Version	0.4
Question 1	
Respondent's Name and/or Organisation	Delwyn Kay
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS1 for Paddock Wood, including land at East Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My family and I have lived in East Peckham for nearly 19 years now, my school aged children attend local schools, they have to travel for secondary school (as do all children that age from our village). I work in mental health NHS services that require me to travel to Tunbridge Wells to my team base and around South West Kent to provide community services to local residents.

I am concerned about the prospect of this proposed massive development in East Capel and the demand that will place on our local services (GP, schools - esp secondary schools, roads, NHS). There is traffic congestion around this area now, esp at peak hours and even despite the covid restrictions currently in place. If this development goes ahead this will make it very difficult for villagers in East Peckham to travel to their work and schools as the congestions points will be on small lanes. Additionally the plan funnels traffic into certain limited routes that will make trip times and distances excessive for us here in East Peckham, easily doubling times and inconvenience and making it harder for us to travel locally into Paddock Wood, Tonbridge, Tunbridge Wells and to access the A21. There are plans to block the route for us to South Tonbridge and the A21, where the majority of secondary schools for our girls are. The congestion will add to local pollution and inconvenience for current residents. Might I suggest the proposal of blocking roads such as Hartlake to solve congestion for current residents is a poor and simplistic solution, compared to changing the housing plan to provide smaller sympathetic housing developments, in a wider range of places that can be integrated into villages and towns and not place undue demand on the local facilities of neighbouring councils, at the expense of local council tax paying residents of Tonbridge and Malling.

Using green belt and farming land for the purposes of housing is not in keeping with local residents wishes and the national and local plans for that type of land use. Using current town and village edges and brown field should be the first and main housing option.

It is already difficult to get a GP appointment at our local surgery in Paddock Wood and for our children to obtain places and to travel to Tonbridge comp and grammar secondary schools. This will only worsen for our village if there is a development of thousands of houses between our village and our GP surgery and also the schools. This will therefore restrict access of current local residents to facilities if the new development goes ahead. Local services need to be able to provide facilities to its current residents and this will be impeded if this proposed plan goes ahead in its current state. The idea that more schools and GPs will be provided is unlikely, similar developments in other local areas have not been able to attract GPs and the demand has continued on the existing surgeries (such as at West Malling) and that schools are not built for many years down the track, affecting current residents in the meantime.

This area is prone to flooding and the degree of flooding will only increase into East Peckham with the degree of building work that is proposed for East Capel. Given global warming will only increase wet weather and the prospect of flooding here, it is unacceptable to increase this risk to East Peckham by

building such a large development in at this site. We all understand the need for housing, but not at the expense of flooding downstream to other neighbours.

There will be increased travel to Paddock Wood for trains, GP and schooling in addition to the increase demands on Tonbridge. This is a small town, that is already seeing increased demand on facilities with its current in progress building works. This town is not resourced to have even thousands more families trying to access facilities. The pollution and congestion for local residents and small surrounding villages will be bad.

This plan will change the nature of the villages and towns in its vicinity by utterly changing Capel village to a town, Tudley hamlet to a town and soon enough linking Paddock Wood to Tonbridge and utterly changing this rural area into one large residential town.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	Delwyn Kay
---------------------------------------	------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR -6 proposed closure of Hartlake Road

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My family and I have lived in East Peckham for nearly 19 years and travel for work, school and social connection around the area.

Hartlake Road is the main route for our small village and a few surrounding hamlets into South Tonbridge and to the A21. To close this road would cause considerable inconvenience, travel, cost and pollution as we are diverted onto longer routes and thereby increasing delays for all travellers. The problem here is the proposed development of Tudley and Capel, not the needs of a few villagers to continue to use a necessary and local road to get to their nearest town. The main road route onto the A26 is fine for north Tonbridge or the high st but adds delay and congestion to our accessing south Tonbridge, where the girls schools are in particular.

Additionally it would prevent access to the Poacher restaurant and bar, this is local to East Peckham but would cease to be if Hartlake Road were to be closed. This would adversely affect their business by preventing access from one direction.

It would also affect our ease of accessing local river walks and historical sites, such as the river walks from Hartlake bridge or the famous Tudley church. It would be an effort to solve a potential problem of traffic on the road, but create more disturbance and restrictions for local residents seeking to explore their near outdoors. Preventing excessive housing developments in Tudley/East Capel would prevent excess traffic onto B2017 and traffic build upon the intersection with Hartlake Road, which is a much more sustainable and sensible solution than the proposed 'throw the baby out with the bathwater' solution of closing Hartlake Road.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

My family and I have lived in East Peckham for nearly 19 years. We travel to Paddock Wood using this route each week to go to the supermarket, access our GP or to the vet for our ailing cat and when our daughter worked at Waitrose we travelled this route at antisocial hours several times a week.

The proposal to close the road would adversely affect East Peckham villagers from accessing their most local facilities for their GP surgery, vet, secondary school, supermarket and main street shops. It would funnel our local trips onto the B2017, in with all traffic heading to Colts Hill/Tunbridge Wells and Five Oak Green/A21 and Tonbridge and add 100% to travel time and distances. This only adds to congestion, pollution, travel costs and inconvenience for all travellers. It would adversely affect Paddock Wood shops as sales diverts to online or locals travel to other areas that are less inconvenient and offer more shops.

This proposal blocks local residents on the Hop Farm side of the bridge from accessing their own town and facilities without an excessvie diversion onto the B2017 or down small local lanes, meaning if they had mobility problems or needed to carry items such as supermarket shopping they would be unable to without excess car travel. The hourly 6/6A bus would not solve this problem as it does not serve the GP or Commercial St. It is likely that East Peckham residents would also resort to using small rural lanes as alternatives and thus this plan creates more problems than it solves.

With all the new development on the B2017 and around Church Rd it would be madness to turn those 2 roads into the main routes to access Paddock Wood, they are not able to handle that volume of traffic. The secondary school at the junction of the new houses and with the proposed development required at the school would only add to this congestion, queueing and pollution.

Additional plans to close Commercial Road to through traffic, in conjunction to the road closure proposal at the railway bridge, would make it quicker to go to a supermarket in Tonbridge than access Waitrose in Paddock Wood. How would their trucks access the store? What even is the route from East Peckham to Waitrose with these closures? B2017 past Putlands Gym and down Green Lane with its narrow road and speed reduction measures? Down small lanes to Queens St and Church Road? Down Lucks Lane and into Queens Street? Or funnel all the traffic, including the trucks, into Station Road that is single lane at points. It is clearly a nonsense proposal without understanding of how local traffic needs to access the area from the direction of East Peckham and overestimates the ability of people to carry out their business as a pedestrian. As a cyclist on the roads several times a week I can tell you now that this is not a possible way of completing my family weekly food shop!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I am writing to oppose your hidden scheme of trying to close Hart Lake.

I am sure many of you do not actually live in this area, however this is a well used road by the rural residents to enable them to get around the countryside. by closing this road as part of the local plan you are forcing us to use already heavily congested insufficient road schemes. by removing the use of HartLake you will be causing more pollution due to more traffic to be standing still because of the sheer weight.

TWBC appears to be very underhanded and not transparent with the information and is pushing all their issues on to Tonbridge. By closing this stretch of road you are clearly onside with Harry Teacher and what ever we say is not being taken into consideration.

Closing HartLake only will benefit one person and the local Plan!

You have increased the size of Paddock Wood tenfold and creeping into five oak green, you have not taken any responsibility in creating new roads or have proposed new schemes to enable the people who already live here and the people buying up the new housing stock that is currently being built.

if this is your answer to the issue by closing a road and also closing the bridge into paddock wood you are making everyones lives a further misery.

it is evident NONE of you live around here and your solution is childish and futile.

This idiocy MUST be STOPPED

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Executive Summary

There is much detail laid out in this submission objecting to the development of the two so-called Strategic Sites at Tudeley Garden Village and East Capel, as part of Paddock Wood. To be helpful I have summarised the major points, against the listed Policies in the Plan:

- . **Policy STR2 – Place Shaping** - Forcing almost 50% of the Borough's Housing Needs on to 2% of the Borough's Population, who are represented by one, out of 48, Councillors. Little or no account taken of the severe Infrastructure impacts on the two neighbouring Councils Tonbridge & Malling (TMBC) and Maidstone (MDC).
- . **Policy STR3 – Brownfield** - an overly negative approach to the locations of the sites and their ability to be developed into sustainable housing developments, given their existing land use and infrastructure.
- . **Policy STR5 - Infrastructure and Connectivity** – I have focused on Schooling, Medical Facilities and Provision of (basic) Utilities. Transport Infrastructure comments are in STR6 – Transport and Parking
- . **Policy STR6 - Transport and Parking** – After setting the context I have set out the current road infrastructure status and issues, the proposed mitigations in the PSLP to deal with them, and finally, comments on the proposed mitigations.
- . **Policy STR9 - Green Belt** – A general statement regarding the Green Belt, with reference to the Site Allocations Plan in 2016, with comments from the Inspector who reviewed it
- . **Policy STR/SS1 - Strategy for Paddock Wood and East Capel** – I have put in two submissions one for STR/SS1 and one for STR/SS3
- . **Policy STR/SS3 - Strategy for Tudeley Village** - I have put in two submissions one for STR/SS1 and one for STR/SS3
- . **Policy TP1 - Transport Assessments etc** – for such important Strategic Sites the level of Transport Assessments is woefully inadequate. They are based on over-optimistic, i.e. too small a number, of trips, modal shifts are unrealistic, very little, if any, evidence of KCC's input, agreement or approval, and flagrant disregard of the impact of TMBC and MBC's own plans and how that factors into the Transport Assessments.

More Detailed Information

Policy STR2 – Place Shaping

The original Issues & Options SA identified 6 growth strategies (“GS”), none of which mentioned Tudeley/Capel specifically as a site for a potential garden town. GS5 was described as “New freestanding garden settlement. There is no location identified with this option. A new settlement could be located anywhere within the borough.”

The preferred option at this point was “the A21 Growth Corridor”, where large scale investment in Infrastructure, dualling the A21, had already taken place by KCC.

Then, just prior to the Regulation 18 Consultations GS5 was adopted by TWBC with Strategic Sites at Paddock Wood/East Capel, and Tudeley Garden Village, as the nominated sites. This was a real “rabbit out of the hat”!

Please see the table below as indicators of why the Place Shaping was, and remains, wrong.

Parish/Ward

% of Population of TWBC

% of Housing Allocation

Number of Councillors

Capel PC

2,400 – 2%

4,200 – 45%

1

Paddock Wood TC

4,100 – 21%

2,400 – 21%

3 (+1 absent)

Total for Strategic Sites

6,500 – 23%

6,600 – 66%

4

Rest of TWBC

112,250 – 77%

2,747 – 34%

Total for TWBC

118,750

9,347

48

I feel this Table represents a very unfair allocation of housing needs to one area of the Borough, and one that borders on Tonbridge & Malling Borough Council (TMBC). This analysis results in:

- . 45% of the housing need being imposed on 2% of the Borough's population.
- . 66% of the housing need being imposed on 21% of the Borough's population.
- . These wards are represented at the "Council Chamber" by 9% of the TWBC Councillors
- . The major impact of these proposed developments will be felt in Paddock Wood (part of TWBC) and TMBC as these are the two centres which attract residents and traffic for:
 - . Commuting
 - . Shopping
 - . Schools
 - . Medical Facilities
- . Paddock Wood already has a significant level of new housing developments in progress. They are already causing issues with Traffic Congestion, Flooding, Sewage etc. And they don't meet affordability targets.
- . Similarly, Tudeley and East Capel suffer from Traffic Congestion, Flooding and Sewage.
- . TMBC are having a massive infrastructure problem and cost dumped on their doorstep. TWBC get the Council Tax, TMBC get the hassle and cost!

Finally, the vast majority of the development proposed in for the two strategic sites is:

- . Metropolitan Green Belt – with good classification of the quality of the agricultural land. To build over this land would be a travesty, reducing the country's ability to produce fruit and other arable produce, and creating settlements which will have an adverse impact on the landscape and environmental aspects of this area of Kent.
- . Flooding – a lot of the proposed development areas for the two Strategic Sites are either officially on the Flood Plain or have been subject to severe flooding episodes over the relatively recent past. I would have thought it likely that Home Insurance providers could adopt an aggressive, or expensive, attitude to providing cover in these circumstances. As a result, potential developers will also react negatively to this challenge.

In summary, this Local Plan is so skewed to development in a currently tranquil, beautiful, and highly food-productive, area, in the Green Belt, subject to flooding, with massive infrastructure issues, and on the doorstep of the neighbouring Borough Council who will end up bearing the brunt of the issues this will cause.

Policy STR3 - Brownfield

The reviews that TWBC have carried out on Brownfield sites appear to have adopted an overly negative approach to the locations of the sites and their ability to be developed into sustainable housing developments, given their existing land use and infrastructure.

I am aware that Save Capel carried out an extensive analysis of potential Brownfield sites, ahead of the Regulation 18 Consultations, which demonstrated that the volume of houses being proposed in

Capel parish could be easily accommodated by Brownfield developments. Sadly, as with the majority of other Regulation 18 comments/challenges TWBC chose to ignore them.

Probably the main opportunity for a Brownfield development exists at the former Blantyre House Prison site. It is a large site, not in the AONB or Green Belt, with Infrastructure services already installed. It's rejection by TWBC on the basis of there only being minor roads, and therefore significant investment would be required for transport infrastructure, pale into insignificance compared to the transport infrastructure of the Tudeley and Paddock Wood/East Capel sites (see comments below on other Policies relating to this topic.

Whilst not a Brownfield development issue, one of particular relevance from an alternative site's perspective, is the Castle Hill Developments proposal to create 1,600+ homes which are in the favoured "A21 Corridor" option. Whilst the proposed development is in the AONB it has much better potential from sustainability and infrastructure perspectives. This was rejected "out of hand" with little or no analysis by TWBC.

Additionally, TWBC have recently approved a very large Commercial Development at Kingstanding, which was also in the same AONB area. This has great employment potential, but leads one to wonder why a Commercial Development is acceptable in the AONB but a respectful (to Sustainability) Housing Development isn't?

Policy STR5 - Infrastructure and Connectivity

Introduction

The proposed developments at Tudeley Village and East Capel (now, apparently part of Paddock Wood) will bring significant pressure and issues in other Infrastructure areas, especially:

- . Schooling
- . Medical Facilities
- . Provision of (basic) Utilities

Before considering each of these in turn, please review the following new population projections as context. These are based on an assumption of 2.26 people per household (a usual UK Metric) and using the metric of 0.285 children per household as part of that:

Projected Population Growth

Capel

Tudeley Village

Capel Parish

Adults

5,500

4,500

10,000

Children

2,200

1,800

4,000

Total
7,700
6,300
14,000

Projected Number of Extra Vehicles

3,500
2,500
6,000

This swamps the existing population of Capel Parish which was 2,400 at the previous census. So where will all these extra go for schooling, medical facilities and how and when will basic utilities be delivered to this staggering number of people.

Schooling

For the 1,800 children from Tudeley, the plans to meet the educational needs of 2,200 children from East Capel seem inadequate.

Proposals in the Plan, including Paddock Wood are:

- . New secondary school to serve Tudeley Village, potentially up to 1,000 pupils.
- . Expansion of Capel Primary School by 1FE.
- . Extension of Mascall's Academy by 1FE from 2021.
- . Two new Primary Schools in Paddock Wood, providing 4FE.

The Tudeley secondary school of perhaps 1,000 pupils and expansion of the small Capel primary school will be woefully inadequate, and particularly so if both development plans proceed. The new secondary school is not planned to be built until Phase 4, or after 1,900 houses have been built!

The remaining children totalling up to perhaps 2,000 will need to be driven or bussed daily to either Tonbridge or Tunbridge Wells (at least 50 or 60 buses twice or more each day). The planned provision for nurseries is similarly inadequate.

There is an incredibly strong, existing, demand for places in the good local schools in Tonbridge and Tunbridge Wells. It is naïve to think that some 2,000 pupils will somehow be absorbed in the existing schools in these two towns; in practice many pupils will have to be driven or bussed far away to Maidstone or Sevenoaks, all adding to traffic and congestion. In reality, another two or possibly three large schools will need to be built by KCC if both projects proceed. The key issue is when the schools will be built and ready to take pupils.

There will inevitably be children with special needs, the cost burden of which will fall on KCC and TWBC. In practice, TWBC will simply be imposing these education costs elsewhere, displacing the education of children in other Boroughs and creating congestion, particularly in Tonbridge and Tunbridge Wells.

The plans make no assessment of these education and congestion costs or whether KCC can or will agree to fund these new schools and so are unsound.

Medical Facilities

Regardless of whether one or other or both projects proceed, the number of new residents will necessitate new healthcare facilities, the plans envisage one new GP surgery which will be particularly busy and will require some 6 to 8 doctors plus support staff. If both proceed, there will be 14,000 new residents ultimately requiring these healthcare services.

There will also be considerable extra pressure and costs imposed on Pembury Hospital which is already strained. As stated in the plan, a significant number of the adults are likely to be over 65 and elderly, some with special needs and as they age, increasing demands will be made on local health services.

The same will apply to the up to 4,000 children. All of this will impose significant additional and increasing social services costs on TWBC and medical provision costs on the local Health Trust.

Additionally, there is little information in the Plan about the timing of the creation of the new medical facility. Until that is planned, approved, and developed, whatever proportion of the 14,000 new residents are living there before then will need to access medical facilities elsewhere. This will probably fall on to Tonbridge where medical facilities are already stretched. **Another example of TWBC passing their problem on to someone else, TMBC in this case.**

The plans do not properly address these issues nor quantify these costs so are unsound, inadequate and will impose potentially large contingent costs on TWBC.

Basic Utilities

Electricity, Gas and Communications

As no new houses can be connected to the gas grid from 2025, the two developments will need to be powered entirely by electricity. This will require extensive investment in major HV transmission lines and stepdown transformers, particularly as new EV charging infrastructure will be required eventually for some 6,000 cars given that petrol and diesel cars will be phased out after 2030. All the cables will need to be buried. This is a major engineering task in addition to road building, road widening, school building, GP surgery, sports facilities etc. The Tudeley plan budgets £11.5m and the Paddock Wood/Capel plan budgets £10.8m solely for electricity connections and diversions with no discussion about grid infrastructure or who pays for these or how construction will be phased. In the experience of experts, we have consulted, the cost of the grid infrastructure and substations will be many £millions and will not be installed for several years. FTTH broadband will be relatively more straight forward to install.

The plan is unclear on this important aspect and so is unsound as a result.

Waste Disposal

The disposal of waste from up to 6,250 new homes will require TWBC and KCC to invest in more waste disposal facilities. This will create yet more heavy vehicle movements on already congested roads and add to the waste already trucked away from North Farm. These additional costs do not seem to be factored into the plans and will be a charge on the annual rates which would rise slowly over time to a total of some £10m once all 6,250 homes had been built.

In Summary

The PSLP documentation is woefully inadequate on any of these topics. The views and agreement of KCC are absent from these Plans. There has been no visible Master Planning for Utilities for the Tudeley Village proposal, and what is there for Schooling and Medical Facilities falls very short of the mark of a justified, fully costed and risk-managed Plan. **For all of these reasons the Plan is unsound.**

Policy STR6 - Transport and Parking

Context

Capel Parish's geography and existing transport infrastructure heavily-constrains planning sustainable development for the future. This is recognised in many parts of the PSLP ('the Plan') and supporting evidence. The Plan and its 'key diagram' (Appendix A of the Plan) make it very clear.

- . The only Trunk Road in Capel Parish is the A21 through the west of the parish serving London/M25 to Hastings, running east of Tunbridge Wells through the Borough.
- . There are two other "A" class roads relative to Capel Parish: a) A26 Tonbridge to near Maidstone, borders Capel Parish at Tonbridge to the west & follows the river Medway valley north east partly bordering Capel. b) A228 (northwest/southeast through Capel Parish) links M2 & M20 London-Dover motorways & the North Medway towns to West Malling, Paddock Wood, A21 & Tunbridge Wells. A major highway traversing Capel.
- . There is only one railway line in the Parish, but no stations. The two nearest stations are Tonbridge serving London/Hastings, London/Dover/Ramsgate, Tonbridge/Redhill. Paddock Wood is on the London/Dover line with an irregular country line between Paddock Wood/Maidstone West.
- . Bus services are 'patchy and infrequent in rural areas' (and almost non-existent after 7pm).
- . The local road network has severe constraints; Much of the infrastructure is rural and narrow and therefore unsuitable for HGVs. The impact of large and many foreign HGVs, on communities in the area, presents a major, existing and continuing challenge.

- . New quarrying will create 120 HGV movements per day through the access point in Capel onto A228 and impact all roads in the area.
- . Capel Parish's only "B" road B2017 links Paddock Wood to Tonbridge via Five Oak Green & Tudeley. There are also a number of Kent County Council designated "country lanes" used as "rat runs" with HGV traffic, many foreign.
- . There are a number of industrial estates, haulage and distribution yards that have evolved on old farmsteads throughout the area using country lanes.
- . All "main" roads are heavily trafficked, especially in the morning and evening peak periods.
- . The A228 in Capel is now recorded as "the busiest road" in the whole of Tunbridge Wells Borough by the TWBC traffic consultants.

This is the context against which all new development put forward in the Plan should be considered. Save Capel (SC) has reviewed the large number of references to the subject of transport in the Plan and supporting documents and have appointed expert advisors to assist us. 'Mitigation' of the significant impacts, particularly of increased traffic, is offered by Tunbridge Wells Borough Council (TWBC) in the context of developing the Strategic Sites (SS) at Tudeley Village and East Capel/Paddock Wood.

SC's review shows that the treatment of transport in the Plan is inconsistent and the result is unsustainable making the Plan itself unsound.

Impact of the Plan on travel at peak periods on the existing transport and roads infrastructure

Motion Consulting have also submitted their report in the evidence base for Regulation 19. This is based on the Traffic Modelling in the Plan and also Motion's own knowledge base of similar proposed developments.

In summary, the impacts are as follows:

Class of Road

Including

Roads Detail

RAG

"A" Roads

A21

ALL flows will increase due to traffic joining/leaving at the Tonbridge (Vauxhall) Roundabout to/from the East. This road was dualled between Tonbridge & Pembury in 2018 but suffers severe bottlenecks at the southern end, Kippings Cross where the dualled A21 ends. Longer delays expected with increases in housing from Paddock Wood.

Yellow

Circle

A26

Unacceptable increases in traffic from the South/East at Somerhill A26/B2017 Roundabout and on to Vauxhall A21 Roundabout to the West and into the Tonbridge Industrial Estate to the East. Long delays.

Red

Circle

A228 Colts Hill

Very high increased traffic flows at all junctions joining the A228. A228 at Colts Hill has been the subject of discussions about a bypass for 40+ years. **The Alders Road/Crittenden Road junction is a notorious accident black spot.**

Red

Circle

A228 Beltring

B2160 roundabout junction

Queuing traffic most of the day at the 3-spur roundabout. Main junction to reach Paddock Wood industrial areas.

4th spur is access to The Hop Farm – huge park & events centre 000s of vehicles at some events.

Yellow

Circle

“B” Road

B2017,

Badsell Road/ Five Oak Green Road/ Tudeley Road

B2017 (cont)

A typical old “B” road. The only direct route west from Paddock Wood, at the junction of the B2160, to Tonbridge & A21. Running through East Capel to A228 then Five Oak Green, Tudeley & A26/A21 Tonbridge. Overloaded, no HGV restrictions or traffic calming at all. The B2017 is already very busy at peak times and has 3 accident black spots.

Due to long delays at A228/A264 Pembury, this is used as main route to Tonbridge & A21 heading Northwest. Commuter traffic uses this road to egress many other villages east of Paddock Wood & as far south as Hastings via other rat-runs to avoid delays on A21 south of Kippings Cross.

The B2017 cannot take any more traffic.

Red

Circle

Minor Road

Crittenden Road/ Alders Road

A very narrow, winding country lane used as a rat-run linking Matfield area & further east & south to B2017 at Crockhurst Street then on to Tonbridge & A21. Crosses A228 at Colts Hill. Used by traffic avoiding the A21 long delays at Kippings Cross especially during commuter times and weekends.

Red

Circle

Minor Road

Hartlake Road (part of which is TWBC, and part of which is TMBC)

In parts a narrow, winding road, used as a through route & rat run to avoid delays at Tonbridge and/or A228 which are severe at peak times. Often cars parked by the bridge over the Medway for fishermen and ramblers.

Red

Circle

Sherenden Road

A very narrow & twisting lane running from Hartlake Road near the very popular Poacher & Partridge pub/restaurant, past Bank Farm Stables and through to the B2017 Five Oak Green Road. Blind junction on B2017. This will form part of the proposed Tudeley Garden Village TGV.

Yellow

Circle

Sychem Lane

A country road, very narrow and winding, linking Five Oak Green to the hamlets of Redwood Park, old Capel & Alders Road. If the Five Oak Green bypass is built this road will be closed to through traffic.

Unacceptable to local residents.

Red

Circle

Whetsted Road

Branches off to the North East at centre of Five Oak Green to link up with the A228, midway between B2017 & B2160 roundabouts. Narrow and winding residential road, no pavements, a narrow bridge on a blind bend. Rat-run A228/ Tonbridge to avoid Colts Hill & Pembury delays and B2017/A228 roundabout delays. The reopening quarry traffic (est.120 vehicle movements per day) will egress the A228/Whetsted Road junction. **Already an accident black spot.**

Red

Circle

[TWBC: Respondent had used red and yellow circles in above table - TWBC has replaced these with words for formatting purposes]

Mitigations as per the PSLP

The PSLP contains a number of mitigations based on Traffic Modelling carried out by two Consultants, SCANTEC and SWECO. According to our own independent Traffic Consultants 'Motion' the scenarios, and bases of the modelling would be best described "very optimistic" in terms of both numbers of journeys and mode of transport. The detail is on the Motion Report which attached to this report.

As a result, Save Capel believes that there has been a significant under-assessment of the traffic implications of the PSLP as currently drafted.

Class of Road

Including

PSLP Proposals

“A” Roads

A21

Junction re-alignment at Kippings Cross. No other mitigations planned to relate to the PSLP. There are some changes proposed outside of the PSLP regarding the new Business Park bordering North Farm Industrial Estate. This development was approved by TWBC and KCC (March 2021) despite it being in the AONB.

A26

Proposals to improve traffic flows at the junction of the A26/B2017 just below the Somerhill Schools entrance, which is currently a major disruption during peak hours. A widening of the B2017 between this roundabout & new roundabout at TGV Hartlake Road. Two lanes each way + cycleways against the existing single carriageway each way.

A228 – Colts Hill northern section

Proposal to create an “offline by-pass” to alleviate the current accident black spot at junction of Alders Road/Crittenden Road with the A228. Details regarding the A228 are not clear enough due to issues with KCC funding and impact of Tudeley Garden Village. If TGV is built then Five Oak Green bypass will be included. The southern section of Colts Hill is excluded from PSLP.

A228 – Colts Hill

Roundabout to access proposed Five Oak Green bypass which is dependent upon TGV – see later..

A228 General

There are various small schemes along A228 to support the East Capel/Paddock Wood Garden Village. Crossing points for pedestrians and cyclists are not clearly defined and are of a safety concern.

A228/B2017 Junction

3 new estates under construction in Paddock Wood (approx. 1,650 homes) outside of the PSLP, have included £870k for junction improvements to include 3 traffic lanes on the whole roundabout.

“B” Road

B2017, including Five Oak Green Road/Tudeley Road/Badsell Road

There is a proposal to build a “Five Oak Green By-Pass” to relieve the volume of traffic on the B2017 through Five Oak Green. This would be a new road from the proposed northern section of A228 Colts Hill bypass (close to Alders Road) to a junction with B2017 by the existing Capel Primary school and proposed secondary schools.

B2017/A26

There is the previously mentioned road widening proposal at the junction of the B2017 and the A26 near to the Somerhill Schools

B2017/B2160

Paddock Wood

Improved B2017 Badsell Road/B2160 Maidstone Road signalised junction near to Paddock Wood – (already started).

Minor Roads

Hartlake Road (part of which is in TWBC, and part of which is in TMBC)

Create a roundabout at the Hartlake Road/B2017 junction for TGV. Furthermore, TWBC proposes Hartlake Road be closed to through traffic where the road crosses the River Medway. Currently the road continues on to Golden Green and then to Tonbridge and East Peckham. As a result of the proposed closure of Hartlake Road the current two-way traffic flow would terminate at the bridge over the River Medway.

Sherenden Road

No mitigations known. Will be part of Tudeley Garden Village & no plans announced yet.

Alders Road

The proposed Five Oak Green Bypass is to alleviate the traffic flows on Alders Road which are currently high and will become more significant even before the Local Plan proposals go ahead due to developments currently underway in Matfield, Horsmonden & Paddock Wood. However, the PSLP notes that the Five Oak Green bypass will not proceed without TGV and so there could be no relief for Alders Road/Crittenden Lane.

There are various proposals for the design of A228/Alders Road junction, but none has yet been agreed as KCC may sponsor the whole Colts Hill bypass if they can secure funding after 2025, although TWBC & then KCC have been saying this for the last 40yrs. Residents have no confidence this will be within the timescales suggested.

Sychem Lane

Will be closed to vehicular access if TGV and Five Oak Green bypass are built, but will allow pedestrians, cyclists, and horse riders to cross the new bypass, although no mention of how.

Whetsted Road, Five Oak Green

A228 Maidstone Road/old Whetsted junction improvements.

A228/B2160 Hop Farm roundabout

Improved A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road roundabout

Comments on Mitigations

Class of Road

Including

Likely Impact & Comments

"A" Roads

A21

Kippings Cross improvement scheme

The main factor that will determine if this goes ahead is the proposed dualling of the Kippings Cross to Lamberhurst section of the A21 which has already been designed by Highways England and mentioned in parliament as a potential for the "next" round of major highways works by HE.

However, those proposals will not be decided until 2023/4.

This is the main arterial route south through part of Capel Parish and dualling of lower section of A21 to Lamberhurst & A262 may reduce some rat-running through B2017. However, roundabout junction improvements alone are unlikely to relieve rat-running in Capel as many are to avoid A21 queues north/south. New estates under construction in Paddock Wood and Matfield are likely to benefit.

A26/B2017

Roundabout

Significant remodelling of the whole roundabout and junction would be required with potential land grab. The disruption to traffic in the whole Tonbridge area and impact on Five Oak Green and Paddock Wood would be immense and this is not accounted for in the PSLP. There are no alternative routes in this area as they are already being overloaded. One alternate could have been Hartlake Road, but the PSLP is closing this to through traffic.

The impact on the very successful Schools at Somerhill will be significant, but as the Schools are effectively tenants of the Hadlow Estates Developer it is unlikely that they will raise objections.

A228

Colts Hill Bypass – after 40 years with no approved proposals what is KCC's views on the proposed mini-Bypass? It makes little sense to dig half a hole from both a cost and disruption basis!

Why build half a road and introduce more very difficult and dangerous junctions halfway up a hill and keep the narrow bends to the north of Alders Road used by hundreds of HGVs daily? It is just moving the accidents elsewhere; it does not solve the problems of Colts Hill. **Very Unsound.**

"B" Road

B2017, including Five Oak Green Road /Tudeley Road/Badsell Road

The proposed "Five Oak Green Bypass" has not been subject to any discussions between TWBC and the two current landowners who only found out about this proposal via social media. Neither landowner is interested in selling and therefore this proposal would need to go through a CPO process.

The bypass will cross through ancient woodland, close off Sychem Lane to traffic & isolate old Capel, Alders & Redwood Park from their village and amenities in Five Oak Green.

The Five Oak Green bypass junction with B2017 is outside of 2 schools (the existing Capel Primary School, and the proposed Tudeley Secondary School) with a potential of more than 2,000 attendees (staff & pupils).

The planners are supposed to be safety focused and I fail to see how a major new road with a junction outside 2 schools is considered a safe approach?

The new bypass will be loaded with HGVs egressing the M25/A21/Paddock Wood as it will be much quicker and use less fuel than travelling through the A21/A228 Colts Hill & Pembury to Paddock Wood & East Peckham industrial areas.

Pollution outside the schools is a major concern.

The consultant's Plans & Maps in the PSLP have incorrect speed limits shown on them for Five Oak Green and this demonstrates that this was a rushed desk top study and none of the planners actually visited Capel. One section shows Capel as being just Alders Road and it shows a picture of a "Capel" sign which is actually the hamlet of old Capel along Alders Road and **NOT** the parish sign at all.

This plan has not been thought through properly and the impact on the whole area not considered in its entirety. The attention to detail is abysmal and the whole project is **Unsafe & Unsound**.

B2017 Hartlake Road Tudeley

The proposal to create a new roundabout where the B2017 meets Hartlake Road in Tudeley also suffers from an inadequacy of space to create a roundabout.

The improvements here will depend on TGV being approved, but then we will have all this traffic hitting this roundabout whilst thousands of residents and children are commuting to work and schools.

Unsafe and Unsound.

B2017 from A26 to Hartlake Road

The previously mentioned road widening proposal from the junction of the B2017 and the A26 near to the schools at Somerhill and up to TGV will entice drivers to speed past the 3 schools' entrance at Somerhill and being on a hill drivers will take longer to stop potentially creating mayhem on the road.

A228/B2017 Roundabout

Improvements

The detail in a previously approved planning application regarding the proposed increased capacity at A228 Maidstone Road/B2017 Badsell Road (Colts Hill/Dampiers Corner) roundabout suggest 3 lanes will be used around the roundabout.

In practical terms, given we have hundreds of large and often foreign HGVs along this route daily, some pulling very large trailers, it is unlikely to improve the flow through the roundabout.

It should also be noted that the flow is from all 4 spurs and not just 1 or 2 interrupted occasionally by the others. New estates in the PSLP will create huge queues at all spurs most of the day here.

It is also of concern that the Grade II 16C Listed Mill House standing right by the roundabout will suffer serious pollution issues and the additional traffic will affect all properties next to the roundabout regarding health issues and noise pollution.

A228/B2160 Beltring

Little detail is provided regarding the proposed improvements to the B2017 Badsell Road/B2160 Maidstone Road signalised junction near to Paddock Wood but being "signalised" will create huge queues on all arms of this very busy junction.

Minor Roads

Hartlake Road (part of which is in TWBC, and part of which is in TMBC)

The proposal is to create a roundabout (as above) where Hartlake Road meets the B2017, however TWBC also propose that Hartlake Road be closed to through traffic, where the road crosses the River Medway. Currently the road continues on to Golden Green and then to Tonbridge or East Peckham. As a result of the proposed closure of Hartlake Road the current two-way traffic flow would terminate at the newly rebuilt bridge over the River Medway.

This is a rather badly thought through scheme. Planners **MUST** consider that we have a main railway line and major river running through the valley and crossings for either are very limited. By closing Hartlake road the traffic is forced to go through Tonbridge where another 6,400 homes are planned in the same period, as is a major development in Maidstone Borough Council, alongside 2,800 in Tudeley and 8,500 in Paddock Wood. **The roads are already clogged in Tonbridge due to the restricted crossing points and the whole idea of closing any crossing point is unsound.**

Sherenden Road

No mitigations proposed or plans revealed.

The Masterplanning is still unannounced.

Alders Road

The Five Oak Green Bypass is proposed to alleviate the traffic flows on this road (as well as B2017) which are currently high and will become more significant if the Local Plan proposals go ahead without inclusion of major road improvements in the area. See previous comments about the A228 Colts Hill Bypass

Sychem Lane

Closing Sychem Lane will isolate part of Capel Parish and the idea of horse riders, cyclists and pedestrians having to cross a fast bypass without a bridge is **Unsafe and Unsound.**

Whetsted Road

Improved A228 Maidstone Road/Whetsted Road priority junction. Currently, the quarrying operations here are suspended. When they re-open, as well as the increased traffic caused by the East Capel proposals, this junction will need to service 120 Quarry HGV movements per day. The junction is on a very fast bend and is already an accident black spot.

Conclusions

- 1 The impact of the sheer magnitude of additional traffic movements, as a result of building up to 5,000 new houses in Capel Parish, between Tudeley Village and East Capel, has been modelled

using very optimistic scenarios and assumptions with regard to volumes of traffic and modes of transport.

- 2 The assumptions take no account of the Local Plans being developed by neighbouring Boroughs where at least 12,000 new homes will be built. The impact of these new estates will affect the whole area.
- 3 None of the existing roads have the capacity or physical ability to absorb the increased traffic movements.
- 4 The mitigations proposed are either inadequate, unlikely to be deliverable or otherwise inappropriate, therefore they are **Unsafe and Unsound**.
- 5 The construction of any transport mitigations will in themselves be considerably disruptive, and from a timing perspective likely to be out of synchronisation with the house building programme.
- 6 Apart from minimal information about the views of KCC there are no agreed, even in outline, proposals that have been made available before the Regulation 19 Consultations.
- 7 For Tudeley Garden Village there is no evidence base that key Transport, Flooding, Other Infrastructure, Landscape or Biodiversity issues have been considered, or proposals made in the Masterplanning of TGV.

In summary, there are too many gaps in the information provided to take the PSLP to the next stage of the process. Unless these gaps can be adequately filled, through the Regulation 19 process, **we would suggest that PSLP is not sustainable and unsound.**

How will KCC/TWBC handle all of these highways works whilst the building of 8,500 homes on several sites is ongoing and the current residents are trying to go about their normal lives, without disruption.

There is a HIGH risk of ill health due to stress, air and noise pollution and the impact on the everyday lives of the existing population.

The PSLP is flawed beyond acceptability and does not take into account the health, safety and disturbance to existing residents and businesses.

Investment will not be attracted for many years due to the highways delays that are already proving a major challenge for all road users.

The direct impact upon the area for the next 20 years, whilst the new roads and 6,000+ homes are being built, is unacceptable.

The PSLP is therefore unsustainable and not sound.

Policy STR9 - Green Belt

Similar to neighbouring Borough Councils in Tonbridge & Malling and Sevenoaks, TWBC has a high proportion of the and within its boundaries which is either AONB or Green Belt. Given the housing targets "imposed" by Central Government, developing the required levels of housing, alongside the constraints of the AONB and Green Belt, provides a significant challenge to TWBC.

That said, if we look back at the Site Allocations proposals by TWBC of 2016 there are some interesting views expressed by the Inspector (Rynd Smith) who reviewed them and reported back to TWBC on 9th June 2016:

- . **Bullet point 22** – ".....On this basis, there is not a shortfall of allocated and deliverable land in Royal Tunbridge Wells and Southborough and the rural fringe. It follows I do not accept a need to allocate any land currently in the Green Belt."
- . **Bullet point 24** – "It follows that I agree the approach the SALP has taken to the Metropolitan Green Belt and I have not recommended that any land currently within the Green Belt should be allocated."
- . **Bullet point 79** – "The SALP has a number of deficiencies in relation to soundness, and, or legal compliance for the reasons set out above which means that I recommend non-adoption of it as submitted, These deficiencies have been explored in the main issues set out above."

A very different picture emerged at the Regulation 18 Consultation, perpetuated now in the PSLP, when the majority of the Metropolitan Green Belt in the "rural fringe" was put forward as Strategic Sites for Tudeley Village and East Capel/Paddock Wood. Additionally, comments expressed by the Inspector regarding drainage and flooding concerns at Bullet points 43, 60, 65 and 67.

As a result, the PSLP is therefore unsustainable and not sound.

Policy STR/SS1 - Strategy for Paddock Wood and East Capel

The format of the online submission tool means that one has to make two submissions, one for each of the Strategic Sites one objects to. The crossover between the two Strategic Sites, and the impacts on the community, are very similar. Therefore, there will be repetition between the two submissions.

I apologise to the Inspector for this duplication, and he/she having to read the same thing twice, but this is the nature of the beast that technology has created for this process, rather than the fault of any responders.

Policy STR/SS3 - Strategy for Tudeley Village

The format of the online submission tool means that one has to make two submissions, one for each of the Strategic Sites one objects to. The crossover between the two Strategic Sites, and the impacts on the community, are very similar. Therefore, there will be repetition between the two submissions.

I apologise to the Inspector for this duplication, and he/she having to read the same thing twice, but this is the nature of the beast that technology has created for this process, rather than the fault of any responders.

Policy TP1 - Transport Assessments etc

The Policy TP1 as written is good words and gestures. However, there are a number of issues with this, particularly in relation to the two Strategic Sites at Tudeley Village and East Capel. These include:

- . Little, or no evidence of KCC's involvement/agreement/approval of the Transport Assessments. For the two Strategic Sites the transport infrastructure issues are so large that KCC's views can not be left to a later stage in the process.
- . Independent Consultants (motion.co.uk) have been employed by Save Capel, and Friends of Tudeley (FoT) have employed another consultant (connect.co.uk) to review the Transport Assessments in the PSLP. Both consultancies are very experienced in this situation and both agree that:
 - . The modal shift within the plan is unachievable and therefore the traffic projections are very optimistic on the low side of the spectrum.
 - . The proposed mitigations are unrealistic in terms of physical and fiscal restrictions.
 - . The proposed Five Oak Green bypass, no discussions have been held with either of the two landowners about this proposal; both are adamant that they will not sell willingly.
 - . The impact of "closing" Hartlake Road, except to buses, has been totally underestimated.
 - . Linked to the point above, there appears to be little, or no, consultation with either TMBC or MBC about their own development plans on the border with TWBC, therefore, the projections are an "internal to TWBC" assessment rather than a more holistic approach involving their neighbouring Borough Councils.

As a result, the PSLP is therefore unsustainable and not sound and questions must be asked about the Duty to Co-operate with TMBC and MBC on the Transportation and Traffic Issues.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Quite frankly, the PSLP process needs to be suspended and TWBC need to start again from scratch. They should focus on:

- . Realistic assessment of housing needs rather than government-imposed targets and then with a 1,000-home buffer!

- . Spreading the Place Shaping across the Borough rather the present over-reliance on delivering the undeliverable of the two Strategic Sites at Tudeley and East Capel/Paddock Wood, on TMBC's doorstep.
- . A proper assessment of Infrastructure requirements, especially for transport, to reflect the needs of a revised Plan.
- . Much better liaison with neighbouring Councils, particularly TMBC and MBC, and the infrastructure requirements and impacts of their own Plans.

The current PSLP has been a rushed, botched and biased attempt, with 50% of the Borough's housing needs being forced onto 2% of the population who are represented by just 1 Councillor out of a total of 48.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Charlie Keeling

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: This representation has been input against Policies STR/SS1 & STR/SS3 – see Comment Numbers PSLP_1044 and PSLP_1055]

[TWBC: Representation attached as supplementary information as tables used by respondent]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Executive Summary

There is much detail laid out in this submission objecting to the development of the two so-called Strategic Sites at Tudeley Garden Village and East Capel, as part of Paddock Wood. To be helpful I have summarised the major points, against the listed Policies in the Plan:

- . **Policy STR2 – Place Shaping** - Forcing almost 50% of the Borough's Housing Needs on to 2% of the Borough's Population, who are represented by one, out of 48, Councillors. Little or no account taken of the severe Infrastructure impacts on the two neighbouring Councils Tonbridge & Malling (TMBC) and Maidstone (MDC).
- . **Policy STR3 – Brownfield** - an overly negative approach to the locations of the sites and their ability to be developed into sustainable housing developments, given their existing land use and infrastructure.
- . **Policy STR5 - Infrastructure and Connectivity** – I have focused on Schooling, Medical Facilities and Provision of (basic) Utilities. Transport Infrastructure comments are in STR6 – Transport and Parking
- . **Policy STR6 - Transport and Parking** – After setting the context I have set out the current road infrastructure status and issues, the proposed mitigations in the PSLP to deal with them, and finally, comments on the proposed mitigations.
- . **Policy STR9 - Green Belt** – A general statement regarding the Green Belt, with reference to the Site Allocations Plan in 2016, with comments from the Inspector who reviewed it
- . **Policy STR/SS1 - Strategy for Paddock Wood and East Capel** – I have put in two submissions one for STR/SS1 and one for STR/SS3
- . **Policy STR/SS3 - Strategy for Tudeley Village** - I have put in two submissions one for STR/SS1 and one for STR/SS3
- . **Policy TP1 - Transport Assessments etc** – for such important Strategic Sites the level of Transport Assessments is woefully inadequate. They are based on over-optimistic, i.e. too small a number, of trips, modal shifts are unrealistic, very little, if any, evidence of KCC's input,

agreement or approval, and flagrant disregard of the impact of TMBC and MBC's own plans and how that factors into the Transport Assessments.

More Detailed Information

Policy STR2 – Place Shaping

The original Issues & Options SA identified 6 growth strategies ("GS"), none of which mentioned Tudeley/Capel specifically as a site for a potential garden town. GS5 was described as "New freestanding garden settlement. There is no location identified with this option. A new settlement could be located anywhere within the borough."

The preferred option at this point was "the A21 Growth Corridor", where large scale investment in Infrastructure, dualling the A21, had already taken place by KCC.

Then, just prior to the Regulation 18 Consultations GS5 was adopted by TWBC with Strategic Sites at Paddock Wood/East Capel, and Tudeley Garden Village, as the nominated sites. This was a real "rabbit out of the hat"!

Please see the table below as indicators of why the Place Shaping was, and remains, wrong.

Parish/Ward

% of Population of TWBC

% of Housing Allocation

Number of Councillors

Capel PC

2,400 – 2%

4,200 – 45%

1

Paddock Wood TC

4,100 – 21%

2,400 – 21%

3 (+1 absent)

Total for Strategic Sites

6,500 – 23%

6,600 – 66%

4

Rest of TWBC

112,250 – 77%

2,747 – 34%

44

Total for TWBC

118,750

9,347

48

I feel this Table represents a very unfair allocation of housing needs to one area of the Borough, and one that borders on Tonbridge & Malling Borough Council (TMBC). This analysis results in:

- . 45% of the housing need being imposed on 2% of the Borough's population.
- . 66% of the housing need being imposed on 21% of the Borough's population.
- . These wards are represented at the "Council Chamber" by 9% of the TWBC Councillors
- . The major impact of these proposed developments will be felt in Paddock Wood (part of TWBC) and TMBC as these are the two centres which attract residents and traffic for:
 - . Commuting
 - . Shopping
 - . Schools
 - . Medical Facilities
- . Paddock Wood already has a significant level of new housing developments in progress. They are already causing issues with Traffic Congestion, Flooding, Sewage etc. And they don't meet affordability targets.
- . Similarly, Tudeley and East Capel suffer from Traffic Congestion, Flooding and Sewage.
- . TMBC are having a massive infrastructure problem and cost dumped on their doorstep. TWBC get the Council Tax, TMBC get the hassle and cost!

Finally, the vast majority of the development proposed in for the two strategic sites is:

- . Metropolitan Green Belt – with good classification of the quality of the agricultural land. To build over this land would be a travesty, reducing the country's ability to produce fruit and other arable produce, and creating settlements which will have an adverse impact on the landscape and environmental aspects of this area of Kent.
- . Flooding – a lot of the proposed development areas for the two Strategic Sites are either officially on the Flood Plain or have been subject to severe flooding episodes over the relatively recent past. I would have thought it likely that Home Insurance providers could adopt an aggressive, or expensive, attitude to providing cover in these circumstances. As a result, potential developers will also react negatively to this challenge.

In summary, this Local Plan is so skewed to development in a currently tranquil, beautiful, and highly food-productive, area, in the Green Belt, subject to flooding, with massive infrastructure issues, and on the doorstep of the neighbouring Borough Council who will end up bearing the brunt of the issues this will cause.

Policy STR3 - Brownfield

The reviews that TWBC have carried out on Brownfield sites appear to have adopted an overly negative approach to the locations of the sites and their ability to be developed into sustainable housing developments, given their existing land use and infrastructure.

I am aware that Save Capel carried out an extensive analysis of potential Brownfield sites, ahead of the Regulation 18 Consultations, which demonstrated that the volume of houses being proposed in Capel parish could be easily accommodated by Brownfield developments. Sadly, as with the majority of other Regulation 18 comments/challenges TWBC chose to ignore them.

Probably the main opportunity for a Brownfield development exists at the former Blantyre House Prison site. It is a large site, not in the AONB or Green Belt, with Infrastructure services already installed. It's rejection by TWBC on the basis of there only being minor roads, and therefore significant investment would be required for transport infrastructure, pale into insignificance compared to the transport infrastructure of the Tudeley and Paddock Wood/East Capel sites (see comments below on other Policies relating to this topic.

Whilst not a Brownfield development issue, one of particular relevance from an alternative site's perspective, is the Castle Hill Developments proposal to create 1,600+ homes which are in the favoured "A21 Corridor" option. Whilst the proposed development is in the AONB it has much better potential from sustainability and infrastructure perspectives. This was rejected "out of hand" with little or no analysis by TWBC.

Additionally, TWBC have recently approved a very large Commercial Development at Kingstanding, which was also in the same AONB area. This has great employment potential, but leads one to wonder why a Commercial Development is acceptable in the AONB but a respectful (to Sustainability) Housing Development isn't?

Policy STR5 - Infrastructure and Connectivity

Introduction

The proposed developments at Tudeley Village and East Capel (now, apparently part of Paddock Wood) will bring significant pressure and issues in other Infrastructure areas, especially:

- . Schooling
- . Medical Facilities
- . Provision of (basic) Utilities

Before considering each of these in turn, please review the following new population projections as context. These are based on an assumption of 2.26 people per household (a usual UK Metric) and using the metric of 0.285 children per household as part of that:

Projected Population Growth

Capel

Tudeley Village

Capel Parish

Adults

5,500

4,500

10,000

Children

2,200

1,800

4,000

Total

7,700

6,300

14,000

Projected Number of Extra Vehicles

3,500

2,500

6,000

This swamps the existing population of Capel Parish which was 2,400 at the previous census. So where will all these extra go for schooling, medical facilities and how and when will basic utilities be delivered to this staggering number of people.

Schooling

For the 1,800 children from Tudeley, the plans to meet the educational needs of 2,200 children from East Capel seem inadequate.

Proposals in the Plan, including Paddock Wood are:

- . New secondary school to serve Tudeley Village, potentially up to 1,000 pupils.
- . Expansion of Capel Primary School by 1FE.
- . Extension of Mascall's Academy by 1FE from 2021.
- . Two new Primary Schools in Paddock Wood, providing 4FE.

The Tudeley secondary school of perhaps 1,000 pupils and expansion of the small Capel primary school will be woefully inadequate, and particularly so if both development plans proceed. The new secondary school is not planned to be built until Phase 4, or after 1,900 houses have been built!

The remaining children totalling up to perhaps 2,000 will need to be driven or bussed daily to either Tonbridge or Tunbridge Wells (at least 50 or 60 buses twice or more each day). The planned provision for nurseries is similarly inadequate.

There is an incredibly strong, existing, demand for places in the good local schools in Tonbridge and Tunbridge Wells. It is naïve to think that some 2,000 pupils will somehow be absorbed in the existing schools in these two towns; in practice many pupils will have to be driven or bussed far away to Maidstone or Sevenoaks, all adding to traffic and congestion. In reality, another two or possibly three large schools will need to be built by KCC if both projects proceed. The key issue is when the schools will be built and ready to take pupils.

There will inevitably be children with special needs, the cost burden of which will fall on KCC and TWBC. In practice, TWBC will simply be imposing these education costs elsewhere, displacing the education of children in other Boroughs and creating congestion, particularly in Tonbridge and Tunbridge Wells.

The plans make no assessment of these education and congestion costs or whether KCC can or will agree to fund these new schools and so are unsound.

Medical Facilities

Regardless of whether one or other or both projects proceed, the number of new residents will necessitate new healthcare facilities, the plans envisage one new GP surgery which will be particularly busy and will require some 6 to 8 doctors plus support staff. If both proceed, there will be 14,000 new residents ultimately requiring these healthcare services.

There will also be considerable extra pressure and costs imposed on Pembury Hospital which is already strained. As stated in the plan, a significant number of the adults are likely to be over 65 and elderly, some with special needs and as they age, increasing demands will be made on local health services. The same will apply to the up to 4,000 children. All of this will impose significant additional and increasing social services costs on TWBC and medical provision costs on the local Health Trust.

Additionally, there is little information in the Plan about the timing of the creation of the new medical facility. Until that is planned, approved, and developed, whatever proportion of the 14,000 new residents are living there before then will need to access medical facilities elsewhere. This will probably fall on to Tonbridge where medical facilities are already stretched. **Another example of TWBC passing their problem on to someone else, TMBC in this case.**

The plans do not properly address these issues nor quantify these costs so are unsound, inadequate and will impose potentially large contingent costs on TWBC.

Basic Utilities

Electricity, Gas and Communications

As no new houses can be connected to the gas grid from 2025, the two developments will need to be powered entirely by electricity. This will require extensive investment in major HV transmission lines and stepdown transformers, particularly as new EV charging infrastructure will be required eventually for some 6,000 cars given that petrol and diesel cars will be phased out after 2030. All the cables will need to be buried. This is a major engineering task in addition to road building, road widening, school building, GP surgery, sports facilities etc. The Tudeley plan budgets £11.5m and the Paddock Wood/Capel plan budgets £10.8m solely for electricity connections and diversions with no discussion about grid infrastructure or who pays for these or how construction will be phased. In the experience of experts, we have consulted, the cost of the grid infrastructure and substations will be many £millions and will not be installed for several years. FTTH broadband will be relatively more straight forward to install.

The plan is unclear on this important aspect and so is unsound as a result.

Waste Disposal

The disposal of waste from up to 6,250 new homes will require TWBC and KCC to invest in more waste disposal facilities. This will create yet more heavy vehicle movements on already congested roads and add to the waste already trucked away from North Farm. These additional costs do not seem to be factored into the plans and will be a charge on the annual rates which would rise slowly over time to a total of some £10m once all 6,250 homes had been built.

In Summary

The PSLP documentation is woefully inadequate on any of these topics. The views and agreement of KCC are absent from these Plans. There has been no visible Master Planning for Utilities for the Tudeley Village proposal, and what is there for Schooling and Medical Facilities falls very short of the mark of a justified, fully costed and risk-managed Plan. **For all of these reasons the Plan is unsound.**

Policy STR6 - Transport and Parking

Context

Capel Parish's geography and existing transport infrastructure heavily-constrains planning sustainable development for the future. This is recognised in many parts of the PSLP ('the Plan') and supporting evidence. The Plan and its 'key diagram' (Appendix A of the Plan) make it very clear.

