logistics UK's position that it would be an appropriate location for small-scale residential development.

3.0 CASE FOR RESIDENTIAL

Historic Supply/ Delivery of New Homes

3.1 TWBC has a published shortfall in five-year housing land supply (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) and at 1 April 2020 could only demonstrate 4.83 years supply (see Five-Year Housing Land Supply 2019/20). This was based on a 5% buffer. However, given that TWBC's previous Five -Year Housing Land Supply 2018/19 report also identified a shortfall (4.69%: see paragraph 12), NPPF paragraph 73 would previously have indicated that a 20% buffer is appropriate. This has subsequently been superseded by the Housing Delivery Test whereby the 20% buffer is to be applied to LPAs with a Housing Delivery Test score of 85% or below.

3.2 TWBC has a published score of 86% in the Housing Delivery Test for the period 2016/17 to 2018/19 (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) (published February 2020). Whilst 1% higher than the threshold for the 20% buffer, TWBC has failed to meet or exceed its housing requirement for two of the three monitoring years that have informed the Housing Delivery Test result. The one year it did exceed it was when the housing requirement was notably lower owing to the method of calculation (pre -Standard Method). Moreover, the 2021 Housing Delivery Test results see TWBC's score reduce to 85% (Housing Delivery Test: 2020 measurement - GOV.UK (www.gov.uk) [accessed 01/06/2021]) thus housing delivery is worsening in the borough and the 20% buffer (NPPF paragraph 73) should be applied to the calculation of five-year housing land supply. This places even greater pressure on TWBC to identify additional land for residential development.

Proposed Supply of New Homes

3.3 The emerging Local Plan utilises the Standard Method figure of 678 homes per annum (Pre - Submission Local Plan paragraph 4.10) from which to establish the number of homes to plan for. The Planning Practice Guidance ('PPG') is clear that the Standard Method provides a 'minimum annual housing need figure' (PPG paragraph: 002 Reference ID: 2a -002-20190220) and a not a housing requirement figure. Whilst there is acknowledgement within the emerging Local Plan that exceptional circumstances do not exist to deviate from the Standard Method (paragraph 4.9 and 4.11) i.e. to provide

for a lower number of homes, and that TWBC may need to consider taking unmet need from neighbouring authorities (see paragraph 4.13), there does not appear to have been an attempt to identify whether it would be appropriate to actively plan for a higher housing requirement.

3.4 The emerging Local Plan has been developed on the basis that site allocations to deliver some 6,900 additional homes will be required (paragraph 4.17) (albeit the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) states that the Council must plan for a minimum of 7,221 homes through site allocations (paragraph 5.4). We have not interrogated the assessment that underpinned this conclusion (nor the discrepancy between the Topic Paper and Pre-Submission Local Plan). However, the emerging Local Plan is clear that this is based on the assumption that 'all previous allocations are still suitable and developable' (paragraph 4.17). In reality this may not be the case and the emerging Local Plan should actively seek to progress additional site allocations. Moreover, pursuant to the PPG, the Standard Method should be treated as a minimum figure. Thus, whilst the emerging Local Plan identifies site allocations capable of delivering between 8,076 and 8,461 homes over the Plan period (see Table 4), this may not be enough to provide for the housing required.

3.5 The historically poor housing delivery (as evidenced by the Housing Delivery Test) in the Borough and failure to maintain a five-year housing land supply should also be factors that weigh in favour of the identification of additional housing allocations to come forward in this Local Plan.

3.6 It is also noted that, whilst Royal Tunbridge Wells has 18 draft residential site allocations within the Pre-Submission Local Plan (see Section 5), the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) identifies very few homes being delivered within the current five-year period (see Table 9, pages 29/30). This risks an undersupply of new homes in Royal Tunbridge Wells which will serve to drive up already high house prices. There would be merit in identifying additional site allocations, such as Hermes House, that are deliverable in the short term and can assist in providing consistent delivery of new homes in the Borough's principal settlement over the Plan period.

Strategic Allocations

3.7 The reliance of the emerging Local Plan on large-scale, strategic allocations is also of concern. Approximately 6,300 homes are identified as coming forward from two strategic allocations: approximately 3,500 homes at Paddock Wood/ East Capel (draft Policy STR/SS 1); and approximately 2,800 homes from a new settlement – Tudeley Village (draft Policy STR/SS 3). This represents almost 75% of all new homes planned for through the emerging Local Plan (taking the upper range provided at Table 4; 78% if taking the lower range). There is, therefore, significant reliance on the delivery of new homes from these two strategic sites.

3.8 It is common for it to take some time to see homes delivered on large -scale, strategic sites owing to, inter alia, the complexity of the planning process, landownership and often significant new infrastructure requirements. In the case of the proposed allocations at Paddock Wood and Tudeley Village this includes new schools, neighbourhood centres, employment and sports, health and community facilities. Moreover, Framework Masterplan SPDs are requirements of the draft policies, to be adopted in advance of planning permission being granted, which will add significantly to the overall planning process. Furthermore, the use of Compulsory Purchase Order powers is referenced in both allocations indicating anticipated issues with landownership.

3.9 The Housing Supply and Trajectory Topic Paper for Pre-Submission Plan (February 2021) identifies delivery of homes from both strategic allocations from 2025/26, with 300 homes completed per annum from Paddock Wood/ East Capel and 150 from Tudeley Village (see Table 9, page 30). Given that Framework Masterplan SPDs are required before planning permission can be granted, it is already halfway through 2021 and significant infrastructure is required to 'unlock' the sites, delivery of homes from these allocations within the next four years is ambitious. Delivery of 300 homes in the first year from Paddock Wood/ East of Capel is very ambitious, as is 150 from Tudeley Village.

3.10 Whilst it is accepted that strategic allocations are required to meet longer term and large -scale housing needs, the emerging Local Plan ought to be realistic as to when and how many homes can be expected from these sites. Further, it should seek to identify a large number and range of small to medium sized allocations to provide for local housing needs and a consistent supply of new homes to account for the risk of delays from larger allocations. Placing such reliance on the delivery of homes from only two strategic sites is a high-risk strategy that could see the historically poor delivery of homes in the Borough continue and/ or worsen.

4.0 SITE ALLOCATION

4.1 Hermes House and the land to the rear ('the Site') provides an opportunity for an additional residential site allocation in Royal Tunbridge Wells within the emerging Local Plan. The Site has not previously been submitted to a Call for Sites and is not included in the Strategic Housing and Economic Land Availability Assessment (January 2021). The previous Call for Sites were held in 2016 and 2017 which was prior to Logistics UK considering relocating to a more appropriate site within Royal Tunbridge Wells.

4.2 For the reasons outlined above, Hermes House is not considered an appropriate employment location and has not been protected by the Council from changing use to residential, albeit this is not a feasible option given the inherent issues with the current buildings. Additionally, the land to the rear does not provide an active educational or recreational function and, if included with Hermes House, could provide a logical extension to the built-up area to create a high-quality residential development that delivers much-needed new homes in the short-term.

4.3 The Limits of Built Development boundary would require a minor adjustment to include that part of the land to the rear of Hermes House that currently falls outside. This area of land is surrounded on three sides by the current Limits of Built Development (i.e. it is inset) and the realignment of the boundary in this location would result in a logical 'squaring off' of the boundary with very limited visual impact.

4.4 Vehicular and pedestrian/ cycle access to the Site would continue to be taken from St John's Road from the existing or a relocated single access point.

4.5 It is envisaged that building heights will reflect the prevailing residential heights within the local area.

4.6 The homes would be provided as a range of private and affordable tenures and across a variety of dwelling types and sizes to cater for a wide range of households.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Built Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.0 EMERGING POLICY MAP/ POLICIES

Limits of Built Development

5.1 Current adopted policy (Core Policy 2) seeks to protect the Rural Fringe from development with this land only released through adoption of a development plan document (i.e. site allocations DPD). The emerging Local Plan does not seek to take forward the Rural Fringe designation which Logistics UK supports. However, part of the land to the rear of Hermes House would remain outside of the Limits of Built Development. This land is inset from the boundary of the Limits of Built Development and adjustment in this area would represent a logical 'squaring off' of the boundary. This would have very limited visual impact given the small scale of the adjustment but would optimise the delivery of new homes in a high-quality development to meet local needs for homes of different types, sizes and tenures.

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Employment

5.3 The emerging Local Plan (draft Policy ED 2) seeks to protect existing employment buildings/ sites regardless of their location and compatibility with neighbouring properties. It is our position that this is a failing of the emerging policy. Not all existing employment buildings/ sites will be appropriate for this

level of protection (for example, Hermes House) and the policy should not assume this to be the case. Express wording is required to acknowledge this situation and allow for change of use away from employment -generating use where this is not appropriate owing to reasons of, inter alia, neighbourliness, residential amenity and compatibility of land use.

5.4 NPPF paragraph 81(d) requires planning policies to 'be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances'. As drafted Policy ED 2 provides a rigid policy framework in respect of existing employment sites/ buildings with blanket protection that takes no account of local circumstances and does not provide flexibility for businesses to adapt and evolve. This conflicts with NPPF paragraph 81.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To debate the lack of residential allocations and particularly those that can deliver homes in the first five years of the Plan.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Logistics UK
Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore LLP
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/RTW 1 The Strategy for Royal Tunbridge Wells

Inset Map 3 (plus all showing LBD boundary)

[TWBC: this representation has been input against Section 5 - Royal Tunbridge Wells, Policies ED 2, STR/SS 1, STR/SS 3 and STR/RTW 1— see Comment Numbers PSLP_1855, PSLP_1864, PSLP_1865, PSLP_1866 and PSLP_1867. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC LOCAL PLAN REG. 19 REPRESENTATIONS

HERMES HOUSE, ST JOHN'S ROAD, ROYAL TUNBRIDGE WELLS

1.0 INTRODUCTION & OVERVIEW

1.1 These representations are made on behalf of Logistics UK in respect of their headquarters at Hermes House, St John's Road, Royal Tunbridge Wells TN4 9UZ and the land to the rear ('the Site': see Site Location Plan (drawing reference 2104/FS/001) enclosed at Appendix 1) and are submitted to the Regulation 19 consultation on the emerging Tunbridge Wells Borough Council ('TWBC') Local Plan (Pre -Submission Local Plan, undated).

1.2 The Site currently comprises offices in employment use (albeit currently only sparsely / rarely occupied) with associated car parking, accessed from St John's Road, and an area of grassland to the rear. The Site is not located within a conservation area and there are no known designated or

non-designated heritage assets on or in proximity. The Site falls within Flood Zone 1 and is not known to be subject to any ecological designations.

1.3 Logistics UK have occupied Hermes House since 1975. The older building on site is understood to have originally been constructed as church and used for religious purposes before being converted to offices. It has an unusual circular plan form that does not lend itself to modern office use and results in inefficient use of the space, both in terms of the area of unused space and the ability to lay out the useable space in a manner conducive to modern working practises. Moreover, Logistics UK run training and conferencing events from Hermes House which again does not lend itself to this purpose owing to the number of structural supports/ columns.

1.4 An extension was constructed in the late 1980s to provide two floors of office accommodation on a more regular plan form. Whilst at the time the extension functioned well it is now dated and requires significant upgrade works including replacement of all windows, a new heating system and air conditioning. There are also difficulties providing heating and cooling across the two elements of Hermes House as both differ significantly in their construction and design. This creates further inefficiencies.

1.5 A number of Logistics UK's staff travel to work by train. Hermes House is accessible by car but is some 1.8 km from the nearest train station (Tunbridge Wells) and is located outside of designated town centre/ employment areas. The Site is not in a sustainable employment location. Moreover, it is located in a predominantly residential area where adopted and emerging policy would resist new employment uses owing to the impact on residential amenity, issues of neighbourliness and incompatibility of land use.

1.6 As a result of the poor quality of the existing employment accommodation and its poor public transport accessibility and location within a residential area, Logistics UK has been planning to vacate Hermes House and relocate to a more appropriate premises and location within Tunbridge Wells. This process has been expedited owing to the pandemic and shift to a greater proportion of staff working from home thus requiring a smaller area of employment floorspace in any event.

1.7 Given the location of Hermes House in a residential area, residential has been identified as the most appropriate and compatible use moving forward. Moreover, TWBC has been unable to demonstrate a five-year supply of housing land for the most recent monitoring years and has a worsening Housing Delivery Test score despite having an Action Plan in place. The emerging Local Plan provides the opportunity to address the current and historically poor housing delivery in the Borough. However, the heavy reliance of the emerging Local Plan on two large strategic sites to meet almost 75% of its housing need over the Plan period is a high-risk strategy. Moreover, delivery of new homes on these strategic sites is not anticipated for four years (in our view at the earliest). The Council should, therefore, seek to allocate additional small/ medium scale sites for residential development to address historically unmet need, provide fluidity in five -year housing land supply and ensure short -term delivery of homes to mitigate the risk of delays from the strategic sites.

1.8 There are Borough-wide benefits of including additional site allocations that are deliverable in the first five years of the Plan. There are also local benefits to Royal Tunbridge Wells which has relatively few proposed site allocations that are expected to yield new homes in the initial five year period. A steady supply of new homes is required in key settlements to provide choice and variety in the market and to mitigate against increasing issues of affordability. The Council should consider additional residential allocations in Royal Tunbridge Wells that are deliverable in the short-term to maintain a steady supply of new homes in this principal settlement.

1.9 In addition to the above, allocation of a previously developed site in an established urban area such as Hermes House reduces the pressure on greenfield development and reduces the need for Green Belt release. NPPF paragraph 137(a) requires LPAs 'to make as much use as possible of brownfield and underutilised land' before concluding that exceptional circumstances exist to justify release of land from the Green Belt for development. Hermes House is a brownfield, underutilised site and whilst this Site alone would not remove the need for some Green Belt release to meet TWBC's housing needs, it ought to be considered as an option for allocation before Green Belt sites in the sequential approach to identifying land to meet residential development needs through the emerging Local Plan.

1.10 Redevelopment of Hermes House alone would yield relatively few dwellings. As such Logistics UK has also reviewed the potential of the land immediately to the rear. The land to the rear is currently in educational use but does not serve a specific educational or recreational function, nor has it been

identified as a suitable location for future educational development being distant from the main school campus. In short, this area of land forms part of the school grounds but is incidental to the educational/ recreational function of the school.

1.11 The Site has an area of approximately 0.65 hectares. A capacity study (enclosed at Appendix 2: drawings reference 2104/FS/010) indicates that circa 48 homes could be accommodated at a density of 74 dwellings per hectare. Combining Hermes House with the land to the rear allows the number of new homes to be optimised and also for a more varied mix of homes of different sizes suitable for a range of households (including apartments and houses) in addition to a greater number of affordable homes.

1.12 The Hermes House part of the Site currently falls within the Limits of Built Development as per the Policies Map (2016). The Council has imposed Article 4 Directions on a number of existing employment buildings to prevent them from changing from office to residential under current Permitted Development regulations. These 'protected' employment buildings are largely those falling within accessible town centre and/ or established/ designated employment locations. Hermes House falls within a solely residential area and has not been 'protected' through an Article 4 Direction. Subject to meeting the requisite criteria, Hermes House could therefore be converted to residential. However, as set out above, the, inter alia, awkward plan form, inherent issues with heating and cooling and poor standard of the building would make for poor/ substandard homes which prevents this from being an option.

1.13 The southern part of the land to the rear also falls within the Limits of Built Development with approximately 0.15 hectares falling outside and within the area currently designated as Rural Fringe.

1.14 Logistics UK consider the Site to be ideally placed to deliver a range of high -quality new homes in an established residential area, with only a minor adjustment to the existing boundary of the Limits of Built Development required to facilitate this. It is Logistics UK's position that the Site should be included within the emerging Local Plan as a residential site allocation to deliver circa 50 new homes. The Site is deliverable in the short -term and will assist in diversifying the type and scale of site allocations thus reducing reliance on large -scale strategic allocations that require significant new infrastructure and risk delay, with the consequential impact on housing land supply and delivery.

1.15 The Site is deliverable in the short -term as per the NPPF definition (Annex 2):

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years'

1.16 The Site comprises previously developed land (Hermes House) with very little landscaping and mown/ managed grass on the land to the rear. There is very limited ecological potential with no trees/ hedges that would pose a constraint to development as proposed. There are also no national designations that would impede the development such as Green Belt, flood risk or heritage. Access is established from St John's Road.

2.0 CURRENT USE

Employment

2.1 Hermes House was converted from its previous religious use to offices prior to Logistics UK's occupation. The older building has an unusual circular plan form and includes an amphitheatre - style space. This space has historically served a function for seminars/ conferences but the structural supports/ columns are not ideal for this purpose and the resulting office floorspace is awkward and inefficient and cannot be considered to provide modern, functional or flexible office accommodation.

2.2 In an attempt to improve the quality of the employment accommodation on site Logistics UK constructed an extension in the late 1980s (LPA reference 84/01473/FUL) facilitated by the demolition of a residential property. Whilst providing a more regular plan form, this extension is now over 25 years old and requires significant upgrade works to allow it to continue to function as office floorspace. For example, the large areas of glazing make the space too hot in summer but too cold in winter. The extension does not benefit from air conditioning and the heating system is inadequate. Both are required along with new windows. However, there are inherent difficulties providing heating and cooling systems to serve the older part of the building and the extension. This further adds to the inefficiency of the current buildings.

2.3 In addition to the above, Hermes House is located in a predominantly residential area outside of a designated town centre and employment location. It is accessible by car but some 1.8km from Tunbridge Wells train station. Several members of staff travel to work at Hermes House by train, a proportion that Logistics UK consider would be higher if the offices were located in a more convenient location in proximity to the train station.

2.4 There is also the issue of compatibility of land use. Hermes House is surrounded on three sides by residential properties, being located on a residential road in a predominantly residential neighbourhood. Logistics UK runs software that requires a constant (24/7) power supply and generators. Care is taken to minimise noise from the generators but they are not ideal in a residential area. Moreover, the heating and cooling systems required to address the inherent issues with the current buildings and allow the employment use to continue will further add to the noise emitted. These issues, coupled with vehicle movements, staff outside use (including from the smoking shelter) and the types and scale of signage required, are present with the existing employment use and any likely future employment use.

2.5 It is on the basis of the above that Logistics UK consider that Hermes House should be returned to its former residential use as this would be more compatible with the established residential use and character within the area. Moreover, in line with adopted Core Strategy (2010) Core Policy 7, employment uses, particularly of the scale of Hermes House, are more appropriately sited in sustainable and accessible town centre and employment locations.

Education

2.6 Approximately 60% of the land to the rear of Hermes House is located outside of the Limits of Built Development and within the Rural Fringe, with the southern portion (circa 40%) within the Limits of Built Development. It is all within educational use forming part of the grounds of an neighbouring school.

2.7 This land has been included within the Site as it forms a logical extension to the Hermes House site and allows for an improved residential layout that facilitates the delivery of a higher number of homes that includes a greater variety of homes of different sizes (including apartments and houses) and a higher number of affordable homes.

2.8 Whilst this land is within educational use, it does not have a defined educational or recreational function. It is laid to grass and forms an incidental part of the wider school grounds. When the school has previously expanded this land has been reviewed as an option but discounted owing to its location remote from the main core of the school. It is also not easily accessible from the public highway (although it would be accessible from St John's Road through Hermes House if the sites were to be combined as proposed). In short, this land does not form a specific educational or recreational function and it is Logistics UK's position that it would be an appropriate location for small-scale residential development.

3.0 CASE FOR RESIDENTIAL

Historic Supply/ Delivery of New Homes

3.1 TWBC has a published shortfall in five-year housing land supply (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) and at 1 April 2020 could only demonstrate 4.83 years supply (see Five-Year Housing Land Supply 2019/20). This was based on a 5% buffer. However, given that TWBC's previous Five-Year Housing Land Supply 2018/19 report also identified a shortfall (4.69%: see paragraph 12), NPPF paragraph 73 would previously have indicated that a 20% buffer is appropriate. This has subsequently been superseded by the Housing Delivery Test whereby the 20% buffer is to be applied to LPAs with a Housing Delivery Test score of 85% or below.

3.2 TWBC has a published score of 86% in the Housing Delivery Test for the period 2016/17 to 2018/19 (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) (published February 2020). Whilst 1% higher than the threshold for the 20% buffer, TWBC has failed to meet or exceed its housing requirement for two of the three monitoring years that have informed the Housing Delivery Test result. The one year it did exceed it was when the housing requirement was notably lower owing to the method of calculation (pre-Standard Method). Moreover, the 2021 Housing Delivery Test results see TWBC's score reduce to 85% (Housing Delivery Test: 2020 measurement - GOV.UK (www.gov.uk) [accessed 01/06/2021]) thus housing delivery is worsening in the borough and the 20% buffer (NPPF paragraph 73) should be applied to the calculation of five-year housing land supply. This places even greater pressure on TWBC to identify additional land for residential development.

Proposed Supply of New Homes

3.3 The emerging Local Plan utilises the Standard Method figure of 678 homes per annum (Pre - Submission Local Plan paragraph 4.10) from which to establish the number of homes to plan for. The Planning Practice Guidance ('PPG') is clear that the Standard Method provides a 'minimum annual housing need figure' (PPG paragraph: 002 Reference ID: 2a -002-20190220) and a not a housing requirement figure. Whilst there is acknowledgement within the emerging Local Plan that exceptional circumstances do not exist to deviate from the Standard Method (paragraph 4.9 and 4.11) i.e. to provide for a lower number of homes, and that TWBC may need to consider taking unmet need from neighbouring authorities (see paragraph 4.13), there does not appear to have been an attempt to identify whether it would be appropriate to actively plan for a higher housing requirement.

3.4 The emerging Local Plan has been developed on the basis that site allocations to deliver some 6,900 additional homes will be required (paragraph 4.17) (albeit the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) states that the Council must plan for a minimum of 7,221 homes through site allocations (paragraph 5.4). We have not interrogated the assessment that underpinned this conclusion (nor the discrepancy between the Topic Paper and Pre-Submission Local Plan). However, the emerging Local Plan is clear that this is based on the assumption that 'all previous allocations are still suitable and developable' (paragraph 4.17). In reality this may not be the case and the emerging Local Plan should actively seek to progress additional site allocations. Moreover, pursuant to the PPG, the Standard Method should be treated as a minimum figure. Thus, whilst the emerging Local Plan identifies site allocations capable of delivering between 8,076 and 8,461 homes over the Plan period (see Table 4), this may not be enough to provide for the housing required.

3.5 The historically poor housing delivery (as evidenced by the Housing Delivery Test) in the Borough and failure to maintain a five-year housing land supply should also be factors that weigh in favour of the identification of additional housing allocations to come forward in this Local Plan.

3.6 It is also noted that, whilst Royal Tunbridge Wells has 18 draft residential site allocations within the Pre-Submission Local Plan (see Section 5), the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) identifies very few homes being delivered within the current five-year period (see Table 9, pages 29/30). This risks an undersupply of new homes in Royal Tunbridge Wells which will serve to drive up already high house prices. There would be merit in identifying additional site allocations, such as Hermes House, that are deliverable in the short term and can assist in providing consistent delivery of new homes in the Borough's principal settlement over the Plan period.

Strategic Allocations

3.7 The reliance of the emerging Local Plan on large-scale, strategic allocations is also of concern. Approximately 6,300 homes are identified as coming forward from two strategic allocations: approximately 3,500 homes at Paddock Wood/ East Capel (draft Policy STR/SS 1); and approximately 2,800 homes from a new settlement – Tudeley Village (draft Policy STR/SS 3). This represents almost 75% of all new homes planned for through the emerging Local Plan (taking the upper range provided at Table 4; 78% if taking the lower range). There is, therefore, significant reliance on the delivery of new homes from these two strategic sites.

3.8 It is common for it to take some time to see homes delivered on large -scale, strategic sites owing to, inter alia, the complexity of the planning process, landownership and often significant new infrastructure requirements. In the case of the proposed allocations at Paddock Wood and Tudeley Village this includes new schools, neighbourhood centres, employment and sports, health and community facilities. Moreover, Framework Masterplan SPDs are requirements of the draft policies, to be adopted in advance of planning permission being granted, which will add significantly to the overall planning process. Furthermore, the use of Compulsory Purchase Order powers is referenced in both allocations indicating anticipated issues with landownership.

3.9 The Housing Supply and Trajectory Topic Paper for Pre-Submission Plan (February 2021) identifies delivery of homes from both strategic allocations from 2025/26, with 300 homes completed per annum from Paddock Wood/ East Capel and 150 from Tudeley Village (see Table 9, page 30). Given that Framework Masterplan SPDs are required before planning permission can be granted, it is already halfway through 2021 and significant infrastructure is required to 'unlock' the sites, delivery of homes from these allocations within the next four years is ambitious. Delivery of 300 homes in the first year from Paddock Wood/ East of Capel is very ambitious, as is 150 from Tudeley Village.

3.10 Whilst it is accepted that strategic allocations are required to meet longer term and large -scale housing needs, the emerging Local Plan ought to be realistic as to when and how many homes can be expected from these sites. Further, it should seek to identify a large number and range of small to medium sized allocations to provide for local housing needs and a consistent supply of new homes to account for the risk of delays from larger allocations. Placing such reliance on the delivery of homes from only two strategic sites is a high-risk strategy that could see the historically poor delivery of homes in the Borough continue and/ or worsen.

4.0 SITE ALLOCATION

4.1 Hermes House and the land to the rear ('the Site') provides an opportunity for an additional residential site allocation in Royal Tunbridge Wells within the emerging Local Plan. The Site has not previously been submitted to a Call for Sites and is not included in the Strategic Housing and Economic Land Availability Assessment (January 2021). The previous Call for Sites were held in 2016 and 2017 which was prior to Logistics UK considering relocating to a more appropriate site within Royal Tunbridge Wells.

4.2 For the reasons outlined above, Hermes House is not considered an appropriate employment location and has not been protected by the Council from changing use to residential, albeit this is not a feasible option given the inherent issues with the current buildings. Additionally, the land to the rear does not provide an active educational or recreational function and, if included with Hermes House, could provide a logical extension to the built -up area to create a high-quality residential development that delivers much-needed new homes in the short -term.

4.3 The Limits of Built Development boundary would require a minor adjustment to include that part of the land to the rear of Hermes House that currently falls outside. This area of land is surrounded on three sides by the current Limits of Built Development (i.e. it is inset) and the realignment of the boundary in this location would result a in logical 'squaring off' of the boundary with very limited visual impact.

4.4 Vehicular and pedestrian/ cycle access to the Site would continue to be taken from St John's Road from the existing or a relocated single access point.

4.5 It is envisaged that building heights will reflect the prevailing residential heights within the local area.

4.6 The homes would be provided as a range of private and affordable tenures and across a variety of dwelling types and sizes to cater for a wide range of households.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.0 EMERGING POLICY MAP/ POLICIES

Limits of Built Development

5.1 Current adopted policy (Core Policy 2) seeks to protect the Rural Fringe from development with this land only released through adoption of a development plan document (i.e. site allocations DPD). The emerging Local Plan does not seek to take forward the Rural Fringe designation which Logistics UK supports. However, part of the land to the rear of Hermes House would remain outside of the Limits of Built Development. This land is inset from the boundary of the Limits of Built Development and adjustment in this area would represent a logical 'squaring off' of the boundary. This would have very limited visual impact given the small scale of the adjustment but would optimise the delivery of new homes in a high-quality development to meet local needs for homes of different types, sizes and tenures.

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Employment

5.3 The emerging Local Plan (draft Policy ED 2) seeks to protect existing employment buildings/ sites regardless of their location and compatibility with neighbouring properties. It is our position that this is a failing of the emerging policy. Not all existing employment buildings/ sites will be appropriate for this level of protection (for example, Hermes House) and the policy should not assume this to be the case. Express wording is required to acknowledge this situation and allow for change of use away from employment -generating use where this is not appropriate owing to reasons of, inter alia, neighbourliness, residential amenity and compatibility of land use.

5.4 NPPF paragraph 81(d) requires planning policies to 'be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances'. As drafted Policy ED 2 provides a rigid policy framework in respect of existing employment sites/ buildings with blanket protection that takes no account of local circumstances and does not provide flexibility for businesses to adapt and evolve. This conflicts with NPPF paragraph 81.

For office use only

New Site Submission? Enter site address

Logistics UK, Hermes House, St Johns Road,
Tunbridge Wells

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To debate the merit of amending the boundary of the Limits of Built Development to the rear of Hermes House and to adduce evidence to support the adjustment of the boundary in this location.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Logistics UK
Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore LLP
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: this representation has been input against Section 5 - Royal Tunbridge Wells, Policies ED 2, STR/SS 1, STR/SS 3 and STR/RTW 1– see Comment Numbers PSLP_1855, PSLP_1864, PSLP_1865, PSLP_1866 and PSLP_1867. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC LOCAL PLAN REG. 19 REPRESENTATIONS

HERMES HOUSE, ST JOHN'S ROAD, ROYAL TUNBRIDGE WELLS

1.0 INTRODUCTION & OVERVIEW

1.1 These representations are made on behalf of Logistics UK in respect of their headquarters at Hermes House, St John's Road, Royal Tunbridge Wells TN4 9UZ and the land to the rear ('the Site': see Site Location Plan (drawing reference 2104/FS/001) enclosed at Appendix 1) and are submitted to the Regulation 19 consultation on the emerging Tunbridge Wells Borough Council ('TWBC') Local Plan (Pre -Submission Local Plan, undated).

1.2 The Site currently comprises offices in employment use (albeit currently only sparsely / rarely occupied) with associated car parking, accessed from St John's Road, and an area of grassland to the rear. The Site is not located within a conservation area and there are no known designated or

non-designated heritage assets on or in proximity. The Site falls within Flood Zone 1 and is not known to be subject to any ecological designations.

1.3 Logistics UK have occupied Hermes House since 1975. The older building on site is understood to have originally been constructed as church and used for religious purposes before being converted to offices. It has an unusual circular plan form that does not lend itself to modern office use and results in inefficient use of the space, both in terms of the area of unused space and the ability to lay out the useable space in a manner conducive to modern working practises. Moreover, Logistics UK run training and conferencing events from Hermes House which again does not lend itself to this purpose owing to the number of structural supports/ columns.

1.4 An extension was constructed in the late 1980s to provide two floors of office accommodation on a more regular plan form. Whilst at the time the extension functioned well it is now dated and requires significant upgrade works including replacement of all windows, a new heating system and air conditioning. There are also difficulties providing heating and cooling across the two elements of Hermes House as both differ significantly in their construction and design. This creates further inefficiencies.

1.5 A number of Logistics UK's staff travel to work by train. Hermes House is accessible by car but is some 1.8 km from the nearest train station (Tunbridge Wells) and is located outside of designated town centre/ employment areas. The Site is not in a sustainable employment location. Moreover, it is located in a predominantly residential area where adopted and emerging policy would resist new employment uses owing to the impact on residential amenity, issues of neighbourliness and incompatibility of land use.

1.6 As a result of the poor quality of the existing employment accommodation and its poor public transport accessibility and location within a residential area, Logistics UK has been planning to vacate Hermes House and relocate to a more appropriate premises and location within Tunbridge Wells. This process has been expedited owing to the pandemic and shift to a greater proportion of staff working from home thus requiring a smaller area of employment floorspace in any event.

1.7 Given the location of Hermes House in a residential area, residential has been identified as the most appropriate and compatible use moving forward. Moreover, TWBC has been unable to demonstrate a five-year supply of housing land for the most recent monitoring years and has a worsening Housing Delivery Test score despite having an Action Plan in place. The emerging Local Plan provides the opportunity to address the current and historically poor housing delivery in the Borough. However, the heavy reliance of the emerging Local Plan on two large strategic sites to meet almost 75% of its housing need over the Plan period is a high-risk strategy. Moreover, delivery of new homes on these strategic sites is not anticipated for four years (in our view at the earliest). The Council should, therefore, seek to allocate additional small/ medium scale sites for residential development to address historically unmet need, provide fluidity in five -year housing land supply and ensure short -term delivery of homes to mitigate the risk of delays from the strategic sites.

1.8 There are Borough-wide benefits of including additional site allocations that are deliverable in the first five years of the Plan. There are also local benefits to Royal Tunbridge Wells which has relatively few proposed site allocations that are expected to yield new homes in the initial five year period. A steady supply of new homes is required in key settlements to provide choice and variety in the market and to mitigate against increasing issues of affordability. The Council should consider additional residential allocations in Royal Tunbridge Wells that are deliverable in the short-term to maintain a steady supply of new homes in this principal settlement.

1.9 In addition to the above, allocation of a previously developed site in an established urban area such as Hermes House reduces the pressure on greenfield development and reduces the need for Green Belt release. NPPF paragraph 137(a) requires LPAs 'to make as much use as possible of brownfield and underutilised land' before concluding that exceptional circumstances exist to justify release of land from the Green Belt for development. Hermes House is a brownfield, underutilised site and whilst this Site alone would not remove the need for some Green Belt release to meet TWBC's housing needs, it ought to be considered as an option for allocation before Green Belt sites in the sequential approach to identifying land to meet residential development needs through the emerging Local Plan.

1.10 Redevelopment of Hermes House alone would yield relatively few dwellings. As such Logistics UK has also reviewed the potential of the land immediately to the rear. The land to the rear is currently in educational use but does not serve a specific educational or recreational function, nor has it been

identified as a suitable location for future educational development being distant from the main school campus. In short, this area of land forms part of the school grounds but is incidental to the educational/ recreational function of the school.

1.11 The Site has an area of approximately 0.65 hectares. A capacity study (enclosed at Appendix 2: drawings reference 2104/FS/010) indicates that circa 48 homes could be accommodated at a density of 74 dwellings per hectare. Combining Hermes House with the land to the rear allows the number of new homes to be optimised and also for a more varied mix of homes of different sizes suitable for a range of households (including apartments and houses) in addition to a greater number of affordable homes.

1.12 The Hermes House part of the Site currently falls within the Limits of Built Development as per the Policies Map (2016). The Council has imposed Article 4 Directions on a number of existing employment buildings to prevent them from changing from office to residential under current Permitted Development regulations. These 'protected' employment buildings are largely those falling within accessible town centre and/ or established/ designated employment locations. Hermes House falls within a solely residential area and has not been 'protected' through an Article 4 Direction. Subject to meeting the requisite criteria, Hermes House could therefore be converted to residential. However, as set out above, the, inter alia, awkward plan form, inherent issues with heating and cooling and poor standard of the building would make for poor/ substandard homes which prevents this from being an option.

1.13 The southern part of the land to the rear also falls within the Limits of Built Development with approximately 0.15 hectares falling outside and within the area currently designated as Rural Fringe.

1.14 Logistics UK consider the Site to be ideally placed to deliver a range of high -quality new homes in an established residential area, with only a minor adjustment to the existing boundary of the Limits of Built Development required to facilitate this. It is Logistics UK's position that the Site should be included within the emerging Local Plan as a residential site allocation to deliver circa 50 new homes. The Site is deliverable in the short -term and will assist in diversifying the type and scale of site allocations thus reducing reliance on large -scale strategic allocations that require significant new infrastructure and risk delay, with the consequential impact on housing land supply and delivery.

1.15 The Site is deliverable in the short -term as per the NPPF definition (Annex 2):

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years'

1.16 The Site comprises previously developed land (Hermes House) with very little landscaping and mown/ managed grass on the land to the rear. There is very limited ecological potential with no trees/ hedges that would pose a constraint to development as proposed. There are also no national designations that would impede the development such as Green Belt, flood risk or heritage. Access is established from St John's Road.

2.0 CURRENT USE

Employment

2.1 Hermes House was converted from its previous religious use to offices prior to Logistics UK's occupation. The older building has an unusual circular plan form and includes an amphitheatre - style space. This space has historically served a function for seminars/ conferences but the structural supports/ columns are not ideal for this purpose and the resulting office floorspace is awkward and inefficient and cannot be considered to provide modern, functional or flexible office accommodation.

2.2 In an attempt to improve the quality of the employment accommodation on site Logistics UK constructed an extension in the late 1980s (LPA reference 84/01473/FUL) facilitated by the demolition of a residential property. Whilst providing a more regular plan form, this extension is now over 25 years old and requires significant upgrade works to allow it to continue to function as office floorspace. For example, the large areas of glazing make the space too hot in summer but too cold in winter. The extension does not benefit from air conditioning and the heating system is inadequate. Both are required along with new windows. However, there are inherent difficulties providing heating and cooling systems to serve the older part of the building and the extension. This further adds to the inefficiency of the current buildings.

2.3 In addition to the above, Hermes House is located in a predominantly residential area outside of a designated town centre and employment location. It is accessible by car but some 1.8km from Tunbridge Wells train station. Several members of staff travel to work at Hermes House by train, a proportion that Logistics UK consider would be higher if the offices were located in a more convenient location in proximity to the train station.

2.4 There is also the issue of compatibility of land use. Hermes House is surrounded on three sides by residential properties, being located on a residential road in a predominantly residential neighbourhood. Logistics UK runs software that requires a constant (24/7) power supply and generators. Care is taken to minimise noise from the generators but they are not ideal in a residential area. Moreover, the heating and cooling systems required to address the inherent issues with the current buildings and allow the employment use to continue will further add to the noise emitted. These issues, coupled with vehicle movements, staff outside use (including from the smoking shelter) and the types and scale of signage required, are present with the existing employment use and any likely future employment use.

2.5 It is on the basis of the above that Logistics UK consider that Hermes House should be returned to its former residential use as this would be more compatible with the established residential use and character within the area. Moreover, in line with adopted Core Strategy (2010) Core Policy 7, employment uses, particularly of the scale of Hermes House, are more appropriately sited in sustainable and accessible town centre and employment locations.

Education

2.6 Approximately 60% of the land to the rear of Hermes House is located outside of the Limits of Built Development and within the Rural Fringe, with the southern portion (circa 40%) within the Limits of Built Development. It is all within educational use forming part of the grounds of an neighbouring school.

2.7 This land has been included within the Site as it forms a logical extension to the Hermes House site and allows for an improved residential layout that facilitates the delivery of a higher number of homes that includes a greater variety of homes of different sizes (including apartments and houses) and a higher number of affordable homes.

2.8 Whilst this land is within educational use, it does not have a defined educational or recreational function. It is laid to grass and forms an incidental part of the wider school grounds. When the school has previously expanded this land has been reviewed as an option but discounted owing to its location remote from the main core of the school. It is also not easily accessible from the public highway (although it would be accessible from St John's Road through Hermes House if the sites were to be combined as proposed). In short, this land does not form a specific educational or recreational function and it is Logistics UK's position that it would be an appropriate location for small-scale residential development.

3.0 CASE FOR RESIDENTIAL

Historic Supply/ Delivery of New Homes

3.1 TWBC has a published shortfall in five-year housing land supply (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) and at 1 April 2020 could only demonstrate 4.83 years supply (see Five-Year Housing Land Supply 2019/20). This was based on a 5% buffer. However, given that TWBC's previous Five -Year Housing Land Supply 2018/19 report also identified a shortfall (4.69%: see paragraph 12), NPPF paragraph 73 would previously have indicated that a 20% buffer is appropriate. This has subsequently been superseded by the Housing Delivery Test whereby the 20% buffer is to be applied to LPAs with a Housing Delivery Test score of 85% or below.

3.2 TWBC has a published score of 86% in the Housing Delivery Test for the period 2016/17 to 2018/19 (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) (published February 2020). Whilst 1% higher than the threshold for the 20% buffer, TWBC has failed to meet or exceed its housing requirement for two of the three monitoring years that have informed the Housing Delivery Test result. The one year it did exceed it was when the housing requirement was notably lower owing to the method of calculation (pre -Standard Method). Moreover, the 2021 Housing Delivery Test results see TWBC's score reduce to 85% (Housing Delivery Test: 2020 measurement - GOV.UK (www.gov.uk) [accessed 01/06/2021]) thus housing delivery is worsening in the borough and the 20% buffer (NPPF paragraph 73) should be applied to the calculation of five-year housing land supply. This places even greater pressure on TWBC to identify additional land for residential development.

Proposed Supply of New Homes

3.3 The emerging Local Plan utilises the Standard Method figure of 678 homes per annum (Pre - Submission Local Plan paragraph 4.10) from which to establish the number of homes to plan for. The Planning Practice Guidance ('PPG') is clear that the Standard Method provides a 'minimum annual housing need figure' (PPG paragraph: 002 Reference ID: 2a -002-20190220) and a not a housing requirement figure. Whilst there is acknowledgement within the emerging Local Plan that exceptional circumstances do not exist to deviate from the Standard Method (paragraph 4.9 and 4.11) i.e. to provide for a lower number of homes, and that TWBC may need to consider taking unmet need from neighbouring authorities (see paragraph 4.13), there does not appear to have been an attempt to identify whether it would be appropriate to actively plan for a higher housing requirement.

3.4 The emerging Local Plan has been developed on the basis that site allocations to deliver some 6,900 additional homes will be required (paragraph 4.17) (albeit the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) states that the Council must plan for a minimum of 7,221 homes through site allocations (paragraph 5.4). We have not interrogated the assessment that underpinned this conclusion (nor the discrepancy between the Topic Paper and Pre-Submission Local Plan). However, the emerging Local Plan is clear that this is based on the assumption that 'all previous allocations are still suitable and developable' (paragraph 4.17). In reality this may not be the case and the emerging Local Plan should actively seek to progress additional site allocations. Moreover, pursuant to the PPG, the Standard Method should be treated as a minimum figure. Thus, whilst the emerging Local Plan identifies site allocations capable of delivering between 8,076 and 8,461 homes over the Plan period (see Table 4), this may not be enough to provide for the housing required.

3.5 The historically poor housing delivery (as evidenced by the Housing Delivery Test) in the Borough and failure to maintain a five-year housing land supply should also be factors that weigh in favour of the identification of additional housing allocations to come forward in this Local Plan.

3.6 It is also noted that, whilst Royal Tunbridge Wells has 18 draft residential site allocations within the Pre-Submission Local Plan (see Section 5), the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) identifies very few homes being delivered within the current five-year period (see Table 9, pages 29/30). This risks an undersupply of new homes in Royal Tunbridge Wells which will serve to drive up already high house prices. There would be merit in identifying additional site allocations, such as Hermes House, that are deliverable in the short term and can assist in providing consistent delivery of new homes in the Borough's principal settlement over the Plan period.

Strategic Allocations

3.7 The reliance of the emerging Local Plan on large-scale, strategic allocations is also of concern. Approximately 6,300 homes are identified as coming forward from two strategic allocations: approximately 3,500 homes at Paddock Wood/ East Capel (draft Policy STR/SS 1); and approximately 2,800 homes from a new settlement – Tudeley Village (draft Policy STR/SS 3). This represents almost 75% of all new homes planned for through the emerging Local Plan (taking the upper range provided at Table 4; 78% if taking the lower range). There is, therefore, significant reliance on the delivery of new homes from these two strategic sites.

3.8 It is common for it to take some time to see homes delivered on large -scale, strategic sites owing to, inter alia, the complexity of the planning process, landownership and often significant new infrastructure requirements. In the case of the proposed allocations at Paddock Wood and Tudeley Village this includes new schools, neighbourhood centres, employment and sports, health and community facilities. Moreover, Framework Masterplan SPDs are requirements of the draft policies, to be adopted in advance of planning permission being granted, which will add significantly to the overall planning process. Furthermore, the use of Compulsory Purchase Order powers is referenced in both allocations indicating anticipated issues with landownership.

3.9 The Housing Supply and Trajectory Topic Paper for Pre-Submission Plan (February 2021) identifies delivery of homes from both strategic allocations from 2025/26, with 300 homes completed per annum from Paddock Wood/ East Capel and 150 from Tudeley Village (see Table 9, page 30). Given that Framework Masterplan SPDs are required before planning permission can be granted, it is already halfway through 2021 and significant infrastructure is required to 'unlock' the sites, delivery of homes from these allocations within the next four years is ambitious. Delivery of 300 homes in the first year from Paddock Wood/ East of Capel is very ambitious, as is 150 from Tudeley Village.

3.10 Whilst it is accepted that strategic allocations are required to meet longer term and large -scale housing needs, the emerging Local Plan ought to be realistic as to when and how many homes can be expected from these sites. Further, it should seek to identify a large number and range of small to medium sized allocations to provide for local housing needs and a consistent supply of new homes to account for the risk of delays from larger allocations. Placing such reliance on the delivery of homes from only two strategic sites is a high-risk strategy that could see the historically poor delivery of homes in the Borough continue and/ or worsen.

4.0 SITE ALLOCATION

4.1 Hermes House and the land to the rear ('the Site') provides an opportunity for an additional residential site allocation in Royal Tunbridge Wells within the emerging Local Plan. The Site has not previously been submitted to a Call for Sites and is not included in the Strategic Housing and Economic Land Availability Assessment (January 2021). The previous Call for Sites were held in 2016 and 2017 which was prior to Logistics UK considering relocating to a more appropriate site within Royal Tunbridge Wells.

4.2 For the reasons outlined above, Hermes House is not considered an appropriate employment location and has not been protected by the Council from changing use to residential, albeit this is not a feasible option given the inherent issues with the current buildings. Additionally, the land to the rear does not provide an active educational or recreational function and, if included with Hermes House, could provide a logical extension to the built -up area to create a high-quality residential development that delivers much-needed new homes in the short -term.

4.3 The Limits of Built Development boundary would require a minor adjustment to include that part of the land to the rear of Hermes House that currently falls outside. This area of land is surrounded on three sides by the current Limits of Built Development (i.e. it is inset) and the realignment of the boundary in this location would result a in logical 'squaring off' of the boundary with very limited visual impact.

4.4 Vehicular and pedestrian/ cycle access to the Site would continue to be taken from St John's Road from the existing or a relocated single access point.

4.5 It is envisaged that building heights will reflect the prevailing residential heights within the local area.

4.6 The homes would be provided as a range of private and affordable tenures and across a variety of dwelling types and sizes to cater for a wide range of households.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.0 EMERGING POLICY MAP/ POLICIES

Limits of Built Development

5.1 Current adopted policy (Core Policy 2) seeks to protect the Rural Fringe from development with this land only released through adoption of a development plan document (i.e. site allocations DPD). The emerging Local Plan does not seek to take forward the Rural Fringe designation which Logistics UK supports. However, part of the land to the rear of Hermes House would remain outside of the Limits of Built Development. This land is inset from the boundary of the Limits of Built Development and adjustment in this area would represent a logical 'squaring off' of the boundary. This would have very limited visual impact given the small scale of the adjustment but would optimise the delivery of new homes in a high-quality development to meet local needs for homes of different types, sizes and tenures.

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Employment

5.3 The emerging Local Plan (draft Policy ED 2) seeks to protect existing employment buildings/ sites regardless of their location and compatibility with neighbouring properties. It is our position that this is a failing of the emerging policy. Not all existing employment buildings/ sites will be appropriate for this level of protection (for example, Hermes House) and the policy should not assume this to be the case. Express wording is required to acknowledge this situation and allow for change of use away from employment -generating use where this is not appropriate owing to reasons of, inter alia, neighbourliness, residential amenity and compatibility of land use.

