**Tunbridge Wells Borough Council** 

# Sustainability Appraisal of the Local Plan

Version for submission

October 2021 (reissued March 2022 to correct two minor errors in Table 12)

### **Document History**

The following tables record the various Sustainability Appraisal reports that have been produced to date.

Sustainability Appraisal Scoping Report (Stage A)

# **Non-Technical Summary**

To make meaningful progress towards a more sustainable way of living, it is essential that Local Plans are developed with a detailed consideration of sustainability issues from the outset. This is the purpose of a Sustainability Appraisal (SA).

This report summarises how sustainability has been considered during the process of preparing a Local Plan for the borough of Tunbridge Wells.

The process is a legal requirement under the Planning and Compulsory Purchase Act 2004 and has been completed using a framework methodology that was agreed with Natural England, the Environment Agency and Historic England. The framework is explained in detail in Chapter 4. It was informed by a comprehensive review of policies and issues pertinent to the borough that culminated in the formation of 19 sustainability objectives covering the economic, environmental and social themes that are integral to sustainable development.

The purpose of developing this framework was to create a consistent and robust basis for determining the degree to which the 19 sustainability objectives were supported by all the various elements of the emerging Local Plan, namely:

- the eleven strategic objectives
- the ten strategic policies including the formation of the spatial development strategy;
- the sites proposed for allocation; and,
- the Development Management policies.

Wherever possible, reasonable alternatives to these elements were also tested. As a whole, this process has informed policy choices and enabled mitigation measures to be recommended so that the beneficial effects of the Local Plan could be maximised, and any adverse effects could be minimised.

This process is summarised below in four steps and should be reviewed alongside the <u>SA</u> <u>Scoping Report</u> and <u>Interim SA</u> for Issues and Options stage which were prepared to support earlier stages in the formation of the <u>Draft Local Plan</u>.

#### (1) Testing the Local Plan objectives against the Sustainability Appraisal framework

A simple compatibility test was undertaken to determine how well the eleven draft strategic objectives of the emerging Local Plan matched the 19 sustainability objectives previously determined as appropriate for this borough (see <u>SA Scoping Report</u>).

The key findings from this test are described in Chapter 5. In summary, it was found that the strategic objectives were largely in support of all the SA objectives but there was also some uncertainty created by the lack of detail inherent within the strategic objectives. The strategic objectives address critical environmental issues such as climate change explicitly, provide for sustainable travel modes and protection of sensitive assets such as the Area of Outstanding Natural Beauty (AONB), and address fundamental social and economic issues such as meeting housing and economic needs and improving infrastructure.

All strategic objectives were compatible with multiple Sustainability Objectives. However, some incompatibility was predicted for the strategic objectives of Housing and Garden Settlements. This was because it would not be possible to find land for a large number of new dwellings without incurring some environmental conflict. The relationship between the balance of the economic, social and environmental priorities is a fundamental theme running through the SA.

(2) Developing the Local Plan options including reasonable alternatives and evaluating the likely significant effects

Reasonable alternative options were developed for the following elements of the Draft Local Plan:

- i. the formation of the spatial development strategy (STR 1);
- ii. the nine additional strategic policies (STR 2 10);
- iii. the sites proposed for allocation; and,
- iv. the Development Management policies.

A consideration of each of these elements is summarised below.

*i.* The Spatial Development Strategy

The consideration of the options for growth was first made at the Local Plan 'Issues and Options' stage, when the following six potential growth options were considered:

- Growth Strategy 1 growth focussed largely on urban areas
- Growth Strategy 2 growth focussed largely on urban areas plus some larger villages
- Growth Strategy 3 growth distributed proportionally across all existing settlements
- Growth Strategy 4 growth focussed on the A21 corridor near Royal Tunbridge Wells (RTW) and Pembury
- Growth Strategy 5 growth within a new, free-standing settlement
- A sixth option that assumed no plan was prepared or adopted, with essentially unplanned, market-led growth.

To allow a detailed comparison across the options, each growth option was scored for its contribution towards sustainability. To do this, scores were chosen for each of the 19 sustainability objectives from a range of very negative to very positive. Where significant effects could not be determined easily, an unknown or mixed score was applied.

The conclusion of this process was that an approach combining the most sustainable elements of growth strategy options 1 - 5 would be appropriate for maximising beneficial effects and minimising adverse effects.

As the Local Plan progressed, these growth strategy options were further refined and several new options were identified that considered a range of different scales and distributions for development across the borough. This included consideration of the potential to meet unmet housing need from elsewhere.

The range of options have been further refined in response to comments on the Draft Local Plan and more recent information. These are summarised below:

| Growth<br>Strategy 1  | No Green<br>Belt                  | Meeting housing need of 346 dwellings per year with no loss of greenbelt  |
|-----------------------|-----------------------------------|---|
| Growth<br>Strategy 2  | No AONB                           | Meeting housing need of 560 dwellings per year without major development in the AONB  |
| Growth<br>Strategy 3  | Draft Local<br>Plan               | Meeting the existing capped housing need of 678<br>dwellings per year with a large PW extension and<br>new garden village at Tudeley  |
| Growth<br>Strategy 4  | Main Towns                        | Meeting the existing capped housing need without garden village at Tudeley)   |
| Growth<br>Strategy 5  | Main Towns<br>& Large<br>Villages | Meeting the existing capped housing need without<br>strategic sites by directing growth largely to main<br>towns  |
| Growth<br>Strategy 6  | Meet Need<br>with no<br>MGB loss  | Meeting existing capped housing need focused on<br>settlements outside Metropolitan Green Belt (MGB);<br>also growth moderated in the AONB  |
| Growth<br>Strategy 7  | Proportional<br>to Services       | Meeting the existing capped housing need without<br>strategic sites and with a wider distribution based on<br>the relative level of services and facilities of all<br>settlements |
| Growth<br>Strategy 8  | Services<br>and AONB              | As for Growth Strategy 6 but with adjustments in distribution made to further moderate growth in the AONB   |
| Growth<br>Strategy 9  | Dispersed<br>Countryside          | Meeting the existing capped housing need with<br>strategic sites and by directing a large proportion of<br>development into rural areas   |
| Growth<br>Strategy 10 | Uncapped<br>Need                  | Meeting the uncapped housing need of 749 dwellings<br>per year with strategic sites and a 30% increase in<br>growth elsewhere   |
| Growth<br>Strategy 11 | Uncapped &<br>Unmet<br>Need       | Meeting the uncapped housing need and unmet need<br>from elsewhere with strategic sites and further Green<br>Belt release and growth in the AONB (853 dwellings<br>per year)      |
| Growth<br>Strategy 12 | No Local<br>Plan                  | Windfall sites alone provide for development needs.   |

Sustainability appraisals of these 12 growth strategies were then undertaken and reviewed in order to help develop a suitable strategy for the Pre-Submission Local Plan.

In the light of all the SA findings, together with the findings of further work, a preferred development strategy was produced and then scored using the same SA method. Following the maximisation of sustainable development in settlements across the borough, the preferred development strategy embraces the creation of a new garden settlement, together with a major urban extension based on garden settlement principles. Both of these proposals would involve significant loss of Green Belt land, it being found unreasonable for such large growth to occur in the AONB and there being no sustainable opportunities outside of the AONB. However, these are justified in part on meeting development needs, given the limited capacity for this scale of growth to be otherwise distributed across the borough. Hence, the preferred strategy combines strategic growth by focussing on settlements with the best services and facilities, but also with some growth to smaller settlements, whilst limiting growth within the AONB.

The key overall findings of this process were that significant beneficial effects are expected for most economic and social sustainability objectives. The environmental objectives are found to produce either highly mixed, neutral or negative scores, essentially reflecting the increased pressures that a significant number of new dwellings would put upon sensitive environmental features such as landscape and heritage.

Because the inclusion of a new garden settlement and large urban expansion were found to be fundamental to the preferred strategy, the SA also considered alternative locations and scales to these aspects of the final growth strategy. The findings of this process were that, for the urban extension, although multiple settlements were considered, Paddock Wood was the only reasonable location for an extension and that a scale that maximises benefits for the housing objective whilst being set away from the constraints in the south (ancient woodland and AONB), but with land-take in the Green Belt to the west of Paddock Wood, in Capel Parish, to help address existing flooding issues, would provide a suitable and achievable, scale of extension. This option was found to have benefits for the economic, environmental and social elements of sustainability, albeit with most benefits being social and economic, rather than environmental.

The strategic growth of Paddock Wood is supplemented by a new garden village if housing needs are to be met. Although multiple locations were considered, Tudeley village was the only reasonable location for a new settlement and that a scale limited by the flood risk to the north and the AONB and Green Belt to the south would be most preferred. This scale amounts to approximately 2,800 new dwellings.

Full details are contained within Chapter 6 of this report.

*ii.* Strategic Policies STR 2 – STR 10

Options for the remaining strategic policies (Policies STR 2 - 10) were determined by considering how well each of the strategic policies contributed to the 19 sustainability objectives, in comparison to alternatives in which the proposed Strategic Policies were not implemented. The alternatives were different for each policy and generally took the form of either a 'no policy' option where the borough relied on existing national policy only, or the implementation of a different type of policy. For reference purposes the policies are listed below:

• STR 2 – Place Shaping and Design

- STR 3 Brownfield Land
- STR 4 Ensuring Comprehensive Development
- STR 5 Infrastructure and Connectivity
- STR 6 Transport and Parking
- STR 7 Climate Change
- STR 8 Conserving and Enhancing the Natural, Built and Historic Environment
- STR 9 Green Belt
- STR 10 Neighbourhood Plans

For all Strategic Policies, the alternative (where applicable) was found to be less favourable.

Full details are contained within Chapter 7 of this report.

#### *iii.* Sites proposed for allocation

The consideration of which sites should be assessed by the SA in order to develop reasonable alternatives was undertaken using a similar filtering methodology to the <u>Strategic</u> <u>Housing and Economic Land Availability Assessment</u>. For example, sites that were poorly related to existing settlements or had significant environmental concerns were not deemed to be reasonable alternatives. This filtering process resulted in a list of approximately 300 sites for the SA to assess.

Once SA assessments were completed, suitable sites were recommended for allocation alongside advice for how potential negative effects could be mitigated. Sites were then grouped into parishes (or settlements for Royal Tunbridge Wells) and a cumulative impact assessment was undertaken for each parish or settlement location.

The findings of this process were then used to perform an overall SA assessment for the borough i.e. a cumulative assessment of the SAs for all parishes and settlements. This assessment is critical to how the findings for STR 1 were derived (see section (i) above). As previously explained, the key findings of this process were that significant beneficial effects were expected for most economic and social sustainability objectives. The environmental objectives were found to produce either highly mixed, neutral or negative scores essentially reflecting the increased pressures that employment sites and a significant number of new dwellings would put upon sensitive environmental features such as landscape and heritage.

Full details are contained within Chapter 8 of this report.

#### iv. Development Management policies

Finally, a range of Development Management policies were developed for the following themes:

- Environment and Design
- Natural Environment
- Air, Water, Noise and Land
- Housing Delivery

- Types of Housing
- Employment
- Town, Rural Service, Neighbourhood and Village Centres
- Transport and Parking
- Open Space, Sport and Recreation

Similar to the alternatives for the strategic policies, the alternatives developed for Development Management policies took the form of options where no policy was implemented and the Council relied on national planning policy only, or a policy with a different emphasis or scale.

The key findings from this process were that the Development Management policies all make a positive contribution towards sustainability and that the proposed policies are preferable to the alternatives that were considered.

Full details are contained within Chapter 9 of this report.

#### (3) Considering ways of mitigating adverse effects and maximising beneficial effects

As part of the Sustainability Appraisal process, numerous recommendations for mitigation and positive enhancements were made during the development of each element of the Local Plan. These ranged from specific mitigation measures such as the protection of woodland, to a change in wording or emphasis to better meet the goals of sustainable development.

Full details of the recommendations made are found in Appendix C.

#### (4) Proposing measures to monitor the significant effects of implementing the Local Plan

Potential measures for monitoring the significant effects of implementing the Local Plan are listed for each of the 19 sustainability objectives in Chapter 10. They include utilising existing monitoring networks such as that for air quality and regular review of publications that Kent County Council produce such as the Research and Intelligence Monthly Bulletin.

# 1. Introduction

### 1.1 Local Plan background

- 1.1.1 The new Local Plan prepared by Tunbridge Wells Borough Council (TWBC) sets out the policies and plans to guide the future development of the borough in the period 2020 - 2038. It identifies the scale of development and also the key locations that will be used to meet this need.
- 1.1.2 The new Local Plan provides:
  - a spatial vision for the borough and strategic objectives to achieve that vision
  - a development strategy to provide:
    - a framework for the allocation of sites for specific uses (for example, housing and business use)
    - the context for designating areas where specific policies will apply, either encouraging development to meet economic and/or social objectives or constraining development in the interests of environmental protection
  - other strategic policies to also guide both place shaping and development management polices
  - Place Shaping Policies, including both parish/settlement strategies and sitespecific allocations and policies for development of identified sites including urban extensions and a garden settlement
  - Development Management policies to shape the form of development at application stage both for sites allocated in the Local Plan and other sites that come forward during the plan period
- 1.1.3 Notable objectives of the new Local Plan are to seek to meet development needs, protect and enhance the environment, deliver appropriate and sufficient infrastructure, provide high quality housing, provide for economic growth, ensure adequate leisure and recreational facilities, deliver sustainable development, and deliver adequate transport and parking capacity.
- 1.1.4 The new Local Plan will replace the following policy documents:
  - Tunbridge Wells Borough local Plan saved policies (June 2006)
  - Tunbridge Wells Borough Core Strategy DPD (June 2010)
  - Tunbridge Wells Borough Site Allocations Local Plan (July 2016)
- 1.1.5 The new Local Plan has sustainability implications for the entire borough. The economic, environmental and social characteristics of the borough are described in

the Sustainability Appraisal Scoping Report and also the <u>Local Plan document</u> published for consultation alongside this document.

### **1.2 Sustainability Appraisal Background**

- 1.2.1 A Sustainability Appraisal (SA) is required during the preparation of a Local Plan by the Planning and Compulsory Purchase Act 2004 to ensure compliance with the requirements of the Strategic Environmental Assessment Directive. Its purpose is to help the Local Authority assess how effectively the Local Plan contributes to sustainable development.
- 1.2.2 There are five key stages in the preparation of a Sustainability Appraisal that are carried out alongside the preparation of a Local Plan (see Figure 1).

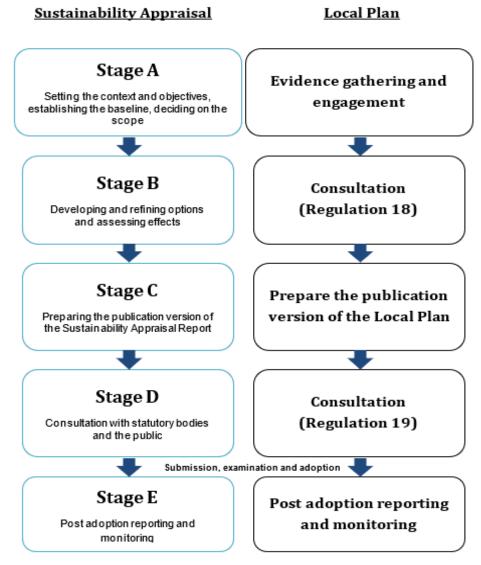

Figure 1. Key stages of Local Plan preparation and the relationship with the SA process. (Adapted from Planning Practice Guidance Reference ID: 11-013-20140306.)

### **1.3 Purpose of this Report**

- 1.3.1 Stage A of the sustainability appraisal process was undertaken in 2015-16 and resulted in the production of a Scoping Report that was consulted on in June 2016. The report was then updated to take into account consultees' comments and a final version prepared in October 2016. The Stage A Scoping Report should be referred to for a description of the original baseline, relevant plans, policies and programmes and the justification for the sustainability objectives that are being implemented in this report. Updates to these descriptions are also provided in Chapter 4 of this report.
- 1.3.2 The Stage B of the sustainability appraisal process began in 2017 and was summarised initially with the production of the Issues and Options Stage Sustainability Appraisal. This report only applied the Stage B process to the draft growth strategy options and draft plan objectives as outlined in the Local Plan Issues and Options document.
- 1.3.3 A formal report is not a requirement for Stage B (see Figure 1). However, a report for consultation was prepared nevertheless, as it was felt to be a useful interim presentation of the application of the SA scoring methodology and a good opportunity for relevant organisations to provide opinions following the initial scoping stage and prior to the scoring being extensively applied to sites and policies.
- 1.3.4 As options were continually developed and refined, a further iteration of the Stage B process was applied to the refined objectives, allocation of sites and policies for development management (including reasonable alternatives), and the process was divided into five sub-processes (see Figure 2).
- B1 Test the Local Plan objectives against the sustainability appraisal framework
- B2 Develop the Local Plan options including reasonable alternatives
- B3 Evaluate the likely effects of the Local Plan alternatives
- B4 Consider ways of mitigating adverse effects and maximising beneficial effects
- B5 Propose measures to monitor the significant effects of implementing the Local Plan

Figure 2. The five sub-processes that form Stage B of the Sustainability Appraisal.

1.3.5 The results of this exercise are summarised with the production of this report which represents the end of Stage D.

# 2. Consultation

- 2.1.1 Views from statutory consultees and other interested parties have been sought throughout the Sustainability Appraisal process.
- 2.1.2 All comments received, the Council's response and any subsequent changes made to the SA process are summarised in Appendix H of the Scoping Report, Appendix C of the Interim SA Report, and the Consultation Statements for the Regulation 18 Draft Local Plan and the Regulation 19 Pre Submission Local Plan.
- 2.1.3 The three statutory environmental consultees: Natural England, Historic England and the Environment Agency have provided comments on the SA work, including the 19 objectives identified. No fundamental concerns about the SA process or objectives have been raised by Historic England or the Environment Agency. Comments from Natural England received at Regulation 19 stage have been addressed in the accompanying Consultation Statement.
- 2.1.4 In addition, all residents, organisations and authorities on the Borough Council's database were invited to comment. This included but was not limited to:
  - All town and parish councils in the borough
  - All adjoining local planning authorities
  - Campaign to Protect Rural England (as per request by Town Forum at Scoping Stage)
  - Department for Environment, Food and Rural Affairs
  - East Sussex Council Climate Change and Environment Team
  - Forestry Commission
  - High Weald Area of Outstanding Natural Beauty Unit
  - Kent and Medway Biological Records Centre
  - Kent County Council Climate Change and Environment Team
  - Kent County Council Education Department
  - Kent County Council Heritage Team
  - Kent County Council Sustainable Urban Drainage Team
  - Kent High Weald Partnership
  - Kent Local Nature Partnership (subject to pre assessment check)
  - Kent Reptile and Amphibian Group
  - Kent Wildlife Trust
  - Kent Youth Sport
  - Royal Society for the Protection of Birds
  - Sevenoaks District Council
  - Southern Water (as per request by KCC at scoping stage)
  - South East Water
  - Upper Medway Internal Drainage Board
  - West Kent Primary Care Trust
  - Woodland Trust

# 3. Legal Compliance

## 3.1 The SEA Directive

- 3.1.1 Table 1 below shows how the Sustainability Appraisal process associated with the production of the new Local Plan incorporates the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 (commonly referred to as the "Strategic Environmental Assessment Regulations"), which implement the requirements of the European Directive 2001/42/EC (the "Strategic Environmental Assessment Directive") on the assessment of the effects of certain plans and programmes on the environment. The Planning and Compulsory Purchase Act 2004 requires that a Sustainability Appraisal (SA) is used to implement the legal requirements of the SEA regulations (whilst also considering economic and social impacts).
- 3.1.2 It is noted that (at the time of writing) the UK is due to leave the EU on 31 January 2020 under the terms set out in the European Union (Withdrawal Agreement) Act 2020 ("the Withdrawal Act"). This established a transition period, which is currently set to end on 31 December 2020. The Withdrawal Act retains the body of existing EU-derived law within our domestic law, including the SEA Regulations.
- 3.1.3 In the interest of avoiding repetition, the final Sustainability Appraisal report (this document) does not contain information recorded elsewhere. In this report, references and updates to other Sustainability Appraisal reports are made where necessary.