- . The only Trunk Road in Capel Parish is the A21 through the west of the parish serving London/M25 to Hastings, running east of Tunbridge Wells through the Borough.
- . There are two other "A" class roads relative to Capel Parish: a) A26 Tonbridge to near Maidstone, borders Capel Parish at Tonbridge to the west & follows the river Medway valley north east partly bordering Capel. b) A228 (northwest/southeast through Capel Parish) links M2 & M20 London-Dover motorways & the North Medway towns to West Malling, Paddock Wood, A21 & Tunbridge Wells. A major highway traversing Capel.
- . There is only one railway line in the Parish, but no stations. The two nearest stations are Tonbridge serving London/Hastings, London/Dover/Ramsgate, Tonbridge/Redhill. Paddock Wood is on the London/Dover line with an irregular country line between Paddock Wood/Maidstone West.
- . Bus services are 'patchy and infrequent in rural areas' (and almost non-existent after 7pm).

- . The local road network has severe constraints; Much of the infrastructure is rural and narrow and therefore unsuitable for HGVs. The impact of large and many foreign HGVs, on communities in the area, presents a major, existing and continuing challenge.
- . New quarrying will create 120 HGV movements per day through the access point in Capel onto A228 and impact all roads in the area.
- . Capel Parish's only "B" road B2017 links Paddock Wood to Tonbridge via Five Oak Green & Tudeley. There are also a number of Kent County Council designated "country lanes" used as "rat runs" with HGV traffic, many foreign.
- . There are a number of industrial estates, haulage and distribution yards that have evolved on old farmsteads throughout the area using country lanes.
- . All "main" roads are heavily trafficked, especially in the morning and evening peak periods.
- . The A228 in Capel is now recorded as "the busiest road" in the whole of Tunbridge Wells Borough by the TWBC traffic consultants.

This is the context against which all new development put forward in the Plan should be considered. Save Capel (SC) has reviewed the large number of references to the subject of transport in the Plan and supporting documents and have appointed expert advisors to assist us. 'Mitigation' of the significant impacts, particularly of increased traffic, is offered by Tunbridge Wells Borough Council (TWBC) in the context of developing the Strategic Sites (SS) at Tudeley Village and East Capel/Paddock Wood.

SC's review shows that the treatment of transport in the Plan is inconsistent and the result is unsustainable making the Plan itself unsound.

Impact of the Plan on travel at peak periods on the existing transport and roads infrastructure

Motion Consulting have also submitted their report in the evidence base for Regulation 19. This is based on the Traffic Modelling in the Plan and also Motion's own knowledge base of similar proposed developments.

In summary, the impacts are as follows:

Class of Road

Including

Roads Detail

RAG

"A" Roads

A21

ALL flows will increase due to traffic joining/leaving at the Tonbridge (Vauxhall) Roundabout to/from the East. This road was dualled between Tonbridge & Pembury in 2018 but suffers severe bottlenecks at the southern end, Kippings Cross where the dualled A21 ends. Longer delays expected with increases in housing from Paddock Wood.

Yellow

Circle

A26

Unacceptable increases in traffic from the South/East at Somerhill A26/B2017 Roundabout and on to Vauxhall A21 Roundabout to the West and into the Tonbridge Industrial Estate to the East. Long delays.

Red

Circle

A228 Colts Hill

Very high increased traffic flows at all junctions joining the A228. A228 at Colts Hill has been the subject of discussions about a bypass for 40+ years. **The Alders Road/Crittenden Road junction is a notorious accident black spot.**

Red

Circle

A228 Beltring

B2160 roundabout junction

Queuing traffic most of the day at the 3-spur roundabout. Main junction to reach Paddock Wood industrial areas.

4th spur is access to The Hop Farm – huge park & events centre 000s of vehicles at some events.

Yellow

Circle

“B” Road

B2017,

Badsell Road/ Five Oak Green Road/ Tudeley Road

B2017 (cont)

A typical old “B” road. The only direct route west from Paddock Wood, at the junction of the B2160, to Tonbridge & A21. Running through East Capel to A228 then Five Oak Green, Tudeley & A26/A21 Tonbridge. Overloaded, no HGV restrictions or traffic calming at all. The B2017 is already very busy at peak times and has 3 accident black spots.

Due to long delays at A228/A264 Pembury, this is used as main route to Tonbridge & A21 heading Northwest. Commuter traffic uses this road to egress many other villages east of Paddock Wood & as far south as Hastings via other rat-runs to avoid delays on A21 south of Kippings Cross.

The B2017 cannot take any more traffic.

Red

Circle

Minor Road

Crittenden Road/ Alders Road

A very narrow, winding country lane used as a rat-run linking Matfield area & further east & south to B2017 at Crockhurst Street then on to Tonbridge & A21. Crosses A228 at Colts Hill. Used by traffic avoiding the A21 long delays at Kippings Cross especially during commuter times and weekends.

Red

Circle

Minor Road

Hartlake Road (part of which is TWBC, and part of which is TMBC)

In parts a narrow, winding road, used as a through route & rat run to avoid delays at Tonbridge and/or A228 which are severe at peak times. Often cars parked by the bridge over the Medway for fishermen and ramblers.

Red

Circle

Sherenden Road

A very narrow & twisting lane running from Hartlake Road near the very popular Poacher & Partridge pub/restaurant, past Bank Farm Stables and through to the B2017 Five Oak Green Road. Blind junction on B2017. This will form part of the proposed Tudeley Garden Village TGV.

Yellow

Circle

Sychem Lane

A country road, very narrow and winding, linking Five Oak Green to the hamlets of Redwood Park, old Chapel & Alders Road. If the Five Oak Green bypass is built this road will be closed to through traffic. **Unacceptable to local residents.**

Red

Circle

Whetsted Road

Branches off to the North East at centre of Five Oak Green to link up with the A228, midway between B2017 & B2160 roundabouts. Narrow and winding residential road, no pavements, a narrow bridge on a blind bend. Rat-run A228/ Tonbridge to avoid Colts Hill & Pembury delays and B2017/A228 roundabout delays. The reopening quarry traffic (est.120 vehicle movements per day) will egress the A228/Whetsted Road junction. **Already an accident black spot.**

Red

Circle

[TWBC: Respondent had used red and yellow circles in above table - TWBC has replaced these with words for formatting purposes]

Mitigations as per the PSLP

The PSLP contains a number of mitigations based on Traffic Modelling carried out by two Consultants, SCANTEC and SWECO. According to our own independent Traffic Consultants 'Motion' the scenarios, and bases of the modelling would be best described "very optimistic" in terms of both numbers of journeys and mode of transport. The detail is on the Motion Report which attached to this report.

As a result, Save Capel believes that there has been a significant under-assessment of the traffic implications of the PSLP as currently drafted.

Class of Road

Including

PSLP Proposals

“A” Roads

A21

Junction re-alignment at Kippings Cross. No other mitigations planned to relate to the PSLP. There are some changes proposed outside of the PSLP regarding the new Business Park bordering North Farm Industrial Estate. This development was approved by TWBC and KCC (March 2021) despite it being in the AONB.

A26

Proposals to improve traffic flows at the junction of the A26/B2017 just below the Somerhill Schools entrance, which is currently a major disruption during peak hours. A widening of the B2017 between this roundabout & new roundabout at TGV Hartlake Road. Two lanes each way + cycleways against the existing single carriageway each way.

A228 – Colts Hill northern section

Proposal to create an “offline by-pass” to alleviate the current accident black spot at junction of Alders Road/Crittenden Road with the A228. Details regarding the A228 are not clear enough due to issues with KCC funding and impact of Tudeley Garden Village. If TGV is built then Five Oak Green bypass will be included. The southern section of Colts Hill is excluded from PSLP.

A228 – Colts Hill

Roundabout to access proposed Five Oak Green bypass which is dependent upon TGV – see later..

A228 General

There are various small schemes along A228 to support the East Capel/Paddock Wood Garden Village. Crossing points for pedestrians and cyclists are not clearly defined and are of a safety concern.

A228/B2017 Junction

3 new estates under construction in Paddock Wood (approx. 1,650 homes) outside of the PSLP, have included £870k for junction improvements to include 3 traffic lanes on the whole roundabout.

“B” Road

B2017, including Five Oak Green Road/Tudeley Road/Badsell Road

There is a proposal to build a “Five Oak Green By-Pass” to relieve the volume of traffic on the B2017 through Five Oak Green. This would be a new road from the proposed northern section of A228 Colts Hill bypass (close to Alders Road) to a junction with B2017 by the existing Capel Primary school and proposed secondary schools.

B2017/A26

There is the previously mentioned road widening proposal at the junction of the B2017 and the A26 near to the Somerhill Schools

B2017/B2160

Paddock Wood

Improved B2017 Badsell Road/B2160 Maidstone Road signalised junction near to Paddock Wood – (already started).

Minor Roads

Hartlake Road (part of which is in TWBC, and part of which is in TMBC)

Create a roundabout at the Hartlake Road/B2017 junction for TGV. Furthermore, TWBC proposes Hartlake Road be closed to through traffic where the road crosses the River Medway. Currently the road continues on to Golden Green and then to Tonbridge and East Peckham. As a result of the proposed closure of Hartlake Road the current two-way traffic flow would terminate at the bridge over the River Medway.

Sherenden Road

No mitigations known. Will be part of Tudeley Garden Village & no plans announced yet.

Alders Road

The proposed Five Oak Green Bypass is to alleviate the traffic flows on Alders Road which are currently high and will become more significant even before the Local Plan proposals go ahead due to developments currently underway in Matfield, Horsmonden & Paddock Wood. However, the PSLP notes that the Five Oak Green bypass will not proceed without TGV and so there could be no relief for Alders Road/Crittenden Lane.

There are various proposals for the design of A228/Alders Road junction, but none has yet been agreed as KCC may sponsor the whole Colts Hill bypass if they can secure funding after 2025, although TWBC & then KCC have been saying this for the last 40yrs. Residents have no confidence this will be within the timescales suggested.

Sychem Lane

Will be closed to vehicular access if TGV and Five Oak Green bypass are built, but will allow pedestrians, cyclists, and horse riders to cross the new bypass, although no mention of how.

Whetsted Road, Five Oak Green

A228 Maidstone Road/old Whetsted junction improvements.

A228/B2160 Hop Farm roundabout

Improved A228 Whetsted Road/A228 Bransbridges Road/B2160 Maidstone Road roundabout

Comments on Mitigations

Class of Road

Including

Likely Impact & Comments

"A" Roads

A21

Kippings Cross improvement scheme

The main factor that will determine if this goes ahead is the proposed dualling of the Kippings Cross to Lamberhurst section of the A21 which has already been designed by Highways England and mentioned in parliament as a potential for the "next" round of major highways works by HE.

However, those proposals will not be decided until 2023/4.

This is the main arterial route south through part of Capel Parish and dualling of lower section of A21 to Lamberhurst & A262 may reduce some rat-running through B2017. However, roundabout junction improvements alone are unlikely to relieve rat-running in Capel as many are to avoid A21 queues north/south. New estates under construction in Paddock Wood and Matfield are likely to benefit.

A26/B2017

Roundabout

Significant remodelling of the whole roundabout and junction would be required with potential land grab. The disruption to traffic in the whole Tonbridge area and impact on Five Oak Green and Paddock Wood would be immense and this is not accounted for in the PSLP. There are no alternative routes in this area as they are already being overloaded. One alternate could have been Hartlake Road, but the PSLP is closing this to through traffic.

The impact on the very successful Schools at Somerhill will be significant, but as the Schools are effectively tenants of the Hadlow Estates Developer it is unlikely that they will raise objections.

A228

Colts Hill Bypass – after 40 years with no approved proposals what is KCC's views on the proposed mini-Bypass? It makes little sense to dig half a hole from both a cost and disruption basis!

Why build half a road and introduce more very difficult and dangerous junctions halfway up a hill and keep the narrow bends to the north of Alders Road used by hundreds of HGVs daily? It is just moving the accidents elsewhere; it does not solve the problems of Colts Hill. **Very Unsound.**

"B" Road

B2017, including Five Oak Green Road /Tudeley Road/Badsell Road

The proposed "Five Oak Green Bypass" has not been subject to any discussions between TWBC and the two current landowners who only found out about this proposal via social media. Neither landowner is interested in selling and therefore this proposal would need to go through a CPO process.

The bypass will cross through ancient woodland, close off Sychem Lane to traffic & isolate old Capel, Alders & Redwood Park from their village and amenities in Five Oak Green.

The Five Oak Green bypass junction with B2017 is outside of 2 schools (the existing Capel Primary School, and the proposed Tudeley Secondary School) with a potential of more than 2,000 attendees (staff & pupils).

The planners are supposed to be safety focused and I fail to see how a major new road with a junction outside 2 schools is considered a safe approach?

The new bypass will be loaded with HGVs egressing the M25/A21/Paddock Wood as it will be much quicker and use less fuel than travelling through the A21/A228 Colts Hill & Pembury to Paddock Wood & East Peckham industrial areas.

Pollution outside the schools is a major concern.

The consultant's Plans & Maps in the PSLP have incorrect speed limits shown on them for Five Oak Green and this demonstrates that this was a rushed desk top study and none of the planners actually visited Capel. One section shows Capel as being just Alders Road and it shows a picture of a "Capel" sign which is actually the hamlet of old Capel along Alders Road and **NOT** the parish sign at all.

This plan has not been thought through properly and the impact on the whole area not considered in its entirety. The attention to detail is abysmal and the whole project is **Unsafe & Unsound**.

B2017 Hartlake Road Tudeley

The proposal to create a new roundabout where the B2017 meets Hartlake Road in Tudeley also suffers from an inadequacy of space to create a roundabout.

The improvements here will depend on TGV being approved, but then we will have all this traffic hitting this roundabout whilst thousands of residents and children are commuting to work and schools.

Unsafe and Unsound.

B2017 from A26 to Hartlake Road

The previously mentioned road widening proposal from the junction of the B2017 and the A26 near to the schools at Somerhill and up to TGV will entice drivers to speed past the 3 schools' entrance at Somerhill and being on a hill drivers will take longer to stop potentially creating mayhem on the road.

A228/B2017 Roundabout

Improvements

The detail in a previously approved planning application regarding the proposed increased capacity at A228 Maidstone Road/B2017 Badsell Road (Colts Hill/Dampiers Corner) roundabout suggest 3 lanes will be used around the roundabout.

In practical terms, given we have hundreds of large and often foreign HGVs along this route daily, some pulling very large trailers, it is unlikely to improve the flow through the roundabout.

It should also be noted that the flow is from all 4 spurs and not just 1 or 2 interrupted occasionally by the others. New estates in the PSLP will create huge queues at all spurs most of the day here.

It is also of concern that the Grade II 16C Listed Mill House standing right by the roundabout will suffer serious pollution issues and the additional traffic will affect all properties next to the roundabout regarding health issues and noise pollution.

A228/B2160 Beltring

Little detail is provided regarding the proposed improvements to the B2017 Badsell Road/B2160 Maidstone Road signalised junction near to Paddock Wood but being "signalised" will create huge queues on all arms of this very busy junction.

Minor Roads

Hartlake Road (part of which is in TWBC, and part of which is in TMBC)

The proposal is to create a roundabout (as above) where Hartlake Road meets the B2017, however TWBC also propose that Hartlake Road be closed to through traffic, where the road crosses the River Medway. Currently the road continues on to Golden Green and then to Tonbridge or East Peckham. As a result of the proposed closure of Hartlake Road the current two-way traffic flow would terminate at the newly rebuilt bridge over the River Medway.

This is a rather badly thought through scheme. Planners **MUST** consider that we have a main railway line and major river running through the valley and crossings for either are very limited. By closing Hartlake road the traffic is forced to go through Tonbridge where another 6,400 homes are planned in the same period, as is a major development in Maidstone Borough Council, alongside 2,800 in Tudeley and 8,500 in Paddock Wood. **The roads are already clogged in Tonbridge due to the restricted crossing points and the whole idea of closing any crossing point is unsound.**

Sherenden Road

No mitigations proposed or plans revealed.

The Masterplanning is still unannounced.

Alders Road

The Five Oak Green Bypass is proposed to alleviate the traffic flows on this road (as well as B2017) which are currently high and will become more significant if the Local Plan proposals go ahead without inclusion of major road improvements in the area. See previous comments about the A228 Colts Hill Bypass

Sychem Lane

Closing Sychem Lane will isolate part of Capel Parish and the idea of horse riders, cyclists and pedestrians having to cross a fast bypass without a bridge is **Unsafe and Unsound.**

Whetsted Road

Improved A228 Maidstone Road/Whetsted Road priority junction. Currently, the quarrying operations here are suspended. When they re-open, as well as the increased traffic caused by the East Capel proposals, this junction will need to service 120 Quarry HGV movements per day. The junction is on a very fast bend and is already an accident black spot.

Conclusions

- 1 The impact of the sheer magnitude of additional traffic movements, as a result of building up to 5,000 new houses in Capel Parish, between Tudeley Village and East Capel, has been modelled

using very optimistic scenarios and assumptions with regard to volumes of traffic and modes of transport.

- 2 The assumptions take no account of the Local Plans being developed by neighbouring Boroughs where at least 12,000 new homes will be built. The impact of these new estates will affect the whole area.
- 3 None of the existing roads have the capacity or physical ability to absorb the increased traffic movements.
- 4 The mitigations proposed are either inadequate, unlikely to be deliverable or otherwise inappropriate, therefore they are **Unsafe and Unsound**.
- 5 The construction of any transport mitigations will in themselves be considerably disruptive, and from a timing perspective likely to be out of synchronisation with the house building programme.
- 6 Apart from minimal information about the views of KCC there are no agreed, even in outline, proposals that have been made available before the Regulation 19 Consultations.
- 7 For Tudeley Garden Village there is no evidence base that key Transport, Flooding, Other Infrastructure, Landscape or Biodiversity issues have been considered, or proposals made in the Masterplanning of TGV.

In summary, there are too many gaps in the information provided to take the PSLP to the next stage of the process. Unless these gaps can be adequately filled, through the Regulation 19 process, **we would suggest that PSLP is not sustainable and unsound.**

How will KCC/TWBC handle all of these highways works whilst the building of 8,500 homes on several sites is ongoing and the current residents are trying to go about their normal lives, without disruption.

There is a HIGH risk of ill health due to stress, air and noise pollution and the impact on the everyday lives of the existing population.

The PSLP is flawed beyond acceptability and does not take into account the health, safety and disturbance to existing residents and businesses.

Investment will not be attracted for many years due to the highways delays that are already proving a major challenge for all road users.

The direct impact upon the area for the next 20 years, whilst the new roads and 6,000+ homes are being built, is unacceptable.

The PSLP is therefore unsustainable and not sound.

Policy STR9 - Green Belt

Similar to neighbouring Borough Councils in Tonbridge & Malling and Sevenoaks, TWBC has a high proportion of the and within its boundaries which is either AONB or Green Belt. Given the housing targets "imposed" by Central Government, developing the required levels of housing, alongside the constraints of the AONB and Green Belt, provides a significant challenge to TWBC.

That said, if we look back at the Site Allocations proposals by TWBC of 2016 there are some interesting views expressed by the Inspector (Rynd Smith) who reviewed them and reported back to TWBC on 9th June 2016:

- . **Bullet point 22** – ".....On this basis, there is not a shortfall of allocated and deliverable land in Royal Tunbridge Wells and Southborough and the rural fringe. It follows I do not accept a need to allocate any land currently in the Green Belt."
- . **Bullet point 24** – "It follows that I agree the approach the SALP has taken to the Metropolitan Green Belt and I have not recommended that any land currently within the Green Belt should be allocated."
- . **Bullet point 79** – "**The SALP has a number of deficiencies in relation to soundness, and, or legal compliance for the reasons set out above which means that I recommend non-adoption of it as submitted, These deficiencies have been explored in the main issues set out above.**"

A very different picture emerged at the Regulation 18 Consultation, perpetuated now in the PSLP, when the majority of the Metropolitan Green Belt in the "rural fringe" was put forward as Strategic Sites for Tudeley Village and East Capel/Paddock Wood. Additionally, comments expressed by the Inspector regarding drainage and flooding concerns at Bullet points 43, 60, 65 and 67.

As a result, the PSLP is therefore unsustainable and not sound.

Policy STR/SS1 - Strategy for Paddock Wood and East Capel

The format of the online submission tool means that one has to make two submissions, one for each of the Strategic Sites one objects to. The crossover between the two Strategic Sites, and the impacts on the community, are very similar. Therefore, there will be repetition between the two submissions.

I apologise to the Inspector for this duplication, and he/she having to read the same thing twice, but this is the nature of the beast that technology has created for this process, rather than the fault of any responders.

Policy STR/SS3 - Strategy for Tudeley Village

The format of the online submission tool means that one has to make two submissions, one for each of the Strategic Sites one objects to. The crossover between the two Strategic Sites, and the impacts on the community, are very similar. Therefore, there will be repetition between the two submissions.

I apologise to the Inspector for this duplication, and he/she having to read the same thing twice, but this is the nature of the beast that technology has created for this process, rather than the fault of any responders.

Policy TP1 - Transport Assessments etc

The Policy TP1 as written is good words and gestures. However, there are a number of issues with this, particularly in relation to the two Strategic Sites at Tudeley Village and East Capel. These include:

- . Little, or no evidence of KCC's involvement/agreement/approval of the Transport Assessments. For the two Strategic Sites the transport infrastructure issues are so large that KCC's views can not be left to a later stage in the process.
- . Independent Consultants (motion.co.uk) have been employed by Save Capel, and Friends of Tudeley (FoT) have employed another consultant (connect.co.uk) to review the Transport Assessments in the PSLP. Both consultancies are very experienced in this situation and both agree that:
 - . The modal shift within the plan is unachievable and therefore the traffic projections are very optimistic on the low side of the spectrum.
 - . The proposed mitigations are unrealistic in terms of physical and fiscal restrictions.
 - . The proposed Five Oak Green bypass, no discussions have been held with either of the two landowners about this proposal; both are adamant that they will not sell willingly.
 - . The impact of "closing" Hartlake Road, except to buses, has been totally underestimated.
 - . Linked to the point above, there appears to be little, or no, consultation with either TMBC or MBC about their own development plans on the border with TWBC, therefore, the projections are an "internal to TWBC" assessment rather than a more holistic approach involving their neighbouring Borough Councils.

As a result, the PSLP is therefore unsustainable and not sound and questions must be asked about the Duty to Co-operate with TMBC and MBC on the Transportation and Traffic Issues.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Quite frankly, the PSLP process needs to be suspended and TWBC need to start again from scratch. They should focus on:

- . Realistic assessment of housing needs rather than government-imposed targets and then with a 1,000-home buffer!
- . Spreading the Place Shaping across the Borough rather the present over-reliance on delivering the undeliverable of the two Strategic Sites at Tudeley and East Capel/Paddock Wood, on TMBC's doorstep.
- . A proper assessment of Infrastructure requirements, especially for transport, to reflect the needs of a revised Plan.
- . Much better liaison with neighbouring Councils, particularly TMBC and MBC, and the infrastructure requirements and impacts of their own Plans.

The current PSLP has been a rushed, botched and biased attempt, with 50% of the Borough's housing needs being forced onto 2% of the population who are represented by just 1 Councillor out of a total of 48.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I believe it is not justified for the reasons set out below.

Bullet points only.

- 1 The proposals require the destruction of many acres of green belt.
- 2 Under the Government proposals for "levelling up" to bring this size of development into Kent which is already one of the most densely populated rural areas in the country is contrary to that policy.
- 3 Unemployment in Tunbridge Wells and Tonbridge and Malling is currently around 4.5%, some of the lowest figures in the country. Any argument that the promotion of jobs by this scheme is beneficial is without foundation.
- 4 The disruption of the local communities by the massive and invasive building and infrastructure works for years involved are disastrous and cannot be contained. This is on top of the significant increase in proposed HGV traffic resulting from further gravel extraction in the area.
- 5 The geography of the area means that those who need transport into London or other centres (which will be many of them) will travel to Tonbridge which is already overcrowded and the topography means that from Tudeley to Tonbridge by foot or by bicycle is unrealistic unless you are young and fit. There will inevitable be a huge increase in cars - several thousand - which is entirely against government policy on reducing pollution. Anyone who believes that electric cars is the answer has not understood the science.
- 6 When I worked for the Citizens Advice Bureau for three years it became clear that the real need was for social housing in or close to towns where people could walk to work or to transport hubs. Unless they were disabled and had grant maintained cars, they had no funds for running private cars. Brownfield sites in and around towns or areas close to the towns/hubs are the answer not irrelevant "new towns" away from established centres/hubs.
- 7 Apparently the proposals include a suggestion that traffic problems could be reduced by closing Hartlake Road between Golden Green and Tudeley. I fully support banning totally HGVs from this road but it does provide an invaluable link for Golden Green to access Pembury Hospital, the A21 and Tunbridge Wells without passing through Tonbridge on the overcrowded A26 or going through Paddock Wood. What would help is to make Victoria Road one-way leaving Golden Green to stop the rat run of cars cutting from Hadlow through the village and onto Hartlake Road.

There are flooding issues upon which I am not qualified to comment but do not seem to have been adequately addressed.

In summary, I believe this whole development to be misconceived - in the wrong area and for the wrong reasons. To destroy a community needs a much more convincing argument than has been put forward than these developers.

Jonathan Kellett

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan:	
Is sound	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not positively prepared because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access is considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that

reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk) | Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook

Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;* Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.
- 2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.
- 3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.
- 4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;* The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove the proposed Garden Centre Developement from the Local Plan for the reasons detailed in question 5

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation N J Kemp

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

5.91, 5.92, 5.93, 5.94

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access.

The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident. There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend. Therefore: 1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location.

What to date have been the compensatory improvements to the remaining Green Belt? The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3. River Grom flooding Report 2017 (Currently Correct / Relevant unless structural changes have been made) – Ref pages 7-9 Extracts: (page 7 – 2.3 para 4) To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom. (Page 9 – 2.4.1 para 3) There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded. The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development. It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the

retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements: 1. Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north; Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible. Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons: 1 a) The proposed access would be likely to create unacceptable additional hazard to traffic. 2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic 3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality. 4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park. No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access. Access: The suggested 'North' secondary and emergency access point will: Destroy a Bio Diverse habitat, impacting the natural rural dynamic. By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990. There is a high probability for this access to become a local shortcut Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational. There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes. Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location. In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.

2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town; If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused. This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

3. Adequate servicing and parking to serve the expanded commercial use on the site;

4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;

Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:

1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.

- 2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.
- 3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.
- 4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.
5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation
6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;
- The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important. The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.
7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment; The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

There is a high probability for this access to become a local shortcut Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational. There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes. Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location. In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.

2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town; If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused. This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane. 3. Adequate servicing and parking to serve the expanded commercial use on the site; 4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;

Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic. 2) Cyclists coming out of the new development will generally turn right into

Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;

The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important. The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.

7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment; The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Transport Strategy

References are made to an opportunity for a new railway station to be delivered for the Tudeley Village development. It is noted that the station is not anticipated for delivery during the plan period and has not been included in the Local Plan considerations but has been allowed for in the site Masterplan. KCC The Borough Council should be mindful of potential opposition to this proposal, as it would further increase the journey times for passengers travelling between Ashford and Tonbridge, as well as for those travelling between any of the smaller stations on that section of route and London. Therefore, if this proposal is to be progressed, KCC would recommend further consultation with stakeholders and the public.

The Borough Council should also be mindful that given the need for developer majority funding contribution for a new station, there would need to be significant contributions from the 2,800 dwelling development of Tudeley Village.

On balance, a dedicated, high quality, carbon neutral bus service between Tudeley Village and Tonbridge and/or Paddock Wood stations could more deliverable, unless a business case can be demonstrated showing there are net benefits to a rail station scheme and should potentially be explored. The County Council would draw the Borough Council's attention to the Kent Rail Strategy, as published in March 2021. The Kent Rail Strategy provides details of rail proposals for Tunbridge Wells – including power upgrades to enable the operation of consecutive 12-car trains in peak periods, and mainline service enhancements (depending on provision of paths to London termini, availability of rolling-stock and signalling upgrades on the Orpington – Sevenoaks corridor).

STRATEGIC FLOOD RISK ASSESSMENT

Sustainable Urban Drainage Systems

The County Council, as Lead Local Flood Authority, recommends that the Chapter 9.4 - Sources of SuDS Guidance of the updated Strategic Flood Risk Assessment should reference Kent's Drainage and Planning Policy, adopted in November 2019, as it provides guidance on how drainage strategies are assessed. With reference to paragraph 9.4.3 Kent Design Guide – Making it Happen, KCC recommends that the related footnote directs to the relevant design chapter C2.

INFRASTRUCTURE DELIVERY PLAN (IDP)

Provision of County Council Community Infrastructure and Services

Paragraph 2.40 - Funding from Development

The County Council supports and would strongly encourage the Borough Council to continue to support the delivery of infrastructure via section 106 development contributions, noting its relative sustainability to fund infrastructure.

Theme 3: Health

The County Council urges the need for the IDP to make reference to support accommodation facilities for both extra care and specialist care. The County Council current requests for development contributions to be secured through section 106 agreements for this type of health care provision. Therefore, KCC would urge support through the Local Plan and accompanying IDP.

There remains significant demand for residential and nursing care homes that can meet the needs of people with challenging and complex dementia. It should be noted that the County Council is currently seeking new residential care home providers to join the KCC Care Home Contract and to operate a mixed economy of both local authority funded and private funded residents.

Waste Management

The County Council, as Waste Disposal Authority, welcomes the update to the IDP following KCC's feedback to the earlier Regulation 18 consultations. The IDP now better reflects the position in regard to waste management.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council recognises that the Tunbridge Wells Borough Local Plan looks to deliver a sustainable future, making effective use of brownfield land across the Borough and ensuring that the necessary infrastructure is available to support development.

The County Council, as a key infrastructure provider, welcomes the incorporation of strategic policies such as Policy STR5 "Infrastructure and Connectivity" which set out the role of infrastructure in the delivery of sustainable new communities. This will help ensure that planned residential and commercial growth will be of high quality and delivered in a way that will help to create the places where people want to live. The detailed consideration of the infrastructure requirements to support development in each of the proposed site allocations is acknowledged and welcomed. Taking an "Infrastructure First" approach to growth is advocated by the County Council and is also embedded in the Kent and Medway Infrastructure Proposition; a proposed deal with Government for new infrastructure investment that will enable accelerated housing delivery, focussed on building the right homes in the right places and providing the public services, transport infrastructure, jobs and homes that residents will need, now and in the future. It is crucial for an infrastructure first approach to be applied to planned growth in the Borough - commitment to close collaboration between key partners will be essential to ensure that good growth is planned, funded and delivered in a timely manner.

Within this response, the County Council provides detailed commentary on the proposed policies and supporting paragraphs. However, the County Council, in its role as Local Highway Authority, has not taken this approach on highways and transportation matters. This is because it is considered that further modelling is needed to inform the assessment of specific strategic and site policies.

During the pandemic, a significant proportion of the population shifted to radically different ways of working, which has revealed the potential for long term changes in where people live and work and how they use infrastructure. It is too early to draw conclusions about long-term behavioural trends that may emerge as a result of the pandemic. However, it will be important to consider scenarios of how people's behavioural trends (that could impact infrastructure use) might change. As Local Highway Authority, the County Council would want to agree the assumptions for such scenario testing.

The County Council, as Local Highway Authority, is concerned that whilst there are a number of welcomed policy proposals with regard to promoting sustainable access and development, the consultation requires further highway evidence to justify the Local Plan's growth strategy.

The County Council, as Local Highway Authority, has worked closely with the Borough Council over the past years on the emerging growth strategy. Nevertheless, its current position is that it requires further supporting evidence, to an agreed methodology, that accurately reflects the proposed growth before KCC can make a fully informed set of comments on the proposals presented in the Local Plan consultation document. The County Council has reviewed the Local Plan and supporting documents, including the Transport Assessment, and identifies the following key issues that require further work:

1 Reference case validity (and therefore future scenario validity) 2 The trip rates used 3 Ambiguity regarding forecast modal shift 4 Deliverability and viability of the mitigation package

Therefore, a full assessment in respect of the impact of the growth strategy on highways and transportation matters cannot currently be carried out and commentary on the Local Plan policies and proposed allocations can be provided once the outstanding information is received.

KCC will look to continue working with the Borough Council over the coming months on the provision of accurate modelling and commensurate and viable mitigation and will aim to update the position as work commences on the Statement of Common Ground.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Section 2: Setting the Scene

General Commentary

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic

Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Waste Management

Paragraph 2.22

The County Council welcomes the inclusion of waste in the list of types of infrastructure that will need to be delivered alongside growth. KCC recommends that the sentence that states 'local waste collection, recycling and disposal, waste' is altered to facilities to support local waste collection, bulking, recycling and disposal.

Public Rights of Way

Paragraph 2.23 / 2.39

The County Council supports the reference to walking and cycling and the promotion of Active Travel within this chapter. However, KCC requests specific mention of the Public Rights of Way (PRoW) network and the opportunities for its enhancement through new development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

Tunbridge Wells has historical, attractive and well used routes that draw visitors to the area and as such these should be maintained and enhanced to a high-quality standard. The County Council requests specific mention of the 594km of PRoW within the Borough and the role of the County Council and its Rights of Way Improvement Plan within this section.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Notwithstanding its position in respect of highways and transportation set out above, in principle, the County Council is generally supportive of strategic scale development where it is able to provide necessary infrastructure alongside housing growth to support both new and existing communities. KCC will welcome a continued role in the master-planning processes of the strategic sites to ensure that the necessary infrastructure is planned for, is of high quality design, funded and delivered in a timely manner, ahead of housing growth where necessary.

The County Council advises that full consideration is given to assess the cumulative impacts of the dispersed growth to be delivered outside of the strategic developments across the Borough and the cumulative impact of these proposed development sites in respect of ensuring that necessary infrastructure is available to support new and existing communities.

There is evidence that the proximity of schools in Tunbridge Wells to the East Sussex border in particular can have an impact on county infrastructure – with East Sussex residents crossing the border to access Kent schools, libraries, youth services, social care and waste facilities. The County Council appreciates that this is likely to occur, particularly because East Sussex schools are not in such close proximity to those of Kent. KCC would look to Tunbridge Wells Borough Council to support the County Council in

its engagement with East Sussex County Council to mitigate and monitor the impacts that this has on the provision of county services.

The County Council supports the continued commitment to section 106 agreements to secure development contributions in the Borough. The County Council considers that there is an opportunity through this Local Plan to support the collection of developer contributions for sites of less than 10 dwellings on sites of 0.5 ha or more. This would enable developer contributions to be sought towards local infrastructure to support all development in the Borough.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council welcomes reference to the Kent Design Guide in this section.

Public Health

In respect of its responsibilities concerning public health, the County Council is supportive of Policy STR 2, Policy STR 6 and Policy STR 7 which include considerations around active travel, air quality, climate change and a number of references to improving promoting healthy lifestyles. The County Council suggests that aligning the priorities and objectives from the Borough Council's Five Year Plan (2017-2022) could help strengthen the ability to address health inequalities in the Borough.

To ensure the robustness of any policies supporting improvements in population health, a greater use of the evidence base is recommended using data from the Kent Joint Strategic Needs Assessment (JSNA) and/or other sources of public health data from the Public Health Outcomes Framework (PHOF), including ward level data, in addition to referencing how these policies support the Kent Health and Wellbeing Strategy. Providing evidence of the health needs of the population is in line with the National Planning Policy Framework and will further justify planning policies regarding health and wellbeing.

Biodiversity

The County Council welcomes consideration that the biodiversity value of an area will be 'conserved and enhanced'. This fits in with national biodiversity policy (Natural Environment and Rural Communities Act 2006 and section 15 of the National Planning Policy Framework).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Provision and Delivery of County Council Community Services and Facilities

Paragraph 4.85

On large sites with multiple developers (perhaps where land may be in more than one ownership), the County Council would support the use of land equalisation agreements to avoid dispute and delays on the development of land for education or other community infrastructure requirements which could affect the delivery of sustainable residential growth. With the use of equalisation agreements, community infrastructure can be apportioned fairly and agreed early on in the process.

The County Council as key infrastructure provider would welcome continued engagement from the early stages of master-planning to ensure that infrastructure requirements are integrated within the design of new developments from the outset.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Policy STR 5 Infrastructure and Connectivity

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Provision and Delivery of County Council Community Services and Facilities

There is need to ensure that all growth is delivered with an appropriate range of community facilities, including Early Years provision, Youth Services, Adult Social Care, Community Facilities and Social Services. As set out within the Kent County Council Education Commissioning Plan, assessing the childcare market and ensuring sufficiency and long-term viability of provision for early years is complex and presents a significant challenge for local authorities. The County Council (commissioned through The Education People) is required to work with providers in making available a sufficient range of flexible provision, in the right geographical areas, at the right times and offering the right sessions to fit with both standard and atypical working patterns. The County Council would welcome engagement with the Borough Council to ensure adequate early years provision is provided to support growth.

The County Council recommends that the Local Plan includes policy wording that requires community buildings to be designed and built to be inclusive to all users – this should include:

- Design that is dementia friendly with dementia friendly decoration and signage
- A catering area which is compliant with the Government's Access to and use of buildings: Approved Document M, including

adjustable height work surfaces, wash areas and cupboards• Toilets and changing facilities for the severely disabled in accordance with the Changing Places specification:
http://www.changing-places.org/the_campaign/what_are_changing_places_toilets_.aspx

KCC recommends that the Local Plan supports the delivery of specialist care accommodation through developer contributions secured through section 106 agreements. The Local Plan should ensure the delivery of specialised homes that support the diverse and evolving range of needs of the local community, including those with learning and physical disabilities and other vulnerable groups. KCC would welcome continued engagement with the Borough Council in ensuring that the necessary homes to support a sustainable community are delivered.

Waste Management

The County Council welcomes the additional detail provided within this Regulation 19 consultation in respect of waste management, following the comments provided within the KCC Regulation 18 consultation response. Pressures on the County Council waste disposal service continue to grow and KCC would recommend a number of amendments within the Local Plan to ensure that waste management needs are fully captured and considered.

The County Council, as Waste Disposal Authority, and the Borough Council, as Waste Collection Authority, have received feedback regarding delays to collection rounds which are caused by limited capacity - there is currently no capacity for contingency or resilience to change in the Borough. KCC is committed to close working with the Borough Council to ensure a sustainable future in respect of waste management. As set out in the Local Plan Regulation 19 consultation, KCC will require a new facility to be delivered in order to support the planned growth. The timescale for the delivery of the proposed new facility was set at five to ten years within the Infrastructure Delivery Plan, however, issues are beginning to arise with capacity now and so KCC has revised this timescale down to five years. KCC therefore requests that the Local Plan and evidence base are updated accordingly and will welcome further engagement to take this forward.

Libraries

The County Council is keen to continue the partnership working within the Borough including bringing more services under one roof at new or improved premises, for example at the Southborough Civic Centre, The Amelia and the planned new community centre at Cranbrook. Working in partnership is a way for library services to remain at the heart of communities and provide fit for purpose buildings to accommodate existing and new residents in the future.

Public Rights of Way

The Public Rights of Way network (PRoW) has an integral role in the delivery of sustainable growth. Growth in the Borough should seek to maintain and enhance the PRoW network to provide opportunities for active travel and outdoor recreation, improve connectivity to local services and boost the health and wellbeing of new and existing communities. To ensure that this consideration is factored into planning for growth at early stages of developments, the County Council would recommend that PRoW is included in the relevant place-shaping and development management policies throughout the Local Plan (including the following policies: Policy STR 2 - Place Shaping and Design, Policy STR 4 - Ensuring Comprehensive Development and STR 6 - Transport and Parking).

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Business and Communities

The County Council supports the embedding of climate change, the environment and net zero throughout the Local Plan, and the sustainability policies within it. The County Council welcomes the requirement for developments to support Net Zero targets and for this to be stated as a strategic objective. Reference to the Kent and Medway Energy and Low Emissions Strategy, as well as the Borough Council's own targets, is also welcomed.

Rural Economy

The County Council recommends that there is reference within the Local Plan to address how climate change will impact farming and the need to adapt to new crops and farm practices. This could have an impact on the land characteristics of the area and the introduction of more reliant crops. Consideration should also be had to water irrigation/bore holes and reservoirs which may be required to support sustainable farm practices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Biodiversity

The County Council is supportive of references to net gains for nature and green corridors within this policy. The objective to achieve net gains for nature and to protect and enhance sites of geological interest across the whole borough, and where possible, to secure the long-term management of sites, areas and features important for biodiversity and geodiversity is welcomed.

Public Rights of Way

The County Council recommends that the PRoW network is considered an asset within the Borough. Consideration should also be given to ensure that the character and value of rural views in wider environments of development sites should not be changed to a state that they become unattractive or out of context for users.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Minerals and Waste

The County Council, as Minerals and Waste Planning Authority, notes that paragraphs 1.6 and 1.7 of the Local Plan accurately set out the minerals and waste safeguarding policies of the Kent Minerals and Waste Local Plan 2013-30 and the main minerals and waste developments that exist in the Borough. However, the Plan does not detail how the proposed allocations have taken account of the safeguarded land-won minerals that are coincident with of these allocations (particularly for housing not within the defined urban areas within the Borough area where mineral safeguarding is exempted by the Kent Minerals and Waste Local Plan 2013-30 [Early Partial Review 2020]).

The approach currently taken within the Local Plan is to identify safeguarded minerals where they coincide with areas identified for major new development, in order to state that workable minerals should be extracted prior to development (Policy STR/SS 1, point 11; The Strategy for Paddock Wood, including land at East Capel). Within the Tudeley Village proposal, any economic minerals (such as Tunbridge Wells Sandstone) should be accompanied by a Minerals Assessment, which seeks to assess mineral safeguarding issues (Policy STR/SS 3, point 9; The Strategy for Tudeley Village).

The Local Plan's proposed allocations could be strengthened through the prior evaluation of the need to secure the long-term conservation of economic minerals - as set out by the National Planning Policy Framework (2019). A Mineral Assessment should be carried out to determine if an exemption to the presumption to safeguard could be applied for allocations where it may be a relevant issue.

A similar approach is taken with safeguarded waste management and minerals handling and transportation infrastructure. Where it has been identified as being either coincident or within 250 metres of an allocation, the delivery criteria indicate that it should be considered as a requirement of the development - "It must be demonstrated through any planning application that there will be no material adverse impact on the operation of safeguarded waste management facilities" (Policy AL/RTW 17 Land adjacent to Longfield Road and at Policy AL/RTW 18 Land at the former North Farm landfill site, North Farm Lane and land at North Farm Lane, North Farm Industrial Estate).

The County Council recommends that Minerals and/or Infrastructure Assessments (as appropriate) are carried out ahead of planning application stages to ensure due consideration of the Kent Minerals and Waste Local Plan and the deliverability of the proposed allocations.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpath WB1 that can provide active travel opportunities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpath WB10.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpath WB9. The site provides an opportunity to provide links across the wider PRoW network, alongside connections to the Tunbridge Wells Circular Walk.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Given the scale of the strategic developments proposed within this Local Plan, the County Council would welcome continued engagement to ensure the funding and delivery of necessary infrastructure, within a timely manner, to support the creation of balanced and sustainable communities.

It will be critical to ensure that sites across the Borough are designed with an adequate supply of open space. Studies show the significant contribution that green spaces can provide in respect of health and well-being benefits for the public, but such spaces face increasing pressure from new development and population growth. Master-planning will need to ensure that necessary steps are put in place to protect, and provide sustainable access to, existing green spaces, and to also to ensure that new green spaces are an integral part of new development.

Waste Management

Additional development, especially within growth focussed at Paddock Wood and Tudeley Village, will place particular pressure on the waste transfer station in Tunbridge Wells. Contributions towards the expansion of essential waste infrastructure should be included within STR/SS1 under section 15 "developer contributions" and in Policy STR/SS 3, under section 12 "developer contributions".

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Education

The education provision outlined in the Local Plan incorporates the additional education provision required within the proposed allocations. It is important to note that the 2FE Primary School within the Mascalls Court Farm site that already has planning permission, is required in part to also support the total growth within this policy.

Provision and Delivery of County Council Community Services and Facilities

The County Council recommends that the provision of extra or specialist care goes beyond consideration of older people but also supports those with learning and physical disabilities and other vulnerable groups. KCC would welcome continued engagement with the Borough Council in ensuring that the necessary homes to support a sustainable community are delivered.

Sustainable Urban Drainage Systems

The County Council supports the requirement for a Drainage Strategy to be produced for development coming forward within the Paddock Wood and Capel area, which if based upon the assessment undertaken within the Strategic Flood Risk Assessment (SFRA), will ensure the management of surface water and flood risk within the locality.

KCC recommends that the policy promotes the integration of drainage measures within open space to provide for multi-functional benefits.

KCC also recommends that design codes or supplementary planning documents are developed for this strategic allocation to promote quality sustainable drainage design, which should include consideration of water quantity, quality, amenity and biodiversity. There must also be consideration of on-plot controls such as green roofs, rain gardens and swales. Any design code should also ensure that any existing watercourses are retained to the degree possible and have sufficient margins to enable maintenance.

Public Rights of Way

The PRow network should be specifically mentioned within this policy. The existing network of Footpaths, Bridleway and Restricted Byway in the area provides an opportunity for Active Travel connectivity across the Borough.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council supports the references made to pedestrian and cycle environments but would draw attention to the need for connectivity between the network to local facilities and safe use of these sustainable transport opportunities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Education

The County Council supports the proposal for a new three form entry primary school within the development. The County Council would request that additional land to support the expansion of Capel Primary School must be secured through this policy to enable the school to expand from one form entry to two form entry. The County Council notes the revised location of the secondary school, which from an education perspective, is a much more satisfactory solution.

The County Council notes that the necessary new secondary school required to meet the additional demand for secondary school places arising from Paddock Wood and Tudeley Garden Village is outlined in Policy STR/SS 3 2d as to the South East of the proposed Garden Village. The County Council considers this an appropriate location to meet the educational needs and does not hold concerns regarding the suitability of this site, subject to site inspections and investigations at a later date.

Sustainable Urban Drainage Systems

The County Council supports the requirement for a Drainage Strategy for development coming forward within the Tudeley and would reference commentary stated for Policy STR / SS1 as also applicable for this policy, stated for STR/SS1.

The County Council requests that clarity is provided regarding the development boundary on the northern border and the proximity to the areas of flood risk around Tudeley Hale. Surface water drainage measures to serve the proposed development must be outside of any areas of potential flood risk. This must be included within any design code for the development area.

Public Rights of Way

The County Council considers that this proposal offers significant opportunities for future sustainable transport and would therefore recommend specific mention of the PRoW network. Improvements and upgrades to the network will help create high quality connections both within the Garden Village and to the wider Borough. Mitigation will need to be sought to take account of the increased use of the network resulting from this growth proposal.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests that the policy includes reference to the need for appropriate development contributions to be made towards improvements to the PRow network to provide Active Travel opportunities in the area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpaths WC96 and WC94 and surrounding WC95 and Restricted Byway WC118A to ensure wider connectivity of the site and potential for updates to cycle and equestrian use.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy AL/CRS 7 Land at the corner of Frittenden Road and Common Road, Sissinghurst

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpath WC75. Active travel links to the school from Sissinghurst junction must be provided with improvements to the length of the route to Common Road.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Kent County Council (Growth, Environment & Transport)
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BM 1 The Strategy for Brenchley and Matfield parish

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests that the policy includes reference to the need for appropriate development contributions to be made towards improvements to the PRow network to provide Active Travel opportunities in the area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Restricted Byway WT340A and Public Footpath WT341. Reference should also be made within the policy to the need for wider network improvements to support connectivity.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/PE 4 Land at Downingbury Farm, Maidstone Road

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpaths WT218 and WT 217B.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The County Council requests direct reference to Public Footpath WC295 that runs through site and the need for improvements to link to the wider network. Improvements are required to Public Footpath WC297 to provide an active travel link to local facilities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Business and Communities

The County Council supports the sustainable design criteria outlined within this policy. KCC requests consideration of whether there would be ground to consider if it would be viable and reasonable for the requirement for a Construction Environmental Management Plan to be extended to all developments - not just those over 20 units or 2,000sqm floorspace.

Furthermore, the County Council would encourage the inclusion of policy/guidance on the use of carbon offset, and to state whether or not developers can use offsetting to deliver emission reduction targets.

1. Design, character and site context

Broadband

The County Council supports the need for proposals to include infrastructure that meets the need of modern communication and technology.

4. Landscape, trees, and amenity / 5. Biodiversity and geodiversity

Biodiversity

The County Council requests consideration of native species planting. In an ecological context, one of the most positive landscape contributions of any development is to include native plant species only. Many native insects (c.10,000 species) will require native species in which to complete their lifecycle (with non-natives unable to provide this function).

Section 5 also states “Proposals should identify and not undermine the value of ecosystem services that the site provides”. The County Council is supportive of this in principle, though KCC would question how development proposals can practically and definitively assess a site’s capacity to provide various ecosystem services.

6. Residential Amenity

Given the anticipated impact from COVID-19 of increased home working as a permanent adjustment to people’s working lives, the County Council recommends consideration of how to ensure safe and reasonable home working areas. Ensuring that suitable spaces for home working are designed into new development will have positive benefits by boosting the resilience in this area of the local workforce and their ability to continue working and to learn.

High quality design should also be accessible, taking into account the varying needs of the evolving community, which includes providing diverse housing types, such as extra care housing, that is flexible and responsive to changing needs. The County Council recommends that this should include consideration of dementia friendly design within the Local Plan. Small design changes to housing and infrastructure can help someone living with dementia to be more independent by providing a home and environment that is clearly defined, easy to navigate, and feels safe.

Sustainable Urban Drainage Systems

The County Council notes that the Local Plan makes reference to many design elements that will provide multiple benefits and makes note specifically of green roofs. Green roofs are drainage measures that can control runoff from roof areas for small storm events, which comprise the majority of UK’s rainfall. Unfortunately, as a design element and part of the building fabric, it is difficult for Kent as Lead Local Flood Authority to influence planning at early stages for their inclusion, so they must be considered as part of the design code for an area.

The County Council would encourage the promotion of green roofs in planning guidance for appropriate developments and recommends that they are included in design codes or supplementary planning documents for strategic sites, especially in relation to large commercial buildings, logistic hubs and public buildings. This policy also includes the requirements for preparation of a Construction Environmental Management Plan (CEMP). Recently, KCC has experienced a number of queries from concerned residents in relation to the control of erosion and silt deposition from construction sites. KCC would recommend that the importance of erosion and silt control is also included in the detail of a site’s CEMP.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Business and Communities

This policy includes a section on energy reduction in new buildings, calling for a "A 'fabric first' approach in which all development comprising the construction of new buildings is required to reduce operational CO2 emissions by at least 10% below the Target Emission Rate (TER), as set out in Building Regulations Part L (2013)". The Future Buildings Standards, due to come into force in 2021, will introduce an uplift to Part L of 31%, which will mean Policy EN3 will be superseded.

This policy also includes requirements to address climate change adaptation. KCC welcomes this inclusion and would recommend that the policy references the Kent Climate Change Risk and Impact Assessment, which will help ensure developments understand more localised future risks from climate change.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy EN 4 Historic Environment

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Heritage Conservation

The County Council is supportive of these policies. The Borough Council has held extensive discussions with KCC during the development of the historic environment policies and have included commentary in the revised policy proposals and supporting text. The policies also build on a Heritage Strategy and relevant Supplementary Planning Documents (SPD) (Local List of Heritage Assets and Historic Farmsteads).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Biodiversity

The County Council considers that this policy is of vital importance for biodiversity/and ecology, denoting that applications must demonstrate a net-gain in biodiversity can be achieved. The policy includes all the necessary information linked to achieving and maintaining, biodiversity net-gain.

Importantly, all the site-specific policies caveat that Policy EN 9 must be referred to, ensuring an ecological baseline is undertaken and demonstrable net-gain proposals are provided.

The County Council recommends reference to Kent's Plan Bee, a pollinator action plan developed by the County Council that seeks to improve the food sources and general habitat for pollinators.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	Policy EN 10 Protection of designated sites and Habitats

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Biodiversity

The wording of this policy adequately accounts for all statutory and non-statutory designated sites. These sites have been defined and identified within the Local Plan. The County Council is therefore supportive of this policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Kent County Council (Growth, Environment & Transport)
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 18 Rural Landscape

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Biodiversity

The County Council is broadly supportive of these policies which fairly comprehensively cover rural issues.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Urban Drainage Systems

The County Council, as Lead Local Flood Authority, is supportive of the flood risk considerations within strategies for areas which are known to have flood risk issues, including Paddock Wood. KCC was consulted during the development of the Strategic Flood Risk Assessment Level 2 and was engaged with consideration of the proposed policies. Policy EN 25 "Flood Risk" requires that new development contributes to overall flood risk reduction. These policies will help address the constraints that occur within at-risk areas.

Kent County Council, as a statutory consultee within the planning process, is required to provide consultation responses on major development applications which have a wider application than those sites over 1 ha. The County Council notes that this policy requires that all developments over 1 ha are required to have a Flood Risk Assessment, as well as those with other sources of flood risk. The County Council, as Lead Local Flood Authority, requests clarity of the meaning of "development proposals". For example, a multi-residential/commercial development with a parking area may have a site area less than 1 ha but may have a significant contribution of impermeable area that is required to be managed. Therefore, restricting the requirements for flood risk submissions, means that some development proposals will not be required to submit sufficient information to be assessed appropriately.

As KCC is the Lead Local Flood Authority for major development, insufficient information to assess the creation or impact on flood risk would lead to an objection. Therefore, KCC would recommend that a flood risk assessment and/or drainage strategy is required for “all major development” within Flood Zone 1.