5.4 NPPF paragraph 81(d) requires planning policies to 'be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances'. As drafted Policy ED 2 provides a rigid policy framework in respect of existing employment sites/ buildings with blanket protection that takes no account of local circumstances and does not provide flexibility for businesses to adapt and evolve. This conflicts with NPPF paragraph 81.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To debate the issues with such heavy reliance upon housing delivery from just two sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Logistics UK
Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore LLP
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: this representation has been input against Section 5 - Royal Tunbridge Wells, Policies ED 2, STR/SS 1, STR/SS 3 and STR/RTW 1– see Comment Numbers PSLP_1855, PSLP_1864, PSLP_1865, PSLP_1866 and PSLP_1867. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC LOCAL PLAN REG. 19 REPRESENTATIONS

HERMES HOUSE, ST JOHN'S ROAD, ROYAL TUNBRIDGE WELLS

1.0 INTRODUCTION & OVERVIEW

1.1 These representations are made on behalf of Logistics UK in respect of their headquarters at Hermes House, St John's Road, Royal Tunbridge Wells TN4 9UZ and the land to the rear ('the Site': see Site Location Plan (drawing reference 2104/FS/001) enclosed at Appendix 1) and are submitted to the Regulation 19 consultation on the emerging Tunbridge Wells Borough Council ('TWBC') Local Plan (Pre -Submission Local Plan, undated).

1.2 The Site currently comprises offices in employment use (albeit currently only sparsely / rarely occupied) with associated car parking, accessed from St John's Road, and an area of grassland to the rear. The Site is not located within a conservation area and there are no known designated or

non-designated heritage assets on or in proximity. The Site falls within Flood Zone 1 and is not known to be subject to any ecological designations.

1.3 Logistics UK have occupied Hermes House since 1975. The older building on site is understood to have originally been constructed as church and used for religious purposes before being converted to offices. It has an unusual circular plan form that does not lend itself to modern office use and results in inefficient use of the space, both in terms of the area of unused space and the ability to lay out the useable space in a manner conducive to modern working practises. Moreover, Logistics UK run training and conferencing events from Hermes House which again does not lend itself to this purpose owing to the number of structural supports/ columns.

1.4 An extension was constructed in the late 1980s to provide two floors of office accommodation on a more regular plan form. Whilst at the time the extension functioned well it is now dated and requires significant upgrade works including replacement of all windows, a new heating system and air conditioning. There are also difficulties providing heating and cooling across the two elements of Hermes House as both differ significantly in their construction and design. This creates further inefficiencies.

1.5 A number of Logistics UK's staff travel to work by train. Hermes House is accessible by car but is some 1.8 km from the nearest train station (Tunbridge Wells) and is located outside of designated town centre/ employment areas. The Site is not in a sustainable employment location. Moreover, it is located in a predominantly residential area where adopted and emerging policy would resist new employment uses owing to the impact on residential amenity, issues of neighbourliness and incompatibility of land use.

1.6 As a result of the poor quality of the existing employment accommodation and its poor public transport accessibility and location within a residential area, Logistics UK has been planning to vacate Hermes House and relocate to a more appropriate premises and location within Tunbridge Wells. This process has been expedited owing to the pandemic and shift to a greater proportion of staff working from home thus requiring a smaller area of employment floorspace in any event.

1.7 Given the location of Hermes House in a residential area, residential has been identified as the most appropriate and compatible use moving forward. Moreover, TWBC has been unable to demonstrate a five-year supply of housing land for the most recent monitoring years and has a worsening Housing Delivery Test score despite having an Action Plan in place. The emerging Local Plan provides the opportunity to address the current and historically poor housing delivery in the Borough. However, the heavy reliance of the emerging Local Plan on two large strategic sites to meet almost 75% of its housing need over the Plan period is a high-risk strategy. Moreover, delivery of new homes on these strategic sites is not anticipated for four years (in our view at the earliest). The Council should, therefore, seek to allocate additional small/ medium scale sites for residential development to address historically unmet need, provide fluidity in five -year housing land supply and ensure short -term delivery of homes to mitigate the risk of delays from the strategic sites.

1.8 There are Borough-wide benefits of including additional site allocations that are deliverable in the first five years of the Plan. There are also local benefits to Royal Tunbridge Wells which has relatively few proposed site allocations that are expected to yield new homes in the initial five year period. A steady supply of new homes is required in key settlements to provide choice and variety in the market and to mitigate against increasing issues of affordability. The Council should consider additional residential allocations in Royal Tunbridge Wells that are deliverable in the short-term to maintain a steady supply of new homes in this principal settlement.

1.9 In addition to the above, allocation of a previously developed site in an established urban area such as Hermes House reduces the pressure on greenfield development and reduces the need for Green Belt release. NPPF paragraph 137(a) requires LPAs 'to make as much use as possible of brownfield and underutilised land' before concluding that exceptional circumstances exist to justify release of land from the Green Belt for development. Hermes House is a brownfield, underutilised site and whilst this Site alone would not remove the need for some Green Belt release to meet TWBC's housing needs, it ought to be considered as an option for allocation before Green Belt sites in the sequential approach to identifying land to meet residential development needs through the emerging Local Plan.

1.10 Redevelopment of Hermes House alone would yield relatively few dwellings. As such Logistics UK has also reviewed the potential of the land immediately to the rear. The land to the rear is currently in educational use but does not serve a specific educational or recreational function, nor has it been

identified as a suitable location for future educational development being distant from the main school campus. In short, this area of land forms part of the school grounds but is incidental to the educational/ recreational function of the school.

1.11 The Site has an area of approximately 0.65 hectares. A capacity study (enclosed at Appendix 2: drawings reference 2104/FS/010) indicates that circa 48 homes could be accommodated at a density of 74 dwellings per hectare. Combining Hermes House with the land to the rear allows the number of new homes to be optimised and also for a more varied mix of homes of different sizes suitable for a range of households (including apartments and houses) in addition to a greater number of affordable homes.

1.12 The Hermes House part of the Site currently falls within the Limits of Built Development as per the Policies Map (2016). The Council has imposed Article 4 Directions on a number of existing employment buildings to prevent them from changing from office to residential under current Permitted Development regulations. These 'protected' employment buildings are largely those falling within accessible town centre and/ or established/ designated employment locations. Hermes House falls within a solely residential area and has not been 'protected' through an Article 4 Direction. Subject to meeting the requisite criteria, Hermes House could therefore be converted to residential. However, as set out above, the, inter alia, awkward plan form, inherent issues with heating and cooling and poor standard of the building would make for poor/ substandard homes which prevents this from being an option.

1.13 The southern part of the land to the rear also falls within the Limits of Built Development with approximately 0.15 hectares falling outside and within the area currently designated as Rural Fringe.

1.14 Logistics UK consider the Site to be ideally placed to deliver a range of high -quality new homes in an established residential area, with only a minor adjustment to the existing boundary of the Limits of Built Development required to facilitate this. It is Logistics UK's position that the Site should be included within the emerging Local Plan as a residential site allocation to deliver circa 50 new homes. The Site is deliverable in the short -term and will assist in diversifying the type and scale of site allocations thus reducing reliance on large -scale strategic allocations that require significant new infrastructure and risk delay, with the consequential impact on housing land supply and delivery.

1.15 The Site is deliverable in the short -term as per the NPPF definition (Annex 2):

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years'

1.16 The Site comprises previously developed land (Hermes House) with very little landscaping and mown/ managed grass on the land to the rear. There is very limited ecological potential with no trees/ hedges that would pose a constraint to development as proposed. There are also no national designations that would impede the development such as Green Belt, flood risk or heritage. Access is established from St John's Road.

2.0 CURRENT USE

Employment

2.1 Hermes House was converted from its previous religious use to offices prior to Logistics UK's occupation. The older building has an unusual circular plan form and includes an amphitheatre - style space. This space has historically served a function for seminars/ conferences but the structural supports/ columns are not ideal for this purpose and the resulting office floorspace is awkward and inefficient and cannot be considered to provide modern, functional or flexible office accommodation.

2.2 In an attempt to improve the quality of the employment accommodation on site Logistics UK constructed an extension in the late 1980s (LPA reference 84/01473/FUL) facilitated by the demolition of a residential property. Whilst providing a more regular plan form, this extension is now over 25 years old and requires significant upgrade works to allow it to continue to function as office floorspace. For example, the large areas of glazing make the space too hot in summer but too cold in winter. The extension does not benefit from air conditioning and the heating system is inadequate. Both are required along with new windows. However, there are inherent difficulties providing heating and cooling systems to serve the older part of the building and the extension. This further adds to the inefficiency of the current buildings.

2.3 In addition to the above, Hermes House is located in a predominantly residential area outside of a designated town centre and employment location. It is accessible by car but some 1.8km from Tunbridge Wells train station. Several members of staff travel to work at Hermes House by train, a proportion that Logistics UK consider would be higher if the offices were located in a more convenient location in proximity to the train station.

2.4 There is also the issue of compatibility of land use. Hermes House is surrounded on three sides by residential properties, being located on a residential road in a predominantly residential neighbourhood. Logistics UK runs software that requires a constant (24/7) power supply and generators. Care is taken to minimise noise from the generators but they are not ideal in a residential area. Moreover, the heating and cooling systems required to address the inherent issues with the current buildings and allow the employment use to continue will further add to the noise emitted. These issues, coupled with vehicle movements, staff outside use (including from the smoking shelter) and the types and scale of signage required, are present with the existing employment use and any likely future employment use.

2.5 It is on the basis of the above that Logistics UK consider that Hermes House should be returned to its former residential use as this would be more compatible with the established residential use and character within the area. Moreover, in line with adopted Core Strategy (2010) Core Policy 7, employment uses, particularly of the scale of Hermes House, are more appropriately sited in sustainable and accessible town centre and employment locations.

Education

2.6 Approximately 60% of the land to the rear of Hermes House is located outside of the Limits of Built Development and within the Rural Fringe, with the southern portion (circa 40%) within the Limits of Built Development. It is all within educational use forming part of the grounds of an neighbouring school.

2.7 This land has been included within the Site as it forms a logical extension to the Hermes House site and allows for an improved residential layout that facilitates the delivery of a higher number of homes that includes a greater variety of homes of different sizes (including apartments and houses) and a higher number of affordable homes.

2.8 Whilst this land is within educational use, it does not have a defined educational or recreational function. It is laid to grass and forms an incidental part of the wider school grounds. When the school has previously expanded this land has been reviewed as an option but discounted owing to its location remote from the main core of the school. It is also not easily accessible from the public highway (although it would be accessible from St John's Road through Hermes House if the sites were to be combined as proposed). In short, this land does not form a specific educational or recreational function and it is Logistics UK's position that it would be an appropriate location for small-scale residential development.

3.0 CASE FOR RESIDENTIAL

Historic Supply/ Delivery of New Homes

3.1 TWBC has a published shortfall in five-year housing land supply (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) and at 1 April 2020 could only demonstrate 4.83 years supply (see Five-Year Housing Land Supply 2019/20). This was based on a 5% buffer. However, given that TWBC's previous Five-Year Housing Land Supply 2018/19 report also identified a shortfall (4.69%: see paragraph 12), NPPF paragraph 73 would previously have indicated that a 20% buffer is appropriate. This has subsequently been superseded by the Housing Delivery Test whereby the 20% buffer is to be applied to LPAs with a Housing Delivery Test score of 85% or below.

3.2 TWBC has a published score of 86% in the Housing Delivery Test for the period 2016/17 to 2018/19 (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) (published February 2020). Whilst 1% higher than the threshold for the 20% buffer, TWBC has failed to meet or exceed its housing requirement for two of the three monitoring years that have informed the Housing Delivery Test result. The one year it did exceed it was when the housing requirement was notably lower owing to the method of calculation (pre-Standard Method). Moreover, the 2021 Housing Delivery Test results see TWBC's score reduce to 85% (Housing Delivery Test: 2020 measurement - GOV.UK (www.gov.uk) [accessed 01/06/2021]) thus housing delivery is worsening in the borough and the 20% buffer (NPPF paragraph 73) should be applied to the calculation of five-year housing land supply. This places even greater pressure on TWBC to identify additional land for residential development.

Proposed Supply of New Homes

3.3 The emerging Local Plan utilises the Standard Method figure of 678 homes per annum (Pre - Submission Local Plan paragraph 4.10) from which to establish the number of homes to plan for. The Planning Practice Guidance ('PPG') is clear that the Standard Method provides a 'minimum annual housing need figure' (PPG paragraph: 002 Reference ID: 2a -002-20190220) and a not a housing requirement figure. Whilst there is acknowledgement within the emerging Local Plan that exceptional circumstances do not exist to deviate from the Standard Method (paragraph 4.9 and 4.11) i.e. to provide for a lower number of homes, and that TWBC may need to consider taking unmet need from neighbouring authorities (see paragraph 4.13), there does not appear to have been an attempt to identify whether it would be appropriate to actively plan for a higher housing requirement.

3.4 The emerging Local Plan has been developed on the basis that site allocations to deliver some 6,900 additional homes will be required (paragraph 4.17) (albeit the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) states that the Council must plan for a minimum of 7,221 homes through site allocations (paragraph 5.4). We have not interrogated the assessment that underpinned this conclusion (nor the discrepancy between the Topic Paper and Pre-Submission Local Plan). However, the emerging Local Plan is clear that this is based on the assumption that 'all previous allocations are still suitable and developable' (paragraph 4.17). In reality this may not be the case and the emerging Local Plan should actively seek to progress additional site allocations. Moreover, pursuant to the PPG, the Standard Method should be treated as a minimum figure. Thus, whilst the emerging Local Plan identifies site allocations capable of delivering between 8,076 and 8,461 homes over the Plan period (see Table 4), this may not be enough to provide for the housing required.

3.5 The historically poor housing delivery (as evidenced by the Housing Delivery Test) in the Borough and failure to maintain a five-year housing land supply should also be factors that weigh in favour of the identification of additional housing allocations to come forward in this Local Plan.

3.6 It is also noted that, whilst Royal Tunbridge Wells has 18 draft residential site allocations within the Pre-Submission Local Plan (see Section 5), the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) identifies very few homes being delivered within the current five-year period (see Table 9, pages 29/30). This risks an undersupply of new homes in Royal Tunbridge Wells which will serve to drive up already high house prices. There would be merit in identifying additional site allocations, such as Hermes House, that are deliverable in the short term and can assist in providing consistent delivery of new homes in the Borough's principal settlement over the Plan period.

Strategic Allocations

3.7 The reliance of the emerging Local Plan on large-scale, strategic allocations is also of concern. Approximately 6,300 homes are identified as coming forward from two strategic allocations: approximately 3,500 homes at Paddock Wood/ East Capel (draft Policy STR/SS 1); and approximately 2,800 homes from a new settlement – Tudeley Village (draft Policy STR/SS 3). This represents almost 75% of all new homes planned for through the emerging Local Plan (taking the upper range provided at Table 4; 78% if taking the lower range). There is, therefore, significant reliance on the delivery of new homes from these two strategic sites.

3.8 It is common for it to take some time to see homes delivered on large -scale, strategic sites owing to, inter alia, the complexity of the planning process, landownership and often significant new infrastructure requirements. In the case of the proposed allocations at Paddock Wood and Tudeley Village this includes new schools, neighbourhood centres, employment and sports, health and community facilities. Moreover, Framework Masterplan SPDs are requirements of the draft policies, to be adopted in advance of planning permission being granted, which will add significantly to the overall planning process. Furthermore, the use of Compulsory Purchase Order powers is referenced in both allocations indicating anticipated issues with landownership.

3.9 The Housing Supply and Trajectory Topic Paper for Pre-Submission Plan (February 2021) identifies delivery of homes from both strategic allocations from 2025/26, with 300 homes completed per annum from Paddock Wood/ East Capel and 150 from Tudeley Village (see Table 9, page 30). Given that Framework Masterplan SPDs are required before planning permission can be granted, it is already halfway through 2021 and significant infrastructure is required to 'unlock' the sites, delivery of homes from these allocations within the next four years is ambitious. Delivery of 300 homes in the first year from Paddock Wood/ East of Capel is very ambitious, as is 150 from Tudeley Village.

3.10 Whilst it is accepted that strategic allocations are required to meet longer term and large -scale housing needs, the emerging Local Plan ought to be realistic as to when and how many homes can be expected from these sites. Further, it should seek to identify a large number and range of small to medium sized allocations to provide for local housing needs and a consistent supply of new homes to account for the risk of delays from larger allocations. Placing such reliance on the delivery of homes from only two strategic sites is a high-risk strategy that could see the historically poor delivery of homes in the Borough continue and/ or worsen.

4.0 SITE ALLOCATION

4.1 Hermes House and the land to the rear ('the Site') provides an opportunity for an additional residential site allocation in Royal Tunbridge Wells within the emerging Local Plan. The Site has not previously been submitted to a Call for Sites and is not included in the Strategic Housing and Economic Land Availability Assessment (January 2021). The previous Call for Sites were held in 2016 and 2017 which was prior to Logistics UK considering relocating to a more appropriate site within Royal Tunbridge Wells.

4.2 For the reasons outlined above, Hermes House is not considered an appropriate employment location and has not been protected by the Council from changing use to residential, albeit this is not a feasible option given the inherent issues with the current buildings. Additionally, the land to the rear does not provide an active educational or recreational function and, if included with Hermes House, could provide a logical extension to the built -up area to create a high-quality residential development that delivers much-needed new homes in the short -term.

4.3 The Limits of Built Development boundary would require a minor adjustment to include that part of the land to the rear of Hermes House that currently falls outside. This area of land is surrounded on three sides by the current Limits of Built Development (i.e. it is inset) and the realignment of the boundary in this location would result a in logical 'squaring off' of the boundary with very limited visual impact.

4.4 Vehicular and pedestrian/ cycle access to the Site would continue to be taken from St John's Road from the existing or a relocated single access point.

4.5 It is envisaged that building heights will reflect the prevailing residential heights within the local area.

4.6 The homes would be provided as a range of private and affordable tenures and across a variety of dwelling types and sizes to cater for a wide range of households.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.0 EMERGING POLICY MAP/ POLICIES

Limits of Built Development

5.1 Current adopted policy (Core Policy 2) seeks to protect the Rural Fringe from development with this land only released through adoption of a development plan document (i.e. site allocations DPD). The emerging Local Plan does not seek to take forward the Rural Fringe designation which Logistics UK supports. However, part of the land to the rear of Hermes House would remain outside of the Limits of Built Development. This land is inset from the boundary of the Limits of Built Development and adjustment in this area would represent a logical 'squaring off' of the boundary. This would have very limited visual impact given the small scale of the adjustment but would optimise the delivery of new homes in a high-quality development to meet local needs for homes of different types, sizes and tenures.

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Employment

5.3 The emerging Local Plan (draft Policy ED 2) seeks to protect existing employment buildings/ sites regardless of their location and compatibility with neighbouring properties. It is our position that this is a failing of the emerging policy. Not all existing employment buildings/ sites will be appropriate for this level of protection (for example, Hermes House) and the policy should not assume this to be the case. Express wording is required to acknowledge this situation and allow for change of use away from employment -generating use where this is not appropriate owing to reasons of, inter alia, neighbourliness, residential amenity and compatibility of land use.

5.4 NPPF paragraph 81(d) requires planning policies to 'be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances'. As drafted Policy ED 2 provides a rigid policy framework in respect of existing employment sites/ buildings with blanket protection that takes no account of local circumstances and does not provide flexibility for businesses to adapt and evolve. This conflicts with NPPF paragraph 81.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To debate the issues with such heavy reliance upon housing delivery from just two sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Logistics UK
Question 2	
Agent's Name and Organisation (if applicable)	Barton Willmore LLP
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy ED 2 Retention of Existing Employment Sites and Buildings

[TWBC: this representation has been input against Section 5 - Royal Tunbridge Wells, Policies ED 2, STR/SS 1, STR/SS 3 and STR/RTW 1– see Comment Numbers PSLP_1855, PSLP_1864, PSLP_1865, PSLP_1866 and PSLP_1867. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWBC LOCAL PLAN REG. 19 REPRESENTATIONS

HERMES HOUSE, ST JOHN'S ROAD, ROYAL TUNBRIDGE WELLS

1.0 INTRODUCTION & OVERVIEW

1.1 These representations are made on behalf of Logistics UK in respect of their headquarters at Hermes House, St John's Road, Royal Tunbridge Wells TN4 9UZ and the land to the rear ('the Site': see Site Location Plan (drawing reference 2104/FS/001) enclosed at Appendix 1) and are submitted to the Regulation 19 consultation on the emerging Tunbridge Wells Borough Council ('TWBC') Local Plan (Pre -Submission Local Plan, undated).

1.2 The Site currently comprises offices in employment use (albeit currently only sparsely / rarely occupied) with associated car parking, accessed from St John's Road, and an area of grassland to the rear. The Site is not located within a conservation area and there are no known designated or

non-designated heritage assets on or in proximity. The Site falls within Flood Zone 1 and is not known to be subject to any ecological designations.

1.3 Logistics UK have occupied Hermes House since 1975. The older building on site is understood to have originally been constructed as church and used for religious purposes before being converted to offices. It has an unusual circular plan form that does not lend itself to modern office use and results in inefficient use of the space, both in terms of the area of unused space and the ability to lay out the useable space in a manner conducive to modern working practises. Moreover, Logistics UK run training and conferencing events from Hermes House which again does not lend itself to this purpose owing to the number of structural supports/ columns.

1.4 An extension was constructed in the late 1980s to provide two floors of office accommodation on a more regular plan form. Whilst at the time the extension functioned well it is now dated and requires significant upgrade works including replacement of all windows, a new heating system and air conditioning. There are also difficulties providing heating and cooling across the two elements of Hermes House as both differ significantly in their construction and design. This creates further inefficiencies.

1.5 A number of Logistics UK's staff travel to work by train. Hermes House is accessible by car but is some 1.8 km from the nearest train station (Tunbridge Wells) and is located outside of designated town centre/ employment areas. The Site is not in a sustainable employment location. Moreover, it is located in a predominantly residential area where adopted and emerging policy would resist new employment uses owing to the impact on residential amenity, issues of neighbourliness and incompatibility of land use.

1.6 As a result of the poor quality of the existing employment accommodation and its poor public transport accessibility and location within a residential area, Logistics UK has been planning to vacate Hermes House and relocate to a more appropriate premises and location within Tunbridge Wells. This process has been expedited owing to the pandemic and shift to a greater proportion of staff working from home thus requiring a smaller area of employment floorspace in any event.

1.7 Given the location of Hermes House in a residential area, residential has been identified as the most appropriate and compatible use moving forward. Moreover, TWBC has been unable to demonstrate a five-year supply of housing land for the most recent monitoring years and has a worsening Housing Delivery Test score despite having an Action Plan in place. The emerging Local Plan provides the opportunity to address the current and historically poor housing delivery in the Borough. However, the heavy reliance of the emerging Local Plan on two large strategic sites to meet almost 75% of its housing need over the Plan period is a high-risk strategy. Moreover, delivery of new homes on these strategic sites is not anticipated for four years (in our view at the earliest). The Council should, therefore, seek to allocate additional small/ medium scale sites for residential development to address historically unmet need, provide fluidity in five -year housing land supply and ensure short -term delivery of homes to mitigate the risk of delays from the strategic sites.

1.8 There are Borough-wide benefits of including additional site allocations that are deliverable in the first five years of the Plan. There are also local benefits to Royal Tunbridge Wells which has relatively few proposed site allocations that are expected to yield new homes in the initial five year period. A steady supply of new homes is required in key settlements to provide choice and variety in the market and to mitigate against increasing issues of affordability. The Council should consider additional residential allocations in Royal Tunbridge Wells that are deliverable in the short-term to maintain a steady supply of new homes in this principal settlement.

1.9 In addition to the above, allocation of a previously developed site in an established urban area such as Hermes House reduces the pressure on greenfield development and reduces the need for Green Belt release. NPPF paragraph 137(a) requires LPAs 'to make as much use as possible of brownfield and underutilised land' before concluding that exceptional circumstances exist to justify release of land from the Green Belt for development. Hermes House is a brownfield, underutilised site and whilst this Site alone would not remove the need for some Green Belt release to meet TWBC's housing needs, it ought to be considered as an option for allocation before Green Belt sites in the sequential approach to identifying land to meet residential development needs through the emerging Local Plan.

1.10 Redevelopment of Hermes House alone would yield relatively few dwellings. As such Logistics UK has also reviewed the potential of the land immediately to the rear. The land to the rear is currently in educational use but does not serve a specific educational or recreational function, nor has it been

identified as a suitable location for future educational development being distant from the main school campus. In short, this area of land forms part of the school grounds but is incidental to the educational/ recreational function of the school.

1.11 The Site has an area of approximately 0.65 hectares. A capacity study (enclosed at Appendix 2: drawings reference 2104/FS/010) indicates that circa 48 homes could be accommodated at a density of 74 dwellings per hectare. Combining Hermes House with the land to the rear allows the number of new homes to be optimised and also for a more varied mix of homes of different sizes suitable for a range of households (including apartments and houses) in addition to a greater number of affordable homes.

1.12 The Hermes House part of the Site currently falls within the Limits of Built Development as per the Policies Map (2016). The Council has imposed Article 4 Directions on a number of existing employment buildings to prevent them from changing from office to residential under current Permitted Development regulations. These 'protected' employment buildings are largely those falling within accessible town centre and/ or established/ designated employment locations. Hermes House falls within a solely residential area and has not been 'protected' through an Article 4 Direction. Subject to meeting the requisite criteria, Hermes House could therefore be converted to residential. However, as set out above, the, inter alia, awkward plan form, inherent issues with heating and cooling and poor standard of the building would make for poor/ substandard homes which prevents this from being an option.

1.13 The southern part of the land to the rear also falls within the Limits of Built Development with approximately 0.15 hectares falling outside and within the area currently designated as Rural Fringe.

1.14 Logistics UK consider the Site to be ideally placed to deliver a range of high -quality new homes in an established residential area, with only a minor adjustment to the existing boundary of the Limits of Built Development required to facilitate this. It is Logistics UK's position that the Site should be included within the emerging Local Plan as a residential site allocation to deliver circa 50 new homes. The Site is deliverable in the short -term and will assist in diversifying the type and scale of site allocations thus reducing reliance on large -scale strategic allocations that require significant new infrastructure and risk delay, with the consequential impact on housing land supply and delivery.

1.15 The Site is deliverable in the short -term as per the NPPF definition (Annex 2):

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within 5 years'

1.16 The Site comprises previously developed land (Hermes House) with very little landscaping and mown/ managed grass on the land to the rear. There is very limited ecological potential with no trees/ hedges that would pose a constraint to development as proposed. There are also no national designations that would impede the development such as Green Belt, flood risk or heritage. Access is established from St John's Road.

2.0 CURRENT USE

Employment

2.1 Hermes House was converted from its previous religious use to offices prior to Logistics UK's occupation. The older building has an unusual circular plan form and includes an amphitheatre - style space. This space has historically served a function for seminars/ conferences but the structural supports/ columns are not ideal for this purpose and the resulting office floorspace is awkward and inefficient and cannot be considered to provide modern, functional or flexible office accommodation.

2.2 In an attempt to improve the quality of the employment accommodation on site Logistics UK constructed an extension in the late 1980s (LPA reference 84/01473/FUL) facilitated by the demolition of a residential property. Whilst providing a more regular plan form, this extension is now over 25 years old and requires significant upgrade works to allow it to continue to function as office floorspace. For example, the large areas of glazing make the space too hot in summer but too cold in winter. The extension does not benefit from air conditioning and the heating system is inadequate. Both are required along with new windows. However, there are inherent difficulties providing heating and cooling systems to serve the older part of the building and the extension. This further adds to the inefficiency of the current buildings.

2.3 In addition to the above, Hermes House is located in a predominantly residential area outside of a designated town centre and employment location. It is accessible by car but some 1.8km from Tunbridge Wells train station. Several members of staff travel to work at Hermes House by train, a proportion that Logistics UK consider would be higher if the offices were located in a more convenient location in proximity to the train station.

2.4 There is also the issue of compatibility of land use. Hermes House is surrounded on three sides by residential properties, being located on a residential road in a predominantly residential neighbourhood. Logistics UK runs software that requires a constant (24/7) power supply and generators. Care is taken to minimise noise from the generators but they are not ideal in a residential area. Moreover, the heating and cooling systems required to address the inherent issues with the current buildings and allow the employment use to continue will further add to the noise emitted. These issues, coupled with vehicle movements, staff outside use (including from the smoking shelter) and the types and scale of signage required, are present with the existing employment use and any likely future employment use.

2.5 It is on the basis of the above that Logistics UK consider that Hermes House should be returned to its former residential use as this would be more compatible with the established residential use and character within the area. Moreover, in line with adopted Core Strategy (2010) Core Policy 7, employment uses, particularly of the scale of Hermes House, are more appropriately sited in sustainable and accessible town centre and employment locations.

Education

2.6 Approximately 60% of the land to the rear of Hermes House is located outside of the Limits of Built Development and within the Rural Fringe, with the southern portion (circa 40%) within the Limits of Built Development. It is all within educational use forming part of the grounds of a neighbouring school.

2.7 This land has been included within the Site as it forms a logical extension to the Hermes House site and allows for an improved residential layout that facilitates the delivery of a higher number of homes that includes a greater variety of homes of different sizes (including apartments and houses) and a higher number of affordable homes.

2.8 Whilst this land is within educational use, it does not have a defined educational or recreational function. It is laid to grass and forms an incidental part of the wider school grounds. When the school has previously expanded this land has been reviewed as an option but discounted owing to its location remote from the main core of the school. It is also not easily accessible from the public highway (although it would be accessible from St John's Road through Hermes House if the sites were to be combined as proposed). In short, this land does not form a specific educational or recreational function and it is Logistics UK's position that it would be an appropriate location for small-scale residential development.

3.0 CASE FOR RESIDENTIAL

Historic Supply/ Delivery of New Homes

3.1 TWBC has a published shortfall in five-year housing land supply (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) and at 1 April 2020 could only demonstrate 4.83 years supply (see Five-Year Housing Land Supply 2019/20). This was based on a 5% buffer. However, given that TWBC's previous Five -Year Housing Land Supply 2018/19 report also identified a shortfall (4.69%: see paragraph 12), NPPF paragraph 73 would previously have indicated that a 20% buffer is appropriate. This has subsequently been superseded by the Housing Delivery Test whereby the 20% buffer is to be applied to LPAs with a Housing Delivery Test score of 85% or below.

3.2 TWBC has a published score of 86% in the Housing Delivery Test for the period 2016/17 to 2018/19 (Monitoring information (tunbridgewells.gov.uk) [accessed 01/06/2021]) (published February 2020). Whilst 1% higher than the threshold for the 20% buffer, TWBC has failed to meet or exceed its housing requirement for two of the three monitoring years that have informed the Housing Delivery Test result. The one year it did exceed it was when the housing requirement was notably lower owing to the method of calculation (pre -Standard Method). Moreover, the 2021 Housing Delivery Test results see TWBC's score reduce to 85% (Housing Delivery Test: 2020 measurement - GOV.UK (www.gov.uk) [accessed 01/06/2021]) thus housing delivery is worsening in the borough and the 20% buffer (NPPF paragraph 73) should be applied to the calculation of five-year housing land supply. This places even greater pressure on TWBC to identify additional land for residential development.

Proposed Supply of New Homes

3.3 The emerging Local Plan utilises the Standard Method figure of 678 homes per annum (Pre - Submission Local Plan paragraph 4.10) from which to establish the number of homes to plan for. The Planning Practice Guidance ('PPG') is clear that the Standard Method provides a 'minimum annual housing need figure' (PPG paragraph: 002 Reference ID: 2a -002-20190220) and a not a housing requirement figure. Whilst there is acknowledgement within the emerging Local Plan that exceptional circumstances do not exist to deviate from the Standard Method (paragraph 4.9 and 4.11) i.e. to provide for a lower number of homes, and that TWBC may need to consider taking unmet need from neighbouring authorities (see paragraph 4.13), there does not appear to have been an attempt to identify whether it would be appropriate to actively plan for a higher housing requirement.

3.4 The emerging Local Plan has been developed on the basis that site allocations to deliver some 6,900 additional homes will be required (paragraph 4.17) (albeit the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) states that the Council must plan for a minimum of 7,221 homes through site allocations (paragraph 5.4). We have not interrogated the assessment that underpinned this conclusion (nor the discrepancy between the Topic Paper and Pre-Submission Local Plan). However, the emerging Local Plan is clear that this is based on the assumption that 'all previous allocations are still suitable and developable' (paragraph 4.17). In reality this may not be the case and the emerging Local Plan should actively seek to progress additional site allocations. Moreover, pursuant to the PPG, the Standard Method should be treated as a minimum figure. Thus, whilst the emerging Local Plan identifies site allocations capable of delivering between 8,076 and 8,461 homes over the Plan period (see Table 4), this may not be enough to provide for the housing required.

3.5 The historically poor housing delivery (as evidenced by the Housing Delivery Test) in the Borough and failure to maintain a five-year housing land supply should also be factors that weigh in favour of the identification of additional housing allocations to come forward in this Local Plan.

3.6 It is also noted that, whilst Royal Tunbridge Wells has 18 draft residential site allocations within the Pre-Submission Local Plan (see Section 5), the Housing Supply and Trajectory Topic Paper for Pre-Submission Local Plan (February 2021) identifies very few homes being delivered within the current five-year period (see Table 9, pages 29/30). This risks an undersupply of new homes in Royal Tunbridge Wells which will serve to drive up already high house prices. There would be merit in identifying additional site allocations, such as Hermes House, that are deliverable in the short term and can assist in providing consistent delivery of new homes in the Borough's principal settlement over the Plan period.

Strategic Allocations

3.7 The reliance of the emerging Local Plan on large-scale, strategic allocations is also of concern. Approximately 6,300 homes are identified as coming forward from two strategic allocations: approximately 3,500 homes at Paddock Wood/ East Capel (draft Policy STR/SS 1); and approximately 2,800 homes from a new settlement – Tudeley Village (draft Policy STR/SS 3). This represents almost 75% of all new homes planned for through the emerging Local Plan (taking the upper range provided at Table 4; 78% if taking the lower range). There is, therefore, significant reliance on the delivery of new homes from these two strategic sites.

3.8 It is common for it to take some time to see homes delivered on large -scale, strategic sites owing to, inter alia, the complexity of the planning process, landownership and often significant new infrastructure requirements. In the case of the proposed allocations at Paddock Wood and Tudeley Village this includes new schools, neighbourhood centres, employment and sports, health and community facilities. Moreover, Framework Masterplan SPDs are requirements of the draft policies, to be adopted in advance of planning permission being granted, which will add significantly to the overall planning process. Furthermore, the use of Compulsory Purchase Order powers is referenced in both allocations indicating anticipated issues with landownership.

3.9 The Housing Supply and Trajectory Topic Paper for Pre-Submission Plan (February 2021) identifies delivery of homes from both strategic allocations from 2025/26, with 300 homes completed per annum from Paddock Wood/ East Capel and 150 from Tudeley Village (see Table 9, page 30). Given that Framework Masterplan SPDs are required before planning permission can be granted, it is already halfway through 2021 and significant infrastructure is required to 'unlock' the sites, delivery of homes from these allocations within the next four years is ambitious. Delivery of 300 homes in the first year from Paddock Wood/ East of Capel is very ambitious, as is 150 from Tudeley Village.

3.10 Whilst it is accepted that strategic allocations are required to meet longer term and large -scale housing needs, the emerging Local Plan ought to be realistic as to when and how many homes can be expected from these sites. Further, it should seek to identify a large number and range of small to medium sized allocations to provide for local housing needs and a consistent supply of new homes to account for the risk of delays from larger allocations. Placing such reliance on the delivery of homes from only two strategic sites is a high-risk strategy that could see the historically poor delivery of homes in the Borough continue and/ or worsen.

4.0 SITE ALLOCATION

4.1 Hermes House and the land to the rear ('the Site') provides an opportunity for an additional residential site allocation in Royal Tunbridge Wells within the emerging Local Plan. The Site has not previously been submitted to a Call for Sites and is not included in the Strategic Housing and Economic Land Availability Assessment (January 2021). The previous Call for Sites were held in 2016 and 2017 which was prior to Logistics UK considering relocating to a more appropriate site within Royal Tunbridge Wells.

4.2 For the reasons outlined above, Hermes House is not considered an appropriate employment location and has not been protected by the Council from changing use to residential, albeit this is not a feasible option given the inherent issues with the current buildings. Additionally, the land to the rear does not provide an active educational or recreational function and, if included with Hermes House, could provide a logical extension to the built -up area to create a high-quality residential development that delivers much-needed new homes in the short -term.

4.3 The Limits of Built Development boundary would require a minor adjustment to include that part of the land to the rear of Hermes House that currently falls outside. This area of land is surrounded on three sides by the current Limits of Built Development (i.e. it is inset) and the realignment of the boundary in this location would result a in logical 'squaring off' of the boundary with very limited visual impact.

4.4 Vehicular and pedestrian/ cycle access to the Site would continue to be taken from St John's Road from the existing or a relocated single access point.

4.5 It is envisaged that building heights will reflect the prevailing residential heights within the local area.

4.6 The homes would be provided as a range of private and affordable tenures and across a variety of dwelling types and sizes to cater for a wide range of households.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.0 EMERGING POLICY MAP/ POLICIES

Limits of Built Development

5.1 Current adopted policy (Core Policy 2) seeks to protect the Rural Fringe from development with this land only released through adoption of a development plan document (i.e. site allocations DPD). The emerging Local Plan does not seek to take forward the Rural Fringe designation which Logistics UK supports. However, part of the land to the rear of Hermes House would remain outside of the Limits of Built Development. This land is inset from the boundary of the Limits of Built Development and adjustment in this area would represent a logical 'squaring off' of the boundary. This would have very limited visual impact given the small scale of the adjustment but would optimise the delivery of new homes in a high-quality development to meet local needs for homes of different types, sizes and tenures.

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Employment

5.3 The emerging Local Plan (draft Policy ED 2) seeks to protect existing employment buildings/ sites regardless of their location and compatibility with neighbouring properties. It is our position that this is a failing of the emerging policy. Not all existing employment buildings/ sites will be appropriate for this level of protection (for example, Hermes House) and the policy should not assume this to be the case. Express wording is required to acknowledge this situation and allow for change of use away from employment -generating use where this is not appropriate owing to reasons of, inter alia, neighbourliness, residential amenity and compatibility of land use.

5.4 NPPF paragraph 81(d) requires planning policies to 'be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances '. As drafted Policy ED 2 provides a rigid policy framework in respect of existing employment sites/ buildings with blanket protection that takes no account of local circumstances and does not provide flexibility for businesses to adapt and evolve. This conflicts with NPPF paragraph 81.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4.7 The suggested provisions of a site allocation for this Site are as follows:

Land at St John's Road (Hermes House)

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately 50 dwellings, of which 30 percent shall be affordable housing.

Development on the site shall accord with the following requirements:

- 1 Vehicular access, delivery and servicing should be provided from St John's Road.**
- 2 Provide a landscaped boundary to the new Limits of Build Development.**
- 3 The design shall include appropriate measures to address the impact of the proposal on the gardens of neighbouring residential properties on St John's Road.**
- 4 Provision of on-site amenity greenspace/ high-quality landscaping.**

5.2 We suggest that the Limits of Built Development boundary should be adjusted to reflect the western extent of the Site boundary as shown on the Site Location Plan (drawing reference 2104/FS/001).

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To debate the required changes to Policy ED 2 to make it consistent with national policy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have no doubt the plan is strictly speaking – legal. But it's not sound from a moral or sense point of view because:

- 1 Overcrowding in the area – the locality is already overcrowded. There have been large and new substantial developments recently at nearby Hawkenbury and Benhall Mill Road. This is already placing a strain on the local infrastructure, including the roads.
- 2 Vehicle access to the new development will be via Bayham Road – which is served by Forest Road. Forest Road is already far too busy – and with a 40 mph speed limit. More traffic will put even more strain on the road. Incidentally, the 40 mph speed limit needs to be reviewed – this is out of touch with other speed limits in this residential area.
- 3 The pedestrian access via the crematorium is just not on – this needs to be a peaceful, reflective environment for families attending funerals etc – not a rat run for new housing.
- 4 More generally, the new development – and the continual movement in and out of it by people and vehicles - will defeat the need for a quiet and reflective environment at the adjoining crematorium. This must be preserved for families and friends to show their last respects to their loved ones. The development will also butt onto the cemetery and headstones – this is important for families who've lost loved ones – and who will want to visit and reflect at their graves regularly. This isn't the way to treat our deceased relatives and their friends and families.
- 5 It is difficult to see how vehicle access could be achieved as shown on the plan without taking away some of the land from the crematorium – and some of the memorials that are currently there – this isn't acceptable.
- 6 I note the development is contingent on finding alternative sports facilities – such alternative though must not lead to over-use/overcrowding at any new facility – for example, by simply cramming the Bayham Sports users at another, already well used, facility. This is likely if a new site isn't found.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

NONE!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

General Comment

I am a resident of Capel, living in Five Oak Green between the two strategic sites proposed for this rural parish. I live here because of the beautiful countryside, the historic landscape, a closeness with nature and wildlife, and being part of a small close-knit community. All of that, and more, will disappear if TWBC get their way with their lop-sided plans for the area.

My background is in law enforcement. I worked for the Home Office in the UK and abroad for many years, before retiring from the National Crime Agency in May 2019, the month Capel learnt of the shocking proposals in the Local Plan. I have been involved with the Save Capel campaign since then, and as Chair from December 2019 to February 2021. I take an active role in the Biodiversity Team and have made a comment below.

However, with my past in law enforcement, I am concerned by some aspects of TWBC Planning Services' activity during the planning process. Rather than a review of evidence leading to a conclusion, evidence appears constructed or omitted to support a pre-determined conclusion. I have noticed inconsistency, a lack of evidential disclosure and a disregard of public opinion, and therefore intend to focus on my concerns relating to process.

But, to be clear, I object strongly to the Local Plans for Tudeley and East Capel which are unbalanced, ill-considered, deeply unpopular, unsustainable and, I believe, unsound. My reasons follow below.

National Policy

The sites at Capel and Paddock Wood have been pursued by TWBC Planning Services as their desired strategic options for the Local Plan since at least early 2019, however unsustainable or unpopular those options transpire to be. The effort to justify that pursuit might help to explain the volume of inconsistent decisions, misleading statements, a lack of key assessments, and a disregard of public opinion and the intentions of the NPPF. This is not a complete list:

- . Despite often quoted in the Local Plan, the NPPF has been turned on its head to suit the pre-conceived solution to the Borough's housing needs through development of the green belt at Capel.
- . The NPPF states brownfield sites should be developed first and greenfield as a last resort, but the Local Plan's primary focus is greenfield. The AONB and its setting are key, but Tudeley borders the AONB and is intrinsic to the setting between high and low weald.
- . The green belt should be preserved; but the plan undermines it, creating an urban sprawl from the edge of Tonbridge, merging Tudeley and Five Oak Green with Paddock Wood.

- . Flood zones should be avoided, but the site at Tudeley lies adjacent to and within a flood zone, and the site at East Capel is primarily within a flood zone. Flooding is already a problem in the area, as has been seen throughout the Local Plan process, with serious floods in 2019 and 2020, and run-off can only exacerbate the problem for residents and neighbours downstream.
- . The town of Tunbridge Wells itself is economically stricken; streets are strikingly full of closed shops and empty offices and, with the move to home working and internet shopping, that situation can only get worse. However, rather than take the opportunity to focus on a post-pandemic world and urban regeneration, the Local Plan continues with a backward-looking focus on greenfield development and environmental damage.

Inconsistency

To reach their desired conclusion, the Council has led itself into a maze of contradiction. Reasons for rejecting one site often pertain to another site that is selected, and sites that are selected appear more unsuitable than others that have been rejected. At best, this is a lack of communication between officers, at worst evidential manipulation:

- . Many smaller sites have been rejected as impinging on the Green Belt, even within Capel, but the two sites that will erase the Green Belt in the area have been accepted. Equally, sites in the AONB have been accepted, but not that at Castle Hill (submitted as an alternative to Tudeley and supported by Save Capel) despite its obvious sustainability advantages. Significant flood risk has also been put aside for the strategic sites, whilst sites not prone to flooding have been rejected (Castle Hill as one example). To the lay person this looks like double standards.
- . Despite TWBC's oft-repeated claim that removal of Green Belt is justified as the Borough is restricted by designated land, **over 25% of the Borough is undesignated**. Very little development is taking place in this area. The 'very special circumstances' for Green Belt removal appear to be simply 'that's where we want to build.'
- . A primary purpose of the Green Belt is to prevent urban merger, which is precisely what will occur if the proposals across Capel proceed. The David Lock Associates (DLA) report admits there will be 'perceived' coalescence with the expansion of Paddock Wood at East Capel and Five Oak Green (FOG) / Whetsted in Capel. STR/SS3 states the Tudeley site is close to Five Oak Green '...but physically separate...' **That separation is one field to the south, which will be carved open by the proposed FOG by-pass**. An urban sprawl will be created from Paddock Wood through FOG and Tudeley to the doorstep of Tonbridge, effectively removing the Green Belt.
- . Maps of the Capel sites are focused on the proposed boundaries and do not reflect the situation that exists on the ground, disguising the merger the developments will cause, and the extent of green belt loss. To the west, FOG will be separated from the new town at Tudeley by a single field south of the B2170, which is bordered to by Church Lane and Hadlow Estate building works at Tatlingbury Farm; a further site for a small development also has planning permission in the eastern side of the field at Sychem Place. There are two smaller fields separating Capel Primary School from the village, bordered by the B2170 and railway. To the east, buildings which constitute the village adjoin the A228, which will be the only barrier between FOG and the expanded Paddock Wood; the situation is similar with Whetsted. The stand-off between FOG and the strategic sites is minimal and I believe the Local Plan mapping camouflages the true extent of the merger across Capel. A visual visit will confirm the reality, but I have attached a map which I believe shows a truer picture of the merger effect.

Alternative Sites

The failure to be objective is amply demonstrated by TWBC's lack of pro-active research in undesignated areas and failure to properly consider alternative sites:

- . A decommissioned prison (Blantyre House) in the undesignated areas was rejected as too small and, as a late submission, was not be properly appraised. However, minimal research shows land around the prison is also owned by HMG, with a capacity of 2,500+ dwellings and the advantage of being close to a railway station, unlike the site at Tudeley.

- Two further sites might have combined with this land (SHELAA 9 & 325), and brought the potential for housing to 3,800 dwellings. However, both sites were rejected as ‘...remote from the settlement centre...’, which might equally be applied to Tudeley. Incredibly, Site325 was also rejected as ‘...a strategic site of a scale harmful to the AONB landscape.’ However, the AONB lies at a distance of 1.15miles to S325, whilst Tudeley lies directly alongside the AONB and the impact on its setting and the historic landscape is inescapable.
- An alternative site to Tudeley was supported by Save Capel at Castle Hill, which remains within Capel’s Green Belt, but also in the AONB. It was rejected primarily for that reason, despite being adjacent to a significant commercial development which was backed by the same planning officers, which is also in the AONB. **Other comments are given in more detail in my response to STR/SS3.**
- The Procedure Guide for Local Plan Examinations (Local Plans: the examination process - GOV.UK (www.gov.uk)) states in 1.11: ‘Plans which allocate sites for development will need to be supported by evidence demonstrating that the LPA has followed a logical and consistent method to identify and select the allocated sites, and to reject alternatives.’ I would suggest that the evidence shows that the Local Plan is riddled with illogical and inconsistent methodology designed to justify the strategic sites in Capel, however unsustainable they may be, and is therefore unsound.