# 3.2 The Conservation (Natural Habitats, &c.) (Amendment) Regulations 2010

- 3.2.1 The Conservation (Natural Habitats, &c.) (Amendment) Regulations 2010, collectively referred to in this report as the Habitats Regulations, implements the Habitats Directive in England & Wales. Under the Habitats Regulations any plan or project likely to have a significant adverse effect upon the integrity of a 'European site' must be subject to an appropriate assessment to determine the implications for the designated site in view of its conservation objectives. 'European sites' are sites which are of exceptional importance in respect of rare, endangered or vulnerable natural habitats and species within a European context. They consist of Special Areas of Conservation (SAC) designated under Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora and Special Protection Areas (SPA) designated under Council Directive 2009/147/EC on the Conservation of Wild Birds.
- 3.2.2 Under the Habitats Regulations the Council, as the competent body, must determine if the Local Plan is likely to have a significant effect on a biodiversity site of European site, either alone or in combination with other plans or projects. If significant effects are predicted, then an appropriate assessment of the implications for the site in view of its conservation objectives must be undertaken.
- 3.2.3 As explained in paragraph 0, the UK is leaving the EU on 31st January 2020 under the terms set out in the European Union (Withdrawal Agreement) Act 2020 ("the Withdrawal Act") which retains EU law. The most recent amendments to the Habitats Regulations the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 make it clear that the need for Habitats Regulations Assessments (HRA) will continue after the end of the Transition Period.
- 3.2.4 There are no internationally designated sites within the Borough. The nearest site is the Ashdown Forest (both a SAC and SPA) which is located in Wealden District. In accordance with the Habitats Regulations, a report which includes an Appropriate

Assessment, has been undertaken which looks at the potential effects of the policies contained in the Local Plan on this European site. In this regard, all of the allocations and policies in the Local Plan were assessed for potential conflicts with this European site.

- 3.2.5 The HRA identified two potential linking pathways that could result in adverse effects upon the Ashdown Forest SAC and SPA that could act in combination with other projects and plans: recreational pressure and traffic-related air quality.
- 3.2.6 Within the Ashdown Forest SAC, all types of heathland habitat are sensitive to air pollution. Within the Ashdown Forest SPA, the nightjar and Dartford warbler bird species, both somewhat rely on heathland habitat for foraging and breeding and are therefore indirectly impacted by increases in atmospheric pollution through changes to habitat.
- 3.2.7 Despite several significant roads, most notably the A26 and A275, traversing the SAC, the Air Quality Modelling Report found that changes to roadside air quality as a result of the projected development outlined in the Local Plan are expected to result in a negligible impact (possibly in the form of a slight retardation effect of air quality improvement) on this European site. This is the case for both the Local Plan alone and in combination with other plans and projects.
- 3.2.8 The Ashdown Forest SPA is vulnerable to recreational pressure because of the risk of reducing the breeding success of nightjar and Dartford warbler, which are ground nesting birds. To mitigate this, all development that results in a net increase in dwellings within a prescribed 7km zone of influence must comply with the strategic solutions outlined in Local Plan policy EN11. However, the nearest substantial settlement in Tunbridge Wells Borough (Speldhurst) is over 7km away and a visitor survey of the Ashdown Forest carried out in summer 2016 found that a very small proportion of the visitors to the Ashdown Forest are from the borough.
- 3.2.9 For these reasons, it can be concluded that that the Local Plan will not have a significant adverse effect upon the Ashdown Forest (either alone or in combination with other plans).
- 3.2.10 As required by National Planning Policy Guidance, the findings of the Habitats Regulation Assessment have been considered in the preparation of this Sustainability Appraisal.

# 4. Methodology

### 4.1 Updates to Baseline Data

- 4.1.1 The Sustainability Appraisal is a dynamic process that is continuously adapted or updated as more data or evidence becomes available.
- 4.1.2 As part of the scoping exercise, a baseline review of the environmental, social and economic issues relevant to Tunbridge Wells borough was undertaken. As four years has now past since this process was first completed, this information has now been reviewed and updated in Appendix A.
- 4.1.3 Table 2 below provides a list of additional relevant evidence studies that became available for consideration during Stage B following publication of the Sustainability Appraisal for the Draft Local Plan in July 2019. The implication of these studies for the baseline data underlying the Sustainability Appraisal is discussed.

| Evidence                      | Source  | Completion<br>Date | Overview  | Implication for the SA  |
|-------------------------------|---|--------------------|---|---|
| Green Belt<br>Study (Stage 3) | External<br>consultant<br>commissioned<br>by TWBC | Nov 2020           | Detailed<br>assessment of<br>specific land<br>parcels to<br>determine<br>contribution to the<br>purposes of the<br>Green Belt and<br>level of harm<br>caused by their<br>removal. | The SA method<br>or baseline data<br>does not need<br>updating but the<br>information has<br>helped determine<br>the scores for the<br>'Land Use'<br>objective.           |
| Local Housing<br>Need Review  | External<br>consultant<br>commissioned<br>by TWBC | Winter 2020        | Study to<br>determine<br>appropriate<br>method for<br>determining<br>housing needs in<br>the borough  | SA method or<br>baseline data<br>does not need<br>updating.<br>However, findings<br>have helped<br>determine<br>reasonable<br>alternatives for<br>the growth<br>strategy. |

Table 2. New evidence studies and implications for the SA.

| Evidence  | Source   | Completion<br>Date | Overview   | Implication for the SA  |
|---|--|--------------------|--|---|
| Infrastructure<br>Development<br>Plan 2020<br>update                                | TWBC Policy<br>Team, with<br>inputs from<br>service<br>providers | Dec 2020           | Provides<br>information on<br>availability and<br>need for essential<br>infrastructure<br>across the<br>borough e.g.<br>schools, utilities   | Findings<br>considered during<br>the SA process   |
| Role and<br>Settlement<br>Study 2020<br>update                                      | TWBC Policy<br>Team  | Autumn 2020        | An assessment of<br>infrastructure and<br>services in each<br>settlement.  | The SA method<br>does not need<br>updating but the<br>information has<br>helped determine<br>the overall score<br>for the 'Services<br>and Facilities'<br>and 'Travel'<br>objectives. |
| Transport<br>Assessment<br>Report Update  | External<br>consultant<br>commissioned<br>by TWBC                | December<br>2020   | Consideration of<br>traffic impacts of<br>proposed Draft<br>Local Plan   | Findings<br>considered during<br>preparation of the<br>SA   |
| HRA for Draft<br>Local Plan Reg<br>18 including Air<br>Quality Impact<br>Assessment | External<br>consultant<br>commissioned<br>by TWBC                | December<br>2020   | Determines<br>whether planned<br>growth in the<br>borough and<br>beyond will cause<br>likely significant<br>effects on the<br>Ashdown Forest<br>Special Area of<br>Conservation and<br>Special<br>Protection Area. | Findings have<br>been used to<br>influence scoring<br>for biodiversity<br>objective.  |
| Landscape and<br>Visual Impact<br>Assessment  | External<br>consultant<br>commissioned<br>by TWBC                | Summer<br>2020     | Provides<br>recommendations<br>on major sites<br>within the AONB<br>being considered<br>for allocation<br>included<br>suggested  | Findings have<br>been used to<br>influence scoring<br>for landscape<br>objective.   |

| Evidence   | Source  | Completion<br>Date | Overview  | Implication for the SA  |
|--|---|--------------------|---|---|
|  |   |                    | mitigation<br>measures  |   |
| Retail, Leisure<br>and Town<br>Centre Uses<br>Study                  | External<br>consultant<br>commissioned<br>by TWBC | Autumn 2020        | An up-to-date<br>study that<br>considers the<br>vitality and<br>viability of<br>existing centres<br>in the borough<br>and determines<br>the needs for new<br>retail and leisure<br>provision. | Recommendation<br>s have been used<br>to inform the<br>scores for growth<br>strategies and<br>sites |
| Strategic Sites<br>Master planning<br>and<br>Infrastructure<br>Study | External<br>consultant<br>commissioned<br>by TWBC | December<br>2020   | Development of<br>master planning<br>proposals for the<br>delivery of<br>strategic sites.   | Findings have<br>been used to<br>influence scoring<br>for the strategic<br>sites.                   |
| AONB Setting<br>Study  | External<br>consultant<br>commissioned<br>by TWBC | Sept 2020          | An analysis to<br>determine how<br>development of<br>certain select<br>sites would affect<br>the setting of the<br>AONB.  | Findings have<br>been used to<br>influence scoring<br>for the landscape<br>objective.               |
| Grassland<br>Study   | External<br>consultant<br>commissioned<br>by TWBC | Sept 2020          | Survey to<br>determine the<br>botanical and<br>ecological<br>importance of<br>select sites being<br>considered for<br>allocation.   | Findings have<br>been used to<br>influence scoring<br>for the<br>biodiversity<br>objective.         |

| Evidence   | Source                                  | Completion<br>Date                   | Overview  | Implication for the SA  |
|--|---|--------------------------------------|---|---|
| Local Cycling<br>and Walking<br>Infrastructure<br>Plan and further<br>Local Cycling<br>and Walking<br>Infrastructure<br>and Low Traffic<br>Neighbourhood<br>Plan | TWBC<br>Economic<br>Development<br>Team | November<br>2019<br>December<br>2020 | Report presents a<br>strategic<br>approach to<br>identifying cycling<br>and walking<br>improvements in<br>the RTW area. | Findings have<br>been used to<br>make<br>recommendations<br>for mitigation<br>measures. |

### 4.2 Updates to Plans, Policies and Programmes

4.2.1 The tables below provide a list of key national, regional and local plans, policies and programmes that became available for consideration since publication of the Scoping Report in 2016, or an update to a previously identified plan. There have been no changes to international plans, policies and programmes in this time frame.

| Title   | Date               | Purpose  | Implication for SA  |
|---|--------------------|--|---|
| National Planning Policy<br>Framework                   | 2021               | To set out<br>government's planning<br>policies and methods<br>for application.                                    | Includes<br>expectation for net<br>gains for<br>biodiversity, more<br>weight to<br>ancient/veteran<br>trees and an<br>update to method<br>for calculating<br>housing needs. |
| National Infrastructure<br>Delivery Plan 2016 -<br>2021 | 2016               | Details how the<br>government will<br>support the delivery of<br>key infrastructure<br>projects and<br>programmes. | As above.   |
| National Planning<br>Practice Guidance                  | Ongoing<br>updates | Further detail and guidance on how planning policies   | Updates<br>considered where<br>relevant during the  |

| Title   | Date | Purpose   | Implication for SA   |
|---|------|---|--|
|   |      | detailed within the<br>NPPF are to be<br>interpreted. Updates to<br>Brownfield Registers,<br>Build to Rent, Climate<br>Change, Historic<br>Environment, Vitality<br>of towns, Health and<br>Wellbeing made since<br>2017. | Sustainability<br>Appraisal process.   |
| Biodiversity 2020: A<br>strategy for England's<br>Wildlife and Ecosystem<br>Services  | 2018 | Detail on how<br>international and EU<br>commitments are<br>being implemented in<br>England.  | Findings<br>considered where<br>relevant during the<br>Sustainability<br>Appraisal process.                            |
| DEFRA. A Green Future:<br>Our 25 Year Plan to<br>Improve the Environment  | 2018 | Detail and targets for<br>the next 25 years e.g.<br>clean air, minimising<br>waste.   | Findings<br>considered where<br>relevant during the<br>Sustainability<br>Appraisal process.                            |
| The Housing and<br>Planning Act   | 2016 | Detail on Right to Buy,<br>Pay to Stay, Starter<br>Homes, Private rented<br>sector etc.   | Findings<br>considered where<br>relevant during the<br>Sustainability<br>Appraisal process.                            |
| DCLG White Paper -<br>Fixing Our Broken<br>Housing Market   | 2017 | Plans to reform the<br>housing market and<br>boost supply of new<br>homes.  | Findings<br>considered where<br>relevant during the<br>Sustainability<br>Appraisal process.                            |
| TCPA. Planning for the<br>Climate Challenge?<br>Understanding the<br>Performance of English<br>Local Plans                          | 2016 | Guidance for including<br>climate change related<br>issues in local<br>planning policy.   | Guidance<br>document that will<br>help inform the<br>scoring for the<br>'Climate Change'<br>objective.                 |
| UK Disability Strategy,<br>Equality Act and<br>associated regulations<br>currently being updated<br>by DfCG&C, DfT, DfB<br>and DWP. | 2012 | Created to help ensure<br>compliance with UN<br>Convention on the<br>Rights of Disabled<br>People by the end of<br>2025.  | The decision-aiding<br>questions for the<br>'equality' and<br>'housing' objectives<br>have been updated<br>to consider |

| Title   | Date     | Purpose   | Implication for SA   |
|---|----------|---|--|
|   |          |   | independently<br>accessible facilities<br>and housing. This<br>reflects comments<br>made following<br>consultations of the<br>Issues and Options<br>SA (see paragraph<br>0). |
| Heritage Counts. Carbon<br>in the Built Historic<br>Environment | May 2020 | Trends and data about<br>the heritage sector<br>focusing on how<br>upgrading and reusing<br>existing buildings is<br>preferable to<br>demolition. | The SA method or<br>baseline data does<br>not need updating<br>but the information<br>has helped<br>determine the<br>scores for the<br>'Resources'<br>objective.             |

| Title                 | Date   | Purpose  | Implication for SA  |
|-----------------------|--|--|---|
| The Environment Bill  | Estimated<br>Royal<br>Assent<br>Autumn<br>2021 | New bill to manage the<br>impact on human<br>activity on the<br>environment, creating<br>a more sustainable<br>and resilient economy<br>and enhancing well-<br>being and quality of<br>life. Key aspects<br>include air quality,<br>water, waste and<br>resources and<br>biodiversity.<br>The Environment Bill<br>intends to enact the<br>25-year environment<br>plan issued in 2008.<br>Key wording for<br>biodiversity is "regain<br>and retain", not just<br>conserve which is no<br>longer enough. | Considered where<br>relevant during the<br>Sustainability<br>Appraisal process. |
| The Road to Zero      | 2018   | Analysis of how the<br>UK will meet demand<br>and targets for the<br>design and<br>manufacture of zero<br>emission vehicles.   | Considered where<br>relevant during the<br>Sustainability<br>Appraisal process. |
| National Design Guide | 2019   | To set out the characteristics of well-designed places   | Considered where<br>relevant during the<br>Sustainability<br>Appraisal process. |

Table 4. Additional key regional plans, policies and programmes

| Title   | Date         | Purpose  | Implication for SA   |
|---|--------------|--|--|
| High Weald AONB<br>Management Plan 2019 -<br>2024                 | 2019         | To coordinate policy,<br>investment and action in<br>the nationally important<br>AONB landscape in order<br>to conserve and enhance<br>its natural beauty.   | The SA method<br>does not need<br>updating but the<br>information<br>further justifies<br>the importance of<br>the Landscape<br>objective.   |
| Kent Water for<br>Sustainable Growth<br>Study                     | 2017         | Assessment of water<br>pressures in region (and at<br>Borough level)   | SA method has<br>been updated to<br>reflect the high<br>pressures of the<br>region and<br>capacity<br>limitations to<br>support current<br>levels of new<br>development.<br>The final<br>decision-aiding<br>question for the<br>'Water' Objective<br>has now been<br>given a 'High'<br>weighting (see<br>Appendix B) |
| Draft South East Water<br>Resource Management<br>Plan 2020 - 2080 | Ongoin<br>g  | An account of the<br>challenges and<br>opportunities over the next<br>60 years. Long term plan<br>includes upgrade of Bewl<br>Water WTW and<br>improvements to<br>distribution network to<br>allow increase in<br>abstraction. However,<br>unlikely to come forward in<br>the TWBC plan forward. | As above.  |
| KCC Minerals and Waste<br>Local Plan 2013 - 2030                  | Sept<br>2020 | To provide detail for<br>safeguarding purposes of<br>mineral deposits and<br>waste management  | Numerous<br>safeguarding<br>areas have been<br>identified across   |

| Title  | Date                                     | Purpose  | Implication for SA   |
|--|--|--|--|
|  |  | facilities parcels across the borough.   | the borough.<br>The SA method<br>or baseline data<br>does not need<br>updating but the<br>information has<br>helped determine<br>the scores for the<br>'Resources'<br>objective. |
| Commissioning Plan for<br>Education Provision in<br>Kent 2016 - 2020 | 2016                                     | Considers regional<br>pressures for school<br>places.  | Method<br>unchanged and<br>will remain<br>focussed on<br>localised<br>pressures.   |
| Kent Biodiversity Strategy<br>2020 - 2045                            | Feb<br>2020                              | To maintain, restore and<br>create wildlife habitats in<br>Kent.   | The SA method<br>does not need<br>updating but the<br>information<br>further justifies<br>importance of the<br>biodiversity<br>objective.  |
| Water Resources South<br>East (WRSE) Framework                       | Summ<br>er<br>2020<br>(consul<br>tation) | Long-term regional<br>resilience plan and<br>methodology for assessing<br>resilience.  | Findings<br>considered where<br>relevant during<br>the Sustainability<br>Appraisal<br>process.   |
| Kent and Medway Low<br>Emissions Strategy                            | June<br>2020                             | To set out the response to<br>the UK climate emergency<br>and drive clean, resilient<br>economic recovery across<br>Kent and Medway. | The SA method<br>does not need<br>updating but the<br>information<br>further justifies<br>importance of the<br>climate change<br>objective.                                      |

Table 5. Updates to key local plans, policies and programmes

| Title   | Date  | Purpose  | Implication for SA   |  |  |
|---|---|--|--|--|--|
| Neighbourhood<br>Development Plans                | At various<br>stages<br>throughout<br>borough.<br>The<br>Hawkhurst<br>NDP was<br>"made" in<br>March<br>2018 and<br>modified in<br>April 2020. | Contain various<br>policies offering<br>landscape protection<br>and guidance on<br>development design,<br>community<br>infrastructure and<br>travel.   | No update needed.<br>Hawkhurst NDP<br>was screened for<br>SEA and HRA and<br>found not to have<br>likely significant<br>effects. |  |  |
| Wealden District Council<br>New Local Plan        | Ongoing   | Plan withdrawn Feb<br>2020. Council has<br>since begun work on<br>a new Local Plan.  | Cross boundary<br>effects to be<br>confirmed, but<br>ongoing liaison on<br>Ashdown Forest<br>SAC and SPA,<br>reflected in HRA.   |  |  |
| Ashford Borough Council<br>New Local Plan         | 2019  | Adopted in 2019.<br>There are no<br>allocations with the<br>potential to cause<br>adverse cross-<br>boundary<br>implications with<br>Tunbridge Wells.  | Cross boundary<br>effects unlikely.  |  |  |
| Maidstone Borough<br>Council Local Plan<br>Review | Ongoing   | Existing Plan<br>contains allocations<br>in Marden, Headcorn<br>and Staplehurst<br>accounting for<br>approximately 1,500<br>new dwellings.<br>Review likely to<br>identify additional<br>need. However,<br>locations and spatial<br>strategy currently<br>unknown. | Potential cross<br>boundary effects<br>will be considered<br>by the SA.  |  |  |

| Title   | Date                | Purpose   | Implication for SA   |  |  |
|---|---------------------|---|--|--|--|
| Tonbridge and Malling<br>Borough Council New<br>Local Plan                | Ongoing             | Plan currently at<br>examination. Hearing<br>in Oct 2020<br>cancelled. Contains<br>allocations at or near<br>Tonbridge for<br>approximately 600<br>   |  |  |  |
| Sevenoaks District<br>Council New Local Plan                              | Ongoing             | Plan submitted for<br>Examination in April<br>2019. Currently<br>subject to Judicial<br>Review. The Plan<br>does not meet the<br>housing need for the<br>District, so need to<br>consider unmet<br>need. No significant<br>allocations are<br>proposed near the<br>boundary with<br>Tunbridge Wells<br>Borough Council. | Cross boundary<br>effects unlikely,<br>other than housing<br>need likely to not<br>be fully met, which<br>will be considered<br>by the SA. |  |  |
| Rother District Council<br>Development and Site<br>Allocations Local Plan | Adopted<br>Dec 2019 | No allocations close<br>to border. However,<br>NDP for Ticehurst<br>(made July 2019)<br>and Hurst Green (if<br>made) may have<br>small impacts.   | Potential cross<br>boundary effects of<br>the NDPs will be<br>considered by the<br>SA where<br>applicable.                                 |  |  |

## 4.3 Sustainability Objectives and Scoring Method

4.3.1 At scoping stage, 19 sustainability objectives were identified. These are summarised in Table 6.

Table 6. Sustainability Objectives for Tunbridge Wells Borough

| Num. | Торіс | Objective            |
|------|-------|----------------------|
| 1    | Air   | Reduce air pollution |

| Num. | Торіс                    | Objective  |
|------|--------------------------|--|
| 2    | Biodiversity             | Protect and enhance biodiversity and the natural environment           |
| 3    | Business<br>Growth       | Encourage business growth and competitiveness                          |
| 4    | Climate Change           | Reduce carbon footprint and adapt to predicted changes                 |
| 5    | Deprivation              | Reduce poverty and assist with regeneration                            |
| 6    | Education                | Improve educational attainment and enhance the skills base             |
| 7    | Employment               | Facilitate and support employment opportunities                        |
| 8    | Equality                 | Increase social mobility and inclusion                                 |
| 9    | Health                   | Improve health and wellbeing, and reduce health inequalities           |
| 10   | Heritage                 | Protect and enhance cultural heritage assets                           |
| 11   | Housing                  | Provide sufficient housing to meet identified needs                    |
| 12   | Land use                 | Protect soils, and reuse previously developed land and buildings       |
| 13   | Landscape                | Protect and enhance landscape and townscape                            |
| 14   | Noise                    | Reduce noise pollution   |
| 15   | Resources                | Reduce the impact of resource consumption                              |
| 16   | Services &<br>Facilities | Improve access and range of key services and facilities                |
| 17   | Travel                   | Improve travel choice and reduce the need to travel by private vehicle |
| 18   | Waste                    | Reduce waste generation and disposal                                   |
| 19   | Water                    | Manage flood risk and conserve, protect and enhance water resources    |

- 4.3.1 Each objective above is underlain by various decision-aiding questions that were deemed relevant to the borough and important at local, regional, national or international scales. For example, scoring for the biodiversity objective was determined by the following three indicators:
  - Sites of local biodiversity value including undesignated habitat
  - The Ashdown Forest SAC and SPA

- Sites of Special Scientific Interest and associated risk zones
- 4.3.2 See Appendix B for a description of all decision-aiding questions for each objective.
- 4.3.3 To provide an indication of how well a policy, strategy or site contributes to each of sustainability objectives, a score was determined from an eight-point scale of impact as shown in Figure 3.

| Unknown<br>or Mixed | Very<br>Negative | Negative | Slightly<br>Negative | Neutral | Slightly<br>Positive | Positive | Very<br>Positive |
|---------------------|------------------|----------|----------------------|---------|----------------------|----------|------------------|
| ?                   |                  |          | -                    | 0       | +                    | + +      | + + +            |

Figure 3. Eight-point scale of impact used to determine Sustainability Appraisal scores.