The NPPF specifically references the consideration of cumulative impacts. This has been undertaken on a strategic level for the Paddock Wood area under the new Strategic flood Risk Assessment (SFRA) Level 2. That is greatly appreciated for the size of development in that area – however, it must also be acknowledged that infrastructure capacity issues may also mean that surface water contributions from smaller development (including minor development) may also need to be controlled to reflect the capacity of the receiving drainage system. A site-specific Flood Risk Assessment (FRA) may be required in those instances.

KCC notes that EN3 Climate Change does not make reference to provisions for the climate change allowance, which is usually applied to flood risk assessments with respect to river levels or rainfall statistics. Climate change is referenced within the policy statement for EN25 but for completeness, it is recommended that reference is included within this policy.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy EN 26 Sustainable Drainage

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Sustainable Urban Drainage Systems

This policy states that all development applications include adequate drainage provision. KCC requests clarity as to whether there is any expectation by the Borough Council as to how this will be demonstrated - whether through the submission of a drainage strategy (for all major development) or building plans for minor development. KCC would recommend that the text is revised as follows - "All development applications should include adequate drainage provision so that flood risk is managed appropriately, both within the site and off-site."

The County Council welcomes the reference to the requirements for the promotion of multi-functional sustainable drainage systems.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

KCC would recommend that the text is revised as follows - "All development applications should include adequate drainage provision so that flood risk is managed appropriately, both within the site and off-site."

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council is supportive of this policy. Developments should seek to provide a diverse range of housing to take into account the varying needs of the evolving local community by providing diverse housing types, such as extra care housing, that is flexible and responsive to changing needs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council set up an Affordable Housing Select Committee in 2019 to determine whether KCC can play a greater role in maximising the development of affordable housing in Kent. The Select Committee report sets out a range of recommendations, many of which are for KCC to consider, and which would go some way to support the development of genuinely affordable housing for the people of Kent. The County Council will welcome continued engagement with key stakeholders, including the Borough Council, in the delivery of affordable housing. Affordable housing will need to be of high quality, in the right location and with the infrastructure to support residents to have a good quality of life, with a range of types and tenures delivered to meet the needs of the community.

The County Council notes that Building Regulation Standard Part M4(2) and Part M4(3) are only referenced in relation to affordable housing within the Pre-Submission Local Plan. The County Council would urge consideration of the adoption of these standards across all housing development types. The County Council's current development contributions requests that all homes should be built to these standards.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy H 7 Rural Workers' Dwellings

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Rural Economy

The County Council is broadly supportive of this policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council supports the overarching principle of these policies to ensure that suitable employment spaces are retained and developed in the Borough to ensure there remains adequate employment opportunities available to support growth. The COVID 19 pandemic has had a considerable impact on the way communities live and work and the long-term impacts of this pandemic are still evolving. The Local Plan will have to be flexible and resilient to adapt to the changing needs of employers as the full impacts of the COVID-19 pandemic and its impact on the local workforce become apparent. There are likely to be changes in future working patterns as a result of COVID-19 and this will need to be considered alongside changing demands for employment space. Although the long-term impacts are unclear, there may be a shift in the demand for office spaces which could potentially be replaced with demand for shared workspaces and meeting spaces for Small to Medium Enterprises (SMEs), with further demands from entrepreneurs and potentially businesses relocating out of London in particular, in response to post-COVID ways of working. Shared workspaces and accessible employment locations have the added benefit of reducing the level of commuting out of the local area. The Local Plan should be adaptable to accommodate these changing trends in work patterns, as the long-term influence of COVID-19 becomes apparent and KCC welcomes the Local Plan's recognition of the potential impacts of COVID-19.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council supports the overarching principle of these policies to ensure that suitable employment spaces are retained and developed in the Borough to ensure there remains adequate employment opportunities available to support growth. The COVID 19 pandemic has had a considerable impact on the way communities live and work and the long-term impacts of this pandemic are still evolving. The Local Plan will have to be flexible and resilient to adapt to the changing needs of employers as the full impacts of the COVID-19 pandemic and its impact on the local workforce become apparent. There are likely to be changes in future working patterns as a result of COVID-19 and this will need to be considered alongside changing demands for employment space. Although the long-term impacts are unclear, there may be a shift in the demand for office spaces which could potentially be replaced with demand for shared workspaces and meeting spaces for Small to Medium Enterprises (SMEs), with further demands from entrepreneurs and potentially businesses relocating out of London in particular, in response to post-COVID ways of working. Shared workspaces and accessible employment locations have the added benefit of reducing the level of commuting out of the local area. The Local Plan should be adaptable to accommodate these changing trends in work patterns, as the

long-term influence of COVID-19 becomes apparent and KCC welcomes the Local Plan's recognition of the potential impacts of COVID-19.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Broadband

Paragraph 6.454-6.464

The County Council recommends that reference to 24mbps should be amended to 30mbps, as this is definition increasingly used by Government to define superfast broadband.

The wording of paragraph 6.459 should be reviewed to ensure it is clear.

Policy ED 3 Digital Communications and Fibre to the Premises (FTTP)

The County Council requests clarity as to why wireless is being allowed in areas which are within the limits of built development, as they should be close to a point of presence. Wireless should only be considered if FTTP cannot be offered. The County Council recommends that there should at least be reference gigabit-capable technologies within in the policy as 'wireless' can offer a range of speed options so there is value in being specific and clear.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Paragraph 6.454-6.464

The County Council recommends that reference to 24mbps should be amended to 30mbps, as this is definition increasingly used by Government to define superfast broadband.

The wording of paragraph 6.459 should be reviewed to ensure it is clear.

Policy ED 3 Digital Communications and Fibre to the Premises (FTTP)

The County Council requests clarity as to why wireless is being allowed in areas which are within the limits of built development, as they should be close to a point of presence. Wireless should only be considered if FTTP cannot be offered. The County Council recommends that there should at least be reference gigabit-capable technologies within in the policy as 'wireless' can offer a range of speed options so there is value in being specific and clear.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Rural Economy

The County Council considers that rural economic development is covered appropriately within these policies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council is supportive of the flexible approach set out within the Local Plan to ensure the “provision of retail and complementary uses and makes mixed use allocations within the defined centres to broadly meet the needs and provide a range of sites to meet future needs”. Adaptability of the high street will help secure the resilience of these spaces. The County Council would draw attention to the role of community facilities and services within the high street to ensure these spaces are easily accessible for both new and existing communities.

Cultural infrastructure is also an essential feature within a town centre to create a vibrant mix of uses. It can be delivered as multifunctional spaces that offer opportunities for community services and affordable creative workspaces to support small businesses and freelancers, alongside cultural offerings. The cultural sector also provides local employment opportunities, with the role of higher and further education facilities developing skills in the cultural and creative industries. The Local Plan should therefore consider the delivery of necessary cultural infrastructure, as mentioned in Policy STR 5, to support sustainable development in the Borough. The County Council encourages the use of art in design to create a sense of place and identity in both new and existing communities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Policy TP 2 Transport Design and Accessibility

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council considers this policy to be acceptable, subject to the following alterations:

In the preamble to this policy, para 6.550 should say Local Cycling and Walking Infrastructure Plan, rather than Local Cycling and Walking Infrastructure Fund.

The final paragraph of the policy ('Shared space schemes...') does not make sense and so the County Council recommends its removal, as proposed shared space schemes should be assessed by the County Council as highway authority, as part of the Transport Assessment (there is no need to highlight in a separate paragraph).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council considers this policy to be acceptable, subject to the following alterations:

In the preamble to this policy, para 6.550 should say Local Cycling and Walking Infrastructure Plan, rather than Local Cycling and Walking Infrastructure Fund.

The final paragraph of the policy ('Shared space schemes...') does not make sense and so the County Council recommends its removal, as proposed shared space schemes should be assessed by the County Council as highway authority, as part of the Transport Assessment (there is no need to highlight in a separate paragraph).

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

(PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2 (PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2205), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

The County Council considers this policy to be acceptable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

[TWBC: see attached full representation, which has been input against the following: Section 1 (PSLP_2164), Section 2 (PSLP_2168), Section 3 (PSLP_2169), Policies STR1 (PSLP_2170), STR2 (PSLP_2171), STR4 (PSLP_2172), STR5 (PSLP_2174), STR7 (PSLP_2175), STR8 (PSLP_2176), Section 5 (PSLP_2177), Section 5: Royal Tunbridge Wells (PSLP_2178), Policies AL/RTW1 (PSLP_2180), AL/RTW5 (PSLP_2181), AL/RTW7 (PSLP_2183), AL/RTW14 (PSLP_2184), AL/RTW17 (PSLP_2185), AL/RTW21 (PSLP_2187), STR/SO1 (PSLP_2188), AL/SO1 (PSLP_2190), Strategic Sites (PSLP_2192), STR/SS1 (PSLP_2193), STR/SS2 (PSLP_2195), STR/SS3 (PSLP_2196), STR/PW1 (PSLP_2199), AL/PW1 (PSLP_2200), STR/CA1 (PSLP_2201), AL/CRS1 (PSLP_2202), AL/CRS2

(PSLP_2203), AL/CRS3 (PSLP_2204), AL/CRS4 (PSLP_2005), AL/CRS6 (PSLP_2206), AL/CRS7 (PSLP_2207), STR/HA1 (PSLP_2208), PSTR/BE1 (PSLP_2209), PSTR/BI 1 (PSLP_2210), PSTR/BM1 (PSLP_2211), PSTR/FR1 (PSLP_2212), PSTR/GO1 (PSLP_2213), PSTR/HO1 (PSLP_2214), AL/HO1 (PSLP_2215), PSTR/LA1 (PSLP_2216), AL/LA1 (PSLP_2217), PSTR/PE1 (PSLP_2218), AL/PE4 (PSLP_2219), PSTR/RU1 (PSLP_2220), PSTR/SA1 (PSLP_2221), AL/SA1 (PSLP_2222), PSTR/SP1 (PSLP_2223), EN1 (PSLP_2224), EN3 (PSLP_2225), EN4 (PSLP_2226), EN5 (PSLP_2227), EN8 (PSLP_2228), EN9 (PSLP_2229), EN10 (PSLP_2230), EN12 (PSLP_2231), EN13 (PSLP_2232), EN14 (PSLP_2233), EN18 (PSLP_2234), EN19 (PSLP_2235), EN20 (PSLP_2236), EN25 (PSLP_2237), EN26 (PSLP_2238), H1 (PSLP_2239), H3 (PSLP_2240), H7 (PSLP_2241), ED1 (PSLP_2242), ED2 (PSLP_2243), ED3 (PSLP_2244), ED4 (PSLP_2245), ED5 (PSLP_2246), ED6 (PSLP_2247), Town, Rural Service, Neighbourhood, and Village Centres (PSLP_2248), Policies TP1 (PSLP_2249), TP2 (PSLP_2250), TP3 (PSLP_2251), TP4 (PSLP_2252), TP5 (PSLP_2253), TP6 (PSLP_2254), OSSR1 (PSLP_2255), Appendix 4 (PSLP_2256) and Evidence Base (whole Plan) (PSLP_2257)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The inclusion of a Public Right of Way definition is requested. For the avoidance of doubt, the abbreviation 'PRoW' should also be added to the text so that it reads:

Public Right of Way (PRoW) – A way over which the public have a right to pass and repass, including Public Footpaths, Public Bridleways, Restricted Byways and Byways Open to All Traffic.

Rights of Way Improvement Plan – the KCC statutory policy must be included.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The County Council has set out its full response to the consultation in the attached Appendix. Comments are linked to relevant policies where appropriate.

Public Rights of Way

The inclusion of a Public Right of Way definition is requested. For the avoidance of doubt, the abbreviation 'PRoW' should also be added to the text so that it reads:

Public Right of Way (PRoW) – A way over which the public have a right to pass and repass, including Public Footpaths, Public Bridleways, Restricted Byways and Byways Open to All Traffic.

Rights of Way Improvement Plan – the KCC statutory policy must be included.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The County Council may wish to attend hearing sessions in respect of its statutory and non statutory functions.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

	Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am writing in response to the Tunbridge Wells Borough Council Pre-submission Local Plan, with particular reference to the biodiversity elements of the plan. Our response is provided in consideration of two key documents of the Kent Nature Partnership:

- Kent Biodiversity Net Gain Strategy – Statement of Principles February 2020
- Kent Biodiversity Strategy

The Partnership welcomes the reference to our Kent Biodiversity Strategy and the need to use this to inform biodiversity and landscaping.

The Kent Nature Partnership is pleased to see that the Plan recognises the need to halt the loss of biodiversity and the importance of the natural environment to people's health and wellbeing. And the Partnership especially welcomes that Tunbridge Wells will be addressing this decline in biodiversity with a requirement for all development to contribute towards delivering net gains for biodiversity, with the effect that biodiversity across the Borough as a whole will be improved by the end of the plan period.

The Plan's policy of expecting all biodiversity net gain to be delivered on site is in accordance with the emerging national approach however the Partnership asks the Borough Council to consider how these gains will be connected to ensure the gain is meaningful and serves to deliver improvements for our fragmented habitats and its associated biodiversity. In this regard, we welcome the statement that offsite proposals will be considered when in the interests of biodiversity.

The Partnership welcomes the policy that development must deliver a minimum of 10% and recognise that this may be increased, with this increase provided for by supplementary planning guidance.

We would strongly advocate that Tunbridge Wells looks to move towards a 20% biodiversity net gain, a target we as a Partnership are promoting with all of the county's local planning authorities. Kent's biodiversity faces some exceptional pressures – whilst we have a rich and varied biodiversity, we have seen some major losses of wildlife over the last century, with our landscape fragmented by continuous growth and development. We therefore consider that an enhanced target for biodiversity net gain of 20% is a proportionate response and one that illustrates the county's commitment to tackling the ecological crisis that faces Kent. Furthermore, the scale of previous biodiversity losses requires aspirational levels of gain to make up for them.

The Partnership is working with the county's LPAs to provide the evidence required to support the 20% target for biodiversity net gain and we hope to publish an independent and professional assessment of viability impacts from net gain later this year in relation to this.

The Partnership welcomes that the provision of biodiversity net gain is in general accordance with the Kent Nature Partnership's biodiversity net gain principles, in that it requires the gain to be secured for the lifetime of the development or a minimum of 30 years, when offsite. We would ask that where net gain is delivered offsite, the sites should be in protective ownership; such an approach would likely see high quality and meaningful net gains for biodiversity, that would be provided for in perpetuity.

In respect of the future development of Supplementary Planning Document for biodiversity net gain, we look forward to working with Tunbridge Wells in the development of this.

And one final note of accuracy – the Plan makes reference to the Kent Nature Partnership Biodiversity Action Plan; this should be replaced with Kent Biodiversity Strategy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

APPENDIX 1 – Extracts from Housing Supply and Trajectory Topic Paper

APPENDIX 2 - From Start to Finish' 2nd Edition (February 2020)

APPENDIX 3 - North Essex Authorities EIP

APPENDIX 4 - Uttlesford EIP

APPENDIX 5 - The Role of SMEs

APPENDIX 6 – Schedule of sites under 1ha

APPENDIX 7 – Schedule of sites under 60 dwellings

APPENDIX 8 - Draft Small Sites Policy

APPENDIX 9 – Effect of Rounding Up of Affordable Housing

1.0 INTRODUCTION

i) About the Kent SME Developers Network

1.1 These representations have been prepared by the Kent SME Developer Network (the Network) – a consortium of Small and Medium (SME) Developers who are located in or operate within Kent and Medway. The Group is currently chaired by Paul Henry, Managing Director of Esquire Developments, an SME Housebuilder based in Longfield near Dartford, Kent.

1.2 The Network was formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers (of varying size and scale) and Registered Providers. In addition, the Network includes representatives of Local Planning Authorities including Medway Council, Swale Borough Council, Tonbridge and Malling Borough Council, Tunbridge Wells Borough Council and Maidstone Borough Council. It is the intention that the Network grows over time to cover all of Kent including additional SME Developers and Local Planning Authorities throughout Kent.

1.3 The Network was set up to provide a platform for SMEs to discuss relevant planning and delivery issues associated with bringing forward smaller developments and to positively and proactively engage with Local Planning Authorities at the plan making and decision taking stages.

1.4 Central Government has recognised the need to support existing SMEs and encourage more into the market in order to diversify the housing market from the volume housebuilders and generate choice and improve quality of homes being built. The Government has described SMEs as being of ‘National Importance’. According to figures, 90% of all home constructed in the past decade have been delivered by large corporations

1.5 The Network meets on a quarterly basis to discuss and explore relevant SME related issues, including working through planning related matters. Notable attendees at past meetings including Steve Quartermain (prior to his retirement as Chief Planner at MHCLG), Homes England and the new Chief Planner at MHCLG Joanna Averly is due to attend a future meeting.

1.6 In addition to the meetings acting as a discussion platform, the SME Network is also designed to act as a support and mentoring network, where land opportunities can be shared, or knowledge/experiences drawn from in-house teams in order to help each other and strengthen the SMEs. The Network can also act as a collective voice in the preparation of Local Plans or other consultations - such as this.

1.7 The Network comprises the following:

SME Housebuilders and Developers

- . Esquire Developments
- . Fernham Homes
- . Wealden Homes
- . Fernfield Homes
- . Meridian Construction
- . McCulloch Homes
- . Aile Homes
- . King and Johnstone
- . Clarkmores
- . Clarendon Homes
- . Gillcrest Group
- . A&E Property Ltd
- . Country House Homes
- . Classicus Estates
- . Woodcroft Developments
- . Provectus Developments
- . Penenden Heath Developments
- . Grandera Homes
- . Windmill Construction
- . Jarvis Homes
- . Aspire Designer Homes
- . Kentish Projects
- . Woolbro Homes
- . Cooper and Cole
- . Hillstone Homes
- . RJC New Homes
- . Wedgewood Homes

- . TG Designer Homes
- . Endeavour Construction Limited
- . Unique Land

Registered Providers

- . Hyde Housing
- . MHS

Local Planning Authorities

- . Medway Council
- . Maidstone Borough Council
- . Swale Borough Council
- . Tunbridge Wells Borough Council
- . Tonbridge and Malling Borough Council
- . Dover District Council

Agents

- . Tetlow King Planning
- . David Hicken Associates
- . Barton Willmore

1.8 The Network welcomes ongoing engagement with TWBC and any other interested party.

1.9 For clarity, the representation contained in this response relate to the Members of the Network that are SME Housebuilders and Developers and not the Registered Providers, LPAs or Agents.

ii) Content of Representations

1.10 These representations have been prepared by the Network which seek to address strategic matters. Any site-specific matters will be addressed by individual SMEs within their own representations.

1.11 The representations are structured as follows:

Section 2.0: Response to the Spatial Strategy.

Section 3.0: Response to lack of SME Sites and Support.

Section 4.0 Summary.

1.12 In summary the headline points are as follows:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.
- . The plan is over-reliant on the anticipated delivery of its strategic large-scale sites in which the largest comprises an oligopoly of National Volume Housebuilders and the other has no developer yet on board;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 (a) of the NPPF regarding 10% provision of small sites ;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to housing delivery and NPPF Paragraph 72 (d).
 - o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market and will not deliver the required housing within the plan period.
 - o Is not consistent with National Policy as it does not conform to Paragraph 68.

2.0 RESPONSE TO THE SPATIAL STRATEGY

i) Spatial Strategy

2.1 **Policy STR1: The Development Strategy** sets out the Council's broad development strategy. It indicates that between 2020 – 2038, a minimum of 12,204 dwellings and 14 hectares of employment land are developed.

2.2 This figure reflects the Standard Method for housing being 678 dwellings per annum (12,200 dwellings in 2020-2038). Table 3 of the Pre-Submission Local Plan identifies that taking into account the extant supply of planning permissions and taking into account windfall developments on small and large sites, there is a minimum requirement to identify 7,221 dwellings as new allocations.

2.3 Table 4 of the Local Plan sets out the proposed distribution of housing allocations and identifies a total of between 8,076 – 8,461 new allocations; suggesting a combined total (with the extant supply) of 13,059-13,444 dwellings. The Council considers that taking the mid-point of this estimate, this equates to an oversupply of 1,000 dwellings over and above the 12,200 housing needs requirement

2.4 Excluding planning permissions, Table 4 of the Local Plan identifies a sub total of 8,996 dwellings to be delivered in the plan period. Of this supply, the Urban Expansion of Paddock Wood and East Capel (3,490 – 3,590 dwellings) and the new settlement at Tudeley Village (2,100 dwellings in the plan period and 2,800 in total), equate to a total of **5,590 – 5,690 dwellings** to be delivered in the plan period. This represents approximately **62%** of the Council's total new allocations/supply that is reliant on just two strategic locations, which are also geographically located in close proximity to each other.

2.5 We consider that there is an over reliance on these 2 schemes, and a failure to deliver either one or both of these sites at the scale or trajectory envisaged undermines the robustness and effectiveness of the of the Local Plan and is **unsound** in this respect.

2.6 Notwithstanding their individual impacts on the AONB and Green Belt, a review of the Council's Evidence Base, namely the Strategic Sites Topic Paper (March 2021) identifies that:

- For Paddock Wood and East Capel *'There are currently four housebuilders who are promoting four separate parcels of land within this allocation: Crest Nicholson and Dandara (the western parcel); and Redrow and Persimmon (the eastern parcel)* (para 2.11); and
- And for, Tudeley *'The site falls into one single ownership: The Hadlow Estate'* (para 2.20) and *'The Hadlow Estate commissioned its own Masterplanning Study, as detailed in the Tudeley Village Delivery Strategy'* (para 3.13)

2.7 In respect of Paddock Wood and East Capel, whilst it is recognised that these developers are indeed experienced National Housebuilders, we do not consider that this automatically means success for the delivery of the urban extension as advocated within the Evidence Base (paras 7.19-7.22). It is noted that there is still a significant amount of development (in terms of volume) to take place and associated infrastructure impacts and upgrades to address as the site is 'scaled up'. Whilst collaboration and engagement with the developers is stated as being present, the Evidence Base still identifies significant issues to address and overcome, including crucially how each development will deliver and/or contribute in a holistic and coordinated manner re. upgrading services or delivering key items of infrastructure. These are complex matters and take time to resolve.

2.8 In addition, the Network does not consider that the 4 No. named developers reflect sufficient diversification/choice in the market, in both product and design to deliver 3,500 dwellings. Indeed, the 4No. developers represent an oligopoly market in Paddock Wood and East Capel, thus resulting in control over the timing, supply, market forces and delivery of infrastructure. It is further unclear how the Volume Housebuilders will deliver variation in design away from their standard house types, or how this aligns with the Government's agenda for Building Better Building Beautiful. Given the scale of development, the sensitivities in respect of its Green Belt and other environmental designations, it is unclear how 4No. Volume Housebuilders will deliver the quality of design expected from an Urban Extension of this nature.

2.9 In respect of Tudeley, it is noted that there is at present no developers partnered/identified to promote or deliver dwellings. Whilst this in itself is not an unacceptable position and there are clear commitments to delivery and quality (that favour SME partners), the lack of a development partner at this point does raise additional concerns over the ability for the Council to rely on the delivery rates and pace of delivery set out in the Evidence Base.

2.10 The Housing Supply and Trajectory Topic Paper confirms (see **Appendix 1** of this statement for extracts), that both Paddock Wood and Tudeley are estimated to begin delivering completed dwellings in 2025/26, at a rate of 300 dwellings and 150 dwellings respectively.

2.11 Based on the Council's own trajectory methodology, super—size sites (2,000 plus dwellings) are suggested as either delivering units within 3 years of an Outline permission, or, where they are an allocated site but with no planning permission, years 6 or 7 onwards.

2.12 To rely on **any** completions in 2025/26 (let alone at a rate of 300 dwellings and 150 dwellings), represents delivery in year 4 of the 5-year period. In order for this to be achievable, both strategic growth areas need to have obtained outline planning permission by 2022 i.e. approximately 1 year's time.

2.13 This is not a realistic assessment of likely delivery rates and fails to comply with Paragraph 72 part d.

2.14 Given that all of Tudeley and the western growth expansion of Paddock Wood lie within the Green Belt, and realistically planning consent will not be granted until such time that these areas are released from the Green Belt (upon the adoption of the Local Plan – late 2022 as a best-case scenario), it is wholly unrealistic to expect or rely on completed dwellings from the strategic sites (amounting to 450 dwellings combined) in 2025/26. Based on the methodology as it stands today, 'allocated sites with planning activity and no planning activity', should be considered as years 6 and 7 in the timeline i.e. 26/27 and 27/28 respectively.

2.15 On the basis the Local Plan will not be adopted until Autumn 2022 (assuming it is found sound) and assuming a planning application is submitted at that time - given the length of time a grant of planning permission may take; it is considered that the Council's own Evidence Base does not support the identified trajectory. The Evidence Base is therefore fundamentally flawed.

2.16 Indeed, up-to-date research prepared by Lichfield's titled 'From Start to Finish' 2nd Edition (February 2020) (**Appendix 2**), updates the document relied on in the Council's evidence within its Housing Trajectory Topic Paper which references an earlier report by Lichfield's (the 1st edition). The Lichfield's 2nd edition demonstrates that it takes on average **8.4yrs** from the validation of the first planning application to the first dwelling being completed on schemes of 2,000+ dwellings.

2.17 This means that even if applications were submitted now (June 2021), 2026 is an unrealistic date to be relying on completed dwellings – with an Autumn 2029 date being an average indicator. If an application was approved at the earliest in Autumn 2022, a Summer 2030 date is more realistic – as an average.

2.18 The report further identifies that on average, the completions per outlet drop to circa 145 dwellings per annum on sites with 3 outlets or more suggesting that a capacity of 145dpa (assuming 3 outlets) would only be achieved per strategic site. The Council's Evidence Base suggests Paddock Wood and Capel will deliver 300 dwellings from 4 No. Developers. We suggest this is an over optimistic delivery rate.

2.19 Furthermore, the trajectory also assumes the start on site at the time envisaged will deliver their anticipated maximum completions from Day 1 Year 1. This is simply unrealistic - especially in the light there are no developers or strategic promoters promoting Tudeley. The significant matter of viability and commerciality of the proposals has not yet been proven and therefore the delivery of up to 150dpa from year 1 of completions is highly unlikely. From experience within the Network, any new large scale site is likely to run on a single outlet for the first 12 months, which will realistically take 2-3 yrs to deliver up to 50 dwellings per annum. At its peak, Finberry Park, a Crest Nicholson Development in Ashford completed only 120dpa, which included 3 outlets including HA.

2.20 Given the over reliance on these strategic sites, it is critical that the Local Plan is confident of the number of dwellings anticipated to be delivered in the Local Plan. We have set out how we are concerned that these two sites represent a significant proportion of the total dwellings (62% of the total supply) and in the case of Paddock Wood, controlled by an oligopoly of National Housebuilders.

2.21 The Local Plan is reliant on these two strategic locations delivering at least 5,590 dwellings in the Local Plan time period, with completions beginning in 4 years time. The complications that arise with large scale growth of this nature and given the Council acknowledge that it has never delivered growth of this scale/type before (para 4.34 of the Housing Supply and Trajectory Evidence Base), we

do not consider that the strategic sites will deliver when the Council anticipate, nor to the level the Council anticipate.

2.22 Accordingly, we consider that an over reliance has been placed on the delivery rates of the strategic sites and that this figure should be revised to a more realistic figure of approximately **2,450 dwellings in the plan period**. This reflects the long lead in times for 2000+ settlements (as evidenced in the Lichfield Report) and reflects a more realistic 'gearing up' of the site delivery in respect of number of completions per annum as more outlets come online.

2.23 Taking a more realistic approach as required by NPPF Paragraph 72, it is likely that the following table is a more appropriate trajectory:

[TWBC: for table, please see full representation attached as a supporting document]

2.24 In addition to the above, there has been no commercial led involvement to date for procurement/delivery of Tudeley, let alone negotiations to purchase land. The Network has extensive experience in this field (a number of Members have worked at Volume PLC Housebuilders), and there could easily be at least 5 years of land negotiations and/or Compulsory Purchase Orders, due diligence and application preparation work (which would be extensive).

2.25 Even if the above land acquisition is achieved, local evidence within the County supports the likelihood that there will be delay. Mountfield Park, Canterbury - a development of 4,000 dwellings, was heard at Planning Committee in 2015 and is still no further forward with the issue of a Planning Permission.

2.26 Recent Examinations of the North Essex Authorities EIP (**Appendix 3**) and Uttlesford EIP (**Appendix 4**) both of which consider the deliverability of new settlements. Both Inspectors concluded that insufficient evidence had been submitted in respect of the deliverability of the garden settlements and the plans found unsound – highlighting the difficulties with regard to their delivery in particular in relation to ensuring the necessary infrastructure is in place to support new settlements. Such Evidence Base is presently lacking.

2.27 Accordingly, we consider that an over reliance has been placed on the delivery rates of the Strategic locations and that this figure should be revised to a more realistic figure of approximately 2,450 dwellings in the plan period, some 3,140 dwellings difference. Taking into account the over supply of 1,000 dwellings (as set out above), we consider **approximately 2,140 dwellings** need to be identified on smaller more deliverable sites in order to meet the identified needs within the plan period up to 2038.

3.0 RESPONSE TO LACK OF SME SITES AND SUPPORT

3.1 We are wholly disappointed that the Local Plan fails to support or indeed recognise the role of SMEs in the plan. This is evident by the simple fact that the term 'SME' is not even referenced within the document.

3.2 The importance of the role SME's play in the housing market has been fully recognised by Central Government. Most recently, the consultation on the proposed changes to the current planning system, referred to SMEs as being of 'National Importance'. **Appendix 5** sets out a timeline of the narrative surrounding SME housebuilders and the recognition of the issues facing SMEs, the dominance of volume Housebuilders and the attempts to reverse the decline in the number of SME housebuilders through the Plan-Led system.

3.3 It is recognised that SMEs deliver high quality homes and can diversify the housing market. SMEs tend to bring forward bespoke products that reflect the characteristics of a local area either through size, tenure and design. Importantly, SMEs deliver quickly, support local trade suppliers and local job growth and are flexible in their approach. Unlike Volume Housebuilders, SMEs do not tend to take long term strategic options on land. However, this means that SMEs are disadvantaged at the Plan Making stage, as they neither have the land itself to promote, cannot invest the time, risk or expense of promoting a site through the Local Plan process (which is lengthy and competitive) or the available land is at lower tier settlements due to Volume Housebuilders taking long term land options in higher tier settlements and thus SME site typology is marginalised.

3.4 SME site typology for the Kent SME Network tends to be located in rural fringe locations due to the availability of land, lack of brownfield opportunities and that Volume PLC housebuilders or Strategic Promoters have already secured long term land options in urban fringe locations.

3.5 As a consequence, SMEs are pushed to the margins in respect of land availability and suitability, and it is often found that SMEs need to work harder to justify a site's sustainability credentials. Whilst a rural fringe location may result in increased car trips, these car trips are short in length on uncongested roads. The automatic assumption is often therefore that the reliance on the car, results in increased emissions and an application is refused or a site promoted in the Local Plan is not progressed.

3.6 However, this is a one-dimensional approach and sustainability is more nuanced and holistic. By way of example, the emissions derived from short car trips (from a low number of dwellings) can actually be offset (in carbon footprint) by the environmental quality of the buildings themselves through the adoption of green technologies. Furthermore, coupled with the behavioural changes relating to online shopping and working from home (even pre COVID-19) reducing day to day trips, alongside the increasing uptake in electric vehicles (which do not release emissions), the notion of sustainable development or unsustainable development is changing fast.

3.7 This is a specific matter has been tested by members of the SME Network and are subject to separate representations demonstrating how a case study scheme of 50 dwellings in a rural fringe location can offset carbon emissions generated by additional vehicle trips and result in an overall net reduction in emissions than a standard volume housebuilder approach in an urban area. Furthermore, the report assesses behavioural changes including the take up of electric vehicles and decline in fossil fuel sales and increased on-line behaviour, home deliveries and home working.

3.8 We consider LPAs (including Tunbridge Wells) need to be forward thinking and not looking backwards on this issue, particularly if Climate Change is to be taken seriously. SMEs can really assist and can bring forward developments that are bespoke and respond to the Climate Change challenge more swiftly than Volume PLCs. At present, the Local Plan fails to achieve this.

3.9 Central Government recognises the problem of bringing SMEs into the market and has sought to 'level the playing field' in the context of supporting small and medium sized sites at the plan making stage. Crucially, the NPPF 2019 confirms in paragraph 68 that:

1 Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should:

a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown, through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;

b) use tools such as area-wide design assessments and Local Development Orders to help bring small and medium sized sites forward;

c) support the development of windfall sites through their policies and decisions – giving great weight to the benefits of using suitable sites within existing settlements for homes; and

d) work with developers to encourage the sub-division of large sites where this could help to speed up the delivery of homes.

3.10 The NPPF provides for a clear direction to LPAs, that it must identify land to accommodate **at least** 10% of their housing requirement that are 1ha or less. For Tunbridge Wells, this means that 1,220 dwellings need to be identified on small sites.

3.11 Officers of TWBC met with the Network to discuss the emerging Local Plan and the approach taken to meeting the 10% target and a small sites policy.

3.12 In respect of the 10% target, **Appendix 6** contains a table which was issued to the network by TWBC confirming those sites which have been identified in the Local Plan and are below 1ha in size.

3.13 The Councils Evidence Base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. This represents less than 3% and some 930 dwellings short of the expected NPPF requirements. Even if the total No. of sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites - representing only 5.2% of the 10% target.

3.14 There is no Evidence Base to justify why the 10% target has not been met and no clarity/explanation as to why paragraph 68 of the NPPF is not being met.

3.15 The Council is therefore clearly failing to meet NPPF Para 68 part a) and has not set out any evidence as to why this figure cannot be achieved. The Plan has not been positively prepared and is not consistent with national policy as a result. **It is therefore unsound.**

3.16 Furthermore, the 10% allocation requirement is simply more than a mathematical exercise or a quantitative 'tick box'. Indeed, the purpose of NPPF Para 68 is to assist SMEs in coming forward with development within the Plan Led system. Crucially, it is important to understand that when allocating sites of this nature, that these sites are first and foremost being promoted by an SME. This is the most efficient and best way to ensure that SMEs deliver sites and diversify the market. It is therefore necessary for TWBC to undertake a qualitative approach of available sites and factor this into its decision making when allocating sites.

3.17 By way of example (and linked to the small sites policy below), the Council has also identified sites which have a capacity of up to 60 dwellings to reflect that SME developers of the network can build out larger sites than 1ha (**Appendix 7**). The evidence further reinforces the lack of available opportunities for SMEs in the Local Plan, identifying a total of 785 dwellings - which reduces to 495 dwellings once sites of 1ha or less are removed from this schedule (i.e. **Appendix 6 sites**).

3.18 The Local Plan is therefore woefully falling short of supporting SME developers and encouraging diversification in the market as required by Paragraph 68.

3.19 It is noted that a number of SME sites may have been promoted in the SHLAA or identified in the Regulation 18 Local Plan consultation, but not brought through in the Plan for allocation or indeed discounted in the SHLAA as being unsuitable. It is considered these sites should be reviewed to ascertain the availability of sites being promoted by SME developers and to assess if the need to allocate sufficient sites would alter the conclusions of the SHLAA assessments.

3.20 If there are still insufficient small and medium sized sites identified, part d) of para 68 confirms that the LPA should work with developers to encourage the subdivision of large sites where this could help to speed up the delivery of homes.

3.21 Whilst the Network does not object to this approach in principle, it should be noted that this approach can be a very difficult to achieve on sites that are already being promoted by a volume housebuilder for a number of reasons, namely:

Legal complexities associated with:

- . land transfer including potential clauses within option agreements about sub-sales;
- . where best value is required to be achieved (noting an SME will always tend to be outbid by a volume housebuilder) ;

Commercial complexities associated with:

- . potentially competing products;
- . expectation of land values ;
- . competing financial models and potential price caps/ceilings placed on the SME by the parent developer to achieve sales rates;
- . dilution of identity/products for both parent housebuilder and SME either through contract requirements or wider design codes;
- . Finding an appropriate SME partner within the limited pool of SMEs available;
- . The timing/capacity of an available SME at any given time that meets their business objectives;
- . The need to deliver sales rates at a specific rate to address cash flows and therefore pricing ;

Practical complexities associated with:

- . accessing the site for construction;
- . ability to take deliveries;
- . health and safety responsibilities and separate sales outlets;
- . HA delivery and parcelling up on smaller sites and gaining interest/appetite ;
- . Location of the SME parcel, potentially being in a later phase 'at the back';
- . Differences in coordination of build programme and occupation strategies (relating to sales rates and build rates);
- . Responsibility of servicing sites in respect of all site infrastructure and certain capacity/S106 triggers.

3.22 It is highlighted that paragraph 68 part d) advises that LPAs should 'work with developers to encourage subdivision of large sites where this will speed up the delivery of homes'. The NPPF does not state that LPAs should impose, through Policy, that large allocations are sub-divided in order to

achieve a 10% target. The NPPF makes clear that part d) seeks only 'encouragement' in order to 'speed up delivery'. Part d) is not to be used to use large sites to be subdivided, but to speed up delivery by increasing the number of outlets. The two parts (part a and part d) are seeking to achieve different objectives and should not be linked.

3.23 It is therefore considered that if the Council is required to find additional parcels of land, then identifying smaller pockets on larger parcels should be considered as a matter of 'last resort' and, in that instance, should be directed in the first instance towards 'legacy land', i.e. public sector land or land which is yet to be put under option (which traditionally is easier to release to SMEs as there is less commercial and legal sensitivity in public sector land).

SME Small Sites Policy

3.24 We are concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB. This is especially in the light that 1,310 dwellings and 360 dwellings (14% of the housing requirement 2020-2038) are expected to derive from windfall small sites and large urban sites respectively.

3.25 This issue is further compounded by the fact that the rural locations are designated as Green Belt, particularly meaning that development of any scale can only be secured by reviewing Green Belt boundaries within the Local Plan.

3.26 As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

3.27 In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

3.28 Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in Tunbridge Wells in respect of Green Belt and AONB designation, and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

3.29 The policy extract is set out below and the full supporting text is contained in **Appendix 8**.

[TWBC: for the policy extract, please see full representation attached as a supporting document]

3.30 A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small **and** Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

3.31 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

3.32 Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

3.33 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

3.34 The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

3.35 In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

3.36 The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale (when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

3.37 This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter that may extend beyond Tunbridge Wells, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

3.38 The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

3.39 A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than TWBC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For TWBC, this means that any site that falls under a 50-dwelling threshold will likely struggle to gain interest in a registered provider (at 40% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

3.40 On a related point, it is also noted that TWBC adopt a rounding up approach to affordable housing. This again has a greater impact on smaller sites as the net effect/impact is more severe the fewer number of homes being delivered on any one site. This is best shown in **Appendix 9** of this statement which demonstrates how the increasing total number of affordable homes being delivered has a proportional improvement on the net effect of rounding up. In essence, the larger sites can both generate interest from an RP and can carry the rounding up approach. Smaller sites cannot and the Council should recognise this position and take a flexible approach in this respect.

4.0 SUMMARY

4.1 These representations have been prepared by the Kent SME Developer Network - a consortium of SME Developers who are located in or operate within Kent and Medway. The Network was recently formed in November 2019 and presently comprises approximately 30 participants including SME Housebuilders and Developers of varying size and scale and registered providers.

4.2 The Network welcomes ongoing engagement with TWBC and any other interested party.

4.3 In summary the headline points are as follows:

- . We are wholly disappointed that the Council is failing to recognise the role of SMEs in its Pre-Submission Plan. This is evident on the basis that the Local Plan is wholly silent with reference to support for SMEs.
- . The plan fails to allocate 10% of its housing numbers on sites of 1ha or less as required by NPPF Paragraph 68.
- . The plan fails to provide a sufficient evidence base, namely demonstrating a quantitative and qualitative approach to supporting SME sites.

- . The plan is over-reliant on the anticipated delivery of its strategic sites large scale sites which the largest comprises an oligopoly of National Volume Housebuilders;
- . The Plan fails to provide for a robust housing trajectory and requires the identification of smaller sites to provide for a more effective plan.
- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.
- . Accordingly, the plan is considered **unsound** as it is:
 - o Not Positively Prepared as it does not fulfil paragraph 68 of the NPPF regarding 10% provision of small sites;
 - o Not justified as the appropriate evidence base is lacking, particularly relating to housing delivery and Paragraph 72 part d.
 - o Not effective as the reliance on larger sites reduces the opportunity to diversify the housing market and will not deliver the required housing within the plan period.
 - o Is not consistent with National Policy as it does not conform to Paragraph 68.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

See attached representations

[TWBC: the paragraphs below are relevant extracts from the full representation, which is attached as a supporting document]

- . We consider the Plan should include a small sites policy for up to 60 dwellings. This is considered to be a proactive and effective way to support SME growth in policy and assist in delivering high quality bespoke developments.

2.27 Accordingly, we consider that an over reliance has been placed on the delivery rates of the Strategic locations and that this figure should be revised to a more realistic figure of approximately 2,450 dwellings in the plan period, some 3,140 dwellings difference. Taking into account the over supply of 1,000 dwellings (as set out above), we consider **approximately 2,140 dwellings** need to be identified on smaller more deliverable sites in order to meet the identified needs within the plan period up to 2038.

3.23 It is therefore considered that if the Council is required to find additional parcels of land, then identifying smaller pockets on larger parcels should be considered as a matter of 'last resort' and, in that instance, should be directed in the first instance towards 'legacy land', i.e. public sector land or land which is yet to be put under option (which traditionally is easier to release to SMEs as there is less commercial and legal sensitivity in public sector land).

SME Small Sites Policy

3.24 We are concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB. This is especially in the light that 1,310 dwellings and 360 dwellings (14% of the housing requirement 2020-2038) are expected to derive from windfall small sites and large urban sites respectively.

3.25 This issue is further compounded by the fact that the rural locations are designated as Green Belt, particularly meaning that development of any scale can only be secured by reviewing Green Belt boundaries within the Local Plan.

3.26 As part of the Network's objective, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments that builds on the 1ha site requirement but expands this into a policy framework that can allow SMEs to successfully operate within the policy framework of a Local Plan where there are limited opportunities through the allocations in which the Council has made (i.e. on larger sites).

3.27 In this respect, there is often a large windfall figure required to be met, or LPAs find themselves in a position where the presumption in favour of sustainable development is applicable. The SME policy set out below is a policy in which the Network considers would provide the opportunity for SME sites to come forward, whilst offering the LPA an enhanced development coming forward that is typically delivered by an SME – i.e. in respect of design quality or for instance carbon efficiencies.

3.28 Whilst the ideal scenario would be for the same policy to be adopted by each Council (and therefore apply a level of consistency in understanding and application of the policy), we also recognise that each LPA has a specific set of circumstances that may require the policy wording to be tweaked. This maybe the case in Tunbridge Wells in respect of Green Belt and AONB designation, and the Network would welcome further discussions as to how such a policy could be introduced into the Plan.

3.29 The policy extract is set out below and the full supporting text is contained in **Appendix 8**.

[TWBC: for policy extract, please see full representation attached as a supporting document]

3.30 A Small Sites policy will allow for SMEs to operate within the Plan Led system and will allow both Small **and** Medium sites to come forward (i.e. sites above 1ha and up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation etc and a flexible approach to the delivery of Affordable Housing. On the other side of the coin, the Council will receive higher quality developments being submitted that are in character with more rural fringe locations (remembering the SME site typology), but that those Rural Fringe locations can be supported with an appropriate amount of growth that will assist in preventing, slowing or reversing their cycle of decline.

3.31 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The LPA also recognises that it would result in a development that meets Building Better Building Beautiful objectives and potentially addressing Climate Change issues.

3.32 Crucially, the policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe, and therefore a policy that refers up to a figure of 60 dwellings is deemed acceptable ? i.e. the policy is fully flexible.

3.33 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. A volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

3.34 The Network recognises that other Kent LPAs are seeking to introduce a Small Sites Policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME.

3.35 In addition to the Policy itself, we also consider that an SME protocol should be prepared which provides guidance and clarity for SMEs at the pre-application and post-submission stages. The protocol would recognise the need to engage with SMEs and understand that a flexible approach is needed to certain issues (such as site typology/affordable housing provision).

3.36 The protocol could include a standard PPA timeframe and fixed cost to ensure that sufficient officer time is allocated to an SME application. Whilst SME applications tend to be on the smaller scale

(when compared to larger volume housebuilder submissions), those applications are critical to the SME themselves, and accordingly the Network often discusses the frustration at the lack of engagement from LPAs on their applications – often perceived by SMEs in the Network as being at the bottom of the pile.

3.37 This position is especially so at the pre-application stage, where often paid pre-application advice is sought, but either never received or delayed, in some cases up to 9 months. Whilst this is a matter than may extend beyond Tunbridge Wells, this is a 'real life' significant issue as a pre-application response is so important to an SME to determine the extent of risk that a site may carry.

3.38 The importance of a planning consent is vital to the success of an SME, no matter how small (or large) that scheme is, and greater engagement is always encouraged. This works both ways and greater engagement can improve the submission material of an SME and thus also reducing risk.

3.39 A further burden on SME's, and a point that the above policy is seeking to assist with is delivery of Affordable Housing. This is a wider matter than TWBC, but it is well recognised that Registered Providers are rarely interested in sites unless the number of affordable homes being offered equates to at least 20 affordable dwellings. For TWBC, this means that any site that falls under a 50-dwelling threshold will likely struggle to gain interest in a registered provider (at 40% AH requirement). The policy seeks a flexible approach to how Affordable Housing can be delivered by an SME in instances where it is the RP that is not interested, not that the SME does not wish to provide affordable homes.

3.40 On a related point, it is also noted that TWBC adopt a rounding up approach to affordable housing. This again has a greater impact on smaller sites as the net effect/impact is more severe the fewer number of homes being delivered on any one site. This is best shown in **Appendix 9** of this statement which demonstrates how the increasing total number of affordable homes being delivered has a proportional improvement on the net effect of rounding up. In essence, the larger sites can both generate interest from an RP and can carry the rounding up approach. Smaller sites cannot and the Council should recognise this position and take a flexible approach in this respect.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Due to the number of SME developers this network presents and the content and extent of the representations require verbal exploration with the Inspector.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1793 Esquire Developments for Kent SME SI Representation with Appendices.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Nicky Britton-Williams [REDACTED]
Email Address	[REDACTED]
Company / Organisation	Kent Wildlife Trust
Address	[REDACTED] [REDACTED] Maidstone [REDACTED]

Question 1	
Respondent's Name and/or Organisation	Kent Wildlife Trust
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 9 Biodiversity Net Gain

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On the basis that KWTs comments on the pre-submission Local Plan are relatively brief and broad I hope you will accept these via email as opposed to using the consultation portal.

Policy EN 9 – Biodiversity Net Gain

Kent Wildlife Trust continues to be fully in support of TWBCs commitment to provide net gains for nature, now Policy EN 9. We look forward to the publication of a Supplementary Planning Document (SPD) and our recommendations for this continue to apply. Within the supporting text for Policy EN 9 we query if the inclusion of “*This may simply be the provision of bird and bat boxes on a building [...]*” in paragraph 6.133 may cause confusion regarding what is considered to constitute a net gain for biodiversity, as will be required by the upcoming Environment Bill. We would recommend providing clarity that whilst features such as bat and bird boxes are regarded as enhancements for biodiversity (as per Policy EN 19) they will not contribute to the achievement of biodiversity net gain using the Defra metric. In addition, we are supportive of the evidence requirements for Biodiversity Gain Plans, specified in 6.135.

Development between North East Tunbridge Wells and Paddock Wood

In our comments to the Tunbridge Wells Draft Local Plan Regulation 18 Consultation we raised concerns regarding the potential cumulative impact on biodiversity as a result of the high concentrations of development proposed between North East Tunbridge Wells and Paddock Wood. This area contains large areas of woodland, as well as pockets of acid grassland, lowland heath and traditional orchard, all of which are protected as priority habitats under s. 41 of the NERC Act (2006). Much of this area is also covered under a number of Ancient Woodland and Local Wildlife Site designations, as well as forming part of the High Weald Biodiversity Opportunity Area.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Kent Wildlife Trust
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy TP 6 Safeguarding Roads

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On the basis that KWTs comments on the pre-submission Local Plan are relatively brief and broad I hope you will accept these via email as opposed to using the consultation portal.

It is noted that the supporting text for 'TP6 safeguarded route for Colts Hill by-pass' states that this off-line route is not required to support growth brought forwards by the Plan. However, it is noted that the offline scheme continues to be prioritised by KCC and will therefore continue to be safeguarded by the Plan. On this basis our previous comments regarding the destruction of habitats protected as priority habitats under S.41 of the NERC Act (2006) still stand. Whilst we are not making a formal objection to these proposals at this stage, but reserve the right to do so pending further details, we are of the opinion that 'Option 1 – KCC bypass' would not meet the test of "wholly exceptional reasons" for destroying ancient woodland as set out the NPPF and in policy EN13 of the Draft Local Plan. We continue to be concerned about potential impacts to traditional orchard priority habitat located along the A228 which is not scoped into the assessment of environmental impacts of the three options. A plan which promotes schemes causing the loss of traditional orchard habitat would not be in accordance with paragraph 174b of the NPPF which states that "*plans should promote the conservation, restoration and enhancement of priority habitats*". Without this information it is difficult to fully establish the environmental impacts of Options 2 and 3 and their impacts on wildlife receptors specified within paragraph 174 of the NPPF.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 7 Hawkhurst Station Business Park

Proposals Map 49

[TWBC: This representation has been put against Policies ED 1 and AL/HA7 - see Comment Numbers PSLP_337 and PSLP_352]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following wording is contained in the email sent submitting the representations dated 21 May 2021]:

Please find attached submissions and supporting documentation to the Pre Submission Local Plan, made on behalf of Kent Woodware Ltd, which Company owns and operates the Hawkhurst Station Business Park, and owns the land to the south of the Business Park, and March's Field to the north of the Business Park.

The representations comprise the following;

- 1 **Support**; for the proposal in **Policy AL/HA7** for the proposed allocation of land to the south of the Station Business Park for employment uses (E/B2/B8).
- 1 **An Objection**; to the limited extent of the Proposed Employment Area under the terms of **Key Employment Area Policy ED1**, as shown on Inset Map 16; Gills Green and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, which we consider to be not justified. This designation for employment use should be **extended** to incorporate all the land shown on Inset Map 16 and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, and shown as blue for employment land, and as proposed previously under the terms of Regulation 18 Draft Local Plan Policy AL/HA8 and Policy ED1, and in respect of land shown on the attached site location plan.
- 1 **An objection**; to the area shown in green as an *'open space and landscape buffer'* on Inset Map 16; Gills Green and Map 49 Site Layout Plan, along with the requirement for a *'landscape buffer'* on Policy AL/HA7 (5), which we consider is not justified, and should be deleted.

This submission is supported by the following documentation;

- 1 A completed Representation Form.
- 2 Broadlands Planning Ltd supporting letter.
- 3 Red lined Site Location Plan 07-PR-004.
- 4 Broadlands Planning Ltd supporting Planning Statement setting out full representations.
- 5 Lloyd Bore Ltd; Landscape and Ecology prepared a Landscape and Visual Appraisal

The Inspector is requested to;

- 1 **Retain Policy AL/HA7** for the application of the **red lined site Allocation Boundary** area south of Station Business Park for employment uses (E/B2/B8), with **requirements for a Landscape and Visual Impact Assessment and Landscape Management Scheme**.
- 2 **Extend the Proposed Employment Area under the terms of Policy ED1 as shown on Inset Map 16; Gills Green and Proposals Map 49** to incorporate all of the land shown as red lined as Allocation Boundary, and to be **shown blue for Employment Use**.
- 3 **Remove the area shown in green as an *'open space and landscape buffer'* on Inset Map 16; Gills Green and Map 49 Site Layout Plan.**
- 4 **Delete the reference in Draft Policy AL/HA7 (5) for.. *a landscape buffer to be provided within the southern area of the site.***

I trust the above are in order.

However, if you have any queries or require any further information please do not hesitate to contact me.

INTRODUCTION

- 1 This submission and representations are made on behalf write on behalf of Kent Woodware Ltd, which Company owns and operates the Hawkhurst Station Business Park, and owns the land to the south of the Business Park, and March's Field to the north of the Business Park, as shown on the site location plan attached to these representations.

SUMMARY OF REPRESENTATIONS

- 1 The representations comprise the following;
 - a. **Support**; for the proposal in **Policy AL/HA7** for the proposed allocation of land to the south of the Station Business Park for employment uses (E/B2/B8).
 - b. **Objection**; to the limited extent of the Proposed Employment Area under the terms of **Key Employment Area Policy ED1**, as shown on Inset Map 16; Gills Green and Allocation Plan Map 49

Site Layout Plan. This designation for employment use should be **extended** to incorporate all the land shown on Inset Map 16 and the red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, and shown as blue for employment land, and as proposed previously under the terms of Regulation 18 Draft Local Plan Policy AL/HA8 and Policy ED1 as shown below.

c. An objection; to the area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan, which should be deleted, along with the requirement for a 'landscape buffer' on Policy AL/HA7 (5).

1 The relevant plans are shown below.

2019 Regulation 18 Consultation Draft Local Plan Allocation Site AL/HA8 and Inset Map 15 showing ED1 boundary [TWBC: For maps see full Planning Statement attached as a supporting document]

2021 Pre Submission Local Plan inset Map 16; Gills Green extract Policies AL/HA7 and ED1 and Pre Submission Map 49 Site Layout Plan [TWBC: For maps see full Planning Statement attached as a supporting document]

1 The considerations in support of the above representations are set out below.

THE HISTORY OF THE DEVELOPMENT HAWKHURST STATION BUSINESS PARK

- 1 Hawkhurst Station Business Park is recognised as a successful and busy Business Park, which is occupied by a range of companies in the production and distribution of building and trade materials, and food.
- 1 Prior to the development of the business park on the former railway station land, the site was occupied by The Kent Woodware Company Ltd from 1911, which subsequently expanded to take in the railway land to the south on the closure of the Hawkhurst branch line in 1963, and by the purchase in the mid 1980's from an adjacent area of former pasture land from Mr John Santer.
- 1 The Kent Woodware Company manufactured wooden components for the brush and furniture trades. However, in time cheap imports from Eastern Europe and the Far East led to the decline of and closure of the wood turning business.
- 1 The following aerial photographs shows Kent Woodware in operation viewed from the southwest, with open pasture land to the south, and viewed from the north, showing extent of works and storage areas, with stacked timbers, and former Santer's land with timber storage runs and access drives.