Duty to Co-operate & Misinformation

Misleading and inaccurate statements have been a feature of the Council’s dealings with the community in Capel, including claims of long-standing cooperation with neighbouring boroughs:

- In claiming that TWBC have complied with the **Duty to Cooperate**, at the Planning Advisory meeting on 05/08/2019, Head of Planning told Councillors that officers had consulted with other boroughs throughout. However, on 24/07/2019, 12 days before the meeting and 3 months after the Tudeley proposals became public, Tonbridge & Malling Borough Council’s Planning Officer advised; “On TWBC – we have had Duty to Cooperate meetings with colleagues there, but these were before they proposed the sites in their reg 18 plan – the principle of new settlements was mentioned but there were no sites identified at that time.” The suggestion that neighbouring boroughs were aware of the proposals for Tudeley, and East Capel, ‘throughout’ was misleading, if not disingenuous.
- At an initial meeting with the community the Head of Planning Services indicated that the ease of dealing with a single landowner was a primary factor in the Council’s decision to settle on the site at Tudeley. This was subsequently denied, but I understand exactly the same condition was attached to the Castle Hill proposals. This has irked residents who feel that officers are paid to take the right decisions, not the easy ones.
- At a TWBC Planning Advisory meeting on 05/08/2019, the Environment Officer claimed agricultural land in Tudeley and East Capel was ‘poor quality’. However, TWBC’s own assessment in a Development Constraints Study, shows the land as Grades 2 and 3; defined by Natural England as ‘Very Good’ and ‘Good to Moderate’. Grade 4 is ‘poor’ and none exists in the sites.
- Nonetheless, in an email of 15/10/2019, Head of Planning insisted again that land quality was ‘poor’, a misrepresentation potentially explained in the same response: ‘Particular attention will be given to: i) The grade of agricultural land and agricultural activities to minimise the effects on the rural economy and agricultural functionality...If the land is ‘poor’ the loss would have little negative agricultural impact; loss of productive land is hard to justify – and remains so (Policy EN20).

Disclosure and omission

Many important aspects of the strategic sites in the PSLP are either based on assumption or left to the planning application stage when they will not be subject to independent scrutiny. The importance of these omissions gives cause for concern that assessments and process are being selected to avoid negative outcomes for the chosen sites:

- The claim there will be ‘...an opportunity for betterment to the flooding and drainage issues which are present for residents of parts of Paddock Wood, and ecological and landscape enhancements as part of the exceptional circumstances case for the release of this Green Belt land...’ (PSLP

5.183) suggests such enhancements are not decided, in which case the exceptional circumstances the Inspector needs to consider are yet to be described.

- . TWBC commissioned David Lock Associates (DLA) to assess deliverability of the East Capel and PW proposals, but the work appears unfinished as ‘...*further detail on phasing and mix of dwellings is required...*’. Nonetheless, TWBC concluded that ‘...*viability of the growth here is justified.*’ (PSLP 5.177) Without such important work, viability seems a leap of faith.
- . No Cumulative Impact Assessment on the effects of the developments across Capel, including the KCC gravel extraction, has been done and there is no indication one will be commissioned. This is a key consideration given the clear impact that the combined works will have on biodiversity in the parish, and which is likely to show that biodiversity will be squeezed. It is perhaps not surprising therefore that such an assessment has not been readied for the Regulation 19 inspection.
- . No Environmental Impact Assessment has been completed for either strategic site, despite their key importance to the Local Plan. TWBC advise these will be left to planning application stage – so avoiding the results forming part of the independent examination. Moreover, a strategic EIA for both developments upon the parish would ensure a rounded consideration of facts, but this does not appear to be something TWBC wish to pursue.
- . The so-called Five Oak Green by-pass that will connect the new town at Tudeley to a (currently unfunded?) Colt’s Hill by-pass for the A228 starting at East Capel, appears to be another incomplete proposal with the plan omitting trees, unlike the other Colts Hill plans in Other Reports Template (tunbridgewells.gov.uk).
- . It would appear to make more sense to route the Five Oak Green by-pass north of the village from the new town at Tudeley to the A228 and East Capel. This would pass through land belonging to the same landowner and service the proposed gravel extractions. Instead, there will need to be two roads, north and south, which would incur additional and unnecessary loss of green belt. The reasoning is not clear, but could be because the southern route would cosmetically plan for traffic towards Tunbridge Wells, when the reality is most would head to Tonbridge or Paddock Wood. (This might explain the curious proposal to seal off of the road into Paddock Wood from the Hop Farm roundabout). It might also help reduce costs to the developer, as the proposals look increasingly unviable financially if the northern part of the Tudeley site is ever to see construction.
- . The plan for the Five Oak Green by-pass may also be deliberate opaque so as to avoid examination at Regulation 19; as the Council wrote to one of the landowners: ‘... *if the plan is found sound by an Inspector... it is unlikely a planning application for the Five Oak Green bypass will be submitted until after this time.*’ I would question the legitimacy of leaving so much that is fundamental to the Local Plan to a later date, rather than producing hard evidence for scrutiny.
- . The most important omission is the failure to include the Hadlow Estate (HE) Masterplan and Delivery Strategy in the TWBC bundle for the Regulation 19 inspection. **This is a significant failure in the disclosure of vital evidence.**
- . Furthermore, in a response to a query on this matter, the Strategic Sites & Delivery Team Leader wrote ‘...*given the document is on the Hadlow Estate’s website, in the public domain, it was not considered necessary to include it on the TWBC website at this time.*’ This reasoning suggests the documentation not only could have been included but may be later, presumably at a time more convenient to the Council’s aims. Like other documents that might reflect negatively on the proposals, the presumption is this will be at the planning application stage when the Council can perform its own scrutiny of the documentation, with predictable results. This is a further example of what appears to be a manipulation of process to ensure an outcome, and renders the Local Plan unsound.

Public Opinion

Whilst TWBC talk about public engagement in the Local Plan process, it has been almost entirely negative and routinely ignored:

- . In TWBC’s 2017 Issues and Options document the public voted overwhelmingly to support an A21 ‘growth corridor’ to meet housing need. This was subsequently put aside in favour of Tudeley and East Capel.
- . In autumn 2019 at Regulation 18, in an ‘unprecedented’ wave of negative engagement, 95% of 1,000 responses objected to the strategic sites at Tudeley and East Capel. The response was

ignored and, instead, Capel was handed a further 700 dwellings - in what looks suspiciously like punishment.

- . In August 2020, Capel Parish Council organised a questionnaire on the future of the Parish as a pre-cursor to work formulating a Neighbourhood Plan. Again, in an open question, 95% of respondents voiced their disapproval of the Council's proposals for Capel in the Local Plan.
- . In December 2020, Save Capel members voted by 95% to support an option at Castle Hill as an alternative to Tudeley, which would match the A21 'growth corridor', alongside the Kingstanding commercial area. This has also been rejected without full consideration.
- . In May 2021 a candidate for the role of Capel Borough Councillor, who stood on a ticket to rework the Local Plan, swept aside the incumbent Councillor with a vote of 75% of an increased turnout.
- . The Council have attempted to counter the arguments of the community through misinformation or obfuscation, rather than answering honestly or accommodating public sentiment. For example, the evening before the Full Cabinet met on 03/02/2021 to decide the fate of the Local Plan, the Head of Planning Services lobbied all councillors with a document negating many of the arguments the community had made, irrespective of merit or fact. Documents were only made available to Councillors a few hours before the meeting, which was insufficient time to make informed decisions, and many Councillors voted on what they were being told, rather than making decisions based on their own judgement.
- . The Council's disdain of public opinion was summed up by the Head of Planning Services at a Cabinet Meeting on 21/01/2021; when asked to comment on the weight of resistance to the Capel proposals stated that *"It's not a numbers game,"* adding that just because lots of people do not want something does not mean it will be stopped. In essence, the community's voice is irrelevant where it does conform to Council plans. Consultation is therefore a meaningless tick-box exercise for TW Planning Services within the Local Plan process.
- . This disregard continues. After the election in May 2021 of a Borough Councillor in Capel, who stood on a ticket supporting the community's views on the Local Plan, a Council spokesperson commented; *"The responses to the consultation came in the most part from residents of areas where development is proposed."* It begs the question why the Council bothered with a consultation if the community most affected can be dismissed so readily?

Community

Capel is a rural ward and the local community of around 2000 souls is close-knit and, to coin a phrase used by the Borough Council, 'we love where we live.' To see our countryside and community destroyed is heart-breaking, especially when we can see that the proposals are unsustainable and unsound, and quite viable alternatives are overlooked or not properly considered:

- . Capel currently consists of around 940 homes. The addition of over 4800 homes, will swamp the small but strong rural community that exists. It is very clear that the community, and those in neighbouring boroughs to be adversely affected by the proposals, are strongly against the Tunbridge Wells Local Plan as it currently stands. There is an acceptance that some level of housing is needed, but the lop-sided nature of the proposals – Capel has just 2% of the Borough's population but will bear 45% of its housing need - is far more than required in the area and Planning Services conceded many new residents will come from London and even further afield (new property in Paddock Wood is being advertised in China).
- . The community's health and well-being will be sacrificed, and the ongoing proposals are already taking their toll, as decades of construction will blight the lives of those who live here. Air, noise and other forms of pollution are inevitable, and will have an adverse effect on people's health and mental well-being. The environmental damage will be huge, our ancient and precious landscape scarred forever, irreplaceable habitat lost and, ultimately, the community drowned in a tsunami of new residents.
- . The detrimental effect on the community of over 15 years of construction across the area has not been addressed; perhaps because it cannot be if the strategic sites are to be developed. Residents are already complaining about dust and noise from the ongoing developments at Paddock Wood, which can only get worse. Countryside and open spaces are recognised to

- improve well-being, but these developments not only remove those wider green and open spaces, but air quality will suffer, noise levels will be incessant and Capel's dark skies will be lost.
- Tunbridge Wells has a policy to reduce air pollution (EN21), but the proposed developments pose a significant threat to the environment, including an increase pollution at a time of climate change. The Council are also has declared a climate emergency, but the developments can only aggravate the problem.
- TWBC aims to be carbon neutral by 2030; 6 years before the end of the Tudeley construction period. The loss of 600 acres of fields and hedgerows to large-scale development can only work against this aim, notwithstanding the Local Plan's strategic objective 10, which I note has been watered down from an earlier iteration of the Local Plan from '*to tackle climate change...*' to '*...support the goal to make the borough carbon neutral by 2030...*'. The objective continues with the promise to '*.... minimise the impact of climate change on communities, the economy, and the environment...*'. This is a fanciful statement when such large-scale construction will destroy carbon absorbing countryside, encourage greater use of cars, erase wildlife habitat and decimate the local community.
- The rejected alternative site at Castle Hill would not have so dramatic effect, being a sparsely populated area, and more sustainable being alongside a major transport artery, close to the town of Tunbridge Wells and the new employment opportunities at the Kingstanding commercial site. Moreover, combined with a focus on urban regeneration and not loss of greenfield and agricultural land, the environmental and human costs would be limited. Unfortunately, the opportunity to forge a local plan for the future that can be supported and welcomed by the public has been rejected by the Council in a preference for environmentally destructive and harmful, and deeply unpopular, proposals.
- The local population has fiercely raised its objections on several occasions but is routinely dismissed by the Council, which has also ignored the objections raised by the neighbouring authorities in Tonbridge and Malling, and Yalding in Maidstone Borough, which fear increased traffic congestion, pollution and flooding, and associated infrastructure and mitigation costs, caused by the developments. This deaf ear to public opinion cannot be considered as participation by the community as envisaged in the planning process, and renders the Local Plan unsound.
- Ultimately, TWBC's planning strategy appears to be centred on finding ways to justify the unjustifiable, with inconvenient truths placed aside to avoid examination at the Regulation 19. Rather than a positive and objective exercise on the merits of the Capel proposals, the Local Plan is a negative and subjective exercise to justify a pre-conceived conclusion. The Local Plan is peppered with inconsistency and a lack of disclosure or delay in important work, and is therefore unsound.
- The inevitable question is why a Local Planning Authority would resort to manipulation, misinformation, delay and bias if their Local Plan is 'sound'? That in itself must sow doubt on the Local Plan's soundness, and I therefore ask the Regulation 19 inspection not only looks at what is being put forward, but also what is missing.

Biodiversity

NPPF para 177 states: *The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.* However:

- There has been no **Cumulative Impact Assessment** of the effect of development across Capel, compounded by KCC gravel excavations between the two sites, and the extensive road infrastructure required to service both developments and gravel extraction. The combination of these proposed works will transform Capel from a rural ward to an urban sprawl from Tonbridge to Paddock Wood, and from the Medway to the AONB. The cumulative impact on wildlife (as well as food production, landscape, heritage assets, the local community and flooding), is likely to be far greater than each aspect of TWBC's and KCC's plans taken in isolation, yet the isolationist approach is what the authorities and developers insist on taking. It is vital a Cumulative Impact Assessment is made; however inconvenient the findings may be to the strategy of placing the majority of development in Capel and Paddock Wood.

- . In a report submitted to the TW Planning & Transportation Cabinet Advisory Board on 19/08/2019, the Landscape and Biodiversity Officer suggested better woodland management might mitigate the loss of habitat and achieve 'net biodiversity gain', but the land being lost in Capel (which forms the vast bulk of the borough's development plans) is primarily fields and orchards, and woodland management would achieve very little against the inevitable biodiversity loss. When this was pointed out the officer replied that they 'may target enhancing some farmland areas, perhaps field headlands...', whilst adding that biodiversity had declined through modern farming methods, evidently forgetting the hugely damaging effect of habitat loss through large scale developments.
- . Despite 2 years in which to do so, the Local Plan does not take biodiversity mitigation much further and wildlife dependent upon those fields and orchards face widespread loss of habitat, adding to the worrying decline in their numbers. The proposals for biodiversity gain remain vague, inadequate and destructive. The Local Plan is therefore unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 Properly consider alternative sites, such as Castle Hill, which is far more sustainable than the site at Tudeley.
- 2 Take proper account of public consultation and opinion.
- 3 Use objective and pro-active research to reach the right conclusions.
- 4 Apply the proper intentions of the NPPF and national policy; protecting designated areas and focusing on brownfield and undesignated areas first.
- 5 Create a Local Plan for the future which is based on urban regeneration rather than destruction of the countryside, by taking properly into account the societal changes inevitable in a post-covid world; making use of empty shops and offices as dwellings to regenerate TW's towns by increasing footfall to generate business for independent retailers.
- 6 Focus on protecting the environment and preventing climate change, rather than targeting the erasure of countryside and communities; protect the health and well-being of residents rather than adding pollution and disruption, and take proper and realistic account of the threats (such as increased pollution, traffic congestion, infrastructure costs and flood threat) the strategic sites pose to residents and neighbours.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have been involved with the Save Capel campaign since May 2019, acting as Chair for 15 months. Currently in the campaign's Biodiversity team. I can produce evidence of what I am saying in my submissions at the hearing, if required.

If you would like to attach a file in support of your comments, please upload it here. [Development Map of Capel.docx \(1\)](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Consultee	David Lovell [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED], Five Oak Green Tonbridge [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	David Lovell [REDACTED]
Comment ID	PSLP_833
Response Date	01/06/21 14:54
Consultation Point	Policy STR/SS 3 The Strategy for Tudeley Village (View)
Status	Processed
Submission Type	Web
Version	0.3
Files	Development Map of Capel.docx
Question 1	

Respondent's Name and/or Organisation	David Lovell
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS3 - Strategy for Tudeley Village

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

General Comment

I am a resident of Capel, living in Five Oak Green between the two strategic sites proposed for this rural parish. I live here because of the beautiful countryside, the historic landscape, a closeness with nature and wildlife, and being part of a small close-knit community. All of that, and more, will disappear if TWBC get their way with their lop-sided plans for the area.

My background is in law enforcement. I worked for the Home Office in the UK and abroad for many years, before retiring from the National Crime Agency in May 2019, the month Capel learnt of the shocking proposals in the Local Plan. I have been involved with the Save Capel campaign since then, and as Chair from December 2019 to February 2021. I take an active role in the Biodiversity Team and have made a comment below.

However, with my past in law enforcement, I am concerned by some aspects of TWBC Planning Services' activity during the planning process. Rather than a review of evidence leading to a conclusion, evidence appears constructed or omitted to support a pre-determined conclusion. I have noticed inconsistency, a lack of evidential disclosure and a disregard of public opinion, and therefore intend to focus on my concerns relating to process.

But, to be clear, I object strongly to the Local Plans for Tudeley and East Capel which are unbalanced, ill-considered, deeply unpopular, unsustainable and, I believe, unsound. My reasons follow below.

National Policy

The sites at Capel and Paddock Wood have been pursued by TWBC Planning Services as their desired strategic options for the Local Plan since at least early 2019, however unsustainable or unpopular those options transpire to be. The effort to justify that pursuit might help to explain the volume of inconsistent decisions, misleading statements, a lack of key assessments, and a disregard of public opinion and the intentions of the NPPF. This is not a complete list:

- . Despite often quoted in the Local Plan, the NPPF has been ignored or twisted to suit the pre-conceived solution to the Borough's housing needs through development of the green belt at Capel.
- . The NPPF states brownfield sites should be developed first and greenfield as a last resort, but the Local Plan's primary focus is greenfield. The AONB and its setting are key, but Tudeley borders the AONB and is intrinsic to the setting between high and low weald. Flood zones should be avoided, and yet Tudeley, East Capel and Paddock Wood are adjacent to, or in a flood zone.

The green belt should be preserved; but the plan undermines it, creating an urban sprawl from the edge of Tonbridge, merging Tudeley and Five Oak Green with Paddock Wood.

- . The town of Tunbridge Wells itself is economically stricken; streets are strikingly full of closed shops and empty offices and, with the move to home working and internet shopping, that situation can only get worse. However, rather than take the opportunity to focus on a post-pandemic world and urban regeneration, the Local Plan continues with a backward-looking focus on greenfield development and environmental damage.

Inconsistency

To reach their desired conclusion, the Council has led itself into a maze of contradiction. Reasons for rejecting one site often pertain to another site that is selected, and sites that are selected appear more unsuitable than others that have been rejected. At best, this is a lack of communication between officers, at worst evidential manipulation:

- . Many smaller sites have been rejected as impinging on the Green Belt, even within Capel, but the two sites that will erase the Green Belt in the area have been accepted. Equally, sites in the AONB have been accepted, but not that at Castle Hill (submitted as an alternative to Tudeley and supported by Save Capel) despite its obvious sustainability advantages. Sites adjacent to or in a flood zone have been rejected, but significant flood risk has also been put aside for the strategic sites. To the lay person this looks like double standards.
- . Despite TWBC's oft-repeated claim that removal of Green Belt is justified as the Borough is restricted by designated land, **over 25% of the Borough is undesignated**. Very little development is taking place in this area. The 'very special circumstances' for Green Belt removal appear to be simply 'that's where we want to build.'
- . A primary purpose of the Green Belt is to prevent urban merger, which is precisely what will occur if the proposals across Capel proceed. The David Lock Associates (DLA) report admits there will be 'perceived' coalescence with the expansion of Paddock Wood at East Capel and Five Oak Green (FOG) / Whetsted in Capel, and STR/SS3 states the Tudeley site is close to Five Oak Green '...but physically separate...' **That separation is one field to the south, which will be carved open by the proposed FOG by-pass**. An urban sprawl will be created from Paddock Wood through FOG and Tudeley to the doorstep of Tonbridge, effectively removing the Green Belt.
- . Maps of the Capel sites are focused on the proposed boundaries and do not reflect the situation that exists on the ground, disguising the merger the developments will cause, and the extent of green belt loss. To the west, FOG will be separated from the new town at Tudeley by a single field south of the B2170, which is bordered to by Church Lane and Hadlow Estate building works at Tatlingbury Farm; a further site for a small development also has planning permission in the eastern side of the field at Sychem Place. There are two smaller fields separating Capel Primary School from the village, bordered by the B2170 and railway. To the east, buildings which constitute the village adjoin the A228, which will be the only barrier between FOG and the expanded Paddock Wood; the situation is similar with Whetsted. The stand-off between FOG and the strategic sites is minimal and I believe the Local Plan mapping camouflages the true extent of the merger across Capel. A visual visit will confirm the reality, but I have attached a map which I believe shows a truer picture of the merger effect.

Alternative Sites

The failure to be objective is amply demonstrated by TWBC's lack of pro-active research in undesignated areas and failure to properly consider alternative sites:

- . A decommissioned prison (Blantyre House) in the undesignated areas was rejected as too small and, as a late submission, was not be properly appraised. However, minimal research shows land around the prison is also owned by HMG, with a capacity of 2,500+ dwellings and the advantage of being close to a railway station, unlike the site at Tudeley.

- Two further sites might have combined with this land (SHELAA 9 & 325), and brought the potential for housing to 3,800 dwellings. However, both sites were rejected as ‘...remote from the settlement centre...’, which might equally be applied to Tudeley. Incredibly, Site 325 was also rejected as ‘...a strategic site of a scale harmful to the AONB landscape.’ However, the AONB lies at a distance of 1.15 miles to S325, whilst Tudeley lies directly alongside the AONB and the impact on its setting and the historic landscape is inescapable.
- An alternative site to Tudeley was supported by Save Capel at Castle Hill, which remains within Capel’s Green Belt, but also in the AONB. It was rejected primarily for that reason, despite being adjacent to a significant commercial development which was backed by the same planning officers, which is also in the AONB.
- The Castle Hill site was also rejected as a gas pipeline ran underneath it. However, a mains gas pipe also runs under the original school site put forward by the Tudeley developers, and was deemed acceptable by TWBC’s planners despite that knowledge.
- During a meeting between the Council and the Castle Hill developers on 08/01/2021, the Head of Planning asked why the submission was being put forward so late and suggested it be brought forward at a later date; the inference being it would be acceptable, or properly considered, at that time – AONB notwithstanding. It therefore seems designation can be used to reject proposals, however sustainable, if they are inconvenient to the aim of building on land at Tudeley.
- On 11/01/2021 at the Cabinet Advisory Board, the Head of Planning intimated that Natural England would not allow development at Castle Hill as it was within the AONB, yet Natural England objected to the adjacent commercial development, also within the AONB, and which subsequently received Council approval. It seems barriers can be overcome where necessary, but firmed up to support rejection of alternative proposals that threaten the desired outcome.
- The Procedure Guide for Local Plan Examinations (Local Plans: the examination process - GOV.UK (www.gov.uk)) states in 1.11: *‘Plans which allocate sites for development will need to be supported by evidence demonstrating that the LPA has followed a logical and consistent method to identify and select the allocated sites, and to reject alternatives.’* I would suggest that the evidence shows that the Local Plan is riddled with illogical and inconsistent methodology designed to justify the strategic sites in Capel, however unsustainable they may be, and is therefore unsound.

Duty to Co-operate & Misinformation

Misleading and inaccurate statements have been a feature of the Council’s dealings with the community in Capel, including claims of long-standing cooperation with neighbouring boroughs:

- In claiming that TWBC have complied with the **Duty to Cooperate**, at the Planning Advisory meeting on 05/08/2019, Head of Planning told Councillors that officers had consulted with other boroughs throughout. However, on 24/07/2019, 12 days before the meeting and 3 months after the Tudeley proposals became public, Tonbridge & Malling Borough Council’s Planning Officer advised; *“On TWBC – we have had Duty to Cooperate meetings with colleagues there, but these were before they proposed the sites in their reg 18 plan – the principle of new settlements was mentioned but there were no sites identified at that time.”* The suggestion that neighbouring boroughs were aware of the proposals for Tudeley ‘throughout’ was misleading, if not disingenuous.
- At an initial meeting with the community the Head of Planning Services indicated that the ease of dealing with a single landowner was a primary factor in the Council’s decision to settle on the site at Tudeley. This was subsequently denied, but I understand exactly the same condition was attached to the Castle Hill proposals. This has irked residents who feel that officers are paid to take the right decisions, not the easy ones.
- At a TWBC Planning Advisory meeting on 05/08/2019, the Environment Officer claimed agricultural land in Tudeley and East Capel was ‘poor quality’. However, TWBC’s own assessment in a Development Constraints Study, shows the land as Grades 2 and 3; defined by Natural England as ‘Very Good’ and ‘Good to Moderate’. Grade 4 is ‘poor’ and none exists in the sites.
- Nonetheless, in an email of 15/10/2019, Head of Planning insisted again that land quality was ‘poor’, a misrepresentation potentially explained in the same response: *‘Particular attention will be given to: i) The grade of agricultural land and agricultural activities to minimise the effects on the rural economy and agricultural functionality...’* If the land is ‘poor’ the loss would have little

negative agricultural impact; loss of productive land is hard to justify – and remains so (Policy EN20).

Disclosure and omission

Many important aspects of the strategic sites in the PSLP are either based on assumption or left to the planning application stage when they will not be subject to independent scrutiny. The importance of these omissions gives cause for concern that assessments and process are being selected to avoid negative outcomes for the chosen sites:

- . The claim there will be ‘...an opportunity for betterment to the flooding and drainage issues which are present for residents of parts of Paddock Wood, and ecological and landscape enhancements as part of the exceptional circumstances case for the release of this Green Belt land...’ (PSLP 5.183) suggests such enhancements are not decided, in which case the exceptional circumstances the Inspector needs to consider are yet to be described.
- . TWBC commissioned David Lock Associates (DLA) to assess deliverability of the East Capel and PW proposals, but the work appears unfinished as ‘...further detail on phasing and mix of dwellings is required...’. Nonetheless, TWBC concluded that ‘...viability of the growth here is justified.’ (PSLP 5.177) Without such important work, viability seems a leap of faith.
- . No Cumulative Impact Assessment on the effects of the developments across Capel, including the KCC gravel extraction, has been done and there is no indication one will be commissioned. This is a key consideration given the clear impact that the combined works will have on biodiversity in the parish, and which is likely to show that biodiversity will be squeezed. It is perhaps not surprising therefore that such an assessment has not been readied for the Regulation 19 inspection.
- . No Environmental Impact Assessment has been completed for either strategic site, despite their key importance to the Local Plan. TWBC advise these will be left to planning application stage – so avoiding the results forming part of the independent examination. Moreover, a strategic EIA for both developments upon the parish would ensure a rounded consideration of facts, but this does not appear to be something TWBC wish to pursue.
- . Although it is clear that no railway station can be delivered at Tudeley, despite the Hadlow Estate’s wishful thinking, TWBC have decided to mention the masterplan’s provision for one, despite claiming it was not part of their consideration (PSLP 5.218). It is also far from certain that any improvements can be made to cross the railway, and no evidence is supplied. The lack of a railway station is highly damaging to the sustainability of the Tudeley site, so this mention appears to be an attempt to gloss over the effective division of the Tudeley settlement into two halves.
- . TWBC state the Tudeley ‘...development will be delivered through the production of a Framework Masterplan Supplementary Planning Document (SPD) to guide development in respect of the garden settlement principles and creation of a new community at Tudeley Village.’ (SS3 P162). This has not been done or started and begs the question, why not?
- . The so-called Five Oak Green by-pass that will connect the new town at Tudeley to a (currently unfunded?) Colt’s Hill by-pass for the A228, appears to be another incomplete proposal with the plan omitting trees, unlike the other Colts Hill plans in Other Reports Template (tunbridgewells.gov.uk). Moreover, whilst the Head of Planning stated at an early stage that an attraction of Tudeley was the ease of dealing with a single landowner – a condition I understand was repeated to the developer at Castle Hill. However, that criterion fails as the proposed route passes through land belonging to at least three different owners, two of which have expressed their opposition to the proposal. One objects as his land produces food through cattle and his livelihood would be lost, the other objects through historic ownership, whilst the third involves the significant heritage loss of the last working hop garden in Capel.
- . It would appear to make more sense to route the Five Oak Green by-pass north of the village from the new town at Tudeley to the A228. This would pass through land belonging to the same landowner and service the proposed gravel extractions. Instead, there will need to be two roads, north and south, which would incur additional and unnecessary loss of green belt. The reasoning is not clear, but could be because the southern route would cosmetically plan for traffic towards Tunbridge Wells, when the reality is most would head to Tonbridge or Paddock Wood. (This might also explain the curious proposal to seal off of the road into Paddock Wood from the Hop Farm roundabout). It might also help reduce costs to the developer, as the proposals look increasingly unviable financially if the northern part of the Tudeley site is ever to see construction.

- The plan for the Five Oak Green by-pass may also be deliberate opaque so as to avoid examination at Regulation 19; as the Council wrote to one of the landowners: *'... if the plan is found sound by an Inspector... it is unlikely a planning application for the Five Oak Green bypass will be submitted until after this time.'* I would question the legitimacy of leaving so much that is fundamental to the Local Plan to a later date, rather than producing hard evidence for scrutiny.
- The most important omission is the failure to include the Hadlow Estate (HE) Masterplan and Delivery Strategy in the TWBC bundle for the Regulation 19 inspection. TWBC say it is guided by the HE masterplan, and is fulsome in its praise (Strategic Sites Topic Paper - section 5), but then uses the excuse that it was not included as it was not commissioned by the Council. Given the vital importance the HE documentation has for the very foundation of the Local Plan (5.28 *'The advice and work undertaken by The Hadlow Estate has informed the approach to the policy within the Local Plan.'*), to omit it, or even annotate relevant sections from the overall package, deprives the Inspector from making their own judgment. **This is a significant failure in the disclosure of vital evidence.**
- Furthermore, in a response to a query on this matter, the Strategic Sites & Delivery Team Leader wrote *'...given the document is on the Hadlow Estate's website, in the public domain, it was not considered necessary to include it on the TWBC website at this time.'* This reasoning suggests the documentation not only could have been included but may be later, presumably at a time more convenient to the Council's aims. Like other documents that might reflect negatively on the proposals, the presumption is this will be at the planning application stage when the Council can perform its own scrutiny of the documentation, with predictable results. **This is a further example of what appears to be a manipulation of process to ensure an outcome.**

Public Opinion

Whilst TWBC talk about public engagement in the Local Plan process, it has been almost entirely negative and routinely ignored:

- In TWBC's 2017 Issues and Options document the public voted overwhelmingly to support an A21 'growth corridor' to meet housing need. This was subsequently put aside in favour of Tudeley and East Capel.
- In autumn 2019 at Regulation 18, in an 'unprecedented' wave of negative engagement, 95% of 1,000 responses objected to the strategic sites at Tudeley and East Capel. The response was ignored and, instead, Capel was handed a further 700 dwellings - in what looks suspiciously like punishment.
- In August 2020, Capel Parish Council organised a questionnaire on the future of the Parish as a pre-cursor to work formulating a Neighbourhood Plan. Again, in an open question, 95% of respondents voiced their disapproval of the Council's proposals for Capel in the Local Plan.
- In December 2020, Save Capel members voted by 95% to support an option at Castle Hill as an alternative to Tudeley, which would match the A21 'growth corridor', alongside the Kingstanding commercial area. This has also been rejected without full consideration.
- In May 2021 a candidate for the role of Capel Borough Councillor, who stood on a ticket to rework the Local Plan, swept aside the incumbent Councillor with a vote of 75% of an increased turnout.
- The Council have attempted to counter the arguments of the community through misinformation or obfuscation, rather than answering honestly or accommodating public sentiment. For example, the evening before the Full Cabinet met on 03/02/2021 to decide the fate of the Local Plan, the Head of Planning Services lobbied all councillors with a document negating many of the arguments the community had made, irrespective of merit or fact. Documents were only made available to Councillors a few hours before the meeting, which was insufficient time to make informed decisions, and many Councillors voted on what they were being told, rather than making decisions based on their own judgement.
- The Council's disdain of public opinion was summed up by the Head of Planning Services at a Cabinet Meeting on 21/01/2021; when asked to comment on the weight of resistance to the Capel proposals stated that *"It's not a numbers game,"* adding that just because lots of people do not want something does not mean it will be stopped. In essence, the community's voice is irrelevant where it does conform to Council plans. Consultation is therefore a meaningless tick-box exercise for TW Planning Services within the Local Plan process.
- This disregard continues. After the election in May 2021 of a Borough Councillor in Capel, who stood on a ticket supporting the community's views on the Local Plan, a Council spokesperson

commented; *"The responses to the consultation came in the most part from residents of areas where development is proposed."* It begs the question why the Council bothered with a consultation if the community most affected can be dismissed so readily?

Community

Capel is a rural ward and the local community of around 2000 souls is close-knit and, to coin a phrase used by the Borough Council, 'we love where we live.' To see our countryside and community destroyed is heart-breaking, especially when we can see that the proposals are unsustainable and unsound, and quite viable alternatives are overlooked or not properly considered:

- . Capel currently consists of around 940 homes. The addition of over 4800 homes, will swamp the small but strong rural community that exists. It is very clear that the community, and those in neighbouring boroughs to be adversely affected by the proposals, are strongly against the Tunbridge Wells Local Plan as it currently stands. There is an acceptance that some level of housing is needed, but the lop-sided nature of the proposals – Capel has just 2% of the Borough's population but will bear 45% of its housing need - is far more than required in the area and Planning Services conceded many new residents will come from London and even further afield (new property in Paddock Wood is being advertised in China).
- . The community's health and well-being will be sacrificed, and the ongoing proposals are already taking their toll, as decades of construction will blight the lives of those who live here. Air, noise and other forms of pollution are inevitable, and will have an adverse effect on people's health and mental well-being. The environmental damage will be huge, our ancient and precious landscape scarred forever, irreplaceable habitat lost and, ultimately, the community drowned in a tsunami of new residents.
- . The detrimental effect on the community of over 15 years of construction across the area has not been addressed; perhaps because it cannot be if the strategic sites are to be developed. Residents are already complaining about dust and noise from the ongoing developments at Paddock Wood, which can only get worse. Countryside and open spaces are recognised to improve well-being, but these developments not only remove those wider green and open spaces, but air quality will suffer, noise levels will be incessant and Capel's dark skies will be lost.
- . Tunbridge Wells has a policy to reduce air pollution (EN21), but the proposed developments pose a significant threat to the environment, including an increase pollution at a time of climate change. The Council are also has declared a climate emergency, but the developments can only aggravate the problem.
- . TWBC aims to be carbon neutral by 2030; 6 years before the end of the Tudeley construction period. The loss of 600 acres of fields and hedgerows to large-scale development can only work against this aim, notwithstanding the Local Plan's strategic objective 10, which I note has been watered down from an earlier iteration of the Local Plan from *'to tackle climate change...'* to *'...support the goal to make the borough carbon neutral by 2030...'* The objective continues with the promise to *'.... minimise the impact of climate change on communities, the economy, and the environment...'* This is a fanciful statement when such large-scale construction will destroy carbon absorbing countryside, encourage greater use of cars, erase wildlife habitat and decimate the local community.
- . The rejected alternative site to Tudeley at Castle Hill would not have so dramatic effect, being a sparsely populated area, and more sustainable being alongside a major transport artery, close to the town of Tunbridge Wells and the new employment opportunities at the Kingstanding commercial site. Moreover, combined with a focus on urban regeneration and not loss of greenfield and agricultural land, the environmental and human costs would be limited. Unfortunately, the opportunity to forge a local plan for the future that can be supported and welcomed by the public has been rejected by the Council in a preference for environmentally destructive and harmful, and deeply unpopular, proposals.
- . The local population has fiercely raised its objections on several occasions but is routinely dismissed by the Council, which has also ignored the objections raised by the neighbouring authorities in Tonbridge and Malling, and Yalding in Maidstone Borough, which fear increased traffic congestion, pollution and flooding, and associated infrastructure and mitigation costs,

- caused by the developments. This deaf ear to public opinion cannot be considered as participation by the community as envisaged in the planning process, and renders the Local Plan unsound.
- Ultimately, TWBC's planning strategy appears to be centred on finding ways to justify the unjustifiable, with inconvenient truths placed aside to avoid examination at the Regulation 19. Rather than a positive and objective exercise on the merits of the Capel proposals, the Local Plan is a negative and subjective exercise to justify a pre-conceived conclusion. The Local Plan is peppered with inconsistency and a lack of disclosure or delay in important work, and is therefore unsound.
- The inevitable question is why a Local Planning Authority would resort to manipulation, misinformation, delay and bias if their Local Plan is 'sound'? That in itself must sow doubt on the Local Plan's soundness, and I therefore ask the Regulation 19 inspection not only looks at what is being put forward, but also what is missing.

Biodiversity

NPPF para 177 states: *The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.* However:

- There has been no **Cumulative Impact Assessment** of the effect of development across Capel, compounded by KCC gravel excavations between the two sites, and the extensive road infrastructure required to service both developments and gravel extraction. The combination of these proposed works will transform Capel from a rural ward to an urban sprawl from Tonbridge to Paddock Wood, and from the Medway to the AONB. The cumulative impact on wildlife (as well as food production, landscape, heritage assets, the local community and flooding), is likely to be far greater than each aspect of TWBC's and KCC's plans taken in isolation, yet the isolationist approach is what the authorities and developers insist on taking. It is vital a Cumulative Impact Assessment is made; however inconvenient the findings may be to the strategy of placing the majority of development in Capel and Paddock Wood.
- In a report submitted to the TW Planning & Transportation Cabinet Advisory Board on 19/08/2019, the Landscape and Biodiversity Officer suggested better woodland management might mitigate the loss of habitat and achieve 'net biodiversity gain', but the land being lost in Capel (which forms the vast bulk of the borough's development plans) is primarily fields and orchards, and woodland management would achieve very little against the inevitable biodiversity loss. When this was pointed out the officer replied that they 'may target enhancing some farmland areas, perhaps field headlands...', whilst adding that biodiversity had declined through modern farming methods, evidently forgetting the hugely damaging effect of habitat loss through large scale developments.
- Despite 2 years in which to do so, the Local Plan does not take biodiversity mitigation much further and wildlife dependent upon those fields and orchards face widespread loss of habitat, adding to the worrying decline in their numbers. The proposals for biodiversity gain remain vague, inadequate and destructive. The Local Plan is therefore unsound.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. Properly consider alternative sites, such as Castle Hill, which is far more sustainable than the site at Tudeley.
2. Take proper account of public consultation and opinion.
3. Use objective and pro-active research to reach the right conclusions.
4. Apply the proper intentions of the NPPF and national policy; protecting designated areas and focusing on brownfield and undesigated areas first.
5. Create a Local Plan for the future which is based on urban regeneration rather than destruction of the countryside, by taking properly into account the societal changes inevitable in a post-covid world; make use of empty shops and offices as dwellings to regenerate TW's towns by increasing footfall to generate business for independent retailers.
6. Focus on protecting the environment and assiting climate change, rather than targeting the erasure of countryside and communities; protect the health and well-being of residents rather than adding pollution and disruption, and take account of the threats (such as increased pollution, traffic congestion, infrastructure costs and flood threat) the strategic sites pose to residents and neighbours.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I have been involved in the Save Capel campaign since May 2019 and can produce evidence to support what I am saying at a hearing, if required.

If you would like to attach a file in support of your comments, please upload it here. [Development Map of Capel.docx](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Susan Lovell [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Paddock Wood [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Susan Lovell [REDACTED]
Comment ID	PSLP_1901
Response Date	04/06/21 16:43
Consultation Point	Policy STR/PW 1 The Strategy for Paddock Wood (View)
Status	Processed
Submission Type	Email
Version	0.9
Data inputter to enter their initials here	KJ
Question 1	
Respondent's Name and/or Organisation	Mrs Sue Lovell
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/PW 1 The Strategy for Paddock Wood	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR/PW1

Number of Houses

TWBC's numbers were calculated on old figures and there is already evidence that the housing numbers are hugely inaccurate. TWBC has the right to challenge the government on the number of houses - and it should do so!

I am unhappy that Paddock Wood and Capel are jointly getting the lion's share of the housing - a figure of 68% has been mooted, or 33% for Paddock Wood alone! There should be a fair spread across the borough. The noise and air pollution of 250 houses built in Paddock Wood every year will make living and working in the town a living hell.

I am not happy that numbers of houses on each potential development site have been estimated. This has made it almost impossible to make any reasoned judgements on the matter.

Housing need and type - the latest calculations show that much less housing is actually needed (some sources have said it's almost half!) 'Affordable' housing is rated at 80% of market value - how many local people will actually be able to afford these homes? The garden village principles state that there should be housing types that are genuinely affordable.

There are people in Paddock Wood who dream of owning their own home but there is no way that they will be able to afford an average £378,000 family house in the borough, let alone in their own town. Residents should be encouraged to live within a close proximity to their family.

I believe the homes that are currently in development are being marketed to those in Greater London.

Paddock Wood should remain of a largely Rural nature - This statement is part of PWTC's draft neighbourhood plan. Effectively doubling the size of Paddock Wood does not match this statement in any way. Development proposals should not have an adverse impact on the landscape setting of Paddock Wood and should maintain the distinctive views of the surrounding countryside from public vantage points within and adjacent to the built-up area.

From Castle Hill view point in Brenchley the views will be irrevocably changed.

TWBC should be seeking and reassessing out other sites such as the A21 corridor (the Castle Hill proposal) and Blantyre House.

Flooding - TWBC want to build on category 2 and 3a flood risk areas. This hugely contradicts the NPPF Climate change flood risk assessment. Huge amounts of developers' money will inevitably be spent on flood mitigation, diverting funds from other essential infrastructure.

Southern Water employees have also told me that as soon as it rains the storm tanks are full, so there will have to be other valid sites for more of these tanks. The infrastructure needs to be put in place before the houses and roads are built.

Biodiversity - wildlife and plants. Countless creatures will lose their habitat. I have major concerns over the habitat of tawny owls, kestrels, sparrowhawks, buzzards and other wildlife (Including their prey) if PW1_7 and other large areas of agricultural land are heavily built upon. Families of these creatures are a common sight/sound over that area. If you remove or alter the habitats of the local wildlife The proximity of more people and their pets to historically natural areas will invariably be detrimental.

The draft local plan states that there will be a 'net gain' i.e. more trees will be planted than lost. However, these will be saplings. A mature tree will take up between 50 and 100 gallons of water per day. The removal of mature trees and hedgerows will decimate the habitat of thousands of animals and birds in Tunbridge Wells Borough Council's draft local plan. Planting additional trees and hedgerows will not adequately help these creatures, as they will not be able to make their homes in young trees. We need to ensure that developers calculate the impact of any developments using the government's agreed biodiversity impact accounting metric.

(Gov.uk/government/news/spring-statement-2019-what-you-need-to-know/)

Biodiversity net gain is of course a government requirement.

Church Road's important hedgerows are well over 30 years old, as defined by the Hedgerows Regulations 1997 and there are laws against these being destroyed.

Roads - There will inevitably be a new road built East of Paddock Wood, possibly within PW1_7. This will cause more light and noise pollution. I hope that Church Road will get the footpath it so desperately needs as soon as possible. The infrastructure will need to be present before the developments. Current residents cannot continue to risk their lives while walking to the town centre or station. Church Road needs improving in that cars, travelling in both directions, pass our row of houses over the white line in the road. There needs to be more done for traffic calming than the extension to the 30mph limit, which nobody seems to take notice of anyway.

The country lanes within our area will not withstand the increased traffic, including the industrial traffic such as Scrapco and Osmonds at Old Hay.

Green Belt land - policies AL/PW1 & AL/CA3 - an exceptional reason is needed to build upon green belt land. Sevenoaks has already had its local plan rejected by the government due to this.

Green Spaces - I am concerned about the green space/rest area behind the Wesley Centre as it has been labelled as a potential development area and giving us a local green status may frustrate the potential. This should be labelled as a local green space and kept that way.

Otherwise, there is potential for building on that site which is not what local residents want.

I am concerned about the Mascalls school playing field being given as insufficiently evident as a local green space. I would hope that this would not be built upon.

I'm also concerned about the natural woodland behind Warrington Road/Heather Bank 1.27 ha of natural woodland - this is important wildlife habitat and should be protected.

There is ancient woodland, ponds, and meadows to the south-east of Mascalls school, bounded by Mascalls Court road and Chantler's Hill (including a public footpath.) It should be treated as a local green space. This area is not marked on your local green spaces assessment.

Paddock Wood Primary School's playing fields, AS_54, should be marked as a green space and protected.

Wellbeing - The accessible natural green space standard (ANGSt) recommends that everyone should have accessible natural green space of at least 2ha in size, no more than 5 minutes' walk from home... In the Tunbridge Wells green infrastructure framework for draft local plan item 40, gap analysis recognises this. In the table, the key access issues states that paddock wood has got very poor access. Following on from that, there should be one accessible 100 ha site within 5 km of "home" there is not one in Paddock Wood. Item 41 states that there is significant opportunity to provide for and address any shortfalls in natural green space provision, as part of the master planning process, according to green garden settlement principles. I would like to flag this to make sure that this actually happens.

The candidate local nature reserves, to the SW and E of PW will not meet this standard for those living in the NW of PW, so these conditions have not been met. The green wedges have not been adequately detailed to enable me to comment. However the one strip of land at the very east of Paddock Wood (PW1_8) seems unsuitable as it is right between a solar farm and Queen Street.

TWBC already recognise that **air and noise pollution** is a downside to these developments.

My house in Paddock Wood is on the main road but semi-rural. I chose this house for peace and quiet. I have already been affected by the noise of Mascalls Court at the back of my property and subsequently the Church Farm development. Now I have the threat of more roads and houses being built, causing a huge amount of noise. This is not what I moved to Paddock Wood for! **Light pollution** will be a factor too - not just from street lamps, which will no doubt be low-pollution LED ones, but from vehicles on the road and the new houses and other buildings.

Rural feel to Paddock Wood - the green and Rural feel to the approaches to Paddock Wood, in particular from the south (from Brenchley) and West (from Five Oak Green) should be safeguarded and enhanced, as per PW's draft Neighbourhood plan. Policy G3 also states that 'development proposals that would lead to the join up of the built up areas of Paddock Wood and Five Oak Green will be resisted.' Tunbridge Wells Borough Council's local plan is based upon development to the west of Paddock Wood, which belongs to the east of Capel.

This totally goes against our Green infrastructure policy, therefore I am totally against the development to the East of PW.

Heritage - There is a huge development planned to the East of PW - possibly a 'neighbourhood centre.' There are listed buildings that will be surrounded by development areas on 3 sides, namely 1 and 2 Rose Cottages will be surrounded by PW1_7, PW1_8 and the Mascalls Court development. The row of 4 houses on this stretch of Church Road (of which mine is one) have been completely surrounded with development sites. The beautiful views of the countryside and historic farmsteads over the fields, which add to the financial value of the properties, will be ruined. Will homeowners be adequately compensated for this intrusion? Is it even legal for houses to be built in the area within the curtilage of these listed buildings?

Policy AL/PW4 states that the community centre will be placed on the Paddock Wood Memorial Playing Fields. This was purchased using donations by the people of Paddock Wood and then more recently, I am told that the deeds were transferred into PWTC's name.

Also the town had a poll, which stated that the residents were not in favour of the community centre at the PWMPF. This is not democracy and it is wrong. There are more suitable sites for the community centre.

The linear route of the historic railway line should be afforded protection against future development.

Transport - there will be an increased number of commuters, non-existent parking spaces, (AL/PW2,) more dangerous parking in residential roads, not enough seats on trains (issue with length of platform so rail companies will not be able to just add more carriages.)

Sewerage - Southern Water is already over capacity; antiquated and mixed type infrastructure cause back-ups and flooding when it rains; all waste water is coming through from Capel parish to PW's water treatment works in North-East Paddock Wood.