- 4.3.4 Where scores across the various decision-aiding questions varied, an overall score for each objective was determined using the following process:
  - An equal number of positive, negative and neutral scores without weightings would score neutral overall or an appropriate combined score. For example, where an objective has only two key indicators which are scored as neutral and single positive, a combined score of 0 / + would be recorded.
  - Where the majority of scores are positive, negative or neutral and there are no weightings, a positive, negative or neutral score respectively is applied overall
  - Where the majority of scores are positive, negative or neutral and there are weightings, the overall score would be skewed towards the highest weighting
  - An equal number of positive and negative scores with weightings would be scored in favour of the highest weighting
  - A large number of unknown or mixed scores would be scored as unknown/mixed score overall, especially if the unknown/mixed score is highly weighted.
- 4.3.5 Indicator weightings for decision-aiding questions can be seen in Appendix B. Higher weightings were given to issues that were legislatively driven, of critical importance to the borough and where finite assets were concerned.
- 4.3.6 Prior to assigning a score, consideration was given to the following impact criteria presented within Schedule 2 of the SEA Regulation as far as possible:
  - Likelihood High, Medium or Low
  - Scale Local, regional, national or global
  - Permanence Temporary or permanent
  - Effect Secondary, cumulative or synergistic effects
- 4.3.7 These effect 'characteristics' are described within the appraisal where appropriate. In all cases, professional judgement and the unique circumstances of each policy were used to apply final scores.
- 4.3.8 Every effort was made to predict effects accurately; however, in some cases this was inherently challenging given the high-level nature of the alternatives under consideration. The ability to predict effects accurately was also limited by

understanding of the baseline and (in particular) the future baseline. In light of this, an accompanying commentary is made for each element of the emerging Local Plan.

- 4.3.9 As scores were being considered, the Sustainability Appraisal process identified areas where policies could be made more sustainable and changes were made to the plan to accommodate these recommendations wherever possible. All the scores shown in this report are an assessment of the final draft policy wording proposed for inclusion within the Pre-Submission Local Plan. Realistic mitigation measures, as proposed in the emerging policies, were assumed to be in place when scores were applied.
- 4.3.10 It is noted a number of minor changes to the method were made following updates to baseline data and consultation of the Issues and Options SA. These were applied to the Draft Local Plan SA and have been consistently applied to the current Pre-Submission Local Plan SA. They are summarised in Table 7 below for completeness.

| Sustainability<br>Objective | Update to Scoring<br>Method  | Reasoning  |  |  |  |  |  |
|-----------------------------|--|--|--|--|--|--|--|
| Water                       | SA method has been<br>updated such that the<br>final decision-aiding<br>question now has a<br>'High' weighting.  | Baseline data has been updated during<br>Stage B.<br>This change better reflects the very high<br>pressures in the region and lack of<br>capacity to support current levels of new<br>development that has been highlighted in<br>the Kent Water for Sustainable Growth<br>Study.  |  |  |  |  |  |
| Housing                     | The second decision-<br>aiding question for the<br>'Housing' objective has<br>been changed to<br>remove the word<br>'downsizing' and to<br>include meeting the<br>demand for<br>'independently<br>accessible housing' as<br>well as for older<br>people. | Baseline data has been updated during<br>Stage B.<br>This change better encompasses the<br>need for M4(2) and M4(3) homes which<br>has been highlighted in the latest Housing<br>Needs Study. The changes also address<br>concerns raised following consultation of<br>the Issues and Options SA.<br>Housing need calculations now have<br>regard to the standard method.          |  |  |  |  |  |
| Health                      | The decision-aiding<br>questions for 'specialist<br>health needs' has been<br>incorporated into<br>'pockets of health<br>deprivation'.   | The issues were felt to be sufficiently<br>similar so as not to warrant separate<br>consideration. This decision was made<br>following comments made during the<br>consultation of the Issues and Options<br>SA. It was suggested that the large<br>number of decision-aiding questions for<br>some objectives was skewing the scoring<br>outcome. A full review of the objectives |  |  |  |  |  |

Table 7. Minor alterations to scoring method during Stage B.

| Sustainability<br>Objective   | Update to Scoring<br>Method   | Reasoning  |
|---|---|--|
|   |   | was undertaken to this effect and these<br>two sub-objectives were consolidated.   |
| Equality  | A new decision aiding<br>question has now been<br>included regarding<br>promoting independent<br>access to facilities for<br>people with mobility,<br>sensory and cognitive<br>impairments. | This change reflects the expectation that<br>compliance with the UN Convention on<br>the Rights of Disabled People is expected<br>by 2025 and addresses concerns raised<br>following consultation of the Issues and<br>Options SA.   |
| Biodiversity<br>Biodiversity<br>Biodiversity<br>Biodiversity<br>Biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodiversity<br>biodi |   | This reflects the changes to the NPPF<br>since the Issues and Options stage. A<br>more precautionary approach was<br>adopted for site level assessments, as<br>the policy is in its infancy and it was not<br>clear whether benefits would be delivered<br>on or off site. |

- 4.3.11 Once an overall score for each objective was determined, a scoring table was prepared that summarised the scores across all objectives and provided a written commentary on the overall impressions of the policy, strategy or site, including ways in which adverse effects have been mitigated and beneficial effects maximised.
- 4.3.12 Because topics and objectives cannot be directly weighed against one another, readers are discouraged from 'adding up' positive or negative scores to give an overall score for a policy, strategy or site. For example, a very positive score for landscape is not neutralised by a very negative score for transport. Positive and negative impacts must be considered alongside the written commentary which describes the key findings from the appraisal scoring exercise. The written commentaries consider all Reasonable Alternative sites. Information on sites that were not considered to be Reasonable Alternatives can be found in the <u>SHEELA</u>.
- 4.3.13 The scoring exercise was applied to the following four key elements of the Local Plan:
  - Strategic policies
  - Potential development sites (both individually and cumulatively)
  - Development Management policies
  - Reasonable alternatives to all of the above

## 5. Compatibility Testing of Strategic Objectives

## 5.1 Background

- 5.1.1 There are ten Strategic Objectives guiding the new Local Plan (updated from the eight that were originally presented in the Issues and Options report). These are shown in Figure 4 (with titles added for clarity).
- 5.1.2 The Strategic Objectives have been through much iteration since the Issues and Options stage. They have taken into account previous SA recommendation and are now significantly difference from those in the Stage B report. For this reason, a further assessment was deemed necessary.

### 5.2 Method

- 5.2.1 There are ten Strategic Objectives guiding the new Local Plan (updated from the eight that were originally presented in the Issues and Options report). These are shown in Figure 4 (with titles added for clarity).
- 5.2.2 The Strategic Objectives have been through much iteration since the Issues and Options stage. They have taken into account previous SA recommendation and are now significantly difference from those in the Stage B report. For this reason, a further assessment was deemed necessary.
- 5.2.3 When testing these objectives, the following assumptions were made:
  - Where the term 'sustainable' is used, it refers to the definition of 'sustainable development' given by chapter 2 of the NPPF rather than the colloquial term used to describe developments that have easy access to services, facilities and travel options. The term thus mirrors the Sustainability Appraisal's expectation of what constitutes sustainable development.
  - The term 'vibrant' refers to the popularity of a destination in terms of its provision of facilities, services and events and does not necessarily relate to tourism.

#### Sustainable Development

1. To ensure sustainable development that contributes to both meeting housing, economic, and social needs and to conserving and enhancing the highly valued environmental qualities and amenities of the borough.

#### Housing

2. To significantly boost the supply of affordable housing and ensure suitable housing for all sections of the population.

#### **Garden Settlements**

3. To establish the role that garden settlements can make to the future delivery of development in the borough and to ensure such proposals create very high-quality living environments.

#### **Development Design**

4. To promote high quality and well designed development that contributes to the local identity and character, and creates attractive environments.

#### Infrastructure

5. To achieve the timely delivery of all forms of infrastructure that meet the needs of development and support the vitality of communities.

#### Travel

6. To ensure good, safe access to jobs and services, with priority to active travel and public transport, as well as embracing new technology.

#### Vibrant Borough

7. To ensure that the borough is vibrant, culturally rich, and economically buoyant.

#### **Distinctive Environment**

8. To conserve and enhance the valued historic, built and natural environments of the borough, including the Area of Outstanding Natural Beauty, and to achieve net gains for nature.

#### **Green Belt**

9. To ensure that the Green Belt continues to meet its purposes, only releasing land where strict tests are met.

#### **Climate Change**

10. To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment.

#### Local Needs

11. To work with local communities to secure sustainable development to meet local needs, with due regard to neighbourhood plans where appropriate.

Figure 4. Strategic Objectives of the new Local Plan.

## 5.3 Results

5.3.1 The outcome of the compatibility testing is show below in Table 8.

Table 8. Compatibility testing of Local Plan objectives with SA objectives.

| Landscape                   | 6          | 1            | 3                     | 1                  |
| Noise                       | 5          | 1            | 4                     | 1                  |
| Resources                   | 4          | 1            | 4                     | 2                  |
| Services & Facilities       | 7          | 0            | 3                     | 1                  |
| Travel                      | 7          | 0            | 4                     | 0                  |
| Waste                       | 4          | 0            | 3                     | 4                  |
| Water                       | 5          | 1            | 2                     | 3                  |

- 5.3.3 Table 9 shows that five out of the eleven Local Plan Objectives are more compatible than incompatible with the Sustainability Appraisal objectives. A further five Local Plan Objectives have a high degree of uncertainty and one Local Plan Objective is more incompatible than compatible.
- 5.3.4 The Strategic Objective for housing (objective 2) is the only Local Plan objective that is incompatible with more sustainability objectives than is it compatible. This reflects the conflict between environmental constraints and high demands for housing. The economic and social sustainability objectives have a greater degree of compatibility with this local plan objective.
- 5.3.5 Strategic objectives 1 (Sustainable Development) and 10 (Climate Change) are deemed to be compatible with all sustainability appraisal objectives as they include either an expectation for development to be sustainable or for development to bring benefits/reduce impacts to the three key elements of sustainable development (environment, economic and social).

- 5.3.6 Strategic objective 11 (Local Needs) is also deemed to be compatible with all sustainability objectives because locally-led policies within Neighbourhood Plans are expected to demonstrate how they will contribute to achieving sustainable development. In addition, policies are highly likely to be in the best interest of local communities and economies with high value placed upon the environment.
- 5.3.7 Table 10 shows there are no sustainability objectives that are more incompatible than compatible with the Local Plan objectives. However, there are several objectives that have a high number of mixed or uncertain scores. The majority of this uncertainty in scoring was created by the lack of detail inherent within strategic objectives.
- 5.3.8 Compatibility of sustainability objectives with Local Plan Objective 3 (Garden Settlements) are based on those applied to Growth Strategy 5 in the Issues and Options Sustainability Appraisal. Alterations are made to reflect the fact that it is now known that this model would not be the only form of development in the borough and a clearer picture is now available on what sort of development would be created in a garden settlement. However, no presumption about potential locations for garden settlements is made for this element of the Local Plan thus several uncertain impacts are still predicted.

# 6. SA of the Spatial Development Strategy

## 6.1 Background and Method

6.1.1 The process of appraising potential growth strategies to inform the preferred Spatial Development Strategy for the new Local Plan was first recorded in the Issues and Options SA (2017). At this stage, 6 growth strategies options were identified and appraised in order to inform the Local Plan. These are described in Table 11.

| Growth Strategy                     | Description  |
|-------------------------------------|--|
| (1) Focused Growth                  | Development distribution focused as per existing Core<br>Strategy, i.e. majority of new development directed to<br>Royal Tunbridge Wells/Southborough, a smaller proportion<br>to the other three main settlements of Paddock Wood,<br>Cranbrook and Hawkhurst and limited development within<br>the villages and rural areas.   |
| (2) Semi-Dispersed<br>Growth        | Development distribution semi-dispersed, with the majority<br>of new development directed to Royal Tunbridge<br>Wells/Southborough and a proportion distributed to other<br>main settlements of Paddock Wood, Cranbrook and<br>Hawkhurst (as per Option 1), but additionally a percentage<br>of development directed to some of the larger villages<br>(taking account of the updated settlement hierarchy work).<br>Limited development within the remaining villages and rural<br>areas. |
| (3) Dispersed Growth                | Development distribution proportional across all the borough's settlements.  |
| (4) Growth-Corridor<br>Led Approach | Development distribution focused around the A21, close to<br>Royal Tunbridge Wells and Pembury, as a new 'growth<br>corridor'.   |
| (5) New Settlement<br>Growth        | New freestanding garden settlement. There is no location identified with this option. A new settlement could be located anywhere within the borough.   |

Table 11. Growth Strategy Options considered by the Issues and Options SA.

| Growth Strategy                          | Description  |
|--|--|
| (6) Business As<br>Usual (No Local Plan) | No planned growth takes place. Only windfall sites provide<br>for the development needs of the borough and thus not all<br>needs may be met. |

- 6.1.2 At Issues and Options stage, predictions were inherently challenging given the high-level nature of the alternatives under consideration and lack of future baseline and locational information. For example, the HRA of the proposed growth had not yet been carried out in detail and thus the precautionary principle was enacted when assigning scores to the biodiversity objective.
- 6.1.3 Because of these limitations, readers were advised against summing the positives and negatives to determine an overall score for each strategy. All six scenarios had both positive and negative elements. The only clear conclusion that could be made was that alternative 6 (No Local Plan) was far less favourable overall than the other five options for growth i.e. planned growth was required in order to prevent significant negative effects in the borough.
- 6.1.4 In order to usefully guide the Local Plan in determining how the planned growth should be distributed, several recommendations were made. These included implementing new development management policies to ensuring adequate infrastructure could be provided (see Appendix C).
- 6.1.5 Although these recommendations were felt to be the most useful output from the Issues and Options SA, it was noted that a slight preference was recorded for Growth Strategy 5 and that Growth Strategy 3 was slightly less positive than the other strategies. However, given the above limitations, this observation was tentative and qualified with the advice that an approach combining elements of multiple strategies would be beneficial in helping to minimise negative impacts.
- 6.1.6 As drafts of the Local Plan were being developed, numerous further alternative growth strategies were identified for consideration through the Sustainability Appraisal. Some of these were described in the Draft Local Plan SA report and some have been developed since in order to address comments made during consultation. The full range of options tested during this updated SA process are described in Table 12. These alternatives consider a range of different scales and distributions for development across the borough and were informed by the most favoured sites in the SHEELA at Reg 18 and Reg 19 stages.

| Growth   | Description   |  |  |
|--|---|--|--|
| Strategy   | •   |  |  |
| 1: No MGB<br>Housing supply:<br>346 dwellings<br>per year<br>(11,526-565 /<br>17)<br>Strategic sites:<br>None            | <ul> <li>This strategy reduces growth below the housing need level to one that does not involve any loss of Green Belt. The scale of housing is reduced by some 5,650 homes (49% of housing need for 11,526) and loss of large employment areas. Key allocations that have been removed from Growth Strategy 3 include</li> <li>Tudeley Village, 2,000 less dwellings at PW (western parcels) and, at RTW, removal of the allocations at North Farm industrial estate, Mabledon and Spratsbrook. Apart from this, the distribution remains the same as Growth Strategy 3 (the Draft Local Plan).</li> <li>The complete list of allocations that have been removed is as follows: <ul> <li>Tudeley Village</li> <li>parcels west of Paddock Wood (in Capel Parish)</li> <li>land at Mabledon and Nightingale</li> <li>sites south of Pembury (PE1-3)</li> <li>SP1 at Speldhurst</li> <li>edge sites at RTW, notably: <ul> <li>Wyevale (RTW14)</li> <li>Spratsbrook (RTW16) and</li> <li>Employment site (RTW17)</li> </ul> </li> </ul></li></ul> |  |  |
| 2: No AONB<br>Majors<br>Housing supply:<br>560 dwellings<br>per year<br>(11,526-2000 /<br>17)<br>Strategic sites:<br>Yes | <ul> <li>This strategy reduces development below the housing need to one that does not involve any major development in the High Weald AONB. This means that the scale of housing is reduced by between 1,600 - 2000 dwellings (17% of housing need for 11,526) and large employment areas are removed. Apart from this, the distribution remains the same as Growth Strategy 3 (the Draft Local Plan).</li> <li>The complete list of allocations to be removed, or reduced to minor development, is as follows: <ul> <li>Longfield Rd (RTW 17)</li> <li>Spratsbrook (RTW 16)</li> <li>Turnden Farm (CRS 1)</li> <li>Crane Valley (CRS 3)</li> <li>Copthall Avenue/Highgate Hill (HA 4)</li> <li>Gills Green (HA 6) - employment use</li> <li>Brenchley Road, Coppers Lane, and Maidstone Road</li> </ul> </li> </ul>   |  |  |