[TWBC: For extract images see full Planning Statement attached as a supporting document]

- 1 Development of the present Business Park commenced in 1989 with the construction of a warehouse unit fronting the A229 Cranbrook Road. Further development took place in 1998 with the construction of a cold store, in 2006 an additional cold store in 2006, two warehouse units in 2007 and 2011/12, three further warehouse units in 2011 and 2012, and in 2015/16 a production unit on the final area of developable land.
- 1 Together with three existing buildings on the site, the total floor area provided at Hawkhurst Station Business Park is some 7600 square metres floorspace occupied by a mix of users; by Raven Roofing, Hurstway Construction, Nortrade (Seafoods), Howden Joinery, Rhokett Foods, Maws Fine Foods, and Kent Woodware Ltd.

THE DEVELOPMENT PLAN

Tunbridge Wells Borough Council's Call for Sites 2016

- 1 In support of a submission in **2016** to the **Tunbridge Wells Borough Council's Call for Sites, in respect of the potential for development for employment purposes of the land south of Hawkhurst Station Business Park**, we advised that;

In total, the Companies within the Business Park currently employ 131 personnel, plus seasonal workers, of which 14.5% live within 5 miles travel to work, 45.8% between 5 and 10 miles and 39.7% over 10 miles.

Of the companies at Hawkhurst Station Business Park, four have indicated that they will be looking to employ additional staff within the next two years and two anticipate that they will have a requirement to take additional space or relocate to larger premises and due to the location of the business park, its good access and road network and the quality of the units, their preference would be to remain on the Hawkhurst Station Business Park.

It can be seen that the Hawkhurst Station Business Park is a successful enterprise, that accommodates the needs of a range of production and warehousing companies, which operate successfully, in modern

purpose built accommodation with good access and servicing arrangements, provide much locally based employment, and have a stated need to expand their premises here, but cannot at present as no land for expansion is available.

Lloyd Bore Ltd; Landscape and Ecology; Landscape and Visual Appraisal 2016

1 We advise that, for the purposes of support to the submission made on behalf of Kent Woodware Ltd to the Council's 2016 Call for Sites **Lloyd Bore Ltd; Landscape and Ecology prepared a Landscape and Visual Appraisal**, to assess the susceptibility of the landscape surrounding the site and the Area of Natural Beauty to harm from the development of the site. This Appraisal is attached to this submission.

1 This Appraisal concluded as follows;

NATURE OF POTENTIAL EFFECTS

Visual Amenity

6.1 *The assessment concludes that the site has very limited scope to cause changes to general visual amenity, as the site is visually contained, with the longest views available from one direction only (westerly).*

6.2 *There is the potential for some limited local scale adverse impacts, but these are limited to two private residential properties located close to the site, to the south and east.*

6.3 *Overall the visual landscape is assessed to have a **Low** susceptibility to the proposed development. The development would be visible from a restricted, localised area within 500m of the site and typically only from locations where development is already an existing feature of the view, or is within the vicinity of the view origin. The proposed development would share characteristics with existing development nearby.*

6.4 *Publicly accessible views of the site would be gained from a short section of Slip Mill Road immediately to the west of the site. From here, the new development would be partially visible, appearing through and above existing and proposed vegetation, to the western boundary of the site.*

6.5 *There would be no adverse impact upon views from any of the public rights of way within the study area.*

6.6 *Views from one public right of way have been identified to the west of the site. These are gained from public footpath WC132 within 500m of the site.*

6.7 *From this public footpath the extent of new development visible would be either so small and / or viewed from such a distance that it would form only minor background within part of the view and would have no significant impact upon their composition, nature or quality. The introduction of the proposed development would have no adverse effect on the amenity value of views from these locations.*

6.8 *The proposed development does have the potential to cause minor adverse impacts upon views from two residential properties located adjacent to and overlooking the site from the south and east. These impacts would be partly due to the nature of the development (industrial in character), and the impact this has on the views currently experienced from the properties.*

6.9 *The development itself would not be uncharacteristic of the surrounding industrial character generated by the adjacent business park.*

6.10 *These adverse impacts should be considered temporary in nature, being experienced only by current occupiers. Future occupiers with no prior knowledge of existing views would not experience adverse impacts, or deem the site uncharacteristic of its setting and surroundings.*

6.11 *The proposed layout plan includes specific measures to minimise visual impacts experienced by these properties, as primary mitigation. This includes:*

Retention and reinforcement of existing vegetation along the eastern, southern and western boundaries to ensure screening of the new buildings.

Where feasible, proposed buildings would be orientated with short elevations facing public views, and the layout should be designed so that buildings screen buildings.

The colours of the proposed buildings would be chosen to ensure they recede into the view.

The height of the development would be limited to ensure it does not exceed the height of existing buildings within the business park.

Any changes in ground level can be gauged to minimise as far as is reasonable visual impact on adjacent properties.

Landscape Resource

6.12 The likely impacts and effects that may arise from the proposed development relate to a change in land use and vegetation cover, with an increase in built development.

6.13 The proposed development would not be uncharacteristic of its setting and would not be of a scale, massing, location or nature that would result in any notable impacts upon the landscape resources that combine to create the prevailing landscape character at a local, or regional scale.

6.14 Although the development would fundamentally change the appearance of the site, this would not cause a significant change in terms of landscape character. This is largely due to the fact that the site location is equally influenced by the adjacent developed landscape as the undeveloped rural landscape. The site occupies part of the urban / rural fringe rather than being part of the wider agricultural landscape.

ABILITY TO ACCOMMODATE DEVELOPMENT

Visual Resource

6.15 It is assessed that the site, its immediate surroundings and the wider landscape has the capacity to accommodate the proposed development.

6.16 The site is visually contained and would be seen from a small number of publicly accessible locations. From these locations it has been assessed that the development would have no significant effect upon the general visual character of the wider landscape.

6.17 Adverse impacts would affect only a small number of private residential properties immediately adjacent to the site boundary, as a result of a partial loss of views towards and through the site. These effects would be experienced by the current occupiers of the properties only, and would not affect future occupants or the wider population.

6.18 The development would not result in the loss of any significant cultural or historically important views. Future owners of the affected properties are unlikely to consider the proposed development as uncharacteristic of the setting.

Landscape Resource

6.19 It is concluded that the site, its immediate surroundings and its wider landscape context has the capacity to accommodate the development without experiencing adverse impacts upon key landscape resources or overall landscape character.

6.20 The development would not result in the loss of, or damage to, key landscape resources or features and would not introduce uncharacteristic or detracting features into the landscape.

Adopted Site Allocations Local Plan 2016

1 The Borough Councils **Adopted Site Allocations Local Plan 2016** confirmed as follows;
Gill's Green

7.15 Currently, an area of around two hectares at Gill's Green is identified in the 2006 Local Plan, under Policy ED4, for economic development uses. This Policy states that the site is suitable for business (B1), general industrial (B2) or storage or distribution (B8) uses, subject to development causing no significant harm to the amenities or character of the area. The Policy seeks to improve highways, bus and pedestrian access to the site and ensure a high quality of development with substantial screening in the form of hedgerow and tree planting.

7.16 Gill's Green is identified in Core Policy 7: Employment Provision as one of the Borough's Key Employment Areas, where the retention of existing floorspace and intensification or redevelopment for employment uses will be encouraged. The Policy adds that, if more employment land is required, it will be directed to the broad location of, or extensions to, the Key Employment Areas defined in the Policy.

2016 Sevenoaks and Tunbridge Wells Economic Needs Study

1 The **2016 Sevenoaks and Tunbridge Wells Economic Needs Study** advised as follows;

Land at the former Hawkhurst Railway Station, Gills Green Key Employment Area

9.35 The Gill Green KEA is characterised by a mix of B2 and B8 uses. Existing occupiers include Howdens, Nortrade Seafood Specialist and Raven Roofing Supplies. The buildings on site are of steel frame construction and good quality. There is also evidence of new single storey buildings being constructed to provide additional accommodation.

9.36 The KEA is accessed from the A229 and is highly visible. There are bus stops at c.60m and 150m to the south of the site. However, the area is around 18 miles from the M25 therefore connections to the strategic motorway network are somewhat limited. Notwithstanding this, the site is well occupied and there is also evidence of recent take up, with the construction of a new unit to the west of the site being pre let.

9.37 Colliers' view is that this is a good rural employment site. It is considered there is potential to extend the site to the south west to accommodate further B2 and B8 uses. Although not currently allocated, it is understood a further c.3 acres of land is potentially available to facilitate this expansion and there is potential demand from existing occupiers.

9.38 It should be noted, however, that any future development would need to be sensitive to the landscape character of the area and compatible with the residential properties which would border the potential expansion site; for example a buffer zone would most likely be required to screen any potential development. This area, and possible allocation, would also need to be tested through the Local Plan process.

Regulation 18 Tunbridge Borough Council Draft Local Plan 2019

1 In response to the **Regulation 18 Borough Council's Draft Local Plan of 2019** Kent Woodware **supported** the proposed allocation of the land for employment uses (B1, B2, B8) under the terms of Policy AL/HA 8; Hawkhurst Station Business Park (SHELAA reference: Site 102); and the proposed extension of The Key Employment Area under Policy ED1, the boundaries for which are shown on Inset Map 15; Gills Green and Site Layout Map 68 below. The latter ED1 boundary overlapped with the proposed allocation area for land to the south under Draft Policy HA9.

[TWBC: For maps see full Planning Statement attached as a supporting document]

- 1 These Draft Local Plan proposals were somewhat complicated in that;
 - . The proposed extension to the Station Business Park under Policy ED1 incorporated land belonging to Kent Woodware as shown in the red lined allocation Site Layout Map 68 above.
 - . However, the proposed employment area on land to the south, in separate ownership, was also proposed for development under the terms of Policy AL/HA9, as shown on the Map 69, the Allocation Plan below, with access through the Hawkhurst Station Business Park.

[TWBC: For map see full Planning Statement attached as a supporting document]

1 Policy AL/HA9 and Map 68 show the proposed development as comprising;
Northern part of site (north of the buffer) as defined on the allocation plan: employment uses B1/B2/B8 uses;

Southern part of site (south of the buffer) as defined on the allocation plan: residential development (C3) providing approximately 38 dwellings;

A landscape buffer to be provided between the two separate areas of development as defined on the allocation plan.

- 1 Policy AL/HA 8 incorporated 2 requirements for a landscape and visual impact assessment and a landscape management scheme, to ensure that development would not harm materially the character and appearance of the surroundings of the site and the Area of Outstanding Natural Beauty, or any residential neighbours, as set out below;

5. A landscape and visual impact assessment that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (see Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21).

8. Provision of a landscape management scheme to ensure any impact of development upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN 1: Design and other development management criteria).

- 1 Policy HA9 also required;

6. A landscape and visual impact assessment that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (See Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21);

8. Layout of development should take account of AONB components (see Policy EN 21: High Weald Area of Outstanding Natural Beauty (AONB));

9. Provision of a landscape management scheme to ensure any impact of development upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21);

1 The **Regulation 19 Pre Submission Local Plan has deleted Regulation 18 Draft Local Plan Policy AL/HA9.**

RECENT PRESSURE FOR ADDITIONAL COMMERCIAL FLOORSPACE

1 Over recent years there have been pressures for increased building floorspace from existing Companies within the Business Park, in particular from Maws Fine Foods which occupies Unit 7, and Rhokett which occupies units 5, 6, 8, 9, 10 and 12.

Maws Fine Foods

- 1 Maws Fine Foods, which occupies Unit 7, is a local family owned Company, established in 1989, which is one of the leading food wholesale and distributors of catering supplies, including ambient, frozen chilled and non-food wholesale goods supplying distributing to a wide range of businesses in London and South-East England, including Michelin star restaurants, exclusive hotels, bistros, bars and cafes, their very particular day to day staple foods and goods, and sourcing speciality items. Unit 7 is a modern purpose-built warehouse, with temperature controlled and monitored and recorded chiller-units. Goods are delivered via a fleet of tracker-monitored, dual temperature-controlled vehicles to ensure timely, efficient, and optimum delivery.
- 1 Kent Woodware obtained a planning consent TW/18/1520/FULL, with subsequent discharge of planning conditions, for a new building to provide for additional floorspace for Maws Fine Food to expand its business, being the '*construction of a commercial building of 400 square metres, for B1 light industrial, B2 general industrial, and B8 storage and distribution uses, on land immediately to the south of the Hawkhurst Station Business Park, with access, parking and drainage*'. This development, as shown below, was permitted on land outside the defined limits of the current allocated employment site, in support of Maws Fine Foods' commercial needs, and being development which did not impact materially on its surroundings or the landscape of the Area of Outstanding Natural Beauty.

[TWBC: For map see full Planning Statement attached as a supporting document]

- 1 The consented development incorporates a drainage pond accommodating the run off drainage from a large part of the Business Park, which already drains onto the open land to the south, and the consented development. The open landscaped drain from the consented development will run alongside the eastern boundary of Kent Woodware's land to an open attenuated drainage pond on its southern boundary.
- 1 This development now has the benefit of a Lawful Development Certificate (Existing): Development involving the digging of a trench and the construction of a sub-surface French drain as part of the implementation of planning application TW/18/01520/FULL prior to its expiry, under reference TW/20/03242/LDCEX.

Rhokett.

- 1 Rhokett are a locally based Company, established in 2002 with support from Michelin star Chef Gary Rhodes, OBE. Rhokett produces a range of exceptional high standard hand finished luxury desserts that include its iconic cheesecakes, tarts, mousses, cakes and many more, supplied to a range of clients, including supermarkets, airlines and 5 star hotels. Rhokett, with its original high grade production units still located at Courtlands Farm, Turnden Road, Cranbrook, also occupy buildings at the Hawkhurst Station Business Park, being building units 5, 6, 8, 9, 10, and 12, being for production, material storage, packing accommodation, waste treatment and production offices. Rhokett employs circa 200 staff.
- 1 In order to meet its pressing need for additional cold and pallet storage space, without recourse to a major planning application, Rhokett has obtained the following temporary 5 year consents;

- . TW/20/00355; consent (retrospective) for the siting of 8 mobile cold store units and a car park with 35 spaces on the open land to the south to replace the spaces lost on site. The rectangular refrigeration units are sited within the curtilages of 5/6, 10, and 12.
- . TW/20/03472; consent (retrospective) for the siting of 3 x 9 x 9 metres single storey temporary marquees for bad weather pallet storage, for 5 years during the months of September to December inclusive, and parking on the open land to the south. The marquees, shown in blue below, are sited within the curtilages of units 5 and 10.
- 1 Both consents reduce the area for onsite parking within the premises, which shortfalls are balanced by the construction of a temporary 35 space car park on land to the south, as shown on the consented scheme below.

[TWBC: For map see full Planning Statement attached as a supporting document]

30. However, this temporary car park runs over the site of the development of a new commercial building consented under TW/18/01520/FULL and Lawful Development (Existing) Certificate and TW/20/03242/LDCEX. The latter Certificate was granted on the basis that any above ground development would require the car park to be removed, with consequent implications for the loss of replacement car parking for Rhokett under the terms of planning consents TW/20/00355 and TW/20/03472 set out above.

31. The effect of this is to either impede the final construction and occupation of the 'implemented' new building, or to remove this temporary car park. The latter will require Rhokett to either remove its temporary consented freezer units and marquees and to reinstate on site car parking, or prepare and submit another planning application for a temporary car park on adjacent land to allow the retention of the freezer units and marquees. The overlap is shown on the drawing below.

[TWBC: For map see full Planning Statement attached as a supporting document]

BREXIT AND COVID-19 PANDEMIC RESTRICTIONS

- 1 Kent Woodware and its Planning and Commercial Agents have discussed the expansion requirements with the above Companies and others both on and off the Station Business park.
- 1 Whilst the impact of Brexit and Covid-19 restrictions has, understandably, been to stall the submission of planning applications to support further building construction to meet Company requirements Companies are now actively preparing for the predicted market recovery.

POTENTIAL DEVELOPMENT TO MEET COMPANY REQUIREMENTS

- 1 The latest discussions with Companies on their requirements for expansion have taken place in respect of the prospects of development on the land and the area proposed to be allocated under the terms of **Regulation 18 Borough Council's Draft Local plan of 2019 Policy AL/HA 8 for employment uses (B1, B2, B8), the red lined allocation boundary for which is shown on Map 68 above.**

Draft sketch scheme for site development

- 1 We have prepared a sketch scheme for development which would, in the view of Kent Woodware, meet a good measure of Company requirements for additional floorspace, on this area of land, as shown below.

[TWBC: For map see full Planning Statement attached as a supporting document]

- 1 This scheme shows;
 - . A range of commercial buildings capable of accommodating Use Class E, B2 and B8 occupiers.
 - . Access taken from the implemented scheme under TW/18/01520/FULL and Lawful Development (Existing) Certificate and TW/20/03242/LDCEX, into a pair of service yards and parking areas, for a run of buildings parallel to Slip Mill Road but set back with a wide intervening and significantly enhanced landscape screen. Building heights can be determined as part of a Landscape Visual Assessment.
 - . A significant setback of new building from the boundaries with Station Cottages to the north-west, being some 24 metres to their boundary fencing and 41 metres to the flank wall of the terrace. The intervening land is mounded and would be suitably landscaped.
 - . Enhanced planting to the site boundary and the building line with Slip Mill Lane of up to 19 metres depth.
 - . An enhanced landscaped boundary to the east, running alongside the car park, which accommodates the drainage run to the southern attenuation lagoon, some 11-15 metres wide, with a detailed scheme to realise the ecological potential of the drain and supplemented native planting.

- . A significant open strip of land along the southern boundary of some 32-41 metres, accommodating the landscaped site drainage lagoon.
- 1 This initial sketch scheme illustrates the manner in which this area of land has the potential to meet a good measure of local business needs for additional commercial floorspace in a manner that meets technical design requirements and highways standards, and with significant landscaping to mitigate any potential impact on its immediate surroundings and the Area of Outstanding Natural Beauty, in accordance with the terms of Draft Local Plan Policy AL/HA8.

HANKINSON DUCKETT ASSOCIATES SITE VISUAL IMPACT ASSESSMENT

- 1 The **Tunbridge Wells Borough Council Economic Development Topic Paper of March 2021** confirms the reasoning behind the reduction in the area proposed for development within the allocated area in new Policy AL/HA7, as follows.

4.32 The Gill's Green Key Employment Area lies to the north of Hawkhurst on Cranbrook Road and serves this rural part of the borough. This area has been popular for businesses to locate and expand and therefore an area of undeveloped land is identified and allocated under Policy AL/HA7, to the south of the existing KEA for further employment generating uses within use class E/B2 and B8.

*4.32 This area differs somewhat from the Draft Local Plan which sought to allocate a larger area to the south of the existing KEA; however, **following the outcomes of further landscape assessment work, this area has been reduced to the site now proposed in the Local Plan.***

- 1 The **'further landscape assessment work'** is found in the **Document Tunbridge Wells-Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB** of November 2020 prepared by Hankinson Duckett Associates, Section 6.7: Hawkhurst.
- 1 HAD, on behalf of Tunbridge Wells Borough Council, have carried out a **Landscape Visual Assessment of the proposed Draft Allocations within the High Weald Area of Outstanding Natural Beauty proposed in the Regulation 18 Draft Local Plan.**
- 1 This included Draft Policy AL/HA 8 outlined above, along with a simple red lined allocation boundary, and written policy requirements for a landscape and visual impact assessment (5) and landscape management scheme (8) with references to other policies in respect of design, development management and landscape.
- 1 HAD considered that;
 - a. The site is a disturbed, degraded, unkempt, neglected and unkempt field 'in pasture', with scattered piles of rubble and a shipping container forming detracting features within the site. It and has few characteristic features and is heavily influenced by the industrial estate to the north.
 - b. The site is generally well contained from the surrounding landscape, being enclosed by mature vegetation including tree belts and hedgerows, where the incongruous landscape features are less noticeable. Landscape features are associated with field boundaries and are generally intact. There are opportunities to replace some features with more characteristic boundary treatments.
 - c. Views of the site are limited to receptors adjacent to the site boundary and long distance glimpsed views from the high ground to the north-west, west and south-west. There are infrequent glimpsed winter views of the site through the boundary vegetation on Slip Mill Lane, adjacent to the western site boundary. The site boundary trees are visible within the views, which screen the ground within the site. There are glimpsed views into the site from nearby residential properties, though seen in the context of the existing industrial estate.
 - d. Visual receptors (public views) to be considered (ordered from higher to lower sensitivity) include; walkers on the footpath to the north-west of the site, walkers and motorists using Slip Mill Road, and people at the south-western edge of the industrial estate, to the north of the site.
 - e. The site is relatively simple, but lacks coherence. This is largely due to the variety of boundary features, some of which are characteristic of the local landscape, while others are less typical.

43. HAD's Assessment concludes as follows;

The site consists of a disturbed and unkempt field in pasture, which is heavily influenced by the industrial estate to the north. The site is enclosed by mature vegetation including tree belts and hedgerows, some of which comprise native species, while others are less typical of the local landscape. A Leylandii hedge on a bund forms the north-western boundary, which forms an anomaly in the character of the adjacent Slip Mill Lane, which is mapped as a historic routeway. The site is well contained from the

wider landscape, however the introduction of tall buildings within the site is likely to change this assessment of visibility.

The site is a relatively small part of the assessment area considered by LUC within the sensitivity study. The whole area was assessed as having a high sensitivity, as it is representative of the AONB landscape. The more developed areas at Gills Green were noted as being less sensitive to change.

Any development should be designed to minimise visibility and subsequently the effects of the development on the wider AONB. **Providing that existing structural landscape features within the site and at the site boundaries can be retained and enhanced with new planting, it would be possible to include sensitively designed development within the site, without causing significant adverse effects on the character and appearance of the AONB. The suitability of the site for development is largely dependent on the employment need and the detailed design of the proposals.**

The site is degraded, has few characteristic features and would benefit from landscape improvements and long-term management. Key landscape features within the site could be retained and there is sufficient space within the proposed open space to the south and west of the site, to introduce characteristic new features, which could contribute to the screening of the site. The proposed pedestrian and cycle link to Gill's Green would provide some recreational benefits.

Hawkhurst has a made Neighbourhood Plan and policies within this should be considered as part of any development of the site.

By following the proposed GI strategy and policy measures outlined above, it would be possible to mitigate for development within the site and provide some on-site enhancements that would contribute positively to the character and appreciation of the AONB.

Policy recommendations for the Regulation 19 version of the Draft Local Plan include:

Photomontages to be provided from a selected number of key viewpoints as part of the prescribed LVIA.

Include wording to protect boundary features within the site.

THE BASIS FOR THE OBJECTION

- 1 The basis for the objection to proposed Policy AL/HA7, Inset Map 16; Gills Green, and Proposals Layout Map 49 shown above lies in the **extent of the proposed area of green open space alongside the southern boundary of the site, which limits the potential for the site to accommodate clear and expressed local business requirements for development land on which to meet their needs for buildings, with a consequent failure to incorporate all the Kent Woodware land within the Key Employment Area Policy ED1.**

45. Kent Woodware accepts the reasonable requirements for site development to retain and enhance existing structural and boundary landscaping.

46. Such requirements could have been met under the terms of Parts 5 and 8 of Regulation 18 Consultation Draft Policy AL/HA8 which were drafted as follows;

5. A landscape and visual impact assessment that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (see Policy EN1: Design and other development management criteria and Landscape Policies EN21 and EN21).

8. Provision of a landscape management scheme to ensure any impact upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN1: Design and other rural management criteria).

47. This can and should be achieved now by the application of Proposed Pre Submission Policy AL/HA8 requirements;

For a Landscape and Visual Impact Assessment and Landscape Management Scheme supplemental as set out under part 3 of the Policy.

For a detailed landscape submission and management scheme under the terms part 5 the Policy, with updated cross references to relevant Pre Submission Draft Local Plan Policies (now such as EN1: Sustainable design, EN12: Trees, woodland, hedges and development, EN16: Landscape within the

built development, EN18: Rural landscape, and EN19: The High Weald Area of Outstanding Natural Beauty).

Within the terms of and negotiated by way of a detailed planning application to accord with the above.

48. Kent Woodware cannot accept the impact of the extensive area of 0.677 hectares of proposed open space in Policy AL/HA7 and Shown on Inset Map 16; Gills Green and Policy Map 49, which amounts to 33% of the proposed red lined allocation land.

49. Accordingly, the terms.. A landscape buffer to be provided within the southern part of the site... should be deleted from Pre Submission Draft Policy AL/HA7(5).

50. The prescription for a landscaped open space and buffer zone within the southern edge of the Policy AL/HA7 land arises from the terms of the HAD's Visual Impact Assessment, which assessed the terms of previous Regulation 18 Draft Policy AL/HA8 with its more expensive proposed extension of the Business Park to the south, and draft Policy AL/HA9 alongside to the south with its 'landscaped buffer zone' to buffer the extended employment land and a residential allocation. Consequently, it then recommended the adjusted Proposals Map below, shows existing Green Infrastructure retained, proposed open space, landscape buffer and landscape feature protection, but on the basis of a smaller extension to the Business Park and extension of employment land or residential allocation to the south.

[TWBC: For map see full Planning Statement attached as a supporting document]

1 There is **no substantive or justified reasoning** for this large area of proposed open space within the Kent Woodware land, which takes up **33% of the red lined proposed allocation land**, which we consider to be **arbitrary, unjustified and excessive**.

1 HAD comment, on Regulation 18 Draft Local Plan Policy AL/HA8, that;

There is no proposed open space requirement within the allocation plan and no requirement for feature retention within the draft policy. There is the potential that this would result in the loss of boundary features, which could have significant adverse effects on landscape character.

The effects on recreation within the site may be positive and are unlikely to be negative.

Landscape and recreational opportunities:

Provision of open space to the west and south of the site allows existing boundary features to be retained and enhanced with new planting. The provision of open space to the south would maintain the separation between the industrial estate and the residential part of Gill's Green. There are opportunities to create new and complementary habitats within the open space. The draft policy anticipates a north-south link through the site, which will improve pedestrian and cycle connectivity with Gill's Green.

The inclusion of the eastern and southern parts of the site within open space would protect existing landscape features and would limit the potential for new development to affect the character of the wider rural landscape.

The open space has the potential to include the enhancement of existing features and new complementary habitats, which could link existing habitats within and around the site. The space would maintain the rural edge to the site and the retention of existing trees and woodland would filter and screen views of the proposed development.

The inclusion of an appropriate new landscape buffer to the western site boundary would assist in protecting the significance of adjacent heritage assets.

The proposed allocation would be consistent with the existing settlement pattern to the south of Hawkhurst.

It would provide opportunities to create new recreational routes and facilities for existing and new residents.

The introduction of a long term management plan for the site would maintain the quality and condition of the AONB landscape within the site.

These measures would reduce predicted effects on internal landscape features, local views and the character of the site and wider landscape.

1 We consider that there is a distinction between the terms of 'open space' and landscaping as used by HAD in their considerations and advice.

1 We consider that;

a. With the removal now of the previously proposed extension to the Station Business Park in Draft Policy AK/HA8 beyond the Kent Woodware land, the previously draft proposed allocation of residential land north of Gills Green, and the proposed landscaped buffer between the two land uses, there appears to be no material need for a for 'landscaped buffer' to separate Gills Green from a Business Park extension, in view of the extensive area of retained and protected open land at this edge of the settlement.

b. Under the changed circumstances, this proposed open space to the south of the allocated land is not justified as there will be more than adequate retained open separation between an extended industrial estate and the residential part of Gill's Green, and a suitably landscaped southern boundary within any new development will screen any potential visual impact.

c. There cannot and will not be public open space, recreation, or pedestrian or cycle links into or through this privately owned land which will be an extension to the Station Business Park. Station Business Park is a private commercial enterprise, with no general public rights of way. It is occupied by busy commercial operators, and serviced by large commercial vehicles, including large articulated and refrigerated lorries and trucks, delivery vans, fork lift trucks, staff and visitor parking. This restriction of public access is applied in the interests of the health and safety, and highways safety, of staff and visitors. Such restrictions must apply to any built extension.

d. Proposed Pre Submission Policy AL/HA7 does not propose a north-south link through the site to improve pedestrian and cycle connectivity with Gill's Green, as shown in Draft Policy AL/HA8, as the Draft Local Plan proposed a further extension to the Business Park on its immediate southern boundary served by an access through the Business Park, with an open space beyond leading to a residential allocation north of Gills Green, which are not carried into the Pre-Submission Plan. The land proposed under AL/HA7 now backs onto an open field with a hedgerow boundary.

e. There is no need for such an extensive designated public open space or recreation within the new development. There is no need for an open space for staff, and any such space would not be open to the general public. It is also not needed to maintain the separation between the industrial estate and the residential part of Gill's Green, as claimed by HAD above, as there is sufficient open distance between these 2 parts on the north and western boundary of Gills Green in the open fields to the south of this land.

f. Open landscaped space can be accommodated within the development. The sketch scheme described above shows an area of land on the southern boundary of the site which would need to accommodate the attenuated drainage lagoon for a large part of the Business park and any extension, up to 41 metres depth, which would be landscaped and used as casual open space by staff working alongside, which will be a material and acceptable enhancement to the proposed development.

g. The need for substantive landscaping on this land, as a screen to the development and to maintain characteristic boundary features and the enhancement of the site with characteristic wildlife boundary planting, and naturalistic surface water features and drainage systems and storage on the eastern and southern boundaries, can be secured by way of ;

additions to Proposed Policy AL/HA7 (5) in draft Policy AL/HA7 outlined above.

the application of Policies EN1; Sustainable design, character, site context, landscape, trees and amenity, biodiversity and geodiversity, EN12; Trees, woodland, hedges and development), EN18; Rural landscape), EN19 :The High Weald Area of Outstanding Natural Beauty in the formulation of a detailed development scheme, with full assessments, documentation, and justification in a planning application submitted for determination by the Local Planning Authority in the light of planning policy and Supplemental Guidance.

CONCLUSIONS

- 1 Kent Woodware Ltd supports the proposed allocation of its open land south of the Station Business Park for employment uses in proposed Local Plan Policy AL/HA7, and as shown within the proposed red lined area on the Proposals Maps.
- 2 This Policy, in principle, follows the success of Station Business Park since its formal designation as an employment area in 2006, and the benefits it brings for business and employment in the eastern rural part of Tunbridge Wells Borough.
- 1 The proposed allocation for an extension to the Business Park follows successive advice since 2006 in the Council's Call For Sites, its Development Plan formulations in its Adopted Allocations

- Local Plan 2016, its 2016 Economic Needs Study, and the proposed allocation under AL/HA8 in its Regulation 18 Consultation Draft Local Plan which Kent Woodware supported.
- 1 The Council has since supported Kent Woodware in obtaining planning consent, now implemented, for a new building to serve the existing needs or an adjacent Business, on the open land within the proposed new allocation and without material harm to its surroundings, its wider neighbours, or the surrounding landscape.
 - 1 It is clear to Kent Woodware and its closely advising commercial and planning Agents that there are a clear and pressing needs of local Businesses on the Business Park, and beyond, for additional land to serve their needs for additional building floorspace which can be met on the proposed allocation land.
 - 1 Whilst Brexit and Covid 19 restrictions have stalled new developments, and the cost of formulating detailed planning applications during these times, businesses are now looking to expansion in the light of prospective economic recovery. Development on the allocated land will assist in that recovery and secure business prosperity, employment retention and creation.
 - 1 However, we are firm in our advice to the Inspector for the Local Plan Examination that the retention of the proposed area of green 'open space' shown within the proposed allocation, amounting to 33% of the red lined allocation, would act against the need of local business to expand, to meet their development needs, and local employment.
 - 1 The commissioned Landscape and Site Visual Assessments carried out by Lloyd Bore on behalf of Kent Woodware and Hankinson Duckett Associates on behalf of the Local Planning Authority essentially arrive at the same conclusions; that the proposed allocated land, as former Station and pasture land, and serving the needs of the Former Kent Woodware wood turning business for many years, is now degraded, but is essentially reasonably contained within the surrounding landscape with only limited views towards its boundary landscaping, which can be enhanced to screen the site. New development, and particularly its building heights, design, materials and colour, must be guided by the findings and recommendations of landscape and visual impact appraisals and sensitive landscape proposals. This can be achieved.
 - 1 However, we consider both the principle and extent of the green proposed open space recommended by Hankinson Duckett Associates and shown on the Proposed Allocation Maps to be arbitrary, excessive and unfounded. HAD's assessment shows no detail as to how the extent of the green open spaces has been determined.
 - 1 We consider that HSD's assessment will work against the needs of local businesses and their retention and creation of employment.
 - 1 Kent Woodware accepts the need and requirements for any new development on this land to pay the utmost regard to the retention of the existing boundary landscaping and its enhancement with characteristic wildlife boundary planting, and naturalistic surface water features and drainage systems.
 - 1 These requirements can be achieved by additions to Policy AL/HA7, set out previously as (3) and (5) in Regulation 18 Draft Policy AL/HA8 outlined above, and the application of Policies for sustainable design, character, site context, landscape, trees and amenity, biodiversity in the formulation of a detailed development scheme, with full assessments, documentation, and justification in a planning application submitted for determination by the Local Planning Authority in the light of planning policy and Supplemental Guidance.
 - 1 The Inspector is therefore requested to;
 - a. Retain Policy AL/HA7 for the application of the red lined site Allocation Boundary area south of Station Business Park for employment uses (E/B2/B8), with requirements for a Landscape and Visual Impact Assessment and Landscape Management Scheme.
 - (b) Extend the Proposed Employment Area under the terms of Policy ED1 as shown on Inset Map 16; Gills Green and Proposals Map 49 to incorporate all of the land shown as red lined as Allocation Boundary, and to be shown blue for Employment Use.
 - (c) Remove the area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan.
 - (d) Delete the reference in Draft Policy AL/HA7 (5) for.. a landscape buffer to be provided within the southern area of the site..

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Delete area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan, along with the requirement for a 'landscape buffer to be provided within the southern boundary of the site' on Policy AL/HA7 (5).

Extend Key Employment Area Policy ED1, as shown on Inset Map 16; Gills Green and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7 to cover all of red lined allocated site and to be shown as blue for employment land.

See attached full representations. [TWBC: See representations attached as supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound Yes

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Kent Woodware Ltd, as land owner, **SUPPORTS** the contingent approach to the allocation of land at March's Field, Limes Grove, for employment purposes, subject to monitoring and demonstrable evidence of the need for further employment provision, or potentially at the five- year review of the Local Plan, as set out in Policy AL/HA8; Site at Limes Grove(March's Field) and Written Statement para 5.408, and shown on Inset Map 16 [TWBC: Please see supporting documents]; Gills Green and Proposals Map 50, with the land safeguarded for employment use in the long term to serve the eastern part of the Borough.

This approach will assist Kent Woodware Ltd to continue to assist local companies to provide employment in this part of the eastern sector of Tunbridge Wells Borough.

Kent Woodware Ltd is fully aware of the need for the stated requirements for the design and layout of any development to be based on the findings of the requisite supporting appraisals, and the site's location in the Area of Natural Beauty and adjacent to Listed Buildings and an historic farmstead.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy ED 1 The Key Employment Areas

Inset Map 16

[TWBC: This representation has been put against Policies ED 1 and AL/HA7 - see Comment Numbers PSLP_337 and PSLP_352]

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC: the following wording is contained in the email sent submitting the representations dated 21 May 2021]:

Please find attached submissions and supporting documentation to the Pre Submission Local Plan, made on behalf of Kent Woodware Ltd, which Company owns and operates the Hawkhurst Station Business Park, and owns the land to the south of the Business Park, and March's Field to the north of the Business Park.

The representations comprise the following;

- 1 **Support**; for the proposal in **Policy AL/HA7** for the proposed allocation of land to the south of the Station Business Park for employment uses (E/B2/B8).
- 1 **An Objection**; to the limited extent of the Proposed Employment Area under the terms of **Key Employment Area Policy ED1**, as shown on Inset Map 16; Gills Green and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, which we consider to be not justified. This designation for employment use should be **extended** to incorporate all the land shown on Inset Map 16 and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, and shown as blue for employment land, and as proposed previously under the terms of Regulation 18 Draft Local Plan Policy AL/HA8 and Policy ED1, and in respect of land shown on the attached site location plan.
- 1 **An objection**; to the area shown in green as an '*open space and landscape buffer*' on Inset Map 16; Gills Green and Map 49 Site Layout Plan, along with the requirement for a 'landscape buffer' on Policy AL/HA7 (5), which we consider is not justified, and should be deleted.

This submission is supported by the following documentation;

- 1 A completed Representation Form.
- 2 Broadlands Planning Ltd supporting letter.
- 3 Red lined Site Location Plan 07-PR-004.
- 4 Broadlands Planning Ltd supporting Planning Statement setting out full representations.
- 5 Lloyd Bore Ltd; Landscape and Ecology prepared a Landscape and Visual Appraisal

The Inspector is requested to;

- 1 **Retain Policy AL/HA7** for the application of the **red lined site Allocation Boundary** area south of Station Business Park for employment uses (E/B2/B8), with **requirements for a Landscape and Visual Impact Assessment and Landscape Management Scheme**.
- 2 **Extend the Proposed Employment Area under the terms of Policy ED1 as shown on Inset Map 16; Gills Green and Proposals Map 49** to incorporate all of the land shown as red lined as Allocation Boundary, and to be **shown blue for Employment Use**.
- 3 **Remove the area shown in green as an '*open space and landscape buffer*'** on Inset Map 16; Gills Green and Map 49 Site Layout Plan.
- 4 **Delete the reference in Draft Policy AL/HA7 (5) for.. a landscape buffer to be provided within the southern area of the site..**

I trust the above are in order.

However, if you have any queries or require any further information please do not hesitate to contact me.

INTRODUCTION

- 1 This submission and representations are made on behalf write on behalf of Kent Woodware Ltd, which Company owns and operates the Hawkhurst Station Business Park, and owns the land to the south of the Business Park, and March's Field to the north of the Business Park, as shown on the site location plan attached to these representations.

SUMMARY OF REPRESENTATIONS

- 1 The representations comprise the following;
 - a. **Support**; for the proposal in **Policy AL/HA7** for the proposed allocation of land to the south of the Station Business Park for employment uses (E/B2/B8).
 - b. **Objection**; to the limited extent of the Proposed Employment Area under the terms of **Key Employment Area Policy ED1**, as shown on Inset Map 16; Gills Green and Allocation Plan Map 49

Site Layout Plan. This designation for employment use should be **extended** to incorporate all the land shown on Inset Map 16 and the red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7, and shown as blue for employment land, and as proposed previously under the terms of Regulation 18 Draft Local Plan Policy AL/HA8 and Policy ED1 as shown below.

c. An objection; to the area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan, which should be deleted, along with the requirement for a 'landscape buffer' on Policy AL/HA7 (5).

1 The relevant plans are shown below.

2019 Regulation 18 Consultation Draft Local Plan Allocation Site AL/HA8 and Inset Map 15 showing ED1 boundary [TWBC: For maps see full Planning Statement attached as a supporting document]

2021 Pre Submission Local Plan inset Map 16; Gills Green extract Policies AL/HA7 and ED1 and Pre Submission Map 49 Site Layout Plan [TWBC: For maps see full Planning Statement attached as a supporting document]

1 The considerations in support of the above representations are set out below.

THE HISTORY OF THE DEVELOPMENT HAWKHURST STATION BUSINESS PARK

- 1 Hawkhurst Station Business Park is recognised as a successful and busy Business Park, which is occupied by a range of companies in the production and distribution of building and trade materials, and food.
- 1 Prior to the development of the business park on the former railway station land, the site was occupied by The Kent Woodware Company Ltd from 1911, which subsequently expanded to take in the railway land to the south on the closure of the Hawkhurst branch line in 1963, and by the purchase in the mid 1980's from an adjacent area of former pasture land from Mr John Santer.
- 1 The Kent Woodware Company manufactured wooden components for the brush and furniture trades. However, in time cheap imports from Eastern Europe and the Far East led to the decline of and closure of the wood turning business.
- 1 The following aerial photographs shows Kent Woodware in operation viewed from the southwest, with open pasture land to the south, and viewed from the north, showing extent of works and storage areas, with stacked timbers, and former Santer's land with timber storage runs and access drives.

[TWBC: For extract images see full Planning Statement attached as a supporting document]

- 1 Development of the present Business Park commenced in 1989 with the construction of a warehouse unit fronting the A229 Cranbrook Road. Further development took place in 1998 with the construction of a cold store, in 2006 an additional cold store in 2006, two warehouse units in 2007 and 2011/12, three further warehouse units in 2011 and 2012, and in 2015/16 a production unit on the final area of developable land.
- 1 Together with three existing buildings on the site, the total floor area provided at Hawkhurst Station Business Park is some 7600 square metres floorspace occupied by a mix of users; by Raven Roofing, Hurstway Construction, Nortrade (Seafoods), Howden Joinery, Rhokett Foods, Maws Fine Foods, and Kent Woodware Ltd.

THE DEVELOPMENT PLAN

Tunbridge Wells Borough Council's Call for Sites 2016

- 1 In support of a submission in **2016** to the **Tunbridge Wells Borough Council's Call for Sites, in respect of the potential for development for employment purposes of the land south of Hawkhurst Station Business Park**, we advised that;

In total, the Companies within the Business Park currently employ 131 personnel, plus seasonal workers, of which 14.5% live within 5 miles travel to work, 45.8% between 5 and 10 miles and 39.7% over 10 miles.

Of the companies at Hawkhurst Station Business Park, four have indicated that they will be looking to employ additional staff within the next two years and two anticipate that they will have a requirement to take additional space or relocate to larger premises and due to the location of the business park, its good access and road network and the quality of the units, their preference would be to remain on the Hawkhurst Station Business Park.

It can be seen that the Hawkhurst Station Business Park is a successful enterprise, that accommodates the needs of a range of production and warehousing companies, which operate successfully, in modern

purpose built accommodation with good access and servicing arrangements, provide much locally based employment, and have a stated need to expand their premises here, but cannot at present as no land for expansion is available.

Lloyd Bore Ltd; Landscape and Ecology; Landscape and Visual Appraisal 2016

1 We advise that, for the purposes of support to the submission made on behalf of Kent Woodware Ltd to the Council's 2016 Call for Sites **Lloyd Bore Ltd; Landscape and Ecology prepared a Landscape and Visual Appraisal**, to assess the susceptibility of the landscape surrounding the site and the Area of Natural Beauty to harm from the development of the site. This Appraisal is attached to this submission.

1 This Appraisal concluded as follows;

NATURE OF POTENTIAL EFFECTS

Visual Amenity

6.1 *The assessment concludes that the site has very limited scope to cause changes to general visual amenity, as the site is visually contained, with the longest views available from one direction only (westerly).*

6.2 *There is the potential for some limited local scale adverse impacts, but these are limited to two private residential properties located close to the site, to the south and east.*

6.3 *Overall the visual landscape is assessed to have a **Low** susceptibility to the proposed development. The development would be visible from a restricted, localised area within 500m of the site and typically only from locations where development is already an existing feature of the view, or is within the vicinity of the view origin. The proposed development would share characteristics with existing development nearby.*

6.4 *Publicly accessible views of the site would be gained from a short section of Slip Mill Road immediately to the west of the site. From here, the new development would be partially visible, appearing through and above existing and proposed vegetation, to the western boundary of the site.*

6.5 *There would be no adverse impact upon views from any of the public rights of way within the study area.*

6.6 *Views from one public right of way have been identified to the west of the site. These are gained from public footpath WC132 within 500m of the site.*

6.7 *From this public footpath the extent of new development visible would be either so small and / or viewed from such a distance that it would form only minor background within part of the view and would have no significant impact upon their composition, nature or quality. The introduction of the proposed development would have no adverse effect on the amenity value of views from these locations.*

6.8 *The proposed development does have the potential to cause minor adverse impacts upon views from two residential properties located adjacent to and overlooking the site from the south and east. These impacts would be partly due to the nature of the development (industrial in character), and the impact this has on the views currently experienced from the properties.*

6.9 *The development itself would not be uncharacteristic of the surrounding industrial character generated by the adjacent business park.*

6.10 *These adverse impacts should be considered temporary in nature, being experienced only by current occupiers. Future occupiers with no prior knowledge of existing views would not experience adverse impacts, or deem the site uncharacteristic of its setting and surroundings.*

6.11 *The proposed layout plan includes specific measures to minimise visual impacts experienced by these properties, as primary mitigation. This includes:*

Retention and reinforcement of existing vegetation along the eastern, southern and western boundaries to ensure screening of the new buildings.

Where feasible, proposed buildings would be orientated with short elevations facing public views, and the layout should be designed so that buildings screen buildings.

The colours of the proposed buildings would be chosen to ensure they recede into the view.

The height of the development would be limited to ensure it does not exceed the height of existing buildings within the business park.

Any changes in ground level can be gauged to minimise as far as is reasonable visual impact on adjacent properties.

Landscape Resource

6.12 The likely impacts and effects that may arise from the proposed development relate to a change in land use and vegetation cover, with an increase in built development.

6.13 The proposed development would not be uncharacteristic of its setting and would not be of a scale, massing, location or nature that would result in any notable impacts upon the landscape resources that combine to create the prevailing landscape character at a local, or regional scale.

6.14 Although the development would fundamentally change the appearance of the site, this would not cause a significant change in terms of landscape character. This is largely due to the fact that the site location is equally influenced by the adjacent developed landscape as the undeveloped rural landscape. The site occupies part of the urban / rural fringe rather than being part of the wider agricultural landscape.

ABILITY TO ACCOMMODATE DEVELOPMENT

Visual Resource

6.15 It is assessed that the site, its immediate surroundings and the wider landscape has the capacity to accommodate the proposed development.

6.16 The site is visually contained and would be seen from a small number of publicly accessible locations. From these locations it has been assessed that the development would have no significant effect upon the general visual character of the wider landscape.

6.17 Adverse impacts would affect only a small number of private residential properties immediately adjacent to the site boundary, as a result of a partial loss of views towards and through the site. These effects would be experienced by the current occupiers of the properties only, and would not affect future occupants or the wider population.

6.18 The development would not result in the loss of any significant cultural or historically important views. Future owners of the affected properties are unlikely to consider the proposed development as uncharacteristic of the setting.

Landscape Resource

6.19 It is concluded that the site, its immediate surroundings and its wider landscape context has the capacity to accommodate the development without experiencing adverse impacts upon key landscape resources or overall landscape character.

6.20 The development would not result in the loss of, or damage to, key landscape resources or features and would not introduce uncharacteristic or detracting features into the landscape.

Adopted Site Allocations Local Plan 2016

1 The Borough Councils **Adopted Site Allocations Local Plan 2016** confirmed as follows;
Gill's Green

7.15 Currently, an area of around two hectares at Gill's Green is identified in the 2006 Local Plan, under Policy ED4, for economic development uses. This Policy states that the site is suitable for business (B1), general industrial (B2) or storage or distribution (B8) uses, subject to development causing no significant harm to the amenities or character of the area. The Policy seeks to improve highways, bus and pedestrian access to the site and ensure a high quality of development with substantial screening in the form of hedgerow and tree planting.

7.16 Gill's Green is identified in Core Policy 7: Employment Provision as one of the Borough's Key Employment Areas, where the retention of existing floorspace and intensification or redevelopment for employment uses will be encouraged. The Policy adds that, if more employment land is required, it will be directed to the broad location of, or extensions to, the Key Employment Areas defined in the Policy.

2016 Sevenoaks and Tunbridge Wells Economic Needs Study

1 The **2016 Sevenoaks and Tunbridge Wells Economic Needs Study** advised as follows;
Land at the former Hawkhurst Railway Station, Gills Green Key Employment Area

9.35 The Gill Green KEA is characterised by a mix of B2 and B8 uses. Existing occupiers include Howdens, Nortrade Seafood Specialist and Raven Roofing Supplies. The buildings on site are of steel frame construction and good quality. There is also evidence of new single storey buildings being constructed to provide additional accommodation.

9.36 The KEA is accessed from the A229 and is highly visible. There are bus stops at c.60m and 150m to the south of the site. However, the area is around 18 miles from the M25 therefore connections to the strategic motorway network are somewhat limited. Notwithstanding this, the site is well occupied and there is also evidence of recent take up, with the construction of a new unit to the west of the site being pre let.

9.37 Colliers' view is that this is a good rural employment site. It is considered there is potential to extend the site to the south west to accommodate further B2 and B8 uses. Although not currently allocated, it is understood a further c.3 acres of land is potentially available to facilitate this expansion and there is potential demand from existing occupiers.

9.38 It should be noted, however, that any future development would need to be sensitive to the landscape character of the area and compatible with the residential properties which would border the potential expansion site; for example a buffer zone would most likely be required to screen any potential development. This area, and possible allocation, would also need to be tested through the Local Plan process.

Regulation 18 Tunbridge Borough Council Draft Local Plan 2019

- 1 In response to the **Regulation 18 Borough Council's Draft Local Plan of 2019** Kent Woodware **supported** the proposed allocation of the land for employment uses (B1, B2, B8) under the terms of Policy AL/HA 8; Hawkhurst Station Business Park (SHELAA reference: Site 102); and the proposed extension of The Key Employment Area under Policy ED1, the boundaries for which are shown on Inset Map 15; Gills Green and Site Layout Map 68 below. The latter ED1 boundary overlapped with the proposed allocation area for land to the south under Draft Policy HA9.

[TWBC: For maps see full Planning Statement attached as a supporting document]

- 1 These Draft Local Plan proposals were somewhat complicated in that;
 - . The proposed extension to the Station Business Park under Policy ED1 incorporated land belonging to Kent Woodware as shown in the red lined allocation Site Layout Map 68 above.
 - . However, the proposed employment area on land to the south, in separate ownership, was also proposed for development under the terms of Policy AL/HA9, as shown on the Map 69, the Allocation Plan below, with access through the Hawkhurst Station Business Park.

[TWBC: For map see full Planning Statement attached as a supporting document]

- 1 Policy AL/HA9 and Map 68 show the proposed development as comprising;
Northern part of site (north of the buffer) as defined on the allocation plan: employment uses
B1/B2/B8 uses;

Southern part of site (south of the buffer) as defined on the allocation plan: residential development (C3) providing approximately 38 dwellings;

A landscape buffer to be provided between the two separate areas of development as defined on the allocation plan.

- 1 Policy AL/HA 8 incorporated 2 requirements for a landscape and visual impact assessment and a landscape management scheme, to ensure that development would not harm materially the character and appearance of the surroundings of the site and the Area of Outstanding Natural Beauty, or any residential neighbours, as set out below;
5. A **landscape and visual impact assessment** that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (see Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21).
8. Provision of a **landscape management scheme** to ensure any impact of development upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN 1: Design and other development management criteria).

- 1 Policy HA9 also required;

6. A landscape and visual impact assessment that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (See Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21);

8. Layout of development should take account of AONB components (see Policy EN 21: High Weald Area of Outstanding Natural Beauty (AONB));

9. Provision of a landscape management scheme to ensure any impact of development upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN 1: Design and other development management criteria and Landscape Policies EN 20 and EN 21);

1 The **Regulation 19 Pre Submission Local Plan has deleted Regulation 18 Draft Local Plan Policy AL/HA9.**

RECENT PRESSURE FOR ADDITIONAL COMMERCIAL FLOORSPACE

1 Over recent years there have been pressures for increased building floorspace from existing Companies within the Business Park, in particular from Maws Fine Foods which occupies Unit 7, and Rhokett which occupies units 5 6, 8, 9, 10 and 12.

Maws Fine Foods

- 1 Maws Fine Foods, which occupies Unit 7, is a local family owned Company, established in 1989, which is one of the leading food wholesale and distributors of catering supplies, including ambient, frozen chilled and non-food wholesale goods supplying distributing to a wide range of businesses in London and South-East England, including Michelin star restaurants, exclusive hotels, bistros, bars and cafes, their very particular day to day staple foods and goods, and sourcing speciality items. Unit 7 is a modern purpose-built warehouse, with temperature controlled and monitored and recorded chiller-units. Goods are delivered via a fleet of tracker-monitored, dual temperature-controlled vehicles to ensure timely, efficient, and optimum delivery.
- 1 Kent Woodware obtained a planning consent TW/18/1520/FULL, with subsequent discharge of planning conditions, for a new building to provide for additional floorspace for Maws Fine Food to expand its business, being the '*construction of a commercial building of 400 square metres, for B1 light industrial, B2 general industrial, and B8 storage and distribution uses, on land immediately to the south of the Hawkhurst Station Business Park, with access, parking and drainage*'. This development, as shown below, was permitted on land outside the defined limits of the current allocated employment site, in support of Maws Fine Foods' commercial needs, and being development which did not impact materially on its surroundings or the landscape of the Area of Outstanding Natural Beauty.

[TWBC: For map see full Planning Statement attached as a supporting document]

- 1 The consented development incorporates a drainage pond accommodating the run off drainage from a large part of the Business Park, which already drains onto the open land to the south, and the consented development. The open landscaped drain from the consented development will run alongside the eastern boundary of Kent Woodware's land to an open attenuated drainage pond on its southern boundary.
- 1 This development now has the benefit of a Lawful Development Certificate (Existing): Development involving the digging of a trench and the construction of a sub-surface French drain as part of the implementation of planning application TW/18/01520/FULL prior to its expiry, under reference TW/20/03242/LDCEX.

Rhokett.