Education - Schools and transport to them (especially Tonbridge - e.g. Trains, Tudeley Lane)

Also TWBC state that further education is covered in Royal Tunbridge Wells - it really isn't!

On the Mascalls Court Farm development the new primary school has been put on hold, because it has been decided that it is not needed because potential numbers are too small.

Agriculture - With TWBC's plan, a large amount of grade 2/3 land will be lost, including some of Ribena's blackcurrants (PW1_9.)

Health provision - Another GP surgery has been allowed for, but they do not take into account the lack of GPs in the NHS. NHS England have admitted to me that they cannot recruit GPs.

Police - Increase in population = increase in crime. TWBC want to double the population of PW so we should at least have a part time police presence. With the proposed demolition of the police station, we will have nothing.

Sports provision - A sports hub is planned between Five Oak Green and PW, which floods.

A cricket pitch would sink there - the lime would wash away. If TWBC/PWTC's plan for the Community Centre goes ahead, the PW Memorial Playing Fields will lose its cricket pitch. The tennis courts have already been closed 'for the Winter' (as at 2019) as they are in bad repair and dangerous. Will they ever come back in to use?

Utilities - There is currently no gas pipe serving East Paddock Wood - this, I assume would have to be installed at great cost, or other alternatives provided

This probably does not cover all of my feelings on these developments but I have spent hours poring over these documents.

I am very upset that the consultation was not made easy for people who find it difficult to respond, such as the elderly, infirm, those who have mental health problems, etc. I do not believe TWBC has served its residents at all well in this process.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Make a fresh plan, which takes into account the true housing need. Don't build on Green Belt, which is there to prevent urban sprawl.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

My home borders the East parcel of Paddock Wood. Furthermore, I am actively involved in the organisation Stop Overdevelopment of Paddock Wood.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Peter Lovering

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph Numbers: 4.6, 4.8–4.11

Figure 5

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Borough Council's Local Plan is unsound because it is unjustified. It is unjustified because it is based on assumptions that are already out of date and it will cause unnecessary and disproportionate harm to the environment and the quality of life of residents.

It assumes that huge amounts of additional housing will be needed within the Borough. This assumption is no longer appropriate as the UK Government has committed itself to a policy of 'levelling up' the rest of the country with the more prosperous south-east. The effect of this policy will be to discourage people from migrating to the south-east in search of employment opportunities as the Government will be creating ample opportunities in the areas where people live already. The demand for housing that the Plan envisages will not materialise if the Government delivers on its promises.

In addition, the Government's hostile attitude towards citizens of the European Union has resulted in hundreds of thousands of people leaving the UK and returning to their countries of origin. This has already had the effect of reducing the demand for housing in the south-east.

Meanwhile the damage caused to the British economy by the Covid-19 pandemic, and in particular the impact on the hospitality sector, has had the effect of reducing the demand for labour. This will naturally reduce the demand for additional housing in the south-east.

Another effect of the pandemic has been the closure of many shops, as people have grown accustomed to making purchases online rather than in bricks-and-mortar stores. This has merely reinforced an existing change in consumer behaviour. Online retailers employ fewer staff, further reducing the demand for labour and reducing the demand for housing.

In addition, the closure of shops on our high streets, in shopping centres and on out-of-town retail parks means that many sites have become available for change of use and redevelopment. Similarly, the pandemic has seen many people working from home, another change that is likely to be permanent. Fewer people will be confined to offices full-time with the result that businesses will downsize, freeing up former office buildings for redevelopment as housing. Technological change is transforming our world, while TWBC and the Westminster Government continue to live in the 1970s.

There is no longer a need to build new housing estates on green-field sites on the fringes of our towns and villages. Nor is there any need for new settlements such as the proposed 'village' at Tudeley. There is ample 'brown-field' land to meet our (reduced) housing demand within the existing footprints of our towns.

The assumptions on which this Plan is based are no longer relevant, appropriate or applicable. The projected demand for housing, schools and leisure facilities is clearly not going to materialise. The 'identified level of development needs' is nonsense.

The Plan is also in breach of national planning policy since, as explained in paragraph 4.6, the need to safeguard 'protected areas and assets, such as AONBs and Green Belts' is potentially a valid reason

for a local plan to fail 'to meet the identified level of planning needs'. This Plan shows little regard for the Green Belt or local AONBs and endangers both. It must be totally rewritten before irreversible damage is done to our landscape and the quality of life enjoyed by the residents of the Borough. Green Belts and AONBs were created by Parliament and have legal protection. Tunbridge Wells Borough Council does not have the right to ignore and override the legal protections that have been put in place by Parliament in the national interest.

The Plan also fails to take into account national policy on air pollution. It is based on the assumption that people living in the new development zones, including the 'garden village', will use motor cars to reach the shops, schools, places of entertainment and other amenities on which they depend. This is contrary to the Government's legally binding commitments to improve air quality and reduce green-house gas emissions. The Climate Emergency will be worsened by this Plan and so will public health as a result of the deterioration in air quality that will result from it. The dependence on the motor car that it promotes is contrary to the law.

The destruction of open countryside envisaged by this Plan will also hamper efforts to reduce CO2 levels and is thus illegal.

I would further add that it seems obvious that the younger people who will be invited to buy properties in these newly created development zones do not actually want to live away from the traditional town centres with the amenities they offer; they do not want to be totally dependent on pollution-generating cars to reach the shops, their children's schools, restaurants and places of entertainment. They need appropriate, modern, affordable housing but would prefer to live within the existing footprints of our towns. The only reason they would opt to live in a newly created 'garden village' is because that is all they can afford in a housing market that has been grossly distorted by Government policy.

Endless sprawling development is a lazy, wasteful solution to the challenges we face. It is unjustified and illegal. There is ample scope to redevelop our towns at slightly greater density in order to meet demand. The people of this Borough want to see the Green Belt preserved and our Areas of Outstanding Natural Beauty protected for future generations to enjoy. This Plan is reckless, irresponsible folly and should be rejected for the reasons stated above.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For this Plan to become justified, it must reflect the wishes of local people, instead of the preoccupations of our masters in Whitehall. It needs to reject the development targets imposed by central government, on the grounds that they are out-dated and inconsistent with the Government's 'levelling up' policy. The Plan should be rewritten to reflect this Government's commitment to safeguard and improve the natural environment. It must be revised so that it reduces the pollution caused by motor vehicles rather than encouraging dependency on cars, commercial vehicles and buses, in line with Government policies intended to address the Climate Emergency. It should be amended to ensure complete preservation of the Green Belt and our AONBs, in accordance with the intentions of Parliament when they were created. This will have the effect of promoting mental and physical health and safeguarding air quality, all key objectives of Government policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

I would like to object to the closer of the railway bridge to be closed and used for just bikes and buses. I'm unsure if you live in paddock wood and if you did you would realise that the ambulance station is the other side of the Bridge in eldon way. So if some needed an ambulance in Maidstone Road that means they would have to go past the garden centre turn left at the hop farm roundabout go along wetstead Road to the other roundabout turn left along badsell Road come to the mascells traffic lights and turn left to get to Maidstone Road this taking 10 15 mins on the road if traffic was good. Which it won't be because people that live the other side of the bridge the industrial estate side of paddock wood. Would have to go all around the above roads to get home or all the people that live the other side of the town would have to go along church road and up to green lane all having new houses built so more cars and more traffic. The said trip for an ambulance would normally take 2 to 3 mins but I feel you are putting people at risk. This will also cause a lot of trouble for people getting to work that live one end of the town and need to get out of town. The town has been built up over the years and more cars are on the road and you are wanting to close one of the main roads in the town. You really don't have a clue about what the people that live here want or need. We need more shops, Dr's, schools not more houses and roads being closes. Come to the town and ask people if they want a road closed. As for buses only to use the road that is the biggest joke the buses run one an hour.

I strongly object to this plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Policy H 9 Gypsies and Travellers

Table 11

Inset Map 82 - Greenfields Farm

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy H9 and specifically the Greenfields Farm allocation which seeks to allocate further land for a travellers/gypsy site.

The Plan is not sound because insufficient consideration has been given towards the resultant traffic impacts, suitability of the site and other Local Plan conflicts. As such it has resulted in a Plan which is unsound not effective and not justified. Nor is it consistent with Planning Policy. The following explains the objections in more detail.

It is noted in the draft Plan as a footnote on page 415 that the Greenfields site is a new site submitted after the Regulation 18 draft Plan. It has no context in terms of being a historic gypsy site and as such must be considered on the basis of a new allocation in the countryside.

On behalf of the objector's we take the view that the site is wholly unsuitable for residential uses of the type envisaged based on the character of the area. It will be clear on the site visit that the access is narrow and already serves a number of non conforming land uses such as a scrap yard (Scrapco Metal Recycling and waste transfer business), CJ Enterprises which specialise in material processing including bulk deliveries and export of materials with HGV's, a car body repair business (Riverdale Body Repair Centre), various other automotive companies, including Osmonds a road planings company that results in heavy plant using the lane, and other HGV Transport and tyre services. Although there are some residential properties along the access lane, they experience noise and disturbance that affects their residential amenity. Adjacent to the site is a scrap metal and recycling business which is extremely noisy. It is a B2 industrial use and is not compatible with a residential type use. The site is therefore clearly unsuitable for further residential uses such as a gypsy or traveller sites on amenity grounds and the Plan is therefore unsound.

The level of traffic along this single width access road is significant and the access is unsuited to additional traffic generated by the allocation given its single width character. The nature of the traffic

along this access road comprises HGV's, high sided vehicles and skip lorries at very regular intervals. There is a shooting club, which uses a site off this access and generates significant traffic. The sheer volume of traffic is such that the access and junction is at over capacity. Congestion along this access road and especially at the junction where large vehicles cannot pass results in an unsafe existing situation. This, together with the limited visibility on the 60mph Pearsons Green Road leads us to conclude that any further intensification of the access and junction by this allocation is wholly undesirable and puts highway safety at issue. The proposed allocation is not supported by a road safety audit to confirm that both Pearsons Green Road and the access track/junction is safe for the additional traffic proposed and neither is there evidence that the roads have sufficient capacity by way of a Transport Assessment. In the absence of this information, the site cannot reasonably be allocated as it would result in an unreasonable intensification of the uses.

The Policy criteria of H9 fail to consider either the amenity of those expected to use the Traveller site or the suitability of the access. In the absence of these criteria it is the case that this Policy is unsound and not effective.

The site that is to be allocated is significantly larger than the 3 pitches that are allocated in Table 11. This suggests that the draft Policy is not sound. It invites additional pitches notwithstanding criterion 1 of Policy H9.

The site is unsustainable in its location. There is no opportunity to access local facilities or public transport and although the site is for a Travellers site there should be an expectation that some services and facilities could be accessed by foot. Shopping and schools would require additional car journeys. The NPPF explains that sustainability comprises both environmental, social and economic matters and in all respects the site does not comply with these guiding principles.

It has been noted that surface water flooding is common along this access road and especially near the proposed allocation site. In the absence of any evidence to demonstrate that the site is not at flood risk, the allocation should be removed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify H9 and Table 11 to delete the proposed allocation at Greenfields Farm (Inset Map 82) and to consider additional land at the other sites to compensate.

To amend Policy H9 to require residential amenity and highways access safety and capacity to be specific criteria for this Policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Given the clear amenity, highway, sustainability and flood risk objections it is considered that the sustainability appraisal has not appropriately considered this draft allocation site. The site is unsustainable and should not score positively. It should be deleted as an allocation.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- . Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

. Also, the NPPF section 2 para 11

. *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

. NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Grahame Ludlow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_201, PSLP_203 and PSLP_204]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- . Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

. Also, the NPPF section 2 para 11

. *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

. NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child’s residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Grahame Ludlow [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Grahame Ludlow [REDACTED]
Comment ID	PSLP_204
Response Date	15/05/21 13:01
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Grahame Ludlow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_201, PSLP_203 and PSLP_204]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- . Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

- . Also, the NPPF section 2 para 11
- . *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child’s residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Anne Ludlow [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Anne Ludlow ([REDACTED])
Comment ID	PSLP_196
Response Date	14/05/21 13:01
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.9
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Anne Ludlow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_196, PSLP_197 and PSLP_198]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

- . Also, the NPPF section 2 para 11
- . *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child’s residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Anne Ludlow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_196, PSLP_197 and PSLP_198]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- . Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

. Also, the NPPF section 2 para 11

. “Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

. NPPF para 177 requires that “an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.” No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Anne Ludlow [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Anne Ludlow [REDACTED]
Comment ID	PSLP_198
Response Date	14/05/21 13:01
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Anne Ludlow
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_196, PSLP_197 and PSLP_198]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites “lack services, facilities and travel options”. This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children’s playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.

- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement.*" This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
- . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
- . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.
- . The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.
- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its

plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling

for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).
- . Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458**

High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”

. Also, the NPPF section 2 para 11

. “Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

. NPPF para 177 requires that “an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.” No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads

and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School."

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.
5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green

Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Speldhurst road is a residential road that is being used as a "rat run" to get into Tunbridge Wells and beyond due to the congested A26.

Parking is often an issue and the road is forever being resurfaced (due again 17th -19th may) due to over use The new development does not give consideation to the already exhausted infrastructure.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am writing with respect to the plan for a huge scale development in the south side of the town, around A12 and adjacent areas.

I strongly recommend that the number of proposed dwellings is reduced for reasons highlighted below. I do, however, appreciate the need to use brownfield rather than greenfield sites for development and strongly object to any further development of green field sites, such as the field adjoining the Ramslye estate.

1. There is currently a complete lack of cycling paths, safe cycling routes from this end of town into the centre. Any proposal would need to be a linked up plan, not just a box ticking one which takes a cyclist further away from their destination.
2. The current traffic in the area is already heavy and often at a standstill in the mornings/evenings. There is no proposal to support any changes to this, no vision of how to improve the local traffic conditions or how to reduce pollution and its health impacts on the local community.
3. There are very few safe crossing points in the area - to support pedestrians/non car users.
4. Additional traffic will impact the green spaces that are to remain.
5. Housing that has recently been built in other areas does not appear to be of sustainable, low energy type. Green space designated in these areas for playgrounds are minimal. Cars and garages dominate.

Given the imperative to reduce our carbon footprints, CO₂ emissions and environmental impact, I query where the real sustainability and vision for a cleaner, safer, environmentally friendly plan is.

I would strongly recommend a genuine review to help address these points.

Question 1	
Respondent's Name and/or Organisation	Joanna Mackenzie
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 Strategy for Paddock Wood, including land at East Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I have lived in Paddock Wood since 2005, 16 years. Before that I lived in Brenchley. I live with my husband of 14 years and our 8 year old twins who attend Paddock Wood Primary Academy. Prior to Covid-19 my husband owned and worked in the Print Shop on Commercial Road. I work for a company in Tunbridge Wells and I got the train to and from Tunbridge Wells.

I disagree with so many aspects of this sections of the Draft Local Plan for Paddock Wood that I have not known where to start.

The current Infrastructure is not viable. I walk around Paddock Wood at least three times a day between my home in Hunters Chase, Paddock Wood Primary and the town centre. I also walk around the local countryside with my dog. The traffic increase I have seen, even from Mascalls Grange is hugely noticeable. How will Paddock Wood will cope with the increase in traffic from the builders/contractors as well as the home owners? I actually, do not know.

There will not be enough seats on trains (and there's an issue with length of platform so the rail company will not be able to just add more carriages.) Network Rail have suggested they will not increase the width of the current road bridge - indeed this bridge has been mentioned in vehicle access over the railway bridge except for bus services (201124_LCWIP+ Final Report, Page 56 4.12). Paddock Wood and it's residents as well as the ambulances and lorries which rely on Maidstone Road will grind to a halt. Badsell Road floods often during the autumn and winter months, so I am not sure where the traffic will go? Paddock Wood is surrounded by country roads and simply will not cope with the increase in traffic.

Paddock Wood has one primary school. The school planned for Mascalls Grange has not been built due to a low birth rate - so what will happen to the 100's of children arriving in their new homes? Capel School is a tiny village school, as is Brenchley and Matfield and Laddingford. Is there a plan for this scenario?

There has been a noticeable increase in crime locally - with drug misuse and petty crimes being noticeable. There is not a police presence and, indeed, the police station has just been demolished so we no longer have a police station in the size of town we are now; let alone the size of town we are becoming.

The draft local plan for Paddock Wood highlights areas that fall within category 2 and 3a flood risk areas. Residents in East Paddock Wood have had to spend thousands of pounds purchasing their own pumps due to regularity of flooding down Castle Hill, Mile Oak Road and Queen Street. These areas are currently surrounded by apple orchards and blackcurrant fields which are assisting to disperse the run-off, but if these are developed the situation will be exacerbated.

Paddock Wood Surgery is already severely oversubscribed. Within the past few years the radius was extended towards Pembury and with the sudden growth within Paddock Wood from Mascalls Grange Estate plus the building of Foal Hurst Green and Church Farm Estate means that trying to get an

appointment is almost impossible. Regarding the health of Paddock Wood, I know there has been an increase in breathing issues locally with the increase in traffic and dust created by the building developments surrounding Paddock Wood; let alone the increase in traffic.

I feel passionately about Paddock Wood and its residents. Paddock Wood simply can not handle the amount of houses planned for it. It is as simple as that - the Infrastructure is simply not there. I feel incredibly sad that the next 15-20 years will consist of dust, lorries, work trucks and a vast increase in traffic.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel, the latter being in the Borough. In addition the processing plant and the entrance and egress to the site is located in Capel. The omission of a statement giving the above information raises the question as to whether the implications of future quarrying together with Tudeley Garden Village and expansion in East Capel have been fully considered

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Wording in Para 1.7

Omit "at Hadlow"

Add new sentence "Stonecastle Farm Quarry is in three Parishes - Hadlow, East Peckham and Capel, the latter being in the Borough. In addition the processing plant and the entrance and egress to the site is located in Capel. "

An impact assessment is required to investigate the implications of the combined effects of the proposed quarrying, building and the associated infrastructure upon:

Travel including active travel routes, ramblers, horse riders

Landscape and vistas

Biodiversity

Flooding

Pollution – sound, water and air

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To explain and answer questions on the above

I have been actively involved in the whole question of the quarrying at the request of local residents including chairing liaison meetings between the quarry operator, local representatives and residents and attending public mineral hearing

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please see Question 6

[TWBC: comments below for ease of reference]

Wording in Para 1.7

Omit "at Hadlow"

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils
A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans show different areas for development at the East End and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLPComments) (see web link)

. Looking at the issue in terms of its hectareage:

- according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS:DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP _ 4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane/ Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane/Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN 1 para 9 requiring the effective engagement of the local community, neighbours of sites and others)
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments". For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called " Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out before allocation (see TWFDLP Comments DLP 4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment prior to the allocations being adopted."

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- . offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a cafe at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_ 4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed" . As for the cafe, BHS states in its comments on the LP that the cafe is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed.

The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC

Guidelines (para 4.3.5 .)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see OLP _3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the L WS at the hospital is of less value than the rest. Further, we now know from

(see web link).

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the L WS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3 .17. "In addition, as highlighted in paragraph 3 .13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (L WS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the L WS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> ' and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr William Macpherson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.420 & 5.421

Policy No. AL/BE1 - Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 - Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 - Land at Benenden Hospital (south of Goddards Green Road) East End

Policy AL/BE4 - Land at Benenden Hospital (north of Goddards Green Road), east End

Sustainability Appraisal

Inset Map 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_880, PSLP_911 and PSLP_913]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils
A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans show different areas for development at the East End and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLPComments) (see web link)

- . Looking at the issue in terms of its hectareage:
- according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha;
 - according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS:DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP _ 4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane/ Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane/Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN 1 para 9 requiring the effective engagement of the local community, neighbours of sites and others)
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments". For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called " Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out before allocation (see TWFDLP Comments DLP 4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment prior to the allocations being adopted."

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- . offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a cafe at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_ 4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed" . As for the cafe, BHS states in its comments on the LP that the cafe is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed.

The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC

Guidelines (para 4.3.5 .)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see OLP _3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the L WS at the hospital is of less value than the rest. Further, we now know from

(see web link.)

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the L WS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3 .17. "In addition, as highlighted in paragraph 3 .13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (L WS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the L WS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> ' and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr William Macpherson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.420 & 5.421

Policy No. AL/BE1 - Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 - Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 - Land at Benenden Hospital (south of Goddards Green Road) East End

Policy AL/BE4 - Land at Benenden Hospital (north of Goddards Green Road), east End

Sustainability Appraisal

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_880, PSLP_911 and PSLP_913]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils
A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans show different areas for development at the East End and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLPComments) (see web link)

- . Looking at the issue in terms of its hectareage:
- according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha;
 - according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS:DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP _ 4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane/ Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane/Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN 1 para 9 requiring the effective engagement of the local community, neighbours of sites and others)
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments". For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called " Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out before allocation (see TWFDLP Comments DLP 4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment prior to the allocations being adopted."

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- . offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a cafe at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_ 4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed" . As for the cafe, BHS states in its comments on the LP that the cafe is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed.

The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC

Guidelines (para 4.3.5 .)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see OLP _3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the L WS at the hospital is of less value than the rest. Further, we now know from

(see web link).

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the L WS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3 .17. "In addition, as highlighted in paragraph 3 .13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (L WS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the L WS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> ' and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

re: Greenfields Farm, Paddock Wood

The site selected for a permanent Gypsy and Traveller site is completely unsuitable in this location. Old Hay is a privately owned single-track concrete road comprising businesses and a few private dwellings.

The road barely copes with the amount of traffic that already uses it and there are no pedestrian ways at all.

Old Hay is only connected at one end, to Pearsons Green Road which is a narrow country lane again with no pedestrian ways.

There are no facilities in this road, such as street lighting or CCTV.

The electricity supply is already at the limit of what is available.

There is no mains drainage in the road. Any failure of a large private system could cause major environmental damage to the surrounding fields and water courses.

It is therefore completely unsuitable for any further large scale domestic expansion.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This proposal needs to be removed completely from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Thank you for consulting Maidstone Borough Council (MBC) on the draft Tunbridge Wells Borough Local Plan (TWBLP). Maidstone Borough Council's comments on the draft plan are detailed below.

Duty to cooperate

The Localism Act 2011 places a legal duty on planning authorities to engage constructively, actively, and on an ongoing basis, to ensure the effectiveness of Local Plan preparation in relation to strategic, cross-boundary issues. Effective and on-going joint working between strategic policy-making authorities is integral to the production of a positively prepared and justified strategy. MBC formally responded to Tunbridge Wells Borough Council's (TWBC) previous Local Plan consultations in 2017 and 2019 and has continued to be informed of, and involved in, the preparation of the most recent draft Local Plan (the subject of this formal consultation) through regular officer-level meetings. This includes meetings to consider the proposed larger settlements/garden communities. Additionally, in March 2021 MBC and TWBC agreed a statement of common ground to accompany the TWBC Regulation 19 consultation.

MBC therefore considers that the duty to cooperate in plan-making between the two authorities has been satisfied and that cooperation is ongoing.

I hope these comments are helpful and look forward to continuing, constructive dialogue on strategic, cross boundary issues as part of the duty to cooperate as our respective Local Plans progress.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Thank you for consulting Maidstone Borough Council (MBC) on the draft Tunbridge Wells Borough Local Plan (TWBLP). Maidstone Borough Council's comments on the draft plan are detailed below.

Strategic issues

The following sections set out our comments on the Local Plan.

Housing

The standard methodology identifies a need for 12,204 new dwellings for the plan period from 2020 to 2038. MBC recognises that the draft TWLP proposes to fully meet this identified need over the plan period, and that TWBC are not expecting any other authorities, including MBC, to accommodate any unmet need. Additionally, we note that TWBC is seeking to meet its gypsy pitch need. This approach is fully supported. Similarly, MBC acknowledges the indication in the draft TWBLP that there is limited ability for TWBC to meet any unmet housing needs from other councils. MBC is planning to meet its own need without the need to seek to accommodate any unmet need from TWBC.

The proposed spatial strategy is one of a dispersed growth approach, with site allocations in the majority of the settlements across the borough. In addition, proposals are included for a new garden settlement in Tudeley and the expansion of Capel and Paddock Wood. This expansion is directly to the south of MBC's administrative boundary and therefore has the greatest potential effect on Maidstone Borough. The matter will be discussed further under the heading Policy STR/SS 1, below [TWBC: see PSLP_2260].

Employment

The strategy for employment growth and allocation of at least 14 hectares of land (approximately 120,000sqm) for employment use remains based on the Sevenoaks and Tunbridge Wells Economic Needs Study dated 2016. However, the strategy and quantum of land allocated to meet the borough's employment needs predominantly through extensions of the defined Key Employment Areas (KEAs) remains a logical and sensible approach which is supported by MBC. The expansion of the KEA around Maidstone Road and Paddock Wood may indeed offer opportunities for residents and businesses particularly in the south of Maidstone to utilise the planned employment offering.

MBC raises no further comments or objections in relation to the overall approach to employment.

Retail

The uncertainty surrounding the retail sector both nationally and more locally is recognised in the pre-submission Plan. MBC fully supports the flexible approach to uses in the town and other centres, including greater focus on the leisure and culture offer.

MBC is pleased to note that the 2017 Retail and Leisure Study has been updated for 2021 (RCLTCU Study 2021), recognising the current state of change within the wider retail market. This ensures that, as far as possible, the most accurate amount of floorspace is allocated for retail and leisure uses based on up-to-date evidence at the point of submission. In this particular case, the evidence does not identify a need for any allocation of land for convenience or comparison floorspace – with a focus instead on

reuse of vacant floorspace and bolstering of existing units. MBC supports this approach – particularly in the short term – but suggests that this is kept under regular review to ensure sufficient floorspace remains available to meet needs over the plan period.

MBC raises no further comments or objections in relation to the overall approach to retail.

Landscape and Green Belt.

We note that TWBC have undertaken a range of studies to consider the impact of the strategy on the AONB and the release of land in the Metropolitan Green Belt.

Flooding

The SFRA identifies that areas to the north of Paddock Wood are particularly prone to flooding. As before, MBC raises no issue with the principle of the expansion of Paddock Wood on the provision that the expansion can be suitably accommodated without further risk of flooding to the surrounding areas of Maidstone Borough, and that betterment can and will be provided in these locations where appropriate. MBC raises no further comments or objections in relation to the overall approach to flooding and flood risk mitigation.

Infrastructure and connectivity

As per the previous TWBC draft Plan consultation (Regulation 18), the growth strategy remains based on the premise of infrastructure-led development to ensure that essential infrastructure and connectivity is integral to all new development. MBC strongly supports this approach to delivering growth, particularly the emphasis on ensuring that sufficient infrastructure capacity is either available or can be provided in time to serve new development (criterion 5, policy STR5).

Transport

The strategy in relation to transport and parking intends to prioritise active and sustainable modes of transport, whilst recognising that private car ownership in the borough is currently very high and that sufficient levels of parking should be provided.

The draft Plan is supported by an Infrastructure Delivery Plan and a Transport Strategy. The following transport schemes are those which are considered necessary to support the growth identified in the plan which are relevant to Maidstone borough:

- Improved A228 Maidstone Road/Whetsted Road priority junction
- Improved A228/Whetsted Road/A228 Branbridges Road/B2160 Maidstone Road roundabout
- Improved B2160 Maidstone Road/Commercial Road priority junction

MBC recognises the need for and supports these highways improvements and will continue to engage with TWBC to assess their impacts as part of the duty to cooperate process.

In the interest of joined-up, cohesive planning, any opportunities to extend and/or join up active travel and public transport options beyond administrative boundaries, into Maidstone Borough – where sensible and feasible to do so – should be explored at all stages of the masterplanning process for the extension of Paddock Wood.

MBC raises no further comments or objections in relation to the overall approach to transport.

I hope these comments are helpful and look forward to continuing, constructive dialogue on strategic, cross boundary issues as part of the duty to cooperate as our respective Local Plans progress.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for consulting Maidstone Borough Council (MBC) on the draft Tunbridge Wells Borough Local Plan (TWBLP). Maidstone Borough Council's comments on the draft plan are detailed below.

The strategy for Paddock Wood, including land at east Capel (policy STR/SS 1)

It is noted that the expansion of Paddock Wood (including land at east Capel) will seek to follow Garden Settlement principles and provide flood risk solutions. The Council-led approach to masterplanning the area, which is to take the form of SPD, is also noted. MBC will of course continue to engage in the regular Strategic Sites Working Group meetings as the masterplan SPD progresses.

Policy STR/SS1 details the strategy for development at Paddock Wood and east Capel, including approximately 3,490-3,590 dwellings; 3 neighbourhood centres providing approximately 2,000sqm total; and other associated infrastructure to serve the local needs. Proposals for piecemeal development will be resisted. The overall policy approach is considered to be suitably comprehensive and MBC raises no further comments or objections in this regard.

I hope these comments are helpful and look forward to continuing, constructive dialogue on strategic, cross boundary issues as part of the duty to cooperate as our respective Local Plans progress.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Consultation Point	Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road (View)
Status	Processed
Submission Type	Web
Version	0.1
Question 1	
Respondent's Name and/or Organisation	Gregory and Kimberley Major
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraphs 5.47 to 5.5	
Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We OBJECT to the new Policy AL/RTW5 that was introduced into the PSLP at stage 19 of the Local Plan delivery process. Namely the removal of Green Belt land, at former Caenwood farm to the south of Speldhurst Road and west of Reynolds Lane.

We recently moved and will be directly adjacent to and on the same side of the road as the proposed development.

We object for the following reasons:

Loss of Green belt

We are disappointed that the change of use of this Green Belt has gone through with minimal public consultation and that counsellors were not given the correct amount of time to consider this proposal fully before the vote. This land is fundamental in terms of preventing sprawl of built-up areas and plays a key role in the separation of Tunbridge Wells and Southborough.

The lack of public consultation and the quick timescale of the proposal has resulted in poor visibility of such change. Having only moved here in December 2020, our survey did not show the downgrading of the Green Belt land. Being aware of this would have impacted our decision to move.

Loss of natural habitat

The land for which the proposed development covers hosts a variety of wildlife. Which would sadly be negatively impacted if the development were to go ahead. The land also surrounds and protects the Ancient woodland. It hosts a huge amount of wildlife including badgers, rabbits, deers, bats, foxes, buzzards, owls, field mice, great spotted woodpecker, green woodpecker, goldfinches, Jays, bullfinches, chaffinches, greenfinches, red wings, long tailed tits, blue tits, great tits, coal tits, marsh tits, willow tits, starlings, nuthatches, treecreepers, siskins, goldcrests, song thrush, dunnocks, robins, and wrens. Along with bees, butterflies and insects the proposed development would have a significantly detrimental impact on such species. We fear also that the downgrading of the Green Belt will add pressure to change the classification of the remaining land further exacerbating the loss of valuable countryside.

Traffic & pollution

The proposed development would create a severe impact on traffic on Speldhurst Road along with St. Johns Road. Cars are often at a standstill (idling) during peak hours which prevents us from getting in and out of our drive and greatly increases air pollution. The additional volume of traffic that will be added as a result of the planned dwellings will no doubt add to an already stressed transport network. We do not accept that the planned widening of the road will negate the issue. Moreover, the widening of the road seems to be in direct opposition of maintaining the trees and hedgerows that have TPOs. The infrastructure of Southborough town cannot handle such increase in vehicles.

Oversubscribed healthcare

Having recently moved here we were able to register at St. Andrews doctors. However, the ability to make an appointment is near enough impossible, we have not even been able to call the surgery – the line is always busy. We have seen and heard many complaints about local residents not being able to get an appointment.

Local dentists are also an issue, we have been unable to register with an NHS practice for our entire family including our 1 year old as a result of over subscription.

Adding another 100 houses will amplify this issue considerably and put peoples health at risk.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To withdraw this policy from the plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

We strongly object to Green belt status being removed from Caenwood Farm site.

We object because this is the last Green belt land separating Tunbridge Wells and Southborough. We strongly protest against the loss of Country side protecting against urban sprawl and consequently the loss and disruption of a plethora of wild life, Badgers, Foxes, Buzzards, deer, Marsh tits, Siskin, Long tailed tits just to mention a few.

We protest against the felling of trees with Tpo's the length of Speldhurst Road. I was born, I worked and lived my life in Southborough it is always waterlogged.

We protest about the increase in traffic flow adding to the historic problems in Speldhurst Road and the A26 where the traffic is usually stationary, resulting in increased traffic that will have a negative affect on already high pollution levels and poor air quality.

We have lived in our property in Reynolds Lane for 34 years and enjoyed wonderful views across the fields overlooking Rushall, The development of Caenwood Farm will completely obliterate this view ! There for we strongly object to said proposal.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

---------------------------------------	----------------

Question 2

Agent's Name and Organisation (if applicable)	NA
---	----

Question 3

To which part of the Local Plan does this representation relate?	Policies Map
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policies Map Numbers 04, 07,08 and 09.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound	No
----------	----

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The LP is unsustainable on the basis of population increase which is projected from 2452 people to 13700 in Capel alone. The use of private cars and vehicles will be detrimental to the environment. Proper consideration has not been given to the lack of infrastructure in the way of medical facilities, schools and transport in an area already struggling with busy and unsuitable roads. TWBC is not reacting in ways the local community need issues to be dealt with. For instance in the case of Hartlake Road as one example they have suggested that they will close it. That is not a proper solution as anyone local knows it is a regularly used road taking traffic off of the other routes through to Tonbridge and Tudeley/FOG.

It seems to me that community engagement has not entirely been effective and local community concerns are being sidelined. Proper consideration has not been given to very real concerns expressed about building on flood plains and problems which may result in moving more water downstream to Yalding, Tonbridge and beyond. Issues well documented in local and national press.

We need to protect our Green Belt and prevent urban sprawl in what is essentially a rural setting. The character of this area will be destroyed forever along with the biodiversity of the habitats and the beautiful views. All Saints Church in Tudeley is a national tourist attraction because of the very special Chagall Windows. Kent is known as the garden of England but this LP is destroying so much character and beauty and once it is gone it will never be the same again.

We talk of protecting our environment and biodiversity but this plan represents destruction on a grand scale. There should not be any building on Green Belt land as it is there to prevent urban sprawl.

Furthermore, Tonbridge and Malling are opposed to this scheme on the basis it will overload the infrastructure and have conceded the points raised in previous objections but TWBC are not properly considering the impact on Tonbridge and Malling.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Consider Brownfield and alternative sites like Castle Hill or vacant sites and offices in Tunbridge Wells. Do not build on the Green Belt and flood plains. The Site Allocation LP 2016 did not accept a need to build on the Green Belt. Don't destroy a rural Green Belt parish.

Properly consult on infrastructure, environmental and pollution issues and actively find real solutions.

Work with Capel PC and Tonbridge and Malling BC and address all the problems.

Use logic and balance in decisions rather than imposing 51% of LP housing on Capel parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)
---	---

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I have to say I find it a real concern that this form completion is incredibly hard and very easy to complete wrongly let alone creating an account and the whole process of making objections. I was employed as a Lawyer for 10 years and my Son is a Graduate and we have both struggled. How can this be a fair process in terms of the considerations and objections that need to be made by local people. I cannot see that a lot of people will engage they would simply not be able to manage to complete and understand these forms the disabled, the elderly, people who are poorly educated and even educated people. This feels a very unfair process and certainly not a democratic process. The form needs to be set out more simply and be more understandable to ordinary citizens just as Lawyers learned to use more simple and understandable language when dealing with their clients.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This land is Green Belt land and should only be built upon if an “exceptional circumstance” exists. TWBC’s own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan’s aims without using the Green Belt land at East Capel. There is thus no need to further threaten the Green Belt land within the parish of Capel. My comments on STR SS1 about the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land’s use as a flood plain. Building here, even with flood risk mitigation and “betterment” could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the growing impact of climate change for current and future generations.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

I have lived in Five Oak Green my entire life, that is 39 years. The surrounding countryside has meant not just a space for safe recreation, exploration and relaxation, but a working environment too. My work as a stock photographer has led to me photographing everything from the macro of rolling landscapes and agricultural land to the micro details of the diverse flora and fauna in this area.

I wish to make it clear that this is not a simple case of "NIMBYism", as I'm sure cynics could regard my objections – and indeed those of the hundreds of people in the area who have been attending the Save Capel meetings and displaying posters, car stickers and banners in support of the campaign.

I understand the need for new development, but it should be done in a sustainable, sensitive way. This sudden, crass onslaught of development over Green Belt land is neither of those things. What happened to Green Belt land acting as protection between developments, to keep corridors of nature, "lungs" for the land? In the time of COVID-19, the ability to get out into the countryside for a break, to meet up with a friend as the restrictions begin to ease, and to get exercise has been an enormous boost to people's mental and physical health. Where would this solace be found if the natural world continues to be gobbled up by development? The proposed development in Tudeley and East Capel will merge Tudeley, Five Oak Green and Paddock Wood into one enormous settlement, changing the landscape forever. There could surely be more use of brown field sites, as well as proposals for pockets of development, rather than one whole new town, slap bang in the middle of Green Belt land and on the outskirts of the AONB.

There doesn't seem to have been much basic thought given beyond the convenience of one landowner offering a huge swathe of their land. One example of a basic flaw in the plan would be surrounding All Saints' Church and its world-famous Chagall stained glass windows with a modern residential development. Currently the church sits next to a few cottages, barn conversions and an oast house conversion. A beautiful snapshot of the Garden of England. Beyond the church lies a public footpath, rolling farm fields, trees, hedgerows and a view all the way to Hadlow Tower (which can also be seen from the road). The church and its windows draw visitors from across the globe and has been a compulsory stopping point when taking friends from overseas on a tour of my home area. Preservation of this piece of history should include preservation of its environment too.

There's a proposal for roads and a bike path across the landscape. This isn't the flat landscape of Norfolk, so if you want a usable bike path that's not too vertiginous, you're not going to be using the land sensitively. The only way to make a bike path accessible is to carve it into terrain to even out its gradient, thus destroying the medieval landscape.

Quite aside from the disruption caused in the construction phase, there will be a significant increase in traffic in to Tonbridge from the B2017 as these thousands of houses become inhabited – the new residents bringing with them their cars and need to commute, exacerbating the extreme traffic congestion that exists on this road every morning. There are already unacceptable levels of traffic between 7.45am to 9am on Woodgate Way, Vale Road and Pembury Road, while in Five Oak Green, the B2017 becomes

jam-packed when the primary school's day begins and ends, with parents parking their cars along the road and up Church Lane. It makes an absolute mockery of the proposal to add a new 6 form entry senior school (and all the traffic that would go with it) next door to the primary school.

Network Rail has confirmed that a station at Tudeley is not viable at present and so will not be built in this plan period. People living in Tudeley would therefore use Tonbridge Station for commuting and Tonbridge town services that will require more parking. The increase in traffic will be more than Tonbridge can cope with. Its roads are already full at peak times and can't be made wider in most places. The increased numbers of passengers on already packed commuter trains from Tonbridge Station will be unsustainable. Parking in and around Tonbridge Station will be even more difficult than it presently is.

Most people living in the proposed new garden settlements will drive privately owned cars, despite initiatives to encourage bus and bicycle use. It's hard to imagine a great increase in bus use, when current settlements are only served by hourly buses. The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. It is not surprising that Tonbridge & Malling council has serious concerns about the proposals in the Local Plan.

The cost to Tonbridge-based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is so much closer.

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change on the area and its residents. Flood mitigation measures may help, but I believe that flood risks will increase. It is generally understood that covering open land with houses and roads increases the risk of flooding and decreases opportunities for draining and evaporation. Five Oak Green already has its own flooding concerns – check the height of the doorsteps in Ellis Close if you'd like a visual reminder of this – and decreasing opportunities for drainage in the surrounding landscape is a thoughtless idea. The Medway will flood more often and cause increased flood risk not just in my village, but in Tudeley, Golden Green, East Peckham, Tonbridge and Yalding.

In currently relatively sparsely-populated land, where clusters of houses line the roads, light and sound pollution is low. Throw in a couple of thousand residences (along with possible compulsory purchase orders for existing residents in long-established residences) and a secondary school and there will be a huge increase in air, light and noise pollution that will not just affect the tranquillity of Capel, but also spread across the boundary in to Tonbridge & Malling and create a visual scar across the landscape. The recent reports of tremendous light and noise pollution from the lorry park at Ashford show just what an effect this can have on residents and on the night sky. Once again, the protection and breathing space for man and beast offered by the Green Belt is kicked to the side with apparently no thought. Placing such a heavy burden of development in just one rural area must be reconsidered.

The parish currently has 950 houses and so the sheer number of new houses being placed together is difficult to comprehend. The idea that all this land is being offered by one landowner – who stunningly, then talks about managing the development of the land too if the Local Plan goes ahead in its current form – rings alarm bells. Where is the opportunity for other landowners to offer areas of land for development? The perceived ease of dealing with one landowner and one great block of land should not outweigh the value of reducing the density of the development across the borough and of allowing other landowners the benefit of a slice of the business.

The housing need calculated by the government can be reduced where it would require development of Green Belt land, unless “exceptional circumstances” exist. With brownfield sites available locally and the strong local objection to such a massive development, I would like to see TWBC use this argument of being unable to build on Green Belt land to remove the garden settlement at Tudeley from the Local Plan. TWBC should be looking to protect what is within its borough, not sacrificing a chunk of it.

While there is a mention of affordable housing and social housing in the Local Plan leaflet, there is no suggestion of the proportion of houses built to answer such need. All too often new development is undertaken to reap the highest profits and not with any regard as to whom it could benefit – see the two large new build houses in the middle of Five Oak Green, which stood empty for more than 12 months.

It is incomprehensible why TWBC is placing such a huge new development in one parish, rather than working with multiple landowners to provide sensitive areas of development to extend existing settlements in a sustainable manner, and using existing brownfield sites, in order to spread the impact of development across the borough. There is no sense of proportion in the Local Plan as it stands.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Five Oak Green for 43 years and am dismayed at the proposals for land at East Capel. This is Green Belt land and should only be built upon if an "exceptional circumstance" exists. TWBC's own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel. It will merely facilitate the creation of a conurbation from Paddock Wood right across to Tonbridge and complete the destruction of a rural parish rich in heritage, agriculture and natural habitat.

The land is used as a flood plain and as such is not recommended for housing. Building here, even with flood risk mitigation could have disastrous consequences. The measures being looked at are not based on current data and do not fully consider the impact of climate change. There is no advantage to anybody in pursuing development in this area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- . Yes, I wish to be notified of future stages of the Local Plan

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Five Oak Green for 43 years and apart from an apparently uncontrollable increase in lorry traffic, I have seen the development of the village progress in a sustainable way. Additional housing has grown up of course, but has not made an adverse impact on the community and in many cases has replaced or extended old dwellings or been built on rundown areas. However I strongly object to the plan now before you in all aspects.

TWBC's Draft Local Plan was a disaster for Capel parish and vigorously opposed. However the council chose to take no account of the strength of objections, or to consider alternatives and proceeded to take the plan forward to Regulation 19. The local elections in May confirmed the depth of feeling in Capel ward when the Liberal Democrat candidate, who has worked tirelessly against the proposals since they first became public, was returned with a 75% share of the vote. The incumbent who was perceived to be very lukewarm in looking after the local interests, only managed 20%.

The proposal to build on this beautiful Green Belt valley, rich in woodland, hedgerows, meadows and farmland, adjacent to an AONB, flies in the face of all that we are being urged to value as a place to help reduce the impact of climate change and promote the mental and physical health of the population. There is no need for this area to be built on, it should remain rural and the agricultural land is now more important than ever. TWBC should be protecting this heritage for the future: instead they have chosen the lazy option of dealing with one landowner and dismissing other viable areas for development. The mission statement of the estate of said landowner makes interesting reading.

"An ongoing commitment to wildlife conservation, stewardship and ecological enhancement sits at the heart of our vision for the long term management of the Estate. This commitment includes a wide variety of landscapes and habitats, from Medway valley meadows and fields, interspersed with woodland and streams to higher forested ridges. We are proud of the Estate's diversity and the many species of birds, mammals, reptiles, insects and plants that live here." (hadlow.com)

Fine words indeed, which make putting this land forward for development on this scale even more hypocritical and objectionable.

Green Belt land is designated to prevent building sprawl and provide breathing space between urban areas. If the plans for Capel parish go ahead, TWBC will needlessly destroy acres of beautiful countryside and achieve the coalescence of Tonbridge and Paddock Wood. An ugly urban sprawl, with years of chaos and disruption for local people and businesses while this is put into effect. This will have a hugely detrimental impact on the area in terms of permanent loss of agricultural wildlife habitat, damage to biodiversity, air quality, light pollution and massive increase in carbon footprint. The fact that the area is already a flood plain only seems to elicit a shrug of the shoulders and no viable measures to deal with it. There is potential for serious flooding in the parish and in the surrounding areas of Tonbridge, Yalding, Golden Green and East Peckham. The impact of climate change must be given serious consideration.

The idea that a small rural parish on the edge of the borough, 2% of the borough's population, should be forced to absorb 51% of the perceived housing requirement is illogical, unbalanced and unsustainable. The question remains as to how this need was calculated; current figures are lower than those used by the council. Who are these houses for exactly? The priority should be to meet local needs at prices local people of all age groups, at whatever stages of their lives, should be able to afford. Too many developments emphasise the 4/5 bedroom executive type dwellings, forgetting those who might need a small flat, a 2 bedroom house, someone with a disability who might like some independence. There is no evidence of a likely positive outcome or clear goals for the benefit of the people of the borough and least of all for the residents of Capel parish.

The implication is that these houses will be for people who work outside the area and who will be commuting. The recent pandemic has shown that working from home is not an impossibility, but the added burden of another 13,000 people using the local infrastructure will impinge particularly on Tonbridge, as the nearest local town, not Tunbridge Wells. Tonbridge already struggles with commuter chaos, crowded trains, parking problems and there will be added pressure on health services, schools and local amenities. In the meantime TWBC will collect the Council Tax.

Due consideration has not been given to the possibility of using other available sites. Brownfield sites, council owned buildings no longer used for the original purpose and a site at Castle Hill, close to the A21 could supply the housing required. The council seems fixated on destroying Capel parish. The council leader has already told Save Capel "You will never win". It begins to feel personal and vindictive in the extreme and I hope the inspector will be able to clearly see that this plan is unsustainable and the proposals for this site should be dismissed. Tudeley garden village should never have reached this stage.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There has not been adequate cooperation with the neighbouring authorities. For Benenden East End this is particularly relevant as the community is, *de facto*, more part of Biddenden (Ashford BC) parish than of Benenden. Biddenden PC's letter of 19th April 2021, to the Independent Examiner, states many of the issues of concern which have not been addressed. The impression, expressed in the letter, that Benenden's Neighbourhood Plan is an attempt to push any imposed development out from the village is one which many East End residents will share.

Benenden is the only parish in the borough to have made its own NDP allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making "modifications to the LP" so that it matches the BNP

The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

By adopting the BNP within it, the Local Plan is not positively prepared.

The proposed allocations on the hospital owned land are not well located and will not deliver sustainable development. They will not meet the NPPF (para. 68) requirement to *locate housing where it will enhance or maintain the viability of rural communities*; there are several more suitable sites within the village of Benenden. The hospital site is also too isolated from either Benenden or Biddenden to meet the NPF advice that *development may support services in a village nearby*.

The Plan is not sound as it is based on incorrect facts; for example.