Table 12. Updated growth strategy options for the Local Plan considered by this SA

| Growth   | Description  |
|--|--|
| Strategy   |  |
|  | <ul> <li>Pembury - sites south of village (PE 1-3)</li> <li>Land at Mabledon, Southborough</li> <li>Gate Farm, Cranbrook</li> <li>Golford Road, Cranbrook</li> <li>Land at the Golf Course, Hawkhurst</li> <li>Fowlers Park, Hawkhurst</li> <li>Ashes Plantation, Matfield</li> </ul>  |
| 3: Draft Local<br>Plan<br>Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need in line with<br>the standard<br>method) | This growth strategy is that of the Draft Local Plan and includes a large PW extension and new garden village at Tudeley.  |
| Strategic sites:<br>Yes  |  |
| 4: Main Towns<br>Housing supply:<br>678 dwellings  | Growth strategy based upon Option 1 of the Issues and Options<br>SA with adjustments made to reflect the incorporation of growth<br>along the A21 corridor, greater detail about the intention for site<br>allocations and Development Management polices within the<br>new Local Plan, the updated evidence base (including Plans,<br>Policies and Programmes) since the scoring was originally<br>carried out in 2016/2017.  |
| per year<br>(existing capped<br>need)<br>Strategic sites:<br>Paddock Wood<br>and east Capel<br>only  | <ul> <li>To compensate for the absence of a new settlement at Tudeley (i.e. 2,100 dwellings within the plan period), this option assumes that:</li> <li>RTW/SO has increased allocations, from c1,270 to c3,000 residential allocations</li> <li>Paddock Wood and east Capel retains strategic growth of up to 4,000 allocations</li> <li>Cranbrook has an increase from c760 to 1,200 residential allocations</li> <li>Hawkhurst has an increase from c670 to 1,000 residential allocations</li> <li>The residential allocations in villages are reduced by an average of a half (of c1,120 = c560), giving c40-50 each.</li> </ul> |

| Growth  | Description  |  |  |
|---|--|--|--|
| Strategy  | Growth strategy based upon Option 2 of the Issues and Options<br>SA with the majority of new development directed to Royal<br>Tunbridge Wells/Southborough and a proportion distributed to<br>other main settlements of Paddock Wood, Cranbrook and<br>Hawkhurst (as per Option 1), but additionally a percentage of<br>development directed to some of the larger villages (taking<br>account of the updated Role and Function Study 2020). Limited<br>development within the remaining villages and rural areas, and<br>no new garden settlement or strategic expansion of Paddock<br>Wood and east Capel.   |  |  |
| 5: Main Towns<br>& Large Villages   | Adjustments made to reflect the greater detail about the intention for site allocations and Development Management polices within the new Local Plan and the updated evidence base (including Plans, Policies and Programmes) since the scoring was originally carried out in 2016/2017.   |  |  |
| Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need)<br>Strategic sites:<br>No | <ul> <li>To compensate for the absence of a new settlement at Tudeley (i.e. 2,100 dwellings within the plan period), and less growth at PW, this option assumes:</li> <li>RTW/SO has increased allocations, from c1,270 to c3,000 residential allocations</li> <li>2,250, rather than 4,000, at PW such that the development is considered large but not 'strategic' so is less effective at providing wider benefits such as flood alleviation elsewhere</li> <li>Cranbrook has an increase from c760 to 1,200 residential allocations</li> <li>Hawkhurst has an increase from c670 to 1,000 residential allocations</li> <li>Pembury increases from 300 to 400 residential allocations</li> <li>Rusthall increases from 15 to c400 residential allocations (i.e. 5% each)</li> <li>Goudhurst, Benenden, Brenchley and Langton Green (Speldhurst) and Horsmonden each have c250 residential allocations (3% each)</li> <li>The residential allocations in remaining villages are reduced by an average of a half (of c440 = c220), giving c30-40 each.</li> </ul> |  |  |
| 6: Meet need<br>with no Green<br>Belt (MGB) loss  | No new garden village or urban extension of PW and east<br>Capel into Green Belt, or other Green Belt releases. Growth to<br>meet housing need focused on settlements outside Green Belt;<br>also, growth moderated in the AONB. To meet housing need,   |  |  |

| Growth<br>Strategy  | Description   |  |  |
|---|---|--|--|
| Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need)<br>Strategic sites:<br>No | <ul> <li>this would include:</li> <li>Major growth of Paddock Wood, with focus to south-east (c4,000)</li> <li>Major growth Horsmonden (c1,000)</li> <li>Major growth at Frittenden (c800)</li> <li>Major growth at Sissinghurst (c800)</li> <li>Growth of AONB settlements as per Option 8</li> </ul>  |  |  |
|   | This option was appraised in order to respond directly to<br>presumption to retain Green Belt and focus growth elsewhere. It<br>follows that major development would still take place in the<br>AONB but be primarily focussed on settlements outside it as well<br>as beyond the Green Belt. Paddock Wood is still the prime<br>growth point, but with focus away from the Green Belt, together<br>with the 3 'unconstrained' villages.                              |  |  |
|   | Note: There is further consideration of major growth of these villages in relation to new settlements, while options for growth around Paddock Wood are also separately appraised below.  |  |  |
| 7: Proportional<br>to Services  | Growth strategy based on the relative levels of services and facilities of settlements. The development distribution would be similar to Option 3 of the Issues and Options stage SA which described a proportional distribution across all the borough's settlements but this time with regard to the relative sustainability of settlements in terms of services and facilities. The updated Role and Function Study 2020 has been referred to for this assessment. |  |  |
| Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need)                           | Adjustments made to reflect the greater detail about the intention for site allocations and Development Management polices within the new Local Plan and the updated evidence base (including Plans, Policies and Programmes) since the scoring was originally carried out in 2016/2017.  |  |  |
| Strategic sites:<br>No  | In terms of residential allocations, this option assumes:<br>25% to RTW/SO (c2,250)<br>10% each to PW, Cranbrook and Hawkhurst (c900 each)<br>7.5% each to Pembury and Rusthall (c650 each)<br>3% each to 5 Group D villages (c250 each)<br>2% each to 6 Group E villages (c180 each)<br>1.5% each to 2 Group F villages (c100 each)  |  |  |

| Growth<br>Strategy   | Description  |  |  |
|--|--|--|--|
| <u> </u>   | This growth strategy is similar to Growth Strategy 7 but<br>moderated where settlements are within the AONB. This means<br>a lower proportion of growth is allocated to Cranbrook,<br>Hawkhurst and the smaller settlements which are washed over<br>by this sensitive landscape.  |  |  |
| 8: Services and<br>AONB<br>Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need)<br>Strategic sites:<br>No | <ul> <li>For this option, it is assumed that the scale of development at AONB settlements is half of the level in Development Strategy Option 6, specifically: <ul> <li>Cranbrook and Hawkhurst c450 each;</li> <li>Pembury (as enveloped by AONB) 325;</li> <li>Goudhurst, Langton Green, Benenden and Brenchley c125 (Group D villages in 2020 Role and Function Study excluding Horsmonden);</li> <li>Lamberhurst, Speldhurst, Sandhurst, and Bidborough villages c90 each (Group E villages in 2020 Role and Function Study excluding Five Oak Green and Sissinghurst);</li> </ul> </li> </ul> |  |  |
|  | This is an overall reduction of c25% of allocations in those<br>settlements, which is balanced by proportional increases in<br>RTW/SO, Rusthall, Horsmonden, Five Oak Green, Sissinghurst<br>and Frittenden.   |  |  |
| 9: Dispersed<br>Countryside  | This Growth Strategy is based upon is based on a distribution<br>that meets the identified needs by directing development into<br>rural areas, much less to existing villages and much more to<br>hamlets and farmsteads, particularly in the AONB.  |  |  |
| Housing supply:<br>678 dwellings<br>per year<br>(existing capped<br>need)  | This option assumes that the growth of settlements outside of RTW/SO and the strategic sites is a half of that proposed in the DLP, equivalent to an overall reduction of 1,275. This number is to be redistributed to hamlets and other enclaves of development, including farmsteads across the countryside, with c5-20 new dwellings in c75-200 locations.  |  |  |
| Strategic sites:<br>Yes  | It was assumed that business growth in RTW would still be<br>possible as the urban distribution is still similar to Growth<br>Strategy 3 (Draft Local Plan). Instead, the rural AONB<br>distribution is altered.   |  |  |
| 10: Uncapped<br>Need<br>Housing supply:  | A growth strategy that meets the 'uncapped' local housing need<br>to reflect national planning practice guidance, as it was found<br>possible to meet the needs for the borough under the standard<br>method.  |  |  |

| Growth<br>Strategy   | Description  |
|--|--|
| 741 dwellings  |  |
| per year<br>Strategic sites:   | The distribution is as per Growth Strategy 3 (Draft Local Plan) with further development across settlements, including in the AONB.  |
| Yes  |  |
|  | It is assumed that, as the strategic sites are being developed to<br>their maximum capacity within the plan period and equate to 2/3<br>of total allocations, there would be an average 30% increase<br>across other growth locations, with an additional 1,000+ homes<br>in total. With potential sustainable growth outside the AONB<br>already maximised, it is assumed a high proportion of this would<br>be at AONB settlements.  |
| 11: Uncapped &<br>Unmet Need<br>Housing supply:<br>847 dwellings<br>per year   | A growth strategy that meets the uncapped housing need plus<br>unmet housing need from elsewhere. The development would<br>meet the higher housing need figure of 741 dwellings per year<br>as well as some unmet need from elsewhere, equivalent to<br>some 1,900 dwellings currently unmet in Sevenoaks Borough.<br>The overall scale of growth is 847 dwellings per year<br>(741+1900/18) which is 25% above local housing need.<br>Distribution as per Growth Strategy 10 above, but with likely<br>further development in the AONB. |
| Strategic sites:<br>Yes  | The overall scale of growth is c 3,000 homes more than housing<br>need under the (capped) standard method. (741-<br>678=63x18=1,134+1,900) The distribution is as per option 9<br>above, but likely still further housing in the AONB as well as the<br>loss of more (relative to Option 3: the DLP) Green Belt,<br>including the losses around RTW/Southborough.  |
| Option 12: No<br>Local Plan  | This growth strategy involves no planned growth. Only windfall<br>sites provide for the development needs of the borough and<br>thus not all needs may be met.   |
| Option 13: Pre-<br>Submission<br>Local PlanFollowing a review of the findings for Strategic Growth O<br>1-12, work was undertaken on developing a suitable stra<br>the Pre-Submission Local Plan. To undertake this work,<br>consideration of the impact that the range of different sca<br>and distributions had on scores was undertaken. See res<br>sections for an explanation of how this strategy was derivative |  |

- 6.1.7 To consider the impacts of all these options, further Sustainability Appraisals were carried out, beginning with appraisals of growth strategies 1 12. Once this was complete, the findings were reviewed alongside comments made during consultation of the Draft Local Plan, and a new strategy was developed for the Pre-Submission Local Plan (Growth Strategy 13).
- 6.1.8 Economic objectives are considered to be business growth, employment and services. However, it should be noted that the employment objective has a low weighting (see Appendix B). Environmental objectives are considered to be air, biodiversity, climate change, heritage, land use, landscape, noise, resources, waste and water. Social objectives are considered to be deprivation, education, equality, health, housing and transport. However, it is acknowledged that there is some degree of overlap between these categories.
- 6.1.9 In addition to alternatives for the development strategy as a whole, alternative options to key elements of the strategic sites were considered as part of the sustainability appraisal. These were alternatives for:
  - i. the location for a garden settlement
  - ii. the scale of development for a garden settlement
  - iii. the location for an urban extension
  - iv. the scale of development for an urban extension
  - v. the strategic transport links for the above

## 6.2 Results

### **Growth Strategy Reasonable Alternatives**

6.2.1 The sustainability appraisals for each of the reasonable alternatives detailed in Table 12 are shown below in Table 13 - Table 24.

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Air                         | + +   | Substantially less development will benefit air quality in the west of the borough especially.                   |
| Biodiversity                | 0 / + | Score reflects the substantial gains planned for land at Tudeley plus reduced pressures on biodiversity overall. |
| Business<br>Growth          |       | Less growth in the borough (and at North Farm especially) would have a negative impact upon overall              |

Table 13. SA scores for Growth Strategy 1: No MGB.

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
|                             |       | business growth. Economic needs would not be met.   |
| Climate<br>Change           | 0 / - | Less growth in the borough would be beneficial to the climate change objective in reducing transport and carbon emissions from new dwellings.   |
| Deprivation                 | 0 / - | Reduced regeneration at Paddock Wood would create a negative impact.  |
| Education                   | + +   | This distribution is expected to remain adequate for addressing educational needs.  |
| Employment                  |       | Score reflects loss of significant future employment sites in RTW and Paddock Wood.   |
| Equality                    | 0 / + | Score reflects fact that less development overall does<br>not necessarily correlate with improvements in physical<br>activity rates or independent access to facilities. Score<br>is lower than that for Growth Strategy 2 as less growth<br>is planned overall so risk that improvements cannot be<br>made as effectively. |
| Health                      | 0 / - | Score is lower than that for Growth Strategy 2 as<br>substantially less growth is planned overall so risk that<br>improvements cannot be made as effectively.   |
| Heritage                    | 0 / + | Score reflects the reduced pressure on the historic environment.  |
| Housing                     |       | Substantially reduced development will not be sufficient to meet local housing needs.   |
| Land use                    | +     | Score reflects substantially reduced pressure on greenfield land, soils and complete absence of loss of MGB.  |
| Landscape                   | 0 / - | Score reflects loss of significant sites with negative<br>landscape impacts at Mabledon and Spratsbrook, whilst<br>pressures on AONB elsewhere in Borough remain.   |
| Noise                       | 0 / - | Score improved in comparison with strategies with<br>strategic sites to reflect improvements in road noise<br>from substantially reduced development at PW and<br>Tudeley.  |
| Resources                   | ?     | Choice of materials will be determined at Development<br>Management stage.  |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Services &<br>Facilities    | 0 / + | Substantially reduced development at Paddock Wood<br>and east Capel will reduce the opportunities for<br>improving services and facilities at this town. The more<br>rural settlements remain unchanged.  |
| Travel                      | 0     | Substantially reduced development at RTW, Paddock<br>Wood, east Capel and Tudeley (with associated<br>sustainable transport investments) will not improve easy<br>access to train stations or provide support for transport<br>projects such as at Colts Hill. However, this is offset by<br>substantially reduced volumes of private vehicles. |
| Waste                       | 0     | Objective most relevant to DM policies rather than strategic policies.  |
| Water                       | -     | Score is determined by consideration of reduced<br>pressure on water resources and fact that flooding<br>mitigation at Paddock Wood would no longer be<br>possible.   |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Air                         | +     | Less development in Hawkhurst and Cranbrook will<br>benefit air quality in these locations. The issue is not<br>diverted elsewhere as quantity of development is<br>reduced.  |
| Biodiversity                | +     | Nature conservation designations are scattered<br>across the borough but are more common in the<br>AONB. Reducing development here could benefit<br>biodiversity in combination with a strong commitment<br>to net gains.   |
| Business<br>Growth          |       | Less growth in the borough (and at North Farm<br>especially) would have a negative impact upon<br>overall business growth. Economic needs would not<br>be met.  |
| Climate<br>Change           | - /   | Less growth in the AONB (and in the borough overall)<br>would be beneficial to the climate change objective in<br>reducing transport and carbon emissions from new<br>dwellings.  |
| Deprivation                 | 0     | Hawkhurst and Cranbrook are both areas of income<br>deprivation and thus less growth here would mean<br>less opportunity for regeneration. Opportunities would<br>not be realised elsewhere (as for Growth Strategy 8)<br>and thus score is reduced slightly.   |
| Education                   | + +   | This distribution is expected to remain adequate for addressing educational needs.  |
| Employment                  |       | Score reflects loss of significant future employment sites in RTW and Paddock Wood.   |
| Equality                    | +/++  | Score reflects fact that less development in AONB<br>settlements does not necessarily correlate with<br>improvements in physical activity rates or<br>independent access to facilities. Score is slightly<br>lower than that for Growth Strategy 8 as less growth<br>is planned overall so risk that improvements cannot<br>be made as effectively. |
| Health                      | 0     | Score reflects fact that less development in AONB<br>settlements does not necessarily correlate with<br>improvements to accessible natural greenspace or<br>pockets of health deprivation. Score is slightly lower  |

| T-1-1- 44 04 | <b>-</b>   | <b>O</b> | 04       | O. N. |         |       |
|--------------|------------|----------|----------|-------|---------|-------|
| Table 14. SA | scores for | Growth   | Strategy | 2: NO | AONB Ma | ajors |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
|                             |       | than that for Growth Strategy 8 as less growth is planned overall so risk that improvements cannot be made as effectively.   |
| Heritage                    | 0 / - | Score is based upon Growth Strategy 7 and reflects<br>fact that the borough has a wealth of heritage assets<br>that are not confirmed to the AONB. A slight<br>improvement is seen to reflect the reduced pressure<br>from development.                      |
| Housing                     | - /   | Score reflects fact that reduced development will not<br>be sufficient to meet a significant proportion of local<br>housing needs and that building less dwellings in the<br>AONB will not help address the imbalance of higher<br>house prices in the AONB. |
| Land use                    | -     | Score reflects pressure on soils, greenbelt, and greenfield land.  |
| Landscape                   | +     | Less major development in the AONB will have landscape benefits.   |
| Noise                       | 0 / - | Score improved in comparison with Growth Strategy<br>7 to reflects AONB settlements of Cranbrook,<br>Lamberhurst and Goudhurst being vulnerable to road<br>noise.  |
| Resources                   | ?     | Choice of materials will be determined at<br>Development Management stage.   |
| Services &<br>Facilities    | 0 / + | Score reduced slightly in relation to Growth Strategy<br>8 to reflect the fact that reduced development in the<br>AONB would not necessarily help focus growth<br>where services and facilities are available.   |
| Travel                      | -     | Score improved in comparison with Growth Strategy<br>7. Less development in the AONB will mean fewer<br>private vehicles as much of the designation covers<br>rural areas where alternative transport modes are not<br>popular or viable.                    |
| Waste                       | 0     | Objective most relevant to DM policies rather than strategic policies.   |
| Water                       | 0 / - | Score is not significantly affected by reduction in growth in the AONB. Reflects risk to flooding in Paddock Wood and overall increased pressure on  |

| Sustainability<br>Objective | Score | Commentary         |
|-----------------------------|-------|--------------------|
|                             |       | existing supplies. |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Air                         | 0 / - | Expected overall decline in air quality. However,<br>substantial investment in active and sustainable travel<br>methods will help offset this in urban areas. The master<br>planning approach for the strategic sites will be<br>especially beneficial.   |
| Biodiversity                | 0     | Losses on smaller sites offset by potential large gains<br>on strategic sites. Net gains policy will also bring<br>benefits. Not considered at site level as gains could be<br>offsite or out of parish.  |
| Business<br>Growth          | + +   | Significant gains are proposed.   |
| Climate<br>Change           | - /   | Energy and fuel use from buildings and transport will increase. However, strong climate change policy and renewable energy provision will provide benefits.   |
| Deprivation                 | + +   | Substantial regeneration in urban areas   |
| Education                   | + +   | New school provision, expansion plans and<br>safeguarded land for schools will ensure the pressures<br>from new residents are removed.  |
| Employment                  | + + + | Significant numbers of new jobs are proposed  |
| Equality                    | + +   | Majority of development would provide benefits to social mobility and inclusion.  |
| Health                      | + +   | No negative outcomes across the parishes. However,<br>benefits disproportionately favour more urban<br>settlements, largely because residents in urban areas<br>are more likely to be within reach of accessible natural<br>greenspaces. Benefits also highly likely to be realised<br>with master planning of strategic sites. |
| Heritage                    | -     | Overall a slight negative impact reflecting a balance<br>between the positive effects in Southborough and the<br>smaller negative impacts elsewhere.  |
| Housing                     | + + + | Meeting housing need will ensure residents have better<br>access to higher quality homes and the type of home<br>they need.   |
| Land use                    |       | Negative to reflect substantial losses of greenfield land<br>and limited development on previously developed land.  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Landscape                   |       | Negative to reflect scores in most parishes and predicted impacts upon sensitive landscapes.   |
| Noise                       | ?     | A highly mixed score. Neutral impacts in many rural settlements and negative impacts in urban areas.   |
| Resources                   | ?     | Largely unknown. Choice of materials will be determined at Development Management stage.   |
| Services &<br>Facilities    | ?     | A highly mixed score. Negative impacts in rural settlements and positive impacts in urban areas.   |
| Travel                      | ?     | A highly mixed score. Negative impacts in rural settlements and positive impacts in urban areas.   |
| Waste                       | 0     | Neutral score reflecting inability of specific site<br>allocations to influence diversion of household and<br>construction waste from landfill.  |
| Water                       | ?     | Meeting housing need will put increased pressure on<br>existing resources. There is also potential for increased<br>flood risk due to cumulative effects. However, significant<br>betterment of flooding issues at Paddock Wood and<br>Five Oak Green, and policies for other smaller sites, will<br>provide significant positive benefits. Overall score is<br>mixed. |

| Sustainability<br>Objective | Score      | Commentary  |
|-----------------------------|------------|---|
| Air                         |            | Score unchanged since earlier SA stages to reflect fact<br>that, while the government's recent accelerated agenda<br>for switch to EV and the status of existing AQMA is<br>improving, the situation in Hawkhurst has been<br>deteriorating and this strategy option has the potential to<br>worsen the effect.   |
| Biodiversity                | 0          | Large quantity of development across the borough is<br>highly likely to cause losses for biodiversity. Urban<br>focus may help but brownfield sites are limited. Score<br>has improved since earlier SA stages to reflect strong<br>commitment to a policy for net gains.   |
| Business<br>Growth          | +/++       | Strong focus for development in more urban areas is<br>likely to mean a wider range of suitable staff and<br>transport options. Broadband is more likely to be of a<br>reasonable speed and existing premises are more likely<br>to be available. Score improved since earlier SA stages<br>to reflect inclusion of the A21 corridor as a suitable<br>employment growth area and Article 4 directions that<br>are now in place. |
| Climate<br>Change           | -          | Score unchanged since earlier SA stages. Carbon<br>neutrality targets are now in place within the plan<br>period. However, there are no strong guarantees or<br>commitments from central government yet.  |
| Deprivation                 | ++/++<br>+ | Pockets of deprivation are concentrated in urban areas.<br>Developing here increases the likelihood that these<br>could be improved. Score is improved since earlier SA<br>stages to reflect inclusion of a PW extension which<br>would represent a substantial form of regeneration in a<br>town with areas of income deprivation.   |
| Education                   | +          | Score updated since earlier SA stages to reflect clarity<br>from KCC Education on where educational needs are<br>greatest in the borough. This distribution would benefit<br>high needs in RTW but neglect needs in the smaller<br>rural settlements. Assumption that future development<br>would address both existing and future educational<br>needs.  |