- 1 Rhokett are a locally based Company, established in 2002 with support from Michelin star Chef Gary Rhodes, OBE. Rhokett produces a range of exceptional high standard hand finished luxury desserts that include its iconic cheesecakes, tarts, mousses, cakes and many more, supplied to a range of clients, including supermarkets, airlines and 5 star hotels. Rhokett, with its original high grade production units still located at Courtlands Farm, Turnden Road, Cranbrook, also occupy buildings at the Hawkhurst Station Business Park, being building units 5, 6, 8, 9, 10, and 12, being for production, material storage, packing accommodation, waste treatment and production offices. Rhokett employs circa 200 staff.
- 1 In order to meet its pressing need for additional cold and pallet storage space, without recourse to a major planning application, Rhokett has obtained the following temporary 5 year consents;

- . TW/20/00355; consent (retrospective) for the siting of 8 mobile cold store units and a car park with 35 spaces on the open land to the south to replace the spaces lost on site. The rectangular refrigeration units are sited within the curtilages of 5/6, 10, and 12.
- . TW/20/03472; consent (retrospective) for the siting of 3 x 9 x 9 metres single storey temporary marquees for bad weather pallet storage, for 5 years during the months of September to December inclusive, and parking on the open land to the south. The marquees, shown in blue below, are sited within the curtilages of units 5 and 10.
- 1 Both consents reduce the area for onsite parking within the premises, which shortfalls are balanced by the construction of a temporary 35 space car park on land to the south, as shown on the consented scheme below.

[TWBC: For map see full Planning Statement attached as a supporting document]

30. However, this temporary car park runs over the site of the development of a new commercial building consented under TW/18/01520/FULL and Lawful Development (Existing) Certificate and TW/20/03242/LDCEX. The latter Certificate was granted on the basis that any above ground development would require the car park to be removed, with consequent implications for the loss of replacement car parking for Rhokett under the terms of planning consents TW/20/00355 and TW/20/03472 set out above.

31. The effect of this is to either impede the final construction and occupation of the 'implemented' new building, or to remove this temporary car park. The latter will require Rhokett to either remove its temporary consented freezer units and marquees and to reinstate on site car parking, or prepare and submit another planning application for a temporary car park on adjacent land to allow the retention of the freezer units and marquees. The overlap is shown on the drawing below.

[TWBC: For map see full Planning Statement attached as a supporting document]

BREXIT AND COVID-19 PANDEMIC RESTRICTIONS

- 1 Kent Woodware and its Planning and Commercial Agents have discussed the expansion requirements with the above Companies and others both on and off the Station Business park.
- 1 Whilst the impact of Brexit and Covid-19 restrictions has, understandably, been to stall the submission of planning applications to support further building construction to meet Company requirements Companies are now actively preparing for the predicted market recovery.

POTENTIAL DEVELOPMENT TO MEET COMPANY REQUIREMENTS

- 1 The latest discussions with Companies on their requirements for expansion have taken place in respect of the prospects of development on the land and the area proposed to be allocated under the terms of **Regulation 18 Borough Council's Draft Local plan of 2019 Policy AL/HA 8 for employment uses (B1, B2, B8), the red lined allocation boundary for which is shown on Map 68 above.**

Draft sketch scheme for site development

- 1 We have prepared a sketch scheme for development which would, in the view of Kent Woodware, meet a good measure of Company requirements for additional floorspace, on this area of land, as shown below.

[TWBC: For map see full Planning Statement attached as a supporting document]

- 1 This scheme shows;
 - . A range of commercial buildings capable of accommodating Use Class E, B2 and B8 occupiers.
 - . Access taken from the implemented scheme under TW/18/01520/FULL and Lawful Development (Existing) Certificate and TW/20/03242/LDCEX, into a pair of service yards and parking areas, for a run of buildings parallel to Slip Mill Road but set back with a wide intervening and significantly enhanced landscape screen. Building heights can be determined as part of a Landscape Visual Assessment.
 - . A significant setback of new building from the boundaries with Station Cottages to the north-west, being some 24 metres to their boundary fencing and 41 metres to the flank wall of the terrace. The intervening land is mounded and would be suitably landscaped.
 - . Enhanced planting to the site boundary and the building line with Slip Mill Lane of up to 19 metres depth.
 - . An enhanced landscaped boundary to the east, running alongside the car park, which accommodates the drainage run to the southern attenuation lagoon, some 11-15 metres wide, with a detailed scheme to realise the ecological potential of the drain and supplemented native planting.

- . A significant open strip of land along the southern boundary of some 32-41 metres, accommodating the landscaped site drainage lagoon.
- 1 This initial sketch scheme illustrates the manner in which this area of land has the potential to meet a good measure of local business needs for additional commercial floorspace in a manner that meets technical design requirements and highways standards, and with significant landscaping to mitigate any potential impact on its immediate surroundings and the Area of Outstanding Natural Beauty, in accordance with the terms of Draft Local Plan Policy AL/HA8.

HANKINSON DUCKETT ASSOCIATES SITE VISUAL IMPACT ASSESSMENT

- 1 The **Tunbridge Wells Borough Council Economic Development Topic Paper of March 2021** confirms the reasoning behind the reduction in the area proposed for development within the allocated area in new Policy AL/HA7, as follows.
 - 4.32 *The Gill's Green Key Employment Area lies to the north of Hawkhurst on Cranbrook Road and serves this rural part of the borough. This area has been popular for businesses to locate and expand and therefore an area of undeveloped land is identified and allocated under Policy AL/HA7, to the south of the existing KEA for further employment generating uses within use class E/B2 and B8.*
 - 4.32 *This area differs somewhat from the Draft Local Plan which sought to allocate a larger area to the south of the existing KEA; however, **following the outcomes of further landscape assessment work, this area has been reduced to the site now proposed in the Local Plan.***
- 1 The **'further landscape assessment work'** is found in the **Document Tunbridge Wells-Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB** of November 2020 prepared by Hankinson Duckett Associates, Section 6.7: Hawkhurst.
- 1 HAD, on behalf of Tunbridge Wells Borough Council, have carried out a **Landscape Visual Assessment of the proposed Draft Allocations within the High Weald Area of Outstanding Natural Beauty proposed in the Regulation 18 Draft Local Plan.**
- 1 This included Draft Policy AL/HA 8 outlined above, along with a simple red lined allocation boundary, and written policy requirements for a landscape and visual impact assessment (5) and landscape management scheme (8) with references to other policies in respect of design, development management and landscape.
- 1 HAD considered that;
 - a. The site is a disturbed, degraded, unkempt, neglected and unkempt field 'in pasture', with scattered piles of rubble and a shipping container forming detracting features within the site. It and has few characteristic features and is heavily influenced by the industrial estate to the north.
 - b. The site is generally well contained from the surrounding landscape, being enclosed by mature vegetation including tree belts and hedgerows, where the incongruous landscape features are less noticeable. Landscape features are associated with field boundaries and are generally intact. There are opportunities to replace some features with more characteristic boundary treatments.
 - c. Views of the site are limited to receptors adjacent to the site boundary and long distance glimpsed views from the high ground to the north-west, west and south-west. There are infrequent glimpsed winter views of the site through the boundary vegetation on Slip Mill Lane, adjacent to the western site boundary. The site boundary trees are visible within the views, which screen the ground within the site. There are glimpsed views into the site from nearby residential properties, though seen in the context of the existing industrial estate.
 - d. Visual receptors (public views) to be considered (ordered from higher to lower sensitivity) include; walkers on the footpath to the north-west of the site, walkers and motorists using Slip Mill Road, and people at the south-western edge of the industrial estate, to the north of the site.
 - e. The site is relatively simple, but lacks coherence. This is largely due to the variety of boundary features, some of which are characteristic of the local landscape, while others are less typical.
- 43. HAD's Assessment concludes as follows;

The site consists of a disturbed and unkempt field in pasture, which is heavily influenced by the industrial estate to the north. The site is enclosed by mature vegetation including tree belts and hedgerows, some of which comprise native species, while others are less typical of the local landscape. A Leylandii hedge on a bund forms the north-western boundary, which forms an anomaly in the character of the adjacent Slip Mill Lane, which is mapped as a historic routeway. The site is well contained from the

wider landscape, however the introduction of tall buildings within the site is likely to change this assessment of visibility.

The site is a relatively small part of the assessment area considered by LUC within the sensitivity study. The whole area was assessed as having a high sensitivity, as it is representative of the AONB landscape. The more developed areas at Gills Green were noted as being less sensitive to change.

Any development should be designed to minimise visibility and subsequently the effects of the development on the wider AONB. **Providing that existing structural landscape features within the site and at the site boundaries can be retained and enhanced with new planting, it would be possible to include sensitively designed development within the site, without causing significant adverse effects on the character and appearance of the AONB. The suitability of the site for development is largely dependent on the employment need and the detailed design of the proposals.**

The site is degraded, has few characteristic features and would benefit from landscape improvements and long-term management. Key landscape features within the site could be retained and there is sufficient space within the proposed open space to the south and west of the site, to introduce characteristic new features, which could contribute to the screening of the site. The proposed pedestrian and cycle link to Gill's Green would provide some recreational benefits.

Hawkhurst has a made Neighbourhood Plan and policies within this should be considered as part of any development of the site.

By following the proposed GI strategy and policy measures outlined above, it would be possible to mitigate for development within the site and provide some on-site enhancements that would contribute positively to the character and appreciation of the AONB.

Policy recommendations for the Regulation 19 version of the Draft Local Plan include:

Photomontages to be provided from a selected number of key viewpoints as part of the prescribed LVIA.

Include wording to protect boundary features within the site.

THE BASIS FOR THE OBJECTION

- 1 The basis for the objection to proposed Policy AL/HA7, Inset Map 16; Gills Green, and Proposals Layout Map 49 shown above lies in the **extent of the proposed area of green open space alongside the southern boundary of the site, which limits the potential for the site to accommodate clear and expressed local business requirements for development land on which to meet their needs for buildings, with a consequent failure to incorporate all the Kent Woodware land within the Key Employment Area Policy ED1.**

45. Kent Woodware accepts the reasonable requirements for site development to retain and enhance existing structural and boundary landscaping.

46. Such requirements could have been met under the terms of Parts 5 and 8 of Regulation 18 Consultation Draft Policy AL/HA8 which were drafted as follows;

5. A landscape and visual impact assessment that informs the height and massing of development proposals, to include the height and colour of roofs, and reflects the elevated rural location of the site that can be viewed from parts of the surrounding areas (see Policy EN1: Design and other development management criteria and Landscape Policies EN21 and EN21).

8. Provision of a landscape management scheme to ensure any impact upon the surrounding rural area is minimised in perpetuity (see criterion 3 of Policy EN1: Design and other rural management criteria).

47. This can and should be achieved now by the application of Proposed Pre Submission Policy AL/HA8 requirements;

For a Landscape and Visual Impact Assessment and Landscape Management Scheme supplemental as set out under part 3 of the Policy.

For a detailed landscape submission and management scheme under the terms part 5 the Policy, with updated cross references to relevant Pre Submission Draft Local Plan Policies (now such as EN1: Sustainable design, EN12: Trees, woodland, hedges and development, EN16: Landscape within the

built development, EN18: Rural landscape, and EN19: The High Weald Area of Outstanding Natural Beauty).

Within the terms of and negotiated by way of a detailed planning application to accord with the above.

48. Kent Woodware cannot accept the impact of the extensive area of 0.677 hectares of proposed open space in Policy AL/HA7 and Shown on Inset Map 16; Gills Green and Policy Map 49, which amounts to 33% of the proposed red lined allocation land.

49. Accordingly, the terms.. A landscape buffer to be provided within the southern part of the site... should be deleted from Pre Submission Draft Policy AL/HA7(5).

50. The prescription for a landscaped open space and buffer zone within the southern edge of the Policy AL/HA7 land arises from the terms of the HAD's Visual Impact Assessment, which assessed the terms of previous Regulation 18 Draft Policy AL/HA8 with its more expensive proposed extension of the Business Park to the south, and draft Policy AL/HA9 alongside to the south with its 'landscaped buffer zone' to buffer the extended employment land and a residential allocation. Consequently, it then recommended the adjusted Proposals Map below, shows existing Green Infrastructure retained, proposed open space, landscape buffer and landscape feature protection, but on the basis of a smaller extension to the Business Park and extension of employment land or residential allocation to the south.

[TWBC: For map see full Planning Statement attached as a supporting document]

1 There is **no substantive or justified reasoning** for this large area of proposed open space within the Kent Woodware land, which takes up **33% of the red lined proposed allocation land**, which we consider to be **arbitrary, unjustified and excessive**.

1 HAD comment, on Regulation 18 Draft Local Plan Policy AL/HA8, that;

There is no proposed open space requirement within the allocation plan and no requirement for feature retention within the draft policy. There is the potential that this would result in the loss of boundary features, which could have significant adverse effects on landscape character.

The effects on recreation within the site may be positive and are unlikely to be negative.

Landscape and recreational opportunities:

Provision of open space to the west and south of the site allows existing boundary features to be retained and enhanced with new planting. The provision of open space to the south would maintain the separation between the industrial estate and the residential part of Gill's Green. There are opportunities to create new and complementary habitats within the open space. The draft policy anticipates a north-south link through the site, which will improve pedestrian and cycle connectivity with Gill's Green.

The inclusion of the eastern and southern parts of the site within open space would protect existing landscape features and would limit the potential for new development to affect the character of the wider rural landscape.

The open space has the potential to include the enhancement of existing features and new complementary habitats, which could link existing habitats within and around the site. The space would maintain the rural edge to the site and the retention of existing trees and woodland would filter and screen views of the proposed development.

The inclusion of an appropriate new landscape buffer to the western site boundary would assist in protecting the significance of adjacent heritage assets.

The proposed allocation would be consistent with the existing settlement pattern to the south of Hawkhurst.

It would provide opportunities to create new recreational routes and facilities for existing and new residents.

The introduction of a long term management plan for the site would maintain the quality and condition of the AONB landscape within the site.

These measures would reduce predicted effects on internal landscape features, local views and the character of the site and wider landscape.

1 We consider that there is a distinction between the terms of 'open space' and landscaping as used by HAD in their considerations and advice.

1 We consider that;

a. With the removal now of the previously proposed extension to the Station Business Park in Draft Policy AK/HA8 beyond the Kent Woodware land, the previously draft proposed allocation of residential land north of Gills Green, and the proposed landscaped buffer between the two land uses, there appears to be no material need for a for 'landscaped buffer' to separate Gills Green from a Business Park extension, in view of the extensive area of retained and protected open land at this edge of the settlement.

b. Under the changed circumstances, this proposed open space to the south of the allocated land is not justified as there will be more than adequate retained open separation between an extended industrial estate and the residential part of Gill's Green, and a suitably landscaped southern boundary within any new development will screen any potential visual impact.

c. There cannot and will not be public open space, recreation, or pedestrian or cycle links into or through this privately owned land which will be an extension to the Station Business Park. Station Business Park is a private commercial enterprise, with no general public rights of way. It is occupied by busy commercial operators, and serviced by large commercial vehicles, including large articulated and refrigerated lorries and trucks, delivery vans, fork lift trucks, staff and visitor parking. This restriction of public access is applied in the interests of the health and safety, and highways safety, of staff and visitors. Such restrictions must apply to any built extension.

d. Proposed Pre Submission Policy AL/HA7 does not propose a north-south link through the site to improve pedestrian and cycle connectivity with Gill's Green, as shown in Draft Policy AL/HA8, as the Draft Local Plan proposed a further extension to the Business Park on its immediate southern boundary served by an access through the Business Park, with an open space beyond leading to a residential allocation north of Gills Green, which are not carried into the Pre-Submission Plan. The land proposed under AL/HA7 now backs onto an open field with a hedgerow boundary.

e. There is no need for such an extensive designated public open space or recreation within the new development. There is no need for an open space for staff, and any such space would not be open to the general public. It is also not needed to maintain the separation between the industrial estate and the residential part of Gill's Green, as claimed by HAD above, as there is sufficient open distance between these 2 parts on the north and western boundary of Gills Green in the open fields to the south of this land.

f. Open landscaped space can be accommodated within the development. The sketch scheme described above shows an area of land on the southern boundary of the site which would need to accommodate the attenuated drainage lagoon for a large part of the Business park and any extension, up to 41 metres depth, which would be landscaped and used as casual open space by staff working alongside, which will be a material and acceptable enhancement to the proposed development.

g. The need for substantive landscaping on this land, as a screen to the development and to maintain characteristic boundary features and the enhancement of the site with characteristic wildlife boundary planting, and naturalistic surface water features and drainage systems and storage on the eastern and southern boundaries, can be secured by way of ;

additions to Proposed Policy AL/HA7 (5) in draft Policy AL/HA7 outlined above.

the application of Policies EN1; Sustainable design, character, site context, landscape, trees and amenity, biodiversity and geodiversity, EN12; Trees, woodland, hedges and development), EN18; Rural landscape), EN19 :The High Weald Area of Outstanding Natural Beauty in the formulation of a detailed development scheme, with full assessments, documentation, and justification in a planning application submitted for determination by the Local Planning Authority in the light of planning policy and Supplemental Guidance.

CONCLUSIONS

- 1 Kent Woodware Ltd supports the proposed allocation of its open land south of the Station Business Park for employment uses in proposed Local Plan Policy AL/HA7, and as shown within the proposed red lined area on the Proposals Maps.
- 2 This Policy, in principle, follows the success of Station Business Park since its formal designation as an employment area in 2006, and the benefits it brings for business and employment in the eastern rural part of Tunbridge Wells Borough.
- 1 The proposed allocation for an extension to the Business Park follows successive advice since 2006 in the Council's Call For Sites, its Development Plan formulations in its Adopted Allocations

- Local Plan 2016, its 2016 Economic Needs Study, and the proposed allocation under AL/HA8 in its Regulation 18 Consultation Draft Local Plan which Kent Woodware supported.
- 1 The Council has since supported Kent Woodware in obtaining planning consent, now implemented, for a new building to serve the existing needs or an adjacent Business, on the open land within the proposed new allocation and without material harm to its surroundings, its wider neighbours, or the surrounding landscape.
 - 1 It is clear to Kent Woodware and its closely advising commercial and planning Agents that there are a clear and pressing needs of local Businesses on the Business Park, and beyond, for additional land to serve their needs for additional building floorspace which can be met on the proposed allocation land.
 - 1 Whilst Brexit and Covid 19 restrictions have stalled new developments, and the cost of formulating detailed planning applications during these times, businesses are now looking to expansion in the light of prospective economic recovery. Development on the allocated land will assist in that recovery and secure business prosperity, employment retention and creation.
 - 1 However, we are firm in our advice to the Inspector for the Local Plan Examination that the retention of the proposed area of green 'open space' shown within the proposed allocation, amounting to 33% of the red lined allocation, would act against the need of local business to expand, to meet their development needs, and local employment.
 - 1 The commissioned Landscape and Site Visual Assessments carried out by Lloyd Bore on behalf of Kent Woodware and Hankinson Duckett Associates on behalf of the Local Planning Authority essentially arrive at the same conclusions; that the proposed allocated land, as former Station and pasture land, and serving the needs of the Former Kent Woodware wood turning business for many years, is now degraded, but is essentially reasonably contained within the surrounding landscape with only limited views towards its boundary landscaping, which can be enhanced to screen the site. New development, and particularly its building heights, design, materials and colour, must be guided by the findings and recommendations of landscape and visual impact appraisals and sensitive landscape proposals. This can be achieved.
 - 1 However, we consider both the principle and extent of the green proposed open space recommended by Hankinson Duckett Associates and shown on the Proposed Allocation Maps to be arbitrary, excessive and unfounded. HAD's assessment shows no detail as to how the extent of the green open spaces has been determined.
 - 1 We consider that HSD's assessment will work against the needs of local businesses and their retention and creation of employment.
 - 1 Kent Woodware accepts the need and requirements for any new development on this land to pay the utmost regard to the retention of the existing boundary landscaping and its enhancement with characteristic wildlife boundary planting, and naturalistic surface water features and drainage systems.
 - 1 These requirements can be achieved by additions to Policy AL/HA7, set out previously as (3) and (5) in Regulation 18 Draft Policy AL/HA8 outlined above, and the application of Policies for sustainable design, character, site context, landscape, trees and amenity, biodiversity in the formulation of a detailed development scheme, with full assessments, documentation, and justification in a planning application submitted for determination by the Local Planning Authority in the light of planning policy and Supplemental Guidance.
 - 1 The Inspector is therefore requested to;
 - a. Retain Policy AL/HA7 for the application of the red lined site Allocation Boundary area south of Station Business Park for employment uses (E/B2/B8), with requirements for a Landscape and Visual Impact Assessment and Landscape Management Scheme.
 - (b) Extend the Proposed Employment Area under the terms of Policy ED1 as shown on Inset Map 16; Gills Green and Proposals Map 49 to incorporate all of the land shown as red lined as Allocation Boundary, and to be shown blue for Employment Use.
 - (c) Remove the area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan.
 - (d) Delete the reference in Draft Policy AL/HA7 (5) for.. a landscape buffer to be provided within the southern area of the site..

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Delete area shown in green as an 'open space and landscape buffer' on Inset Map 16; Gills Green and Map 49 Site Layout Plan, along with the requirement for a 'landscape buffer to be provided within the southern boundary of the site' on Policy AL/HA7 (5).

Extend Key Employment Area Policy ED1, as shown on Inset Map 16; Gills Green and the Red lined Allocation Plan Map 49 Site Layout Plan for Policy AL/HA7 to cover all of red lined allocated site and to be shown as blue for employment land.

See attached full representations. [TWBC: Please see representations attached as supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

LOCAL PLAN CONSULTATION

KEYLANDS SALEFIELD, LUCKS LANE, PADDOCK WOOD (SITE NO 340)

With regard to the Consultation to the Tunbridge Wells Borough Pre-Submission Local Plan, we submit a response related to employment land in the north-east parcel of the proposed Paddock Wood Draft Masterplan. We refer specifically to Site PW1_5 identified on Map 28 related to Policy STR/SS1 identified on Map 27 (Masterplan areas) and Map 28 which refers to the Keylands Salefield.

This policy relates to employment uses involving two adjacent sites within separate ownership. We seek to confirm that for both sites there are a range of positive enquiries for development. This range of enquiries extends from established businesses within the town, particularly several of the more aged properties to the north side of the railway station relocating to a more appropriate purpose built facility. In addition, we have received enquiries from food outlets, supermarkets, building materials depots, agricultural and builders' plant machinery outlets and a developer specialising in small business units to be sold for freehold owner occupation. At this stage, particularly with the Keylands Salefield, it has been decided to await the outcome of the Local Plan Consultation. This note is to confirm there is positive interest and it is for us to progress with addressing the technical solutions required to deliver the site upon clarification that the Local Plan is progressing through its various stages to adoption.

With regard to the overarching policies set out within this Local Plan Consultation, we would also draw your attention to three other linked policies. We fully support the proposals set out in Policy EDN9 with regard to Biodiversity Net Gain. There is scope within these sites to accommodate the requirements of this policy without venturing into third party land. We further support Policy ED1 identifying the key employment areas. However we would ask for appropriate flexibility to be considered within Policy ED2 which relates to the retention of existing employment areas, particularly within Paddock Wood. To the north of the railway station, there is aged commercial property which would benefit from an appropriate flexibility within the strategy for Paddock Wood including land at East Capel to allow appropriate viable redevelopment which in itself can facilitate relocation potentially within the identified key employment areas for new facilities to take the businesses forward for the future.

This note is to confirm a positive as to the potential for these draft allocations which we look forward to the Local Authority supporting through the remainder of the Local Plan process through to adoption.

[TWBC: for representation, please see supporting documents]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a resident on Reynolds Lane adjacent to the proposed site for development, my representation on AL/RTW 5 is based on my family's experience today - specifically how current problems will be exacerbated and how the proposed development will introduce negative impacts on the quality of life for our family and other residents.

Traffic, pollution and road safety

The introduction of more traffic from those resident on the new development is, quite frankly, distressing. I would assume an estimate of 150-200 would not be an unreasonable expected total of additional vehicles that the development would bring. This is a significant contribution to the flow of traffic on the Speldhurst Road-St Johns Road junction - a major problem for vehicle and pedestrian traffic.

On a daily basis, during school term, our morning and afternoon drive to our children's school that is located 2.5 miles from our home on Reynolds Lane takes 20-25 mins. This should be a 10 minute drive in free-flowing traffic. In fact, on a very regular basis that journey takes significantly longer due to roadworks, parked delivery trucks and sheer weight of traffic. It has become a rather sad on-going joke when slow/heavy traffic on St Johns Road is not mentioned on the KMFM radio traffic updates for Kent - as you might expect, it is frustratingly not often enough!

It is a major bane to our lives in lost time and late arrival to school/ work. The pollution in the area is also a real concern and could only deteriorate - as cars clog up that junction back down Speldhurst Road and all along St Johns Road.

We also have real concerns on pedestrian safety - particularly as parents of young children. Worryingly, we have witnessed for ourselves on multiple occasions when motorists - presumably impatient from sitting in traffic - have jumped lights, accelerated hard to move into space, dangerously at speed u-turn at the Speldhurst Rd-Reynolds Lane junction as they are not willing to wait any further as the junction is jammed because of a block on St Johns Road. This is a concern of course whilst we accompany our young children, but at a time in the future they will not be accompanied and like many children we see crossing that junction today - it is a major risk to their safety and accidents are inevitable.

It is, frankly, incredible that a decision would be made to exacerbate these problems. That the current residents' quality of life is already impinged and that a decision could be made to add to that problem suggests a detachment from the realities of residents today and a disregard of concerns raised many times over years to our local councillors. Truly unfathomable.

What is also a concern is the addition to demand on Doctors' surgeries, Dentists and Schools in the area. Our own recent experience would suggest that demand well out-strips supply in these areas.

Impact on the Natural Environment

For me, the removal of a recently confirmed Green Belt status is mystifying. As a citizen it truly creates a feeling of distrust and doubt over elected officials and a planning process that seems fickle and damagingly influenced by commercial interests. A truly sad transformation in my opinion.

What the impact of removing this Green Belt status means is that the semi-rural property we purchased in 2009 would be no more. That it would be swallowed up by an expanding sprawl. For us, it means that the green view we enjoy today would be permanently lost to future generations.

The parcel of land within the proposed development hosts badgers that we see cross in to our gardens, we see pipistrelle bats that inhabit the field and fly over and around house, we have seen owls and heard woodpeckers - all from the trees surrounding that field. It would be a travesty to risk that habit - and shame on us as today's custodians to not pass that on to future generations.

I can share on a personal basis that the green view and walks on the public path cutting through the area to Speldhurst Road have had a positive impact on mental health and a restorative effect for all the family during COVID lockdown. To suggest that the developers would "enhance the Ancient Woodland" is an anathema to a natural environment - natural environments are clearly put at risk when they are encroached on by development.

I hope my small representation has some effect on what is wholly questionable and perverse theft of green belt land from today's residents and future generations.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

My modification would be reinstatement of green belt status and a complete halt to any development in that space.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	No, I do not wish to participate in examination hearing session(s)

--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

5.91,5.92,5.93,5.94

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Additional housing in the garden center area will add to traffic creating hazards and is a real issue to safety of pedestrians and cyclists owing to the location being on a low visibility high speed corner.

The original access to the garden centre is already on a very dangerous road and there are no pavements along that stretch of road which would obviously be used heavily by pedestrians walking into town rather than just visiting the garden center in their cars as it is now.

5.92. With areas of greenbelt possibly being destroyed to make way for building then the mature nature and biodiversity will be decimated as will the areas of outstanding natural beauty.

5.93. Flooding in the area is a real concern as surface water from the lower end of Hungershall Park, High Rocks Lane and Cabbage Stalk Lane freezes during winter and is a deathtrap with black ice everywhere creating numerous accidents. Any proposed interference of natural drainage will only make matters worse due to change in water course.

5.94. The idea that a secondary and emergency access road to be put in from the north is directly in the area of already mass flooding, ice and a 90 degree bend. I live at the bottom of Hungershall Park and am very aware of the numerous accidents or near misses that happen on the bend including many times as I have been driving into or out of my gates so any more traffic of any sort will only lead to certain fatalities. Parking at the bottom of Hungershall Park and the corner of Cabbage Stalk Lane is already a problem which will only get worse if another access into a new housing development were to be granted. The area of possible access here would be completely not in keeping with the surrounding heavily wooded tranquil environment that remains home to a large amount of biodiversity many of which are protected. (bats, newts, snakes, badgers, deers amongst others)

I note that the previous planning application 89/02011/FUL Received 09/11/1989 was refused on many of the above comments and since then the only change has been more traffic off all sorts using Hungershall Park/Cabbage Stalk Lane and High Rocks Lane so any U-turn to approve this dangerous application will sadly only lead to death on or around the bend.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The only option for the proposal on the grounds of safety is to not go ahead with the plan and save lives or put a traffic light system at the entrance to the now garden center ,but this again is only going to create even more traffic problems into Tunbridge Wells.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Respondent's Name and/or Organisation	Cynthia Kirk
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/HO 1 The Strategy for Horsmonden Parish

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am not against some expansion of house building, but the Government's National Planning policy allows for "limited infilling in villages" which I would not oppose (although the proposed development across the area is not fairly distributed.) However, I am strongly opposed to the scale of the proposed developments in Horsmonden which would increase the number of houses potentially by 320 and would completely alter the character of our village and make the traffic problems much more severe. As Horsmonden already has a notable danger spot at the crossroads in its centre (with many near misses as outlined on the SE News) the substantial increase in traffic necessitated by the huge influx in residents living in the proposed housing developments could cause significant health and safety issues.

The infrastructure is not suitable to support the proposed increase of properties. The roads leading from the centre of Horsmonden village are minor roads, which are narrow and have many dangerous bends with poor sight lines. E.g. Access onto the Goudhurst Road by potential residents and school traffic at the site HO3 would be problematical. The inadequate roads simply cannot safely sustain the amount of traffic which would be generated if all these houses were built. Further health and safety issues would be caused by the lack of continuous footpaths (especially on blind bends) along the roads out of Horsmonden village to the proposed new developments at HO2 and HO3 with little availability to develop these.

The proposed developments at HO2 and HO3 would involve a significant loss of trees with HO3 in particular having a significant number of established and mature trees. The natural open countryside views in these sites would be lost forever to the detriment of us and our future generations.

Both of these developments are mostly planned to be built on good quality agricultural land. HO2 is next to Sprivers which is an area of natural beauty designated for the local people ~ providing them with essential recreational opportunities and is an important habitat for wildlife. It would be greatly affected by the development of the significant number of houses proposed to be built adjacent to it.

The plan to ensure that 40% of the new houses would be affordable housing is meaningless if recent developments are anything to go by. The Foundry was a recent development in Maidstone road and comprised mostly of detached houses with a few semi-detached houses. The average house price in this development is £458,166 and the semi-detached houses are selling between £374,500 and £430,000 which are not affordable for ordinary people especially young people who have been born and brought up in the local area and who have to move away in order to rent or buy cheaper properties.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposals for building at HO2 and HO3 need to be reconsidered in the light of the difficulties outlined above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The issue that Horsmonden does not have an adequate public transport system has to be considered. This with limited employment opportunities mean that any additional residents living in the new developments would be dependent on traveling anywhere by car which is unacceptable in so many ways, especially environmentally.

The bulk of the housing development in the plan will not contribute to Horsmonden's economic growth as people will have to work away from the village. The proposal of building a new primary school at the eastern edge of the village to cope with the increased number of children does not appear to have fully examined other options for the better use of the existing site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/HO 1 The Strategy for Horsmonden Parish

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am not against some expansion of house building. The Government's National Planning policy allows for "limited infilling in villages" which I would not oppose, although the proposed development across the area is not fairly distributed. However, I am strongly opposed to the scale of the proposed developments in Horsmonden which would increase the number of houses potentially by 320 and would completely alter the character of our village and make the traffic problems much more severe. As Horsmonden already has a notable danger spot at the crossroads in its centre (with many near misses as outlined on the SE News) the substantial increase in traffic necessitated by the huge influx in residents living in the proposed housing developments could cause significant health and safety issues.

The infrastructure is not suitable to support the proposed increase of properties. The roads leading from the centre of Horsmonden village are minor roads, which are narrow and have many dangerous bends with poor sight lines. E.g. Access onto the Goudhurst Road by potential residents and school traffic at the site HO3 would be problematical. The inadequate roads simply cannot safely sustain the amount of traffic which would be generated if all these houses were built. Further health and safety issues would be caused by the lack of continuous footpaths (especially on blind bends) along the roads out of Horsmonden village to the proposed new developments at HO2 and HO3 with little availability to develop these.

The proposed developments at HO2 and HO3 would involve a significant loss of trees with HO3 in particular having a significant number of established and mature trees. The natural open countryside views in these sites would be lost forever to the detriment of us and our future generations.

Both of these developments are mostly planned to be built on good quality agricultural land. HO2 is next to Sprivers which is an area of natural beauty designated for the local people providing them with essential recreational opportunities and is an important habitat for wildlife. It would be greatly affected by the development of the significant number of houses proposed to be built adjacent to it.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Plans to develop on sites HO2 and HO3 need to be reconsidered in light of the above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

There is also the issue that Horsmonden does not have an adequate public transport system and employment opportunities are limited so any additional residents living in the new developments would be dependent on traveling anywhere by car which is unacceptable in so many ways, especially environmentally. The bulk of the housing development in the plan will not contribute to Horsmonden's economic growth as people will have to work away from the village. The proposal of building a new primary school at the eastern edge of the village to cope with the increased number of children does not appear to have fully examined other options for the better use of the existing site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We oppose the sports hub/football stadia/centre of excellence scheme proposed for Hawkenbury as part of the Draft Local Plan. Many residents are unaware of the scale of the development and decisions taken by those living far away from the impact of the scheme on Hawkenbury. It is notable that TWBC failed to include the relocation of TWFC as part of the recent change of land use application, while the Local Plan says "Development is dependent on the football stadium relocating from the current Culverden Stadium subject to allocation Policy AL/RTW 20" which seems like a strategic release of information designed to mislead the public and especially residents directly affected.

The demand for pitches is lower than claimed by TWBC. With many pitches historically being underused across the town, why the need for another six in Hawkenbury?

Noise and foul language from the existing pitches in Hawkenbury Rec can be heard on High Woods Lane now, so it is reasonable to expect this will worsen as the new site is much closer. The relocation of TWFC will be even worse.

The likely introduction of floodlighting for evening sports will have a detrimental effect on residents and wildlife and while being subject to further planning, it is without doubt that this will be granted and yet was missing from the recent application.

The Kent FA assesses the likely delivery of the scheme as 3 out of 4 on their website despite local consultation still not having been concluded. Their site displays that a partnership with TWBC exists. This has not been disclosed fully.

The eventual widening of High Woods Lane alluded to in the planning report will mean a significant change in outlook for those living closest. The revised statistics suggest increased traffic at 80 cars/190

trips, far in excess of what the present infrastructure can tolerate. We oppose the associated destruction of ancient hedgerows.

Closing playing fields over the wider Tunbridge Wells area to facilitate development at those locations by relocating sports provision to a single quiet location in close proximity to predominantly older residents, in a semi-rural area with poor traffic links, is wrong when more suitable sites are available.

TWBC consider this strategy will protect this land from development by Bellway homes and suggest that the threat of government intervention to allow such development can only be avoided if the land is turned over for sports provision. The truth of the matter is that threat of development to meet the housing targets set by government will be for those not-so-affordable homes aimed at commuters and foreign investors (the YouTube channels already uploaded by developers support this claim) and not for the local community need. The supposed threat is born of greed and not local need for housing. The land should be protected and retained for agricultural use. The proposition is to enable TWBC to develop existing green space elsewhere in the Borough for financial gain and will ruin an AONB currently being farmed by a leaseholder with a running 10-year contract. To lose this open space would be a bad outcome for Hawkenbury.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

"5.91, 5.92, 5.93, 5.94"

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger

of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to

Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:*
 - 1) *Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.*
 - 2) *Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.*
 - 3) *For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.*
 - 4) *This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.*

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.*

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

---------------------------------------	---------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

"5.91, 5.92, 5.93, 5.94"

Question 4

Do you consider that the Local Plan:

Is sound	No
----------	----

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

- 1 *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.*2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

- 1 *Adequate servicing and parking to serve the expanded commercial use on the site;*
- 2 *Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane;* Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems:
 - 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.
 - 2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.
 - 3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.
 - 4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

- 1 *Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation*
- 2 *Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;* The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.*7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The development is not suitable in the area designated

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Keith Lagden
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

[TWBC: this representation has been input against Policies AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CRS1, AL/CRS1 and AL/CRS4 – see Comment Numbers PSLP_431, PSLP_435-440]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- . I fully support the removal of Hawkhurst Golf Club coupled with the significant reduction in housing allocation numbers within Hawkhurst resulting in less damage to the AONB.
- . I am concerned that the remaining numbers set out in HA1, the allocation in HA4 and CRS1 & CRS4, are acceptable, as no assessment has been undertaken on the cumulative impact of these allocations on either the Flimwell junction or the Hawkhurst village crossroads.
- . In my opinion HA1, HA3 plus CRS1 & CRS4 do not embody National Policy, as they do not focus development in locations which are sustainable and in no way limit the need to rely on private car trips (NPPF paras 103 & 104)
- . The policies neither help to preserve or enhance the AONB (which is contrary to NPPF para 172)

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I would like to see the following modifications:-

- . Remove HA4
- . Adjust HA1 to show reduced overall housing numbers in Hawkhurst due to HA4 removal.
- . Remove CRS3
- . Adjust CRS1 to show reduced overall housing numbers in Cranbrook due to removal of CRS3
- . Adjust HA1 to clarify that no development outside of the Limits of Build Development will be permitted (unless in the specific exceptions shown elsewhere in the plan)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Keith Lagden
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 2 Brook House, Cranbrook Road

[TWBC: this representation has been input against Policies AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CRS1, AL/CRS1 and AL/CRS4 – see Comment Numbers PSLP_431, PSLP_435-440]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- . I fully support the removal of Hawkhurst Golf Club coupled with the significant reduction in housing allocation numbers within Hawkhurst resulting in less damage to the AONB.
- . I am concerned that the remaining numbers set out in HA1, the allocation in HA4 and CRS1 & CRS4, are acceptable, as no assessment has been undertaken on the cumulative impact of these allocations on either the Flimwell junction or the Hawkhurst village crossroads.
- . In my opinion HA1, HA3 plus CRS1 & CRS4 do not embody National Policy, as they do not focus development in locations which are sustainable and in no way limit the need to rely on private car trips (NPPF paras 103 & 104)
- . The policies neither help to preserve or enhance the AONB (which is contrary to NPPF para 172)

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I would like to see the following modifications:-

- . Remove HA4
- . Adjust HA1 to show reduced overall housing numbers in Hawkhurst due to HA4 removal.
- . Remove CRS3
- . Adjust CRS1 to show reduced overall housing numbers in Cranbrook due to removal of CRS3
- . Adjust HA1 to clarify that no development outside of the Limits of Build Development will be permitted (unless in the specific exceptions shown elsewhere in the plan)

Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Keith Lagden
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/HA 3 Former site of Springfield Nurseries, Cranbrook Road, Hawkhurst

[TWBC: this representation has been input against Policies AL/HA1, AL/HA2, AL/HA3, AL/HA4, STR/CRS1, AL/CRS1 and AL/CRS4 – see Comment Numbers PSLP_431, PSLP_435-440]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- . I fully support the removal of Hawkhurst Golf Club coupled with the significant reduction in housing allocation numbers within Hawkhurst resulting in less damage to the AONB.
- . I am concerned that the remaining numbers set out in HA1, the allocation in HA4 and CRS1 & CRS4, are acceptable, as no assessment has been undertaken on the cumulative impact of these allocations on either the Flimwell junction or the Hawkhurst village crossroads.
- . In my opinion HA1, HA3 plus CRS1 & CRS4 do not embody National Policy, as they do not focus development in locations which are sustainable and in no way limit the need to rely on private car trips (NPPF paras 103 & 104)
- . The policies neither help to preserve or enhance the AONB (which is contrary to NPPF para 172)

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I would like to see the following modifications:-

- . Remove HA4
- . Adjust HA1 to show reduced overall housing numbers in Hawkhurst due to HA4 removal.
- . Remove CRS3
- . Adjust CRS1 to show reduced overall housing numbers in Cranbrook due to removal of CRS3
- . Adjust HA1 to clarify that no development outside of the Limits of Build Development will be permitted (unless in the specific exceptions shown elsewhere in the plan)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am in receipt of the email below and have read your comments to David Marriott, my neighbour. [TWBC: Mr Marriott's email referred to above contained reference to his representation number PSLP_328]. My husband, Steve and I live close to Mr Marriott and run Lamb's Mobile Home Park – a residential caravan park for the over 50s in the corner of Maidstone Road and Transfesa Road. It has been a caravan park since the 1950s and in our ownership since 1980. I was born in PW in 1964, my mother was local school teacher and Steve and I run local businesses.

I believe the Council planners are trying to overrun the area with housing without providing local amenities (shops, schools, GPs, dentists, parking etc). It's all very well trying to pedestrianize everywhere but our tenants are not all mobile, cannot walk the 900 m in to Paddock Wood and are not strong enough to carry their shopping home should a bus service not match their travel requirements, let alone try to balance a week's worth of shopping on a bike. The stupid idea about the railway bridge is beyond belief. How are those of us north of the railway meant to get into Paddock Wood? Add to that the plan last year to close Commercial Road to through traffic near the war memorial, meant that a trip to the bank, or Waitrose in Paddock Wood would result in me driving down Lucks Lane/Wagon Lane or down the A228 and along Badsell Road using Warrington Road or Church Road to get access, all options adding MILES to my journey. So much for cutting down car usage! In addition, we are land owners at Old Hay, access for which will be difficult with these proposals. I also own horses kept near Mascalls School. Again getting there would be disrupted were the bridge to be closed. I have to exercise my driving horses on the road and am often seen driving them around Paddock Wood. Closure to thru traffic in Commercial Road would limit some of my circular routes and detract from my enjoyment of my sport/hobby. It is not as though carriage driving rates highly in the local plans to get horses off the highway!

Finally, do any of the people making decisions about Paddock Wood, Capel or Tudeley actually live in the area? I suspect not. I am not a NIMBY (Not in my back yard) and accept the need for more housing, but surely filling Commercial Road with more retirement flats and a funeral directors is not reviving the local high street! Maybe the rationale, was for a one stop shop: old people in local flats are easily moved into the funeral director's when they die! Is the cemetery on the current outskirts of Paddock Wood going to be able to cope with the huge influx of people already expected, let alone when you build houses across the gap between Tonbridge and Paddock Wood? Locals, want good shops, not necessarily big named chain stores, adequate parking, not outsiders telling us how to exist in Paddock Wood and ignoring brown field sites or having to lose our countryside to provide houses for non-locals.

In the bigger picture with the proposal to merge Paddock Wood, Capel/Five Oak Green/Tudeley with Tonbridge for some garden city development, where are all the cars going to fit? The station car parks at both Paddock Wood and Tonbridge would not cope with possibly 4000 more cars and commuters and certainly the local road network and bus services cannot service these people either. My existing GP at Woodlands Health Centre, ignoring current COVID issues is so full, I have to book FOUR WEEKS in advance to see my GP. Add more housing and plus if the railway bridge is closed to cars, I will have to do 4 miles to get there! (I have had both knees replaced and am still recuperating so cannot walk/stand for great lengths of time yet).

In summary I do not think TWBC planner are representing me or the residents of Paddock Wood.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

I am a resident of Five Oak Green where I have lived since 1986. It is a lovely friendly village where people watch out for one another.

Wheat I have seen of the building going on in and around Paddock Wood is absolutely horrific particularly as it is on green belt land and areas that are liable to flooding.

If the proposed building in Capel goes ahead there will be no villages just a massive town extending from Tonbridge to the far reaches of Paddock Wood.

Where will all the new doctors surgeries be built and how do you intend to employ more GPs when it is difficult to recruit any now. Obviously, another hospital will need to be built as the one in Tun Wells/Pembury would not be able to cope with thousands more patients and where would they all park.

Are the rail companies going to put on many trains for commuters travelling to London and elsewhere. This is just the start of the infrastructure that will need to be put in place.

My house was flooded at the start of 2020 with a foot of water indoors. Work is still ongoing due to the damage done.

If this application should go through and it would increase the risk of flooding.

Who had the bright idea of putting such a massive building site on a flood plain.

I hope and pray this application will not be passed and spoil so many peoples lives.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for the opportunity to comment on the Regulation 19 Local Plan we appreciate the detailed work and planning involved in producing a document that covers the diverse settles within the Tunbridge Wells Borough. We have restricted our comments mainly to the content concerning Lamberhurst however we note that the proposed major developments in Hawkhurst and Cranbrook will have a major impact on the surrounding infrastructure. Notably, commuting to and from Tunbridge Wells, Tonbridge and London will put further congestion on the A21 through Lamberhurst Quarter and the B2169 which is popular link between the A21 and the Bayham Road for access to Frant Station and Tunbridge Wells. More generally, the scale of development detailed in the plan will put further pressure on already over-stretched public services.

Changes to Limits to Build Topic Paper

Page 14. Point 3.1(d) The term "The settlement at the Down" referring to the new discreet LBD which includes the proposed site AL/LA 1 causes confusion and is not one that would be recognised locally. A better description would be "existing development South East of the Down (The Slade) and East of the Down (Sand Road/B2169 and Down Avenue)".

Reg 19 Pre-Submission Local Plan

5.613 The term "fairly regular" referring to local bus services is misleading; the timetables are very restrictive and only operate on certain days of the week. Local people are unable to rely upon bus services for commuting locally or attending Schools outside of the Parish. A better description would be "infrequent". **5.615** There is one local shop in the village not "several". **5.617** The term "The Down" needs clarification, see above. **5.618** Other local services may also wish to benefit from developer contributions as well as the Doctor's Surgery. In Particular, The Lamberhurst Neighbourhood Development Plan outlines a Community Action Plan for a number of projects that could benefit from developer contributions. However, we accept that a broader candidate list is contained in policy PSTR/LA 1.

5.619 The term "Spray Hill Park" is not recognised. The undeveloped part of site AL/LA1 would maybe be better kept as woodland with connecting PROWs to the existing network. Policy PSTA/LA1 point 3. The Car Park on the Broadway is not a public car park but one that belongs to The Chequers Inn. Point 4(b), as with 5.619. No mention is made of the Public Car Park adjacent to The Brown Trout that is owned by the Parish Council.

5.622 The term "The Down" needs better clarification, see above. The Building is no longer used as a commercial cattery. **5.626.** The term "The Down" needs clarification see above. **5.628** The term "The Down" needs better clarification. Policy AL/LA1 point 2. Vehicular access via Spray Hill would be a better option than access via Sand Road (B2169). The latter is a busy short cut connecting the A21 with Tunbridge Wells (via the Bayham Road) and Wadhurst (via the B2100) whereas Spray Hill is a very quiet road. Possible developments at Hawkhurst and Cranbrook, mentioned above, would only make Sand Road busier still. The site does have two current vehicular access points on Spray Hill which have been used by contractors.

Reg 19

Site of Tudeley Garden Village proposal :

Policy STR/SS3

I have objections to the Tudeley Village proposal.

I have lived with my Wife and Daughter at xxxx [TWBC: full address redacted] Brampton Bank, Five Oak Green Road, Tudeley since 2008.

I have concerns regarding the size of the new development and the impact on the surrounding area and effect on the local community.

The proposed site for the village would be directly at the foot of our lovely garden.

Flooding and subsequent drainage is a major concern, which happens frequently in the surrounding area.

Detrimental affect on the established woodlands and wildlife.

Building on the 'Green Belt' rather than Brown Field sites that are available such as the Blantyre Prison site Sustainability Proposal page 86 which includes fields and is around 80 Hectares in size. The Tudeley proposal is on 94.7 Hectares of land.

Noise, Light, Dust and Sound pollution during and after building.

There are seven road/junction accesses between Church lane and the Vale Road roundabout on the B2017 which is a winding road with many blindspots. The volume of traffic is already high and used as a route between Tonbridge, Paddock Wood and Pembury if the A21 is blocked for any reason such as an accident. The current speed is 30mph through Five Oak Green until just after Capel Primary School. It then increases to 40mph and then to 50mph approaching Tonbridge. Church lane and the B0217 are very busy with parked cars during school drop-off and pick-up times.

Infrastructure and road maintenance of the B2017.

Communication and conflicts between Tunbridge Wells Borough Council and Tonbridge and Malling Borough councils. Impact on Tonbridge.

Castle Hill proposal adjacent to the A21:

Capel Sustainability Proposal page 86.

There is a lot of infrastructure already in place.

It has close proximity to North Farm Industrial estate, which provides Supermarkets, DIY outlets, Electrical outlets, Gyms, Car Sales rooms, Tyre outlets, Pet stores, a Cinema, Bowling Alley and various eat in or take away food outlets.

The proximity to Tunbridge Wells is close and could be easily accessible by footpath, bus and a cycle lane if put in place. It is also possible to walk in to Tunbridge Wells. There is a rail station which provides services between London and Hastings.

Although the land has AONB, a similar impact if not worse would happen if the proposed Tudeley Village was approved.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Proposal page 86.

There are other options available rather than the extensive building proposal of Tudeley Village.

Blantyre Prison site and Castle Hill.

There would especially be less impact and a better infrastructure to build at Castle Hill with its proximity to the A21, Hospital and North Farm Retail and Industrial site.

I do not believe Tunbridge Wells Borough Council have taken in to account of the options available than the Tudeley Village site.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Petrina Lambert
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Reg 19

Site of Tudeley Garden Village

Policy STR/SS 3

I have lived at Brampton Bank in Tudeley since 2008 and know the area very well and will be directly affected by the proposal. I have many concerns about the development and its lasting impact on the area.

It concerns me that the new garden village will be 3 times bigger than the existing combined villages in the area. With this development and that at Paddock Wood it will cause coalescence joining the two towns of Tonbridge and Paddock wood with very little green space between the 2 towns. It will remove a large piece of the Green Belt. This will affect the air quality and increase the light pollution in this area. It will increase the light pollution and air quality to the adjoining AONB. Tonbridge already has an air pollution problem and has reduced the whole town to 20mph to help to deal with this. The proposed green spaces to be included in the development are no compensation for the loss of wildlife (hawks, owls, pheasant and amphibians, some of which are protected species), green belt, biodiversity and good agricultural land. I believe it will be an environmental disaster for the area.

Supporting documents for reg 19, see site assessment sheets for Capel, page 10. It states 'not considered suitable' after listing all the effects of the development on this area.

Flooding in this area and the village of Five Oak Green is a real problem, putting a few extra ponds in and under water storage won't solve the problem of surface water flooding if you are going to increase the problem with hard surface areas and reduce the capacity of the land to soak away the water naturally. According to a consulting report by JBA Consulting, page 97 in the supporting documents it states that 75% of this area is already subject to ground water flooding and will only increase over the years. Insurance companies already claim extra insurance because of the risk.

We live directly on the B2017, in the mornings this road is almost impossible to drive on to safely. There are frequent accidents and one fatality in 2019. The road has many blind bends and people rarely adhere to the 40mph speed limit. Despite being sign posted as not suitable for HGVs the lorries still use it as the quickest route to Paddock wood and Maidstone from Tonbridge. The increase in traffic will only make this road more dangerous. This is evident by the number of visual display mirrors along the road already. On page 8 of the Capel Site assessment there is no mention of the B2017 as this will be the main road for all the traffic from the new development I think that this is a serious omission. There, as far as I can find out, have been no surveys on traffic movement along this road. Most people here travel to Tonbridge, Maidstone and Paddock Wood and not Tunbridge Wells. The proposal of a new road to by pass Five Oak Green and join at the existing primary school will not ease

the traffic or help us that live further along the road. There is a serious bottle neck at the school at pick up and drop off times when the road becomes a single lane, with parents parking along Church Lane at the junction and along the main road. I can not see that adding an extra road to the junction will help anyone.

Duty to cooperate. I don't believe that this has been fully met with the people who live in the area who are mostly affected. They displayed the proposals miles away in Tunbridge wells with no direct public transport links or parking. We have 2 village halls, why did they not use them? The plans were in discussion for several years before they were made public. Other options were not seriously considered. After the options and Issue documents were produced, 60% people thought that building along the A21 was the best option and the suggestion of a new garden village had lower support but there was no mention of where it would be built either. There are better places in the borough that are not good agricultural land or subject to flooding or green belt and have better infrastructure in place. Sustainability proposal page 86, Blantyre prison site. This site includes surrounding fields and is about 80 hectares in total, the development area at Tudeley is 94.7 hectares. The reasons for not developing it can be applied to the site at Tudeley for accessibility etc and location should not be a reason for refusing development as they propose a new road to service the Tudeley Development anyway. Castle Hill falls in the industrial estate at Tunbridge wells, it already has infrastructure and road network in place. It is AONB but will still cause less disruption and damage to the environment, it has a station nearby and supermarkets in place.

In conclusion I believe that this is an unsustainable development and will cause lasting damage to the environment and great loss to the area.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

Question 1	
Respondent's Name and/or Organisation	Lisa Landreau
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR SS1 Paddock Wood	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

S4 Reference – Strategic.47, 4.50. Planning and Infrastructure Paper – Paddock Wood transport infrastructure. Sections 4.14, 4.24, 4.42, 4.43, 4.

Closing the Paddock Wood Maistone Road Railway bridge to incoming traffic will cause untold increase of emissions and is not a viable solution to the calming of traffic in the town. The plan has not taken into account the additional 1000 new houses (an average house now owns 2 cars) and the toll it will take on the environment. As the plan indicates, 80% of the traffic leaves PW and the traffic jams at Badsell road and Whetstead Road at peak times are long. As the majority of Paddock Wood live the Waitrose side, the Southbound train journey commuters who utilise the car park will drive an increased mileage of 4.6 miles to park. This is unrealistic and causes increased CO2. Residents who lives on the other side of the bridge will have to take this journey every time they need to get into Paddock Wood - it does not make any type of common sense.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To ensure this plan is to the benefit of the town why not make Commercial road a one way system, the car park entrance at Church road and the other in Old Kent road negating the need for through traffic. The bridge must stay open to all traffic - 99% of the town is built south of the bridge so this would not negate traffic.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- ☐ No, I do not wish to participate in examination hearing session(s)
- ☐ Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

PSTR/SP1

5.800 - TPO are there for a reason so the wording of "expected to retain" is totally unacceptable. THEY HAVE TO REMAIN.