Staplehurst is not the nearest railway station to East End. At 6.7 miles, Headcorn is physically nearest, (9 minutes by car. Ref. Google Maps). Staplehurst and Etchingham are 18 and 23 minutes respectively; existing rail travellers from East End make for Headcorn, over the Castleton's Oak crossroads and there is no reason to assume that new residents would do anything significantly different.

There is no publicly accessible shop at East End; anything in the hospital is for employees and patients only. There is no regular public transport. There is no day nursery.

The reference to sites at East End as "Brownfield" (para. 5.448 and others) is inaccurate and misleading. There are no TWBC registered brownfield sites at East End. The terms brownfield and greenfield carry emotive baggage to lay people and should not be used inaccurately. Previous representations have been made with respect to these inaccuracies yet they still remain in the Local Plan.

The discrepancy between the NPPF housing allocation and the population growth projected by the ONS cannot be justified; the NPPF imposes a requirement of 12200 additional dwellings across the Borough over the planning period, whereas the ONS projection is for a population increase of 6155. Using a census average of 2.4 people per household, the housing requirement would be for only 2565.

Council Tax payers expect and deserve that their Council would robustly reject the imposition of 9635, apparently unnecessary, extra houses which seems to have no logic behind it. Neither is the Vale of Kent suited to take on shortfalls from any neighbouring borough's unwillingness or inability to meet their own allocations; being already heavily populated for a largely rural area and with extensive areas at a high flood risk. Flood management can only do so much, even without the uncertainties of a changing climate. TWBC should be actively campaigning to reduce this number rather than trying to support unsustainable and unpopular developments.

Policies AL/BE 3 & 4 are not realistic and the implied reliance on Benenden Hospital's contribution to the requirements is not justified. Over preceding decades the Hospital has withdrawn from, rather than expanded its local involvement. The shop and post office, a polling station, sharing social activities and assistance with transport are examples of this. The very existence of the need for this list of requirements, in itself, raises questions of the suitability of the site for the proposed development. With this in mind, it seems unreasonable to expect that a developer would be willing to meet the cost of such infrastructure and the Plan does not address how a robust and sustainable system could be created.

There are significant differences between the BNP and the PSLP in the extent and precise areas of the land to be developed. For example; **AL/BE3** excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan? As it exists, the Local Plan cannot guarantee to prevent an adverse impact on local wildlife sites.

The visual impact, from the AONB, of further development at the hospital site may be significant. The site is on a ridge following Goddards Green Road and the existing recent development of hospital buildings is highly visible when facing north from the AONB. Further development is likely to increase this impact as both the Hospital and the SEQ housing allocation are within an enclave which intrudes into the general line of the AONB.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, sheltered housing, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school; in better accordance with the NPPF requirements and advice. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	No, I do not wish to participate in examination hearing session(s)
---	--

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There has not been adequate cooperation with the neighbouring authorities. For Benenden East End this is particularly relevant as the community is, *de facto*, more part of Biddenden (Ashford BC) parish than of Benenden. Biddenden PC's letter of 19th April 2021, to the Independent Examiner, states many of the issues of concern which have not been addressed. The impression, expressed in the letter, that Benenden's Neighbourhood Plan is an attempt to push any imposed development out from the village is one which many East End residents will share.

Benenden is the only parish in the borough to have made its own NDP allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making "modifications to the LP" so that it matches the BNP

The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before* See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

By adopting the BNP within it, the Local Plan is not positively prepared.

The proposed allocations on the hospital owned land are not well located and will not deliver sustainable development. They will not meet the NPPF (para. 68) requirement to *locate housing where it will enhance or maintain the viability of rural communities*; there are several more suitable sites within the village of Benenden. The hospital site is also too isolated from either Benenden or Biddenden to meet the NPF advice that *development may support services in a village nearby*.

The Plan is not sound as it is based on incorrect facts; for example.

Staplehurst is not the nearest railway station to East End. At 6.7 miles, Headcorn is physically nearest, (9 minutes by car. Ref. Google Maps). Staplehurst and Etchingham are 18 and 23 minutes respectively; existing rail travellers from East End make for Headcorn, over the Castleton's Oak crossroads and there is no reason to assume that new residents would do anything significantly different.

There is no publicly accessible shop at East End; anything in the hospital is for employees and patients only. There is no regular public transport. There is no day nursery.

The reference to sites at East End as "Brownfield" (para. 5.448 and others) is inaccurate and misleading. There are no TWBC registered brownfield sites at East End. The terms brownfield and greenfield carry emotive baggage to lay people and should not be used inaccurately. Previous representations have been made with respect to these inaccuracies yet they still remain in the Local Plan.

The discrepancy between the NPPF housing allocation and the population growth projected by the ONS cannot be justified; the NPPF imposes a requirement of 12200 additional dwellings across the Borough over the planning period, whereas the ONS projection is for a population increase of 6155. Using a census average of 2.4 people per household, the housing requirement would be for only 2565.

Council Tax payers expect and deserve that their Council would robustly reject the imposition of 9635, apparently unnecessary, extra houses which seems to have no logic behind it. Neither is the Vale of Kent suited to take on shortfalls from any neighbouring borough's unwillingness or inability to meet their own allocations; being already heavily populated for a largely rural area and with extensive areas at a high flood risk. Version 0.5
Question 1

Respondent's Name and/or Organisation Mrs Judith Marks

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: representation on Policy STR1 (PSLP_1246) duplicated against PSTR/BE 1 (PSLP_1800, AL/BE 3 (PSLP_1801) and AL/BE 4 (PSLP_1802)]

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4 Development Strategy Your council tax payers and the communities that make up Tunbridge Wells Borough want to protect the rural nature of the Borough, including the Green Belt and the AONB and its setting. By not challenging the national policy allocation of 12,200 dwellings (against a projected population increase of 6155 over the plan period – with average UK household size of 2.4, this amounts to 2565 households, around 20% of what has been allocated), the Borough Council is not properly representing its residents and communities. The Borough Council is elected to stand up for the communities it serves. The Council is already being asked to meet a higher need than its own population numbers indicate. They should not also be contributing towards unmet needs

4.52 Table 4 Distribution of Housing Allocations The allocation of 87-95 dwellings to Benenden is disproportionately high compared with villages of a similar size, such as Goudhurst which is allocated only 25 dwellings, or Frittenden. The NPPF Chapter 2 para 11b lays out that “strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses...” Therefore housing allocation should be objectively based on need from within the parish and not on the willingness of some landowners to profit. At the last Housing Needs Survey undertaken in Benenden a low level of requirement for additional dwellings was identified.

Benenden Parish

5.420-22 Benenden is the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published in February 2019. Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

Policy PSTR/BE1: The Limits to Built Development for Benenden village, as defined on Inset Map 17, appears to have been drawn after the proposed site allocation and specifically to accommodate those sites and exclude all others. If the policy is genuinely plan-led, the LBD should be set first and then sites within it identified. This LBD has been designed to “freeze” the village rather than allow for reasonable sustainable growth to meet local needs and support a healthy vibrant community.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for East End, yet the Friends of East End (FEE), were never asked to meet with the BNP steering group. The much trumpeted community involvement was largely restricted to the village and Iden Green. East End is on the border of the parish with Biddenden, and development there will affect Biddenden more than Benenden (see below).
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on 4 April 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB and Historic England. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before allocation*. See HE's comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. The current version of the PSLP states that the nearest stations to East End area are Staplehurst and Etchingham (5.411) when in fact the closest station is Headcorn.
- . Others may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) on behalf of Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate untrue information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to East End as a village, which it is not. East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Biddenden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would state Iden Green only.
- . In the same paragraph, the PSLP states that there is a small shop at Benenden Hospital. At one time there was a small shop for in-patients, which was available to the local community, but this closed many years ago.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden Social Services Hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week, the 24 on Tuesdays and the 299 on Wednesdays. East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent. The situation is exacerbated by increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads and continue to do so, but serious road accidents continue. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR.

Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland Farm. The AL/BE 3&4 policy fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet Inset Map 18 (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its car park. Neither chapel nor car park are in the area up for development. Incidentally, the car park shown was supposed to be temporary contractors' parking during the building of the new hospital wing and car parks, and an undertaking was made by BHS at its presentation to the local community to reinstate it to grass paddock. It can be seen that this never happened.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives, its strategies, KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden parish.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land." It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in

the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- . The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly previously developed. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to be asked provide the infrastructure at AL/BE 3&4 at some point in the future. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account. Further, we already see BHS reneging on or substantially modifying undertakings it made when planning permission was originally granted for AL/BE3 in 2013, and where no development has yet taken place.
- . Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, Transport Strategy Review Sept 2019 which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 Transport Review). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- . Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The implication is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is on the parish boundary and isolated from the village, their contribution to the local economy is negligible.
- . Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . Cycle routes: The PSLP’s standards on the public benefits of cycling and walking are based on the Cycle Strategy Supporting Document, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The Cycle Strategy states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribble Bridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see Planning Application 20/03267/FULL) will cause an increase in those factors, identified in TW Cycle Strategy, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: “The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to

TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This runs completely contrary to STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by Hankinson & Duckett (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, DLP_3458 High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has PSLP EN1 para 5. Biodiversity and geodiversity.
- . AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.
- . STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.
- . EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.
- . EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for a 3-mile active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. Ongoing maintenance costs are not included. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a Bronze Age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister Building stands a few yards to the west of AL/BE3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor development outside the Local Plan) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the crossroads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the

pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

1 Infrastructure Delivery Plan

I have carefully read the IDP March 2021, and there is no mention of any improvements to the rural infrastructure to support the proposed new growth area at East End, where there are currently no amenities and limited infrastructure. Transport and sewerage are of particular concern and impact strongly on the neighbouring parish and borough. It seems to be assumed that this is not a problem for Benenden, someone else will have to take care of it.

1 Process

As a general comment, I have found the representation process unnecessarily difficult. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'.

- . The interactive on-line site is difficult to navigate and freezes or logs itself out at regular intervals. Resetting passwords has required a telephone call as the automated process does not seem to work.
- . Inaccuracies in earlier consultation documents have been carried forward, despite being constructively pointed out in my response. This means that the local policies for Benenden are based on unsound information, and also makes me wonder why I bothered to respond because it seems no-one has read what I wrote.
- . Tables in the Infrastructure Delivery Plan published on the TWBC website are incomplete.
- . Also some of the jargon and wording used, particularly in the Sustainability Assessment, is almost incomprehensible to the lay reader. We wish to participate constructively in this process, but it almost seems designed to discourage this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should challenge the allocation of 12,200 dwellings (almost four times the borough's assessed housing need), and should not plan on that basis at least until after the Sevenoaks judicial review and appeal process is complete. It should not plan a "margin" to cover unmet allocations from neighbouring boroughs.

Policy PSTR/BE 1 should be amended:

- . The allocation for Benenden should be objectively reviewed and substantially reduced to the same level as similar-sized historic villages, such as Goudhurst or Frittenden.

- . Inset Map 17: The LBD for Benenden village should be redrawn to allow for a small amount of sustainable housing development within the village.

Development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a heritage building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. If further housing is required in Benenden, it should be allocated to sustainable sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA) is misleading:

1. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee Almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. Tenterden Primary School is already fully subscribed for the coming academic year, and housebuilding in the town is ongoing, adding to pressure on places from within the immediate area. Benenden Primary School has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for

158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why was the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Judith Marks [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Judith Marks [REDACTED]
Comment ID	PSLP_1800
Response Date	04/06/21 11:44
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Web
Version	0.7
Question 1	
Respondent's Name and/or Organisation	Mrs Judith Marks
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish [TWBC: representation on Policy STR1 (PSLP_1246) duplicated against PSTR/BE 1 (PSLP_1800, AL/BE 3 (PSLP_1801) and AL/BE 4 (PSLP_1802)]	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

.	It is not justified
.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4 Development Strategy Your council tax payers and the communities that make up Tunbridge Wells Borough want to protect the rural nature of the Borough, including the Green Belt and the AONB and its setting. By not challenging the national policy allocation of 12,200 dwellings (against a projected population increase of 6155 over the plan period – with average UK household size of 2.4, this amounts to 2565 households, around 20% of what has been allocated), the Borough Council is not properly representing its residents and communities. The Borough Council is elected to stand up for the communities it serves. The Council is already being asked to meet a higher need than its own population numbers indicate. They should not also be contributing towards unmet needs

4.52 Table 4 Distribution of Housing Allocations The allocation of 87-95 dwellings to Benenden is disproportionately high compared with villages of a similar size, such as Goudhurst which is allocated only 25 dwellings, or Frittenden. The NPPF Chapter 2 para 11b lays out that “strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses...” Therefore housing allocation should be objectively based on need from within the parish and not on the willingness of some landowners to profit. At the last Housing Needs Survey undertaken in Benenden a low level of requirement for additional dwellings was identified.

Benenden Parish

5.420-22 Benenden is the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published in February 2019. Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

Policy PSTR/BE1: The Limits to Built Development for Benenden village, as defined on Inset Map 17, appears to have been drawn after the proposed site allocation and specifically to accommodate those sites and exclude all others. If the policy is genuinely plan-led, the LBD should be set first and then sites within it identified. This LBD has been designed to “freeze” the village rather than allow for reasonable sustainable growth to meet local needs and support a healthy vibrant community.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for East End, yet the Friends of East End (FEE), were never asked to meet with the BNP steering group. The much trumpeted community involvement was largely restricted to the village and Iden Green. East End is on the border of the parish with Biddenden, and development there will affect Biddenden more than Benenden (see below).
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on 4 April 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB and Historic England. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before allocation*. See HE's comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. The current version of the PSLP states that the nearest stations to East End area are Staplehurst and Etchingham (5.411) when in fact the closest station is Headcorn.
- . Others may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) on behalf of Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate untrue information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to East End as a village, which it is not. East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Biddenden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would state Iden Green only.
- . In the same paragraph, the PSLP states that there is a small shop at Benenden Hospital. At one time there was a small shop for in-patients, which was available to the local community, but this closed many years ago.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden Social Services Hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week, the 24 on Tuesdays and the 299 on Wednesdays. East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent. The situation is exacerbated by increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads and continue to do so, but serious road accidents continue. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR.

Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland Farm. The AL/BE 3&4 policy fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet Inset Map 18 (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its car park. Neither chapel nor car park are in the area up for development. Incidentally, the car park shown was supposed to be temporary contractors' parking during the building of the new hospital wing and car parks, and an undertaking was made by BHS at its presentation to the local community to reinstate it to grass paddock. It can be seen that this never happened.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives, its strategies, KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden parish.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land." It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in

the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- . The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly previously developed. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to be asked provide the infrastructure at AL/BE 3&4 at some point in the future. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account. Further, we already see BHS reneging on or substantially modifying undertakings it made when planning permission was originally granted for AL/BE3 in 2013, and where no development has yet taken place.
- . Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, Transport Strategy Review Sept 2019 which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 Transport Review). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- . Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The implication is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is on the parish boundary and isolated from the village, their contribution to the local economy is negligible.
- . Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . Cycle routes: The PSLP’s standards on the public benefits of cycling and walking are based on the Cycle Strategy Supporting Document, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The Cycle Strategy states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribble Bridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see Planning Application 20/03267/FULL) will cause an increase in those factors, identified in TW Cycle Strategy, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: “The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to

TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This runs completely contrary to STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by Hankinson & Duckett (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, DLP_3458 High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has PSLP EN1 para 5. Biodiversity and geodiversity.
- . AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.
- . STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.
- . EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.
- . EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for a 3-mile active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. Ongoing maintenance costs are not included. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a Bronze Age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister Building stands a few yards to the west of AL/BE3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor development outside the Local Plan) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the crossroads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the

pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

1 Infrastructure Delivery Plan

I have carefully read the IDP March 2021, and there is no mention of any improvements to the rural infrastructure to support the proposed new growth area at East End, where there are currently no amenities and limited infrastructure. Transport and sewerage are of particular concern and impact strongly on the neighbouring parish and borough. It seems to be assumed that this is not a problem for Benenden, someone else will have to take care of it.

1 Process

As a general comment, I have found the representation process unnecessarily difficult. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'.

- . The interactive on-line site is difficult to navigate and freezes or logs itself out at regular intervals. Resetting passwords has required a telephone call as the automated process does not seem to work.
- . Inaccuracies in earlier consultation documents have been carried forward, despite being constructively pointed out in my response. This means that the local policies for Benenden are based on unsound information, and also makes me wonder why I bothered to respond because it seems no-one has read what I wrote.
- . Tables in the Infrastructure Delivery Plan published on the TWBC website are incomplete.
- . Also some of the jargon and wording used, particularly in the Sustainability Assessment, is almost incomprehensible to the lay reader. We wish to participate constructively in this process, but it almost seems designed to discourage this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should challenge the allocation of 12,200 dwellings (almost four times the borough's assessed housing need), and should not plan on that basis at least until after the Sevenoaks judicial review and appeal process is complete. It should not plan a "margin" to cover unmet allocations from neighbouring boroughs.

Policy PSTR/BE 1 should be amended:

- . The allocation for Benenden should be objectively reviewed and substantially reduced to the same level as similar-sized historic villages, such as Goudhurst or Frittenden.

- . Inset Map 17: The LBD for Benenden village should be redrawn to allow for a small amount of sustainable housing development within the village.

Development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a heritage building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. If further housing is required in Benenden, it should be allocated to sustainable sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA) is misleading:

1. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee Almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. Tenterden Primary School is already fully subscribed for the coming academic year, and housebuilding in the town is ongoing, adding to pressure on places from within the immediate area. Benenden Primary School has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for

158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situating adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why was the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Judith Marks [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Judith Marks [REDACTED]
Comment ID	PSLP_1801
Response Date	04/06/21 11:44
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Web
Version	0.6
Question 1	
Respondent's Name and/or Organisation	Mrs Judith Marks
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End [TWBC: representation on Policy STR1 (PSLP_1246) duplicated against PSTR/BE 1 (PSLP_1800, AL/BE 3 (PSLP_1801) and AL/BE 4 (PSLP_1802)]	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

No

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	It is not justified
	It is not consistent with national policy

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4 Development Strategy Your council tax payers and the communities that make up Tunbridge Wells Borough want to protect the rural nature of the Borough, including the Green Belt and the AONB and its setting. By not challenging the national policy allocation of 12,200 dwellings (against a projected population increase of 6155 over the plan period – with average UK household size of 2.4, this amounts to 2565 households, around 20% of what has been allocated), the Borough Council is not properly representing its residents and communities. The Borough Council is elected to stand up for the communities it serves. The Council is already being asked to meet a higher need than its own population numbers indicate. They should not also be contributing towards unmet needs

4.52 Table 4 Distribution of Housing Allocations The allocation of 87-95 dwellings to Benenden is disproportionately high compared with villages of a similar size, such as Goudhurst which is allocated only 25 dwellings, or Frittenden. The NPPF Chapter 2 para 11b lays out that “strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses...” Therefore housing allocation should be objectively based on need from within the parish and not on the willingness of some landowners to profit. At the last Housing Needs Survey undertaken in Benenden a low level of requirement for additional dwellings was identified.

5.420-22 Benenden is the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published in February 2019. Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

Policy PSTR/BE1: The Limits to Built Development for Benenden village, as defined on Inset Map 17, appears to have been drawn after the proposed site allocation and specifically to accommodate those sites and exclude all others. If the policy is genuinely plan-led, the LBD should be set first and then sites within it identified. This LBD has been designed to “freeze” the village rather than allow for reasonable sustainable growth to meet local needs and support a healthy vibrant community.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for East End, yet the Friends of East End (FEE), were never asked to meet with the BNP steering group. The much trumpeted community involvement was largely restricted to the village and Iden Green. East End is on the border of the parish with Biddenden, and development there will affect Biddenden more than Benenden (see below).
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on 4 April 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB and Historic England. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before allocation*. See HE's comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. The current version of the PSLP states that the nearest stations to East End area are Staplehurst and Etchingham (5.411) when in fact the closest station is Headcorn.
- . Others may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) on behalf of Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate untrue information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to East End as a village, which it is not. East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Biddenden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would state Iden Green only.
- . In the same paragraph, the PSLP states that there is a small shop at Benenden Hospital. At one time there was a small shop for in-patients, which was available to the local community, but this closed many years ago.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden Social Services Hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week, the 24 on Tuesdays and the 299 on Wednesdays. East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent. The situation is exacerbated by increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads and continue to do so, but serious road accidents continue. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR.

Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland Farm. The AL/BE 3&4 policy fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet Inset Map 18 (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its car park. Neither chapel nor car park are in the area up for development. Incidentally, the car park shown was supposed to be temporary contractors' parking during the building of the new hospital wing and car parks, and an undertaking was made by BHS at its presentation to the local community to reinstate it to grass paddock. It can be seen that this never happened.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives, its strategies, KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden parish.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land." It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in

the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- . The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly previously developed. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to be asked provide the infrastructure at AL/BE 3&4 at some point in the future. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account. Further, we already see BHS reneging on or substantially modifying undertakings it made when planning permission was originally granted for AL/BE3 in 2013, and where no development has yet taken place.
- . Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, Transport Strategy Review Sept 2019 which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 Transport Review). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- . Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The implication is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is on the parish boundary and isolated from the village, their contribution to the local economy is negligible.
- . Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . Cycle routes: The PSLP’s standards on the public benefits of cycling and walking are based on the Cycle Strategy Supporting Document, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The Cycle Strategy states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribble Bridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see Planning Application 20/03267/FULL) will cause an increase in those factors, identified in TW Cycle Strategy, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: “The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to

TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This runs completely contrary to STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by Hankinson & Duckett (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, DLP_3458 High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has PSLP EN1 para 5. Biodiversity and geodiversity.
- . AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.
- . STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.
- . EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.
- . EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for a 3-mile active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. Ongoing maintenance costs are not included. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a Bronze Age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister Building stands a few yards to the west of AL/BE3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor development outside the Local Plan) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the crossroads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the

pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

1 Infrastructure Delivery Plan

I have carefully read the IDP March 2021, and there is no mention of any improvements to the rural infrastructure to support the proposed new growth area at East End, where there are currently no amenities and limited infrastructure. Transport and sewerage are of particular concern and impact strongly on the neighbouring parish and borough. It seems to be assumed that this is not a problem for Benenden, someone else will have to take care of it.

1 Process

As a general comment, I have found the representation process unnecessarily difficult. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'.

- . The interactive on-line site is difficult to navigate and freezes or logs itself out at regular intervals. Resetting passwords has required a telephone call as the automated process does not seem to work.
- . Inaccuracies in earlier consultation documents have been carried forward, despite being constructively pointed out in my response. This means that the local policies for Benenden are based on unsound information, and also makes me wonder why I bothered to respond because it seems no-one has read what I wrote.
- . Tables in the Infrastructure Delivery Plan published on the TWBC website are incomplete.
- . Also some of the jargon and wording used, particularly in the Sustainability Assessment, is almost incomprehensible to the lay reader. We wish to participate constructively in this process, but it almost seems designed to discourage this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should challenge the allocation of 12,200 dwellings (almost four times the borough's assessed housing need), and should not plan on that basis at least until after the Sevenoaks judicial review and appeal process is complete. It should not plan a "margin" to cover unmet allocations from neighbouring boroughs.

Policy PSTR/BE 1 should be amended:

- . The allocation for Benenden should be objectively reviewed and substantially reduced to the same level as similar-sized historic villages, such as Goudhurst or Frittenden.

- . Inset Map 17: The LBD for Benenden village should be redrawn to allow for a small amount of sustainable housing development within the village.

Development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a heritage building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. If further housing is required in Benenden, it should be allocated to sustainable sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA) is misleading:

1. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee Almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. Tenterden Primary School is already fully subscribed for the coming academic year, and housebuilding in the town is ongoing, adding to pressure on places from within the immediate area. Benenden Primary School has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for

158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why was the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Judith Marks [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Judith Marks [REDACTED]
Comment ID	PSLP_1802
Response Date	04/06/21 11:44
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Mrs Judith Marks
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End [TWBC: representation on Policy STR1 (PSLP_1246) duplicated against PSTR/BE 1 (PSLP_1800, AL/BE 3 (PSLP_1801) and AL/BE 4 (PSLP_1802)]	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Section 4 Development Strategy Your council tax payers and the communities that make up Tunbridge Wells Borough want to protect the rural nature of the Borough, including the Green Belt and the AONB and its setting. By not challenging the national policy allocation of 12,200 dwellings (against a projected population increase of 6155 over the plan period – with average UK household size of 2.4, this amounts to 2565 households, around 20% of what has been allocated), the Borough Council is not properly representing its residents and communities. The Borough Council is elected to stand up for the communities it serves. The Council is already being asked to meet a higher need than its own population numbers indicate. They should not also be contributing towards unmet needs

4.52 Table 4 Distribution of Housing Allocations The allocation of 87-95 dwellings to Benenden is disproportionately high compared with villages of a similar size, such as Goudhurst which is allocated only 25 dwellings, or Frittenden. The NPPF Chapter 2 para 11b lays out that “strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses...” Therefore housing allocation should be objectively based on need from within the parish and not on the willingness of some landowners to profit. At the last Housing Needs Survey undertaken in Benenden a low level of requirement for additional dwellings was identified.

Benenden Parish

5.420-22 Benenden is the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, even before inviting AECOM infrastructure consultants to produce a Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published in February 2019. Further, Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP’s baton, are therefore inevitably linked to BNP’s weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contradiction to para 5.422 which talks of making “modifications to the LP” so that it matches the BNP.

Policy PSTR/BE1: The Limits to Built Development for Benenden village, as defined on Inset Map 17, appears to have been drawn after the proposed site allocation and specifically to accommodate those sites and exclude all others. If the policy is genuinely plan-led, the LBD should be set first and then sites within it identified. This LBD has been designed to “freeze” the village rather than allow for reasonable sustainable growth to meet local needs and support a healthy vibrant community.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for East End, yet the Friends of East End (FEE), were never asked to meet with the BNP steering group. The much trumpeted community involvement was largely restricted to the village and Iden Green. East End is on the border of the parish with Biddenden, and development there will affect Biddenden more than Benenden (see below).
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on 4 April 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 167 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11 March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB and Historic England. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before allocation*. See HE's comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

1 The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. The current version of the PSLP states that the nearest stations to East End area are Staplehurst and Etchingham (5.411) when in fact the closest station is Headcorn.
- . Others may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) on behalf of Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate untrue information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to East End as a village, which it is not. East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Biddenden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would state Iden Green only.
- . In the same paragraph, the PSLP states that there is a small shop at Benenden Hospital. At one time there was a small shop for in-patients, which was available to the local community, but this closed many years ago.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden Social Services Hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week, the 24 on Tuesdays and the 299 on Wednesdays. East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent. The situation is exacerbated by increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads and continue to do so, but serious road accidents continue. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR.

Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland Farm. The AL/BE 3&4 policy fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.

Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet Inset Map 18 (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.

Hankinson Duckett Associates's AONB Setting Analysis Report (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its car park. Neither chapel nor car park are in the area up for development. Incidentally, the car park shown was supposed to be temporary contractors' parking during the building of the new hospital wing and car parks, and an undertaking was made by BHS at its presentation to the local community to reinstate it to grass paddock. It can be seen that this never happened.

1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives, its strategies, KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden parish.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land." It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in

the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

- . The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly previously developed. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to be asked provide the infrastructure at AL/BE 3&4 at some point in the future. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account. Further, we already see BHS reneging on or substantially modifying undertakings it made when planning permission was originally granted for AL/BE3 in 2013, and where no development has yet taken place.
- . Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, Transport Strategy Review Sept 2019 which urges reducing the need to travel.
- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 Transport Review). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

- . Para 5.414 “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The implication is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is on the parish boundary and isolated from the village, their contribution to the local economy is negligible.
- . Policy STR 6 The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . Cycle routes: The PSLP’s standards on the public benefits of cycling and walking are based on the Cycle Strategy Supporting Document, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The Cycle Strategy states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribble Bridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see Planning Application 20/03267/FULL) will cause an increase in those factors, identified in TW Cycle Strategy, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- . Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: “The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.” This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to

TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This runs completely contrary to STR8.
- . The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by Hankinson & Duckett (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, DLP_3458 High Weald AONB Unit (which objects to the Plan) : “....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has PSLP EN1 para 5. Biodiversity and geodiversity.
- . AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.
- . STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.
- . EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.
- . EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for a 3-mile active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. Ongoing maintenance costs are not included. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a Bronze Age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister Building stands a few yards to the west of AL/BE3 and Cleveland Farmhouse (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor development outside the Local Plan) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the crossroads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the

pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

1 Infrastructure Delivery Plan

I have carefully read the IDP March 2021, and there is no mention of any improvements to the rural infrastructure to support the proposed new growth area at East End, where there are currently no amenities and limited infrastructure. Transport and sewerage are of particular concern and impact strongly on the neighbouring parish and borough. It seems to be assumed that this is not a problem for Benenden, someone else will have to take care of it.

1 Process

As a general comment, I have found the representation process unnecessarily difficult. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'.

- . The interactive on-line site is difficult to navigate and freezes or logs itself out at regular intervals. Resetting passwords has required a telephone call as the automated process does not seem to work.
- . Inaccuracies in earlier consultation documents have been carried forward, despite being constructively pointed out in my response. This means that the local policies for Benenden are based on unsound information, and also makes me wonder why I bothered to respond because it seems no-one has read what I wrote.
- . Tables in the Infrastructure Delivery Plan published on the TWBC website are incomplete.
- . Also some of the jargon and wording used, particularly in the Sustainability Assessment, is almost incomprehensible to the lay reader. We wish to participate constructively in this process, but it almost seems designed to discourage this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should challenge the allocation of 12,200 dwellings (almost four times the borough's assessed housing need), and should not plan on that basis at least until after the Sevenoaks judicial review and appeal process is complete. It should not plan a "margin" to cover unmet allocations from neighbouring boroughs.

Policy PSTR/BE 1 should be amended:

- . The allocation for Benenden should be objectively reviewed and substantially reduced to the same level as similar-sized historic villages, such as Goudhurst or Frittenden.

- . Inset Map 17: The LBD for Benenden village should be redrawn to allow for a small amount of sustainable housing development within the village.

Development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a heritage building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. If further housing is required in Benenden, it should be allocated to sustainable sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA) is misleading:

1. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee Almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. Tenterden Primary School is already fully subscribed for the coming academic year, and housebuilding in the town is ongoing, adding to pressure on places from within the immediate area. Benenden Primary School has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for

158 and 222, two sites close to the village centre. Of 158, we read “A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situating adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why was the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Jack Marr
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I live nearby and have lived in the area on and off for forty years, as my family have for several generations.

We are already experiencing many issues in the area relating to overloaded infrastructure including GP surgeries and excessive traffic, and the proposed site has had repeated problems with flooding. Possible brownfield sites have not been adequately explored and alternatives have been de prioritised.

TWBC are proposing putting 50% of their housing in this area alone, with massive impacts on the local environment, particular through pollution from car use - this is an appallingly unsustainable proposal. This rural green belt parish will be completely destroyed by a 500%+ increase in population. This is entirely against Green Belt principles. 51% of local housing need is being forced on 2% of the TMBC population, a vastly disproportionate burden.

The community engagement has been utterly lacking. Despite over a thousand complaints about the Plan's impact, TMBC has completely ignored local residents and indeed added more housing to the plan. The plans were overwhelmingly rejected in consultation yet the initial 440 houses were increased to 2800 in the space of a few weeks. 97% of comments on the plan had been negative yet no steps have been taken to mitigate concerns - rather vastly more houses have been added, showing contempt for local residents.

It is situated in a high risk flood area where we already experience flooding in bad weather.

Hundreds of acres of productive agricultural land - increasingly needed - will be destroyed by the development.

While the plan is the responsibility of TWBC - who will receive the benefit of council tax - the largest impact will be on Tonbridge and Malling, who will face a vast increase in traffic, pollution, noise, environmental degradation, increased strain on already stretched medical and educational facilities and more. This is a very unreasonable move on the part of TWBC.

The purpose of the Green Belt is to prevent urban sprawl, but this project will effectively join Tonbridge and Paddock Wood. In 2016 the Inspector for the Site Allocation Local Plan stated that there was no need to allocate green belt land and did not recommend it. This plan is destructive of our collective heritage of England's rural spaces and ecosystems which especially in the South East are dwindling fast.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/PW 1 The Strategy for Paddock Wood

Policy HA3 - Affordable Housing

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound Don't know

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I both live and work in Paddock Wood. I live at xxxx, Maidstone Road, Paddock Wood, TN12 , address below (*TWBC Comment - full postal address redacted*) and am a director of Core Commercial on Transfesa Road. I am currently a flood warden for the town and was a Borough Councillor for 8 years.

I am not against the principal of development it just needs to be well conceived and NOT put existing residents at serious risk.

I wish to make representations to the Local Plan, in particular object to the proposed allocations for development at Paddock Wood, north of the railway line.

I object to the proposed allocations PW1 – 2, 3, 4 and 5.

I comment as follows:

1. Green belt

The majority of the proposed allocation lies within the green belt and should not be built upon. This is the CPRE green belt map (*TWBC comment - map attached as file see attachments*):

2. Flooding

A large portion of the site lies within flood zones 2 and 3, especially those areas to the east of Tudeley Brook:

(*TWBC comment - map attached as file see attachments*)

You should not allocate sites for development that are at risk of flooding or that take away flood absorption thereby throwing flood water onto development elsewhere.

Tudeley brook has its banks built up with an earth bund. In the past the brook has burst its banks and floodwater has flooded the fields to the east of the brook. An earth bank is like a levee in New Orleans and with extreme weather events (or with lack of maintenance) will break.

This is a photo I took at the junction of Tudeley Brook with Eastlands Lane on 16th February 2021 in my role as flood warden. You can see that the brook is overflowing onto Eastlands Lane and that the field is “protected” by the grassy bank but only just:

(TWBC Comment - photo attached as file see attachments)

Whatever development is placed in these areas will take away the existing soakaway absorption feature of the fields. The vegetation and agricultural nature creates a break through the clay “plug”. If you build over this area, even with “sustainable drainage”, there will be no break through the clay. Keeping voids under houses will eventually be forgotten and clog up losing their absorption.

Oversized drains to hold excessive rainwater and allow percolation dispersal as used in the recent industrial development (PMJ to Mack) on Transfesa Road does not work. This is a photo taken of Transfesa Road by the entrance to Mack on 27th December 2020:

(TWBC Comment - photo attached as file see attachments)

The Turnbull field between Transfesa Road and Lucks Lane to the east of Maidstone Road is regularly inundated. Having voids under the proposed commercial buildings or parking areas is both expensive and will eventually silt up.

3. Affordable Housing

There is a severe shortage of affordable housing in the area and it is well known that employers have to bus in staff from the Medway Towns or Hasting. When I was a councillor there was talk of increasing the provision of social housing from 25% to 40% and I would support this. The developers will cry into their soup pleading that such would not make any development unviable which is not correct – it just comes off the land price. It is important that developers actually build the social housing units than give money to the local authority to build elsewhere which can be frittered away.

4. Highways

I am advised that there is a proposal to close the road bridge of Maidstone Road over the railway line but I could not find reference to this in your documents. I assume that this is just a stupid rumour. In case however it is being slipped in through the “small print”, I strongly object. My wife is disabled and cannot walk into town. Are you suggesting she does a 5 mile drive to travel the 0.5 mile to the town centre?

5. Health Centre

The existing health centre is already over capacity and indeed even before Covid there was a 2 week wait for doctor appointments. A new health centre needs to be actually built at developers expense, opened and fully staffed before any of the proposed houses are occupied.

I hope these comments are helpful. Please confirm that these comments have been incorporated into the representations.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BM 1 The Strategy for Brenchley and Matfield parish

Paragraph No(s) 5.479 & 5.508

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We submit that the PSLP is neither sound nor justified in respect of PSTR BM1 and in particular in respect of the Site Allocations within that parish, Brenchley and Matfield.

- 1 There should be no further development in Matfield. Within the last five years, planning consent has been granted for twenty dwellings (17/01142), three detached houses (18/02627) and, on AL/BM1, forty five dwellings. This represents nearly seventy dwellings, all at the north end of the village of Matfield, all within the AONB. This is a very substantial increase in the number of dwellings in Matfield, despite the fact that the Sustainability Appraisal states that, "Matfield (where all development is proposed) lacks many facilities and services, thus making the housing less suitable for the elderly or disabled." The suggestion is that "travel to Paddock Wood is more convenient from Matfield and thus there is an advantage in this proposed pattern of growth." This approach means that the traffic flow to and from Paddock Wood is increased as is the traffic flow to those places where services and facilities exist such as Brenchley village. Bus services between the villages and Paddock Wood are poor so most journeys will be made by private car. Maidstone Road and Brenchley Road are already busy and unsuitable for any but the most experienced cyclists. On that basis, it is better to build any additional housing at the central hubs, which have the necessary infrastructure, and employment opportunities, to minimise car journeys and to preserve the AONB. An additional 11-15 houses would make very little difference in Paddock Wood, which is scheduled to receive thousands of new homes, with supporting infrastructure and which is outside the AONB. We submit that any further development in Matfield is unjustified and that the PSLP is not sound in this respect.
- 2 A recent report by the CPRE, reported in The Times, 22.04.2021, states the development of green field sites in the AONBs has increased from an average of 128 acres per year for the five years to 2017 to an average of 294 acres per year for each year since that date. The High Weald AONB has seen the greatest amount of development, 932 homes having been approved since 2017. Much of this has been executive housing with only 16% being affordable. There is a real need to protect the AONB from inappropriate development and to ensure that what is built serves a local housing need.
- 3 The National Planning Policy Framework (NPPF) paragraph 115 requires that, in any decision, "great weight should be given to conserving landscape and scenic beauty in AONBs. This applies not only to developments proposed within an AONB but, if proposed, in its setting such that the AONB would be affected." The development already consented has completely changed, or will change, the character of the northern end of Matfield. AL/BM1 was originally considered to be an important part of the open character of the village. This will now be densely built upon, in

cul de sac design, contrary to the design recommendations of the High Weald AONB Management Team. The Landscape and Biodiversity Officer, commenting on the planning application for 45 homes on AL/BM1 (19/01099), said that this would constitute “a permanent change in settlement pattern” that would have “at least major adverse effect” “in the short and medium term” “although (that effect) *may* reduce in the longer term”. This must not be allowed to happen to any other part of the village. We submit that further development will be contrary to national planning policy and that damage has already been done.

- 4 Whilst any of the developments proposed or already carried out might, in themselves, constitute only “minor development”, the combination of several sites amounts to major development and affects the village and the AONB holistically. Major development in the AONB is not permitted, except in exceptional circumstances, under the terms of the NPPF. There are no such circumstances at play here so further development is again contrary to national policy.
- 5 Part of the charm and character of Matfield is that it is a very spread out, rural village. The southern approach to the village from the A21 is peppered with old houses, scattered randomly along the B2160, generally well spaced out. The Village Hall, built in the mid 1990s is in the style of a barn and is well set back behind a screen of trees and hedges, care being taken to preserve the character of the area. It is through this rural uncluttered scene that the road approaches the wide open space of Matfield village green, surrounded by a mix of old houses, all set back from the road. Any plans to develop to the south of the village would change the open rural character of the approach to the village and the village itself, which is in sharp contrast to Brenchley village where the village centre is tightly grouped around All Saints church. The contrast of the style of two villages so close together is one of the attractions of this area. The proposal to allow development on AL/BM2 close to the village hall would adversely affect the character of this AONB village and its southern approach. It will be difficult to preserve much of the hedgerow fronting the Maidstone Road because of the bend in the road, which will necessitate wide sight lines. The impact of this can be seen at Standings Close (consent number 17/01142) where the original hedge has been damaged or destroyed so that the housing is plainly visible, impinging on the first view of the listed building housing The Poet restaurant. Thus, allowing further development would be contrary to the principles of the NPPF, regarding conserving landscape and scenic beauty in the AONB.
- 6 As previously stated, the village green is very open with several large old houses, including the Grade 1 listed Matfield House, set back around its edges. This Conservation Area (CA) should be protected against any further development that might impact on its setting.
- 7 The Strategy of the PSLP for the parish of Brenchley and Matfield states (para 1) that it will set built limits for the parish’s two main villages for the Plan period to 2038. In the original draft Local Plan, the built limits for Matfield to the south west of the CA were retained. This was in order that potential further development of the site now known as AL/ BM2 would be constrained due to its proximity to the CA and its position within the High Weald AONB. The PSLP has changed this so that only the landscape buffers to the south are outside the LBD. We submit that the revised proposal is unsound. The original provision better serves the protection and enhancement of the AONB and that the entire site should remain outside the LBD.
- 8 The PSLP has allocated only one further site AL/BM2, within the Parish, AL/BM1 having already received consent. In view of the foregoing we consider that it is unnecessary and inappropriate for this to be included in the site allocation. However, in the event that the site is allocated for housing within the PSLP, we would ask the following:-
 - I. the number of dwellings allocated does not exceed 11 to minimise any adverse impact on the AONB and the CA. The dwellings should be built on the land to the south of the Village Hall so that the open rural aspect is retained adjoining the CA;
 - II. the LBD are retained as at present so that the site is excluded from them, to maximise the control of further inappropriate development within the AONB, adjacent to the CA;
 - III. Landscape buffering is extended along the western boundary of the site to protect the historic Court Farm House and views towards the site from the High Weald Landscape Trail, which runs along the footpath that is parallel to the western boundary;
 - IV. any sight lines from the site onto Maidstone Road are kept to the minimum necessary to protect the character of the southern approach to the village and hedgerows should be reinstated after the development is complete;

V. careful consideration is given to the nature of any community use of the land coloured purple on the plan. Additional parking should be kept to a minimum to prevent a green site adjacent to the CA being concreted over. Preference should be given to uses that preserve the character of the land;

VI. Provision for parking within the development site should not include parking parallel with Maidstone Road to avoid “suburbanising” the area and detracting from the character;

VII. any development should include a proportion of affordable housing and smaller units suitable for first time buyers and “downsizers”;

VIII. public transport should be improved to serve the needs of any older people who do purchase units within the development and who no longer drive so that they can readily access the facilities in the adjoining settlements;

IX. consideration should be given to the environmental implications of development. The entire site has become a haven for wildlife, particularly within the wooded areas, including badgers and dormice and many species of birds. The site also falls within the water catchment area.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make the Local Plan sound, Strategy PSTR/BM should be modified by removing the allocation of AL/BM2 and by not permitting any further allocations within Matfield in this plan period except for brownfield allocations. This is in order to protect the AONB, protect the character of Matfield and to ensure that all development is sustainable. If the development of that site is permitted then all precautions should be taken to protect the CA and the AONB, to preserve the character of the village and to ensure the necessary supporting infrastructure is in place, including public transport and medical facilities that are within easy reach of the village to minimise journeys by private car. The Limits to Built Development should remain as they are around the CA to prevent inappropriate development.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

It is noted that, under Table 59 and the accompanying Commentary, regarding Brenchley and Matfield, “sites in Brenchley were rejected for allocation due to landscape, biodiversity and/or setting concerns for example sites 215 and LS_7”. We do not disagree that substantial development would impact on Brenchley’s landscape, but why were the same considerations not afforded to Matfield? As previously

stated, Matfield's character is defined by its open rural nature, in contrast to Brenchley. The Borough's Landscape and Biodiversity Officer has previously commented on this in connection with other proposed developments (19/01099 Consent for AL/BM1) where he refers to "the loose-knit character of Matfield and the immediate context of loose ribbon development are significant factors." That particular consent will impact hugely on the northern end of the village, which will become one block of dense housing. Matfield has no doctors (the proposed new surgery will be in Horsmonden, beyond Brenchley); there are few employment opportunities within the village; there is just one shop in the village (a speciality butchers) and there is a poor bus service. It is considered a less sustainable site but its connections to other centres, including Brenchley, are considered favourable. This will increase the traffic flows to adjoining villages, and, realistically, most journeys will be made by private car. Further development is not appropriate in terms of sustainability. For the sake of between 11 and 15 houses, these would be better placed in Paddock Wood or even Tunbridge Wells and there should certainly be no further site allocations.

Future Notifications

Question 1	
Respondent's Name and/or Organisation	Dennis Marshall
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
AL/HA 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is not sound for the site underlying AL/HA5 for the reasons below.

AONB

This is untouched AONB. A medical centre of this scale plus parking for over 50 cars would destroy this beautiful landscape. As the site is on a ridge this will adversely impact many parts of the village. Lighting for the large car park will have a seriously detrimental visual effect and is counter to the dark skies policy in place in Birchfield Grove. In addition in 2014 an appeal to build houses on the same site was dismissed by the Inspector principally because of the need to protect the AONB. Nothing has changed since then. The current protections for wildlife, flora and fauna around Birchfield Grove will be undermined as (i) access to the site will be across a protected Ecological Mitigation Area and (ii) the medical centre itself will be built next to it. As an alternative site exists for the medical centre there can be no exception that will allow building on AONB at the land allocated to AL/HA5.

TRAFFIC CONGESTION

Siting a medical centre on this land will increase congestion in the village and, in particular, at the Crossroads as patients in the south, north and west of the village will most likely have to travel by car to the medical centre. This will also increase air pollution at the Crossroads, which is already one of the worst areas in Kent.

The increase in traffic in Birchfield Grove will also cause severe problems given that the road is designed for only 26 houses. It is twisty and narrow and completely inappropriate for access to a busy medical centre.

The junction between Birchfield Grove and Rye Road has poor sight lines and cars regularly travel at speeds in excess of 30mph. The additional traffic generated by the medical centre will make matters even worse.

ALTERNATIVE SITE

There is a viable and better suited alternative site at the King George V Playing Fields (KGV) at the Moor. It has several advantages over AL/HA 5 - for example, it has already been developed with a sports pavilion and playing fields and it is in a much less prominent position and any additional building will have a minimum impact on AONB. KGV was also proposed by TWBC in January 2021 as the site for the medical centre.

DUTY TO COOPERATE - the site underlying AL/HA5 was removed entirely from the TWBC Local Plan in January of this year following consultation with the public. It was then reinserted just ahead of the February TWBC Council meeting without any consultation with local residents. Discussions with the doctors' surgeries did, however, take place. A one sided discussion does not meet the duty to cooperate.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make the Local Plan sound, the medical centre should be moved to the King George V Playing Fields at the Moor.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made) – Ref pages 7-9 Extracts: (page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom. (Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously

been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused (89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk) | Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons: 1 a) The proposed access would be likely to create unacceptable additional hazard to traffic. 2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic 3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality. 4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area. *2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

3. Adequate servicing and parking to serve the expanded commercial use on the site;

4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;

Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:

1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.

2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.

3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.

4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation

6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;

The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access. *7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Stephen Marshall
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 3 Land north of the A21, south and west of Hastings Road

Paragraph Numbers: 5.678 and 5.687

Policies Map (Inset Map Number) 66

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposal to allow development of the fields included in the above map is not justified nor practical. Many of the proposed houses will have a very high elevation. The land is situated on a hill. Existing properties on this section of Hastings Road will be overlooked and a high elevation development will have substantial detracting impact on the surrounding area. A vast improvement to the infrastructure will be needed for example to allow substantial increased drainage from the site. Flooding of this Hastings Road section may be a serious repercussion for the road and existing properties on it some of which are situated well below street level, including my own. Flood waters will travel down the steps (next to 123) leading to Stanam Road and therefore has the risk of affecting even more properties, (as I have seen water gush down like a waterfall when drains were blocked in Hastings Road).