#### Table 16. SA scores for Growth Strategy 4: Main Towns

| Sustainability<br>Objective | Score      | Commentary  |
|-----------------------------|------------|---|
| Employment                  | ++/++<br>+ | New score reflects incorporation of the A21 corridor as<br>being a good location for new employment opportunities<br>and the incorporation of the strategic site at Paddock<br>Wood and east Capel which was not considered at<br>earlier SA stages.  |
| Equality                    | +          | Score downgraded from earlier SA stages. Developing<br>in these locations matches up with pockets of income<br>deprivation and so increases the likelihood that<br>opportunities will be available for improved leisure<br>provision. However, developing predominantly in towns,<br>ignores the needs of rural residents and provides no<br>opportunity for improvement elsewhere. |
| Health                      | +/++       | Score modified since earlier SA stages to better reflect<br>fact that urban residents are more likely to be within<br>reach of accessible natural greenspace. This was a<br>finding revealed during assessment of the Draft Local<br>Plan SA stage. The score also reflects the commitment<br>made to a new policy that protects Local Green Space.                                 |
| Heritage                    |            | Score deteriorated since earlier SA stages because of<br>influence of additional growth along A21 corridor putting<br>further pressure on sensitive built up areas of RTW. No<br>guarantees for enhancements of the historic<br>environment are made yet.   |
| Housing                     | +          | Score unchanged to reflect the fact this distribution pattern does not address the housing needs in the numerous smaller rural settlements.   |
| Land use                    |            | Incorporating the A21 corridor and Paddock Wood and<br>east Capel strategic growth into this option means<br>impacts for MGB are greater and this score has<br>deteriorated since earlier SA stages. However,<br>greenfield losses are avoided elsewhere in the borough.<br>Town focussed growth is more likely to be on brownfield<br>land.  |
| Landscape                   | - /        | Score deteriorated since earlier SA stages to reflect incorporation of A21 corridor growth meaning great impact on the AONB.  |
| Noise                       | /          | Score deteriorated since earlier SA stages to reflect incorporation of A21 corridor growth meaning great  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
|                             |       | impact on existing noise levels.   |
| Resources                   | ?     | Score unchanged. Choice of materials will be determined at Development Management stage.   |
| Services &<br>Facilities    | + +   | Score unchanged to reflect distribution pattern focusing<br>on the settlements with the most services and facilities.<br>Addition of the A21 corridor growth is also well placed<br>for access to services and facilities.                                     |
| Travel                      | +/++  | Score improved following incorporation of A21 corridor<br>to reflect likely further support of priority transport<br>projects and the fact the new distribution (including A21)<br>support active and train travel as many services are<br>within easy reach.  |
| Waste                       | 0     | Score change from ? to 0 since earlier SA stages to<br>better reflect inability of site allocations to influence<br>diversion of household and construction waster from<br>landfill. Objective most relevant to DM policies rather<br>than strategic policies. |
| Water                       | ?     | Score changed from - to mixed (?) since earlier SA<br>stages so more in line with DLP to reflect inclusion of<br>strategic growth site at PW allowing flood<br>improvements.   |

 Table 17. SA scores for Growth Strategy 5: Main Towns & Large Villages

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Air                         | -/    | Score has improved slightly since earlier SA stages to<br>reflect improving status of the RTW AQMA and<br>government commitments to electric vehicles.<br>Adjustment has also been made to account for slight<br>improvement from distributing development away from<br>problem areas in the main settlements (including the<br>new AQMA at Hawkhurst). Without the master planning<br>work that goes alongside strategic sites some of the<br>beneficial effects of active travel commitments would be<br>lost. |
| Biodiversity                | 0     | Large quantity of development across the borough is<br>highly likely to cause losses for biodiversity. Urban<br>focus may help but brownfield sites are limited. Score<br>has improved slightly since earlier SA stages to reflect<br>strong commitment to a policy for net gains.   |
| Business<br>Growth          | +     | Focusing development in more urban towns is likely to<br>mean a wider range of suitable staff and transport<br>options. Broadband is more likely to be of a reasonable<br>speed and existing premises are more likely to be<br>available.  |
| Climate<br>Change           |       | Score is unchanged since earlier SA stages and reflects<br>increase in transport-related carbon as development is<br>focussed less in urban areas with good public and<br>active transport possibilities. Carbon neutrality targets<br>are now in place within the plan period. However, there<br>are no strong guarantees or commitments from central<br>government yet.  |
| Deprivation                 | + +   | Pockets of deprivation are generally concentrated in<br>urban areas. Developing here increases the likelihood<br>that these could be improved. Score unchanged since<br>earlier SA stages.   |
| Education                   | +/++  | Score has been updated since earlier SA stages to<br>reflect clarity from KCC Education on where educational<br>needs are greatest in the borough. This distribution<br>would help benefit high needs in RTW and address<br>needs in the smaller rural settlements to a small extent,<br>but not as much as may be necessary.  |

| Sustainability<br>Objective | Score   | Commentary  |
|-----------------------------|---------|---|
| Employment                  | + +     | Score unchanged from earlier SA stages. Employment opportunities are more common in the main urban areas.   |
| Equality                    | + / + + | Score changed from + + + at earlier SA stages.<br>Developing in these locations matches up with pockets<br>of income deprivation and so increases the likelihood<br>that opportunities will be available for improved access.<br>However, this ignore the needs of rural residents and<br>provides no opportunity for improvement elsewhere.<br>Score now better reflects the transition between<br>Strategies 4 and 6. |
| Health                      | +       | Score unchanged from earlier SA stages. Avoiding development in smaller settlements would likely ensure overall good access to green space.   |
| Heritage                    | - /     | Focusing on built up areas would put pressure on the<br>historic environment especially in RTW. Score<br>deteriorated from earlier SA stages because of no<br>guarantees for enhancements of the historic<br>environment.   |
| Housing                     | + +     | Score unchanged since earlier SA stages to reflect this distribution pattern does not addresses the housing needs in the smaller rural settlements.   |
| Land use                    |         | Score improved since earlier SA stages. After the<br>Brownfield Register were first published in Dec 2017, it<br>was felt that brownfield land is so limited in the borough<br>that the loss of greenfield land would be similar across<br>growth strategies 4, 5 and 6 rather than deteriorating to<br>reflect increased greenfield land take.   |
| Landscape                   |         | Score unchanged since earlier SA stages reflecting sensitivity of settlements within the AONB.  |
| Noise                       |         | Score unchanged since earlier SA stages reflecting<br>large proportion of sensitive areas being in RTW where<br>a large proportion of housing would occur.  |
| Resources                   | ?       | Score unchanged. Choice of materials will be determined at Development Management stage.  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Services &<br>Facilities    | +/++  | Score improved since earlier SA stages to reflect the service focussed distribution and the updated Role and Function Study with more robust methodology.  |
| Travel                      | -     | Score unchanged. As development is diverted away<br>from the main towns, transport options become more<br>limited and private car use begins to dominate,<br>especially Paddock Wood which has good train links.   |
| Waste                       | 0     | Score change from ? to 0 since earlier SA stages to<br>better reflect inability of site allocations to influence<br>diversion of household and construction waster from<br>landfill. Objective most relevant to DM policies rather<br>than strategic policies. |
| Water                       | -     | Score unchanged and reflects risk to flooding in<br>Paddock Wood and east Capel and overall increased<br>pressure on existing supplies.  |

Table 18. SA scores for Growth Strategy 6: Meet need with no MGB loss

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Air                         | 0     | Option diverts traffic from the problem areas in Hawkhurst and RTW.  |
| Biodiversity                | 0 / - | Large quantity of development across the borough is<br>highly likely to cause losses for biodiversity. Rural<br>village focus could contribute to this negative affect.<br>Effects are prevented from being any worse by fact that<br>nature conservation sites are more common in the<br>AONB.  |
| Business<br>Growth          | 0 / + | Focusing development away from more urban towns is<br>likely to mean a narrower range of suitable staff and<br>transport options. Broadband is less likely to be of a<br>reasonable speed and existing premises are less likely<br>to be available. Continued large growth at Paddock<br>Wood is an exception to this.   |
| Climate Change              | /     | Score reflects increase in transport-related carbon as<br>development is focussed less in urban areas with good<br>existing public and active transport possibilities. Carbon<br>neutrality targets are now in place within the plan<br>period. However, there are no strong guarantees or<br>commitments from central government yet.<br>Development SE of Paddock Wood may mean the loss<br>on an existing solar farm. |
| Deprivation                 | 0 / + | Pockets of deprivation are generally concentrated in<br>urban areas. Developing elsewhere reduces the<br>likelihood that these could be improved.  |
| Education                   | +     | This distribution would not benefit the high needs in<br>RTW or help address the needs in some of the smaller<br>rural settlements. Assumption that future development<br>would address both existing and future educational<br>needs.   |
| Employment                  | +     | Score reflects loss of large employment site in RTW.<br>Employment opportunities are more limited when<br>developing outside of main urban centres.  |
| Equality                    | +     | Developing further into rural areas both small villages<br>and outskirts from PW is unlikely to give as much<br>support to access problems as would be possible if<br>development was concentrated in more populated   |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
|                             |       | areas.  |
| Health                      | +     | Urban residents are more likely to be within reach of accessible natural greenspace.  |
| Heritage                    |       | Substantial growth of the small non AONB settlements<br>is expected to have very negative impact upon heritage<br>assets and setting.   |
| Housing                     | +/++  | Option is generally positive but is less effective at<br>addressing the housing need in the west of the borough<br>as other options.  |
| Land use                    | +     | No loss of MGB. Substantial loss of greenfield land and soils.  |
| Landscape                   | -/    | Score reflects protection offered to the AONB whilst<br>significant impact upon the character of three smaller<br>non ANOB villages and setting issues of the AONB near<br>Sissinghurst particularly.   |
| Noise                       | - /   | Transferring MGB growth into other areas of the<br>borough would improve noise levels in the west but<br>risks creating new problems elsewhere in the borough.<br>Especially near Cranbrook where there are existing<br>Important Areas for Road Noise (IARN).      |
| Resources                   | ?     | Unknown. Choice of materials will be determined at Development Management stage.  |
| Services &<br>Facilities    | 0 / + | Disproportionate growth of the three less constrained<br>villages is not idea as services are currently lacking.<br>However, some allowances is made for the assumption<br>that some of the necessary infrastructure would be<br>included with the new development. |
| Travel                      | /     | Disproportionately large growth in smaller settlements of<br>Frittenden, Horsmonden and Sissinghurst prompts a<br>high negative score.  |
| Waste                       | 0     | Neutral score reflecting inability of site allocations to influence diversion of household and construction waste from landfill.  |
| Water                       | -     | Score unchanged and reflects risk to flooding in<br>Paddock Wood and Capel and overall increased<br>pressure on existing supplies.  |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Air                         | 0     | Score has improved slightly since earlier SA stages to<br>reflect improving status of the RTW AQMA and<br>government commitments to electric vehicles.<br>Adjustment has also been made to account for slight<br>improvement from distributing development away from<br>problem areas in the main settlements (including new<br>AQMA at Hawkhurst).   |
| Biodiversity                | 0     | Large quantity of development across the borough is<br>highly likely to cause losses for biodiversity. Urban<br>focus may help but brownfield sites are limited. Score<br>has improved slightly since earlier SA stages to reflect<br>strong commitment to a policy for net gains.  |
| Business<br>Growth          | +     | A wider distribution across the borough will reduce<br>support for key businesses based in more urban towns.  |
| Climate<br>Change           |       | Score reflects increase in transport-related carbon as<br>development is focussed less in urban areas with good<br>public and active transport possibilities. Score<br>unchanged since earlier SA stages. Carbon neutrality<br>targets are now in place within the plan period.<br>However, there are no strong guarantees or<br>commitments from central government yet. Score is not<br>worse than Growth Strategy 5 as distribution considers<br>services and facilities of settlements, helping to reduce<br>dependency on private car use. |
| Deprivation                 | +     | Pockets of deprivation are generally concentrated in<br>urban areas. Developing elsewhere reduces the<br>likelihood that these could be improved. Score<br>unchanged since earlier SA stages.   |
| Education                   | + +   | Score has been updated since earlier SA stages to<br>reflects clarity from KCC Education on where<br>educational needs are greatest in the borough. This<br>distribution would benefit high needs in RTW and also<br>help to address needs in the smaller rural settlements.<br>Assumption that future development would address<br>both existing and future educational needs.   |

#### Table 19. SA scores for Growth Strategy 7: Proportional to Services

| Sustainability<br>Objective | Score | Commentary   |  |
|-----------------------------|-------|--|--|
| Employment                  | +     | Score unchanged since earlier SA stages. Employment opportunities are more limited when developing outside of main urban centres.  |  |
| Equality                    | + +   | Score unchanged since earlier SA stages. Developing<br>further into rural areas is unlikely to give as much<br>support to access problems as would be possible if<br>development was concentrated in more populated<br>areas.  |  |
| Health                      | 0 / + | Score modified since earlier SA stages to better reflect<br>fact that rural residents are less likely to be within reach<br>of accessible natural greenspace. This was a finding<br>revealed during assessment of the Draft Local Plan SA<br>stage.  |  |
| Heritage                    | -     | Score modified since earlier SA stages as this growth<br>option no longer allocates development to the very<br>smallest settlements where preservation of farmsteads<br>could be possible. Also, there is no guarantee of<br>enhancements for the historic environment.  |  |
| Housing                     | + + + | Score improved since earlier SA stages to reflect this distribution pattern now being enough to address the housing needs in the smaller rural settlements.  |  |
| Land use                    |       | Score improved since earlier SA stages. After the<br>Brownfield Register was first published in Dec 2017, it<br>was felt that brownfield land is so limited in the borough<br>that the loss of greenfield land would be similar across<br>growth strategies 4, 5 and 6 rather than deteriorating to<br>reflect increased greenfield land take. |  |
| Landscape                   |       | Score unchanged since earlier SA stages reflecting sensitivity of settlements within the AONB.   |  |
| Noise                       | -     | Score unchanged and reflects smaller settlements<br>tending not to be near Important Areas for Road Noise<br>(IARN). Negative overall as there is a risk that such<br>large amount of growth would create significant<br>movements in new locations and thus warrant a new<br>IARN.  |  |
| Resources                   | ?     | Score unchanged. Choice of materials will be determined at Development Management stage.   |  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Services &<br>Facilities    | +     | Score improved since earlier SA stages to reflect the service focussed distribution and the updated Role and Function Study with more robust methodology.  |
| Travel                      |       | Score unchanged. As development is diverted away<br>from the main towns, transport options become more<br>limited and private car use begins to dominate.  |
| Waste                       | 0     | Score change from ? to 0 since earlier SA stages to<br>better reflect inability of site allocations to influence<br>diversion of household and construction waster from<br>landfill. Objective most relevant to DM policies rather<br>than strategic policies. |
| Water                       | -     | Score unchanged and reflects risk to flooding in<br>Paddock Wood and Capel and overall increased<br>pressure on existing supplies.   |

| Sustainability<br>Objective | Score | Commentary  |  |
|-----------------------------|-------|---|--|
| Air                         | 0 / + | Less development in Hawkhurst and Cranbrook will benefit air quality in these locations.  |  |
| Biodiversity                | 0 / + | Nature conservation designations are scattered<br>across the borough but are more common in the<br>AONB. Reducing development here could benefit<br>biodiversity in combination with a strong commitment<br>to net gains.   |  |
| Business<br>Growth          | +     | Less growth in the AONB settlements would have a minimal Impact upon overall business growth.   |  |
| Climate Change              |       | Score is the same as that than Growth Strategy 7 as<br>reduced growth in the AONB is unlikely to impact<br>significantly upon the carbon intensity of new<br>development or the way in which people travel. In<br>addition, this score is worse than that applied to the<br>DLP to reflect increased travel necessary from<br>greater development in the smaller AONB<br>settlements. |  |
| Deprivation                 | +     | Score is the same as that of Growth Strategy 7 as a<br>reduction in growth in Hawkhurst and Cranbrook<br>(both areas of income deprivation) is offset by<br>increase in growth in Southborough, Rusthall and<br>RTW. Growth in areas of income deprivation such as<br>these means greater opportunity for regeneration.   |  |
| Education                   | + +   | Score is unchanged from Growth Strategy 7 as KCC education have not identified high needs in the AONB settlements.  |  |
| Employment                  | 0 / + | Score reflects likely loss of employment sites at Gills Green.  |  |
| Equality                    | ++    | Score is the same as Growth Strategy 7 and reflects<br>fact that less development in AONB settlements does<br>not necessarily correlate with improvements in<br>physical activity rates or independent access to<br>facilities.   |  |
| Health                      | 0 / + | Score is the same as Growth Strategy 7 and reflects<br>fact that less development in AONB settlements does<br>not necessarily correlate with improvements to<br>accessible natural greenspace or pockets of health  |  |

#### Table 20. SA scores for Growth Strategy 8: Services and AONB

| Sustainability<br>Objective | Score | Commentary   |  |
|-----------------------------|-------|--|--|
|                             |       | deprivation.   |  |
| Heritage                    | -     | Score is the same as Growth Strategy 7 and reflects fact that the borough has a wealth of heritage assets that are not confined to the AONB.   |  |
| Housing                     | + + + | Score assumes that reduced growth in AONB settlements would still be sufficient to meet local needs.   |  |
| Land use                    |       | Score assumes that reduced growth in AONB settlements would not necessarily mean less development in the MGB.  |  |
| Landscape                   | -     | Score assumes that the level of reduced growth<br>would be sufficient to avoid significant impacts upon<br>the AONB and that significant impacts would not be<br>created elsewhere.  |  |
| Noise                       | 0 / - | Score improved in comparison with Growth Strategy 7<br>to reflects AONB settlements of Cranbrook,<br>Lamberhurst and Goudhurst being vulnerable to road<br>noise.  |  |
| Resources                   | ?     | Unknown. Choice of materials will be determined at Development Management stage.   |  |
| Services &<br>Facilities    | +     | Score is identical to Growth Strategy 7 as this<br>strategy also focusses on growth within settlements<br>that have better provision of services and facilities.<br>Removing some growth from the AONB would not<br>significantly change this score as the growth could be<br>transferred to settlements outside the AONB with<br>similar levels of service provision. |  |
| Travel                      | -     | Score improved compared to Growth Strategy 7.<br>Transport options are often limited in the AONB, with<br>private car use dominant.  |  |
| Waste                       | 0     | Objective most relevant to DM policies rather than strategic policies.   |  |
| Water                       | -     | Score is not significantly affected by reduction in<br>growth in the AONB but reflects risk to flooding in<br>Paddock Wood and overall increased pressure on<br>existing supplies.   |  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Air                         |       | Sustainable and active transport options are limited in<br>a hamlet-style distribution and, even with<br>improvements that could be brought about by<br>increased development, the rural nature of the<br>settlements will likely always mean that private car use<br>is preferred. This will lead to a deterioration of air<br>quality in these locations and cumulatively across the<br>borough.     |
| Biodiversity                | -     | Nature conservation designations are scattered across<br>the borough but are more common in the AONB. Thus,<br>greater development in the AONB could create<br>increased pressure on wildlife. Planning for a higher<br>number of smaller housing developments increases<br>the changes that development will be near to a<br>designated site.   |
| Business<br>Growth          |       | Score has been adjusted since Draft Local Plan stage<br>as it was felt that losses to the rural economy (larger<br>fields are more profitable, and farmsteads often<br>provide valuable business premises) had been<br>underestimated. Negative impacts upon the growth of<br>new businesses has also been considered as rural<br>development has poorer transport links and broadband<br>connections. |
| Climate<br>Change           |       | Building a relatively large number of new homes is<br>likely to increase carbon and energy demands. In<br>addition, public transport is not always convenient in<br>rural settlements so private car use is likely.  |
| Deprivation                 | +     | The AONB contains areas of income deprivation.<br>However, Hamlet style development is highly likely to<br>be on greenfield sites adjoining settlements and is thus<br>unlikely to constitute a form of regeneration or address<br>issues of fuel poverty.   |
| Education                   | + +   | Increased residential development will put increased<br>pressure on existing schools. Expansions,<br>safeguarding and provision of new schools would need<br>to be made in-line with the infrastructure requirements<br>of the Local Plan.   |