5.801 - The current speed restrictions to 20mph has caused more traffic/speed issues than the previous 30mph, as cars now overtake, often causing issue when turning into Ferbies

5.802 & 5.806 - when the land development proposal was previously submitted, one reason for the rejection was that Kent Highways found insufficient visibility splays when adjoining the Langton Road. These splays have since reduced further with the TPO approvals.

5.803 - the initial view of the historical village will be damaged the upon arrival at the village entrance you will be met with new housing.

5.804 - there are protected plants in the field - photos shared with TWBC and Speldhurst Parish Council - Wild Orchids and Yellow rattle (visible in Spring only). The inspection of land was conducted in late Autumn when the land looks bland.

There needs to village amenities supported. Checking last week the school and Dr are over capacity even without new housing.

5.789 / 5.792 / 5.795 - proposal is not in the village or even the parish. It is Rutshall. How are kids supposed to get there to play. It is not even a short cycle journey. Totally inadequate proposal which shows a lack of the local structure.

[TWBC: comments made on paragraphs 5.789/5.792/5.795 have been duplicated against Policy AL/SP 2: Land at Rusthall Recreation Ground as these comments particular related to this policy - see Comment Number PSLP_58].

A few years back the development of the land was originally proposed and thankfully rejected due to the Highways issues and other reasoning.

Following this decision TWBC advised SPC to draw up a Local Plan. SPC agree to fund the 'Parish Vision' at a significant expense to the budget. It address multiple topics including development.

One of the strongest opinions across the parish, but in particular Speldhurst, was that there should be no development on any Green Belt land, and definitely none on AONB.

Why did TWBC steer the SPC down this route at the expense of us all, only to blatantly ignore the findings.

In addition as stated above the Kent Highways rejected the proposal on road safety issues, which have only increased since with weight of traffic etc.

There are existing parking issues in the village which will be increased with a further 10-12 dwellings probably requiring 2/3 spaces each, but due to development regulations will probably be granted only 12-15. Where are the surplus vehicles to park. On the already very dangerous Langton Road, reducing the exit splay even further?

During WWII, the site was a military camp (visited by Montgomery), so any development I hope will be sensitive to what items may be unearthed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Please find below my objections to the TWBC Local Plan - site in Speldhurst AL SP1.

The proposed site for at least 12 houses in Speldhurst has long been objected to by the village residents since it was first raised 10 years ago. The reasoning remains the same and was validated in our recent Parish Vision.

Unbelievably our own representative SPC now cowardly remain 'neutral' so as to take 'a hit' so that the TWBC have their unnecessary allocation of build.

This should not be an excuse to build on land that, at present, is AONB/Greenbelt. Is a designated conservation area with many listed buildings. (TP1457). This development will become an eyesore - the new Gateway to an historic village. Pushing the boundaries and increasing the size of the village year on year.

This site- an organic meadow with varying protected plant life - which mysteriously has been dug up - is home to badgers and foxes, birdlife/owls, et al. A wondrous eco system.

The site is situated on a precarious section of the Speldhurst road - a sure future black spot if development goes ahead. The Kent Highway has historically deemed the splay too dangerous (5.796). The reduction of speed limit to 20mph has already proven to be detrimental - causing a huge increase in speeding and dangerous driving. (5.796) Speedwatch can confirm this. Therefore the proposed reduction from 40-30/20 will in fact make the road worse.

The village does not need this development. Unaffordable 'Affordable' housing is a conundrum in a aspirational village.

Local children live too far out to benefit from the improved/provision of Rusthall playing field (5.792). The building of the Langton Green Village Hall has already taken away the local Football field and the increase of its school will do nothing to improve the situation (5.795).

Please do not allow this proposal to go ahead. I commiserate with all our villages that are coming under assault - I know Capel has huge issues, a large group of campaigners with a huge budget.

As a Speldhurst resident I don't have such resources to shout out against this pocket build- but that doesn't mean our voice should be swept aside and ignored. Just because a greenfield, bought by developers who have no connection to the village and bought for profit, is made available doesn't mean it should be built in. But we live in hope.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR/CA 1 The Strategy for Capel parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Further to my email below dated 17th October 2017 please take further note of my submission to object to 'The strategy for Capel Parish' (policy STR/CA1).

A lot of excellent work has been carried out by 'Save Capel' and Capel Parish Council, and many concerned others, since my earlier submission, much of it in line with the details in my earlier submission. Most nearly everyone locally is against this proposed development, reflected in the Reg 18 Consultation in which 97% opposed the Plan and also reflected in the unanimous support given to our local councillor in the recent by-elections whose strong views against this plan gained him a great deal of support.

The views expressed by many concerned local residents, and I imagine many Tonbridge residents, are based on sound principles which need to be seriously taken into account if this development is to receive a fair and unbiased assessment. TWBC would be perfectly able to meet its housing commitment over the years with other far more suitable areas for development, some of which have been highlighted by others, it's a matter of not going for the 'easier' option of doing it all in one totally disruptive development but by representing all residents of Tunbridge Wells with a detailed, considered approach, assessing all other options that exist.

Email dated 17 October 2019:

Subject: My Comments on the Local Plan

I am a resident of Five Oak Green, having lived in the area for 48 years. Over those years the roads and infrastructure have been over-stressed with large increases in population, with all that entails, and they are only just able to cope these days. Very little appears to have been done by the Authorities over the years to alleviate the pressures on the roads and infrastructure and I have little confidence in those same Authorities being capable of improving matters for the present population, let alone the enormous increase in population that would ensue with the addition of tens of thousands more. I assume that the local roads and infrastructure would need to be upgraded/rebuilt, but at enormous cost and with great suffering to all during the build process.

Adding a 'garden settlement' to the present housing stock in the area will cause immense pressure on all aspects of life in the immediate Parish of Capel and, indeed, to Tonbridge and Paddock Wood.. All comments below are very relevant to my concerns and **I am writing to object to 'The Strategy for Capel Parish' (Policy STR/CA1)**

Please add my contact details to your consultation database so that I can be kept informed of all future consultations on Planning Policy documents. I understand that my comments will be published by the Borough Council, including on its website.

Creating a garden settlement at Tudeley of 2,800 dwellings will cause immense harm to residents of the Parish of Capel and to residents of Tonbridge. There will be a significant increase in traffic in to Tonbridge from the B2017, exacerbating the extreme traffic congestion that exists on this road every morning. The already unacceptable levels of traffic between 7.45am to 9am on Woodgate Way, Vale Road and Pembury Road coincide with the site of a proposed new 6 form entry senior school. This proposed school will be on the border with Tonbridge, split by a main line railway and alongside a heavily used road. This appears to be a terrible site for a school, surrounded by heavy traffic and requiring children to cross a busy train line to access both sides of the site.

People living in Tudeley will use Tonbridge Station for commuting and Tonbridge town services that will need more parking. The increase in traffic will be more than Tonbridge can cope with. Its roads are already full at peak times and can't be made wider in most places. The increased numbers of

passengers on already packed commuter trains from Tonbridge Station will be unsustainable. Parking in and around Tonbridge Station will be even more difficult. Network Rail have confirmed that a station at Tudeley is not viable at present and so will not be built in this plan period. Most people living in the new garden settlements will drive privately owned cars, despite initiatives to encourage bus and bicycle use. The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. The cost to Tonbridge based businesses due to traffic issues may drive businesses from the area. There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is much closer.

Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that does not fully consider the impact of climate change. Flood mitigation measures may help, but I believe that flood risks will increase. Covering farmed fields with houses and roads will make the Medway flood more often and cause increased flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. There will be an increase in air, light and noise pollution that will spread across the boundary in to Tonbridge & Malling and create a visual scar across the landscape. Views from Tonbridge to the Low and High Weald will be impaired, including the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may end up being surrounded by houses, bus lanes and sit next to a busy road in sight of a big roundabout. That will cause great harm to its value as a heritage asset of world renown (due to the complete set of Marc Chagall windows).

The garden settlement at Tudeley can never be one settlement as it is divided by a railway line that has very narrow, weak crossings. Putting in larger crossings at frequent points across the railway may be possible but it won't tie the two halves of the settlement together enough to make it one settlement, so it will never satisfy garden settlement principles.

Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land and should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.

I believe that housing need calculated by the government can be reduced if it requires development of Green Belt land unless "exceptional circumstances" exist. I would like to see TWBC use this argument to remove the garden settlement at Tudeley from this plan. TWBC is already providing more than their housing need figure in the draft Local Plan. TWBC has taken the housing need figure of 13,560 given to them by government and upscaled it to 14,776 despite having strong grounds to lower it due to the large amount of Green Belt and AONB land in the borough. Taking 1,216 (the upscale) from the 2,800 planned for Tudeley and then asking the government to allow the housing need to fall by 1,584 to factor in the lack of "exceptional circumstances" for building on Green Belt land, would be a much better approach. Recent ONS figures show that population growth in the borough is slowing, making this proposed approach honest and relevant.

The plan preparation process didn't include Tudeley (sites CA1 and CA2) until after the Issues and Options Process in 2017. This means that the largest housing area in the plan didn't go through most of the plan preparation process. There is no detailed Green Belt Study for these sites, no Landscape Assessment, no Biodiversity Assessment. I think that this version of the draft Local Plan isn't complete enough to be ready for public consultation when the land for such a big proportion of the housing hasn't had the same level of assessment as the rest of the plan. The Issues and Options process led to most people (60%) wanting a growth corridor led approach. Less than half wanted a garden settlement and that was when they didn't know the garden settlement would involve destruction of Green Belt. Protecting Green Belt was a key priority for people who participated in the Issues and Options consultation. I think that the plan should be re-written to implement a growth corridor led approach and to protect Green Belt land within the borough.

Earlier in the plan (in 4.40) you refer to Tudeley Village securing a long term option for the borough to deliver the needs of future generations. It is clear from this statement that you intend to add more and more housing to this "garden settlement" in each five year review of future Local Plans. I think that TWBC want to fill Tudeley and East Capel with housing until they coalesce with Tonbridge to the West and Paddock Wood to the East, ultimately creating a massive conurbation that will dwarf Tunbridge Wells town centre. TWBC is using Capel to dump their housing needs on green fields and meadows, polluting a rural area rather than spreading development across the borough on brownfield sites or

placing the garden settlement in the middle of the borough, to make it accessible north and south. The developments in Tudeley and East Capel are unsustainable and place huge pressure on Tonbridge.

I object to the inclusion of land in East Capel in “The Strategy for Paddock Wood” (Policy STR/PW1).

This land is Green Belt land and should only be built upon if an “exceptional circumstance” exists. TWBC’s own assessments in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan’s aims without using the Green Belt land at East Capel. The comment above about coalescence and the creation of a conurbation from Paddock Wood right across to Tonbridge is very relevant here, as is the land’s use as a flood plain. Building here, even with flood risk mitigation and “betterment” could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Comment

Consultee	Christine Latter ([REDACTED])
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Christine Latter ([REDACTED])
Comment ID	PSLP_1301
Response Date	04/06/21 16:15
Consultation Point	Section 4: The Development Strategy and Strategic Policies (View)
Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Christine Latter
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Section 4 – Pre Submission Local Plan	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Housing development is already taking place on three sites surrounding Paddock Wood, at least one of which (Church Road) is known to flood in periods of high rainfall.

With these three current new developments the population of Paddock Wood is likely to rise by more than 40%. The existing infrastructure is inadequate to deal with this increase in population, let alone the further increase generated by the proposed development of areas on the fringes of the town.

Maidstone's Borough Council's proposals to develop sites in the Beltring area will also impact heavily on Paddock Wood, it being the nearest town to the developments (consultation with neighbouring authorities?).

The Capel development will have huge implications for Tonbridge and Malling Borough Council (consultation with neighbouring authorities?) and will put further strain on infrastructure throughout the geographical region. The road network is not suitable for increased volumes of traffic. The health services are already under strain.

A number of retail premises in Commercial Road, Paddock Wood have been forced to close to make way for the new Churchill retirement apartment complex. The former police station has just been demolished and police presence in the area is negligible.

The proposal under consideration to close the road over Paddock Wood railway bridge to all traffic except buses will generate longer journeys and increase air pollution in surrounding areas. The traffic reduction proposal at the station end of Commercial Road is unworkable because of the configuration of surrounding roads.

The proposed cycle path network between outlying new developments and Paddock Wood town centre are unworkable, particularly in areas used by schoolchildren. Footpaths which are redesignated shared use cycle tracks but which don't have any markings to differentiate between the pedestrian lane and the cycle lane (because they're not wide enough to accommodate two lanes) are potentially dangerous to users. Example: Green Lane, TN12 6BF

New schools will not be built until the numbers justify it. What happens in the meantime to those who can't find school places locally?

Where are all these new residents going to work? If there are no local jobs this will put further strain on transport infrastructure.

How will TWBC cope with increased demand for local services: refuse collection, parking, road maintenance.

Will targets for affordable housing be strictly enforced on new developments?

In non Covid times parking facilities in Paddock Wood are just about adequate. Residents of Mascalls Grange and Foalhurst Green are likely to travel into town by car, particularly if planning a supermarket

weekly shop. Will new parking places be created? And which route will traffic take if Commercial Road is closed at the northern end?

A bus service was promised when the Hunters Chase development was built, but didn't happen. Will history repeat itself?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development should be spread more evenly across the TWBC region. At the moment far too much is concentrated in the North West corner, putting too much strain on the infrastructure and changing the nature of the area from semi-rural to urban. Whilst some of these changes may be beneficial in terms of improved and updated services, some are potentially harmful in terms of the environment and public safety, as in the case of flooding and high traffic volumes. Smaller areas of development spread across TWBC would be more easily assimilated, would put less strain on existing resources and would be cheaper and less disruptive. They would also make developments more attractive to potential purchasers.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

(a) in writing, or

(b) by way of electronic communications".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others

at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A 'managed' and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an 'unmanaged' green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit's own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: "...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP's allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Gillian Latter ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden TN27 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Gillian Latter ([REDACTED])
Comment ID	PSLP_2097
Response Date	04/06/21 08:53
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2097, PSLP_2109 and PSLP_2110]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence

to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat. There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in*

combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community

hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden

instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Gillian Latter ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden TN27 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Gillian Latter ([REDACTED])
Comment ID	PSLP_2115
Response Date	04/06/21 08:53
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.4

Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2115, PSLP_2125 and PSLP_2126]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans show different areas for development at the East End and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to*

developers the larger, BNP version of the site for sale, together with Cleveland Farm. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process,

wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.

These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mrs Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.410 to 5.470

Policy PSTR/BE 1: The Strategy for Benenden parish

Inset Maps 17 & 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_121, PSLP_122 and PSLP_123]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

(a) in writing, or

(b) by way of electronic communications".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others

at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

"The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.."

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites "within settlements" and in "sustainable locations."

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development."

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A 'managed' and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an 'unmanaged' green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit's own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: "...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP's allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Gillian Latter ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden TN27 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Gillian Latter ([REDACTED])
Comment ID	PSLP_2109
Response Date	04/06/21 08:53
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2097, PSLP_2109 and PSLP_2110]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence

to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat. There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in*

combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community

hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden

instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mrs Gillian Latter ([REDACTED])

Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2115, PSLP_2125 and PSLP_2126]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans show different areas for development at the East End and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to*

developers the larger, BNP version of the site for sale, together with Cleveland Farm. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process,

wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.

These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at

see web link

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/> Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2115, PSLP_2125 and PSLP_2126]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans show different areas for development at the East End and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TW First Draft Local Plan comments (TWFDLP comments), Savill for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to*

developers the larger, BNP version of the site for sale, together with Cleveland Farm. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS on the draft Local Plan (LP), propose 43 dwellings for the site which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden), have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan (IDP) in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process,

wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated?

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant as seen in Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published); and
- offers photos (B5&6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development.

These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019 that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE3 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of existing pupil at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden rather than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at

see web link

and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Consultee	Mrs Gillian Latter ([REDACTED])
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden TN27 [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mrs Gillian Latter ([REDACTED])
Comment ID	PSLP_2110
Response Date	04/06/21 08:53
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_2097, PSLP_2109 and PSLP_2110]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1. Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence

to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."

2. The PSLP is not based on sound evidence

- . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
- . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
- . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
- . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. This is misleading, since the AONB boundary wraps tightly round AL/BE3, which actually overlaps into the AONB in the southwest corner. In any event both sites affect land in the AONB. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither the chapel nor car park are in the area up for development.

3. Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.

- The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not

achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests

that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on

the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat. There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in the case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . The NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area."* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- . NPPF para 177 states: *"The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in*

combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site."

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot "increase biodiversity".

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A 'managed' green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than 'unmanaged' green space. Further, the three LWS in AL/BE3 & 4 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3 & 4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3 & 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as "mostly PDL". The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community

hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden

instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mrs Gillian Latter
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.410 to 5.470

Policy PSTR/BE 1: The Strategy for Benenden parish

Inset Maps 17 & 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_121, PSLP_122 and PSLP_123]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

(a) in writing, or

(b) by way of electronic communications".

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

- 1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).
- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others

at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.

- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present

- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectarage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal 'on trust'. The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, *or so as to affect*, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A 'managed' and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an 'unmanaged' green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit's own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit**: "...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP's allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 19 (Land to the north of Hawkenbury Recreation Ground)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am writing on behalf of my parents whom live in Hawkenbury Hawkenbury already has so much traffic as a cut through ,Hawkenbury is village not an inner city or trading estate,we should be thinking about the planet and green areas not grey concrete and bright lights and noise ,TW has lost its Royal appeal the council are happy to waste our money on projects like millions spent on the Calverley Park I feel sad to think of other money that has been misused money that we the general public pay.

People are losing their jobs worrying about paying their bills and mortgages the council should be helping reducing bills and helping existing business to stay open.

Hence Hawkenbury does not need this sports arena.

[TWBC: further response received 07 April 2021]:

I writing again regards the above

I grew up in Hawkenbury a peaceful and wonderful community a village with 2 shops and one little church which still remain.

Hawkenbury has become a short cut for all types of traffic why would anyone want more traffic and more road pollution ,we should be preserving our green spaces not filling them with man made material and bright lights and crowds of people ,Hawkenbury isn't an industrial estate or an inner city just a village .

I feel sad having lived in RTW all my life,sad hearing the amount of OUR money that the council has wasted on projects that we don't need or want,please leave the land to stay as a farmers field full of life and nature

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy AL/SA2

[TWBC: this representation has been input against Policies PSTR/SA 1 and AL/SA 2 - see Comment Numbers PSLP_175 and PSLP_176]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: the above amendment to Sandhurst LBD proposed in the Draft Local Plan, I wish to object to this amendment, on account of its non-compliance with the principles and criteria laid out for the re-drawing of LBD's 10626711 in the same document. (p.9 para.2.0 b) ii & iii.) I would like to make the following more detailed observations, considering those principles and criteria which this proposal contravenes.

Principles. 1. 'LBD's are policy lines drawn around the 'main' built up area of a sustainable settlement'. The recent planning application for development of the area SA2 was rejected by TWBC on the grounds, amongst others, that it was not sustainable.

2. 'Land inside the LBD will generally be substantially developed-including buildings, roads etc'. **SA2 is not substantially developed, consisting of a small bungalow in the middle of 4 acres of pasture.**

3. 'The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds etc., unless surrounded by other development'. **The major part of SA2 comprises agricultural land, and to the east is a water course, a pond, and woodland.**

4. 'LBD boundaries should normally follow physical features, eg. roads, walls, field boundaries, etc.'. **The existing western LBD does indeed do this, following the line of a watercourse, and the edge of woodland, but the proposed LBD follows no such physical features.**

5. 'LBD's need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.' **However, Sandhurst does not have 'distinct built up parts'. SA2, the proposed area, has no continuity with the existing village i.e. it is not 'built up', (even though with Sharps Hill Farm and Bayford House, it constitutes 'an enclave of development in the countryside' (V.I.)) and it is separated from the main village by a watercourse, a pond and woodland.**

6. 'There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.' Sharps Hill Farm, Sharps Hill Oast and Bayford House form an enclave **maintaining the rural character of the area.**

Criteria.(used to determine what should and should not be included within LBD boundaries).

a) 'be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside.' **The proposed amendment is, as stated above, not a 'logical extension to the built up area' and it does potentially result in a harmful protrusion into the countryside.(AONB). SA2 is separated from the main village area by a stream, a pond, and woods.**

b) 'not result in coalescence'-important gaps should be retained'. **This is self-explanatory-the proposed LBD will result in coalescence, with the obliteration of an important gap.**

c) 'have no adverse impact on landscape character.' **AONB becomes built on. Building will not enhance the landscape character, and is most certain to have an adverse impact.**

d) 'have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance.'**Recent planning application for this site failed on the grounds, amongst others, that the proposed development did not constitute sustainable development as stipulated in the NPPF, in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon neighbouring designated Heritage Assets.**

e) 'be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character ,appearance or setting-does it relate more to the built environment or to the surrounding countryside?' **The answer to this question is clear-the area SA2 is located in pastureland, and is bounded by a listed and an unlisted heritage asset on the western aspect.**

g)'allow reasonable access to local facilities and services (non-private car mode).' **SA2 is approx. 1 kilometre from the centre of Sandhurst village.**

In addition to principles and criteria , **certain stipulations are listed for exclusion from an LBD.**

ExclusionsII.'Isolated buildings or sporadic/dispersed development e.g. individual or small groups of buildings separated from the main built up area of the settlement'. **Obviously, this applies to the area in question.**

IV.'Large rear gardens or paddocks stretching well out from the main built up form of the settlement'. **Sharps Hill Farm has a large rear garden and pasture which extend south, well out from the main built up line of the village.**

VI.'Buildings in spacious grounds on the edge of the development'.

IX.'Woodlands/forested areas'

XVII.'Hamlets and small clusters of existing development.

We, the undersigned, wish these comments to be absorbed and responded to by yourself. In our opinion, amendment of the Sandhurst LBD to include SA2 goes against principles, criteria and recommended exclusions, and should not therefore proceed.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The amendment of the Sandhurst LBD, SA2, should be withdrawn.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The fact that a planning application for the construction of 15 houses for the area in which SA2 is situated has very recently been rejected by Tunbridge Wells Borough Council(February 2021) on grounds of lack of sustainability relating to AONB and Heritage infringement factors, indicates that this proposed LBD amendment is against the wishes of the majority of the Council .

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/SA 1 The Strategy for Sandhurst parish

Policy AL/SA2

[TWBC: this representation has been input against Policies PSTR/SA 1 and AL/SA 2 - see Comment Numbers PSLP_175 and PSLP_176]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not justified
	<input type="checkbox"/> It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: the above amendment to Sandhurst LBD proposed in the Draft Local Plan, I wish to object to this amendment, on account of its non-compliance with the principles and criteria laid out for the re-drawing of LBD's 10626711 in the same document. (p.9 para.2.0 b) ii & iii.) I would like to make the following more detailed observations, considering those principles and criteria which this proposal contravenes.

Principles. 1. 'LBD's are policy lines drawn around the 'main' built up area of a sustainable settlement'. The recent planning application for development of the area SA2 was rejected by TWBC on the grounds, amongst others, that it was not sustainable.

2. 'Land inside the LBD will generally be substantially developed-including buildings, roads etc'. **SA2 is not substantially developed, consisting of a small bungalow in the middle of 4 acres of pasture.**

3. 'The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds etc., unless surrounded by other development'. **The major part of SA2 comprises agricultural land, and to the east is a water course, a pond, and woodland.**

4. 'LBD boundaries should normally follow physical features, eg. roads, walls, field boundaries, etc.' **The existing western LBD does indeed do this, following the line of a watercourse, and the edge of woodland, but the proposed LBD follows no such physical features.**

5. 'LBD's need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.' **However, Sandhurst does not have 'distinct built up parts'. SA2, the proposed area, has no continuity with the existing village i.e. it is not 'built up', (even though with Sharps Hill Farm and Bayford House, it constitutes 'an enclave of development in the countryside' (V.I.)) and it is separated from the main village by a watercourse, a pond and woodland.**

6. 'There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.' Sharps Hill Farm, Sharps Hill Oast and Bayford House form an enclave **maintaining the rural character of the area.**

Criteria. (used to determine what should and should not be included within LBD boundaries).

a) 'be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside.' **The proposed amendment is, as stated above, not a 'logical extension to the built up area' and it does potentially result in a harmful protrusion into the countryside.(AONB). SA2 is separated from the main village area by a stream, a pond, and woods.**

b) 'not result in coalescence'-important gaps should be retained'. **This is self-explanatory-the proposed LBD will result in coalescence, with the obliteration of an important gap.**

c) 'have no adverse impact on landscape character.' **AONB becomes built on. Building will not enhance the landscape character, and is most certain to have an adverse impact.**

d) 'have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance.'**Recent planning application for this site failed on the grounds, amongst others, that the proposed development did not constitute sustainable development as stipulated in the NPPF, in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon neighbouring designated Heritage Assets.**

e) 'be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character ,appearance or setting-does it relate more to the built environment or to the surrounding countryside?' **The answer to this question is clear-the area SA2 is located in pastureland, and is bounded by a listed and an unlisted heritage asset on the western aspect.**

g)'allow reasonable access to local facilities and services (non-private car mode).' **SA2 is approx. 1 kilometre from the centre of Sandhurst village.**

In addition to principles and criteria , **certain stipulations are listed for exclusion from an LBD.**

ExclusionsII.'Isolated buildings or sporadic/dispersed development e.g. individual or small groups of buildings separated from the main built up area of the settlement'. **Obviously, this applies to the area in question.**

IV.'Large rear gardens or paddocks stretching well out from the main built up form of the settlement'. **Sharps Hill Farm has a large rear garden and pasture which extend south, well out from the main built up line of the village.**

VI.'Buildings in spacious grounds on the edge of the development'.

IX.'Woodlands/forested areas'

XVII.'Hamlets and small clusters of existing development.

We, the undersigned, wish these comments to be absorbed and responded to by yourself. In our opinion, amendment of the Sandhurst LBD to include SA2 goes against principles, criteria and recommended exclusions, and should not therefore proceed.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The amendment of the Sandhurst LBD, SA2, should be withdrawn.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The fact that a planning application for the construction of 15 houses for the area in which SA2 is situated has very recently been rejected by Tunbridge Wells Borough Council(February 2021) on grounds of lack of sustainability relating to AONB and Heritage infringement factors, indicates that this proposed LBD amendment is against the wishes of the majority of the Council .

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation Mr and Mrs Leach

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR 9, STR/SS 1 and STR/SS 3 – see Comment Numbers PSLP_1894, PSLP_1900, PSLP_1906 and PSLP_1907]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

1 Policy STR 1 – The Development Strategy

Object as we have concerns over the consultation Due Process that has informed this strategy, in addition we consider that this strategy fails to comply with the **Duty to Co-operate** (i.e. **legal compliance**) and is **unsound** (i.e. not justified & inconsistent with national policy).

Our concerns and comments, about the first and last requirements, are outlined as follows:

1.1 In view of the large number of local people (over 800, >97%) who objected to the proposed development at Tudeley, during the Regulation 18 consultation, and raised a host of issues (site selection, infrastructure), which have not been properly addressed (see below), and so we have concerns about the review process rigour. In our opinion, there appears to be scant regard given to the overwhelming majority of people who commented about this Strategic site or even to the major concerns raised by an adjoining Authority (Tonbridge & Malling Borough Council, TMBC), as discussed in 1.9.

1.2 Considering the above, we respectfully purport that the Inspectors should not assume that the Council has adopted a rigorous process during the review of the Regulation 18 comments, especially given the weight of these objections regarding the Tudeley site. We ask that the Inspectors satisfy themselves that due regard has been given to these concerns/objections, in taking forward this strategic site and the required infrastructure.

1.3 With regard to Paragraph 16 of the National Planning Policy Framework (NPPF, 2019), it states that “Plans should:

- 1 a) be prepared with the objective of contributing to the achievement of sustainable development; ... c) be shaped by ... effective engagement between plan-makers and communities, local organisations ... and statutory consultees;”

1.4 In our opinion, we do not believe that the Tudeley site contributes to achieving sustainable development, especially as it is a car reliant development with insufficient public transport options (see

Section 1 of our previous letter; Section 1.24 below), nor do the concerns discussed above (in 1.1) indicate the Plan being shaped by communities.

1.5 Also, as outlined in our previous letter (in 1.4, appended), we are concerned about the development within the Green Belt and that the proposals for this Tudeley strategic site fail to comply with Paragraph 138 (NPPF, 2019), which states: (our emphasis added)

*“... Where it has been concluded that it is necessary to release Green Belt land for development, plans should first give consideration to land which has been previously-developed and/or **is well served by public transport**. ...”*

1.6 We are of the opinion that the proposed Development Strategy fails to adequately meet either of these requirements. Due to there being alternative brownfield sites and given the inclusion of the Tudeley site, which has inadequate public transport options. Refer to our previous letter for a full discussion, which is summarised below (see 1.21).

1.7 Considering the points above (in 1.3-1.6), we also have significant concerns about the soundness of the proposed Strategy (STR 1), given the inclusion of the Tudeley site. Since the justification is questionable (see Section 2 in previous letter; Section 3.8-3.14 below) and as this strategic site is inconsistent with national policy (incl. Para. 16 & 138).

1.8 With regard to the consultation itself, we consider that the absence of public exhibitions may exclude many people from engaging in this consultation. Older people tend to have less confidence with technology and so a limited public consultation may disproportionately exclude this group. Hence, we have concerns about whether insufficient ‘due regard’ has been given to them. If insufficient ‘due regard’ has been given to people with protected characteristics, then this consultation process would be contrary to Section 149 of the Equality Act (2010) and so would not be in legal compliance. The Council chose to conduct this consultation during lockdown, but could have waited until national restrictions had been eased to permit such exhibitions.

Concerns over the **Duty to Co-operate**

1.9 We also take this opportunity to **object** to the Development Strategy (STR 1), due to the inclusion of the Tudeley Village, on the basis that at least one strategic matter, namely the significant negative impact on Tonbridge’s local highways network, has not been adequately addressed. As such, we contend that the Duty to Co-operate has not been complied with. Our views in this regard are further discussed below.

1.10 Section 33A of the Planning and Compulsory Purchase Act (2004) imposes a duty on a Local Planning Authority, in this case Tunbridge Wells Borough Council (TWBC), to co-operate with other local planning authorities, on strategic/cross-boundary matters. Our understanding of this is to ensure that sustainable development is achieved, when considering sites that may have a significant impact on other local authority areas.

1.11 We understand that TMBC, like ourselves and many other people, have raised concerns about a number of significant negative impacts that two of the strategic sites (now listed under Policy STR/SS 1 and STR/SS 3) would have on Tonbridge, including on the local highway network and at the train station.

1.12 For ease of reference, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/CA1 and AL/CA1 is included below:

“The potential significant impacts of the proposed development at Tudeley and Capel on the local highway network and on infrastructure and services in nearby Tonbridge are a major concern for TMBC, particularly in light of the existing infrastructure challenges in Tonbridge and surrounding villages ...”

1.13 Similarly, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/PW1 and AL/PW1 is included below:

“... future rail capacity ... extends not only to train services but to commuter parking and likely travel habits. The frequency of services at Tonbridge station makes this the more likely destination for commuters when compared to Paddock Wood.”

1.14 The significant concerns made by TMBC, are similar to those that we previously raised at the Regulation 18 consultation. Refer to Section 1 of our previous letter (incl. 1.9). We also support the previous objection comments made by TMBC.

1.15 Despite the above local highway concerns being raised and Sweco's highway modelling (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (for TWBC) showing that the proposed developments would cause a severe impact on many of our roads/junctions, some of which are over practical capacity, the up-dated Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) only includes a single improvement in Tonbridge. This relates to the Vauxhall Roundabout (A26/A2014, i.e. A21/Pembury Rd).

1.16 Furthermore, even with the proposed improvement, at this single junction, Sweco's modelling shows that proposed developments will still result in this junction becoming over practical capacity (i.e. >95%), when it would have been below this in the 2038 reference case. Refer to PDF page 154 of the Transport Evidence Modelling Report¹. As such, this highway improvement is therefore insufficient to mitigate the likely impact.

1.17 In addition, there are no highway improvements proposed at the roundabout linking the B2017, which is the only road from Tudeley to Tonbridge, with the previously discussed junction (A26/A2014). This is despite the junction traffic volume increasing from 81% currently (or 85% in the 2038 reference case), to over 96-99% (i.e. over practical capacity) in all the proposed development cases. Refer to PDF page 115 of the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]). Moreover, with reference to Figures 9.6 to 9.8 (in the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), the severe impact on local highway network around Tonbridge, can be starkly seen. For instance, most of the junctions modelled turn red (>95%) and a massive increase in the queue lengths are evident at these junctions, when comparing the reference and Local Plan cases.

1.18 This evidence, presented in Sweco's report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), clearly substantiates the concerns TWBC have and that we previously raised about the significant negative/severe impact that the Development Strategy would have on Tonbridge's local highway network. We strongly contest that the mitigation measures proposed in the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) are insufficient to mitigate these severe impacts and those on the wider network, so TWBC may have failed to fulfil their legal obligation under the Duty to Co-operate.

1.19 We also strongly believe that it is not right that TWBC should take forward plans to build over-half of TWBC's total housing allocation, at the edge of its Borough, knowing full well the severe impact it will have on a neighbouring authority and our town. This goes against the spirit of your legal Duty, to ensure that sustainable development is achieved, which may also actually fail this legal test. We ask TWBC to re-consider these inappropriate and unsustainable plans, particularly with the inadequate public transport proposed and without adequate highway improvements. We also trust that the Inspectors would consider recommending that the Plan to be withdrawn, if this Plan is submitted in its current guise, in view of the significant shortcomings noted.

1.20 Another consideration is that the congestion, from the severe Local Plan impact (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), is likely to result in air quality limits being exceeded in Tonbridge and is most likely to harm the sustainable economic growth of our town (see previous letter, incl. 1.11-13). This increase in congestion, in Tonbridge and along the B2017 - particularly during the morning peak/school times, also brings into question the adequacy of the proposed Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) and the soundness of the proposed Tudeley site.

1.21 In-terms of the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021)). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link:https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]), TWBC appear to be placing reliance on a single public transport mode – buses. This appears to mask the fundamental flaw of this poorly connected development site and the severe highway network impacts in the Local Plan scenario (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (in 1.15). In addition, the severe impact contradicts Policy EN1 2.2.

1.22 A concern of ours is about how the proposed bus service is being presented. This Plan proposes a 'rapid bus' link. However, we strongly contest the assertion that the proposed bus service would be a 'rapid' link, due to the congestion highlighted above. A rapid bus link would most likely require major road improvements along the entire route, including the provision of dedicated bus lanes/footways along the B2017 and through Tonbridge to the station, which is the mostly likely commuter destination (1.13).

1.23 Furthermore, without proper road improvements (i.e. dedicated lanes), it brings into doubt the effectiveness of any bus service in taking the huge number of extra cars off the road. The congestion along the route from Tudeley to Tonbridge, with commuters stuck on buses in traffic jams, will reduce the attractiveness of any new bus routes and so more people are likely to just opt for the comfort/convenience of their own cars. In our opinion, this Local Plan fails to address the significant shortcomings highlighted above and the validity of Sweco's highway modelling (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) may now be questionable, if an unrealistic number of commuters are assumed to be using the bus service. If the latter is the case, then the severe highways impact evidenced (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) and harm will all be amplified.

1.24 In addition, to the question marks over the compliance with the Duty to Co-operate, we have the view that this Strategy will create a massive car reliant commuter settlement, with the lack of public transport options and sufficient local jobs. This is discussed in our previous letter (1.9 & 1.10). As such, we contest that this Local Plan fails to comply with national policy (i.e. legal compliance). For instance, Para. 103 (NPPF, 2019) states: "... *Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes.*"

1.25 We note previous precedence's where Inspectors have rejected similar garden village proposals (incl. in the West of England Plan), due to these developments being too heavily reliant on private cars. Again, we ask the Inspectors to consider recommending that the Plan to be withdrawn, if it is submitted in its current disguise, in view of the significant shortcomings and potential non-legal compliance issues highlighted above.

In closing, as discussed above, the Infrastructure Delivery Plan² fails to adequately address the severe impact on the local highways network, particularly in Tonbridge, and the significant concerns raised by TMBC and many others previously. As such, there are questions over the consultation review rigour (e.g. Due Process) and compliance with the Duty to Co-operate (i.e. legal compliance). We have also reiterated a number of examples where this strategy has not been justified and where it is inconsistent with national policy (e.g. in 1.24).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 1

Respondent's Name and/or Organisation Mr and Mrs Leach

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

[TWBC: this representation has been input against Policies STR 1, STR 9, STR/SS 1 and STR/SS 3 – see Comment Numbers PSLP_1894, PSLP_1900, PSLP_1906 and PSLP_1907]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

1 Policy STR 1 – The Development Strategy

Object as we have concerns over the consultation Due Process that has informed this strategy, in addition we consider that this strategy fails to comply with the **Duty to Co-operate** (i.e. **legal compliance**) and is **unsound** (i.e. not justified & inconsistent with national policy).

Our concerns and comments, about the first and last requirements, are outlined as follows:

1.1 In view of the large number of local people (over 800, >97%) who objected to the proposed development at Tudeley, during the Regulation 18 consultation, and raised a host of issues (site selection, infrastructure), which have not been properly addressed (see below), and so we have concerns about the review process rigour. In our opinion, there appears to be scant regard given to the overwhelming majority of people who commented about this Strategic site or even to the major concerns raised by an adjoining Authority (Tonbridge & Malling Borough Council, TMBC), as discussed in 1.9.

1.2 Considering the above, we respectfully purport that the Inspectors should not assume that the Council has adopted a rigorous process during the review of the Regulation 18 comments, especially given the weight of these objections regarding the Tudeley site. We ask that the Inspectors satisfy themselves that due regard has been given to these concerns/objections, in taking forward this strategic site and the required infrastructure.

1.3 With regard to Paragraph 16 of the National Planning Policy Framework (NPPF, 2019), it states that “Plans should:

- 1 a) be prepared with the objective of contributing to the achievement of sustainable development; ... c) be shaped by ... effective engagement between plan-makers and communities, local organisations ... and statutory consultees;”

1.4 In our opinion, we do not believe that the Tudeley site contributes to achieving sustainable development, especially as it is a car reliant development with insufficient public transport options (see

Section 1 of our previous letter; Section 1.24 below), nor do the concerns discussed above (in 1.1) indicate the Plan being shaped by communities.

1.5 Also, as outlined in our previous letter (in 1.4, appended), we are concerned about the development within the Green Belt and that the proposals for this Tudeley strategic site fail to comply with Paragraph 138 (NPPF, 2019), which states: (our emphasis added)

*“... Where it has been concluded that it is necessary to release Green Belt land for development, plans should first give consideration to land which has been previously-developed and/or **is well served by public transport**. ...”*

1.6 We are of the opinion that the proposed Development Strategy fails to adequately meet either of these requirements. Due to there being alternative brownfield sites and given the inclusion of the Tudeley site, which has inadequate public transport options. Refer to our previous letter for a full discussion, which is summarised below (see 1.21).

1.7 Considering the points above (in 1.3-1.6), we also have significant concerns about the soundness of the proposed Strategy (STR 1), given the inclusion of the Tudeley site. Since the justification is questionable (see Section 2 in previous letter; Section 3.8-3.14 below) and as this strategic site is inconsistent with national policy (incl. Para. 16 & 138).

1.8 With regard to the consultation itself, we consider that the absence of public exhibitions may exclude many people from engaging in this consultation. Older people tend to have less confidence with technology and so a limited public consultation may disproportionately exclude this group. Hence, we have concerns about whether insufficient ‘due regard’ has been given to them. If insufficient ‘due regard’ has been given to people with protected characteristics, then this consultation process would be contrary to Section 149 of the Equality Act (2010) and so would not be in legal compliance. The Council chose to conduct this consultation during lockdown, but could have waited until national restrictions had been eased to permit such exhibitions.

Concerns over the **Duty to Co-operate**

1.9 We also take this opportunity to **object** to the Development Strategy (STR 1), due to the inclusion of the Tudeley Village, on the basis that at least one strategic matter, namely the significant negative impact on Tonbridge’s local highways network, has not been adequately addressed. As such, we contend that the Duty to Co-operate has not been complied with. Our views in this regard are further discussed below.

1.10 Section 33A of the Planning and Compulsory Purchase Act (2004) imposes a duty on a Local Planning Authority, in this case Tunbridge Wells Borough Council (TWBC), to co-operate with other local planning authorities, on strategic/cross-boundary matters. Our understanding of this is to ensure that sustainable development is achieved, when considering sites that may have a significant impact on other local authority areas.

1.11 We understand that TMBC, like ourselves and many other people, have raised concerns about a number of significant negative impacts that two of the strategic sites (now listed under Policy STR/SS 1 and STR/SS 3) would have on Tonbridge, including on the local highway network and at the train station.

1.12 For ease of reference, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/CA1 and AL/CA1 is included below:

“The potential significant impacts of the proposed development at Tudeley and Capel on the local highway network and on infrastructure and services in nearby Tonbridge are a major concern for TMBC, particularly in light of the existing infrastructure challenges in Tonbridge and surrounding villages ...”

1.13 Similarly, an extract from TMBC’s objection comments, at the Regulation 18 consultation, under Policy Number: STR/PW1 and AL/PW1 is included below:

“... future rail capacity ... extends not only to train services but to commuter parking and likely travel habits. The frequency of services at Tonbridge station makes this the more likely destination for commuters when compared to Paddock Wood.”

1.14 The significant concerns made by TMBC, are similar to those that we previously raised at the Regulation 18 consultation. Refer to Section 1 of our previous letter (incl. 1.9). We also support the previous objection comments made by TMBC.

1.15 Despite the above local highway concerns being raised and Sweco's highway modelling (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (for TWBC) showing that the proposed developments would cause a severe impact on many of our roads/junctions, some of which are over practical capacity, the up-dated Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) only includes a single improvement in Tonbridge. This relates to the Vauxhall Roundabout (A26/A2014, i.e. A21/Pembury Rd).

1.16 Furthermore, even with the proposed improvement, at this single junction, Sweco's modelling shows that proposed developments will still result in this junction becoming over practical capacity (i.e. >95%), when it would have been below this in the 2038 reference case. Refer to PDF page 154 of the Transport Evidence Modelling Report¹. As such, this highway improvement is therefore insufficient to mitigate the likely impact.

1.17 In addition, there are no highway improvements proposed at the roundabout linking the B2017, which is the only road from Tudeley to Tonbridge, with the previously discussed junction (A26/A2014). This is despite the junction traffic volume increasing from 81% currently (or 85% in the 2038 reference case), to over 96-99% (i.e. over practical capacity) in all the proposed development cases. Refer to PDF page 115 of the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]). Moreover, with reference to Figures 9.6 to 9.8 (in the Report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), the severe impact on local highway network around Tonbridge, can be starkly seen. For instance, most of the junctions modelled turn red (>95%) and a massive increase in the queue lengths are evident at these junctions, when comparing the reference and Local Plan cases.

1.18 This evidence, presented in Sweco's report (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), clearly substantiates the concerns TWBC have and that we previously raised about the significant negative/severe impact that the Development Strategy would have on Tonbridge's local highway network. We strongly contest that the mitigation measures proposed in the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) are insufficient to mitigate these severe impacts and those on the wider network, so TWBC may have failed to fulfil their legal obligation under the Duty to Co-operate.

1.19 We also strongly believe that it is not right that TWBC should take forward plans to build over-half of TWBC's total housing allocation, at the edge of its Borough, knowing full well the severe impact it will have on a neighbouring authority and our town. This goes against the spirit of your legal Duty, to ensure that sustainable development is achieved, which may also actually fail this legal test. We ask TWBC to re-consider these inappropriate and unsustainable plans, particularly with the inadequate public transport proposed and without adequate highway improvements. We also trust that the Inspectors would consider recommending that the Plan to be withdrawn, if this Plan is submitted in its current guise, in view of the significant shortcomings noted.

1.20 Another consideration is that the congestion, from the severe Local Plan impact (Sweco UK Ltd. (2021). 'Local Plan Transport Evidence Base'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]), is likely to result in air quality limits being exceeded in Tonbridge and is most likely to harm the sustainable economic growth of our town (see previous letter, incl. 1.11-13). This increase in congestion, in Tonbridge and along the B2017 - particularly during the morning peak/school times, also brings into question the adequacy of the proposed Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]) and the soundness of the proposed Tudeley site.

1.21 In-terms of the Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021)). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link:https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021]), TWBC appear to be placing reliance on a single public transport mode – buses. This appears to mask the fundamental flaw of this poorly connected development site and the severe highway network impacts in the Local Plan scenario (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) (in 1.15). In addition, the severe impact contradicts Policy EN1 2.2.

1.22 A concern of ours is about how the proposed bus service is being presented. This Plan proposes a 'rapid bus' link. However, we strongly contest the assertion that the proposed bus service would be a 'rapid' link, due to the congestion highlighted above. A rapid bus link would most likely require major road improvements along the entire route, including the provision of dedicated bus lanes/footways along the B2017 and through Tonbridge to the station, which is the mostly likely commuter destination (1.13).

1.23 Furthermore, without proper road improvements (i.e. dedicated lanes), it brings into doubt the effectiveness of any bus service in taking the huge number of extra cars off the road. The congestion along the route from Tudeley to Tonbridge, with commuters stuck on buses in traffic jams, will reduce the attractiveness of any new bus routes and so more people are likely to just opt for the comfort/convenience of their own cars. In our opinion, this Local Plan fails to address the significant shortcomings highlighted above and the validity of Sweco's highway modelling (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) may now be questionable, if an unrealistic number of commuters are assumed to be using the bus service. If the latter is the case, then the severe highways impact evidenced (Sweco UK Ltd. (2021)). 'Local Plan Transport Evidence Base ...'. Web link: https://tunbridgewells.gov.uk/_data/assets/pdf_file/0004/385321/TWBC-Local-Plan-Transport-Evidence-Modelling-Report.pdf [March 2021]) and harm will all be amplified.

1.24 In addition, to the question marks over the compliance with the Duty to Co-operate, we have the view that this Strategy will create a massive car reliant commuter settlement, with the lack of public transport options and sufficient local jobs. This is discussed in our previous letter (1.9 & 1.10). As such, we contest that this Local Plan fails to comply with national policy (i.e. legal compliance). For instance, Para. 103 (NPPF, 2019) states: "... *Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes.*"

1.25 We note previous precedence's where Inspectors have rejected similar garden village proposals (incl. in the West of England Plan), due to these developments being too heavily reliant on private cars. Again, we ask the Inspectors to consider recommending that the Plan to be withdrawn, if it is submitted in its current disguise, in view of the significant shortcomings and potential non-legal compliance issues highlighted above.

In closing, as discussed above, the Infrastructure Delivery Plan² fails to adequately address the severe impact on the local highways network, particularly in Tonbridge, and the significant concerns raised by TMBC and many others previously. As such, there are questions over the consultation review rigour (e.g. Due Process) and compliance with the Duty to Co-operate (i.e. legal compliance). We have also reiterated a number of examples where this strategy has not been justified and where it is inconsistent with national policy (e.g. in 1.24).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: this representation has been input against Policies STR 1, STR 9, STR/SS 1 and STR/SS 3 – see Comment Numbers PSLP_1894, PSLP_1900, PSLP_1906 and PSLP_1907]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

4. Policy STR /SS 1 – The Strategy for Paddock Wood, including land at east Capel

Object as we have concerns over the **soundness** (i.e. the justification, not positively prepared and inconsistency with national policy) of this Policy.

Our concerns and comments, are outlined as follows:

4.1 We have similar concerns to those we have raised about the Tudeley Strategic site (Policy SS /SS 3), as noted above in Section 3. This includes the following:

- The highway impact, as the frequency of services at Tonbridge station makes this the more likely destination for future commuters, residing at this site, based on the less frequent trains that serve Paddock Wood station (see Section 1).
- In-addition, to the 2,800 units proposed at Tudeley, a further 4,000 units are proposed at this site. Having over-half of TWBC's allocation within two nearby peripheral sites is likely to result in the super-saturation of the local housing market, with largely unaffordable new builds. This risks the allocation and infrastructure delivery, with likely low build-out rates, as discussed above (3.4-3.5).
- This part of East Capel site is on a natural flood plain. In view of the alternative sites, which are not at risk of flooding, then this Strategic site would likely fail the sequential test. As such, this is not sound, i.e. inconsistent with national policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Re: Pre-Submission Local Plan (Regulation 19 Consultation) – Comments

Further to our comments on the Draft Local Plan, during the previous Consultation (Regulation 18). We again write to you, to raise our concerns about the proposed garden settlements and to object to various policies, as we do not believe that our original concerns, and those raised by others, have been adequately addressed in the Pre-Submission Plan.

We wish to take this opportunity to reiterate and elaborate on some of our key concerns, as outlined in our previous letter (dated 25th October 2019). In an effort to be concise, we will not repeat all particulars and so the reader is referred to this letter for context and completeness. For ease of reference, we have enclosed a copy of our original letter (in Appendix A).

Following the publication of Pre-Submission version of the Local Plan, we also now wish to raise other concerns, such as the legal compliance in-terms of the Duty to Co-operate and consistency with national policies.

Our comments on the Pre-Submission Local Plan, related to several policies, are outlined under the headings stated below. We are specifically concerned about the deficiencies in the proposed strategic infrastructure and the questionable need to release Green Belt land.

3. Policy STR /SS 3 – The Strategy for Tudeley Village

Object as we have concerns over the **soundness** (i.e. the justification, not positively prepared and inconsistency with national policy) of this Policy.

Our concerns and comments, are outlined as follows:

3.1 With regard to our previous letter (1.1-1.3, appended) and Section 1 above (1.15-1.18), we highlighted how there is insufficient infrastructure/road improvements proposed and inadequate public transport options to address the severe highways impact and the other concerns raised. As such, in our opinion the proposed Strategy is not sound, as the proposals (incl. Infrastructure Delivery Plan (Tunbridge Wells Borough Council (2021). 'Local Plan, Infrastructure Delivery Plan, Draft ...'. Web link: https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388026/Infrastructure-Delivery-Plan_2021.pdf [Mar. 2021])) fail to adequately meet the identified infrastructure **needs**, as discussed in Section 1, to support this huge Strategic site.

3.2 With reference to Paragraph 35 of the NPPF (2019), one of the two criteria that Local Plans are assessed against is whether it is positively prepared and it is consistent with national policy, the former is stated below. (our emphasis added)

*Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed **needs** ...where it is practical to do so and is consistent with achieving sustainable development*

3.3 Based on the above Strategy shortfalls, in-terms of infrastructure needs, and as the NPPF (Para. 35, 2019) requires a strategy that "meets the area's ... assessed needs", we reiterate that this Strategy fails the test of Positively prepared and so is unsound.

3.4 In our previous letter (2.14-2.17), we also remarked that the reliance on two large nearby Strategic sites (e.g. Capel: 51% of new homes) risks the allocation deliverability, due to the super-saturation of

the local housing market, with likely low build-out rates. This is based on the Letwin Review (Rt Hon Sir O. Letwin MP (2018). Independent Review of build out, final report. MHCLG. Web link: www.gov.uk/government/publications/independent-review-of-build-out-final-report [Aug. 2020])(2018). In-addition, low-build rates will also undermine the viability of the proposed infrastructure and so compound such impacts.

3.5 Paragraph 16 (NPPF, (2019) states Plans should “be prepared positively, in a way that is aspirational but deliverable”. As such, we believe that the proposed Plan is not positively prepared nor is it deliverable. Therefore, we think modifications are required to make the Local Plan sound (incl. lower housing numbers in Capel and adequate infrastructure, e.g. a railway station to provide better public transport options).

3.6 On the basis, of the lack of infrastructure (e.g. insufficient highways improvements and public transport links, see Section 1 above), this Policy is unlikely to enable the “delivery of sustainable development”, as required in the NPPF (Para. 35 d), (2019). Additionally, we are also of the opinion that garden settlements, like the proposed, rarely deliver sustainable development; especially considering the lack of public transport options and the limited number of local jobs, which will make this a car reliant commuter settlement. In view of this and the points raised previously (e.g. in 1.4-1.6), we believe that this Policy is not consistent with national policy and so is not sound.

3.7 Further to our comments above in Section 2 (in 2.12-2.14), other factors need to be considered when determining exceptional circumstances for releasing Green Belt land. Most notably sustainability (questionable at this site – see 3.6), viability (questionable if adequate infrastructure is to be delivered – see 1.15-1.22, 3.5) and deliverability (questionable given the likely low build-out rates – see 3.4). In view of the questions over the sustainability, viability and deliverability of this site, less weight should be given to these factors. As such, we believe the Tudeley Strategic site would fail the test of exceptional circumstances, when considering that this site would cause the highest level of harm to the Green Belt (Tunbridge Wells Borough Council (2017). ‘Green Belt Study Stage Two’ Web link: https://tunbridgewells.gov.uk/__data/assets/pdf_file/0003/343839/Tunbridge-Wells-Green-Belt-Stage-2.pdf [May. 2021] and Tunbridge Wells Borough Council (2020). ‘Green Belt Study Stage Three, ...’. Web link: https://tunbridge-wells.gov.uk/__data/assets/pdf_file/0009/385317/Green-Belt-Study-Stage-Three_Rev1.pdf [Mar. 2021]), and so this Policy is inconsistent with national policy.

3.8 In addition, we are of the opinion that this Strategic site is not justified and so this Policy is not sound. With reference to our previous letter, we raised some concerns about justification of this Strategic site, which are still valid, in-terms of the allocation distribution (see 2.3) and release of Green Belt over brownfield sites (see 2.4 & 2.11). In Section 2 (above), we have elaborated on some of these original concerns.

3.9 We also note that many other people have previously raised concerns about flooding, which is a concern we share too. It is widely acknowledged that climate change will cause more intense rainfall and more frequent flooding. For instance, areas with a present-day probability of 1 in 100 years, are likely to have higher a probability (e.g. 1 in 75 years). The upshot of this that some areas previously designated as Flood Zone 1 (or 2) are likely in the future to have the same probability as Flood Zone 2 (or 3) is now, and so a much larger area of the Tudeley development is likely to fall within Flood Zone 2. The Government has declared a ‘Climate Change Emergency’ and so we cannot continue as before, just building on the floodplain, with the likely greater future flooding.