Also Hastings Road is already extremely busy with traffic. Parking occurs on both sides of this section of the road making access for buses and large vehicles very difficult. Increased traffic therefore from the development will impact detrimentally on the usage of the road. A single access to the site, probably on or about the Bo Peep corner opposite Henwood Green Road would be a dangerous location with speeding traffic exiting from the A21 turn off to Pembury for example. The proposed Bund to be built on the hilly location immediately adjacent to the A21 will be a blot on the landscape and there is already pollution from the A21 which is likely to increase with the development of some 80 dwelling houses. Having regard to parking, this development will almost certainly lead to more attempted parking on Hastings Road which will create more problems and hazards.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development of land contained in the above map should be removed from the Local Plan for reasons stated above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See above Section 6

Section 5 Place Shaping Policies

Speldhurst

PSTR/SP1

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please refer to representation in the file uploaded [TWBC: copied here for ease of reference]

This letter has been prepared on behalf of Mike and Mary Marshall who reside in Milford House, Penshurst Road, Speldhurst, Tunbridge Wells, Kent, TN3 0PH in relation to Land at Milford House, Penshurst Road, Speldhurst, TN3 0PH (Call for sites Plot 94) which was submitted under the Call for Sites Program and was included as Site number 94.

Paragraph 136 of the NPPF states that 'once established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Strategic policies should establish the need for any changes to Green Belt boundaries, having regard to their intended permanence in the long term, so they can endure beyond the plan period. Where a need for changes to Green Belt boundaries has been established through strategic policies, detailed amendments to those boundaries may be made through non-strategic policies, including neighbourhood plans'. Paragraph 73 of the NPPF requires the Council to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. In addition, there must be an additional buffer of between 5% and 20%, depending on the particular circumstances of the LPA.

As detailed within the Development Strategy Topic Paper, the local housing need for the borough is set out in the Housing Needs Assessment Topic Paper. This is found to be 678 dwellings per year (pa), or some 12,200 over the plan period of 2020, to 2038. In accordance with the NPPF, this is the minimum target. In terms of housing needs of neighbouring authorities, Sevenoaks District Council has sought help in meeting a need for some 1,900 dwellings that it has not found able to be met in its borough. While there is currently uncertainty as to this figure, it is nonetheless considered that the Council should assess its potential to provide for a higher level of growth.

Given the Council's inability to meet the identified housing need within the plan period, we ask you again to re-consider Site 94 as identified in Attachment 1, which in our opinion, should be removed from the greenbelt and included within the LBD boundary to encourage the development of additional residential units for the following reasons:

1. The land in question is currently residential curtilage and therefore previously developed land. Dartford Borough Council appealed against a High Court decision [2016] in which Charles George QC (sitting as a Deputy High Court Judge) found that only residential gardens "in built up areas" are greenfield land, whereas others, in the countryside, are previously developed land. Given that greenbelt is by its very nature considered countryside, and the portion of the site is garden land, it is considered that it is previously developed land and therefore there are exceptional circumstances to allow principles of erecting new buildings and alter the green belt.

2. Para.85 of the NPPF expects that local authorities should, when defining boundaries:

- ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
- not include land which it is unnecessary to keep permanently open;
- satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
- define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

Despite being omitted from the Pre-submission Local Plan, Para.4.84 part 4 of the draft Tunbridge Wells Borough Local Plan 2019 states that LBD boundaries should normally follow physical features, e.g. roads, walls, field boundaries, although there may be instances where it is appropriate to cut across property curtilages to ensure that local character and/or amenities are protected. This is consistent with Para.85 with the NPPF.

In this case, the Greenbelt boundary runs through the middle of a residential garden despite being developed either side and with a well-established field boundary to the rear.

Furthermore, following the completion of the dwelling as permitted on 21 April 2021 (RN: 21/00618/FULL), two new buildings could be erected within the greenbelt in accordance with Schedule 2, Part 1 Class E Permitted development rights (buildings etc incidental to the enjoyment of a dwellinghouse) which allow the erection of a building within the curtilage of the dwellinghouse, including in an area of outstanding natural beauty, providing that the building is incidental to the dwelling house. Therefore the Council have no guarantee the land in question will remain open contrary to Para 133 of the NPPF and should encourage more sustainable forms of development to meet the overall development plan objectives in line with Para.11 of the NPPF.

3. A request to have the land adjacent to Milford House removed from the green belt has previously been made. The reasons stated in the TWBC draft local plan 071119 rejecting this site following its Call for Sites and that it was not appropriate to alter the boundary of the green belt, alludes to the fact it is let down by a lack of key services and facilities and a lack of pavement to the centre of the settlement making it less suitable for those with disabilities.

Planning permission for a new dwelling to the east of Milford House was permitted on the 21 April 2021 (RN: 21/00618/FULL) therefore there seems to be a disparity between the acceptability of external conditions such as key services solely based on where an additional building is located on site which is, in our opinion, incorrect as a scheme can include internal footways and associated infrastructure subject to the impact on openness, biodiversity etc controlled by other development plan policies.

4. The land in question is currently surrounded on three sides by existing properties some of which have been developed recently, but largely screened from them and is therefore considered to be more sensitive in terms of its impact on the Green Belt than other sites which have been selected.

For the above reasons, it is clear that there are exceptional circumstances to allow the sought alteration of the greenbelt in line with Para 136 of the NPPF and to include the land within the Limit for Built Development in Speldhurst to encourage the provision of additional residential units in line with Para 73 of the NPPF.

Should you require further information or would like further clarity with regards to the above matter, please do not hesitate to get in touch.

[TWBC: see full representation attached for site plan].

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to representations in the file uploaded

[TWBC: copied from attached representation]:

For the above reasons, it is clear that there are exceptional circumstances to allow the sought alteration of the greenbelt in line with Para 136 of the NPPF and to include the land within the Limit for Built Development in Speldhurst to encourage the provision of additional residential units in line with Para 73 of the NPPF.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please refer to the document uploaded

If you would like to attach a file in support of your comments, please upload it here.

Milford House - Pre submission Local Plan Consultation Response v3.doc (3)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr D Masters in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr Masters owns Triggs Farm, Goudhurst, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/GO 2).

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it benefits from outline planning permission for the erection of 12 dwellings granted at appeal in January 2019.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons we set out within this representation.

1.1.5 We also take this opportunity to comment on wider aspects of the strategy.

1.2 Background

1.2.1 Tunbridge Wells Borough Council (TWBC) has produced a new Local Plan to guide future development within the borough. As the Council is now satisfied that it has a sound plan it proposes to submit the plan for Independent Examination following completion of this final round of consultation.

1.2.2 Once submitted, the Local Plan will be examined by an Inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is 'sound'. In this regard, the Government published a revised NPPF in February 2019, which provides that to be "sound" a local plan must be:

- Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework.

1.2.3 This submission will comment on each of the above, highlighting where we believe modification is needed for soundness purposes.

1.2.4 In terms of legal compliance, the main requirements for the early stages of Local Plan consultation are in relation to:

- planning for community engagement;
- the sustainability appraisal (including consultation with the statutory environment consultation bodies);
- identifying significant cross boundary and inter-authority issues; and
- ensuring that the plan rests on a credible evidence base, including meeting the Act's requirement for keeping matters affecting the development of the area under review.

1.2.5 Given our client's narrow interests, we have no comment to make on matters of legal compliance.

1.3 Vision and Strategic Objectives

1.3.1 The pre-submission plan is underpinned by vision and strategic objectives. The vision states:

'Growth in new homes, jobs, and supporting infrastructure will be achieved over the plan period in a manner that respects the distinctive qualities of the borough.

The Council will work with stakeholders to maintain and improve overall living standards and access to employment, leisure, and cultural opportunities for all the borough's residents.*

In particular, the Council will improve access to suitable, especially affordable, housing, including for local young people and older households, and will develop the borough's economic strengths and range of accessible job opportunities.

Important local services, infrastructure, and amenities will be retained and, where necessary, improved, in line with community needs.

Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Local ambitions are:

- for Royal Tunbridge Wells and Southborough, to maintain their role as the main urban area, with a mix of housing, employment, leisure, and cultural developments, including by making effective use of urban land, whilst protecting their respective distinctive natural and built environmental qualities;
- for Paddock Wood, to provide for comprehensive planned strategic growth (including on land in east Capel parish) that is fully aligned with timely infrastructure provision and which delivers significant improvements in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding;
- for a garden settlement, to establish the potential for a new village to contribute to sustainable growth, that is: based on garden settlement principles; comprehensively planned and reflecting local character; well connected with nearby towns; providing local job opportunities, services and all necessary supporting infrastructure; with exemplary development of sustainable design;
- for other settlements, to retain their essential local character, with high-quality sustainable development that reflects their environmental context, infrastructure, and site circumstances, having due regard to local needs;
- for the countryside, to retain its landscape, biodiversity, and historic character for its own sake, as well as a setting for settlements, whilst supporting sympathetic rural enterprise'.

1.3.2 In order to deliver the vision the plan sets a number of strategic objectives:

*(1) To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough;**(2) To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population;**(3) To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments;**(4) To promote high-quality and well-designed development that contributes to the local identity and character and creates attractive environments;**(5) To achieve the timely delivery of all forms of infrastructure that meets the needs of development and supports the vitality of communities;*

*(6) To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology;**(7) To ensure that the borough is vibrant, culturally rich, and economically buoyant;**(8) To conserve and enhance the valued historic, built, and natural environments of the borough, including the High Weald Area of Outstanding Natural Beauty, and to achieve net gains for nature;**(9) To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met;**(10) To support the goal to make the borough carbon neutral by 2030, and minimise*

the impact of climate change on communities, the economy, and the environment;(11) To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

1.3.3 Response

1.3.4 Our client supports the general thrust of the vision and these objectives, which seek to meet identified housing needs and boost the supply of new affordable homes.

1.8.1 This representation has been prepared on behalf of Mr D Masters in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Goudhurst, but the detailed policy requires modification if the site is to be deemed deliverable.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: DHA's representation on behalf of Mr D Masters has been split into three separate areas: PSLP_481 - Vision and Objectives, PSLP_482 - Section 4: The Development Strategy, and PSLP_483 - Section 5: Goudhurst Policy AL/GO 2. See also full representation attached]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR 1 The Development Strategy

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr D Masters in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr Masters owns Triggs Farm, Goudhurst, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/GO 2).

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it benefits from outline planning permission for the erection of 12 dwellings granted at appeal in January 2019.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons we set out within this representation.

1.4 Development Strategy and Strategic Policies (Policy STR1)

1.4.1 The purpose of the Development Strategy is to outline how much development will be provided to meet the needs of the borough and where that development will be located.

1.4.2 In terms of the amount of housing, paragraph 59 of the NPPF states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Further, to determine the number of homes needed, strategic policies should be informed by a local housing needs assessment conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.

1.4.3 The Council confirm that their housing need target for the plan period to 2038 is 12,200 dwellings (678 dwellings per annum), which is calculated using the Governments standard method and the 2014-based household projections. We support this approach.

1.4.4 In terms of the different supply components, the Council consider that the Local Plan must (as a minimum) include additional allocations to accommodate 6,945 homes. This figure was formulated taking into account; extant planning permissions (3,313); Windfall allowances (1,670); and outstanding site allocations (276).

1.4.5 At Regulation 18 the Council subsequently applied a 10% non-delivery rate to these figures to err on the side of caution. This is not referenced within the Regulation 19 version as such requires clarification and potential modification if this provision has not been carried forward to the pre-submission plan.

[TWBC: for copy of Local Plan Figure 5 Key Diagram see full representation attached]

1.4.6 In terms of how these needs will be met, policy ST1 sets the development strategy and states:

[TWBC: PSLP Policy STR1 duplicated here - see full representation attached].

1.4.7 In terms of justification, the Council state that The Draft Local Plan consultation concluded that, having seized all reasonable opportunities for growth 'across the board', meeting the housing need can only be met if the development strategy includes the strategic growth of certain settlements. However, it goes on to state that it is evident from site assessment work that there is very little scope for adding much in the way of further housing numbers to the rural settlements. Indeed, in some cases, the scale of major developments in the AONB have been found to be unacceptably great.

1.4.8 Paddock Wood is said to be a logical choice for strategic growth for a number of reasons; being an existing service and employment centre, having a central railway station and main road links, giving wider accessibility.

1.4.9 Tudeley Village is acknowledged to involve the loss of a large area of Green Belt but this is justified because it is outside the AONB, is well located in terms of accessibility to nearby towns, would be of a scale that supports a good range of services, and can be planned in a holistic, comprehensive manner.

1.4.10 The full proposed distribution of development is set out below.

[TWBC: For copy of Local Plan Table 4 Distribution of housing allocations see full representation attached].

Response

1.4.11 Our client agrees that TWBC is capable of meeting its need in full and support this approach to plan-making.

1.4.12 In respect of the wider strategy, our client supports the general principle of proportionately spreading the benefits of growth. Adopting a pattern of dispersed growth approach would allow a number of sites to be developed at the same time, serving different segments of the local housing market, which is preferable to saturation of the market in a single area.

1.5 AONB Release

1.5.1 When dealing with AONBs, paragraph 172 of the NPPF states that great weight should be given to conserving landscape and scenic beauty. It goes on to state that planning permission should be refused for major developments in AONB areas except in exceptional circumstances and where it can be demonstrated they are in the public interest.

1.5.2 Consideration of such major applications should include an assessment of:

(1) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;(2) the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and(3) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.

1.5.3 It is important to stress that footnote 55 of the NPPF is clear that for the purposes of paragraphs 172 and 173, whether a proposal is 'major development' is a matter for the decision maker, taking into account its nature, scale and setting, and whether it could have a significant adverse impact on the purposes for which the area has been designated or defined. The term has no direct correlation with the definitions set out in the Town and Country Planning (Development Management Procedure) (England) Order 2015.

1.5.4 With above criteria in mind, our clients consider there to be clear evidence of an overriding and growing housing need within the Borough. The Council's SHMA findings initially identified the future need to plan for some 678 new homes per year. In addition to the need moving forward, the previous

difficulties in keeping pace with delivery has resulted in a need to accommodate a significant number of dwellings in the short term with a deficit in five year supply.

1.5.5 With respect to the cost of, and scope for, developing elsewhere, we recognise that Tunbridge Wells is a constrained borough. There are a number of archaeological and heritage sites, including 45 Historic Parks and Gardens, 25 Conservation Areas and 11 Scheduled Ancient Monuments. In addition, there are approximately 3,000 Listed Buildings.

1.5.6 The landscape of the High Weald AONB contains numerous historic landscape features, including field patterns, settlements and ancient woodland, whilst the borough also hosts a number of, or is close to, areas of ecological importance. These include:

Ancient Woodland (approximately 16% of the borough) Circa 60 Local Wildlife Sites (approximately 11% of the borough) Ten Sites of Special Scientific Interest (SSSI) Five Local Nature Reserves (including one Community Woodland) One Regionally Important Geological Site, at Scotney Castle Quarry.

1.5.7 The nearby Ashdown Forest is a designated Special Area of Conservation (SAC) and Special Protection Area (SPA).

1.5.8 Although not an environmental constraint, the Metropolitan Green Belt covers 22% of Tunbridge Wells borough.

1.5.9 Given the above constraints, planning for housing requires the need to balance a number of core environmental and planning matters in order to reach a sensitive future development strategy. However, there is no doubt that the threshold for there being a need to develop in the AONB is patently met and with every development comes an opportunity to moderate the effects of development, buffers and the opportunity to increase public access to the land.

1.6 Housing Delivery

1.6.1 It is widely acknowledged that there is a housing crisis in this country, which has arisen as a direct consequence of too few houses being built to keep pace with a growing population. Accordingly, the Government has repeatedly indicated that 300,000 additional homes per year should be constructed.

1.6.2 It is evidence that the LPA has fallen a long way behind the required rate of delivery in the years since the NPPF was published. Indeed, the LPA's average annual housing delivery for the period 2016 to 2020 is 506 dwellings per annum, resulting in a deficit that is increasing by circa 172 dwellings per annum. Whilst the draft plan seeks to bridge this gap in delivery, we remain concerned about where a consistent level of delivery is likely to be achievable based on the pre-submission draft and the close repetition of the current Core Strategy.

1.6.3 The current Core Strategy pre-dates the publication of the NPPF, published in March 2012. The effectiveness of the strategy was in question long before this date and there is an evidenced legacy of failure of the Core Strategy that is unrelated to the introduction of the need to plan for the full objectively assessed development needs of the area. Indeed, as outlined within the table below, for the immediate five years since adoption of the Core Strategy in 2010, the LPA achieved only 829 new homes against a target of 1,500 dwellings. This amounts to just 166 dwellings per annum for the initial five year plan period.

[TWBC: for table showing housing completion rates 2010 to 2015 see full representation attached].

1.6.4 Based on this evidence, the persistent failure of the Core Strategy began long prior to the introduction of housing targets set by the SHMA and Standard Methodology. As a consequence, mirroring the early strategy with a stringent restriction of development beyond the established limits to built development is likely to result in a similar failure. Instead, a mechanism is needed to ensure that a consistent level of housing can be brought forward at all times.

1.6.5 Turning to the context following the publication of the standard methodology, the LPA's delivery rate between 2015 and 2020 has improved slightly, but not to a level that meets the recognised needs of the area. The LPA achieved 2,473 new homes against a target of 3,360 dwellings. This amounts to just 495 dwellings per annum for the five year period and a reduction on the previous five year rate.

[TWBC: for table showing housing completion rates 2015 to 2020 (statement of common ground) see full representation attached].

1.6.6 The recently published Housing Delivery Test (January 2021) results also confirm the need for the LPA to prepare a further action plan to demonstrate how delivery will be addressed moving forward.

1.6.7 In summary, there is a historic legacy of under delivery over the last decade and even with the preparation of the pre-submission plan, past delivery rates provide compelling evidence that the Core Strategy has never been effective in delivering housing at the rates needed to meet the needs of borough residents and that sites like our client's land are needed.

1.8.1 This representation has been prepared on behalf of Mr D Masters in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Goudhurst, but the detailed policy requires modification if the site is to be deemed deliverable.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: DHA's representation on behalf of Mr D Masters has been split into three separate areas: PSLP_481 - Vision and Objectives, PSLP_482 - Section 4: The Development Strategy, and PSLP_483 - Section 5: Goudhurst Policy AL/GO 2]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Mr D Masters
Question 2	
Agent's Name and Organisation (if applicable)	DHA Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/GO 2 Land at Triggs Farm, Cranbrook Road

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.1 Introduction

1.1.1 These representations have been prepared by DHA Planning on behalf of Mr D Masters in respect of the Tunbridge Wells Borough Council Regulation 19 pre-submission Local Plan consultation.

1.1.2 Mr Masters owns Triggs Farm, Goudhurst, which is identified as an allocation for potential residential development within the pre-submission Local Plan (Policy AL/GO 2).

1.1.3 The site is located within the High Weald Area of Outstanding Natural Beauty (which washes over the whole village). However, it benefits from outline planning permission for the erection of 12 dwellings granted at appeal in January 2019.

1.1.4 Based on the current national and local planning context, we agree with the Council that the site to be suitable for formal allocation and we consider there to be a sound basis to allow development within the High Weald Area of Outstanding Natural Beauty ('AONB'). However, we consider the proposed policy requires modification for the reasons we set out within this representation.

1.7 Policy AL/GO 2 – Land at Triggs Farm, Goudhurst

1.7.1 By way of context, the land within our client's control covers an area of 1.49 ha. It constitutes an established detached dwelling (Kestrel) located within the limits to built development (LBD) and a larger cornfield situated adjacent, but outside of, the LBD boundary on the eastern fringe of Goudhurst.

[TWBC: for site location plan see full representation attached].

1.7.2 Kestrel is a large detached property. The property is broadly set at 90 degrees to the road frontage. The former cornfield where the majority of new homes are proposed is directly accessible via an existing private road and adjoins the rear boundaries of four detached properties (Merredene, Daintree, Scotney and Holly House). It extends to approximately 4 ha, albeit the allocation has been restricted to a much smaller area given the need to respond to the topography of the area.

1.7.3 South of the field is Triggs Farm, whilst to the east is Paynetts Farm. Both consist of a range of existing and converted agricultural buildings, including the listed Triggs Farmhouse.

1.7.4 Immediately west of the proposed entrance to the field is an electrical substation building. Beyond this is the sports pitch associated to Goudhurst and Kilndown Church of England School.

1.7.5 Goudhurst benefits from good access to a range of shops and services within the village centre and excellent links to nearby towns that offer enhanced employment, retail and leisure facilities. Furthermore, the site sits immediately east of Goudhurst and Kilndown Church of England Primary School.

1.7.6 Having regard to this context, proposed policy AL/GO 2 states:

'This site, as defined on the Goudhurst Policies Map, is allocated for residential development providing approximately 12 (11 net) dwellings, of which 40 percent shall be affordable housing.(1) Development on the site shall accord with the following requirements:1. Provide a new vehicular access onto Cranbrook Road, to include the demolition of the dwelling 'Kestrel';2. Development to be focused towards the flatter northern part of the site, on the area identified for residential use on the site layout plan;3. Regard to be given to existing hedgerows and mature trees on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment;4. The development shall take account of landscaping on-site and ensure provision of landscape buffers as indicated on the site layout plan;5. An archaeological desk-based assessment is required for the site;6. The development to be informed by an ecology assessment, to be submitted with the planning application;7. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PSTR/GO 1'.

Response

1.7.7 Our client supports the general thrust of the policy requirements, which largely reflects the current planning approval (reference 17/02765/OUT dated 16 August 2017 - illustrative layout below) but we seek modification to the detailed criteria and are concerned about the lack of engagement on the proposed allocation.

[TWBC: see approved illustrative layout in full representation attached].

1.7.8 Owing to the compelling housing need, we consider the below drawing provide an illustrative indication of how an alternative scheme could potentially be adapted to deliver a higher number of small units, with increased additional affordable housing and with no demonstrably greater impact on the AONB. We therefore consider the site allocation capacity should increase to 20 homes.

[TWBC: see intensified scheme in full representation attached].

1.7.9 Based on 12 homes (11 net), with 40% affordable provision, we are also concerned about the practicality of delivering 4 affordable units on site. Whilst the owner continues to explore all opportunities to secure a suitable Affordable Housing partner, this represents a significant challenge owing to the manner in which affordable units are managed. Four units, of which only two will be social rental, results in significant management costs that we understand to be prohibitive to stock acquisition. Based on this context, there should be recognition in the emerging policy that Affordable Housing may need to be provided in a more flexible tenure such that a developer may self deliver without needing to dispose of the homes to an Affordable Housing provider or by way of a commuted payment if it can be evidenced that an Affordable Housing partner cannot be secured.

1.7.10 Finally, we consider that the allocation is too prescriptive in respect of the proposed access. As part of the successful appeal, access was to be derived via the western edge of the property Kestrel. However, opportunities continue to be pursued in respect of the upgrading of the existing vehicle access track and making this safe. The benefit of this is that it would improve safety for all of those users that currently are served by the existing arrangement, including the properties to the north of the cornfield. For such a benefit to be achieved, it would require modification of the proposed wording.

1.7.11 In summary, the site is suitable, available and deliverable for development and is actively being promoted by our client. However, we object to the lack of dialogue and engagement in formulating the detailed criteria of the policy. Furthermore, to be a sound and deliverable allocation the yield of the allocation the wording should be amended as follows:

'This site, as defined on the Goudhurst Policies Map, is allocated for residential development providing approximately 20 dwellings, of which 40 percent shall be affordable housing.(1) Development on the site shall accord with the following requirements:1. Provide a safe access onto Cranbrook Road;2. Development to be focused towards the flatter northern part of the site, on the area identified for residential use on the site layout plan;3. Regard to be given to existing hedgerows and mature trees

on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment;4. The development shall take account of landscaping on-site and ensure provision of landscape buffers as indicated on the site layout plan;5. An archaeological desk-based assessment is required for the site;6. The development to be informed by an ecology assessment, to be submitted with the planning application;

7. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PSTR/GO 1'

1.8 8. Affordable housing to be provided on site, unless demonstrated that no suitable Affordable Housing provider can be secured. In such an event, there shall be a flexible approach to the Affordable Housing tenure so that it can be delivered without the need for an Affordable Housing provider, such as Shared Equity or First Homes or the onsite affordable may be replaced by a commuted sum towards provision off site Summary and Conclusions

1.8.1 This representation has been prepared on behalf of Mr D Masters in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. The purpose being to provide comment on the Council's proposed development strategy and the associated policies.

1.8.2 In this respect, we support the aspiration to meet housing need in full and consider that a dispersed growth strategy represents the optimum means to achieve this. Furthermore, we support the inclusion of our client's site in Goudhurst, but the detailed policy requires modification if the site is to be deemed deliverable.

1.8.3 We trust the contents of this representation are clear and hope that the comments are useful in guiding the forthcoming stage of the plan making process.

[TWBC: DHA's representation on behalf of Mr D Masters has been split into three separate areas: PSLP_481 - Vision and Objectives, PSLP_482 - Section 4: The Development Strategy, and PSLP_483 - Section 5: Goudhurst Policy AL/GO 2. For full representation see attached]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1.7.10 Finally, we consider that the allocation is too prescriptive in respect of the proposed access. As part of the successful appeal, access was to be derived via the western edge of the property Kestral. However, opportunities continue to be pursued in respect of the upgrading of the existing vehicle access track and making this safe. The benefit of this is that it would improve safety for all of those users that currently are served by the existing arrangement, including the properties to the north of the cornfield. For such a benefit to be achieved, it would require modification of the proposed wording.

1.7.11 In summary, the site is suitable, available and deliverable for development and is actively being promoted by our client. However, we object to the lack of dialogue and engagement in formulating the detailed criteria of the policy. Furthermore, to be a sound and deliverable allocation the yield of the allocation the wording should be amended as follows:

'This site, as defined on the Goudhurst Policies Map, is allocated for residential development providing approximately 20 dwellings, of which 40 percent shall be affordable housing.(1) Development on the site shall accord with the following requirements:1. Provide a safe access onto Cranbrook Road;2. Development to be focused towards the flatter northern part of the site, on the area identified for residential use on the site layout plan;3. Regard to be given to existing hedgerows and mature trees

on site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and landscape and visual impact assessment;4. The development shall take account of landscaping on-site and ensure provision of landscape buffers as indicated on the site layout plan;5. An archaeological desk-based assessment is required for the site;6. The development to be informed by an ecology assessment, to be submitted with the planning application;

7. Contributions are to be provided to mitigate the impact of the development, in accordance with Policy PSTR/GO 1'

1.8 8. Affordable housing to be provided on site, unless demonstrated that no suitable Affordable Housing provider can be secured. In such an event, there shall be a flexible approach to the Affordable Housing tenure so that it can be delivered without the need for an Affordable Housing provider, such as Shared Equity or First Homes or the onsite affordable may be replaced by a commuted sum towards provision off site

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Representations by Matfield Village Hall Committee in respect of Tunbridge Wells Borough Council's Pre-Submission Local Plan (PSLP)

The Committee of Matfield Village Hall (MVHC) considers that the PSLP is not sound with regard to PSTR/BM1 or AL/BM2 in that the views of MVHC were not specifically sought on the PSLP, or on the previous Draft Plan, or with regard to the allocation of adjacent land for development (now AL/BM2). This is despite the Village Hall being a community hub within the Parish of Brenchley and Matfield. MVHC made comments on the Draft Local Plan but did not have the opportunity to make its wishes and requirements known through consultation. MVHC is therefore of the view that the PLP is not positively prepared in that it did not take account of MVHC's views and that the allocation of the purple land for parking is not justified or effective and that better use can be made of this for community purposes. MVHC now makes the following representations:-

1) MVHC is prepared to accept, in principle, the allocated number of houses for this site, being 11-15 units, but would object to any increase in this number, because of the impact upon the Village Hall, upon the AONB and upon the adjoining Matfield Village Green Conservation Area. MVHC would have particular concerns about the security of the Hall and the possible use of the car park for overflow parking from the development. Parking for the Village Hall should be kept entirely separate from the development.

2) MVHC notes the provision of additional car parking on the land coloured purple and designated for "community use". Whilst MVHC previously made submissions that extra parking would be beneficial for the Hall, having reviewed the situation, the allocated area would be far in excess of that needed. Instead the majority of the land coloured purple should be used for community purposes outlined in paras (3) and (4) below. Some additional parking could be provided against the south wall of the Village Hall away from the "community use" land. An aspirational sketch, suggesting a possible layout for the land to the rear of the Village Hall, included in the purple land is attached.

3) A children's play area is considered essential for the village of Matfield and it is sensible for it to be sited near the community hub that is the Village Hall. The PSLP suggests that this could be sited on some of the landscape buffering land next to the Village Hall. MVHC suggests that this is sited on the land coloured purple, visible from the road (see sketch). It could be used in combination with an area of land, adjacent to the allocated site, behind the public lavatories. This land is in the ownership of Brenchley and Matfield Parish Council and was previously used as a small, preschool playground associated with the previous Village Hall. The provision of an adjacent area of land from within the allocated site would enable a proper play area for children of primary school age and younger to be created. A donation from the developer to equip it would be welcome.

It is envisaged that an allocation of approximately six to eight parking spaces could be made on land to the north of the Village Hall and should be sufficient to serve the playground. This would enable the rest of the Village Hall car park to be secured against random parking by installing chains across the car park to the island in the middle of the car park and then to the wall of the Village Hall.

4) MVHC request that the remainder of the land designated for community use should be made available to the Village Hall for use associated with the Hall such as receptions, outside exercise classes etc. This would be accessible from the rear of the Village Hall and would be a valuable addition to community use as well as providing landscape buffering for the Conservation Area and the adjoining AONB (see sketch).

5) Access to the land to the rear of the Village Hall should be for pedestrian use only apart from access for vehicles for mowing and maintenance purposes only. The Village Hall Committee objects to the laying of any roadway for general vehicle use as this would adversely affect the landscape buffering, which is crucial in the AONB, and visually impact upon the Matfield Green Conservation Area and the use of the land for community purposes.

6) MVHC would wish to see the imposition of speed controls along the B2160, Maidstone Road, outside the development and the Village Hall, particularly with the increase in traffic serving the proposed allocated site and the playground. The site is on a bend in the road and vehicles travel at speed heading north towards Paddock Wood with the result that the entrance and exit from the Village Hall can be dangerous. With a separate entrance to the site proposed, this will be even more dangerous.

It is accepted that speed humps, islands and chicanes are not appropriate but use could be made of speed cameras and signage. A pedestrian crossing, with appropriate warning signs, would also be welcome. This would be the case even if the site is not allocated for development.

[TWBC: Sketch added as supporting document]

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see above (5) with our Committees comments and proposed community use of the site. MHVC had not been consulted for such a major opportunity in our village

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Regulation 19 The Local Plan Re Policy STR/SS3 Proposal for a Tudeley Garden Village

I will send in the normal regulatory Form, but wished to express my views in letter form.

I have many concerns about the Local Plan, but my main objection is regarding the proposed Garden Village in Tudeley. STR/SS3.

I am a Resident in Pembury which borders the Capel area. We spent a year with my son in Golden Green, while our House was renovated. I have therefore become very familiar with the Capel using the route along the A228 to the B2017 from 5 Oak Green and Hartlake Road which crosses the Medway, which is set in this glorious Farmland.

TWBC did not address the many concerns the Community raised during the Regulation 18 consultation. 95% of the Response were against these proposals at that stage. TWBC representatives were dismissive of these objections at the meetings. Stephen Baughan the Building Inspector gave a reply at a meeting that "It was not a numbers game". Councillor McDermott told the Save Capel group that "They would never win". It is not surprising that the Conservative Council lost their Majority at the Local elections recently.

The wider concept of this Garden Village in 170 hectares of Agricultural and mixed Woodland is just wrong. The plan is to build 2,800 Homes initially on this Farmland, which had just been released from Green Belt status.

Before discussing the appropriate selection of this site, the principle that the Green Belt can be eroded like this has far reaching repercussions for the way all of our lives will be diminished if the green belt is taken and an ever-increasing Urban sprawl continues in the South East.

The specifics of why I feel that this is in the wrong locality are as follows.

INFRASTRUCTURE

There simply is not any. You have wide open Countryside at the moment.

TRANSPORT

All the roads from Five Oak Green to Tonbridge are totally congested every morning and evening. A major overhaul and a major expansion of the Road network would be needed, which I am sure that the good people of Tonbridge do not want. I also understand that BR will not entertain the idea of building a further Railway Station.

POLLUTION

Besides additional Road Traffic of all description with corresponding increases in air pollution and CO2 emissions. There will be increases in noise pollution, and not forgetting the light pollution which will transform the whole area.

WATER & SEWERAGE

Both are totally inadequate at present. A lot of investment would be needed to instal these services for a new population.

FLOOD RISK

The whole area is on, or close to Flood risk areas. Again the wrong development in the wrong area.

ENVIRONMENTAL CONCERNS

Should we not as Humans try to protect, restore, and expand our green and wild spaces, allowing nature to thrive, taking carbon from the air and boosting our health and wellbeing

This proposed new development would work against all of these principles. We have enough infrasture around the Towns of Tunbridge Wells and Tonbridge to gradually expand development , and leave this small remaining area of Green Belt for all to enjoy.

Please take some time to speak to the representatives of the save Capel campaign. They are not NIMBYS, but good people with the countryside a heart.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Most submissions under Regulation 18 were ignored by Council. The development is totally against the wishes of local Residents. There was little co-operation by the Council to provide timely plans for review. There was also a reluctance to engage with Tonbridge Council who do not want this Development on their border, for numerous reasons.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Vision must have been written by a PR Company, and is an insult to Residents' intelligence. It could not possibly be self-contained. The infrastructure would not be there. How could it be inspired by the Princes Foundation approach? It's two miles from Tonbridge. A walkable community? People would use their cars, vans etc. The roads around the area are already gridlocked. This would just increase the problem. The Masterplan makes provision for a railway station. BR have already stated that it would never happen. There is mention of a centre to include retail, employment and commercial services. The major stores, super markets have already said that the size of the development would not be sufficient to warrant their stores. There is mention of a new drainage system. It is currently farmland. The cost of these new services and infrastructure would be enormous starting from scratch. It is not suited on so many reasons. This includes the following.

INFRASTRUCTURE
TRANSPORT
POLLUTION, NOISE, LIGHT AND CO2 EMISSIONS
WATER AND SEWERAGE
FLOOD RISK

ENVIRONMENTAL CONCERNS. Do we really have to take an area out of the greenbelt? We need to be taking steps to keep urban sprawl to a minimum.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

I moved to Golden Green in May 2003 and have noticed a considerable increase in traffic since then, especially in the daily commute from Golden Green to Tunbridge Wells. Traffic congestion is worse than ever.

School and nursery places are increasingly harder to find. In fact no new primary schools have been built in this area since we moved in.

The same is true of local GP surgeries. The nearest surgery to us closed a few years ago.

Since 2003 the services in the areas have worsened eg. the fresh water quality and the electricity supply is unreliable.

The local flooding restricts access to our home in heavy rain conditions.

The environment is being destroyed by overdevelopment of the green belt.

There are already not enough services for this overpopulated portion of the South-East of England to envisage a development of this nature.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Roger & Nicola Maxted
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3 (for Tudeley Village)	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My family & I moved to Golden Green in May 2003, we have worked locally and in the surrounding area so we appreciate how long it takes to travel any distance at rush hour, am, pm and at school finishing times due to traffic congestion. When we arrived in the village, our children were 2 and 4 years old. The school and nursery places were at a premium and we didn't get our first choice for primary school or nursery as they were full!. To our knowledge no further primary schools have been built within the area. When registering for a GP Surgery, again we had to register with a GP surgery further away than the nearest. The nearest surgery to us closed a few years ago.

The services in the areas have progressively deteriorated. Water supply quality and sewage blockages; 2 in our first 10 years, 4 this year alone due to new build infills on green belt land within the village. The electricity supply is also temperamental as well as broadband and phone line.

Due to regular flooding from both the River Bourne and River Medway, there is very limited access in and around the areas as roads are impassable and bus service are unable to run. We are one of the lucky ones that haven't flooded yet, it's just a matter of time and this new development will hasten this as more land is developed. The environment is being destroyed by deforestation and the ecological erosion of the natural resources can't continue. We feel that the garden of England is being destroyed by over-development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Weald of Kent Grammar School and Bennett Memorial School; all in the local area. Over the years I have seen many properties be built on green belt land and not brown belt. Most recently, 4 houses in Golden Green built on METROPOLITAN GREEN BELT LAND. I remember saying as a 10 year old to my parents that I should save my pocket money to buy a piece of green belt and in 10 years time, I'd be able to build a house on it. My parents told me that green belt was for protecting the environment and that everyone should build on brown belt. 12 years later, houses are popping up all over green belt and every pub seems to be being turned into houses (see East Peckham and Hadlow). I should have saved my pocket money - the environment doesn't seem to matter to you.

You can see we are damaging our environment. Look at the flooding we have. As a village, when there is heavy rain, we are blocked in to the village through the River Bourne and River Medway. Even the buses can't enter the village.

Speaking of buses and traffic. The local traffic is appalling. Weald of Kent was our nearest school (3.1 miles according to the council). School finished at 3.35pm everyday. I would not get home until 5pm due to the 208 bus. At least once a week it also would not come. I did the journey just this week (half term holidays) from Weald to Home - 12 minutes. And yet 85 minutes plus at school time. Ridiculous.

I feel that the Garden of England is being turned into a building site. Everywhere we look, there are builders and scaffolding. The Garden of England is called The Garden of England because we're suppose to have greenery and beauty. I know Tunbridge Wells has lost its ROYAL but don't let Kent lose its GARDEN. Try saving the environment.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Build on Brown Belt - improves the environment by protecting the environment we are SUPPOSE to be protecting.

Council Tax to go to Tonbridge and Malling - Council tax is designed to improve infrastructure in the local area. The road from Paddock Wood, Capel and Tudeley is already overcrowded with dangerous road conditions and traffic. Try putting money into the roads that YOU want to populate further.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My parents, brother and I moved to Golden Green in May 2003 when I was almost 4 years old. Golden Green is the only home I know. I have grown up here, went to Hadlow Primary School, Weald of Kent Grammar School and Bennett Memorial School; all in the local area. Over the years I have seen many properties be built on green belt land and not brown belt. Most recently, 4 houses in Golden Green built on METROPOLITAN GREEN BELT LAND. I remember saying as a 10 year old to my parents that I should save my pocket money to buy a piece of green belt and in 10 years time, I'd be able to build a house on it. My parents told me that green belt was for protecting the environment and that everyone should build on brown belt. 12 years later, houses are popping up all over green belt and every pub seems to be being turned into houses (see East Peckham and Hadlow). I should have saved my pocket money - the environment doesn't seem to matter to you.

You can see we are damaging our environment. Look at the flooding we have. As a village, when there is heavy rain, we are blocked in to the village through the River Bourne and River Medway. Even the buses can't enter the village.

Speaking of buses and traffic. The local traffic is appalling. Weald of Kent was our nearest school (3.1 miles according to the council). School finished at 3.35pm everyday. I would not get home until 5pm due to the 208 bus. At least once a week it also would not come. I did the journey just this week (half term holidays) from Weald to Home - 12 minutes. And yet 85 minutes plus at school time. Ridiculous.

I would also like to point out that school children walk around Tudeley. I did part of my Duke of Edinburgh on that stretch of road and it is deadly. I felt sorry for the people who had to get the bus to school using that road. If you build more houses, there will inevitably be more children (unless you're building 2500 retirement homes) and thus more traffic and more children needing to get an education. I cannot believe that you have actually thought this through.

I feel that the Garden of England is being turned into a building site. Everywhere we look, there are builders and scaffolding. The Garden of England is called The Garden of England because we're suppose to have greenery and beauty. I know Tunbridge Wells has lost its ROYAL but don't let Kent lose its GARDEN.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Build on Brown Belt - improves the environment by protecting the environment we are SUPPOSE to be protecting.

Council Tax to go to Tonbridge and Malling - Council tax is designed to improve infrastructure in the local area. By building on the edge of the borough, most new residents will be using Tonbridge and Malling facilities NOT TUNBRIDGE WELLS.

The road from Paddock Wood, Capel and Tudeley is already overcrowded with dangerous road conditions and traffic. Try putting money into the roads that YOU want to populate further. If you increase traffic on that road, you need to consider the bus stops, footpaths, cycle paths and the quality of the road. When the 205 stops on Tudeley Road (B2017) in the morning and evening, it stops traffic flowing. Adding more travellers will just add to this traffic jam.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger

of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to

Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:*
 - 1) *Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.*
 - 2) *Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.*
 - 3) *For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.*
 - 4) *This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.*

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.*

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

5.91, 5.92, 5.93, 5.94

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger

of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to

Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:*
 - 1) *Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.*
 - 2) *Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.*
 - 3) *For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.*
 - 4) *This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.*

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.*

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	McCarthy Stone & Churchill Retirement Living
Question 2	
Agent's Name and Organisation (if applicable)	The Planning Bureau
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 2 Sustainable Design Standards

[TWBC: for further comments by McCarthy Stone & Churchill Retirement Living, please see Comment Numbers PSLP_2043-2047]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy EN 2: Sustainable Design Standards

Comment

The Council details its requirements for sustainable design criteria in the wording of Policy EN 2 and its supporting text. The design standards for residential development are based around achieving a certain rating and certification by the Home Quality Mark (HQM) by the BRE.

New residential developments will be assessed and certified by an independent assessor resulting in an additional level of complexity and scrutiny in the determination of planning applications. Our concern is that the Council will have insufficient internal capacity to assess new development against the HQM or that this matter will be administered by external assessors who are not required to adhere to statutory determination deadlines. HQM certification could result in both additional cost and delay to development coming forward in the Borough.

We also have more general concerns over the recent proliferation of third-party design standards and certification and the resultant complexity in the planning system. This was behind the Government's increased emphasis on the Building Regulations to improve design and there is clear focus and momentum from Government in preparing and enhancing standards. For example, Government has recently finished consulting on interim changes in both Part F and Part L of the Building Standards through the second consultation on *The Future Buildings Standards* and it is clear the energy efficiency

requirements for domestic and non-domestic buildings will increase sharply in the coming years. Considering this, the benefit of introducing third-party assessment and certification on sustainability measures appears limited.

We note that an allowance of 1.5% to 7% of build costs have been allowed to achieve Homes Quality Mark accreditation in the *Tunbridge Wells Local Plan Viability Assessment*. The lower end of the target is unrealistic, particularly given this uplift in costs is also intended to cover climate change mitigation measures.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Recommendations

Sustainable design can be achieved without the need for third party certification schemes and the benefits of accreditation by the Homes Quality Mark appear limited. We would request that Policy EN2 is deleted accordingly.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Aspects of the approach detailed in the Local Plan Review are of significant concern and warrant further scrutiny should they not be amended prior to Examination in Public.

McCarthy Stone & Churchill Retirement Living would however welcome the opportunity to engage and reach agreement on these matters with Council Officers.

Policy EN 3: Climate Change Mitigation & Adaption

Comment

The Council's commitment to meeting both its and the UK Government's target of net zero carbon emissions by 2050 is commendable and detailed at length in the justification to Policy EN 3.

The policy stipulates a tiered approach towards the reduction of operational CO₂, first requiring a 10% reduction below the Target Emission Rate in Building Regulations Part L via the 'fabric first' approach. Following this there would be a further 15% reduction in operational CO₂ through on-site renewable energy generation. This is a cumulative reduction totaling 23% of operational CO₂ below Part L.

While the benefits of both the 'fabric first' and 'on-site renewables' are detailed in the supporting text to this policy, the rationale behind the requisite target percentages for each method are not. How the reduction in operational CO₂ emissions would appear to be of little relevance and it would surely be better for a developer to utilize the method that is best suited to a particular site rather than adhere to a seemingly arbitrary ratio.

We note that an allowance of 1.5% to 7% of build costs have been allowed to achieve the climate change targets in the *Tunbridge Wells Local Plan Viability Assessment*. The lower end of the target is unrealistic, particularly given this uplift in costs is also intended to cover the Homes Quality Mark accreditation.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

That the tiered approach to the reduction in operational CO₂ emissions is substituted for a commensurate reduction (i.e. 23.5%) achieved by a method of the developer's choice.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Please find attached a joint representation made on behalf of McCarthy Stone and Churchill Retirement Living

We are independent and competing housebuilders specialising in retirement housing for older people. Together, we are responsible for delivering approximately 90% of England's specialist owner-occupied retirement housing. In light of this, it is appropriate to provide the Council with a single response representing our combined views on the Local Plan Consultation.

Please find attached our detailed comments with regards to the consultation. The viability report should be read in conjunction with the representation made in respect of Policy H3 "affordable housing"

[TWBC: the above text is from the covering email sent along with the representation]

Policy H3: Affordable Housing

COMMENT

The *Tunbridge Wells Borough Local Plan* is one of an alarmingly limited number that have set a differential affordable housing rate for brownfield (30%) and greenfield (40%) housing. This is of itself, highly commendable and suggests a greater focus on viability at the Plan making stage.

The wording of Policy HP3 and its justification makes it clear that a non-policy compliant level of affordable housing will only be allowed in exceptional circumstances and where sites are clearly subject to abnormal costs. It also states in the justification to the Policy that:

6.336 Where the policy requirements may not be achieved, the onus will be on the applicant to demonstrate robustly the reasons for this, and to provide a full viability assessment to support their proposals. As part of this, it will need to be shown that the correct land value was paid, as exceptional and abnormal costs should, in the first instance, be paid for through a reduced land value. The viability assessment must be provided as part of the application when originally submitted, will be made publicly available, and will be subject to review by independent viability consultants. The applicant is expected to meet the costs of this review. Where applications are made on this basis, any permission granted will be for a maximum of two years.

It is clear from the wording of the policy and its justification that the Local Authority is cognisant of the increased emphasis on Local Plan viability testing in Paragraph 54 of the NPPF. Given the Council's stance towards developer contributions and affordable housing, we find aspects of the evidence base underpinning these policies to be concerning.

The affordable housing targets set out in *Policy H3* are informed by the *Tunbridge Wells Local Plan Viability Assessment Stage 1 & 2* (LPVA) undertaken by the Dixon Searle Partnership. We note that the Stage 1 report has assessed the viability of older persons' housing typologies, which is welcomed.

In reviewing the methodology for assessing specialist older persons' housing, we note that many of the inputs align with the methodology detailed in the Briefing Note on Viability Prepared for the Retirement Housing Group (hereafter referred to as the RHG Briefing Note) by Three Dragons, although a number do not. A copy of the RHG Briefing Note has been provided as part of this submission, which could result in an unrealistic planning obligations burden in the next Local Plan. Our concerns are that the Viability Assessment has overplayed the viability of older persons' housing.

Mindful of the guidance in the PPG that is the responsibility of site owners and developers to engage in the Plan making process – McCarthy Stone and Churchill Retirement Living have provided a separate document with viability appraisals for sheltered and extra care older persons' housing typologies. **It concludes that these forms of development are not able to provide an affordable housing contribution or CIL on previously developed land in the Authority.**

On greenfield sites, both housing typologies can support a CIL rate of £150 per m² but does not generate sufficient uplift to support a 40% affordable housing contribution.