Table 21. SA scores for Growth Strategy 9: Dispersed Countryside

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Employment                  |       | Score has been adjusted since Draft Local Plan stage<br>as it was felt that, although jobs in construction would<br>be maintained, this needs to be offset against the lack<br>of provision for employment sites in this strategy. This<br>assumption has become clearer since Draft Local Plan<br>stage.  |
| Equality                    | -     | Extra development on the edge of existing rural<br>settlements is likely to mean independent access to<br>facilities for new residents is more challenging both in<br>terms of distance and choice. This could disadvantage<br>those residents with mobility, sensory and cognitive<br>impairments. This effect is particularly acute for very<br>rural hamlet-style developments. |
| Health                      | 0 / + | Score modified since earlier SA stages to better reflect<br>fact that urban residents are more likely to be within<br>reach of accessible natural greenspace. This was a<br>finding revealed during assessment of the Draft Local<br>Plan SA stage. The score also reflects the<br>commitment made to a new policy that protects Local<br>Green Space.                             |
| Heritage                    | - /   | Even if development in the AONB it is distributed<br>evenly, there is potential for conflicts with historic<br>settlement pattern and impact upon designated and<br>non-designated heritage assets. Hamlet-style<br>development will be small and thus have potential to<br>create reduced but still wide-spread impact.   |
| Housing                     | +     | Score has been adjusted since Draft Local Plan stage<br>to better reflect the fact that this strategy for small<br>hamlet-style development would be less likely to meet<br>the threshold for provision of affordable housing.   |
| Land use                    | /     | Development would need to be on greenfield land and<br>will result in the loss of soils. In addition, further<br>release of greenbelt land cannot be ruled out.  |
| Landscape                   |       | Hamlet-style development will be small scale but the cumulative risks from the volume of development would still have significant landscape impacts.   |
| Noise                       | -     | Prioritised rural growth could impact negatively upon currently quiet locations.   |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Resources                   | ?     | As for the Draft Local Plan, this objective is largely<br>unknown. Large amounts of demolition are not<br>expected from extra residential development on<br>greenfield land. However, choice of materials will be<br>determined at Development Management stage.  |
| Services &<br>Facilities    |       | Negative score reflects the poorer range and ease of access to services and facilities in the hamlet-style distribution development.  |
| Travel                      |       | Negative score reflects the poorer transport services<br>available in the more rural settlements. In all these<br>locations sustainable and active transport options are<br>limited and, even with improvements that could be<br>brought about by increased development, the rural<br>nature of the settlements will likely always mean that<br>private car use is preferred. |
| Waste                       | 0     | Neutral score reflecting inability of site allocations to influence diversion of household and construction waste from landfill.  |
| Water                       | -     | Large development is needed in order to secure the<br>financial contributions needed to make flood<br>betterment viable. The hamlet-style development is<br>less likely to allow for this.  |

| Sustainability<br>Objective | Score       | Commentary  |  |
|-----------------------------|-------------|---|--|
| Air                         | -           | The higher quantity of development is likely to result in<br>a deterioration in local air quality related to the higher<br>volume of vehicles.  |  |
| Biodiversity                | 0 / -       | Greater quantity of development creates more of a risk to biodiversity.   |  |
| Business<br>Growth          | +/++        | Greater quantity of development means more<br>opportunities for encouraging business growth and<br>competitiveness.   |  |
| Climate<br>Change           | /           | Greater quantity of development increases carbon emissions  |  |
| Deprivation                 | + / + +     | Score improved by greater quantity of development to reflect increased opportunities for regeneration.  |  |
| Education                   | + + / + + + | Assumption that future development would address both existing and future educational needs.  |  |
| Employment                  | + / + +     | Greater quantity of development would facilities and support employment opportunities to a greater extent.  |  |
| Equality                    | +/++        | Extra development on the edge of existing settlements<br>is likely to mean independent access to facilities for<br>new residents is more challenging both in terms of<br>distance and choice. This could disadvantage those<br>residents with mobility, sensory and cognitive<br>impairments. |  |
| Health                      | ?           | Unknown score. New development could provide new accessible natural greenspace, provision for higher physical activity rates or better access to heritage assets but this would depend strongly on DM policy.   |  |
| Heritage                    | -/          | Greater quantity of development creates more of a risk to the historic environment.   |  |
| Housing                     | + + +       | Greater quantity of development distributed across the borough would address housing needs.   |  |
| Land use                    | /           | Greater quantity of development creates risk of further loss of greenfield land, soils and MGB.   |  |
| Landscape                   | /           | Greater quantity of development creates significant risk to the sensitive landscapes both from individual   |  |

| Table 22. | SA scores | for Growth | Strategy | 10: Uncapped Ne  | ed |
|-----------|-----------|------------|----------|------------------|----|
|           | 0/100100  |            | Clickey  | To: Onloappourto | 00 |

| Sustainability<br>Objective | Score | Commentary   |  |
|-----------------------------|-------|--|--|
|                             |       | development and cumulatively.  |  |
| Noise                       | - /   | The higher quantity of development is likely to result in<br>an increase in noise levels due to the higher volume of<br>vehicles.  |  |
| Resources                   | ?     | Choice of materials will be determined at Development<br>Management stage.   |  |
| Services &<br>Facilities    | 0 / + | Expanding existing settlements is not likely to improve access to and range of key services and facilities.  |  |
| Travel                      |       | Increasing the quantity of development would support<br>the viability of bus services but further increasing the<br>size of rural settlements would not decrease likelihood<br>of dependency on private vehicles. Score unchanged<br>from Growth Strategy 7. |  |
| Waste                       | 0     | There is a risk that a greater quantum of development<br>could reduce changes of household waste reduction.<br>However, this objective is controlled by effective DM<br>policy so cannot be scores accurately.   |  |
| Water                       | ?     | Increased quantity of development at Paddock Wood<br>and east Capel could help facilitate mitigation<br>schemes as for Growth Strategy 3 so score is<br>unknown.   |  |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Air                         | - /   | The higher quantity of development is likely to result in<br>a deterioration in local air quality related to the higher<br>volume of vehicles.  |
| Biodiversity                | -     | Greater quantity of development creates more of a risk to biodiversity.   |
| Business<br>Growth          | + +   | Greater quantity of development means more opportunities for encouraging business growth and competitiveness.   |
| Climate<br>Change           |       | Greater quantity of development increases carbon emissions  |
| Deprivation                 | + +   | Score improved by greater quantity of development to reflect increased opportunities for regeneration.  |
| Education                   | + + + | Assumption that future development would address both existing and future educational needs.  |
| Employment                  | + +   | Greater quantity of development would facilities and support employment opportunities to a greater extent.  |
| Equality                    | + +   | Extra development on the edge of existing settlements<br>is likely to mean independent access to facilities for<br>new residents is more challenging both in terms of<br>distance and choice. This could disadvantage those<br>residents with mobility, sensory and cognitive<br>impairments. |
| Health                      | ?     | Unknown score. New development could provide new accessible natural greenspace, provision for higher physical activity rates or better access to heritage assets but this would depend strongly on DM policy.   |

| Travel                      |       | Increasing the quantity of development would support<br>the viability of bus services but further increasing the<br>size of rural settlements would not decrease likelihood<br>of dependency on private vehicles. Score unchanged<br>from Growth Strategy 7. |
| Waste                       | 0     | There is a risk that a greater quantum of development<br>could reduce changes of household waste reduction.<br>However, this objective is controlled by effective DM<br>policy so cannot be scores accurately.   |
| Water                       | ?     | Increased quantity of development at Paddock Wood<br>and east Capel could help facilitate mitigation<br>schemes as for Growth Strategy 3 so score is<br>unknown.   |

| Table 24. | SA scores | for Growth | Strategy | 12: No l | ₋ocal Plan |
|-----------|-----------|------------|----------|----------|------------|
|-----------|-----------|------------|----------|----------|------------|

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Air                         |       | Piecemeal development could have a very negative<br>impact on air quality as cumulative impacts are more<br>difficult to consider. Also, small developments unlikely<br>to bring as much opportunity for improvements than a<br>Local Plan with suitable policy. |
| Biodiversity                |       | Greater losses for biodiversity are likely if locations are<br>not strategically planned. Existing policy could be used<br>to protect biodiversity but not as strong as could be.  |
| Business<br>Growth          | ?     | Difficult to score without details of future development<br>proposals or locations. Mixed picture as loss of<br>economic floor is possible but construction activities still<br>likely to be supported as housing still in high demand.                          |
| Climate<br>Change           |       | Highly negative due to lack of strong energy or transport policies and clear direction from central government still lacking.  |
| Deprivation                 |       | Without control over where development occurs, there<br>is no guarantee of being able to regenerate in areas of<br>need. There is also no commitment to reducing fuel<br>poverty.  |
| Education                   |       | New piecemeal development highly unlikely to address existing demands.   |
| Employment                  | ?     | Difficult to score without knowledge of future development locations.  |
| Equality                    | ?     | Difficult to score without knowledge of future development locations.  |
| Health                      | ?     | Difficult to score without knowledge of future development locations.  |
| Heritage                    |       | Without control over where development occurs, no<br>guarantee of being able to protect historical and cultural<br>heritage assets. A strategic framework for<br>enhancements is less likely to be realised within<br>borough-wide planning.                     |
| Housing                     | +     | Some needs would be met but lack of policy direction may reduce drive and certainty for developers.  |
| Land use                    |       | Location choice in hands of planning applicant.<br>Refusals would be more difficult. Greenfield and soil   |

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
|                             |       | losses highly likely.   |
| Landscape                   |       | Much of the borough in in the AONB and of planned<br>development is more likely to put sensitive locations at<br>risk.  |
| Noise                       |       | Lack of strategic planning may mean Important Areas<br>for Road Noise (IARN) are harder to avoid, as housing<br>demand is so high and cumulative impacts are<br>overlooked at level of individual development.  |
| Resources                   |       | High demand for housing could mean the demolition<br>approach is adopted as land becomes available instead<br>of adopting a more proactive approach in which the<br>most suitable land is sought out. Lack of existing DM<br>policy means responsible sourcing of materials is more<br>challenging.   |
| Services &<br>Facilities    | ?     | Difficult to score without knowledge of development<br>location. It is possible that piecemeal development<br>could support rural services by providing a larger<br>population to use such services and create increased<br>demand for expansion. However, likely that preference<br>will be for housing over improvements to facilities, and,<br>even with S106, higher demands could be difficult to<br>adapt to in the short term, which could be detrimental to<br>a service such as a GP practice. |
| Travel                      | ?     | Difficult to score without knowledge of site locations.<br>Uncertain as location of windfall site development is<br>unknown. Sites that have better travel arrangements<br>may be preferred and those without could be improved<br>with S106. However, this tends to be a temporary<br>solution.  |
| Waste                       |       | There is currently only weak policy relating to waste.<br>Demand for new housing is high.   |
| Water                       | ?     | Difficult to score without knowledge of development location.   |

- 6.2.2 Following a review of the findings for Strategic Growth Options 1-12, work was undertaken on developing a suitable strategy for the Pre-Submission Local Plan.
- 6.2.3 To undertake this work, consideration of the impact that the range of different scales and distributions had on scores for the 19 sustainability objectives was undertaken. A

summary is provided below. More detailed explanations of how scores were assigned are included in Table 13 to Table 25 above.

# Scale of Development

- 6.2.4 As would be expected, the scale of development had a significant impact on the scores.
- 6.2.5 Reducing the amount of development below the existing capped need of 678 dwellings per year, resulted in improvements to some environmental objectives but a deterioration in the scores some economic and social objectives (Growth Strategies 1 and 2). For example, landscape, heritage, biodiversity, air, land use, noise, scores were improved as pressure on land-take eased. However, as more residential and economic development was removed, the objectives of business, housing, employment and deprivation worsened. Some objectives did not follow this trend. For example, the water score did not improve when the strategic site at Paddock Wood and east Capel was removed due to the large benefits for flooding that would come with this development.
- 6.2.6 As the scale of development was increased towards the uncapped need and beyond (Growth Strategies 11 and 12), the reverse trend was seen. Further benefits were realised for the social and economic objectives and large negative effects were seen for the environmental objectives.
- 6.2.7 The options exploring the scales of growth larger than the existing capped need of 678 dwellings per year resulted in more extreme scores (both positive and negative) whereas the options exploring smaller scales of growth generally resulted in less extreme scores (again, both positive and negative). However, it is not appropriate to conclude that positive effects cancel out negative effects as the importance of each objective needs considering in its own right. Instead, the sustainability appraisal process recognises the interdependence of the three strands of sustainable development and the weight given nationally to the most highly affected environmental objectives and recommended that Growth Strategies 10, 11 and 12 were not pursued further. Thus, Growth Strategies 3 9 were considered in more detail to determine how influential the distribution of development could be on enhancing the positive effects and reducing the negative effects that are observed when considering the various scales for development.

## **Distribution of Development**

- 6.2.8 In terms of the distribution of development, it was recognised that greater urban intensification would be beneficial overall with Strategy Option 4 (Main Towns) having several strong positive effects. Potential for further development in urban areas has also been supported by changes to Use Class Order and work undertaken by the Council in 2020 on previously development land (PDL).
- 6.2.9 Greater development in very rural areas via Growth Strategy 9 (Dispersed Countryside) resulted in several highly negatives outcomes and thus was not

supported. However, it was observed that scores were improved in comparison to Growth Strategy 4 (Main Towns) where development was directed more closely to settlements with a greater range of services and facilities, and away from some smaller villages, especially Hartley, Sissinghurst and Matfield. The 2020 Role and Function Study provided up-to-date information in this regard.

- 6.2.10 It was also recognised that negative environmental effects were predicted where development was directed to certain settlements; for example, in terms of landscape impacts associated with high growth at Cranbrook and Hawkhurst in Strategy Options 4 and 5 (Main Towns), and that these impacts could be lessened by having a strategy that was sensitive to features such as the AONB, the historic environment and/or biodiversity. This effect was equally realised for objectives that relate to dependency on private car use which is greater in the AONB and smaller villages outside of the AONB.
- 6.2.11 The scoring outcome for Growth Strategy 6 (Meet need with no Green Belt loss) demonstrated that, without Green Belt release, meeting the housing need causes highly negative impacts for travel and climate change and some social objectives are not as positive as they would be otherwise (housing, education, equality).
- 6.2.12 The effects of excluding the strategic sites at both Paddock Wood/east Capel and Tudeley can be explored by comparing Growth Strategies 3 (DLP), with strategies 7 (Proportional to Services) and 8 (Services & AONB). Strong positive scores tend to be more common with Growth Strategy 3, and the advantages of the strategic sites is discussed in the commentary for Growth Strategy 3. There is separate consideration of the choice of these locations for strategic growth on page 94.
- 6.2.13 By comparing Growth Strategies 4 (Main Towns) and 5 (Main Towns & Large Villages), which in effect removes the Paddock Wood/east Capel strategic extension, it was observed that a detrimental impact occurs upon the 8 objectives of business growth, climate change, deprivation, employment, health, services, travel and water. Positive effects were seen for the 6 objectives of air, education, equality, heritage, housing and noise. The remaining 5 objectives of biodiversity, land use, landscape, resources and waste remained constant.
- 6.2.14 The effect of removing Tudeley Village Strategic Site can be observed by comparing Growth Strategies 3 (DLP) and 4 (Main Towns). Ignoring unknown scores, it can be seen that 8 objectives are improved by the distribution including a garden settlement, 2 are made worse and 3 objectives are the same.
- 6.2.15 Finally, the effect of removing both strategic sites can be seen by comparing Growth Strategy 3 (DLP) which meets the standard housing need and include both strategic sites, with Growth Strategies 7 (Proportional to Services) and 8 (Services and AONB) which both meet the standard housing need whilst excluding both strategic sites. When comparing the 12 objectives that are scored negatively or positively (instead of neutral or mixed scores), it can be seen that the 6 objectives of business growth, climate change, deprivation, employment, health and housing objectives all score better when both strategic sites are included in the distribution. The 3 objectives of education, equality, heritage, land use score the same, whilst the 2 objectives of

biodiversity and landscape score either the same or worse (depending on whether Strategy 7 or 8 is being used as a comparison). The air quality objective score slightly negatively in Growth Strategy 3 (the DLP) which is worse than the neutral and slightly positive scores for Growth Strategies 7 and 8. The strategic sites are likely to have some effect on the existing AQMAs at Royal Tunbridge Wells and Tonbridge, and because the DLP distribution put pressure on the new AQMA in Hawkhurst. The effect would be more significant if it were not for the extensive active travel proposals for the strategic sites that are expected to bring about a model shift.

6.2.16 In conclusion, the objectives for forming a new growth strategy moving forward were to:

- Meet the standard method need
- Include strategic sites as per Growth Strategy 3 (the DLP)
- Include less development at larger settlements of Cranbrook and Hawkhurst in the AONB
- Include reduced development at some smaller villages (especially Sissinghurst, Matfield and Hartley)
- Include more urban intensification, especially in RTW
- 6.2.17 A sustainability appraisal was then undertaken on this strategy. See Table 25 below. In comparison to the other growth strategies, it can be seen that the Growth Strategy for the Pre-Submission Local Plan strategy is successful in maximising beneficial effects and minimising negative effects (see Table 27).