3.10 This development is likely to cause greater down-stream flooding. Moreover, the Leigh Barrier should not be relied upon, as water is released when it is at capacity (e.g. 2013).

3.11 In view of the flood risk, greater weight should be given against this site, as it is at risk of flooding (including Flood Zone 2). With reference to Paragraph 157 (NPPF, 2019), it states that Plans should apply the sequential test “taking into account the current and future impacts of climate change”. Again, there are site selection questions, with this Strategic site causing the highest Green Belt harm (2.3-2.5) and as it is partly located within Flood Zone 2, unlike other alternative sites (2.6-2.10). Thus, we believe that this site is not sound (i.e. not justified), as there are other more suitable alternative sites.

3.12 Please refer to our previous letter (see 2.7-2.12) that presented our concerns about the Sustainability Appraisal for this Strategic site, which is largely unchanged. In particular, one of our concerns related to the scoring of this Strategic site. Again, we have similar concerns about the up-dated Sustainability Appraisal; including the inconsistency of the scoring between the sites, with some favourable bias towards this Strategic site. For instance, Pembury site 190 scores neutral (“0”) for

Travel, compared to Tudeley that has a positive score (“++”), despite the Tudeley site having inadequate transport infrastructure (see 1.15-23). Whereas, Pembury has better transport links - main roads, e.g. A21 and A228/A264, good bus services and cycleways. A comparison of these two sites was made by SaveCapel6 (Appendix C) and highlights many inconsistencies.

3.13 Furthermore, even though the Land use scores the worst, we do not believe that the scores for Options 1 and 2 (i.e. “--” or “--/---”) reflect the true total negative score (i.e. “---”) of this site, due to the inefficient development land use, with low housing densities (see 2.11-2.12 above). In our previous letter, we also discussed how unsustainable the site allocation was, with an approach that appeared to favour Green Belt release over re-developing brownfield sites (see 2.10-2.12 of our previous letter and 2.8 above).

3.14 The Sustainability Appraisal (in Section 6.2.35) recognises some of the negative impacts that this development, would have, with most of the environmental objectives having negative scores. With reference to our previous comments (in 2.8d), we highlighted that there are insufficient net gains across the other overarching Objectives (economic and social) to offset the immense environmental harm of this Strategic site. Moreover, in view of the biased site scoring (3.12), the severe wider highways impact that is not recognised in this scoring (1.17 & 1.20 - e.g. congestion and air pollution – economic/social impacts) and as the down-graded heritage score (i.e. a social harm), there will be even fewer net gains, in which to offset the high environmental harm.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: the above amendment to Sandhurst LBD proposed in the Draft Local Plan, I wish to object to this amendment, on account of its non-compliance with the principles and criteria laid out for the re-drawing of LBD's10626711 in the same document.(p.9 para.2.0 b) ii & iii.) I would like to make the following more detailed observations, considering those principles and criteria which this proposal contravenes.

Principles.1.' LBD's are policy lines drawn around the 'main' built up area of a sustainable settlement'. The recent planning application for development of the area SA2 was rejected by TWBC on the grounds, amongst others, that it was not sustainable.

2. 'Land inside the LBD will generally be substantially developed-including buildings, roads etc'. **SA2 is not substantially developed, consisting of a small bungalow in the middle of 4 acres of pasture.**

3. 'The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds etc., unless surrounded by other development'. **The major part of SA2 comprises agricultural land, and to the east is a water course, a pond, and woodland.**

4. 'LBD boundaries should normally follow physical features, eg. roads, walls, field boundaries, etc.' **The existing western LBD does indeed do this, following the line of a watercourse, and the edge of woodland, but the proposed LBD follows no such physical features.**

5. 'LBD's need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.' **However, Sandhurst does not have 'distinct built up parts'. SA2, the proposed area, has no continuity with the existing village i.e. it is not 'built up', (even though with Sharps Hill Farm and Bayford House, it constitutes 'an enclave of development in the countryside' (V.I.)) and it is separated from the main village by a watercourse, a pond and woodland.**

6.'There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.' Sharps Hill Farm, Sharps Hill Oast and Bayford House form an enclave **maintaining the rural character of the area.**

Criteria.(used to determine what should and should not be included within LBD boundaries).

a) 'be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside.' **The proposed amendment is, as stated above, not a 'logical extension to the built up area' and it does potentially result in a harmful protrusion into the countryside.(AONB). SA2 is separated from the main village area by a stream, a pond, and woods.**

b) 'not result in coalescence'-important gaps should be retained'. **This is self-explanatory-the proposed LBD will result in coalescence, with the obliteration of an important gap.**

c) 'have no adverse impact on landscape character.' **AONB becomes built on. Building will not enhance the landscape character, and is most certain to have an adverse impact.**

d) 'have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance.'**Recent planning application for this site failed on the grounds, amongst others, that the proposed development did not constitute sustainable development as stipulated in the NPPF, in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon neighbouring designated Heritage Assets.**

e) 'be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character ,appearance or setting-does it relate more to the built environment or to the surrounding countryside?' **The answer to this question is clear-the area SA2 is located in pastureland, and is bounded by a listed and an unlisted heritage asset on the western aspect.**

g)'allow reasonable access to local facilities and services (non-private car mode).' **SA2 is approx. 1 kilometre from the centre of Sandhurst village.**

In addition to principles and criteria , **certain stipulations are listed for exclusion from an LBD.**

ExclusionsII.'Isolated buildings or sporadic/dispersed development e.g. individual or small groups of buildings separated from the main built up area of the settlement'. **Obviously, this applies to the area in question.**

IV.'Large rear gardens or paddocks stretching well out from the main built up form of the settlement'. **Sharps Hill Farm has a large rear garden and pasture which extend south, well out from the main built up line of the village.**

VI.'Buildings in spacious grounds on the edge of the development'.

IX.'Woodlands/forested areas'

XVII.'Hamlets and small clusters of existing development.

We, the undersigned, wish these comments to be absorbed and responded to by yourself. In our opinion, amendment of the Sandhurst LBD to include SA2 goes against principles, criteria and recommended exclusions, and should not therefore proceed.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The amendment of the Sandhurst LBD, SA2, should be withdrawn.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The fact that a planning application for the construction of 15 houses for the area in which SA2 is situated has very recently been rejected by Tunbridge Wells Borough Council (February 2021) on grounds of lack of sustainability relating to AONB and Heritage infringement factors, indicates that this proposed LBD amendment is against the wishes of the majority of the Council .

Question 1	
Respondent's Name and/or Organisation	Parvin Leach
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/SA 1 The Strategy for Sandhurst parish

Policy AL/SA2

[TWBC: this representation has been input against Policies PSTR/SA 1 and AL/SA 2 - see Comment Numbers PSLP_177 and PSLP_178]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Re: the above amendment to Sandhurst LBD proposed in the Draft Local Plan, I wish to object to this amendment, on account of its non-compliance with the principles and criteria laid out for the re-drawing of LBD's 10626711 in the same document. (p.9 para.2.0 b) ii & iii.) I would like to make the following more detailed observations, considering those principles and criteria which this proposal contravenes.

Principles. 1. 'LBD's are policy lines drawn around the 'main' built up area of a sustainable settlement'. The recent planning application for development of the area SA2 was rejected by TWBC on the grounds, amongst others, that it was not sustainable.

2. 'Land inside the LBD will generally be substantially developed-including buildings, roads etc'. **SA2 is not substantially developed, consisting of a small bungalow in the middle of 4 acres of pasture.**

3. 'The main land uses outside the LBD will generally comprise of or be used for agriculture, woodland, lakes/ponds etc., unless surrounded by other development'. **The major part of SA2 comprises agricultural land, and to the east is a water course, a pond, and woodland.**

4. 'LBD boundaries should normally follow physical features, eg. roads, walls, field boundaries, etc.'. **The existing western LBD does indeed do this, following the line of a watercourse, and the edge of woodland, but the proposed LBD follows no such physical features.**

5. 'LBD's need not be contiguous. It may be appropriate for a settlement to have two (or more) separate elements, where this reflects distinct built up parts, e.g. Goudhurst.' **However, Sandhurst does not have 'distinct built up parts'. SA2, the proposed area, has no continuity with the existing village i.e. it is not 'built up', (even though with Sharps Hill Farm and Bayford House, it constitutes 'an enclave of development in the countryside' (V.I.)) and it is separated from the main village by a watercourse, a pond and woodland.**

6. 'There may be some fringe areas beyond a settlement's more consolidated core, as well as smaller villages/hamlets and enclaves of development in the countryside that do not have a LBD, in order to maintain the overall rural character of an area.' Sharps Hill Farm, Sharps Hill Oast and Bayford House form an enclave **maintaining the rural character of the area.**

Criteria.(used to determine what should and should not be included within LBD boundaries).

a) 'be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside.' **The proposed amendment is, as stated above, not a 'logical extension to the built up area' and it does potentially result in a harmful protrusion into the countryside.(AONB). SA2 is separated from the main village area by a stream, a pond, and woods.**

b) 'not result in coalescence'-important gaps should be retained'. **This is self-explanatory-the proposed LBD will result in coalescence, with the obliteration of an important gap.**

c) 'have no adverse impact on landscape character.' **AONB becomes built on. Building will not enhance the landscape character, and is most certain to have an adverse impact.**

d) 'have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance.'**Recent planning application for this site failed on the grounds, amongst others, that the proposed development did not constitute sustainable development as stipulated in the NPPF, in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon neighbouring designated Heritage Assets.**

e) 'be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character ,appearance or setting-does it relate more to the built environment or to the surrounding countryside?' **The answer to this question is clear-the area SA2 is located in pastureland, and is bounded by a listed and an unlisted heritage asset on the western aspect.**

g)'allow reasonable access to local facilities and services (non-private car mode).' **SA2 is approx. 1 kilometre from the centre of Sandhurst village.**

In addition to principles and criteria , **certain stipulations are listed for exclusion from an LBD.**

ExclusionsII.'Isolated buildings or sporadic/dispersed development e.g. individual or small groups of buildings separated from the main built up area of the settlement'. **Obviously, this applies to the area in question.**

IV.'Large rear gardens or paddocks stretching well out from the main built up form of the settlement'. **Sharps Hill Farm has a large rear garden and pasture which extend south, well out from the main built up line of the village.**

VI.'Buildings in spacious grounds on the edge of the development'.

IX.'Woodlands/forested areas'

XVII.'Hamlets and small clusters of existing development.

We, the undersigned, wish these comments to be absorbed and responded to by yourself. In our opinion, amendment of the Sandhurst LBD to include SA2 goes against principles, criteria and recommended exclusions, and should not therefore proceed.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The amendment of the Sandhurst LBD, SA2, should be withdrawn.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The fact that a planning application for the construction of 15 houses for the area in which SA2 is situated has very recently been rejected by Tunbridge Wells Borough Council(February 2021) on grounds of lack of sustainability relating to AONB and Heritage infringement factors, indicates that this proposed LBD amendment is against the wishes of the majority of the Council .

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3: The Strategy for Tudeley Village
All related to garden village

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

With regard to the proposed development of a "Garden Village" in Capel the local plan gives many assurances but no details of how they would be achieved! It avoids completely the possibility of pollution from a nearby old land fill site. It ignores unstable land with a layer of clay on top of gravel! It claims it will increase biodiversity which is impossible. It includes no details of how essential facilities such as sewerage, water, gas, electricity and telephone all of which would need to be in place before building could start will be provided. Provision for schools seem not to have been covered. Flooding on this site is so bad that it has been possible to swim in the water on occasions. They give no details as to how this would be dealt with. BR have already discounted the possibility of a new station. This would mean that residents would need to travel to Tonbridge or Paddock Wood to catch a train into London resulting in traffic congestion. Neither have any available car parking and in any case they would be joining a line that already has severe capacity problems. Local plans are supposed to meet local needs so how can this be achieved by concentrating all the development in one area? There are many more suitable sites available that the planners seem determined to dismiss. One between the A21 and the outskirts of Tunbridge Wells has none of the problems on flooding or connectivity yet the planners seem determined to find reasons to reject this site. The site is a natural flood plain if it is developed the only place the water could go is in the Medway making an already bad flood situation down stream worse. Not very responsible. Because of the bad ground conditions building would be difficult. Couple this with the cost of providing service one wonders if the site is even viable. The site belongs to a single land lord making this an easy but irresponsible option for the planners which they seem determined to pursue by excluding all alternative sites. The plan should provide housing for the local population but is more likely to cater for Londoners wishing to move out of London based on what seems to be happening on other sites. The form used for submitting objections is much longer and more complex than it needs to be almost as if it was designed to put people off! All it needs is a simple form to enable personal details, the development objected to and a box to enter specific objections, two pages max. Is the number of houses planned in line with latest government guidelines?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

this is the job of the planners

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft policy STR1 sets out the development strategy for the Borough. In summary, in relation to housing, the policy sets out that a minimum of 12,204 dwellings will be developed over the plan period (2020-2038). This equates to 678 per year.

The strategy for delivering this quantum of houses is to promote the effective use of previously developed land, look to focus new development within the identified Limits to Built Development of settlements, provide for growth of settlements having regard to their role and function, and the development of two strategic sites to the west of Paddock Wood and a new village at Tudeley.

Positively prepared The strategic policy has at its core the large scale development of land to the east of Paddock Wood, and a new settlement at Tudeley. Both of these options aim to deliver a large amount of new housing, and it is clear that the Council are reliant on them coming forward for development in order to meet the housing requirements. It is submitted that the plan is not positively prepared. Paragraphs 4.12, 4.13 and 4.18 refer to the need to consider unmet need from elsewhere. Table 3 of the draft Submission Plan Page 4 of 13 Tunbridge Wells Borough Council: Local Plan Pre-Submission Representation Form identifies the total number of houses to be delivered as 12,204. This figure is drawn from the Housing Supply and Trajectory document, which provides part of the evidence base. Paragraph 1 of the Executive Summary to the Housing Supply and Trajectory document identifies the figure of 12,204 homes, and states that "This is in addition to any unmet housing needs from neighbouring authorities, in relation to which the current Sevenoaks Local Plan, although not found sound, leaves an unmet need for 1,900 dwellings." The current position for the Sevenoaks Local Plan is that it has been found unsound and a legal challenge to that has failed. The main point at issue for the Sevenoaks Local Plan was that they failed in their duty to co-operate with adjoining authorities to consider unmet housing need. Sevenoaks will now need to review their duty to co-operate and reconsider the unmet need, together with that of adjoining authorities. There is potential therefore that the housing figure may increase from that currently identified, subject to the progress of Sevenoaks Local Plan. In this way the draft Submission Plan is not positively prepared.

In addition to the above, paragraphs 5.189 and 5.190 set out the background to the development of the strategic sites at Tudeley village and Paddock Wood. Both paragraphs refer to the requirement that to deliver the two large strategic sites in the Green Belt, road improvements will be required as

the modelling shows that there will be an increase in traffic through Five Oak Green. This is proposed to be dealt with by highway improvements to the A228 and a bypass around Five Oak Green. It is anticipated that these works will be paid for wholly by infrastructure contributions from the development at Tudeley. Paragraph 5.191 identifies that “the delivery of this infrastructure should be through ongoing discussions with relevant stakeholders. This includes, but is not limited to, Kent County Council, adjacent local planning authorities (Tonbridge & Malling and Maidstone Borough Councils) and other statutory consultees” This suggests that despite the identification of the route of the Five Oaks bypass on the proposals map, there needs to be ongoing discussions in order to deliver it. It is not clear at this stage whether this is deliverable.

It is therefore submitted that the plan is not positively prepared in relation to the development strategy as it does not appear to take account of unmet needs, and there appears to be uncertainty over the delivery of infrastructure.

Justified A significant proportion of the required development is focussed on two large strategic sites. Should these sites not be delivered, then there would be a significant shortfall in delivery. The delivery of the sites will be the subject of masterplans to be delivered as Supplementary Planning Documents. This will involve a further process of public engagement, consultation and adoption. As an alternative strategy, additional development could be proposed to support and enhance existing settlements, rather than create new ones. Rural centres, such as Five Oak Green have a range of services that support the local community, but needed to be supported by growth and development. The provision of a bypass around Five Oak Green will result in less traffic passing through the village, and reducing the opportunity for visitors to stop and take advantage of the services and facilities on offer, that would help to support them, and to improve their viability and vitality. Whilst there is a balance to be struck between enough passing traffic to support local services, and too much traffic resulting in congestion and a deterioration of the environment, a bypass is likely to tip the balance away from the support of local services and facilities. In addition, the development of the large strategic sites will result in a significant amount of Green Belt land being released. The development shown on the proposals maps will not support the reasons for including land within the Green Belt, as set out in paragraph 134 of the NPPF. In particular, the huge expansion of Paddock Wood to the east will not check the unrestricted sprawl of this large built-up area. The location of Tudeley, part way between Paddock Wood and Tonbridge, together with the expansion of Paddock Wood in this direction, will result in neighbouring towns merging towards each other. Neither proposal results in safeguarding the countryside from significant encroachment. It is acknowledged in the Development Strategy Topic Paper at paragraph 7.13 that the development of Tudeley village would weaken the extent to which the Green Belt purposes will be fulfilled, particularly between the proposed village and Five Oak Green. This is also acknowledged in paragraph 7.12. The provision of road improvements, in particular the currently “off line” Five Oak Green bypass, will also have an impact on the Green Belt. An alternative strategy would be, rather than significant large scale new settlements, provide for smaller scale developments surrounding and as extensions to existing settlements, such as Five Oak Green. Such an alternative would also result in a release of Green Belt land, but in a way that would allow for a review of the Green Belt boundaries around the settlements and the creation of more defensible and rational limits to the settlement boundaries. Limited, modest additional housing developments around rural settlements would also help to support local services and facilities, resulting in improving their vitality and viability, and creating a greater sense of community. The development strategy therefore has significant weaknesses, particular in relation to the impact on the Green Belt.

Effective Related to the above, it is submitted that the proposed strategy is likely to have weaknesses in its effectiveness for the reasons set out above. The deliverability of the strategic sites are dependant on a significant amount of masterplanning, and infrastructure provision, including highway improvements and a new bypass, and flooding at east of Paddock Wood, where part of the proposed site is within Flood Zones 2 and 3 and part of the upper Medway floodplain. The delivery of the housing numbers through smaller scale sites dispersed across the borough can avoid the need for major road improvements in the Green Belt, and can be planned to avoid the areas at greatest risk of flooding.

Consistent with national policy It is acknowledged that the NPPF does allow for the allocation of major strategic sites in the Green Belt on the basis that there are exceptional circumstances to justify it. However, as identified above, the identification of the strategic sites will weaken the purposes of the Green Belt, particularly around the Tudeley/Five Oak Green area. It is significant that the Council's Green Belt study does not include parcels of land to the north of the railway line around Five Oak Green. The Study does include a “broad area” to the north of the railway line, and the Council's own

assessment sets out that in relation to the purposes of preventing neighbouring towns merging into one another and assist in safeguarding the countryside from encroachment the rating is "Strong". These purposes will be compromised should the development strategy chosen be implemented, and the strategy will not be consistent with national policy.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The development strategy policy should be modified to remove the reference to the large strategic sites and an alternative strategy based on the modest expansion of existing settlements. The following amendments are suggested;

2. Looks to focus new development within and on the edge of the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

3. Provides for the growth of settlements, having regard to their role and function, constraints, and opportunities, ~~together with the development of two strategic sites, namely:~~a. major, transformational expansion of Paddock Wood (including land at east Capel), following garden settlement principles and providing flood risk solutions; andb. the creation of a new garden settlement: Tudeley Village between Paddock Wood and Tonbridge;

9. ~~Allows for the review of the Limits to Built Development to accomodate modest growth to existing settlements to support and sustain the local services and facilities within the settlements, and normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary.~~

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR 9 sets out that “this Plan removes land from the Green Belt, which has been fully justified through the consideration of reasonable alternatives and it is supported by ‘exceptional circumstances’”.

Positively prepared This policy is related to the development strategy set out in draft policy STR 1, which identifies large strategic sites that will involve the release of significant areas of Green Belt. The combined area of land to be removed from the Green Belt as a result of including the land east of Paddock Wood and Tudeley village amounts to 331.188 ha, which equates to 4.6% of the total amount of the Green Belt within the Borough. The total net change in the amount of the Green Belt to be lost is 5.7%. Approximately 80% of the total amount of Green Belt to be lost is attributed to the two large strategic sites. An alternative strategy, of directing development towards the edge of existing settlements in order to support and enhance the existing services and facilities would comply with the social and economic objectives of the NPPF as set out in paragraph 8, and would result in a reduced impact on the Green Belt in the area around Five Oak Green by affording greater protection to the natural environment, particularly the Green Belt. In this regard, an alternative strategy would be unlikely to require highway improvements which would have further adverse impacts on the Green Belt and the purposes of including land within it. The environmental impact of the draft strategic allocations would not have a positive impact on the environmental objective of the three sustainability objectives of the NPPF, and the plan is not therefore positively prepared.

Justified Again, related to the development strategy set out in draft policy STR 1, it is accepted that in order to meet the needs of the evidence base, some release of Green Belt land would be necessary. The Council rely on their Green Belt Study to justify the release of Green Belt land. However, the land around Five Oak Green to the north of the railway line (parcel BA4) fulfils two of the purposes for including land within the Green Belt (prevent neighbouring towns merging into one another and assisting

in safeguarding the countryside from encroachment) which is assessed as “Strong”. These purposes will be compromised should the development strategy chosen be implemented, and the strategy will not be consistent with national policy. The location of the proposed strategic site of Tudeley village falls within parcel BA4. The environmental impact of the removal of the large areas of Green Belt is not justified.

EffectiveIn Green Belt terms, the policy reference to the “reasonable alternatives” is challenged in other representations submitted. The strategy chosen will result in significant harm to the Green Belt, and the purposes for including land within the Green Belt, as identified in the NPPF. In particular, the potential development of land east of Paddock Wood and Tudeley village, together with the proximity of Tonbridge to the west and Five Oak Green will start to expand the built form in the countryside across a wide area, and will result in significant compromising of the purposes of the Green Belt. In this regard, in relation to the stated aim in the draft policy of maintaining an effective Green Belt, will not be achieved. The draft policy is therefore not effective.

Consistent with national policyThe above submissions indicate that the proposed policy, being related to the overall development strategy set out in draft policy STR 1, would not be consistent with national policy, specifically in meeting the environmental objective of paragraph 8 of the NPPF, and that it would also not fulfil all of the purposes of including land within the Green Belt. On the basis of the Council’s own assessment of land parcel BA4, the strength of the Green Belt in fulfilling the purposes of including land within the Green Belt will be severely compromised.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The second paragraph of the policy should be modified to read;

“This Plan removes land from the Green Belt *surrounding existing settlements*, which has been fully justified through the consideration of reasonable alternatives and it is supported by ‘exceptional circumstances’, *and will enable modest sustainable extensions to existing settlements in order to improve and enhance the local services and facilities provided.* The areas of Green Belt released are set out in the relevant place shaping policies and include requirements to secure improvements to the environmental quality and accessibility of the surrounding Green Belt.”

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft policy STR/SS 1 is the policy that sets out the draft allocation of the land at Paddock Wood, including at east Capel. In summary the policy seeks to provide between 3,490 and 3,590 houses, together with three neighbourhood centres with commercial floorspace, schools, sports and leisure facilities, gypsy/traveller pitches and employment uses.

The policy also seeks to secure the phased delivery of highway and transport infrastructure, including on and off-line improvements to the A228 around Colts Hill and the provision of a new highway which bypasses Five Oak Green.

Positively prepared The main issue with this draft policy is that it will involve a significant incursion into the Green Belt. There will be a significant environmental impact as a result of the development of land currently outside of the settlement boundary and within the Green Belt which amounts to 418 ha. The land is identified in paragraph 5.159 as being around 0.7 miles from the High Weald AONB, and that the impact of development on the setting of the High Weald AONB, and on views from vantage points within the AONB, will be major factors in delivering development in this location. The AONB designation is the highest level of protection and equivalent to National Park designation in policy terms. The impact on views from the AONB is likely to be significant and adverse. Paragraph 5.161 identifies that development on the western side of Paddock Wood will need to minimise perceived coalescence between settlements. Use of the strong tree belts and concentration of denser development to the east will be an important design principle. In fact, if the development is carried out, and the settlement extended, the coalescence would not be "perceived" but actual. Regardless of the inclusion of tree belts and low-density development, the settlement would encroach into the Green Belt and reach towards Five Oak Green and the potential development of the proposed allocated site at Tudeley village. The present openness and freedom from development that exists between the western edge

of Paddock Wood and the eastern edge of Tonbridge would be lost and the Green Belt developed over.

This does not constitute positive planning in that the environmental objective of the sustainability requirements set out on paragraph 8 of the NPPF will not be met, and the purposes of including the land within the Green Belt will be compromised.

Justified The policy is directly linked to the overall strategy set out in policy STR 1, which is not considered to be justified, as other representations set out. It is not considered to be an appropriate strategy to release such large areas of Green Belt land, and also to not provide development opportunities on the edge of existing settlements which would help to support and enhance the existing services and facilities locally. The release of smaller areas of Green Belt land would result in less of a compromise of the Green Belt, particularly in area BA4 of the Green Belt Study.

Part 10 of the draft policy sets out that for development on land to the west, edged in blue on Map 27, compensatory improvements to the Green Belt should be provided. It is not clear what the compensatory improvements might be. However, the purposes of the Green Belt are, in summary, to prevent inappropriate development and to maintain openness- this is the essential characteristic of Green Belts and the fundamental aim is to prevent urban sprawl (paragraph 133 of the NPPF). It is not clear how "improvements" would help to compensate for the loss of openness or prevent urban sprawl.

Part 13 of the draft policy requires a drainage strategy is in place in consultation with the Local Planning Authority, Kent County Council as the Drainage Authority, and Southern Water prior to the grant of planning permission for any substantial development on the site, unless exceptional circumstances arise. It is submitted that the drainage strategy should be considered at this stage, rather than once the site is potentially allocated through the adoption of the Local Plan. If it is not possible to reconcile the flooding issues for substantial developments, then this is likely to compromise the safety of the development and other adjoining sites that would suffer a greater risk of flooding. The capacity of the foul sewage network should be established at this stage.

An alternative strategy, to identify small scale sites that extend existing settlements in order to support and enhance their growth, and which have a lower risk of flooding, or flooding issues can be mitigated would appear to be justified.

It is therefore submitted that the proposed strategy, including the development of Paddock Wood and land at east Capel is not justified on environmental grounds.

Effective Based on the submissions above, it is further submitted that the draft policy STR/SS 1 would not be effective. Alongside the need to agree and adopt masterplan and Supplementary Planning Documents, the flooding issues do not appear to be resolved at this stage. The reliance on a single allocation to provide a substantial level of housing supply could result in a serious shortfall if not delivered.

Consistent with national policy

As set out above and in other representations, the strategy involves a large scale encroachment of built form over the Green Belt and the potential for neighbouring towns (in conjunction with the Tudeley village proposal) to merge into one another. In this way there is a significant compromise of the purposes of including land within the Green Belt, and the draft policy (and the strategy overall) would not be consistent with the NPPF.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR/SS 1 should be removed and replaced with policies that identify alternative opportunities for development that involve modest extensions to existing settlements, releasing Green Belt land in a more managed way, and allowing the opportunity for growth to support and sustain local services and facilities (as set out in other representations).

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR/SS 3 The Strategy for Tudeley Village

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft policy STR/SS 3 provides for a new village settlement at Tudeley village. In summary the draft policy seeks to provide a new garden settlement for 2,800 new dwellings, with associated shops, employment uses, and community and leisure facilities. Part of the policy includes the provision of improvements to the A228 around Colts Hill, and the provision of a new highway which bypasses Five Oak Green. Compensatory improvements to the Green Belt are also to be proposed.

Positively prepared. The main issue with this draft policy is that it will involve a significant incursion into the Green Belt. There will be a significant environmental impact as a result of the development of land currently in the countryside and within the Green Belt which amounts to the loss of 182 ha of land from the Green Belt. In addition, the High Weald AONB lies to the south of the B2017 and the northern boundary of the AONB abuts the southern and south-eastern boundary of the proposed site. The development will therefore have a direct impact on the AONB. The AONB designation is the highest level of protection and equivalent to National Park designation in policy terms. The impact on views from the AONB is likely to be significant and adverse. Whilst paragraph 5.209 refers to the approach set out in the NPPF that new settlements can result in the supply of large numbers of new homes, the draft proposal will be at a significant environmental cost in relation to the incursion into the Green Belt, the impact on the AONB and the impacts of the required highway improvements, in particular a by-pass around Five Oak Green.

As with the draft allocation at Paddock Wood/east of Capel, the end result would be the encroachment into the countryside and the merging together of the settlements of Tonbridge, the proposed new village, Five Oak Green and Paddock Wood. The present openness and freedom from development that exists between the western edge of Paddock Wood and the eastern edge of Tonbridge would be lost and the Green Belt developed over.

This does not constitute positive planning in that the environmental objective of the sustainability requirements set out on paragraph 8 of the NPPF will not be met, and the purposes of including the land within the Green Belt will be compromised.

Justified The policy is directly linked to the overall strategy set out in policy STR 1, which is not considered to be justified, as other representations set out. It is not considered to be an appropriate strategy to release such large areas of Green Belt land, and also to not provide development opportunities on the edge of existing settlements which would help to support and enhance the existing services and facilities locally. The release of smaller areas of Green Belt land would result in less of a compromise of the Green Belt, particularly in area BA4 of the Green Belt Study.

Part 8 of the draft policy sets out that compensatory improvements to the Green Belt should be provided. It is not clear what the compensatory improvements might be. Although it is set out in the supporting text that this is detailed in the Development Strategy Topic Paper, no detailed measures are identified. However, the purposes of the Green Belt are, in summary, to prevent inappropriate development and to maintain openness- this is the essential characteristic of Green Belts and the fundamental aim is to prevent urban sprawl (paragraph 133 of the NPPF). It is not clear how "improvements" would help to compensate for the loss of openness or prevent urban sprawl.

An alternative strategy, to identify small scale sites that extend existing settlements in order to support and enhance their growth would appear to be justified. It is therefore submitted that the proposed strategy, including the development of Paddock Wood and land at east Capel is not justified on environmental grounds.

Effective Based on the submissions above, it is further submitted that the draft policy STR/SS 3 would not be effective. Alongside the need to agree and adopt masterplan and Supplementary Planning Documents, the reliance on a single allocation to provide a substantial level of housing supply could result in a serious shortfall if not delivered.

Consistent with national policy As set out above and in other representations, the strategy involves a large-scale encroachment of built form over the Green Belt and the potential for neighbouring towns (in conjunction with the draft Paddock Wood proposal) to merge into one another. In this way there is a significant compromise of the purposes of including land within the Green Belt, and the draft policy (and the strategy overall) would not be consistent with the NPPF. In addition to the compromising of Green Belt purposes, paragraph 72 of the NPPF does set out that new settlements can make a contribution to the supply of new homes, but only provided they are well located and supported by necessary infrastructure and facilities. In this case, it is submitted that the proposed village is not well located (being in the Green Belt) and requires significant infrastructure in the form of highway improvements and a new bypass around Five Oak Green to support and justify it.

It is submitted that the draft policy is not consistent with national policy.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy STR/SS 3 should be removed and replaced with policies that identify alternative opportunities for development that involve modest extensions to existing settlements, releasing Green Belt land in a more managed way, and allowing the opportunity for growth to support and sustain local services and facilities. Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Future Notifications

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft policy STR/CA 1 sets out the strategy for the parish of Capel and is related to policies STR/SS 1 and STR/SS 3. Representations have been submitted in relation to these policies.

In summary the policy seeks to set limits to the built development around Five Oak Green, provide for a new village settlement at Tudeley, provide for new strategic development around Paddock Wood, provide compensatory improvements to the Green Belt, provide transport improvements, and seek developer contributions for infrastructure improvement.

Positively prepared The main issue with this draft policy is that it will involve a significant incursion into the Green Belt. There will be a significant environmental impact as a result of the development of land currently outside of the settlement boundary and within the Green Belt which amounts to the loss of 330 ha. The two strategic sites that it is proposed to allocate result in significant incursions into the Green Belt and will also be likely to have a significant impact on the AONB.

In relation to the incursion into the Green Belt, the proposed allocation of the two sites, together with the existing settlement of Five Oak Green, will result in a broad swathe of development stretching between Paddock Wood and Tonbridge. This will not only represent a substantial incursion into the Green Belt, but also will not prevent neighbouring towns from merging into one another, and will have an adverse impact on openness. The policy will not prevent urban sprawl in the Green Belt, which is one of the fundamental aims. Other representations set out detailed submissions in relation to the specific draft allocations.

In addition, the policy proposes highway improvements, including a bypass around Five Oak Green. This will result in both a significant incursion into the Green Belt and also result in less passing traffic through the village. Whilst there is a balance to be struck between encouraging visitors and passing

traffic that will support and sustain local services, and avoiding congestion, in this case, the proposed highway improvements will have a negative impact.

This does not constitute positive planning in that the environmental objective of the sustainability requirements set out on paragraph 8 of the NPPF will not be met, and the purposes of including the land within the Green Belt will be compromised.

JustifiedThe policy is directly linked to the overall strategy set out in policy STR 1, which is not considered to be justified, as other representations set out. It is not considered to be an appropriate strategy to release such large areas of Green Belt land, and also to not provide development opportunities on the edge of existing settlements which would help to support and enhance the existing services and facilities locally. The release of smaller areas of Green Belt land would result in less of a compromise of the Green Belt, particularly in area BA4 of the Green Belt Study.

There are a number of sites put forward for development and recorded in the most up to date SHELAA. In particular there are a number of sites located to the edge of Five Oak Green which could provide for a number of new homes and result in less of an incursion into the Green Belt, and would also provide modest growth that would support and sustain local services and facilities. In particular, site 11 in the SHELAA (Land at Whetstead Road) would result in a modest increase in dwellings (approximately 40-45 dwellings), which would help to support and sustain the local village. Whilst the SHELAA identifies issues with highways and noise for the site, work has been carried out for a presentation to the Parish Council which has demonstrated that the highway concerns (related to the single carriageway bridge into the village from the site) can be resolved with highway measures. Also, mitigation can be included in the development of the site to prevent noise from the railway resulting in an adverse impact on the future occupiers of the site.

It is demonstrated in our representations that there are other sites that could provide for an alternative strategy that would result in a reduced impact on the Green Belt and the AONB, and which would support and sustain the local services and facilities in the village.

EffectiveBased on the submissions above, and other representations made, it is submitted that the draft policy would not be effective. At the draft strategic allocations at Tudeley village and Paddock Wood, there are significant issues in relation to the provision of infrastructure such as highway improvements and flooding, and there will be a substantial impact on the purposes of including land within the Green Belt. Alongside the need to agree and adopt masterplans and Supplementary Planning Documents, the flooding issues at Paddock Wood do not appear to be resolved at this stage, and compensatory improvements to the Green Belt are not detailed. Only one “compensatory improvement” is identified in the supporting text to the policy, and that is the potential to reduce flood risk around Five Oak Green. However, the presence (or otherwise) of flood risk is not a determining factor in the inclusion of land within the Green Belt, and therefore it is submitted that this would not constitute a “compensatory improvement”. In addition, the reliance on two allocations to provide a substantial level of housing supply could result in a serious shortfall if not delivered.

Consistent with national policyAs set out above and in other representations, the strategy involves large scale encroachment of built form over the Green Belt and the potential for neighbouring towns to merge into one another. The draft policy does not prevent urban sprawl or maintain openness, which are the fundamental aims of the Green Belt designation. In this way there is a significant compromise of the purposes of including land within the Green Belt, and the draft policy (and the strategy overall) would not be consistent with the NPPF. Similarly, whilst paragraph 72 does allow for new settlements to provide a supply of new homes, this is subject to the requirement that the settlements are in the right location. Because of the Green Belt issues it is submitted that the proposed siting of the new settlement is not in the “right location”.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Draft policy STR/CA 1 should be modified to remove the references to the Tudeley village settlement and Paddock Wood expansion and reworded to allow for the limited expansion of the existing settlements, in particular Five Oak Green, and reference made to alternative sites, such as site 11 in the SHELAA (land at Whetstead Road) which would provide for minimal incursion into the Green Belt, and support and sustain local services. Suggested modifications are set out below;

1. Set Limits to Built Development for Five Oak Green village on the Policies Map to allow for modest growth to support and sustain local services and facilities (Inset Map 7) as a framework for new development over the plan period;

~~2. Provide a new garden settlement at Tudeley Village, which will deliver approximately 2,800 dwellings and a range of associated services and infrastructure over the plan period and beyond (as set out in Policy STR/SS 3);~~

~~3. Accommodate approximately 2,060 dwellings on land at east Capel as part of the extension to Paddock Wood, and a range of associated services and infrastructure (as set out in Policy STR/SS 4);~~

~~5. Provide transport improvements, including on-line and off-line improvements to the A228, potential provision of the safeguarded A228 Colts Hill bypass, and a highway to bypass Five Oak Green;~~

Such an approach would result in the draft Plan being positively prepared, justified, effective and consistent with national policy.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To discuss the above arguments and assist the Inspector in addressing the Council's strategy.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The following comments are focussed on the information included within Appendix H of the Sustainability Appraisal, and specifically the scoring for the "Reasonable Sites" in Capel parish.

The Sustainability Appraisal (SA) has been reviewed, in particular the methodology, and the decision aiding questions in Appendix B.

The nineteen sustainability objectives have been reviewed for Site 11 (Land at and to the rear of 50 Whetstead Road, Five Oak Green). My clients have an interest in this site, and they consider that it is suitable for development and can be delivered.

Of the nineteen sustainability objectives, the conclusions reached by the Council in relation to fourteen of them are not disputed. The five that are not agreed with are set out below, together with the reasons why.

Business Growth- The Council score this objective as "0" (neutral). The decision aiding questions set out that "in most cases the contribution of new customers to support existing business was considered insignificant". However, this impact appears to be somewhat underplayed by the Council. The village of Five Oaks has a range of services and facilities that support the local community. Strategic developments at Tudeley to the west and Paddock Wood to the east, which would include shopping, employment and social infrastructure opportunities, could potentially draw people from Five Oak Green to the detriment of the local services and facilities. The provision of development immediately adjacent to the village, and easily accessible to the centre, where most of the facilities are located, would help to sustain and enhance those facilities. This would be a positive impact to the local economy. As a result, rather than the score for this objective being neutral, it should be positive.

Land Use- the score for land use is identified as “negative/slightly negative”. This is largely because the site is within the Green Belt. The commentary below the scoring chart sets out that the sites location within Green Belt parcel BA4 would have a very high impact. However, at page 87 of the SA, in the table that considers the strategic settlement locations, in section 2, under the heading Capel, it is identified that the site (for the strategic settlement) is “entirely within the Green Belt and the most recent Green Belt Study concludes the overall harm rating of releasing this land from the Green Belt is high. However, there is scope for compensatory measures such as new hedgerow planting, enhanced pedestrian routes or conversion of fields from arable to grassland”. Similar comments are made in the table at pages 89/90 in relation to the Paddock Wood strategic site.

It is not clear why the planting of hedgerows, the enhancement of pedestrian routes and the conversion of fields from arable to grassland would compensate for the loss of such a large area of Green Belt to deliver the strategic site. None of the compensatory measures identified contribute to the purposes of including land within the Green Belt.

The decision aiding questions for this objective include whether a policy would detract or respect/enhance the five purposes of the Green Belt. In addition, the decision aiding questions set out that positive scores should be applied to policies that propose development on brownfield land. The northern part of the site was a former commercial yard, and there is still some fixed surface infrastructure present, and underground fuel tanks. The site is, in part, a brownfield site, and therefore should have a positive score applied to it.

The development of site 11 and its release from the Green Belt would make a contribution to the housing delivery for the Borough but would also be a logical extension to the village, and would allow development within a clear and defensible boundary (the railway line to the south and the field boundary/drainage channel to the east). As a result, it is submitted that the Land Use score should be neutral, or neutral/slightly positive, as although the land would be released from the Green Belt, there are exceptional circumstances to justify this- namely the delivery of housing units and the support of local services and facilities, and the site is in part a brownfield site. The release of this parcel of land would certainly have a lower impact on the Land Use score than the chosen strategic settlement at Tudeley.

Landscape- the Council score this objective as “neutral/slightly negative”. However, the quality of the land is very low. The site consists of a single run-down bungalow, with garden and paddocks to the rear. A large proportion of the northern part of the site was previously in commercial use as a vehicle and delivery yard. Underground fuel storage tanks are still present on the site. Apart from this, much of the site is low quality paddock grassland with patches of partially broken up hardstanding in the vicinity of the existing dwelling. There are few trees within the site or to the eastern boundary, and those that are, are poor quality and unmanaged.

The site is therefore, in part a brownfield site, having some remaining fixed surface infrastructure.

There is therefore an opportunity to improve and enhance the landscape setting of the site, particularly to the eastern boundary, with the planting of additional hedgerows and trees (including native species). In particular, the topography of the site is such that the northern section is at a lower level, and it would be proposed to drain the site to this area and create a water feature. This would improve the landscaping and appearance of the site, but also enhance the biodiversity.

It is submitted that the Landscape score should be positive.

Noise- the noise score set out in the table at Appendix H is “slightly negative/negative”. The commentary identifies that this is because of the presence of the railway line to the southern boundary. However, in assessing the site, the landowner has commissioned work to establish suggested layouts for the site and measures to mitigate the impact of noise. It has been demonstrated that the mitigation measures would not result in harm to any potential occupiers of the site. As a result, this score should be neutral.

Water- the score for this objective is “neutral/slightly negative”. However, the decision aiding questions set out that development in Flood Zone 1 should be scored as very positive. The site is within Flood Zone 1 (having regard to the Council’s SFRA), and therefore the score should be very positive.

In summary, the scores attributed to five of the sustainability objectives of the site should be “upgraded”. Having regard to the above, this would result in the site scoring fewer neutral and negative scores and a greater number of positive scores. This would, it is submitted, make the site a suitable choice for allocating for residential development in the Local Plan.

Question 1	
Respondent's Name and/or Organisation	David Lear
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My name is David Lear and I have lived in Golden Green for over 22 years. Until recently I was a regular commuter to London.

I am writing to object to “The Strategy for Tudeley Village” (Policy STR/SS3).

I am deeply concerned at TWBC’s plan to create a new garden village (town?) in an area completely unsuited to such a development.

TWBC’s enthusiasm for developing 400 acres of Green Belt land, conveniently bypassing much of the plan preparation process, is worrying and gives force to the idea that the convenience of dealing with one landowner has far greater importance than following normal planning guidelines. Others have pointed out that an unwillingness to deal with multiple landowners is NOT sufficient grounds for destroying Green Belt land. For TWBC, there is of course the added advantage of siting over 60% of their new housing on the border with TMBC ensuring that all the disadvantages of the plan will fall into someone else’s lap. It is to the great credit of the Councillors of TMBC that they soundly criticised the plan at the Regulation 18 stage and continue to do so. I understand that TMBC have still not signed a Statement of Common Ground.

It is abundantly clear that the Tudeley site will create a significant additional burden on Tonbridge roads. The plan’s assumptions on reduced car use are completely unrealistic, based as they are on the provision of cycleways. No doubt TWBC Councillors are all enthusiastic cyclists but I will be first in the queue to watch them take on the challenge of the long, steep hill up from Tonbridge to Tudeley on a cold wet winter’s day. The existing road network around the proposed site is inadequate for the size of development and Tonbridge does not have the infrastructure to deal with the additional pressure that this development will create. During peak hours Tonbridge and its access roads are already unable to cope with existing traffic flows. The main access route from Tudeley to Tonbridge along the B2017 becomes a slow-moving queue of traffic backing up past the junction with Hartlake Road. Even if this road were widened with added roundabouts, no benefit would ensue because Tonbridge itself could not handle the additional traffic. Last week, TMBC rejected a planning application for a new supermarket at Tonbridge Retail Park because of concerns about the ability of the road network to cope. My understanding is that any major road development will not take place for some years into the project. Plans for the creation of new quarries in the immediate vicinity, additional development by Maidstone Borough Council at the Hop Farm and TWBC’s own proposals for extensive development at Capel and Paddock Wood will all add significantly to the problem.

Many of the new Tudeley residents would commute to London. Pre-Covid, trains from Tonbridge were already at bursting point with no spare capacity. Tonbridge station during peak hours is crowded with commuters and school children and could not conceivably take more. In my opinion the effect of “working from home” is seriously overstated and whilst there will be some drop in numbers travelling to London, once we return to a post-Covid normality the pressure to return to the office will minimise the impact. Other housing developments further down the line are expected to create capacity issues; 2,800 new homes in Tudeley could conceivably break the system. The existing parking at Tonbridge station is already insufficient for current needs.

I question the need for the number of houses that TWBC is planning to build. There must be “exceptional circumstances” to release Green Belt land for development. TWBC should be far more robust in challenging the existing numbers based on out-of-date statistics. Will the new development provide the right type of housing?. It is not just a question of numbers; housing needs to cater for those struggling to find accommodation. I seriously doubt whether a green field development, consisting no doubt mainly of substantial houses, will meet existing housing needs however lucrative for the developers. Much more likely is that the new development will draw people in from outside the area. TWBC was late in starting to update its brownfield register. Given that such land should take priority for development this should have been completed prior to any decision on building over Green Belt land.

Much of the development will be on the Medway floodplain. In the 20 odd years that I have lived in Golden Green I have witnessed significant flooding in East Peckham, Tonbridge and along the Hartlake Road, this despite the Leigh barrier. Last year, the papers were full of reports of disastrous flooding in parts of Yorkshire and Derbyshire, again despite significant investment in flood defences. Climate change is upon us and it seems foolish in the extreme to consider concreting over 400 acres of productive, absorbent agricultural land which can only exacerbate the existing threat of flooding.

There are many other issues to be considered, such as the threat to biodiversity, the pollution created by additional traffic jams, the risks to the heritage site at Tudeley Church and the provision of health and other services. These have been identified by others in their responses so I will not go further into detail.

I end by drawing your attention to a Planning Decision Notice, ref: 18/01767/FULL, dated 31 July 2018 and signed by one Stephen Baughen, the Head of Planning (Interim) at TWBC and who now, I believe, holds the position of Head of Planning Services. The Decision Notice refuses planning permission for a modest extension to The Poacher, a restaurant located at the very edge of the proposed new development.

The reasons given for the refusal are, in summary:

- 1 The proposal would constitute inappropriate development within the Metropolitan Green Belt and would be harmful to its openness. There is insufficient evidence of the necessary “very special circumstances” to overcome this harm.
- 1 The proposal would have more than a minimal impact on the landscape character of the locality. The overall impact is harmful to the rural character of the area.
- 1 There is no evidence that occupiers would not be at risk from flooding or that there would not be increased risk of flooding elsewhere. Therefore, the development is likely to result in a risk to human life from flooding.

A more glorious example of hypocrisy would be hard to find.

In summary, this proposal fails to meet the necessary soundness criteria on several grounds and should be withdrawn without further delay. All those responsible for its production and approval should look deeply into their consciences and reconsider this appalling proposal.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

This proposal should be withdrawn from the TWBC Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

Policy STR/SS 3 Strategy for Tudeley Village

LCWIP Local Cycling and Walking Infrastructure Plan (p48)

[TWBC: this representation was set against the whole Plan but has been duplicated by TWBC at Policies STR/SS1, STR/SS2 and STR/SS3 for ease of reference - see PSLP_1310, PSLP_2326, PSLP_2327 and PSLP_2828 respectively]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 15 years, and have seen the expansion of the town even within that time. Despite promises, the infrastructure has never been delivered to address the issues created by the increase in housing. There has been increased flooding across the town, with more frequency, with some residents suffering from foul water in their homes caused by inadequate sewage systems having to cope with yet more residents. There has been a lack of investment by TWBC in Paddock Wood, no expansion of medical services, no improvement in the shopping facilities in the town, or in the leisure centre which is now run down. In fact, the opposite has been true. TWBC has consistently approved planning for developments that detract from Paddock Wood and add more problems without delivering on any of the investment that is critical. We have been promised time and again that there would be no further development without the infrastructure in place in advance. There is little or no regard on the impact of continued overdevelopment on the very nature of Paddock Wood and surrounding villages; no consideration of the increased flood risk to existing residents from the developments already approved, let alone those in the pipe line. And absolutely no consideration of the residents.

There is also a need to reassess the total requirement for housing going forward - the Government's "levelling up agenda" shows that increased housing will be needed in the north of England rather than in the SE corner - these changes in national approach have not been followed through into the local plan. TWBC have not sufficiently considered the future housing need of the borough to ensure that the number of dwellings being planned for is correct.

As part of the previous consultation on the local plan, TWBC included as part of its justification for building in Capel and Paddock Wood that the land owner had decided to sell the land, and that dealing with one land owner rather than several would be easier. This is possibly the worst, most egregious reason for building on one location that has ever been heard.

The local plan is not positively prepared, effective nor justified for a number of critical reasons.

Firstly, on the requirement for the plan to be positively prepared and effective. TWBC have not amended their plan to account for the changed circumstances brought about by the COVID 19 pandemic. The pandemic has shown that commuting and working patterns have changed and will continue to remain different to that expected pre-COVID - the local plan has not been reviewed to ensure it is fit for purpose going forward.

The vast majority of housing has been proposed to be placed at the tip of the borough - this site is entirely unsuitable for providing housing of increased job opportunities for the rest of the borough,

which stretches far to the east and south, whilst at the same time "lumping" the housing in one small area. The realities of travel across the borough means that this housing will not be suitable for those who live and are employed in, for example Cranbrook. Therefore, despite the stated aim of the plan to provide affordable housing and employment to the residents of the borough it will do the opposite. The proposal will result in people moving to the borough from outside it, ensuring that locals are unable to take advantage of the increase in housing, and inflating prices to the point that no one who works locally will be able to live here.

Much of the infrastructure included within the local plan will not be for TWBC to provide - and the rest will be dependent on "contributions" from developers. There is a very real risk that these will never materialise.

At the recent vote by councillors on whether to move to Reg 19 consultation, several of the papers were not made available, and worse, it was clearly stated in the meeting that some councillors had not even bothered to review the papers in advance of the vote. This is a clear abdication of responsibility, and undermining of due process.

Therefore the plan is not effective.

In relation to whether the plan is justified - the response to regulation 18 consultation was woefully inadequate - despite a large number of responses expressing serious concerns with the local plan (97% opposed the plan), these were not taken into account, with TWBC ploughing on with their proposal regardless of the views of the residents who would be affected by it. This makes a mockery of the consultation process required under national law. The only changes made were to exacerbate the issue by putting more houses into the plan for Capel and Paddock Wood.

The local plan also proposes to build on land that is at risk of flooding, while taking away agricultural land and green spaces. These are all in contravention of the stated aim of the plan.

The plan itself states that green belt is to prevent urban sprawl and should be protected - yet TWBC are proposing to remove 5% of green belt land in Capel parish to build the extension to Paddock Wood, and the Tudely Village. These are entirely unjustified removals of green belt land, and would in effect create a long corridor of development between Paddock Wood and Tonbridge. Green belt is meant as a protection - it should not be removed from such protection without significantly stronger justification. There are alternative sites which would not require the use of green belt land such as Castle Hill.

Flooding is a very real issue already in Paddock Wood and Five Oak Green. Flooding incidents are increasing, with the greatest threats coming from surface water flooding. The sites at Capel and Paddock Wood proposed for development are all prone to flooding, and play a key role in ensuring that existing developments are not affected more severely. This winter, the ground was saturated for weeks in the areas the plan expects to build. In Tudely, the water runs down the road like a river, and that is without the additional building in place. The proposal would remove trees and other vegetation that use the water; they would concrete over the very land with acts as a sponge. The mitigation that is proposed is insufficient to respond to this increased, and increasing risk. Combined with the proposal to create new roads to service these new developments, the issue just gets worse and worse. This is also against national policy which states that flood plans should not be built on where alternatives exist. Alternatives exist within Tunbridge Wells borough. Where mitigation plans are put in place, they will only exacerbate the impact on communities up and down river - places which already struggle with flooding - Tonbridge, East Peckham, Yalding to name just a few.

The plan also proposes to dig up more and more countryside to build additional roads to deal with the increased traffic - on yet more green belt and countryside. This area risks being covered in concrete, with the increase in air pollution, risk of flooding, reduction in green space and biodiversity the only likely outcomes.

The proposal made under the LCWIP Local Cycling and Walking Infrastructure Plan to block access to vehicles over the railway bridge will completely cut off half of Paddock Wood from the town centre - forcing all vehicles to use the A228, or country lanes. There is no consideration to the impact of having thousands of extra cars needed to make that journey, no consideration of the real world impact on the residents of Paddock Wood. What if there is an accident on the main road that closes it? What if an ambulance or fire engine is needed? What about residents who are less mobile? This plan will have the opposite effect to that stated. This has to be one of the most poorly thought through and ludicrous ideas within the local plan. Wishing that fewer people drove cars doesn't make it so. Taking other steps

- effective enforcement of parking on Commercial Road, creating a lively retail area rather than permitting more and more flats to be built in place of retail units will be much more likely to.

This plan goes against national policy - there is no provision for addressing the biodiversity crisis, no substantive plans to mitigate against the impacts of climate change with the expected increase in flooding. There is no recognition of the importance of green space for residents of Paddock Wood. There is no substantive plan for ensuring biodiversity net gain across the plan.

The only part of this plan I can support is the provision of a swimming pool - and yet, even with all the housing planned, it's still only potential in the plan. There is no assurance that ANY of the "benefits" put forward will be realised.

Paddock Wood has already absorbed 1000+ housing units, the intention to build yet another 6000+ dwelling within the space of 5 miles is utterly without consideration of the current character of the area, or its residents. Paddock Wood will grow in area by 200%, Tudely will expand by 500%. This is completely disproportionate. Local residents are being ignored.