The PPG makes it clear that '*Different requirements may be set for different types or location of site or types of development*' (Paragraph: 001 Reference ID: 10-001-20190509). We are strongly of the view that it would be more appropriate to set a lower, potentially nil, affordable housing target and CIL rate for sheltered and extra care accommodation in the Borough.

The need for specialist older persons' housing detailed in the *Tunbridge Wells Housing Need Assessment* and in *Policy H6: Housing for Older People & People with Disabilities* and its supporting text. The Local Plan makes it clear that viable sites bringing these forms over development forward will be required over the Plan period. In burdening these forms of development with an unrealistic planning obligations regime, the Local Plan is considered unsound as these obligations are not justified, effective and the Plan is not positively prepared correspondingly.

[TWBC: the following text is from 'Review of Local Plan Viability Assessment for Sheltered & Extra Care Housing', which has also been attached as a supporting document]

REVIEW OF LOCAL PLAN VIABILITY ASSESSMENT FOR SHELTERED & EXTRA CARE HOUSING

1 Introduction

1.1.1 This supporting statement has been prepared on behalf of McCarthy Stone and Churchill Retirement Living, two independent and competing housebuilders specialising in housing for older people. Together, they are responsible for delivering approximately 90% of England's specialist owner-occupied retirement housing.

1.1.2 In this statement we critically appraise the evidence underpinning the affordable housing targets detailed in *Policy H3: Affordable Housing of the Tunbridge Wells Borough Local Plan (Regulation 19 Consultation)* – namely the *Tunbridge Wells Local Plan Viability Assessment Stage 1 & 2 (LPVA)* undertaken by the Dixon Searle Partnership.

1.1.3 This Statement is a focused document underpinning our representations to the Tunbridge Wells Local Plan Regulation 19 consultation on *Policy H3*. In the interest of brevity, it does not comprehensively cover Government policy on viability in Plan preparation or detail the residual land appraisal methodology at length. These matters are comprehensively covered in the LPVA.

1 Review of Local Plan Viability Study

2.1.1 The Tunbridge Wells Borough Local Plan is one of an alarmingly limited number that have set a differential affordable housing rate for brownfield (30%) and greenfield (40%) housing. This is of itself, highly commendable and suggests a greater focus on viability at the Plan making stage.

2.1.2 The wording of Policy H3 and its justification makes it clear that a non-policy compliant level of affordable housing will only be allowed in exceptional circumstances and where sites are clearly subject to abnormal costs. It also states in the justification to the Policy that:

6.336 *Where the policy requirements may not be achieved, the onus will be on the applicant to demonstrate robustly the reasons for this, and to provide a full viability assessment to support their proposals. As part of this, it will need to be shown that the correct land value was paid, as exceptional and abnormal costs should, in the first instance, be paid for through a reduced land value. The viability assessment must be provided as part of the application when originally submitted, will be made publicly available, and will be subject to review by independent viability consultants. The applicant is expected to meet the costs of this review. Where applications are made on this basis, any permission granted will be for a maximum of two years.*

2.1.3 It is clear from the wording of the policy and its justification that the Local Authority is cognisant of the increased emphasis on Local Plan viability testing in Paragraph 54 of the NPPF. Given the Council's stance towards developer contributions and affordable housing, we find aspects of the evidence base underpinning these policies to be concerning.

2.2 Older Persons' Housing Typologies

2.2.1 The affordable housing targets set out in *Policy H3* are informed by the *Tunbridge Wells Local Plan Viability Assessment Stage 1 & 2 (LPVA)* undertaken by the Dixon Searle Partnership. We note that the Stage 1 report has assessed the viability of older persons' housing typologies, which is welcomed.

2.2.2 In reviewing the methodology for assessing specialist older persons' housing, we note that many of the inputs align with the methodology detailed in the Briefing Note on Viability Prepared for the Retirement Housing Group (hereafter referred to as the RHG Briefing Note) by Three Dragons, although a number do not. A copy of the RHG Briefing Note has been provided as part of this submission, which could result in an unrealistic planning obligations burden in the next Local Plan. Our concerns are that the Viability Assessment has overplayed the viability of older persons' housing

2.2.3 Mindful of the guidance in the PPG that is the responsibility of site owners and developers to engage in the Plan making process, McCarthy Stone and Churchill Retirement Living have undertaken financial viability appraisals for sheltered and extra care older persons' housing typologies in this report to encourage dialogue with the Council.

1 Viability Appraisal Inputs

3.1 Introduction

3.1.1 McCarthy Stone and Churchill Retirement Living have considered the inputs and assumptions used in the financial viability appraisals for older persons' housing in the *Tunbridge Wells Local Plan Viability Assessment Stage 1 & Stage 2 (LPVA)*. A summary table has been provided in the table entitled: *Comparison of Appraisal Inputs* on page 6 this report.

3.1.2 Many of the inputs used in our appraisal of Sheltered and Extra Care housing typologies align with the methodology detailed in the *Briefing Note on Viability Prepared for the Retirement Housing Group* (hereafter referred to as the RHG Briefing Note) by Three Dragons. Where they differ is clearly stated in this report. A copy of the RHG Briefing Note has been provided as part of this submission.

3.2 Unit Sizes

3.2.1 Apartments for specialist older persons' housing tend to be larger than 'general needs' open market housing. The unit sizes used in the LPVS do however differ from those recommended in the RHG Briefing Note and no justification has been given for this deviation.

RHG Briefing Note Recommended Unit Sizes

1 bed

2 bed

Sheltered

50 m²

75 m²

Extra Care

65 m²

80 m²

3.3 Sales Values

3.3.1 There are currently two McCarthy Stone schemes currently selling in Tunbridge Wells - an Extra Care development (referred to as a Retirement Living Plus) at The Dairy, St. John's Road and a sheltered housing scheme (referred to as Retirement Living) at Southborough Gate, Pinewood Gardens.

3.3.2 *The Appendix III- Market Values & Assumptions Research* of the LPVS details the market prices for each of the aforementioned schemes – as advertised with a local agent. This sales values for each of the schemes are as follows:

DSP Sales Values: Tunbridge Wells

£per m²

Unit Price

The Dairy

£6,352

£431,735

Southborough Gate

£5,941

£423,000

3.3.3 The sales values used by DSP are however market prices and not the achieved prices. An element of negotiation is inherent in the housing transactions, and the achieved sales values are frequently lower than those advertised with estate agents.

3.3.4 The achieved sales values for the three closest selling schemes are detailed below:

Average Achieved Sales Values: Tunbridge Wells

£ per m²

1 bed

2 bed

The Dairy (Extra Care)

£6,116

£5475

Southborough Gate (Sheltered)

£5,430

£4,968

3.3.5 DSP advise that sales values for Extra Care and Sheltered Housing are the same as the overall upper range of values as used for the traditional market housing appraisals (£5,500 - £6,500/m²) and that even this could be considered conservative in their view.

3.3.6 The evidence from the sales values does support specialist older persons' housing achieving a premium on sales values, but not to the extent recommended by DSP. The RHG briefing note advises that Extra Care accommodation achieves an uplift on sheltered sales values – which is demonstrated in the Borough.

3.3.7 We have used the achieved sales values for the respective typologies in our assessment.

3.4 Unit Mix

3.4.1 The RHG briefing note recommends a 60:40 split for 1bed:2 beds. We have used the recommended mix.

3.5 Base Build Cost

3.5.1 We note that the *Local Plan Viability Study* uses the Median 'generally' Supported Housing BCIS costs re-based for Tunbridge Wells (5 year sample) which is £1,644 per m².

3.5.2 The sample size used for the 'generally' rate less than the 20 years we consider to be best practice and for this reason and more typically we will apply a rate specific to the number of floors proposed for a site-specific viability assumption.

3.5.3 Notwithstanding the above, we recognise that Local Plan Viability Testing is at a more generic level and we have applied the BCIS rate used in the LPVS accordingly.

3.6 Sales Rate

3.6.1 There are several specialist older persons' housing s developments that are either currently selling or have sold out recently within Tunbridge Wells.

3.6.2 The scheme with the fastest rate of sale is Southborough Gate, Tunbridge Wells. This is a 43unit sheltered scheme that has been selling since May 2019 (25 months) and has 11units left to sell or let at the time of writing. The rate of sale does however typically slow down following the initial year after opening and we note only 3 units were sold in the last 12 months.

3.6.3 A rate of sale of one unit per month, as per the RHG's best practice methodology, is considered by McCarthy Stone and Churchill Retirement Living to be, broadly speaking, an appropriate reflection of their sales rate nationally, albeit the rate of sale is lower presently.

3.7 Gross to Net

3.7.1 The RHG note stipulates a range of communal floor space between 20-30% of GIA for Sheltered and 35-40% of GIA for Extra Care.

3.7.2 The LPVA assumes communal space extending to 25% of the Gross Internal Area (GIA) for sheltered housing proposals – the mid-point of the range suggested by the RHG. The Consortium have frequently disputed the figures suggested by the RHG on this matter, contesting that a communal floorspace provision of under 25% is not representative of the sector. Our experience is that this percentage should be more than 25% of the proposed total area to cater for communal lounges, lodge manager office and guest rooms.

3.7.3 For Extra Care accommodation we would suggest that a minimum of 35% of GIA is allowed for non-saleable communal floorspace.

3.8 Benchmark Land Value

3.8.1 *The Appendix I – Local Plan & CIL Viability Assessment* – Residential Assumptions of the LPVS details the densities to which specialist older persons' housing developments will be built. It is assumed that:

- a 30 unit sheltered housing scheme will be built at 125dph which with an allowance for open space would result in a land area of 0.43 hectares.
- a 60 unit extra care scheme built at 125dph with an allowance for open space would result in a land area of 0.85 hectares.

3.8.2 While specialist older persons' accommodation is built at higher densities and 125dph is achieved on certain sites it is atypical of areas with a rural / suburban character and highly unlikely on a greenfield site - 80dph is considered more appropriate on greenfield land.

3.8.3 This viability assessment is based on a 50 unit sheltered and extra care scheme which is considered a more typically sized development.

3.9 Profit

3.9.1 We support the 20% profit margin allowed for in the LPVA although this should not preclude profit allowance higher than the 15-20% range for riskier proposals. Not only does this conform with the recommendations of the RHG Briefing note, but the Planning Inspectorate has also consistently concluded that an acceptable return for risk in respect of retirement living proposals is not less than 20% of gross development value. Examples include:

- . McCarthy and Stone proposal at Redditch (Appeal Ref: 3166677)
- . Churchill Retirement Living proposal at Cheam (Appeal Ref: 3159137)
- . Churchill Retirement Living scheme at West Bridgford (Appeal Ref: 3229412)

3.10 Empty Property Costs

3.10.1 Empty property costs are a function of council tax payable on finished unsold and empty property as well as the service charge which must be paid owing to longer than average sales periods for this type of proposal.

3.10.2 The Tunbridge Wells Council website details how the Council has applied the Council Tax Empty Property Premium. This advises that properties that are unoccupied are not entitled to any discount. Full council tax is payable on all properties unless specific circumstances apply. If a property should remain unoccupied for 2 years or more, an additional premium of 100% will be payable until such a time as the property is reoccupied. Properties that have been empty for more than 5 years will have an additional premium of 200%.

3.10.3 The flats at Southborough Gate, Tunbridge Wells sit within Council Tax Bands D (£1,985.94 per annum) & E (£2,427.26 per annum) for 1-bedroom flats and two- bedroom flats respectively. A typical 50-unit scheme will take over 4 years to sell out and as such substantial monies will be paid in Council Tax over this period.

3.10.4 Residents of specialist older persons' housing are also required to pay a service charge to pay for the upkeep of communal facilities and for staff costs. Service charges are higher for Extra Care accommodation because of the enhanced level of communal facilities and the increased staffing associated with on-site care. Staff and facilities need to be on-site and functional from when the first resident arrives and accordingly the companies subsidise the service charges of empty apartments while they are being sold. McCarthy Stone list their typical services charges on their website as follow:

McCarthy Stone – Typical Service Charge

1 bed per week

2 bed per week

Sheltered

£48.93

£138.27

Extra Care

£73.36

£184.31

3.10.5 Empty property costs as a result of Council Tax and Service Charge payments are therefore a substantial cost for older persons' housing. We have applied Empty Property Costs of £3k per unit of sheltered housing unit and £5k per unit of Extra Care accommodation.

3.11 Sales & Marketing Costs

3.11.1 Sales and marketing allowances for specialist housing proposals for older people are widely acknowledged to differ substantially from mainstream housing. This is due to the restricted occupancy and longer than average sales periods often extending over several years.

3.11.2 Sales and marketing activities in respect of this type of proposal are considerably more intensive and long running than mainstream housing and necessitate a sustained campaign with permanent sales staff on site over the course of typically years rather than months for mainstream housing.

3.11.3 The RHG Briefing Note advises that *"Marketing costs are typically 6% of revenue compared with 3% of revenue for general needs houses and flats."* This has been supported by a recent appeal decision in Redditch Appeal Ref: 3166677.

3.12 CIL & s106 costs

3.12.1 Tunbridge Wells Borough Council presently does not have a CIL charging schedule adopted. *The Local Plan & CIL Stage 1 Viability Assessment* however advises that a levy of £100 - £150 per m² is viable for sheltered housing across the Borough. We have tested the older person's housing typologies with these indicative CIL rates.

4.1 Older Persons' Housing Typologies

4.1.1 The outputs of the viability appraisals for older persons' housing typologies are summarised below for ease of reference. This FVA does not include any affordable housing as part of the appraisal and is therefore undertaken on the basis of a 100% private proposal.

4.1.2 We have assessed both Sheltered and Extra Care typologies against the Benchmark Land Values for Greenfield and Brownfield sites (See Chapter 3.8 of this report). We have also assessed the impact of the suggested CIL rates of £100 and £150.

4.1.3 All the greenfield scenarios tested result in a surplus against the benchmark land value, albeit not to the extent where a policy compliant level of affordable housing (40%) could be met.

4.1.4 On lower value previously developed land, Extra Care accommodation can still generate a surplus, but again it is not considered sufficient to deliver policy compliant levels of affordable housing (30%). It is worth noting that the high sales values achieved at The Dairy, which is located a short distance from the town centre, would be unlikely on lower value previously developed land. This would sit within the higher value area, with a commensurately higher BLV, (i.e. Commercial CBD / Residential) in which the financial viability appraisals generated a deficit.

4.1.5 Sheltered is largely unviable on previously development land, with the exception of lower value industrial with nil or £100 CIL. Again, it is unlikely that the sales values at Southborough Gate would be achieved in these locations.

4.2 Commentary on LPVS Results

4.2.1 McCarthy Stone and Churchill Retirement Living find the basis on which the affordable housing target is recommended across the Authority to be flawed. The results of the viability testing in *Chapter 3: Findings* of the LPVS overstates the viability of the older persons' housing typologies.

4.2.2 In respect of Sheltered Housing the *Stage 1 LPVS* advises that:

3.3.44 It should be acknowledged that from experience these types of schemes will tend to be on PDL, and regularly on sites with relatively high EUVs. However, the outcomes overall show that after allowing for the particular assumptions relevant to this development type, the strength of the sales values has the likely capacity to balance out, or go a considerable way towards balancing out, the higher costs associated with the construction of larger communal areas and the other adjusted (added) costs assumptions made. The typically reduced extent of external works, relative to those on general occupancy schemes, may also contribute to this balancing effect.

4.2.3 The 'balancing effect' of the higher sales values described by DSP appears to have been overstated. In determining sales values for Sheltered Housing, DSP based these on market values rather than achieved values and blended these values with Extra Care, which achieves a higher premium by virtue of the enhanced on-site care facilities. Furthermore, the sales rate used in the LPVS is unknown as the report is opaque on this matter, it is however highly likely that it was higher than the 1 unit per month currently being demonstrated by current selling schemes in Tunbridge Wells.

4.2.4 In respect of Extra Care accommodation the *Stage 1 LPVS* advises that:

3.3.48 With further increased communal areas and other appraisal adjustments made over and above those for the retirement/sheltered tests, as may be expected (and beginning to be seen through some

experience we have of site-specifics on these too), these results show viability levels beneath those schemes.

4.2.5 The LPVS acknowledges that the viability of Extra Care accommodation is more finely balanced and acknowledges that the viability may be affected by matters such as whether the development sits within use class C2 and requires an affordable housing contribution. This is welcomed however, again, we are of the view that the LPVS has overstated the viability of such schemes by determining sales values based on advertised market values rather than achieved values and applying a faster sales rate.

1 Conclusion

5.1.1 The Tunbridge Wells Borough Local Plan is one of an alarmingly limited number that have set a differential affordable housing rate for brownfield (30%) and greenfield (40%) housing. This is of itself, highly commendable and suggests a greater focus on viability at the Plan making stage.

5.1.2 The evidence we have provided in our viability appraisals for Sheltered Housing and Extra Care Housing typologies, presently the only evidence for these typologies, concludes that these forms of development should be exempt from affordable housing and CIL on previously developed sites.

5.1.3 On greenfield sites, both housing typologies can support a CIL rate of £150 per m² but does not generate sufficient uplift to support a 40% affordable housing contribution.

5.1.4 As a suggestion we would recommend a supplemental sub-clause to Policy H3 which read as follows:

i. Specialist older persons' housing including sheltered and extra care accommodation will not be required to provide an affordable housing contribution on previously developed land.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

RECOMMENDATION:

The evidence we have provided in our viability appraisals for Sheltered Housing and Extra Care Housing typologies concludes that these forms of development should be exempt from affordable housing provision and CIL on previously developed sites.

As a suggestion we would recommend a supplemental sub-clause to Policy H3 which read as follows:

Specialist older persons' housing including sheltered and extra care accommodation will not be required to provide an affordable housing contribution.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Aspects of the approach detailed in the Local Plan Review are of significant concern and warrant further scrutiny should they not be amended prior to Examination in Public.

McCarthy Stone & Churchill Retirement Living would however welcome the opportunity to engage and reach agreement on these matters with Council Officers.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 2044 Planning Bureau for McCarthy Stone and Churchill SI Review of Local Plan Viability Assessment.pdf](#)

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy H6: Housing for Older People & People with Disabilities

McCarthy Stone and Churchill Retirement Living are independent and competing housebuilders specialising in sheltered housing for older people. Together, we are responsible for delivering approximately 90% of England's specialist owner-occupied retirement housing.

Paragraph 1 of the PPG Housing for Older and Disabled people states:

"The need to provide housing for older people is critical. People are living longer lives and the proportion of older people in the population is increasing. Offering older people, a better choice of accommodation to suit their changing needs can help them live independently for longer, feel more connected to their communities and help reduce costs to the social care and health systems. Therefore, an understanding of how the ageing population affects housing needs is something to be considered from the early stages of plan-making through to decision-taking".

Paragraph: 001 Reference ID: 63-001-20190626

The *Tunbridge Wells Housing Need Assessment Topic Paper* details that the population aged 65 and over is projected to increase by 9,458 people by between 2020 and 2038, an increase of circa 40%.

It is notable that the population aged 85 and over, the demographic most likely to need long term care, is projected to increase in the Authority by 68% over the Plan period - an increase of 2,607 persons.

The *Housing Needs Assessment* assesses the need for specialist older persons' housing against the assumptions recommended in the 'Housing LIN SHOP@ tool' and Kent County Council's more local methodology, with the former advocating a need for 267 extra care units across the Plan period, and the latter 245.

We both note and commend the manner in which the housing needs of older people are comprehensively addressed in the emerging Local Plan, specifically within the wording of *Policy H6: Housing for Older People & People with Disabilities* and its supporting text. Furthermore, we support the part allocation of some strategic sites for the delivery of specialist older person's housing. We would however stress the importance of such developments being appropriately located - both representees typically bring forward development in close proximity to existing shops and services (within 0.5 miles of a town or local centre) to facilitate continued independence in later life. It is noted that paragraph 6.363 states that the need for older persons' housing will be met through a combination of site allocation policies and planning permissions on suitable sites.

We do note however that while the Housing Needs Assessment and the justification to the Local Plan considers the future need for extra care accommodation and residential care / homes provision, it does not assess demand arising over the Plan period for sheltered housing.

While the sub-section on parking provision for specialist older persons' housing advises that on-site parking will be required for these forms of accommodation, *Policy TP3: Parking Standards* does not provide a bespoke parking requirement. Specialist older persons' housing has a markedly lower levels of car ownership compared to 'general needs' housing and this should be reflected in policy. This is covered more comprehensively in our response to Policy TP3.

[TWBC: for comments on Policy TP 3, please see Comment Number PSLP_2043]

We would also, respectfully, highlight, that despite the positive manner which *Policy H6* addresses the Housing Needs of the elderly, it is undermined by the lack of consideration given to older persons' housing typologies in *Policy H3: Affordable Housing* and the *Tunbridge Wells Local Plan Viability Assessment Stage 2*. This matter is addressed comprehensively in our representation to *Policy H3* and in our supporting viability appraisal.

[TWBC: for comments on Policy H 3, please see Comment Number PSLP_2044]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

RECOMMENDATION

- 1 To consider the future demand for other forms of specialist older persons' housing, specifically sheltered housing.
- 2 To exempt sheltered and extra care housing from affordable housing contributions in Policy H3.
- 3 To provide bespoke parking standard for sheltered and extra care accommodation in Policy TP3.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Aspects of the approach detailed in the Local Plan Review are of significant concern and warrant further scrutiny should they not be amended prior to Examination in Public.

McCarthy Stone & Churchill Retirement Living would however welcome the opportunity to engage and reach agreement on these matters with Council Officers.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy TP3: Parking Standards

COMMENT

Vehicle Parking

We note that *Table 14: Residential Parking Standards* does not provide bespoke parking standards for specialist older persons' housing. At present these forms of accommodation would be required to meet the standards for one and two bedroom flats - a minimum of 1 space per unit and an additional 0.2 spaces per unit for visitors.

McCarthy Stone and Churchill Retirement Living have unrivalled experience in developing retirement housing for the elderly, having implemented well over 1000 Category II sheltered housing developments throughout England, Scotland and Wales.

It has been found that, of those residents who have given up car ownership, as the majority eventually will, a very significant proportion, of about 18%, do so at, or close to, the time that they enter this form of housing.

This reduction in car ownership is more pronounced for residents of 'Extra Care accommodation' which is specialist older persons' accommodation that is aimed at the 'frail' elderly. The average age of a resident in a McCarthy Stone 'Retirement Living Plus' (Extra development) is currently 83 years old.

The PPG Housing for Older and Disabled People attempts to define some of the forms of older persons housing to meet the “diverse needs of older people” but notes

There is a significant amount of variability in the types of specialist housing for older people. The list above provides an indication of the different types of housing available, but is not definitive. Any single development may contain a range of different types of specialist housing.

This variability will result in considerable variability in parking needs and requirements. It is contended that it would not be possible or appropriate to attempt to apply standards to all these forms of accommodation.

The residential car parking standards in Table 14 would constitute a significant level of over provision in our view and would make it extremely difficult to deliver these types of development in the most sustainable locations (i.e. within 0.5 miles of a town or local centre) as such locations tend to be spatially constrained. We do however note that Policy TP3 states that a lower parking standard can be justified within Royal Tunbridge Wells town centre.

Electric Vehicles

In respect of the standards for charging points for electric vehicles, we note that the Local Plan refers to minimum standards in the Council’s Guidance Note for applicants. As electric vehicle charging technology is progressing rapidly we feel that the provision of a quota of charging points runs a significant risk of obsolescence. The provision of cabling to car parking spaces to enable future installation of charging point in line with the wishes of residents is a more practical measure.

Cycle Parking

As referenced earlier, sheltered housing and in particular Extra Care accommodation, is used by older people who tend to be frail and are likely to have mobility difficulties. Were an older person likely to cycle on regular basis it would be unlikely they would require extra care accommodation.

A survey of 242 McCarthy and Stone Retirement Living units showed only 7 bicycles owned by residents in these apartments. This is an ownership rate of 0.0289 cycles per apartment or 1 cycle per 35 apartments.

Whilst we can understand the rationale behind encouraging cycling in the general population, we consider that a requirement for cycle spaces in specialist older persons’ housing to be inappropriate and unnecessary. Both companies provide an internal mobility scooter store for use by residents which is a far more relevant requirement and in the handful of instances that a resident has used a bicycle it can be stored in this area.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

That for older persons housing, the standards should identify that car parking requirements are assessed on a case by case basis

- 1 To require the provision of cabling to all unallocated car parking spaces to enable future installation of electric vehicle charging points in line with demand from residents.
- 2 For cycle parking in Extra Care & Sheltered housing developments to be limited to provision for staff and visitors.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Aspects of the approach detailed in the Local Plan Review are of significant concern and warrant further scrutiny should they not be amended prior to Examination in Public.

McCarthy Stone & Churchill Retirement Living would however welcome the opportunity to engage and reach agreement on these matters with Council Officers.

Question 1

Respondent's Name and/or Organisation	Mr Norman McChesney
---------------------------------------	---------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 5

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Duty to cooperate

The Local Planning Authority (LPA) is required to cooperate consistently, actively and on an ongoing basis with other bodies during the preparation of the plan. Site 413 (the Site underlying Policy AL/HA5) was removed from the Local Plan in December 2020 after months during which well-argued points against its inclusion were made and after Kent CC Highways made strong objections to major developments given high traffic flows and severe congestion at Hawkhurst crossroads. Less than a month later, Site 413 was put back into the Local Plan to accommodate a medical centre with provision for what would likely be a substantial number of parking places. In performing such a reversal of policy over such a short period with no public consultation, the LPA has shown itself to be severely deficient in its "strategy for involving the community in the preparation and revision of plans and the consideration of planning applications" as stated in Paragraph 2.1 of the Guidance Notes.

Soundness

1 Not Positively Prepared

The strategy has not been positively prepared and this can be highlighted in two areas:

i Traffic

The LPA has not made adequate allowance for the effect of increased traffic flows. In the course of a judicial review (White House, Hawkhurst) we learn that on 4 September 2017, Ms Hubert - the Principal Transport and Development Planner in the Highways and Transportation Division of KCC - sent an email to councillors and officers of KCC and the Defendant attaching a document entitled "KCC Highways Position Statement: Development in Hawkhurst – Summary". In the email, she stated that the statement set out that KCC Highways would be objecting to any further development within Hawkhurst village boundary "owing to the impact on the already congested junction being **severe**" (Reference TW19/01271 Decision JR 11 November 2020). The proposed medical centre would unite the two existing practices in Hawkhurst with additional related facilities and substantial parking. The Site is at the very edge of the eastern part of the village and is 800 metres from the crossroads. Hawkhurst residents in the more populous areas south, west and north of the crossroads would most likely drive to the new medical centre as would the many patients living outside the village. These added traffic flows would increase pressure on the already congested crossroads and this would be compounded by tailbacks along the Rye Road leading to further congestion at its junction with Birchfield Grove where traffic flows would be significantly increased because of traffic to and from the new medical

centre. It should be noted that in relation to the application reference 19/01299 to build six bungalows opposite Birchfield Grove, KCC Highways and Transportation commented (26 July 2019) that:

“Rye Road is a busy distribution route where the last recorded speeds in connection with the development opposite [that is, Birchfield Grove], were in excess of 40 mph.”

In this context it should be noted that despite the 30mph zone being extended beyond the Birchfield Grove development, almost all vehicles exiting the village eastward accelerate to or beyond 40mph even before arriving at the Birchfield Grove junction.

Regarding Birchfield Grove itself, the sightlines both to left and right along Rye Road are poor. The width of the mouth of the road joining Rye Road is too narrow to allow a vehicle to exit safely onto Rye Road if another vehicle is turning in at the same time. Whilst this is manageable in the context of 26 dwellings (that permitted and constructed at Birchfield Grove), the situation would likely become highly dangerous, if the plan goes ahead, given the high number of traffic movements likely to be associated with a medical centre incorporating the two existing surgeries plus related facilities. Although Birchfield Grove is quite short at approximately 130 metres long, it has been constructed with appropriate minimal width and with four curves along its length to give the development a rural character. If Birchfield Grove had been planned as part of a larger development to include the current 26 dwellings plus a medical centre with its own facility for (somewhat transient) parking for staff and visitors, which is what it will become if the proposal for the Site goes ahead, such a curved road of minimal width would never have been contemplated. Birchfield Grove is of a width appropriate only to its current size and visitors' parking is limited to space for only two vehicles. Covenants allow roadside parking for vehicles delivering goods and carrying out maintenance including painting and decorating or small building works for residents at any reasonable time of day and such covenants would need to be respected if the introduction of traffic restrictions in Birchfield Grove were ever contemplated.

Birchfield Grove has a single point of access and there is no provision for an internal loop. If the proposals for the Site as outlined in the Local Plan were to go ahead, Birchfield Grove would most likely become highly congested given the high volume of through traffic to and from the proposed development with the likelihood of complete stoppage of traffic flow in the event of vehicle breakdown. The twists on the road in Birchfield Grove are sufficiently tortuous that a high level of traffic is likely to lead to vehicles mounting kerbs and pavements when faced with oncoming vehicles. This point is clearly illustrated in the first attached photo. On grounds of traffic considerations alone, this development is not sustainable.

ii AONB

The LPA has not taken proper account of the fact that Site 413 is in an especially prominent position dominating the fine AONB landscape to the north. The Site stands on the highest part of a ridge and any building on this site would be visible from miles around to the north. A medical centre with substantial parking would have a severely detrimental visual effect on the AONB. The effect would be even worse with the car park likely to be illuminated by electric lighting up to at least 8.00 pm in winter months and this, moreover, in the context of Birchfield Grove having been planned with a dark sky policy. The landscape to the north is shown in the second photo attached. The view looking south to Site 413 from a public footpath, commonly called the bridle path and close to Water Lane, is shown in the third photo. The proposed medical centre with many parked cars would stand on the green area in front of the white double gable-like frontage of what is No. 25 Birchfield Grove in the photo and would be highly visible when viewed from many parts of the surrounding countryside.

The earlier decision by the Secretary of State (13/00014) of 14 April 2014

A Planning Inspector, in the appeal against the decision of the Council to refuse application no.13/00014 (an application for the development of a larger site at the same location) dismissed an appeal against the refusal of 120 dwellings at the Site for the following reasons:

- . The development would have a materially harmful visual effect on the AONB

- . It would fail to represent the high standard of urban/rural design required by policy

The AONB reason over-rode all of the other issues raised by the appellant. Though the present plan is for a medical centre without houses, the proposed medical centre with the attendant substantial parking would fulfil the conditions that made application no. 13/00014 unacceptable in 2014. If the development were to go ahead, a highly attractive piece of open landscape located high on a ridge would be gone forever. On environmental grounds the development is not sustainable.

2 Not Justified

The strategy underlying Policy AL/HA5 cannot be justified in that it has not taken account of reasonable and indeed viable alternatives and is therefore not based on proportionate evidence as stipulated in Paragraph 3.1 of the Guidance Notes.

There are better alternative sites for a medical centre:

i King George V Playing Fields, The Moor

This site, under Policy AL/HA6, contained provision for a medical centre until it was removed in January 2021. In the current Local Plan, the site is allocated for development of a community facility. The Site Layout Plan is given in Map 48. Immediately adjacent and to the east of this site is a piece of land over an acre in size owned by Hawkhurst Parish Council who has been willing to release this land to provide a community facility which would include a medical centre. Such a plan would make efficient use of land already partly developed and there would be an economy of scale regarding parking since it would be shared by all users of the combined facility. Siting a medical centre on this site would have a significantly less harmful visual effect on the landscape than siting it on the high ridge at the edge of the village (Land north of Birchfield Grove). This site would serve the whole Moor area including Stream Lane and Horns Road as well as Moor Hill and Highgate Hill including the various streets leading off the latter. Since this whole area is more populous than that of the village east of the crossroads, pressure on the crossroads is likely to be less than if the medical centre were sited north of Birchfield Grove.

ii The Hawkhurst Community Hospital

Since this site has already been developed, siting a medical centre here would, like siting it in King George V Playing Fields, have less harmful implications. There would also be an obvious advantage through the synergy resulting from two establishments providing related services to the community and existing in the same location.

iii Hawkhurst Golf Course

The planning application for this site continues to make provision for a medical centre. This site is about 600 metres from Hawkhurst crossroads and has thus a fairly central location.

3 Not Consistent with National Policy

In Section 15 of the National Planning Policy Framework (NPPF) Paragraph 170, it is stated that planning policy and decisions should contribute to and enhance the natural and local environment by various means (six are listed) including (a) protecting and enhancing valued landscapes, (b) recognising the intrinsic character and beauty of the countryside and (e) preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans.

Following on from this, it is stated in Paragraph 172 that "Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks and the Broads. The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest."

According to the conditions that should apply to planning policy as set out in the NPPF, the siting of a medical centre in Site 413 with significant parking facilities in such a prominent position in the AONB dominating the landscape to the north is only justifiable in exceptional circumstances. It is clear from

the reasonable alternatives set out above under '2 Not Justified' that exceptional circumstances do most certainly not apply.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The siting of a large medical centre in a prominent position in the AONB in land to the north of Birchfield Grove is so inappropriate by reason of (i) damage to AONB, (ii) unacceptable additional pressure of traffic flows on Rye Road and at the Hawkhurst crossroads and (iii) excessive and unacceptable pressure from traffic on Birchfield Grove, that the only possible modification to the Local Plan to make it sound is to remove it from the plan and reposition the medical centre at King George V Playing Fields.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)
---	---

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	<input type="checkbox"/> Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Ruth McChesney
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/HA 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My objection relates to the adverse impact that a building of the size and scale of the proposed medical centre would have on the High Weald Area of Outstanding Natural Beauty. The mass of a large building situated on the top of a slope, as it would be on this site, would dominate and overwhelm a sensitive view. To help illustrate this concern, I attach three pictures. One is of the view of the site from Potter's Lane (north north-west of the site); the other two are of the newly opened Ivy Court Surgery in Tenterden. To have a building of anything remotely approaching the size of the Tenterden Surgery on such a sensitive site would be, in my view, appalling and a gross detriment to the AONB.

It is worthy of note that even in the central town site of Tenterden, Ashford Borough Council was originally minded to oppose the planned Surgery, stating that "the proposed height, bulk and massing of the building was of substantial concern".

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Medical Centre must be located on a more suitable site - may I suggest the King George V Playing Fields near the proposed new Community and Sports Centre?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mr Ian McConnachie [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Ian McConnachie [REDACTED]
Comment ID	PSLP_854
Response Date	28/05/21 14:13
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.3
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Ian McConnachie
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_853 and PSLP_854]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP *and within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures (see web link) .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. The *ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those *of people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . **Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards

and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance

when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Version	0.3
Question 1	
Respondent's Name and/or Organisation	Ian McEwen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BM2	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

The Plan's discussion of sustainability issues with regard to Matfield is misleading and therefore unsound. It states (para. 5.486) that "the level of growth takes account of its proximity to Brenchley, better travel connection to Paddock Wood, and local benefits". Although the two villages are little more than a mile apart they are not easily accessible from each other except by car. It is not feasible to walk

from Matfield to Brenchley to access education and health (or other) facilities as there is no paved path between the two villages, cycling on the narrow but fairly busy road is dangerous, and the bus service only runs once every hour and a half to two hours.

Similarly, Paddock Wood is not easily accessible from Matfield without a car. As the Plan itself states, Matfield is only 0.2 miles closer to Paddock Wood than Brenchley is. Walking is impractical, cycling is dangerous on a very busy road with much HGV traffic and bus services are no better than once an hour. Also, the Plan does not expand on what it means by the "local benefits" of Matfield; and the proposal to build additional GP facilities at Horsmonden (because existing facilities will not be able to cope with the planned growth in population) will make life more difficult (not easier) for residents of Matfield who might have to travel an additional two miles to visit a doctor.

With regard to biodiversity, Policy EN9 states that development will only be permitted where it can be demonstrated that "that completion of the development will result in a measurable long-term net gain for biodiversity". The policy sets out various ways of achieving this but states that the net gain should be a minimum of 10%. The site in AL/BM2 is currently very diverse as it has been, effectively, a wildlife reserve for many years. It supports bats, badgers, foxes and rabbits as well as a variety of birds, smaller mammals and insects. While it might be possible for development there to mitigate some of its adverse effects on biodiversity, it does not seem to be feasible that any action could be taken which would lead to a 10% gain in biodiversity once 11-15 houses had been built. In this respect, therefore, the Plan is also unsound in seeking to develop the site on Maidstone Road.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

As set out above, I consider that the Plan's proposals to develop land for housing on the area described in Polcy AL/BM2 are unsound for several reasons. My suggested modification would be to remove that location as an allocated site.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It has recently been highlighted that TWBC are proposing to permanently close Hartlake Rd due to the Capel development. I wish to strongly object to such a ridiculous proposal. To close this road will cause untold problems for residents living on the TMBC side of Hartlake, increasing both traffic congestion and length of journeys. Hartlake is the main route for thousands in the villages of East Peckham, Hadlow and Golden Green. It will also create massive problems on the A26 Hadlow Rd. The entire development of Capel is strongly objected to and will cause increased flooding problems for thousands living downhill from it. The complete disregard and contempt by planning officers of TWBC in these matters for residents within TMBC has been abhorrent from the start.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Objection to local plan STR/SS3

I object to the proposed plans for the following reasons.

Green belt. It's supposed to be protected. TWBC will be failing their duty to do that.

Flooding. The development can only cause increased flooding downhill and downstream in East Peckham and Yalding, areas that already suffer due to over development of green belt.

Much if the development will be in a flood plain.

The pressure on the hospital which is already busy with long waiting lists.

The burden on GP's that are already very difficult to see.

Increased traffic on unsuitable roads. Hartlake Rd cannot cope with such an increase and the proposal to close it will cause chaos for the villages on the TMBC end of it.

Light pollution affecting the night sky.

Massive carbon footprint and pollution.

The destruction of countryside, wildlife, their habitats, farmland, tradition, heritage and the rural way of life.

Disproportionate allocation of housing within the borough leading to the ruin of a peaceful community.

The contempt and disregard for residents within TMBC. If TEBC want a massive development they should accept it further into their borough and accept the negative effects rather than put that misery into TMBC residents.

The entire area has not the infrastructure to cope with the proposed development.

97% of respondents opposed the local plan yet TWBC have done nothing to address this, merely made revisions that worsens matters.

Planners and councillors failing in their duty to represent their parishioners and residents.

All told, an entirely ridiculous plan showing no concern for the public or the environment.

Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

"5.91, 5.92, 5.93, 5.94"

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods at the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger

of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic.3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to

Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:*
 - 1) *Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.*
 - 2) *Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.*
 - 3) *For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.*
 - 4) *This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.*

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.*

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a resident of the area and will be affected

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	David Millen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1910, PSLP_1915, PSLP_1916, PSLP_1917 and PSLP_1918]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

. according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID).

How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	David Millen ([REDACTED])
Email Address	[REDACTED]
Address	- Benenden -
Event Name	Pre-Submission Local Plan
Comment by	David Millen ([REDACTED])
Comment ID	PSLP_1915
Response Date	04/06/21 14:54
Consultation Point	Policy AL/BE 2 Feoffee Cottages and land, Walkhurst Road, Benenden (View)
Status	Processed

Question 1	
Respondent's Name and/or Organisation	David Millen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1910, PSLP_1915, PSLP_1916, PSLP_1917 and PSLP_1918]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

. according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	David Millen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1910, PSLP_1915, PSLP_1916, PSLP_1917 and PSLP_1918]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	David Millen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1910, PSLP_1915, PSLP_1916, PSLP_1917 and PSLP_1918]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

. according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	David Millen
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden

Policy AL/BE2 2 Feoffee Cottages and Land, Walkhurst Road, Benenden

Policy AL/BE3 Land at Benenden Hospital (south of Goddards Green Road), East End

Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End

EN1 Sustainable Design

Sustainability Statement

[TWBC: this representation has been input against Policies AL/BE 1, AL/BE 2, AL/BE 3, AL/BE 4 and EN 1 – see Comment Numbers PSLP_1910, PSLP_1915, PSLP_1916, PSLP_1917 and PSLP_1918]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 **The plan is unsound because of inadequacies in the consultation process.**

. Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

. **Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.**

. **There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP)** although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

. Looking at the issue in terms of its hectareage:

. according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;

. according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.

- according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

- **Poor consultation with stakeholders, the local community and the neighbouring parish** (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.
 - **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).

- The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>.
- Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about*. At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

- Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.
- The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

- AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates**. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the

- northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
 - . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
 - . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
 - . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs* , Benenden).
 - . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the

BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a

choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf>

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID).

How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 2 The Strategy for Paddock Wood Town Centre

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a resident of 40+ years in east Peckham the proposal to turn the paddock wood rail bridge to bus access only is beyond ridiculous.

This route is used by east Peckham residents to access paddock wood for rail, shops, friends houses, services including the health centre and vets

A through route to the matfield, and then the surrounding villages including brenchley

But also for access to a21 and beyond

The idea to close the bridge to everything except buses is to be frank absolutely ridiculous.... please try and access try and access the services named above but go the route you have suggested but take in mind the extra traffic due to the houses that are being built..

Reality is paddock wood will lose out and business will not be supported and this would be a shame

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (page36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area’s housing need. It confirms that the area’s housing need

remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.3 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.4 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.5 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3×1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing Needs of other Authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.8 In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.9 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Chittenden Fields, Hawkhurst site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.10 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.11 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells' analysis.

5.12 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.13 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.14 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.15 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.16 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.17 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement

for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.18 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.19 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.20 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.21 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore the Plan should be found not to be legally compliant and should not be examined further.

5.22 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of the Plan Period

5.23 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 (now 4th June 2021), followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.24 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.25 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.26 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months).

As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.27 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.28 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.29 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Chittenden Fields, north of High Street, Hawkhurst. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.30 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings. 5.31 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings. 5.32 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Chittenden Fields, north of High Street, Hawkhurst. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.33 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.34 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.31 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.32 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Chittenden Fields, north of High Street, Hawkhurst. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.33 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.34 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.35 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed.

5.36 The Council has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose Plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.37 Irrespective of the failure to comply with the Duty to Co-operate, it is our opinion that the Policy cannot be said to be sound on the basis for the reasons summarised as follows:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated; b) It is not positively prepared as it fails to boost the supply of housing

by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); ande) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.38 In order to address these matters of soundness, several amendments are suggested:

1. That policy STR1 is amended to:A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.
2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1. Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area's minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2. The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area's housing need. It confirms that the area's housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review.

5.3. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East.

5.4. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.5. The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.6. The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.7. Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3×1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the Council should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.8. In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing needs of other authorities

5.9. As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.10. In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs.

5.11. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.12. A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach.

5.13. For the reasons detailed in the representations, had the draft Submission Local Plan included the land west of Iden Green Road, Benenden site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.14. The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.15. The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within

appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells's analysis.

5.16. The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.17. Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.18. Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.19. The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells).

5.20. The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.21. The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Maling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.22. The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.23. The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.24. Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.25. Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.26. As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore, the Plan should be found not to be legally compliant and should not be examined further.

5.27. If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of Plan period

5.28. Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.29. A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.30. The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.31. Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.32. As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.33. To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.34. If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa.

5.35. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land west of Iden Green Road, Benenden. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.36. The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.37. For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.38. In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings.

5.39. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients on land west of Iden Green Road, Benenden. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.40. The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.41. The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.42. Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); and
e) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.43. To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period - Robustness of Supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area’s minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area’s housing need. It confirms that the area’s housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas’ high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South-East.

5.3 The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.4 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the Council commits to delivery within policy STR1.

5.5 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.6 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3 x 1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the Council should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.7 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing needs of Other Authorities

5.8 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa. We contend that the authority should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.9 Paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities. The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs.

5.10 Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the authority incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.11 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach. For the reasons detailed in the representations, had the draft Submission Local Plan included the Home Farm, Rusthall site, this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.12 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the authority had failed to comply with the Duty to Co-operate.

5.13 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 3) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by

the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Wells's analysis.

5.14 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore that Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach. The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.15 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 4). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the authority had Achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.16 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the Council to take.

5.17 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 2). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.18 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

"6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings."

5.19 The TMBC LP Inspector (appendix 2) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty.

5.20 As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.21 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.22 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.23 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.24 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Accordingly, the Plan should be found not to be legally compliant and should not be examined further.

5.25 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of Plan period

5.26 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.27 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.28 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.29 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.30 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.31 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.32 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is consequently an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Home Farm, Lower Green Road, Rusthall.

5.33 For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.34 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,721 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.35 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the Plan is consequently between 5,976 and 6,361 dwellings.

5.36 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings.

5.37 It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed. One site which should be included as an allocation is the land controlled by our clients at Home Farm, Lower Green Road, Rusthall. The suitability of this is detailed in the section with respect of the omission site.

Conclusions

5.38 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing. This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.39 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed. The authority has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.40 Irrespective of the failure to comply with the Duty to Co-operate, the policy is not sound with respect of:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); and
e) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.41 To address these matters of soundness, several amendments are proposed. The proposed changes are.

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 2)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 3)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 4)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 5)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 6)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 7)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 8)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 9)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these polices, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

5. POLICY STR1: THE DEVELOPMENT STRATEGY

Representations

The Housing Requirement and Plan Period and robustness of supply

5.1 Policy STR1 indicates that the Local Plan must accommodate land for at least 12,204 dwellings and 14 hectares of employment land over the period 2020-2038. The accompanying Housing Needs Assessment Topic Paper details the derivation of this housing requirement through determining the area's minimum Local Housing Need consistent with the NPPF (Appendix 1). The appendix (Page 36) of the Housing Needs Topic Paper recognises that the equivalent annual figure (678dpa) which derives the overall plan requirement of 12,204 is the result of a 40% cap within step 3 of the Standard Method Calculation (PPG ID ref 2a-004-202021216).

5.2 The PPG (ID ref 2a-007-20190220) is clear that application of the 40% cap within step 3 of the Standard Method does not reduce an area's housing need. It confirms that the area's housing need remains the uncapped figure which the authority should seek to address at the earliest opportunity, including through an early review. To avoid an early review the authority should consider the scope that the area could address the uncapped housing need of the area, especially as the Housing Needs Topic Paper (paragraphs 2.25 and 2.26) recognises that the areas' high median workplace affordability ratio was influenced by wider macro-economic factors and housing needs associated with London, and the wider South East. The failure to consider the scope for a higher housing requirement through either inclusion of the uncapped housing requirement or an alternative uplift to contribute towards addressing acknowledged unmet housing needs of other authorities is a key concern that the draft Submitted Plan is inconsistent with National Policy.

5.3 The Housing Needs Topic Paper (paragraph 2.15) suggests that the Borough's uncapped housing need is for 741dpa (Page 35 of the Topic Paper indicates that the figure is 749dpa), rather than the 678dpa that the authority commits to delivery within policy STR1.

5.4 The Housing Needs Topic Paper (Step 2 as shown in appendix 1 (page 35)) indicates that the median workplace affordability ratio relied upon within the calculation is 12.76. This was the figure issued in March 2019 and related to 2018. However on 25th March 2021, the 2020 based affordability ratios were issued and this indicates that the figure for Tunbridge Wells Borough is now 13.27. The application of the approach in Step 2 of the Standard Method (PPG IS ref 2a-004-20201216) means that the 13.27 affordability ratio results in an increase of 57.9375% above the household projections, rather than 54.75% as detailed in the Topic Paper.