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
| Air                         | 0 / - | Expected overall decline in air quality. Diverting<br>development away from problem areas in Hawkhurst is<br>offset by more urban intensification in RTW.<br>Substantial investment in active and sustainable travel<br>methods that encourage a model shift will help lessen<br>this effect. |
| Biodiversity                | 0     | Small losses offset by potential large gains on strategic sites. Net gains policy will also bring benefits.   |
| Business<br>Growth          | + +   | As for the DLP, significant gains are proposed.   |
| Climate<br>Change           | -     | Energy and fuel use from buildings and transport will<br>increase. However, strong climate change policy and<br>renewable energy provision will provide benefits.<br>Reducing development at some rural settlements will<br>have a benefit for transport-related carbon.                      |
| Deprivation                 | + +   | Substantial regeneration in areas of income   |

Table 25. SA scores for Growth Strategy 13: Pre-Submission Local Plan.

| Sustainability<br>Objective | Score | Commentary  |
|-----------------------------|-------|---|
|                             |       | deprivation.  |
| Education                   | + +   | New school provision, expansion plans and safeguarded land for schools will ensure the pressures from new residents are removed.  |
| Employment                  | + + + | Significant numbers of new jobs are proposed  |
| Equality                    | + +   | Majority of development would provide benefits to social mobility and inclusion.  |
| Health                      | + +   | No negative outcomes are likely across the parishes.<br>However, benefits disproportionately favour more<br>urban settlements, largely because residents in urban<br>areas are more likely to be within reach of accessible<br>natural greenspaces. Benefits also highly likely to be<br>realised with master planning of strategic sites.  |
| Heritage                    | -     | As for the DLP, there are a number of small negative impacts upon this objective throughout the borough.  |
| Housing                     | + + + | Strategy will meet standard housing need and local housing needs across the borough.  |
| Land use                    | - /   | The addition of a brownfield site and removal of a greenfield site in RTW is beneficial and slightly improves the overall score from that determined at DLP stage. The score represents large losses of greenfield and Green Belt land.   |
| Landscape                   | -     | Reducing development in both large and small AONB settlements will provide a benefit when compared to the DLP.  |
| Noise                       | -     | Sensitive areas are scattered across borough, but<br>many are in RTW where a large proportion of housing<br>would occur. Lamberhurst, Goudhurst and the A229<br>near Cranbrook also have Important Areas for Road<br>Noise (IARN). However, the smaller villages tend not to<br>be near IARNs so spreading the growth across these<br>locations may help. There is a risk that such large<br>amount of growth would create significant movements<br>in new locations and thus warrant a new IARN. |
| Resources                   | ?     | Choice of materials will be determined at Development<br>Management stage.  |
| Services &                  | 0 / + | This strategy aligns more closely with the Role and Function study, being led by service provision. It would  |

| Sustainability<br>Objective | Score | Commentary   |
|-----------------------------|-------|--|
| Facilities                  |       | improve the positive impacts predicted in urban areas,<br>and reduce the negative impacts expected in remote<br>rural areas.   |
| Travel                      | 0 / + | Reducing development at settlements with poorer<br>travel options such as the smaller villages of Matfield<br>and the AONB settlements and increasing<br>development in urban areas especially where train<br>travel is possible, provides a slight benefit to the travel<br>objective. The strategic sites will also be beneficial in<br>supporting a model shift away from private care<br>dependency. |
| Waste                       | 0     | Neutral score reflecting inability of specific site<br>allocations to influence diversion of household and<br>construction waste from landfill.  |
| Water                       | ?     | As for DLP, meeting the housing need will put<br>increased pressure on existing resources. There is<br>also potential for increased flood risk due to cumulative<br>effects. However, significant betterment of flooding<br>issues at Paddock Wood and Five Oak Green, and<br>policies for other smaller sites, will provide significant<br>positive benefits. Overall score is mixed.                   |

| Sustainability | 1         | 2          | 3     | 4              | 5                 | 6               | 7                   | 8     | 9               | 10          | 11             | 12         | 13    |
|----------------|-----------|------------|-------|----------------|-------------------|-----------------|---------------------|-------|-----------------|-------------|----------------|------------|-------|
| Objective      | No<br>MGB | No<br>AONB | DĽP   | Main<br>Towns  | Main<br>Towns/    | Meet<br>need no | Proporti<br>onal to | -     | Disperse<br>d   | Uncapped    | Uncapp<br>ed & | No<br>Plan | PSLP  |
|                |           | Majors     |       |                | Large<br>Villages | MGB<br>loss     | services            |       | Countrys<br>ide |             | Unmet          |            |       |
| Air            | + +       | +          | 0 / - |                | - /               | 0               | 0                   | 0 / + |                 | -           | -/             |            | 0 / - |
| Biodiversity   | 0 / +     | +          | 0     | 0              | 0                 | 0 / -           | 0                   | 0 / + | -               | 0 / -       | -              |            | 0     |
| Business       |           |            | + +   | + / + +        | +                 | 0 / +           | +                   | +     |                 | +/++        | + +            | ?          | + +   |
| Climate        | 0 / -     | -/         | - /   | -              |                   | /               |                     |       |                 | /           |                |            | -     |

# **Strategic Sites**

- 6.2.18 Accepting that it is clear from this exercise that the Pre-Submission Local Plan is preferable to the alternatives identified, it then became necessary to carry out sustainability appraisals of the various key elements proposed within the development strategy itself. Namely:
  - i. the location chosen for a garden settlement
  - ii. the scale of development for a garden settlement
  - iii. the location chosen for an urban extension
  - iv. the scale of development for an urban extension
  - v. the strategic transport options for the garden settlement and urban extension
- 6.2.19The term 'preferable' is used in this sense to mean the option that has the highest scores for the economic and social pillars, and the least negative scores for the environmental pillar.

### **Strategic Site Locations**

6.2.20 Potential sites for garden settlements and urban extensions in the borough are shown in Figure 5. The locations underwent the same filtering process as that for sites with potential for small scale development (see section 8.1) and are described in Table 27 with an explanation, where applicable, of why options were not considered reasonable to progress to the second assessment stage.

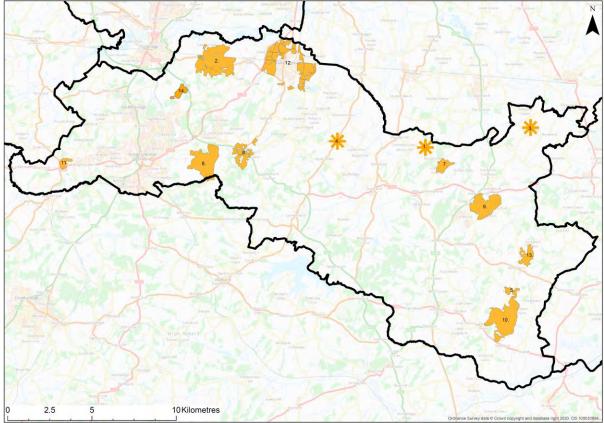

Figure 5. Map of garden settlement options within the Borough. Numbering is explained in Table 27.

Table 27. Garden settlement and urban extension location options considered by this SA.

| Ref | Locations<br>Considered  | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--|--|------------------------------------|
| 1   | Blantyre<br>House<br>(former<br>prison)<br>Goudhurst<br>Parish | This site was submitted as Site DPC_3 and includes a redundant prison and associated buildings, thus is a brownfield site. It is located outside of the LBD for Goudhurst and outside of the AONB. Location has the benefit of being outside of some key constraints and is within reach of the mainline rail at Staplehurst. However, the site is remote from main settlements with very limited road and other infrastructure. Pedestrian access along the narrow winding rural lanes serving the site is very limited both adjacent to the site and further afield. | No                                 |

| Ref | Locations<br>Considered | Explanation of approach taken by SA   | Progress<br>to<br>second<br>stage? |
|-----|-------------------------|---|------------------------------------|
|     |                         | This site was not considered to merit further<br>assessment as a reasonable alternative for a garden<br>settlement for two reasons. Firstly, the scale of site<br>was too small to meet the minimum 1,500 dwellings<br>required for a garden settlement. Secondly, while a<br>previously developed site, it is too poorly located in<br>terms of accessibility to be considered suitable for<br>significant residential development.  |                                    |
|     |                         | Submitted in the call for sites as a combination of site<br>numbers 178, 183, 308, 418, 440, 446, 448, 452, 453<br>and FS_6.  |                                    |
|     |                         | The site is entirely Green Belt and the most recent<br>Green Belt Study concludes the overall harm rating of<br>releasing this land from the Green Belt is high.<br>However, there is scope for compensatory measures<br>such as new hedgerow planting, enhanced pedestrian<br>routes or conversion of fields from arable to grassland.   |                                    |
| 2   | Capel                   | Apart from this, the land is largely outside of key<br>constraints such as the AONB and flood zones and<br>has potential for good road and rail transport links to<br>London and the larger settlements of Tonbridge and<br>Paddock Wood. Cycle and pedestrian links to either of<br>the latter were felt to be possible. Additionally, the total<br>area of the sites combined would be sufficient to<br>provide many services and facilities within the<br>settlement, thus reducing the need for regular travel to<br>other centres. For these reasons, this site was<br>considered to be worthy of further examination. | Yes                                |
|     |                         | NB. Site 178 was in Flood zone 3 and not well related to the other sites and so was not deemed to be a reasonable alternative.  |                                    |

| Ref | Locations<br>Considered | Explanation of approach taken by SA   | Progress<br>to<br>second<br>stage? |
|-----|-------------------------|---|------------------------------------|
|     |                         | Location has the benefit of being outside of key<br>constraints, notably the Green Belt as well as the High<br>Weald AONB, and is not distant from Headcorn which<br>provides a mainline rail link to London.   |                                    |
| 3   | Frittenden              | However, Frittenden itself is a small village with only<br>very limited services and facilities. The nearest<br>settlements are small towns or villages (Staplehurst,<br>Headcorn and Biddenden) and so it is likely that<br>residents would need to travel further afield for many<br>day-to-day needs, secondary education and<br>employment. The very rural location means direct<br>transport links to main settlements and transport hubs<br>are lacking. The existing road network consists only of<br>minor roads and rural lanes and would require<br>substantial investment. | No                                 |
|     |                         | For these reasons, this location was not considered to<br>be capable of being a sustainable option for a new, or<br>substantially new, settlement.  |                                    |
|     |                         | Horsmonden was considered as it is an established<br>village outside the High Weald AONB and the Green<br>Belt. Furthermore, a location was submitted in the call<br>for sites, as site 144.  |                                    |
| 4   | Horsmonden              | This option would involve a substantial increase in<br>Horsmonden applying garden settlement principles.<br>Landscape sensitivity would require further<br>consideration because the site is adjacent to (although<br>outside) the AONB.  | No                                 |
|     |                         | The submitted site does not envelope the existing settlement and thus would not relate well to the existing village, with impacts on local character and  |                                    |

| Ref | Locations<br>Considered   | Explanation of approach taken by SA   | Progress<br>to<br>second<br>stage? |
|-----|---|---|------------------------------------|
|     |   | heritage highly likely. Areas of flood zone 3 on the site would also need consideration.  |                                    |
|     |   | More generally, the only main settlement within reach<br>is Paddock Wood, access to which was considered to<br>be difficult, along unclassified roads and through<br>smaller settlements, to the extent that such substantial<br>development would be unlikely to be supported by<br>suitable transport infrastructure. |                                    |
|     |   | (NB Its potential to make a lesser, but still material,<br>contribution to meeting housing needs was noted and<br>taken into account in the assessment of non-strategic<br>site options.)   |                                    |
| 5   | lden Green  | Submitted in the call for sites as site 437. However, the site is wholly very rural and within the AONB and its landscape impacts were considered too severe to warrant further consideration as a reasonable alternative.  | No                                 |
| 6   | Kippings<br>Cross<br>East of<br>Pembury<br>and adjacent<br>to the<br>northern and<br>southern<br>carriageways<br>of the A21 | Submitted in the call for sites as a combination of site<br>numbers 23, 300, 326, 111, 341, 383, 333, 214 and 65.<br>However, the sites are within the AONB and the<br>landscape impacts were considered too severe to<br>warrant further consideration as a reasonable<br>alternative.                                 | No                                 |
| 7   | Land<br>adjacent to<br>Colliers<br>Green<br>Primary<br>School,  | Submitted in the call for sites as site 325. However, the extremely rural nature of the site, distance to urban settlements and the impacts upon the AONB were considered too severe to warrant further consideration as a reasonable alternative.  | No                                 |

| Ref | Locations<br>Considered  | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--|--|------------------------------------|
|     | Colliers<br>Green  |  |                                    |
| 8   | Land at<br>Great<br>Bayhall<br>East of RTW   | Submitted in the call for sites as site 384. However,<br>the site is within the AONB and its landscape impacts<br>were considered too severe to warrant further<br>consideration as a reasonable alternative.  | No                                 |
| 9   | Land<br>between<br>Cranbrook<br>and<br>Sissinghurst  | Submitted in the call for sites as late site 22. However,<br>the site is within the AONB and its landscape impacts<br>were considered too severe to warrant further<br>consideration as a reasonable alternative.  | No                                 |
| 10  | Land<br>between<br>Sandhurst<br>and Iden<br>Green  | Submitted in the call for sites as site 438. However, the site is within the AONB and its landscape impacts were considered too severe to warrant further consideration as a reasonable alternative.   | No                                 |
| 11  | Langton<br>Green<br>Adjoining<br>western<br>edge of<br>existing<br>development                         | Submitted in the call for sites as late site 23 and<br>DPC21. Location would represent an increase in<br>Langton Green using garden settlement principles with<br>easy access to all the services and facilities that RTW<br>provides. However, the site is within the AONB and its<br>landscape impacts were considered too severe to<br>warrant further consideration as a reasonable<br>alternative.  | No                                 |
| 12  | Land in<br>Paddock<br>Wood and<br>Capel<br>surrounding<br>existing<br>settlement at<br>Paddock<br>Wood | Submitted in the call for sites as a combination of site<br>numbers 20, 47, 51, 79, 142, 212, 218, 309, 310, 311,<br>312, 313, 314, 315, 316, 317, 318, 319, 340, 342, 344,<br>347, 371, 374, 376, 402 and late sites 26, 48, 52,<br>DPC_1, DPC_6, DPC_8, DPC_17 and DPC_19.<br>Land is outside of the AONB and has useful rail and<br>road transport links. There is potential for the existing<br>town to benefit from the substantial investment that | Yes                                |

| Ref | Locations<br>Considered        | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--------------------------------|--|------------------------------------|
|     |                                | new development would bring including resolution of existing flooding problems.  |                                    |
|     |                                | The site is partially Green Belt and the most recent<br>Green Belt Study concludes the overall harm rating of<br>releasing this land from the Green Belt is high.<br>However, there is scope for compensatory measures<br>such as new hedgerow planting, enhanced pedestrian<br>routes or conversion of fields from arable to grassland. |                                    |
|     |                                | For these reasons, this site was considered to warrant further examination as a reasonable alternative.  |                                    |
| 13  | Walkhurst<br>Farm,<br>Benenden | Submitted in the call for sites as site 436. However, the site is within the AONB and its landscape impacts were considered too severe to warrant further consideration as a reasonable alternative.   | No                                 |
|     |                                | Submitted in the call for sites as site 49 or DPC 7. This site was originally considered as potential development site within Capel Parish in line with those described in Chapter 8 and was filtered out at the first stage assessment (see 8.1). This consideration was based on a potential residential yield of 488-976 dwellings.   |                                    |
| 14  | Castle Hill                    | Since this time, the council has been informed of the<br>potential for greater capacity on this site (up to 1,600<br>dwellings) and so the site now warrants consideration<br>amongst the sites in this table as a potential garden<br>settlement.   | No                                 |
|     |                                | To this end, the site is within the AONB and landscape<br>impacts were considered too severe to warrant further<br>consideration as a reasonable alternative.  |                                    |

- 6.2.21 As can be seen from Table 27, the two options deemed appropriate for further appraisal were the larger areas of land submitted in Capel parish and Paddock Wood. As an existing established settlement, it was logical to assess Paddock Wood (with land in east Capel) for a potential urban expansion and especially because the other, larger settlements of RTW, Southborough, Hawkhurst and Cranbrook have many constraints. Similarly, while in the Green Belt, the otherwise largely constraint-free area of land in an accessible location in Capel parish was reasonable to assess as a potential garden settlement location. In both Paddock Wood and Capel, the two key considerations are Green Belt and flood risk with the potential to generate improvements to existing flood risks.
- 6.2.22 The main reasons for not considering the remaining options further were severe landscape concerns, mainly linked to impacts on the High Weald AONB, and/or transport concerns making access to the nearest main settlements very difficult (especially active modes of transport).
- 6.2.23 In terms of AONB landscape issues, the severe impacts cited as being a reason for not considering locations/sites further reflect a combination of the importance of the AONB designation in both legislation and national policy, the particular characteristics of the High Weald AONB, and the circumstances of the respective locations/sites.
- 6.2.24 Of note, while AONB designation does not of itself rule out 'major' growth, this should still be exceptional and, overall, the NPPF sets out that the scale and extent of development in AONBs should be 'limited' (paragraph 172). Indeed, the PPG further states that policies for protecting AONBs may mean that it is not possible to meet objectively assessed needs for development in full through the plan-making process, and they are unlikely to be suitable areas for accommodating unmet needs from adjoining (non-designated) areas (Paragraph: 041 Reference ID: 8-041-20190721).
- 6.2.25 The High Weald AONB's value and special qualities are set out in its current Management Plan. It is described as a 'small-scale' landscape, having a dispersed settlement pattern. Indeed, its Statement of Significance notes the 'Absence of large scale urban extensions, after AONB designation in 1983' as a Key Characteristic in relation to the Settlement component of character.
- 6.2.26 Almost inevitably, it is found that large tracts of land in particular make important contributions to the landscape and scenic beauty of the AONB.
- 6.2.27 In all of the circumstances reviewed, none of the locations/sites in the AONB are regarded as capable of providing the requisite justification for identification for strategic growth in the context of the weight to be given to the landscape objective in the context of overall sustainability objectives.
- 6.2.28 (NB Notwithstanding the above conclusions, further consideration is given to potential smaller scale, but still 'major', developments in relation to a number of settlements below.)

6.2.29 In terms of accessibility, regard has been given to the likely number and length of journeys for work, shopping, education, leisure and other activities. Both existing access by respective modes and the reasonable potential for improvements to transport infrastructure are considered. Access by active travel modes and public transport have been duly weighed, while recognising rural locations in particular will still have a high reliance on the car.

## **Garden Settlement Development Scale**

- 6.2.30 At Draft Local Plan stage, two scales of development were identified in Capel, both of which centred on Tudeley village.
- 6.2.31 One option was for a maximum of 2,800 dwellings straddling the railway line and the other option was for development of approximately 5,000 dwellings following the same pattern but extending southwards where land is not constrained by Flood Zone 3 but is in the AONB and Green Belt.
- 6.2.32 To address concerns raised following consultation in Autumn 2019, it was felt appropriate to assess an additional, smaller option for the development of approximately 1,500 dwellings to south of the railway line and in line with the minimum advocated size of a garden settlement. This smaller option is now referred to as 'Option 1', with Options 2 and 3 referring to the options of increasing scale.
- 6.2.33 A further option of 1,500 dwellings north of the railway line was not considered because it was felt unlikely to be viable from an accessibility standpoint.
- 6.2.34 All three options are shown in Figure 6 and the sustainability appraisal findings are presented in Table 28.

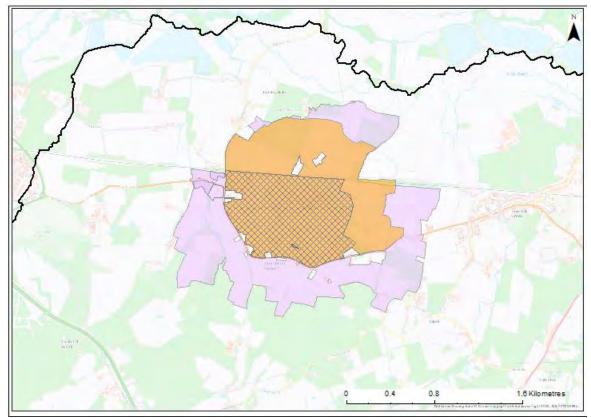

Figure 6. Map of growth options 1 (hatch), 2 (orange) and 3 (purple) for a garden settlement in Capel Parish.