It is also clear from the representations from Tonbridge and Malling Borough Council (TMBC), and its many residents that the duty to cooperate has been entirely disregarded by TWBC. The impacts of the exponential growth in housing proposed under this local plan will be felt by neighbouring local authorities as the services and infrastructure required by such a significant increase in housing and population will predominantly be felt by TMBC and Maidstone BC rather than by TWBC, but will not receive any revenue from council tax etc. the increase in traffic alone will have a significant impact on the residents of TMBC, there will be an increase in the number of people expecting to attend Tonbridge schools, and use leisure facilities in Tonbridge. TWBC's intention to put the vast majority of its intended housing growth right on the border with 2 other local authorities shows a blatant disregard for the knock on impact on those boroughs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to LISTEN to its residents and neighbouring local authorities. There needs to be a fundamental reassessment of where additional housing is needed in the borough and not take the easy approach of putting the vast majority of housing into one small area of the borough which won't support other residents and unfairly results in 15 years of disruption for a small proportion of the borough's residents. This will help address the effectiveness of the plan.

Alternative sites need to be considered - and some have already been offered up by developers. There has been inadequate consideration of brownfield and alternative sites, with simple dismissal of such ideas in response to proposals offered under previous consultations. These sites should be where they are not on flood plains, not on good agricultural land that will be lost forever, and not where the impacts of the developments will be felt almost entirely by a small proportion of residents and by those residents of neighbouring local authorities who will not benefit from any additional funding.

In addition, options 7 and 8 as set out in the Sustainability Appraisal should be further considered to more fairly distribute housing need across the borough.

Should development continue in Paddock Wood and Tudely Village, it must be a requirement that the additional services and infrastructure the plan suggests "may" follow need to be in place first. There

needs to be a complete rethink of the LCWIP Local Cycling and Walking Infrastructure Plan so that the road bridge in Paddock Wood is not closed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

the assessment of impact on the sustainability objectives in table 15 of the SA are not accurate - the benefits are overplayed - they would not be felt across the borough, the developments will not provide social mobility and inclusion as suggested, and the negative impacts on air, biodiversity, climate change, health, noise, travel and water are all under recognised.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Nicola Leeds
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel

Policy STR/SS 3 Strategy for Tudeley Village

LCWIP Local Cycling and Walking Infrastructure Plan (p48)

[TWBC: this representation was set against the whole Plan but has been duplicated by TWBC at Policies STR/SS1, STR/SS2 and STR/SS3 for ease of reference - see PSLP_1310, PSLP_2326, PSLP_2327 and PSLP_2828 respectively]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 15 years, and have seen the expansion of the town even within that time. Despite promises, the infrastructure has never been delivered to address the issues created by the increase in housing. There has been increased flooding across the town, with more frequency, with some residents suffering from foul water in their homes caused by inadequate sewage systems having to cope with yet more residents. There has been a lack of investment by TWBC in Paddock Wood, no expansion of medical services, no improvement in the shopping facilities in the town, or in the leisure centre which is now run down. In fact, the opposite has been true. TWBC has consistently approved planning for developments that detract from Paddock Wood and add more problems without delivering on any of the investment that is critical. We have been promised time and again that there would be no further development without the infrastructure in place in advance. There is little or no regard on the impact of continued overdevelopment on the very nature of Paddock Wood and surrounding villages; no consideration of the increased flood risk to existing residents from the developments already approved, let alone those in the pipe line. And absolutely no consideration of the residents.

There is also a need to reassess the total requirement for housing going forward - the Government's "levelling up agenda" shows that increased housing will be needed in the north of England rather than in the SE corner - these changes in national approach have not been followed through into the local plan. TWBC have not sufficiently considered the future housing need of the borough to ensure that the number of dwellings being planned for is correct.

As part of the previous consultation on the local plan, TWBC included as part of its justification for building in Capel and Paddock Wood that the land owner had decided to sell the land, and that dealing with one land owner rather than several would be easier. This is possibly the worst, most egregious reason for building on one location that has ever been heard.

The local plan is not positively prepared, effective nor justified for a number of critical reasons.

Firstly, on the requirement for the plan to be positively prepared and effective. TWBC have not amended their plan to account for the changed circumstances brought about by the COVID 19 pandemic. The pandemic has shown that commuting and working patterns have changed and will continue to remain different to that expected pre-COVID - the local plan has not been reviewed to ensure it is fit for purpose going forward.

The vast majority of housing has been proposed to be placed at the tip of the borough - this site is entirely unsuitable for providing housing of increased job opportunities for the rest of the borough,

which stretches far to the east and south, whilst at the same time "lumping" the housing in one small area. The realities of travel across the borough means that this housing will not be suitable for those who live and are employed in, for example Cranbrook. Therefore, despite the stated aim of the plan to provide affordable housing and employment to the residents of the borough it will do the opposite. The proposal will result in people moving to the borough from outside it, ensuring that locals are unable to take advantage of the increase in housing, and inflating prices to the point that no one who works locally will be able to live here.

Much of the infrastructure included within the local plan will not be for TWBC to provide - and the rest will be dependent on "contributions" from developers. There is a very real risk that these will never materialise.

At the recent vote by councillors on whether to move to Reg 19 consultation, several of the papers were not made available, and worse, it was clearly stated in the meeting that some councillors had not even bothered to review the papers in advance of the vote. This is a clear abdication of responsibility, and undermining of due process.

Therefore the plan is not effective.

In relation to whether the plan is justified - the response to regulation 18 consultation was woefully inadequate - despite a large number of responses expressing serious concerns with the local plan (97% opposed the plan), these were not taken into account, with TWBC ploughing on with their proposal regardless of the views of the residents who would be affected by it. This makes a mockery of the consultation process required under national law. The only changes made were to exacerbate the issue by putting more houses into the plan for Capel and Paddock Wood.

The local plan also proposes to build on land that is at risk of flooding, while taking away agricultural land and green spaces. These are all in contravention of the stated aim of the plan.

The plan itself states that green belt is to prevent urban sprawl and should be protected - yet TWBC are proposing to remove 5% of green belt land in Capel parish to build the extension to Paddock Wood, and the Tudely Village. These are entirely unjustified removals of green belt land, and would in effect create a long corridor of development between Paddock Wood and Tonbridge. Green belt is meant as a protection - it should not be removed from such protection without significantly stronger justification. There are alternative sites which would not require the use of green belt land such as Castle Hill.

Flooding is a very real issue already in Paddock Wood and Five Oak Green. Flooding incidents are increasing, with the greatest threats coming from surface water flooding. The sites at Capel and Paddock Wood proposed for development are all prone to flooding, and play a key role in ensuring that existing developments are not affected more severely. This winter, the ground was saturated for weeks in the areas the plan expects to build. In Tudely, the water runs down the road like a river, and that is without the additional building in place. The proposal would remove trees and other vegetation that use the water; they would concrete over the very land with acts as a sponge. The mitigation that is proposed is insufficient to respond to this increased, and increasing risk. Combined with the proposal to create new roads to service these new developments, the issue just gets worse and worse. This is also against national policy which states that flood plans should not be built on where alternatives exist. Alternatives exist within Tunbridge Wells borough. Where mitigation plans are put in place, they will only exacerbate the impact on communities up and down river - places which already struggle with flooding - Tonbridge, East Peckham, Yalding to name just a few.

The plan also proposes to dig up more and more countryside to build additional roads to deal with the increased traffic - on yet more green belt and countryside. This area risks being covered in concrete, with the increase in air pollution, risk of flooding, reduction in green space and biodiversity the only likely outcomes.

The proposal made under the LCWIP Local Cycling and Walking Infrastructure Plan to block access to vehicles over the railway bridge will completely cut off half of Paddock Wood from the town centre - forcing all vehicles to use the A228, or country lanes. There is no consideration to the impact of having thousands of extra cars needed to make that journey, no consideration of the real world impact on the residents of Paddock Wood. What if there is an accident on the main road that closes it? What if an ambulance or fire engine is needed? What about residents who are less mobile? This plan will have the opposite effect to that stated. This has to be one of the most poorly thought through and ludicrous ideas within the local plan. Wishing that fewer people drove cars doesn't make it so. Taking other steps

- effective enforcement of parking on Commercial Road, creating a lively retail area rather than permitting more and more flats to be built in place of retail units will be much more likely to.

This plan goes against national policy - there is no provision for addressing the biodiversity crisis, no substantive plans to mitigate against the impacts of climate change with the expected increase in flooding. There is no recognition of the importance of green space for residents of Paddock Wood. There is no substantive plan for ensuring biodiversity net gain across the plan.

The only part of this plan I can support is the provision of a swimming pool - and yet, even with all the housing planned, it's still only potential in the plan. There is no assurance that ANY of the "benefits" put forward will be realised.

Paddock Wood has already absorbed 1000+ housing units, the intention to build yet another 6000+ dwelling within the space of 5 miles is utterly without consideration of the current character of the area, or its residents. Paddock Wood will grow in area by 200%, Tudely will expand by 500%. This is completely disproportionate. Local residents are being ignored.

It is also clear from the representations from Tonbridge and Malling Borough Council (TMBC), and its many residents that the duty to cooperate has been entirely disregarded by TWBC. The impacts of the exponential growth in housing proposed under this local plan will be felt by neighbouring local authorities as the services and infrastructure required by such a significant increase in housing and population will predominantly be felt by TMBC and Maidstone BC rather than by TWBC, but will not receive any revenue from council tax etc. the increase in traffic alone will have a significant impact on the residents of TMBC, there will be an increase in the number of people expecting to attend Tonbridge schools, and use leisure facilities in Tonbridge. TWBC's intention to put the vast majority of its intended housing growth right on the border with 2 other local authorities shows a blatant disregard for the knock on impact on those boroughs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to LISTEN to its residents and neighbouring local authorities. There needs to be a fundamental reassessment of where additional housing is needed in the borough and not take the easy approach of putting the vast majority of housing into one small area of the borough which won't support other residents and unfairly results in 15 years of disruption for a small proportion of the borough's residents. This will help address the effectiveness of the plan.

Alternative sites need to be considered - and some have already been offered up by developers. There has been inadequate consideration of brownfield and alternative sites, with simple dismissal of such ideas in response to proposals offered under previous consultations. These sites should be where they are not on flood plains, not on good agricultural land that will be lost forever, and not where the impacts of the developments will be felt almost entirely by a small proportion of residents and by those residents of neighbouring local authorities who will not benefit from any additional funding.

In addition, options 7 and 8 as set out in the Sustainability Appraisal should be further considered to more fairly distribute housing need across the borough.

Should development continue in Paddock Wood and Tudely Village, it must be a requirement that the additional services and infrastructure the plan suggests "may" follow need to be in place first. There

needs to be a complete rethink of the LCWIP Local Cycling and Walking Infrastructure Plan so that the road bridge in Paddock Wood is not closed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

the assessment of impact on the sustainability objectives in table 15 of the SA are not accurate - the benefits are overplayed - they would not be felt across the borough, the developments will not provide social mobility and inclusion as suggested, and the negative impacts on air, biodiversity, climate change, health, noise, travel and water are all under recognised.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 15 years, and have seen the expansion of the town even within that time. Despite promises, the infrastructure has never been delivered to address the issues created by the increase in housing. There has been increased flooding across the town, with more frequency, with some residents suffering from foul water in their homes caused by inadequate sewage systems having to cope with yet more residents. There has been a lack of investment by TWBC in Paddock Wood, no expansion of medical services, no improvement in the shopping facilities in the town, or in the leisure centre which is now run down. In fact, the opposite has been true. TWBC has consistently approved planning for developments that detract from Paddock Wood and add more problems without delivering on any of the investment that is critical. We have been promised time and again that there would be no further development without the infrastructure in place in advance. There is little or no regard on the impact of continued overdevelopment on the very nature of Paddock Wood and surrounding villages; no consideration of the increased flood risk to existing residents from the developments already approved, let alone those in the pipe line. And absolutely no consideration of the residents.

There is also a need to reassess the total requirement for housing going forward - the Government's "levelling up agenda" shows that increased housing will be needed in the north of England rather than in the SE corner - these changes in national approach have not been followed through into the local plan. TWBC have not sufficiently considered the future housing need of the borough to ensure that the number of dwellings being planned for is correct.

As part of the previous consultation on the local plan, TWBC included as part of its justification for building in Capel and Paddock Wood that the land owner had decided to sell the land, and that dealing with one land owner rather than several would be easier. This is possibly the worst, most egregious reason for building on one location that has ever been heard.

The local plan is not positively prepared, effective nor justified for a number of critical reasons.

Firstly, on the requirement for the plan to be positively prepared and effective. TWBC have not amended their plan to account for the changed circumstances brought about by the COVID 19 pandemic. The pandemic has shown that commuting and working patterns have changed and will continue to remain different to that expected pre-COVID - the local plan has not been reviewed to ensure it is fit for purpose going forward.

The vast majority of housing has been proposed to be placed at the tip of the borough - this site is entirely unsuitable for providing housing of increased job opportunities for the rest of the borough,

which stretches far to the east and south, whilst at the same time "lumping" the housing in one small area. The realities of travel across the borough means that this housing will not be suitable for those who live and are employed in, for example Cranbrook. Therefore, despite the stated aim of the plan to provide affordable housing and employment to the residents of the borough it will do the opposite. The proposal will result in people moving to the borough from outside it, ensuring that locals are unable to take advantage of the increase in housing, and inflating prices to the point that no one who works locally will be able to live here.

Much of the infrastructure included within the local plan will not be for TWBC to provide - and the rest will be dependent on "contributions" from developers. There is a very real risk that these will never materialise.

At the recent vote by councillors on whether to move to Reg 19 consultation, several of the papers were not made available, and worse, it was clearly stated in the meeting that some councillors had not even bothered to review the papers in advance of the vote. This is a clear abdication of responsibility, and undermining of due process.

Therefore the plan is not effective.

In relation to whether the plan is justified - the response to regulation 18 consultation was woefully inadequate - despite a large number of responses expressing serious concerns with the local plan (97% opposed the plan), these were not taken into account, with TWBC ploughing on with their proposal regardless of the views of the residents who would be affected by it. This makes a mockery of the consultation process required under national law. The only changes made were to exacerbate the issue by putting more houses into the plan for Capel and Paddock Wood.

The local plan also proposes to build on land that is at risk of flooding, while taking away agricultural land and green spaces. These are all in contravention of the stated aim of the plan.

The plan itself states that green belt is to prevent urban sprawl and should be protected - yet TWBC are proposing to remove 5% of green belt land in Capel parish to build the extension to Paddock Wood, and the Tudely Village. These are entirely unjustified removals of green belt land, and would in effect create a long corridor of development between Paddock Wood and Tonbridge. Green belt is meant as a protection - it should not be removed from such protection without significantly stronger justification. There are alternative sites which would not require the use of green belt land such as Castle Hill.

Flooding is a very real issue already in Paddock Wood and Five Oak Green. Flooding incidents are increasing, with the greatest threats coming from surface water flooding. The sites at Capel and Paddock Wood proposed for development are all prone to flooding, and play a key role in ensuring that existing developments are not affected more severely. This winter, the ground was saturated for weeks in the areas the plan expects to build. In Tudely, the water runs down the road like a river, and that is without the additional building in place. The proposal would remove trees and other vegetation that use the water; they would concrete over the very land with acts as a sponge. The mitigation that is proposed is insufficient to respond to this increased, and increasing risk. Combined with the proposal to create new roads to service these new developments, the issue just gets worse and worse. This is also against national policy which states that flood plans should not be built on where alternatives exist. Alternatives exist within Tunbridge Wells borough. Where mitigation plans are put in place, they will only exacerbate the impact on communities up and down river - places which already struggle with flooding - Tonbridge, East Peckham, Yalding to name just a few.

The plan also proposes to dig up more and more countryside to build additional roads to deal with the increased traffic - on yet more green belt and countryside. This area risks being covered in concrete, with the increase in air pollution, risk of flooding, reduction in green space and biodiversity the only likely outcomes.

The proposal made under the LCWIP Local Cycling and Walking Infrastructure Plan to block access to vehicles over the railway bridge will completely cut off half of Paddock Wood from the town centre - forcing all vehicles to use the A228, or country lanes. There is no consideration to the impact of having thousands of extra cars needed to make that journey, no consideration of the real world impact on the residents of Paddock Wood. What if there is an accident on the main road that closes it? What if an ambulance or fire engine is needed? What about residents who are less mobile? This plan will have the opposite effect to that stated. This has to be one of the most poorly thought through and ludicrous ideas within the local plan. Wishing that fewer people drove cars doesn't make it so. Taking other steps

- effective enforcement of parking on Commercial Road, creating a lively retail area rather than permitting more and more flats to be built in place of retail units will be much more likely to.

This plan goes against national policy - there is no provision for addressing the biodiversity crisis, no substantive plans to mitigate against the impacts of climate change with the expected increase in flooding. There is no recognition of the importance of green space for residents of Paddock Wood. There is no substantive plan for ensuring biodiversity net gain across the plan.

The only part of this plan I can support is the provision of a swimming pool - and yet, even with all the housing planned, it's still only potential in the plan. There is no assurance that ANY of the "benefits" put forward will be realised.

Paddock Wood has already absorbed 1000+ housing units, the intention to build yet another 6000+ dwelling within the space of 5 miles is utterly without consideration of the current character of the area, or its residents. Paddock Wood will grow in area by 200%, Tudely will expand by 500%. This is completely disproportionate. Local residents are being ignored.

It is also clear from the representations from Tonbridge and Malling Borough Council (TMBC), and its many residents that the duty to cooperate has been entirely disregarded by TWBC. The impacts of the exponential growth in housing proposed under this local plan will be felt by neighbouring local authorities as the services and infrastructure required by such a significant increase in housing and population will predominantly be felt by TMBC and Maidstone BC rather than by TWBC, but will not receive any revenue from council tax etc. the increase in traffic alone will have a significant impact on the residents of TMBC, there will be an increase in the number of people expecting to attend Tonbridge schools, and use leisure facilities in Tonbridge. TWBC's intention to put the vast majority of its intended housing growth right on the border with 2 other local authorities shows a blatant disregard for the knock on impact on those boroughs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to LISTEN to its residents and neighbouring local authorities. There needs to be a fundamental reassessment of where additional housing is needed in the borough and not take the easy approach of putting the vast majority of housing into one small area of the borough which won't support other residents and unfairly results in 15 years of disruption for a small proportion of the borough's residents. This will help address the effectiveness of the plan.

Alternative sites need to be considered - and some have already been offered up by developers. There has been inadequate consideration of brownfield and alternative sites, with simple dismissal of such ideas in response to proposals offered under previous consultations. These sites should be where they are not on flood plains, not on good agricultural land that will be lost forever, and not where the impacts of the developments will be felt almost entirely by a small proportion of residents and by those residents of neighbouring local authorities who will not benefit from any additional funding.

In addition, options 7 and 8 as set out in the Sustainability Appraisal should be further considered to more fairly distribute housing need across the borough.

Should development continue in Paddock Wood and Tudely Village, it must be a requirement that the additional services and infrastructure the plan suggests "may" follow need to be in place first. There

needs to be a complete rethink of the LCWIP Local Cycling and Walking Infrastructure Plan so that the road bridge in Paddock Wood is not closed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

the assessment of impact on the sustainability objectives in table 15 of the SA are not accurate - the benefits are overplayed - they would not be felt across the borough, the developments will not provide social mobility and inclusion as suggested, and the negative impacts on air, biodiversity, climate change, health, noise, travel and water are all under recognised.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 15 years, and have seen the expansion of the town even within that time. Despite promises, the infrastructure has never been delivered to address the issues created by the increase in housing. There has been increased flooding across the town, with more frequency, with some residents suffering from foul water in their homes caused by inadequate sewage systems having to cope with yet more residents. There has been a lack of investment by TWBC in Paddock Wood, no expansion of medical services, no improvement in the shopping facilities in the town, or in the leisure centre which is now run down. In fact, the opposite has been true. TWBC has consistently approved planning for developments that detract from Paddock Wood and add more problems without delivering on any of the investment that is critical. We have been promised time and again that there would be no further development without the infrastructure in place in advance. There is little or no regard on the impact of continued overdevelopment on the very nature of Paddock Wood and surrounding villages; no consideration of the increased flood risk to existing residents from the developments already approved, let alone those in the pipe line. And absolutely no consideration of the residents.

There is also a need to reassess the total requirement for housing going forward - the Government's "levelling up agenda" shows that increased housing will be needed in the north of England rather than in the SE corner - these changes in national approach have not been followed through into the local plan. TWBC have not sufficiently considered the future housing need of the borough to ensure that the number of dwellings being planned for is correct.

As part of the previous consultation on the local plan, TWBC included as part of its justification for building in Capel and Paddock Wood that the land owner had decided to sell the land, and that dealing with one land owner rather than several would be easier. This is possibly the worst, most egregious reason for building on one location that has ever been heard.

The local plan is not positively prepared, effective nor justified for a number of critical reasons.

Firstly, on the requirement for the plan to be positively prepared and effective. TWBC have not amended their plan to account for the changed circumstances brought about by the COVID 19 pandemic. The pandemic has shown that commuting and working patterns have changed and will continue to remain different to that expected pre-COVID - the local plan has not been reviewed to ensure it is fit for purpose going forward.

The vast majority of housing has been proposed to be placed at the tip of the borough - this site is entirely unsuitable for providing housing of increased job opportunities for the rest of the borough,

which stretches far to the east and south, whilst at the same time "lumping" the housing in one small area. The realities of travel across the borough means that this housing will not be suitable for those who live and are employed in, for example Cranbrook. Therefore, despite the stated aim of the plan to provide affordable housing and employment to the residents of the borough it will do the opposite. The proposal will result in people moving to the borough from outside it, ensuring that locals are unable to take advantage of the increase in housing, and inflating prices to the point that no one who works locally will be able to live here.

Much of the infrastructure included within the local plan will not be for TWBC to provide - and the rest will be dependent on "contributions" from developers. There is a very real risk that these will never materialise.

At the recent vote by councillors on whether to move to Reg 19 consultation, several of the papers were not made available, and worse, it was clearly stated in the meeting that some councillors had not even bothered to review the papers in advance of the vote. This is a clear abdication of responsibility, and undermining of due process.

Therefore the plan is not effective.

In relation to whether the plan is justified - the response to regulation 18 consultation was woefully inadequate - despite a large number of responses expressing serious concerns with the local plan (97% opposed the plan), these were not taken into account, with TWBC ploughing on with their proposal regardless of the views of the residents who would be affected by it. This makes a mockery of the consultation process required under national law. The only changes made were to exacerbate the issue by putting more houses into the plan for Capel and Paddock Wood.

The local plan also proposes to build on land that is at risk of flooding, while taking away agricultural land and green spaces. These are all in contravention of the stated aim of the plan.

The plan itself states that green belt is to prevent urban sprawl and should be protected - yet TWBC are proposing to remove 5% of green belt land in Capel parish to build the extension to Paddock Wood, and the Tudely Village. These are entirely unjustified removals of green belt land, and would in effect create a long corridor of development between Paddock Wood and Tonbridge. Green belt is meant as a protection - it should not be removed from such protection without significantly stronger justification. There are alternative sites which would not require the use of green belt land such as Castle Hill.

Flooding is a very real issue already in Paddock Wood and Five Oak Green. Flooding incidents are increasing, with the greatest threats coming from surface water flooding. The sites at Capel and Paddock Wood proposed for development are all prone to flooding, and play a key role in ensuring that existing developments are not affected more severely. This winter, the ground was saturated for weeks in the areas the plan expects to build. In Tudely, the water runs down the road like a river, and that is without the additional building in place. The proposal would remove trees and other vegetation that use the water; they would concrete over the very land with acts as a sponge. The mitigation that is proposed is insufficient to respond to this increased, and increasing risk. Combined with the proposal to create new roads to service these new developments, the issue just gets worse and worse. This is also against national policy which states that flood plans should not be built on where alternatives exist. Alternatives exist within Tunbridge Wells borough. Where mitigation plans are put in place, they will only exacerbate the impact on communities up and down river - places which already struggle with flooding - Tonbridge, East Peckham, Yalding to name just a few.

The plan also proposes to dig up more and more countryside to build additional roads to deal with the increased traffic - on yet more green belt and countryside. This area risks being covered in concrete, with the increase in air pollution, risk of flooding, reduction in green space and biodiversity the only likely outcomes.

The proposal made under the LCWIP Local Cycling and Walking Infrastructure Plan to block access to vehicles over the railway bridge will completely cut off half of Paddock Wood from the town centre - forcing all vehicles to use the A228, or country lanes. There is no consideration to the impact of having thousands of extra cars needed to make that journey, no consideration of the real world impact on the residents of Paddock Wood. What if there is an accident on the main road that closes it? What if an ambulance or fire engine is needed? What about residents who are less mobile? This plan will have the opposite effect to that stated. This has to be one of the most poorly thought through and ludicrous ideas within the local plan. Wishing that fewer people drove cars doesn't make it so. Taking other steps

- effective enforcement of parking on Commerical Road, creating a lively retail area rather than permitting more and more flats to be built in place of retail units will be much more likely to.

This plan goes against national policy - there is no provision for addressing the biodiversity crisis, no substantive plans to mitigate against the impacts of climate change with the expected increase in flooding. There is no recognition of the importance of green space for residents of Paddock Wood. There is no substantive plan for ensuring biodiversity net gain across the plan.

The only part of this plan I can support is the provision of a swimming pool - and yet, even with all the housing planned, it's still only potential in the plan. There is no assurance that ANY of the "benefits" put forward will be realised.

Paddock Wood has already absorbed 1000+ housing units, the intention to build yet another 6000+ dwelling within the space of 5 miles is utterly without consideration of the current character of the area, or its residents. Paddock Wood will grow in area by 200%, Tudely will expand by 500%. This is completely disproportionate. Local residents are being ignored.

It is also clear from the representations from Tonbridge and Malling Borough Council (TMBC), and its many residents that the duty to cooperate has been entirely disregarded by TWBC. The impacts of the exponential growth in housing proposed under this local plan will be felt by neighbouring local authorities as the services and infrastructure required by such a significant increase in housing and population will predominantly be felt by TMBC and Maidstone BC rather than by TWBC, but will not receive any revenue from council tax etc. the increase in traffic alone will have a significant impact on the residents of TMBC, there will be an increase in the number of people expecting to attend Tonbridge schools, and use leisure facilities in Tonbridge. TWBC's intention to put the vast majority of its intended housing growth right on the border with 2 other local authorities shows a blatant disregard for the knock on impact on those boroughs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC need to LISTEN to its residents and neighbouring local authorities. There needs to be a fundamental reassessment of where additional housing is needed in the borough and not take the easy approach of putting the vast majority of housing into one small area of the borough which won't support other residents and unfairly results in 15 years of disruption for a small proportion of the borough's residents. This will help address the effectiveness of the plan.

Alternative sites need to be considered - and some have already been offered up by developers. There has been inadequate consideration of brownfield and alternative sites, with simple dismissal of such ideas in response to proposals offered under previous consultations. These sites should be where they are not on flood plains, not on good agricultural land that will be lost forever, and not where the impacts of the developments will be felt almost entirely by a small proportion of residents and by those residents of neighbouring local authorities who will not benefit from any additional funding.

In addition, options 7 and 8 as set out in the Sustainability Appraisal should be further considered to more fairly distribute housing need across the borough.

Should development continue in Paddock Wood and Tudely Village, it must be a requirement that the additional services and infrastructure the plan suggests "may" follow need to be in place first. There

needs to be a complete rethink of the LCWIP Local Cycling and Walking Infrastructure Plan so that the road bridge in Paddock Wood is not closed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

the assessment of impact on the sustainability objectives in table 15 of the SA are not accurate - the benefits are overplayed - they would not be felt across the borough, the developments will not provide social mobility and inclusion as suggested, and the negative impacts on air, biodiversity, climate change, health, noise, travel and water are all under recognised.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR/SS3 Tudeley Garden Village.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

- 1 **Very special circumstances.** - There are no special circumstances to justify removing 170 hectares of land from the Greenbelt. If it were true that the borough was so constrained, that it could not find the amount of land elsewhere, then that would itself constitute a justification to request other neighbouring boroughs to fulfil the unmet housing requirement. If that failed, then TWBC would have an excellent reason for informing Central Government that they would be unable to fulfil their housing target.
- 2 While it may be true that some 70% of the borough is designated as Greenbelt or AONB. If one assumes that up to a maximum 10% of the borough is already developed, (or otherwise constrained) then there remains at least 20% of the Borough, that could be made available for development ie, something over 6000 hectares. I just find it unbelievable that none of this land could be made available for housing.
- 3 **Brownfield land.** – the use of such land is a priority in the NPPF and in the latest Government policies. While it is true that TWBC has been maintaining a Brownfield land register, there is little evidence of new sites being identified and included. There is no evidence that the Council has given high priority to hunting out additional Brownfield sites to include in their register. To use Greenbelt, when Brownfield site options have not been vigorously exhausted, seems to be against NPPF and Government policies.
- 4 **Housing density.** There is substantial scope for increasing housing density. This is particularly relevant to address the key findings of the Council's Housing Needs Study. This study makes it clear that the overwhelming requirement is for affordable homes, and homes for older people. Much higher densities must be planned for to enable the council to meet its targets and face the economic reality of affordability.
- 5 **Town Centres** - I am not convinced that the council is making the best use of these areas to provide additional housing. High street retail activity is reducing, and this trend is likely to continue, thus making available town centre sites suitable for redevelopment. This should present an ideal opportunity to address the need for affordable homes, homes for old people, enabling reduced transport needs and easy access to town centres.
- 6 **Lack of Community engagement.**

I have a legitimate concern that no real consultation of any sort took place before the decision was taken to include this area in the Draft Local Plan.

The Localism Act of 2011 and the policies enshrined in the latest NPPF regulations make it clear that community engagement is essential. The Chairman of the Capel Parish has confirmed that, although he was aware of the proposed housing development before it was announced publicly in May/June 2019 the parish councillors had been required to sign an NDA to prevent them from discussing the proposals with the residents.

The key factor that seems to have obscured rational thinking and the obligation to ensure local engagement about the proposed garden village is the overriding attraction to the council of having only one landowner to deal with. For that benefit TWBC has sacrificed the support of the local community and substantially increased the risks of a failure in delivery of their plan.

It is still not clear to me why these proposals were not properly discussed with the local community. The Parish of Capel has a good track record in responding to planning initiatives. In 2006 the Parish produced a comprehensive Capel Parish Plan which dealt with many of the defects of the settlement at Five Oak Green and the aspirations of its residents. Many of the conclusions of that report remain unfulfilled today, because of factors outside the control of the Parish Council.

I believe the selection of the site at Tudeley has been 'managed' over a long period to ensure the local people did not have a proper say. It is a process worthy of 'Yes Minister'. First, you have an Issues and Options public consultation setting out five Options for growth in housing numbers over the 15 year planning period. Little information is offered about Option 5 – the creation of a Garden Village somewhere in the Borough. Certainly, no possible locations were mentioned (and no suggestion whatever that it might be wholly on Greenbelt). Even so the clear response from consultees favoured other options for growth, not a garden village. Then, when the Draft Local Plan (DLP) was published in July 2019, the central plank of the plan was to locate a garden village on the greenbelt at Tudeley. There has still not been any proper explanation of why the views of the consultees in the earlier Issues and Options consultation were ignored.

In the DLP Plan little detailed information on exactly what was proposed was provided. The excuse tendered at the time, was that land was only offered at a late stage, and that there was insufficient time to carry out all the detailed assessments and costings that were required. The residents were told not to worry as they would be able to study the Masterplan and that Hadlow estates would be providing a presentation shortly. The net effect has been that the community has had no engagement whatever in this 'decision making' process and TWBC has totally abrogated its duty of care to its constituents. This cannot be the whole story. Hadlow Estates will have had frequent interaction with the council over many decades concerning planning matters relating to the nearby mineral extraction and more recently relating to matters associated with their nearby large solar park and the large extension to the equestrian centre at Bank farm. The LPA will have had, or at the very least, ought to have had, a clear view of the future aspirations of that landowner.

It is just a shame that these thoughts were not shared with the community with a view to arriving at a level of development that might be acceptable..

TWBC have successfully sponsored a number of Neighbourhood Development Plans in the borough, it is unfortunate that no such Capel Plan was established until after it was too late for it to play any part in this decision making process.

Once there was the slightest hint of a largescale development in the Parish, there should have been pressure from TWBC to the Parish Council to create such a plan to inform future development policies.

When the P-S Local Plan was published in March, it became clear that once again TWBC had taken little notice of the very extensive raft of constructive criticism that had been levelled at the proposal to build a Garden Village at Tudeley. It is now clear that any engagement with the community purely to inform and comply with regulation with no intention of seeking input from the community. The net result is that we were presented with a 'fait accompli'..

I believe that the proposed Garden Village at Tudeley is seriously unsound and will be disastrous for the community and ineffective in delivering the requested number of new houses for the borough in the timeframe envisaged. It is unsound because the plan relies far too heavily on STR/SS3 and the strategy for Capel (STR/CA1).

If this proposal were to go ahead it would require exceptionally large amounts of capital for infrastructure, virtually most of which needs to be provided upfront, and the work completed before any housing development can take place.

1 Cumulative effects and sustainability

The Strategy for Tudeley Village does not explain properly the implications of the close proximity of the new Village to the already approved sites for the extensive mining of sand and gravel. These mineral deposits lie only a very short distance from the proposed Village site along the Medway Valley. The plan does not properly explain the potential conflicts that may arise from that close proximity, nor does it explain that in the event of such conflicts that mineral extraction will (NPPF) take priority over other issues. Nor does it address the cumulative adverse effects of competing developments of mineral extraction and housing at the same time in a relatively small area.

Similarly, the plan does not explain the implications of the close proximity of the new Garden Village to the settlement of Five Oak Green. Para 5.210 hints at the problem. It mentions local towns but interestingly does not mention the nearby village that will be most affected.

Para 5.212 again talks of addressing the needs of the new community, totally ignoring the needs of the large number of residents in the adjacent/ virtually contiguous Village of Five Oak Green.

Much mileage is made of the sustainability arguments for the New Garden Village. One thing is for sure, that, if today, a sustainability assessment was made for Five Oak Green one would be struggling to produce a positive result. If this new development were to go ahead the position of Five Oak Green would be permanently downgraded, with this village doomed to be the poor relation and dependent on its supposedly vibrant neighbour. It would be much better if some real thought was given to making Five Oak Green into a real sustainable settlement.

TWBC seem to acknowledge the problem (point 7. f of STR/SS3) but do nothing real to address it.

'the design should incorporate means to ensure that there is appropriate visual separation between Tudeley Village and Five Oak Green, including potentially the use of structural planting on land outside the allocation, but within the wider land ownership.'

There are a number of positive aspects in the P-S Local Plan that could be used to mastermind a regeneration of the Village of Five Oak Green which would be welcomed by many residents and might well lead to a sensible level of new additional housing. It is interesting to note that the Housing Needs Study suggests Capel Parish has requirement of 10 new dwellings per year, 150 new homes during the plan period.

- 1 **Heritage Assets** - On a personal note, my wife and I have lived for some 50 years at Tudeley Hall, Hartlake road, a Grade II listed building, which has origins that go back to the seventeenth century. The proposed plan totally engulfs my home on three sides with the increasingly busy Hartlake road in front. As far as I can see no mitigation measures are proposed to reduce the enormous harm that will be done to our environment and our rights to 'quiet enjoyment'.
- 2 **Hartlake Road** – In the last few years this has changed from a quiet rural lane. The completion of the A21 extension and the increasing congestion within Tonbridge has forced motorists to use Hartlake Road as a rat run/bypass for Tonbridge. At peak periods there are already long tail backs and the prospect of further big increase in traffic, is horrendous.

10.Flooding - Again on a personal note the fields all around my home (all part of the 170 hectares) are full of springs and for some eight months a year water drains from them and runs down Hartlake road. My cellar has water in it for many months every year. I feel the council has underestimated the scale of the drainage and flooding issues.

In conclusion, I note and welcome (in Para 5.229) that the Council now proposes to work with the local community through the Capel Neighbourhood Development Plan Group, but unless this policy SST/SS3 can be removed from the Local Plan, it will be impossible for them to produce a plan that has the support of the community has the support of the community.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [P-S Local Plan 030621.pdf](#)

Policy STR/SS3 Tudeley Garden Village.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

- 1 **Very special circumstances.** - There are no special circumstances to justify removing 170 hectares of land from the Greenbelt. If it were true that the borough was so constrained, that it could not find the amount of land elsewhere, then that would itself constitute a justification to request other neighbouring boroughs to fulfil the unmet housing requirement. If that failed, then TWBC would have an excellent reason for informing Central Government that they would be unable to fulfil their housing target.
- 2 While it may be true that some 70% of the borough is designated as Greenbelt or AONB. If one assumes that up to a maximum 10% of the borough is already developed, (or otherwise constrained) then there remains at least 20% of the Borough, that could be made available for development ie, something over 6000 hectares. I just find it unbelievable that none of this land could be made available for housing.
- 3 **Brownfield land.** – the use of such land is a priority in the NPPF and in the latest Government policies. While it is true that TWBC has been maintaining a Brownfield land register, there is little evidence of new sites being identified and included. There is no evidence that the Council has given high priority to hunting out additional Brownfield sites to include in their register. To use Greenbelt, when Brownfield site options have not been vigorously exhausted, seems to be against NPPF and Government policies.
- 4 **Housing density.** There is substantial scope for increasing housing density. This is particularly relevant to address the key findings of the Council's Housing Needs Study. This cannot be the whole story. Hadlow Estates will have had frequent interaction with the council over many decades concerning planning matters relating to the nearby mineral extraction and more recently relating to matters associated with their nearby large solar park and the large extension to the equestrian centre at Bank farm. The LPA will have had, or at the very least, ought to have had, a clear view of the future aspirations of that landowner.

It is just a shame that these thoughts were not shared with the community with a view to arriving at a level of development that might be acceptable..

TWBC have successfully sponsored a number of Neighbourhood Development Plans in the borough, it is unfortunate that no such Capel Plan was established until after it was too late for it to play any part in this decision making process. Once there was the slightest hint of a largescale development in the Parish, there should have been pressure from TWBC to the Parish Council to create such a plan to inform future development policies.

When the P-S Local Plan was published in March, it became clear that once again TWBC had taken little notice of the very extensive raft of constructive criticism that had been levelled at the proposal to build a Garden Village at Tudeley. It is now clear that any engagement with the community purely to inform and comply with regulation with no intention of seeking input from the community. The net result is that we were presented with a 'fait accompli'..

I believe that the proposed Garden Village at Tudeley is seriously unsound and will be disastrous for the community and ineffective in delivering the requested number of new houses for the borough in the timeframe envisaged.

It is unsound because the plan relies far too heavily on STR/SS3 and the strategy for Capel (STR/CA1).

If this proposal were to go ahead it would require exceptionally large amounts of capital for infrastructure, virtually most of which needs to be provided upfront, and the work completed before any housing development can take place.

1 Cumulative effects and sustainability

The Strategy for Tudeley Village does not explain properly the implications of the close proximity of the new Village to the already approved sites for the extensive mining of sand and gravel. These mineral deposits lie only a very short distance from the proposed Village site along the Medway Valley. The plan does not properly explain the potential conflicts that may arise from that close proximity, nor does it explain that in the event of such conflicts that mineral extraction will (NPPF) take priority over other issues. Nor does it address the cumulative adverse effects of competing developments of mineral extraction and housing at the same time in a relatively small area.

Similarly, the plan does not explain the implications of the close proximity of the new Garden Village to the settlement of Five Oak Green. Para 5.210 hints at the problem. It mentions local towns but interestingly does not mention the nearby village that will be most affected.

Para 5.212 again talks of addressing the needs of the new community, totally ignoring the needs of the large number of residents in the adjacent/ virtually contiguous Village of Five Oak Green.

Much mileage is made of the sustainability arguments for the New Garden Village. One thing is for sure, that, if today, a sustainability assessment was made for Five Oak Green one would be struggling to produce a positive result. If this new development were to go ahead the position of Five Oak Green would be permanently downgraded, with this village doomed to be the poor relation and dependent on its supposedly vibrant neighbour. It would be much better if some real thought was given to making Five Oak Green into a real sustainable settlement.

TWBC seem to acknowledge the problem (point 7. f of STR/SS3) but do nothing real to address it.

'the design should incorporate means to ensure that there is appropriate visual separation between Tudeley Village and Five Oak Green, including potentially the use of structural planting on land outside the allocation, but within the wider land ownership.'

There are a number of positive aspects in the P-S Local Plan that could be used to mastermind a regeneration of the Village of Five Oak Green which would be welcomed by many residents and might well lead to a sensible level of new additional housing. It is interesting to note that the Housing Needs Study suggests Capel Parish has requirement of 10 new dwellings per year, 150 new homes during the plan period.

- 1 **Heritage Assets** - On a personal note, my wife and I have lived for some 50 years at Tudeley Hall, Hartlake road, a Grade II listed building, which has origins that go back to the seventeenth century. The proposed plan totally engulfs my home on three sides with the increasingly busy Hartlake road in front. As far as I can see no mitigation measures are proposed to reduce the enormous harm that will be done to our environment and our rights to 'quiet enjoyment'.
 - 2 **Hartlake Road** – In the last few years this has changed from a quiet rural lane. The completion of the A21 extension and the increasing congestion within Tonbridge has forced motorists to use Hartlake Road as a rat run/bypass for Tonbridge. At peak periods there are already long tail backs and the prospect of further big increase in traffic, is horrendous.
- 10.**Flooding** - Again on a personal note the fields all around my home (all part of the 170 hectares) are full of springs and for some eight months a year water drains from them and runs down Hartlake road. My cellar has water in it for many months every year. I feel the council has underestimated the scale of the drainage and flooding issues.

In conclusion, I note and welcome (in Para 5.229) that the Council now proposes to work with the local community through the Capel Neighbourhood Development Plan Group, but unless this policy SST/SS3 can be removed from the Local Plan, it will be impossible for them to produce a plan that has the support of the community has the support of the community.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

If you would like to attach a file in support of your comments, please upload it here. [P-S Local Plan 030621.pdf \(1\)](#)

Question 1	
Respondent's Name and/or Organisation	konrad Legg
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/CA1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR/CA1 The Strategy for Capel parish.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

- 1 **Very special circumstances.** - There are no special circumstances to justify removing 170 hectares of land from the Greenbelt. If it were true that the borough was so constrained, that it could not find the amount of land elsewhere, then that would itself constitute a justification to request other neighbouring boroughs to fulfil the unmet housing requirement. If that failed, then TWBC would have an excellent reason for informing Central Government that they would be unable to fulfil their housing target.
- 2 While it may be true that some 70% of the borough is designated as Greenbelt or AONB. If one assumes that up to a maximum 10% of the borough is already developed, (or otherwise constrained) then there remains at least 20% of the Borough, that could be made available for development ie, something over 6000 hectares. I just find it unbelievable that none of this land could be made available for housing.
- 3 **Brownfield land.** – the use of such land is a priority in the NPPF and in the latest Government policies. While it is true that TWBC has been maintaining a Brownfield land register, there is little evidence of new sites being identified and included. There is no evidence that the Council has given high priority to hunting out additional Brownfield sites to include in their register. To use Greenbelt, when Brownfield site options have not been vigorously exhausted, seems to be against NPPF and Government policies.
- 4 **Housing density.** There is substantial scope for increasing housing density. This is particularly relevant to address the key findings of the Council's Housing Needs Study. This study makes it clear that the overwhelming requirement is for affordable homes, and homes for older people. Much higher densities must be planned for to enable the council to meet its targets and face the economic reality of affordability.
- 5 **Town Centres** - I am not convinced that the council is making the best use of these areas to provide additional housing. High street retail activity is reducing, and this trend is likely to continue, thus making available town centre sites suitable for redevelopment. This should present an ideal opportunity to address the need for affordable homes, homes for old people, enabling reduced transport needs and easy access to town centres.
- 6 **Lack of Community engagement.** I have a legitimate concern that no real consultation of any sort took place before the decision was taken to include this area in the Draft Local Plan.

The Localism Act of 2011 and the policies enshrined in the latest NPPF regulations make it clear that community engagement is essential. The Chairman of the Capel Parish has confirmed that, although he was aware of the proposed housing development before it was announced publicly in May/June 2019 the parish councillors had been required to sign an NDA to prevent them from discussing the proposals with the residents.

The key factor that seems to have obscured rational thinking and the obligation to ensure local engagement about the proposed garden village is the overriding attraction to the council of having only one landowner to deal with. For that benefit TWBC has sacrificed the support of the local community and substantially increased the risks of a failure in delivery of their plan.

It is still not clear to me why these proposals were not properly discussed with the local community. The Parish of Capel has a good track record in responding to planning initiatives. In 2006 the Parish produced a comprehensive Capel Parish Plan which dealt with many of the defects of the settlement at Five Oak Green and the aspirations of its residents. Many of the conclusions of that report remain unfulfilled today, because of factors outside the control of the Parish Council.

I believe the selection of the site at Tudeley has been 'managed' over a long period to ensure the local people did not have a proper say. It is a process worthy of 'Yes Minister'. First, you have an Issues and Options public consultation setting out five Options for growth in housing numbers over the 15 year planning period. Little information is offered about Option 5 - the creation of a Garden Village somewhere in the Borough. Certainly, no possible locations were mentioned (and no suggestion whatever that it might be wholly on Greenbelt). Even so the clear response from consultees favoured other options for growth, not a garden village. Then, when the Draft Local Plan (DLP) was published in July 2019, the central plank of the plan was to locate a garden village on the greenbelt at Tudeley. There has still not been any proper explanation of why the views of the consultees in the earlier Issues and Options consultation were ignored.

In the DLP Plan little detailed information on exactly what was proposed was provided. The excuse tendered at the time, was that land was only offered at a late stage, and that there was insufficient time to carry out all the detailed assessments and costings that were required. The residents were told not to worry as they would be able to study the Masterplan and that Hadlow estates would be providing a presentation shortly. The net effect has been that the community has had no engagement whatever in this 'decision making' process and TWBC has totally abrogated its duty of care to its constituents.

This cannot be the whole story. Hadlow Estates will have had frequent interaction with the council over many decades concerning planning matters relating to the nearby mineral extraction and more recently relating to matters associated with their nearby large solar park and the large extension to the equestrian centre at Bank farm. The LPA will have had, or at the very least, ought to have had, a clear view of the future aspirations of that landowner.

It is just a shame that these thoughts were not shared with the community with a view to arriving at a level of development that might be acceptable..

TWBC have successfully sponsored a number of Neighbourhood Development Plans in the borough, it is unfortunate that no such Capel Plan was established until after it was too late for it to play any part in this decision making process. Once there was the slightest hint of a largescale development in the Parish, there should have been pressure from TWBC to the Parish Council to create such a plan to inform future development policies.

When the P-S Local Plan was published in March, it became clear that once again TWBC had taken little notice of the very extensive raft of constructive criticism that had been levelled at the proposal to build a Garden Village at Tudeley. It is now clear that any engagement with the community purely to inform and comply with regulation with no intention of seeking input from the community. The net result is that we were presented with a 'fait accompli'..

I believe that the proposed Garden Village at Tudeley is seriously unsound and will be disastrous for the community and ineffective in delivering the requested number of new houses for the borough in the timeframe envisaged.

It is unsound because the plan relies far too heavily on STR/SS3 and the strategy for Capel (STR/CA1).

If this proposal were to go ahead it would require exceptionally large amounts of capital for infrastructure, virtually most of which needs to be provided upfront, and the work completed before any housing development can take place.

1 Cumulative effects and sustainability

The Strategy for Tudeley Village does not explain properly the implications of the close proximity of the new Village to the already approved sites for the extensive mining of sand and gravel. These

mineral deposits lie only a very short distance from the proposed Village site along the Medway Valley. The plan does not properly explain the potential conflicts that may arise from that close proximity, nor does it explain that in the event of such conflicts that mineral extraction will (NPPF) take priority over other issues. Nor does it address the cumulative adverse effects of competing developments of mineral extraction and housing at the same time in a relatively small area.

Similarly, the plan does not explain the implications of the close proximity of the new Garden Village to the settlement of Five Oak Green. Para 5.210 hints at the problem. It mentions local towns but interestingly does not mention the nearby village that will be most affected.

Para 5.212 again talks of addressing the needs of the new community, totally ignoring the needs of the large number of residents in the adjacent/ virtually contiguous Village of Five Oak Green.

Much mileage is made of the sustainability arguments for the New Garden Village. One thing is for sure, that, if today, a sustainability assessment was made for Five Oak Green one would be struggling to produce a positive result. If this new development were to go ahead the position of Five Oak Green would be permanently downgraded, with this village doomed to be the poor relation and dependent on its supposedly vibrant neighbour. It would be much better if some real thought was given to making Five Oak Green into a real sustainable settlement.

TWBC seem to acknowledge the problem (point 7. f of STR/SS3) but do nothing real to address it.

'the design should incorporate means to ensure that there is appropriate visual separation between Tudeley Village and Five Oak Green, including potentially the use of structural planting on land outside the allocation, but within the wider land ownership.'

There are a number of positive aspects in the P-S Local Plan that could be used to mastermind a regeneration of the Village of Five Oak Green which would be welcomed by many residents and might well lead to a sensible level of new additional housing. It is interesting to note that the Housing Needs Study suggests Capel Parish has requirement of 10 new dwellings per year, 150 new homes during the plan period.

- 1 **Heritage Assets** - On a personal note, my wife and I have lived for some 50 years at Tudeley Hall, Hartlake road, a Grade II listed building, which has origins that go back to the seventeenth century. The proposed plan totally engulfs my home on three sides with the increasingly busy Hartlake road in front. As far as I can see no mitigation measures are proposed to reduce the enormous harm that will be done to our environment and our rights to 'quiet enjoyment'.
- 2 **Hartlake Road** – In the last few years this has changed from a quiet rural lane. The completion of the A21 extension and the increasing congestion within Tonbridge has forced motorists to use Hartlake Road as a rat run/bypass for Tonbridge. At peak periods there are already long tail backs and the prospect of further big increase in traffic, is horrendous.

10.Flooding - Again on a personal note the fields all around my home (all part of the 170 hectares) are full of springs and for some eight months a year water drains from them and runs down Hartlake road. My cellar has water in it for many months every year. I feel the council has underestimated the scale of the drainage and flooding issues.

In conclusion, I note and welcome (in Para 5.229) that the Council now proposes to work with the local community through the Capel Neighbourhood Development Plan Group, but unless this policy SST/SS3 can be removed from the Local Plan, it will be impossible for them to produce a plan that has the support of the community has the support of the community.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I believe that this strategy should be removed from the P-S Local Plan as this part of the plan is unsound and if not removed will make the whole plan unsound and ineffective.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Resident of Tunbridge Wells for over 40 years. For 20 years was director of Electronics Development company based first in St Johns area on A26 the relocated to Matfield, 1/2 mile from Paddock Wood.

My main concerns are **traffic**, we live on Gedges Hill, we used to be able to walk along the B2160 road to Matfield. Now the traffic is so busy with large lorries that it is dangerous and we have no alternative to using our car to go ANYWHERE. The existing developments and further developments of dwellings in Paddock Wood will only make this worse as the B2160 is the main route from Paddock Wood to the A21.

Dwellings: The existing 3 developments on Paddock Wood, Foal Hurst Green [Mascalls Farm] Mascals Court off Green Lane and Church Farm will amply provide enough houses for local residents. In addition all over Paddock Wood, **every empty space** is being built on. Existing houses are being knocked down and up to 7 dwellings being built in their place. This is already OVER DEVELOPMENT.

The lack of capacity at doctors surgeries, dentists, schools etc. mean residents are having to travel further away causing more traffic movement.

It is also of concern that :-a] Croyden council is using Paddock Wood to move its social housing tenants to. and

b]The Foal Hurst Green [Mascalls Farm] development is being marketed to Hong Kong for Chinese investors to buy. Does TWBC really want Chinese landlords profiting from houses built on greenfield sites.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The developments of dwellings in Paddock Wood area are not sound due to insufficient infrastructure and poor transport links. A much better plan would be to put new developments close to the A21, either Kippings Cross, North Farm or Castle Hill. Of these North Farm would probably be best with nearness to High Brooms station, local employment and good transport links.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses

there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at see web link and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458)

that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf), Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Laura Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No 5.420, 5.421

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_1084 and PSLP_1086]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses

there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at see web link and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458)

that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf), Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score

the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Consultee	Mr Danny Lenox-Conyngham [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] West Molesey Surrey [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Danny Lenox-Conyngham [REDACTED]
Comment ID	PSLP_335
Response Date	24/05/21 12:53
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.4
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Danny Lennox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No 5.420, 5.421

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_335 and PSLP_339]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38,

we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the site's historic significance? This is available at [see web link](#) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in

the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a

Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(<https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/>

[Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf](#)),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the

Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Danny Lenox-Conyngham [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] West Molesey Surrey [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Danny Lenox-Conyngham [REDACTED]
Comment ID	PSLP_339
Response Date	24/05/21 12:53
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.4
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Danny Lennox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No 5.420, 5.421

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_335 and PSLP_339]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the

explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38,

we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any

more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's

consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Address	[REDACTED] Bristol [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Fred Lenox-Conyngham [REDACTED]
Comment ID	PSLP_356
Response Date	24/05/21 17:57
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.4
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Fred Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.420, 5.421

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_356 and PSLP_362]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments)

(see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10

terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has

demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting

evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment by	Mr Fred Lenox-Conyngham [REDACTED]
Comment ID	PSLP_362
Response Date	24/05/21 17:57
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.7
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Fred Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraphs 5.420, 5.421

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_356 and PSLP_362]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish

(possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures see weblink

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4 .4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close

to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the

less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at (see web link) and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458)

that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance?

This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Patrick Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No 5.420, 5.421

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_1056 and PSLP_1073]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring

parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one.

- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and

this was of concern even when only 24 houses were proposed for the site. “You will see from KCC’s comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF.” (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP’s Independent Examiner’s queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA’s scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, “The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant’s consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).”

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses

there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at see web link and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP's problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for

unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf), Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Patrick Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No 5.420, 5.421

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC Comment: This representation has been submitted against Policies AL/BE3 & AL/BE4 - See comment numbers PSLP_1056 and PSLP_1073]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1.The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring

parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging

the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