5.5 Using the same annual average increase in households (2020-30) which the authority has used in their Topic Paper (484.3) means that the correct uncapped housing need for the Borough would be 765dpa (484.3 x 1.579375). The revised uncapped figure using the latest affordability ratios is therefore 12.8% above the 678dpa within the draft Submission Local Plan. This is consequently the figure the authority should have included as the minimum requirement as it would have exceeded the capped figure which would therefore contribute towards needs arising in other authorities. This is explained further below.

5.6 In addition to challenging the failure to consider address the Borough's uncapped housing need of 765dpa, we dispute the reasonableness of the expected Plan period and its consistency with the obligation to provide strategic policy for at least 15 years post adoption (NPPF, paragraph 22).

Housing Needs of other Authorities

5.7 As indicated above, the uncapped housing need for the Borough is 765dpa compared to the capped figure of 678dpa.

5.8 We consider that the Council should have used the uncapped housing requirement as the basis for determining the Borough's annual housing needs as it provides a greater boost towards meeting the Borough's housing needs consistent with the NPPF (paragraph 60).

5.9 In addition, paragraph 60 is clear that in determining an areas' housing needs account should be taken of any requirements which cannot be addressed by neighbouring authorities.

5.10 The Council's Duty to Co-operate (DtC) Statement summarises the discussions and engagement that the authority has had with other bodies pursuant to the Duty to Co-operate. The DtC Statement is clear that Sevenoaks District has identified a clear challenge for that authority to meet its' housing needs. Whilst the DtC Statement indicates that Tunbridge Wells Borough does not consider it can contribute towards addressing unmet housing needs from Sevenoaks district, it is clear that had the Council incorporated the uncapped housing need of 765dpa, rather than 678dpa the difference of 87 dwellings annually could have made a valuable contribution towards the significant unmet needs of Sevenoaks District.

5.11 A review of the Council's Sustainability Appraisal which considered the impacts of uncapped housing growth (growth strategies 10 & 11) indicates that the overall impacts of these would be similar to that of the draft submission Local Plan. It is therefore clear that delivery growth consistent with the uncapped housing needs is therefore a reasonable and justified approach.

5.12 For the reasons detailed in the representations, had the draft Submission Local Plan included the Ashes Plantation site (SHELAA Ref: 353), this would have made a useful contribution towards meeting the Borough's housing needs, including those of adjoining authorities which have yet to be addressed.

5.13 The DtC Statement indicates that part of the justification for not providing additional homes in Tunbridge Wells Borough is the need to await the outcome of Sevenoaks District's challenge of the conclusions in the Inspector's Report detailing the examination of the Sevenoaks Local Plan that the Council had failed to comply with the Duty to Co-operate.

5.14 The Inspector's Report into the Sevenoaks Local Plan Examination (March 2020) (appendix 2) is clear (paragraph 28) that on 11th April 2019 it received a request from Sevenoaks DC to make a contribution towards unmet housing needs. Details of this request are not however included within appendix B6 of the Council's DtC Statement. Given that this is highlighted as an important event by the Sevenoaks Local Plan Inspector, it is concerning that this is not referenced within Tunbridge Well's analysis.

5.15 The Sevenoaks Local Plan Inspector was clear as to the significant extent of unmet housing need (potentially at least 1,316 dwellings as indicated in paragraph 14). Furthermore, the Inspector was clear that there had been a failure to effectively engage with neighbouring authorities, notwithstanding the preparation of Statements of Common Ground with other bodies and the engagement in an external peer review of the acceptability of their approach.

5.16 The Sevenoaks Inspector is clear that it is a matter of planning judgment whether the DtC obligation within the Planning legislation has been achieved (Paragraph 16).

5.17 Sevenoaks District Council's approach to the Duty to Co-operate was further assessed through the subsequent Court judgement (appendix 3). This refers to the specific actions that Sevenoaks undertook with neighbouring authorities including Tunbridge Wells (paragraph 7), the preparation of Statements of Common Ground and the independent review by a former Inspector (paragraph 19). Whilst this implied that the Council had achieved the Duty, the Courts nevertheless confirmed that through the formal examination process, the Inspector had rightly reached their own judgement and subsequent conclusions that the Plan had failed the legal test.

5.18 Although the DtC Statement accompanying the Tunbridge Wells Plan indicates that they were awaiting the conclusions of the Court with respect of whether there would be any unmet need in Sevenoaks District, it is not considered that this is a robust position for the authority to take.

5.19 The Council's avoidance of any contribution towards Sevenoaks unmet housing needs reflects the position of Tonbridge & Malling BC (who adjoin both Sevenoaks and Tunbridge Wells). The Inspector examining the submitted Tonbridge & Malling Local Plan reported their conclusions in December 2020 (Appendix 1). In paragraph 4, the TMBC LP Inspector states:

The Council explained at the hearings that it was not clear until SDC's Regulation 19 plan was published in December 2018 what the scale of unmet need was and even then it was not certain as the plan had not been examined by an Inspector and the housing requirement found sound. The Tonbridge and Malling Regulation 19 plan was submitted for examination in January 2019 to meet the transitional deadline set out in paragraph 214 of annex 1 to the July 2018 and February 2019 versions of the National Planning Policy Framework (the Framework).

5.20 The Inspector (paragraphs 6 and 7) clarifies the timing of TMBC's knowledge of the expected deficit in Sevenoaks District. These state:

6. However, it appears from the evidence before us that the Council knew for a number of years, prior to the submission of their plan for examination, that it was highly unlikely that SDC would be able to meet its housing requirement in full. Despite this there is no evidence that the Council engaged in any meaningful discussions with SDC to consider how the strategic matter of unmet need could be resolved. Instead the Council has relied on the fact that SDC did not formally ask them for help. However, from the evidence it seems that SDC chose not to make any formal request for help because they knew that the answer from Tonbridge and Malling would be 'no' due to 'constraints'¹. We consider Tonbridge and Malling were complicit with this for having said no without any active, ongoing and constructive engagement. This is not indicative of an attempt by Tonbridge and Malling Council to engage constructively or actively to resolve this issue.

7. Indeed, the Council accepted at the hearings that they knew of the unmet need much earlier than December 2018, but say that they could not do anything as the unmet need was a large range and there was an expectation that it would have been met by SDC through increased densities on allocated sites. SDC's Regulation 18 plan which it consulted on, between July and September 2018, identified a need for 13,960 dwellings and identified sites to meet between 6,582 and 13,382 dwellings². So, at this stage it was clear there was a likely shortfall of around 600 dwellings, and this was the best case scenario. At worst it was closer to approximately 7000. In the submitted Regulation 19 plan the unmet need was in the order of 3,392 dwellings.

5.21 The TMBC LP Inspector (appendix 1) was clear (paragraph 15) that the authority was fully aware that Sevenoaks District had an element of unmet housing need and it was subsequently a requirement for the authority to actively and constructively engage in solutions through the Duty. As a result of the failure by TMBC with respect of the Duty, the Inspector examining that Local Plan concluded that that document had failed in obligation within statute with respect of the Duty to Co-operate.

5.22 The TMBC LP Inspector's conclusions with respect of the failure of the Duty was likewise irrespective of any Statements of Common Ground or Memorandum of Understanding that had been prepared.

5.23 Having regard to the clear longstanding indications that Sevenoaks District could not meet its housing needs, the approach of Tunbridge Wells Borough as indicated in their DtC Statement (page 18), it is not considered reasonable as it should not await the outcome of Sevenoaks' challenge through the Court. Instead, as acknowledged through the Council's own Sustainability Appraisal it is clear that Tunbridge Wells Borough could readily accommodate and address their uncapped housing need. In such an instance, the authority could have been clear that the difference between the capped and uncapped housing requirements (678dpa and 765dpa respectively) whilst making a contribution towards significantly boosting the supply of housing would have also been included as a means of addressing unresolved needs of others.

5.24 Having regard to the consistency of the approach of Tunbridge Wells to that rejected by the Inspector in Tonbridge & Malling that there was uncertainty over the extent of shortfall arising in Sevenoaks District and their corresponding inability to address it equally applies in Tunbridge Wells Borough, it is contended that this plan has also failed in addressing the statutory obligation with respect of the Duty.

5.25 As with the conclusions of the Inspectors' who examined both Sevenoaks and the Tonbridge & Malling Local Plans, this must likewise confirm that Tunbridge Wells' Local Plan has failed the Duty and must consequently be withdrawn. This is because as recognised by both these Inspectors' once the Plan has been submitted there is no solution available to the Inspector for addressing the statutory test with respect of the Duty (Section 33A of the Planning & Compulsory Purchase Act 2004 (as amended)). Therefore the Plan should be found not to be legally compliant and should not be examined further.

5.26 If the Inspector nevertheless considers that the Plan has complied with the Statutory test associated with the Duty, we nevertheless contend that the Borough's housing need should be increased from the current 678dpa to 765dpa as this has been examined through the Sustainability Appraisal and the increase of 87dpa would make a valuable contribution towards addressing longstanding and unresolved housing needs arising in the adjoining Sevenoaks District.

Robustness of the Plan Period

5.27 Although the Council's latest Local Development Scheme (February 2021) indicates that consultation on the Draft Submission Plan is to occur from 26th March until 21st May 2021 (now 4th June 2021), followed by submission in July 2021 and adoption in June 2022, this is not considered realistic.

5.28 A review of the time taken for the examination of Strategic Local Plans consulted upon and submitted for examination since the original NPPF was published in March 2012 (Data on progress of Strategic Local Plans until 1st March 2021 from Local Plans: the examination process - GOV.UK (www.gov.uk)) indicates that on average the period from submission through to the document's adoption was 581 days (i.e. 1 year 7 months) (for the more than 200 Strategic documents found sound until 1st March 2021).

5.29 The average period from consultation on a draft Submission Plan until its adoption was 764 days (i.e. over 2 years).

5.30 Alternatively, when considering the 8 Strategic Local Plans submitted for examination since the end of the transition period in paragraph 214 of the 2019 NPPF (Submitted on or before 24th January 2019), these have taken 575 days (1 year 7 months) from consultation through to adoption or 457 days from submission to adoption (1 year 3 months). As this is a very small sample size, it is clear that a longer timeframe for the document's examination would be more realistic.

5.31 As consultation on the Draft Submission Plan commenced in March 2021, allowing at least 2 years until adoption indicates that this would not occur until April 2023. With submission expected in summer 2021, the larger sample size indicates that adoption would not occur until early 2023.

5.32 To ensure consistency of the Plan with the requirements of NPPF paragraph 22, the Strategic policies (including STR1) should therefore look ahead a minimum 15 years from adoption of the Local Plan, that will be to at least March 2039, an additional year longer than the currently envisaged timeframe.

5.33 If the Borough's housing requirement was increased by the current capped requirement, this would result in the need for a further 678 dwellings in the Plan. However, we contend that if the event that the Inspector concludes Tunbridge Wells Borough has complied with the Duty to Co-operate, that to make a contribution towards unmet housing needs in adjoining authorities, the Borough's housing requirement is increased from 678dpa to 756dpa. This uplift together with an extended plan period which reflects a robust period for examination of the draft Submission Local Plan indicates that rather requiring 12,204 dwellings from 2020 to 2038, this should be increased to 14,364 dwellings from 2020 to 2039. This is an increase of 2,162 dwellings. A proportion of these additional homes could be delivered through the allocation of the land at Ashes Plantation, Matfield. For the reasons detailed above, a March 2039 end date would provide for 15 years after the 2023/24 monitoring period during which adoption could be realistic anticipated.

Robustness of Housing Land Supply

5.34 The Council (Table 3 of Draft Submission Plan) indicates that to achieve its housing requirement of 12,204, after deducting existing commitments (permissions (3,313 dwellings)) together with windfalls (1,670 dwellings) sites for at least 7,221 dwellings should be identified. The information in Table 4 of the Draft Submission Plan indicates that the document includes allocations that can deliver between 8,076 and 8,461 dwellings.

5.35 For the reasons detailed in the representation to policy STR/SS3, we do not consider that the Allocation at Tudeley has been justified. The contribution of this within the plan period (2,100 dwellings) should therefore be omitted. Therefore, the actual number of homes allocated in the plan is consequently between 5,976 and 6,361 dwellings.

5.36 In addition, as the response above, indicates, rather than requiring the delivery of 12,204 dwellings, we contend that the authority should instead plan for at least 14,364 dwellings. Therefore, having regard to the increased requirement (to ensure the authority makes a contribution towards unmet

needs of other authorities together with providing for the minimum 15 years post adoption required by the NPPF (paragraph 22) instead of having to identify land to accommodate at least 7,721 dwellings the Council assessed as needed, the authority actually needs to identify land for 9,883 dwellings. It is therefore clear, irrespective of the unjustified allocation of Tudeley that further sites are needed.

5.37 One site which should be included as an allocation is the land controlled by our client at Ashes Plantation, Matfield.

Conclusions

5.38 The approach of policy STR1 is therefore not sound as it fails to provide for at least 15 years post adoption together with a failure to plan for a requirement which reflects the Government's objectives of significantly boosting the supply of housing.

5.39 This would be achieved through seeking to address the uncapped rather than capped local housing need as the difference would make a contribution towards addressing unmet housing needs of neighbouring authorities.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the Borough's development requirements in policy STR1.

5.40 The Plan therefore as currently prepared does not comply with the Duty to Co-operate through a failure to effectively consider how unmet housing needs of neighbouring authorities, especially Sevenoaks District is to be addressed.

5.41 The Council has not actively engaged with Sevenoaks and like Tonbridge & Malling (whose Plan has also been found to fail the Duty) it is clear that the approach of Tunbridge Wells is insufficient with their legal obligations. The plan should consequently be withdrawn, and the authority tasked with demonstrating compliance with the duty.

5.42 Irrespective of the failure to comply with the Duty to Co-operate, it is our opinion that the Policy cannot be said to be sound on the basis for the reasons summarised as follows:

a) It is not positively prepared as it does not seek to address the borough's housing needs, therefore further sites should be allocated;b) It is not positively prepared as it fails to boost the supply of housing by seeking to address the uncapped housing need derived through local housing need. This failure is compounded by the lack of identification of further sites to contribute towards addressing unmet need of neighbouring authorities;c) It is not justified with regard to the timeframe that the examination of the Local Plan will take resulting in a delayed adoption of the document;d) It is not justified with respect of the inclusion of land at Tudeley Village to which we object (the reasons are detailed later); ande) It is also inconsistent with national policy in the failure to both boost housing supply and make a contribution towards addressing the housing needs of neighbouring authorities as required by paragraph 60 of the NPPF.

5.43 In order to address these matters of soundness, several amendments are suggested:

1. That policy STR1 is amended to:

A) ensure that the plan period is 2020 to 2039.B) That the housing requirement is increased to 14,364 dwellings; andC) That reference to a new garden settlement at Tudeley Village is removed from the plan.

2. That consequential amendments are made to the document to reflect these revisions.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 2)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 3)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 4)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 5)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 6)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 7)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 8)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 9)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Ashes Plantation, Maidstone Road, Matfield (SHELAA Ref: 353) should be allocated for housing development.

3.6 Our representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Site Ref: 353 (Reg 18 Local Plan allocation Ref: AL/BM3), can also supply homes to resolve this issue.

3.7 As detailed in the representations, the site represents a logical addition to the existing development in Matfield and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Matfield as defined on the Local Plan Proposals Map (Inset Map 21).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Matfield together with amendments to other policies of the plan.

4.8 These amendments would reflect the view taken by the Council in allocation the site at the Regulation 18 stage in preference to locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Matfield. Growth at Matfield would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2. Additional development at Matfield would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Matfield.

6.3. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Ashes Plantation, Matfield, is viable at property values expected elsewhere in the Borough.

6.4. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5. The Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Matfield would.

6.6. Additionally, the Stage 2 Viability Assessment is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 4 paragraph 10)).

6.8. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 5) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10. In the Calverton case (Appendix 4) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11. In the Hundal case (Appendix 6) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor".

6.12. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.13. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land at Ashes Plantation, Matfield, where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.14. The Calverton case (Appendix 4) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

"In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to

which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.15. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.16. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.17. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.18. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.19. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.20. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.21. This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.22. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.23. In contrast, land beyond the Green Belt adjoining the village of Matfield would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Matfield lies beyond the Green Belt.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Ashes Plantation, Maidstone Road, Matfield should be included as a housing allocation for up to 60 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Ashes Plantation, Matfield (Site Ref: 353).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.24. The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.25. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider . Yes, I wish to participate in hearing session(s)

it necessary to participate
in examination hearing
session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley whereas it does not propose the exclusion of the Home Farm, Lower Green Road, Rusthall.

6.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council’s Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Home Farm is viable at property values expected elsewhere in the Borough.

6.3. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined. The paragraph is clear that:

“Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which is previously development and/or is well served by public transport.”

6.4. The Council's choice of Tudeley village does not accord with either of these criteria, whereas Home Farm, Rusthall with its relationship to existing services and facilities in the village, and its containment from the wider countryside beyond, does accord with this advice.

6.5. Additionally, whilst not directly relevant to the Home Farm, Rusthall site. It is recognised that the authority has accepted major employment growth north of Longfield Road, Royal Tunbridge Wells which is within both the AONB and Green Belt although there were clear opportunities for development in attractive areas for commercial development outside of both designations (at Paddock Wood).

6.6. This is therefore an illustration that given the need for development in the Borough, be this either employment or housing can justify major development in both designations.

6.7. Although the Home Farm site does not represent major development, the Council's acceptance of major growth within both the AONB and Green Belt is nevertheless an illustration that development is acceptable, especially where, in the case of the Home Farm site, it would have limited impact upon the Green Belt. This therefore confirms the preference for sites in sustainable locations like Home Farm, Rusthall in contrast with the unsuitability of Tudeley Village.

6.8. Additionally, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley.

6.9. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes).

6.10. As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.11. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.12. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.13. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.14. In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44: "The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.15. In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future

for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

6.16. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.17. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with Home Farm, Lower Green Road, Rusthall where sustainable development will be achieved and therefore exceptional circumstances can be demonstrated.

6.18. The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.19. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.20. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need can be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.21. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.22. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal.

6.23. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

6.24. In contrast the Council's Stage 2 Green Belt appraisal for the parcel containing our client's Home Farm site (assessed parcel ref RU2a) indicates that it only has a moderate contribution towards the Green Belt. This is therefore a lower rating than that contended to apply to the Site in the Council's Site Assessments (page 6 of Rusthall parishes appraisals). It is therefore clear that the Home Farm site can be removed from the Green Belt with limited harm.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.25. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.26. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.27. This reinforces our view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.28. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF.

6.29. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village. In contrasts, the Home Farm, Rusthall site can readily be removed from the Green Belt as exceptional circumstances can be demonstrated.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.30. The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.31. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1883, Policy STR9 (PSLP_1884), Policy PSTR/HA1 (PSLP_1885) and Policy STR/SS3 (PSLP_1886). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Chittenden Fields, north of High Street (A268), Hawkhurst. This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account of its credentials as a sustainable location for growth adjoining the acknowledged suitability of Hawkhurst, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Hawkhurst which include those relating to health, education, leisure, retail and employment and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's at Chittenden Fields, Hawkhurst. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for circa 70 dwellings, in a landscape setting, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Chittenden Fields, Hawkhurst due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Chittenden Fields site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes. This therefore contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the norm for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tunbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim

conclusions (11th December 2020) (appendix 8)• Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)• North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy STR/HA1: The Strategy for Hawkhurst Parish and the omission of land at Chittenden Fields as a housing allocation for 70 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Chittenden Fields, north of High Street (A268), Hawkhurst (SHLAA ref 2) – failure to include as an allocation in policy STR/HA1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Chittenden Fields, Hawkhurst should be allocated for residential development (SHLAA ref 2). This site can accommodate 70 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the Local Plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Chittenden Fields, Hawkhurst, can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Chittenden Fields site would be a logical addition to the existing development in Hawkhurst and should be included in the defined extent of the village. This requires consequential amendments to the Limits to Build development for Hawkhurst as defined on the Local Plan Proposals Map (Inset Map 15).

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the Council.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocate changes to the extent of the defined settlement area of Hawkhurst together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Hawkhurst (Consistent with paragraph 77 of NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Chittenden Fields, north of Highs Street, Hawkhurst (SHLAA ref 2) should be included as an additional allocation within draft policy PSTR/HA1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1 Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Hawkhurst. Growth of Hawkhurst would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2 Additional development at Hawkhurst would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Hawkhurst.

6.3 For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the

scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at Chittenden Fields is viable at property values expected elsewhere in the Borough.

6.4 The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5 The Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Hawkhurst would.

6.6 Additionally, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the latter it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7 The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.8 Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9 At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10 In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11 In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the

purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor”.

6.12 The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist. However whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.13 As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land at Chittenden Fields, Hawkhurst where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.14 The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

“In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent”.

6.15 Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important);(ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.16 Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.17 The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF.

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.18 The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms

that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.19 The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.20 Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designated to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.21 This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.22 Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.23 In contrast, land beyond the Green Belt adjoining the village of Hawkhurst would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Hawkhurst lies beyond the Green Belt.

10. OVERALL CONCLUSIONS

10.1. Our representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Chittenden Fields, north of High Street, Hawkhurst should be included as a housing allocation for approximately 70 dwellings.

10.4. These matters can be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Chittenden Fields, Hawkhurst.

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8

6.24 The Plan therefore as currently prepared in not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.25 To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1859, Policy STR9 (PSLP_1868), Policy PSTR/BE1 (PSLP_1869), Policy STR/SS3 (PSLP_1870) and Policy EN15 (PSLP_1872). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our client's (Millwood Designer Homes Ltd) control the land on the west side of Iden Green Road, Benenden (Site Ref: 222). This site has been promoted through the earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Benenden, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Benenden which include those relating to education, leisure and retail and will support the continuation of them as advocated by paragraph 77 of the NPPF. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client's to the west of Iden Green Road, Benenden. The site affords a sustainable opportunity in helping to meet identified housing needs and could provide for approximately 28 dwellings, within walking distance from local services and facilities.

1.4 For the reasons detailed in this submission, growth at Benenden would support the long-term provision of services within the village reflecting the approach advocated in the NPPF (paragraph 77). This would result in the achievement of sustainable development.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1. Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 10)
- Benenden and Iden Green Conservation Areas Appraisal (April 2005) (appendix 11)

2.2. Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BE1: The Strategy for Benenden Parish and the omission of land west of Iden Green Road as a housing allocation

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Policy EN15: Local Green Space

Objection

Omission site – Land west of Iden Green Road, Benenden (SHLAA ref 222) – failure to include as an allocation in policy PSTR/BE1

Objection

3. OVERARCHING POSITION

3.1. We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2. We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3. Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4. In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5. To address this requirement for additional homes, we contend that land on the west side of Iden Green Road, Benenden, should be allocated for residential development (SHLAA Ref 222). This site can accommodate 28 dwellings and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6. The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of land of the west side of Iden Green Road, Benenden can also supply homes to resolve this issue. As detailed in the representations, the land west of Iden Green Road site would be a logical addition to the existing development in Benenden and should consequently be included in the defined extent of the village.

3.7. We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.8. We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1. Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2. A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3. In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4. Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5. The Local Plan should seek to meet the Council's full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough's development needs.

4.6. For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7. These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy. They also advocate changes to the extent of the defined settlement area of Benenden together with amendments to other policies of the plan.

4.8. These amendments would reflect our view of the clear sustainability advantages of growth at Benenden (Consistent with paragraph 77 of the NPPF) in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9. Furthermore, to address the additional identified housing need, we advocate that land on the west side of Iden Green Road, Benenden (SHLAA ref 222) should be included as an additional allocation within draft policy PSTR/BE1.

4.10. The remainder of this submission is focused on providing responses to the Council's draft policies in the Local Plan.

6. POLICY STR9: GREEN BELT

6.1. Through policy STR9, the Council seeks to remove land from the Green Belt for the delivery of a garden community at Tudeley in contrast to locations beyond the Green Belt like Benenden. Growth of Benenden would be consistent with the approach of the NPPF (paragraph 77) which emphasises the importance of development in villages to support long term viability of services.

6.2. Additional development at Benenden would be consistent with the Green Belt guidance in the NPPF (paragraph 138) which emphasises the importance of identify villages beyond the Green Belt in preference to the unjustified removal of land within this designation. As indicated below, we do not consider that the authority has justified the removal of Tudeley from the Green Belt when there are other more sustainable options as detailed in paragraph 138 of the NPPF, including additional growth at the village of Benenden.

6.3. Therefore, for the reasons detailed below, we object to the Tudeley proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing and other development envisaged. Furthermore, as indicated in the Council's Viability Assessment, development of Tudeley Village is only viable where property values exceeding that expected elsewhere in the Borough are achieved. This poor viability of the scheme provides a further justification why very special circumstances are not demonstrated to indicate that Tudeley should be removed from the Green Belt. In contrast development at on land west of Iden Green Road is viable at property values expected elsewhere in the Borough.

6.4. The NPPF is clear (paragraph 137) of the need to fully consider all options before contemplating removal of land from the Green Belt. Paragraph 138 also emphasises that where Green Belt revisions are envisaged the consequences for the achievement of sustainable development must be examined, including with respect of villages beyond the Green Belt. As noted, paragraph 77 of the NPPF supports growth of villages as this would help maintain their services.

6.5. Therefore, the Council's choice of Tudeley village does not accord with the preference detailed in the NPPF, whereas growth at Benenden would.

6.6. Furthermore, the Stage 2 Viability Assessment (appendix IIa) is clear that whilst the necessary infrastructure and affordable housing is viable for the scale of development proposed at Paddock Wood, it is less clear that this applies at Tudeley. This is especially noticeable as whilst Tudeley village is reliant upon a number of strategic transport improvements which are also necessary for Paddock Wood's growth i.e. the Colt Hill bypass, unlike the later it is not expected to contribute towards its funding. Nevertheless, the development proposed at Tudeley has fewer scenarios where development is viable (primarily at the lowest existing land value and highest market value of the homes). As detailed in the representation of policy STR/SS3 it is not considered that the authority's identification of Tudeley Village is justified with respect of other matters, not just inconsistency with the advice in the NPPF concerning preferred locations for removal from the Green Belt.

Consideration of whether justification of the Exceptional Circumstances required by the NPPF (paragraphs 133–139) to revise the Borough's Green Belt boundaries exists.

6.7. The Council in advancing revisions to its Green Belt under a duty (imposed by Section 39(2) of the Planning & Compulsory Purchase Act 2004) to exercise the function associated with the preparation of local development document with objective of contributing to the achievement of sustainable development. This is a positive obligation (Jay J Calverton (Appendix 5 paragraph 10)).

6.8. Planning policy makes provision for changes to be made to the Green Belt. Changes to the Green Belt are permitted through a review of a local plan (Revised NPPF, paragraph 136). To make a change to the Green Belt boundary in the local plan there have to be "exceptional circumstances". Development needs that take up land such as housing and employment can be an exceptional circumstance to justify a review of a Green Belt boundary. This principle has been acknowledged in Hunston, in the Court of Appeal (Appendix 6) where Sir David Keene observed at [21]:

"In principle, a shortage of housing land when compared to the needs of an area is capable of amounting to very special circumstances."

6.9. At paragraph 10 of his judgement, Sir David Keene also said in respect of earlier NPPF (2012) paragraphs 87 and 88 that:

"The framework does not seek to define further what "other considerations" might outweigh the damage to the Green Belt, but in principle there seems no reason why in certain circumstances a shortfall in housing land supply might not do so."

6.10. In the Calverton case (Appendix 5) Jay J also reinforced these points finding at paragraph 44:

"The issue is whether, in the existence of planning judgement and in the overall context of the positive statutory duty to achieve sustainable development, exceptional circumstances existed to justify the release of Green Belt."

6.11. In the Hundal case (Appendix 7) paragraph 50 confirmed that the failure to meet needs since a Green Belt boundary had been defined could also amount to exceptional circumstances:

"The overriding policy of PPG2 is that the Green Belt boundaries should remain fixed once they have been validly determined. It is only if a relevant circumstance occurs that requires a change in the future for planning purposes that the circumstance will be an exceptional circumstance. An obvious example would be if, in the present case, the First Defendant had determined that it could not meet the projected housing requirements for its area up to 2031 without using Green Belt land. In that case, for the purposes of the Core Strategy, the exceptional circumstance may have been made out (assuming no other practical alternatives). At that point, a subsidiary question may arise as to which land that was currently within the Green Belt should now be freed for development. In making that latter decision, I accept that the fact that land had recently and erroneously been included within the Green Belt when the local plan was developed might be a relevant consideration in deciding where the boundary had changed but it would be highly unlikely to be the only or the dominant factor".

6.12. The Council advocates revisions to the Green Belt, as there are insufficient opportunities to deliver the necessary growth without resorting to the Borough's Green Belt. Accordingly, exceptional circumstances do exist.

6.13. However, whilst housing/employment development needs can, as a matter of planning judgement, as well as the desire to promote, plan and achieve sustainable patterns of development, amount to exceptional circumstances through the development plan review process this must be demonstrated by clear evidence of a need and that there are no other more sustainable solutions towards its addressing (see paragraph 138 of NPPF). Such an approach would be consistent with Section 39(2) and national policy (NPPF paragraphs 136 and 137).

6.14. As outlined within this statement, development at Tudeley village will not result in delivery of sustainable development and this further confirms that exceptional circumstances do not exist. This contrasts with the land west of Iden Green Road, Benenden where development will help support the existing services of the village consistent with paragraph 77 of the NPPF.

6.15. The Calverton case (Appendix 5) helpfully sets out the matters to examine in establishing exceptional circumstances in the context of national policy and the positive obligation in section 39(2) to plan for sustainable development. The judgement at paragraph 51 states:

"In a case such as the present, it seems to me that, having undertaken the first-stage of the Hunston approach (sc. assessing objectively assessed need), the planning judgments involved in the ascertainment of exceptional circumstances in the context of both national policy and the positive obligation located in section 39(2) should, at least ideally, identify and then grapple with the following matters: (i) the acuteness/intensity of the objectively assessed need (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development; (iii) (on the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt; (iv) the nature and extent of the harm to this Green Belt (or those parts of it which would be lost if the boundaries were reviewed); and (v) the extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonably practicable extent".

6.16. Each of these 5 matters are interrelated and applying to Tunbridge Wells Borough the following points arise:

(i) the acuteness/intensity of the objectively assessed needs (matters of degree may be important); (ii) the inherent constraints on supply/availability of land prima facie suitable for sustainable development;

6.17. Matters (i) and (ii) are confirmed as the Council has demonstrated that its Local Housing Need cannot be resolved without relying upon the Green Belt. However matter (ii) also needs to have regard to whether the release of land will achieve sustainable development through consideration of the approach outlined in paragraph 138 of the NPPF.

(iii) (On the facts of this case) the consequent difficulties in achieving sustainable development without impinging on the Green Belt.

6.18. The Council's Draft Submission Local Plan has demonstrated that it cannot address its housing needs without considering locations in the Green Belt. Therefore, there is an identified difficulty to meeting the Borough's development needs without impinging on the Green Belt. However, any release must contribute towards the achievement of sustainable development as indicated in paragraph 138 of the NPPF. This includes consideration of growth in villages beyond the Green Belt which is sustainable as it supports services as envisaged by paragraph 77 of the NPPF

(iv) The nature and extent of the harm to this Green Belt (all those parts of it which would be lost if the boundaries were reviewed); and

6.19. The Council commissioned a Green Belt Review (Stages 1 and 2). This considered whether the land now envisaged for removal from the Green Belt served the relevant purposes. Tudeley village lies within parcels BA3 and BA4. The Study concluded that all these parcels served Green Belt purposes and consequently there was no justification for their removal. The Stage 3 Report (page 70) confirms that the removal of Tudeley village will be harmful to the Green Belt. Consequently, it is clear that the envisaged removal would be harmful to the wider Green Belt, and consequently should be avoided.

(v) The extent to which the consequent impact on the purposes of the Green Belt maybe ameliorated or reduced to the lowest reasonably practicable extent.

6.20. The proposed Green Belt boundaries envisaged in the Draft Submission Local Plan do not reflect the requirements in the NPPF (paragraph 139).

6.21. Whilst the Stage 3 Study (pages 70 and 71) suggests measures to reduce impact, these are applicable to any site and do not demonstrate how the Tudeley scheme has been specifically designed to ensure that the impact associated with the removal of the site can be ameliorated or reduced to its lowest reasonably practicable extent.

6.22. This reinforces my view that there are no exceptional circumstances supporting a change to the Green Belt here.

6.23. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

6.24. In contrast, land beyond the Green Belt adjoining the village of Benenden would be a sustainable and appropriate location for growth consistent with paragraph 77 of the NPPF. In such instance, exceptional circumstances do not need to be demonstrated as the site at Benenden lies beyond the Green Belt.

11. OVERALL CONCLUSIONS

11.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

11.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

11.3. To ensure adequate supply of housing arises, the land west of Iden Green Road, Benenden should be included as a housing allocation.

11.4. These matters can consequently be addressed through Main Modifications to the plan allowing for a Sound Plan.

12. FINAL REMARKS

12.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

12.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of land west of Iden Green Road, Benenden for housing.

12.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR8.

6.25. The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

6.26. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That reference to Tudeley village is omitted from policy STR8, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1839, Policy STR9 (PSLP_1848), Policy PSTR/RU1 (PSLP_1856) and Policy STR/SS3 (PSLP_1857). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the

legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) control the land at Home Farm, Lower Green Road, Rusthall (SHLAA Site Ref: 60). This site has been promoted through earlier stages in the Local Plan as an additional location for growth in the Borough, taking account its credentials as a sustainable location for growth adjoining the acknowledged suitability of Rusthall, as indicated in the Council's SHLAA. In contrast to other locations, the development of new homes at the site will ensure the embedment of behaviour associated with the sustainable living unlike other locations in the Borough, especially the new community proposed at Tudeley Village.

1.2 Further to our submissions on earlier stages in the preparation of the Local Plan, the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing." Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Rusthall which include those relating to health, education, leisure, retail and employment. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.3 Have regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village with replacement with an allocation at Home Farm, Rusthall. For the reasons detailed in this submission, growth at Home Farm, Rusthall due to its relationship with existing development and facilities would result in achievement of sustainable development. Furthermore, the proximity of the Home Farm site to services and facilities that residents will need to undertake their daily life ensures that sustainable behaviours are embedded in residents from initial occupation of the homes.

1.4 This contrasts with that at Tudeley Village which due to the limitations of these in the local area will result in need for longer journeys to undertake daily lives, which are therefore likely to result in increased use of the car. Once this behaviour becomes the normal for residents in Tudeley, it will be harder to encourage them to switch to more sustainable alternatives once they become available.

1.5 The reports and documents submitted with this representation demonstrate the suitability of the approach advocated. As detailed in the representations, this land is not subject to constraints which would prevent its delivery for development at an early stage during the emerging plan period should this be confirmed through the examination of the Plan.

1.6 We also have several comments/representations on the policies within the Draft Submission Tunbridge Wells Borough Local Plan which should be addressed prior to its submission for examination by the Secretary of State.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of submissions on behalf of Millwood Designer Homes to the Council's Draft Local Plan Regulation 18 Consultation (November 2019) (Appendix 1)
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (Appendix 2)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (Appendix 3)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (Appendix 4)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (Appendix 5)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (Appendix 6)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (Appendix 7)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (Appendix 8)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (Appendix 9)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (Appendix 10)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Developments

Objection

Policy STR8: Conserving and enhancing the natural, built, and historic environment

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/RU1: The Strategy for Rusthall Parish and the omission of land at Home Farm, Lower Green Road (Site Ref: 60)

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) – failure to include as an allocation in policy PSTR/RU1

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these policies, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.

3.3 Local Plans must be capable of delivering from the point at which they are adopted. This means scrutinising the policy wording to ensure the Plans are sound and that the allocations contained therein are capable of being delivered at the point envisaged. This is particularly the case in relation to the need for Councils to collate a robust evidence base to justify the imposition of certain policies and/or their wording so as not to over burden and/or stifle sustainable and appropriate development.

3.4 In this instance, the draft Local Plan needs to be amended in order to ensure it robustly plans for the delivery of sufficient housing to address a housing requirement established in accordance with national planning policy and guidance. This therefore indicates that the Plan must seek to deliver the minimum of 14,364 dwellings between 2020 and 2039 rather than 12,204 dwellings from 2020 to 2038 as currently envisaged.

3.5 To address this requirement for additional homes, we contend that land at Home Farm, Lower Green Road, Rusthall should be allocated for residential development (SHLAA ref 60). This site can accommodate 25 dwellings (including a policy-compliant level of affordable housing) and as indicated in these representations and the supporting documents would be a sustainable addition to the village.

3.6 The representations also highlight a failure of the plan as currently drafted to contribute towards addressing the acknowledged unmet needs of neighbouring authorities and the allocation of Home Farm, Rusthall can also supply homes to resolve this issue.

3.7 As detailed in the representations, the Home Farm site would be a logical addition to the existing development in Rusthall and should consequently be included in the defined extent of the village, alongside its removal from the Green Belt.

3.8 We also advocate other revisions to the Draft Submission Local Plan to ensure it is consistent with the evidence base prepared by the authority.

3.9 We are concerned to ensure that the Local Plan is robust, and it is in this context that we set out our representations.

4. THE NPPF TESTS OF SOUNDNESS

4.1 Section 3 of the NPPF (Feb 2019) sets out the principal components to be included in Local Plans. Paragraph 35 requires that to be “sound” a DPD should be positively prepared, justified, effective and consistent with national policy.

4.2 A positively prepared plan provides a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other Authorities so that unmet need from neighbouring areas is accommodated where practical to do so and is consistent with achieving sustainable development.

4.3 In order to be justified, the Draft Submission Local Plan must have an appropriate strategy, taking into account reasonable alternatives and be based on proportionate evidence.

4.4 Effective means the document must be deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred and evidenced by the statements of common ground.

4.5 The Local Plan should seek to meet the Council’s full housing need. However, we have concerns regarding the rationale for and robustness of the housing numbers the Council is seeking to accommodate within the Draft Submission Local Plan. We also have concerns regarding the appropriateness of the sites selected for contributing towards addressing the Borough’s development needs.

4.6 For the reasons set out in these representations there are several shortcomings with the Plan, as currently drafted, that result in the need for amendments.

4.7 These amendments relate to the need to increase the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government’s planning advice and policy. They also advocated changes to the extent of the defined settlement area of Rusthall alongside consequential revisions to the Green Belt together with amendments to other policies of the plan.

4.8 These amendments would reflect our view of the clear sustainability advantages of growth at Rusthall in preference to unsustainable locations where development conflicts with the approach of the NPPF i.e. Tudeley Village. In the case of Tudeley village, due to its identification in advance of locations which are to be preferred having regard to the approach of the NPPF, we contend that the new settlement proposal should be omitted from the Plan with the site retained in the Green Belt.

4.9 Furthermore, to address the additional identified housing need, we advocate that land at Home Farm, Lower Green Road, Rusthall (SHLAA Ref 60) should be included as an additional allocation within draft policy PSTR/RU1.

4.10 The remainder of this submission is focused on providing responses to the Council’s draft policies in the Local Plan.

8. POLICY STR/SS3: THE STRATEGY FOR TUDELEY VILLAGE

8.1. Through policy STR/SS3, the Council seeks to remove land from the Green Belt for the delivery of a new village at Tudeley.

8.2. For the reasons detailed below, we object to the proposal in that it entails the removal of very significant areas from the Green Belt for which there is no justification. This is both with respect of the scale of housing development envisaged as detailed in the representation to policy STR9. As we do not consider that very special circumstances have been demonstrated, this is a further indication that no revision to the Green Belt should occur at Tudeley as detailed in the representation to policy STR9.

8.3. As noted in the SA, to enable the delivery of Tudeley, significant infrastructure improvements will be required. This includes provision of new offsite roads (a new link road to the A228 and A228 improvements) to serve the site together with utility services, education, community, health and leisure facilities. For these factors, no indication has been provided in the current Draft infrastructure Delivery Plan of the costs or delivery mechanism of these investments. Without this information there is no certainty that the Plan can be delivered and consequently would be effective.

8.4. The Plans prepared by both Uttlesford Council (appendix 9) and the North Essex Authorities (appendix 10) failed with respect of some of the new settlements envisaged as the costs assumed were unrealistic and did not include sufficient contingency. The Tandridge Local Plan has significant

doubts with respect of the uncertainty of funding the major new road infrastructure associated with the South Godstone Garden Village, following a rejected HIF bid (appendix 8).

8.5. Although the Council has prepared information with respect of costs and delivery mechanisms for Tudeley, as indicates earlier in this submission the new settlement is not expected to contribute towards all the necessary infrastructure i.e. the Colts Hill off-line improvement (This is only included in the financial appraisals for development at Paddock Wood) which is required alongside the Five Oak Green bypass (which Tudeley is expected to contribute towards) (See the Viability assessment schedules in Appendix II of the Stage 2 Viability Appraisal). Furthermore, notwithstanding the financial viability assessments not including all infrastructure, development at Tudeley is not as viable as indicated under the same range of variables as other schemes. Tudeley is reliant on lower existing land values and higher property values to show it is viable. The limited evidence that development at Tudeley is viable is a further indication of the unsuitability of the current strategy.

8.6. Exceptional circumstances do not exist for the removal of Tudeley village. Whilst a matter of planning judgement, the Council cannot therefore make such a judgement as this would not be consistent with their statutory duty (section 39(2)) and the revised NPPF. The points raised above confirm that exceptional circumstances do not exist, are not soundly based and therefore do not support revisions to the Green Belt at Tudeley Village.

10. OVERALL CONCLUSIONS

10.1. The representations to the draft submission Local Plan have identified a number of concerns with the document as drafted, especially with respect of its soundness.

10.2. As indicated in the representations, changes to policies of the Plan are advocated, including the borough's housing requirement in policy STR1.

10.3. To ensure adequate supply of housing arises, the land at Home Farm, Lower Green Road, Rusthall (Site Ref: 60) should be included as an allocation.

10.4. These matters can consequently be addressed through Main Modifications to the Plan allowing for a Sound Plan.

11. FINAL REMARKS

11.1. We trust the above comments are of assistance in preparing the necessary main modifications to provide for a sound Local Plan.

11.2. We welcome the opportunity to engage in constructive dialogue with the Council in relation to our observations, including the allocation of our client's site at Home Farm, Rusthall (Site Ref: 60).

11.3. Additionally, we confirm that we wish to be notified of each further step in the preparation of the Local Plan, including its submission to the Inspectorate for examination.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Changes sought to the Local Plan with respect of the approach to Tudeley village in policy STR/SS3

8.7. The Plan therefore as currently prepared is not sound with respect of:

a) It is not justified as the evidence does not support the removal of land at Tudeley for the garden community; and

b) It is also inconsistent with national policy in the approach does not adequately reflect the guidance on considering all sustainable opportunities within the Green Belt before contemplating poorly located greenfield sites like Tudeley. It is therefore contrary to paragraphs 137 and 138 of the NPPF.

8.8. To address these matters of soundness, a range of amendments are proposed. The proposed changes are.

1. That policy STR/SS3 is omitted from Local Plan, alongside consequential amendments to other parts of the plan i.e. the policies map to ensure that the Tudeley site is retained in the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To clarify any points the Inspector has with respect of the detailed representations submitted

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	

Respondent's Name and/or Organisation Millwood Designer Homes Ltd

Question 2

Agent's Name and Organisation (if applicable) Woolf Bond Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: full representation attached has been separated into Policy STR1 (PSLP_1876, Policy STR9 (PSLP_1879), Policy PSTR/BM1 (PSLP_1881) and Policy STR/SS3 (PSLP_1882). See also appendices attached].

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. INTRODUCTION

1.1 Our clients (Millwood Designer Homes Ltd) have a controlling interest in land at Ashes Plantation, Maidstone Road, Matfield (Site Ref: 353).

1.2 The site was allocated in the Regulation 18 Draft Local Plan (Sept 2019) as a suitable and sustainable location to provide for 30-60 dwellings under Policy AL/BM3.

1.3 The council's decision to deallocate the site is not supported by the evidence base including this site assessment set out in the sustainability appraisal. Accordingly, the site should be reinstated as a housing allocation on similar terms to the wording set out in former Policy AL/BM3.

1.4 For the reasons set out below, we are of the view that the Council has failed to provide an appropriate strategy which seeks to meet the Borough's development needs, especially with respect of housing. Consequently, for the reasons outlined in these submissions, it is not considered that the Draft Submission Plan adequately addresses the Borough's housing needs in locations which are accessible to existing infrastructure and services such as those available at Matfield. Such locations should be considered in advance of the unjustified removal of land from the Green Belt which as detailed in the representations, which approach would be wholly consistent with the approach of national policy in the NPPF. We therefore advocate changes to the Local Plan to address these matters.

1.5 Having regard to the concerns with respect of the appropriateness of the approach and its challenges of delivering sustainable growth, we therefore advocate the removal of the proposed allocation at Tudeley Village and the allocation of deliverable sites in sustainable locations, including land controlled by our client at Ashes Plantation, Matfield. The site affords a logical opportunity in helping to meet identified housing needs and could provide for up to 60 dwellings, to include a policy-compliant level of affordable housing.

2. REPRESENTATIONS AND SUPPORTING INFORMATION

2.1 Our comments upon the various draft policies and proposals are set out below and are accompanied by the following Documents:

- Duly Completed Response Form.
- Copy of Inspector's assessment of the Tonbridge & Malling Local Plan (15th December 2020) (appendix 1)
- Inspector's Report into Examination of the Sevenoaks Local Plan (2nd March 2020) (appendix 2)
- Sevenoaks DC v Secretary of State for Communities, Housing & Local Government [2020] EWHC 3054 (appendix 3)
- Calverton PC v Nottinghamshire County Council [2015] EWHC 1078 (Admin) (appendix 4)
- St Albans City & District v Hunston Properties [2013] EWCA Civ 1610 (appendix 5)
- Hundal v South Bucks DC [2012] EWHC 7912 (Admin) (appendix 6)
- Tandridge LP Inspector's interim conclusions (11th December 2020) (appendix 7)
- Uttlesford Local Plan post Stage 1 hearings Inspector's letter to Council 10th January 2020 (appendix 8)
- North Essex Authorities (Braintree, Colchester & Tendring) Inspector's Report (10th December 2020) (appendix 9)

2.2 Our client's representations upon the Draft Local Plan can be summarised as relating to the following:

Policy

Representation

Policy STR1: The Development Strategy and extent of Built Development Limits

Objection

Policy STR9: Green Belt

Objection

Policy PSTR/BM1: The Strategy for Brenchley and Matfield Parish and the omission of land at Ashes Plantation as a housing allocation for up to 60 dwellings.

Objection

Policy STR/SS3: The Strategy for Tudeley Village

Objection

Omission site – Land at Ashes Plantation, Maidstone Road, Matfield (SHLAA Ref: 353)

Objection

3. OVERARCHING POSITION

3.1 We have a strong belief in the principle of the plan-led system and in setting out our representations upon these polices, we hope to be able to work with the Council between now and the formal submission of the Draft Local Plan pursuant to Regulation 22 of The Town and County Planning (Local Planning) (England) Regulations 2012 (as amended), to ensure the Local Plan satisfies the tests of soundness at paragraph 35 of the NPPF.

3.2 We have considerable experience and expertise in dealing with and realising development schemes through the planning system. In this context, a principal constraint to the timely delivery of housing is the way in which policies for the allocation of sites have been formulated.