Table 28. SA scores for the two alternative scales of growth of a garden settlement in Capel Parish.

| Sustainability<br>Objective | 1     | 2     | 3        | Commentary  |
|-----------------------------|-------|-------|----------|---|
| Air                         | ?     | ?     | ?        | Air quality is given a mixed score. All options<br>pose a high risk to deterioration of local air<br>quality, with impacts worsening with increasing<br>scale. Traffic would increase substantially for all<br>options and movement of vehicles into Royal<br>Tunbridge Wells via the A26 (existing AQMA) is<br>likely. Likewise, a worsening of the AQMA on<br>Tonbridge High Street must be considered (cross<br>boundary impacts). Conversely, master planning<br>would ensure the new settlement is designed to<br>discourage private car use with active and shared<br>transport options given priority. This would bring<br>large benefits which would improve with<br>increasing scale.                |
| Biodiversity                | 0 / - | 0 / - | -        | Biodiversity constraints such as designated sites<br>are limited. Undesignated habitat such as<br>hedgerows and ponds are likely to be impacted,<br>although a strong commitment to net gains would<br>lessen impacts in the long term. There is no<br>significant risk to Ashdown Forest and no option<br>is within an SSSI Impact Risk Zone. Scores are<br>applied to reflect the constraints in the south<br>(LWS and ancient woodland). Option 1 avoids<br>some ancient woodland to the east but not all so,<br>even with a 30 m buffer, score remains negative<br>overall. The scores depend heavily on the<br>successful implementation of net gains and would<br>be more negative without this policy. |
| Business<br>Growth          | +     | +     | +/+<br>+ | Business scores are all positive and vary to<br>reflect the number of new customers that could<br>support existing businesses. Provision of new<br>business space is likely to be significant.<br>However, this is offset by losses to the rural<br>economy from developing upon agricultural fields.<br>For this reason, positive scores do not reach the<br>maximum.  |
| Climate<br>Change           | -     | -     | -/       | Climate change scores reflect the increase in<br>energy and fuel demands created by the new<br>development with consideration of the fact that a  |

See paragraph 6.2.31 – 6.2.33 for descriptions.

| Sustainability<br>Objective | 1              | 2              | 3        | Commentary  |
|-----------------------------|----------------|----------------|----------|---|
|                             |                |                |          | master planning approach is more likely to implement adaptation measures and support alternative fuels.   |
| Deprivation                 | +              | +              | +        | Deprivation scores positively to reflect the<br>substantial regeneration benefit. Higher scores<br>cannot be applied as the proposals are unlikely to<br>address existing problems of fuel poverty.   |
| Education                   | +/+<br>+       | +/+<br>+       | +/+<br>+ | All new educational pressures created are<br>expected to be met by provision of new or<br>extended schools. Adult education facilities are<br>not considered, and it is expected that Royal<br>Tunbridge Wells would continue to meet this<br>demand.   |
| Employment                  | ++             | ++             | ++       | All options would benefit from new employment<br>space and job creation, which would offset the<br>loss of agricultural jobs from development on<br>agricultural land. However, Capel is not a key<br>ward for a focus on employment so maximum<br>scores cannot be applied.  |
| Equality                    | + + /<br>+ + + | + + /<br>+ + + |          | Equality scores are positive for all options with<br>access to facilities for those with impairments felt<br>to be possible with a strong master planning<br>approach.  |
| Health                      | ++             | ++             | ++       | All options score equally well on the health<br>objective due to the provision of sports facilities<br>that would help improve physical activity rates<br>and the locality meeting 3 out of 5 Accessible<br>Natural Greenspace Standards. It was also felt<br>likely that the proposals for all options would<br>include provision for elderly care services and<br>improvements to accessible greenspace as<br>opposed to existing greenspace which is largely<br>privately owned. |
| Heritage                    |                |                |          | Heritage scores have been updated since Draft<br>Local Plan stage to reflect additional assessment<br>work carried out in 2020 especially regarding All<br>Saints Church. All three scales of settlement<br>would have similar significant effects on the<br>setting of this both this heritage asset and others<br>south of the railway line (e.g. Grove Cottage<br>farmstead). However, for all options it was felt   |

| Sustainability<br>Objective | 1     | 2     | 3     | Commentary   |
|-----------------------------|-------|-------|-------|--|
| -                           |       |       |       | that the master planning approach could help<br>ensure a strategy for enhancements was<br>realised.  |
| Housing                     | +++   | +++   | +++   | All options score the maximum positive on the<br>housing objective for provision of substantial<br>numbers of new dwellings, including affordable<br>and accessible homes. Despite offering varying<br>quantities of new dwellings, the options are not<br>differentiated on this objective because the<br>number of dwellings would still make a significant<br>difference.   |
| Land use                    |       | /-    |       | Substantial loss of greenfield and Green Belt land<br>(albeit with compensation elsewhere) with Best<br>and Most Versatile soils causes all options to be<br>scored negatively for land use. Scores reflect<br>scale of development and Option 3 is slightly<br>worse as release of Green Belt would tend to<br>create coalescence with Five Oak Green. Green<br>Belt release is described as having a harm rating<br>of High.   |
| Landscape                   |       |       | /-    | Landscape scores follow a similar pattern to<br>heritage reflecting encroachment into the AONB<br>in the south and east whilst also recognising that<br>opportunities for management of Green<br>Infrastructure (GI) exist. In Options 1 and 2,<br>development on high ground next to the B2017<br>creates particular risk to the AONB setting<br>(predictions reinforced by 2020 AONB setting<br>report). Option 3 encroaches into the AONB and<br>so scores highly negatively. |
| Noise                       | _     | -/    |       | Noise scores reflect the varying scale of development across the options and the location of development adjacent to the railway line.   |
| Resources                   | 0 / + | 0 / + | 0 / + | Minimal demolition would be necessary to<br>facilitate all options. Choice of materials would be<br>determined at Development Management stage.<br>Master-planning approach for a large<br>development and strong sustainability credentials<br>expected as part of policy wording makes<br>responsible sourcing of materials more likely.   |

| Sustainability<br>Objective | 1   | 2    | 3          | Commentary  |
|-----------------------------|-----|------|------------|---|
| Services &<br>Facilities    | +++ | +++  | ++/<br>+++ | The Services and Facilities objective scores<br>positively for all options reflecting the likely well-<br>thought-out provision in the new settlement as a<br>result of the master planning process. The<br>settlement also benefits from the proximity of<br>enhanced provision at the nearby North Farm<br>retail park, Tonbridge and Royal Tunbridge Wells<br>town centres. However, option 3 is given a<br>slightly lower score to reflect the piecemeal<br>development in the south (to accommodate<br>ancient woodland buffers) rendering new<br>residents more distant from the centre.              |
| Travel                      | + + | + +  | + +        | The Travel scores are applied with consideration<br>of new bus routes and the relatively easy access<br>to train stations.  |
| Waste                       | 0   | 0    | 0          | Waste reduction and diversion of waste from landfill is outside of the scope of all options.  |
| Water                       | +/? | ++/? | ?          | A mixed/positive water scores is applied to<br>options 1 and 2 as they would represent a<br>substantial demand for water and wastewater<br>treatment whilst also providing significant benefits<br>to Five Oak Green in the form of reductions in<br>existing flood risk. The presence of the total<br>catchment of a Groundwater Source Protection<br>Zone north of the railway line also creates a risk<br>that must be carefully managed in options 2 and<br>3. Option 3 would put additional strain on<br>resources without any further improvement to<br>flooding and thus is scores as mixed overall. |

- 6.2.35 In summary, when objectives are divided into the three pillars of sustainable development the following observations can be made:
  - All options score positively for the economic objectives (with Business Growth in Option 3 scoring slightly better to reflect the scale of the development). Option 3 scores slightly less positively for services as development would be more piecemeal in the south and thus some residents may be outside of desirable walking distances to the more central facilities.
  - the environmental objectives scores are more variable with the majority scoring negative (6 objectives). A further two objectives score as mixed and there is 1 neutral objective and one positive objective. Negative scores are a factor of the large scale of development and thus generally score more poorly for Option 3.

- the social objectives are scored positively and the same across all
- 6.2.36 For all options, environmental protection conflicts with economic and social growth, and negative impacts are lessened by developing a garden settlement that is at a smaller scale. The very severe environmental impacts identified for Option 3, call into question the suitability of this Option. It is also noted that the downside of Option 1 is that smaller contributions would be available for improvements in flood risk elsewhere.

### **Urban Extension Development Scale**

- 6.2.37 In Paddock Wood and east Capel, five scales of development were identified (see Figure 7) which all included the existing allocations for sites identified in the 2015 Site Allocations Local Plan (SALP). In order to assess cumulative impacts, the sustainability appraisal has also assessed dwellings being built as part of the SALP.
- 6.2.38 It is noted that the options have been decreased by 500 dwellings across all options since the Draft Local Plan stage to reflect the findings of the master-planning process which is now underway.
- 6.2.39 Option 1 was for the development of approximately 1,500 new dwellings (plus the 1,000 dwellings from the existing SALP sites) without any land take within the Green Belt. Growth here is limited by the borough boundary and the extensive areas of flood zone 3.
- 6.2.40 Option 2 was for development of approximately 3,500 (plus the 1,000 dwellings from the existing SALP sites) dwellings following the same pattern as Option 1 with an additional extension of development westwards into the Capel parish Green Belt and allowing for flood relief work to the town.
- 6.2.41 Option 3 was for approximately 2,500 dwellings (plus the 1,000 dwellings from the existing SALP sites) following the same pattern as Option 1 but extending southwards instead of westwards into land that is not ruled out by constraints such as AONB, Green Belt, flood risk and ancient woodland.
- 6.2.42 Option 4 was for approximately 4,500 dwellings (plus the 1,000 dwellings from the existing SALP sites) following the same pattern as Option 1 but extending both westwards and southwards more than doubling the size of Paddock Wood.
- 6.2.43 Option 5 was for approximately 2,500 dwellings (plus the 1,000 dwellings from the existing SALP sites) following the same pattern as Option 1 but extending eastwards instead of westwards into land that is not ruled out by constraints such as AONB, Green Belt, flood risk and ancient woodland.
- 6.2.44 No further larger options were assessed as it was felt that anything larger would be too distant from the town centre and unlikely to be delivered in the plan period.
- 6.2.45 The sustainability appraisals for these five options are shown below in Table 29.

Figure 7. Map of urban extension options for Paddock Wood including land in east Capel (part 1 of 2).

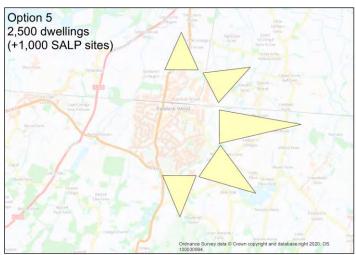

Figure 8. Map of urban extension options for Paddock Wood including land in east Capel (part 2 of 2).

Table 29. SA scores for the four urban extension growth options at Paddock Wood including land in east Capel.

| Sustainability | Opt | Opt | Opt | Opt | Opt |  |
|----------------|-----|-----|-----|-----|-----|--|
| Objective      | ion | ion |     |     |     | Commentary   |
| Objective      | 1   | 2   | 3   | 4   | 5   |  |
| Air            | ?   | ?   | ?   | ?   | ?   | Air quality is given a mixed score. All options pose<br>a high risk to deterioration of local air quality, with<br>impacts worsening as the scale of the development<br>option increases. Traffic would increase<br>substantially with all options and improvements to<br>the road network at Colts Hill would be important<br>for Option 2 and critical for Option 4. Conversely,<br>active and shared transport options would be given<br>large investments and significant betterment could<br>be seen. However, the improvements would<br>always be working within the confines of Paddock<br>Wood town so can never be given the maximum<br>scores. |
| Biodiversity   | 0/  | 0/- | -   | 0/  | 0/  | Generally, biodiversity constraints are limited.<br>There is no risk to the Ashdown Forest and there<br>are 5km SSSI risk zones to the south and north<br>east of the town. Scores are applied to reflect the<br>scale of development, the slight potential for<br>enhancements in the west (existing fields are very<br>large with intensive arable uses and hedgerows<br>are currently more depleted than those on other   |

See paragraphs 6.2.39 to 6.2.43 for descriptions.

| Sustainability<br>Objective | -          | -        | Opt<br>ion<br>3 | -        | Opt<br>ion<br>5   | Commentary  |
|-----------------------------|------------|----------|-----------------|----------|---|---|
|                             |            |          |                 |          |   | sides of PW) and the constraints in the south (LNR, woodland, ponds etc.).  |
| Business<br>Growth          | +          | +/++     | +               | +/<br>++ | +   | Business scores are all positive and vary to reflect<br>the number of new customers that could support<br>existing businesses. Provision of new business<br>space is likely to be significant. However, this is<br>offset by losses to the rural economy from<br>developing upon agricultural fields. For this reason,<br>positive scores do not reach the maximum. |
| Climate<br>Change           | -          | - /      | - /             |          | - /   | Climate change scores reflect the increase in<br>energy and fuel demands created by the scale of<br>each new development with consideration of the<br>fact that a master planning approach is more likely<br>to implement adaptation measures and support<br>alternative fuels.   |
| Deprivation                 | +/++       | +/<br>++ | +/<br>++        | +/<br>++ | <ul> <li>Deprivation scores positively to reflect the substantial regeneration benefit to Paddock Woo</li> <li>+ / town which contains areas of high-income</li> <li>+ + deprivation. However, maximum scores cannot b applied as the proposals are unlikely to address existing problems of fuel poverty.</li> </ul> |   |
| Education                   | + /<br>+ + |          | +/<br>++        |          |   | All new educational pressures created are<br>expected to be met by provision of new or<br>extended schools. Adult education facilities are not<br>considered, and it is expected that Royal<br>Tunbridge Wells would continue to meet this<br>demand.   |
| Employment                  | ++         | ++       | ++              | ++       | ++  | Paddock Wood does not currently have low<br>employment levels so is not a key ward for a focus<br>on employment. However, all options would<br>provide the benefit of new employment space and<br>job creation, which would offset the loss of<br>agricultural jobs from development on agricultural<br>fields.   |

| Sustainability<br>Objective |         | Opt<br>ion<br>2 |      |          | Opt<br>ion<br>5 | Commentary  |
|-----------------------------|---------|-----------------|------|----------|-----------------|---|
| Equality                    | ++      | + +             | +/++ | +/<br>++ | +/++            | Equality scores are generally positive across the options with significant regeneration expected to benefit the areas of income deprivation, and access to facilities for those with impairments felt to be possible with a strong master planning approach. Variations across the options reflect the varying distance that those with impairments would have to travel to reach the central facilities of Paddock Wood. It was felt that the 2-3km distance to the town centre for new residents in the south of development options 3, 4 and 5 could be off-putting. |
| Health                      | ++      | + +             | ++   | ++       | + +             | All options score equally well on the health<br>objective due to the provision of sports facilities<br>that would help improve physical activity rates and<br>the locality meeting 4 out of 5 Accessible Natural<br>Greenspace Standards. It was also felt likely the<br>proposals for all options would include provision for<br>elderly care services and improvements in ANG.  |
| Heritage                    | 0/      | -               | - /  |          | -               | Variation in heritage scores reflect the increasing<br>land take required across the four options and thus<br>negative impacts that would occur largely upon the<br>setting of heritage assets, with assets in the south<br>being most sensitive. However, for all options it<br>was felt that the master planning approach could<br>help ensure a strategy for enhancements was<br>realised.   |
| Housing                     | ++<br>+ | ++<br>+         | ++++ | ++<br>+  | ++++            | All options score the maximum positive on the<br>housing objective for provision of substantial<br>numbers of new dwellings including affordable and<br>accessible. Despite offering varying quantities of<br>new dwellings, the 4 options are not differentiated<br>on this objective because, even the option with the<br>lowest numbers would still make a significant<br>difference.  |

| Sustainability           | -     | -          | -        | -          | Opt   | Commentary  |
|--------------------------|-------|------------|----------|------------|---|---|
| Objective                | ion   | ion<br>2   | ion<br>3 | ion<br>4   | ion<br>5  | Commentary  |
| Land use                 |       | <br>/<br>_ |          | <br>/<br>- |   | Loss of greenfield land with Best and Most<br>Versatile soils causes all options to be scored<br>negatively for land use. However, options 2 and 4<br>are slightly worse as also include the release of<br>Green Belt land with overall harm rating of High.  |
| Landscape                | -     | - /        |          |            | <ul> <li>Landscape scores follow a similar pattern to heritage reflecting encroachment into the High Weald Character Area in the south. 2020 AONB setting report reinforces the more negative score for Options 3 and 4 which have potential to adversely affect the AONB by extended development further south, and to a slightly lesse extent Option 5 through extensions to the east which would be visible from the 'Millennium Viewing Point' to the north of Matfield. Option 2 score has been worsened slightly since Draft Loo Plan as a result of consultation exercise and to better reflect the scale of development.</li> </ul> |   |
| Noise                    | -     | - /<br>    | - /      |            | - /   | Noise scores reflect the varying scale of<br>development across the four options and the<br>location of development adjacent to the railway<br>line.  |
| Resources                | 0 / + | 0 /<br>+   | 0 / +    | 0 /<br>+   | 0 / +   | Minimal demolition would be necessary to facilitate<br>any of the options. Choice of materials would be<br>determined at Development Management stage.<br>Master-planning approach for a large development<br>and strong sustainability credentials expected as<br>part of policy wording makes responsible sourcing<br>of materials more likely. Impact on Superficial Sub-<br>Alluvial River Terrace deposits would require<br>investigation. |
| Services &<br>Facilities | ++    | + +        | +        | +          | +   | Services and Facilities score positively for all<br>options reflecting the reasonable range of services<br>in Paddock Wood and fact that some services<br>would be outside of desirable walking distances for<br>some new residents (e.g. health centre). However,<br>options 3, 4 and 5 are given lower scores to reflect<br>the piecemeal development in the south and east<br>(around ancient woodland and flood zone 3)                     |

| Sustainability<br>Objective | - | -        | Opt<br>ion<br>3 | -    | Opt<br>ion<br>5 | Commentary   |
|-----------------------------|---|----------|-----------------|------|-----------------|--|
|                             |   |          |                 |      |                 | rendering new residents quite distant from<br>Paddock Wood town.   |
| Travel                      | + | +        | +               | +    | +               | Travel scores are applied following a similar logic to air quality.  |
| Waste                       | 0 | 0        | 0               | 0    | 0               | Waste reduction is generally felt to be outside of<br>the scope of the development proposed for all<br>options.  |
| Water                       | ? | ++<br>/? | ?               | ++/? | ?               | A mixed water scores is applied equally across the<br>options as all would represent a substantial<br>demand for water and wastewater treatment, and<br>all would provide significant benefits to Paddock<br>Wood and Capel in the form of reductions in<br>existing flood risk. The benefits could be slightly<br>greater in options 2 and 4 where development is<br>directed to the areas of flood zone 2 and 3 west of<br>Paddock Wood (in east Capel). An improvement to<br>flooding issues for existing residents is one of the<br>key justifications for the proposed release of this<br>Green Belt land on the west side of the settlement. |

6.2.46 In summary, when objectives are divided into the three pillars of sustainable development the following observations can be made:

- the economic objectives mostly score positively for all options with Business Growth in Options 2 and 4 scoring slightly better to reflect the scale of the development (offset with losses to the rural economy). The one exception to this pattern is the services objective which reduces in positivity to reflect the increasing scale of development across the five options with more piecemeal in the south and east meaning some residents may be outside of desirable walking distances to the central facilities.
- most of the environmental objectives score as mixed, negative or neutral with the exception of resources (to reflect insignificant or no requirement for demolition) and water (to reflect the flood betterment possible for Paddock Wood). Negative scores are mostly a factor of the large scale of development and thus score most poorly for Option 4. However, land use and biodiversity are an exception to this rule with scores across the options varying to reflect the position of development around Paddock Wood (including land in Capel parish) and the opportunities or constraints the development positions provide.

- the social objectives are scored positively and the same across all objectives except equality which reduces in positivity to reflect the increasing scale of development across the five options with more piecemeal development in the south and east meaning some residents may be outside of desirable walking distances to the central facilities.
- 6.2.47 As for Tudeley Village, environmental protection conflicts with economic and social growth in all options and adverse impacts are reduced by developing an urban extension that is at a similar scale to Options 1 or 2. Between these, Option 2 has three objectives that score more positively than Option 1 (including the mixed benefits from the water objective), and 5 objectives that score more negatively than Option 1 (reflecting development scales and locations).
- 6.2.48 Ultimately, the scale of development at Paddock Wood and east Capel was not differentiated for the housing objective across the four options in the SA as all options would make substantial contributions. It is noted that housing is of great importance in meeting targets and options that not only meet targets but also improve the flood risk for existing residents will be highly weighted. The channel realignment needed to improve flood risk is on land in the west and thus cannot be implemented in Option 1.
- 6.2.49 Drawing on the above draft findings and other, more detailed assessments, which point towards Option 2 being favoured, further consideration is given to related transport infrastructure below.

#### **Strategic Transport Options**

- 6.2.50 In order to successfully deliver the strategic sites, highways and infrastructure assessments demonstrate that improvements to the transport network would be required. This included consideration of:
  - The A228 between B2017 and Maidstone Road Pembury junctions
  - Links from Tudeley Village east to the A228
  - Links from Tudeley Village west to Tonbridge
  - Links from Paddock Wood and east Capel Urban Extension west onto the adjacent A228
- 62.51 The options to deliver these are listed below in Table 30. The accompanying SA scores are shown in Table 31 to Table 34.

Table 30. Transport network improvement options serving the strategic sites considered by the SA.

| C | Option  | s are considered             | d for the A228 alone (1), east of the garden settlement (2 | 2),    |
|---|---------|------------------------------|--|--------|
| V | vest of | <sup>f</sup> the garden sett | tlement (3) and west of the urban extension (4).           |        |
|   |         |                              |  | Dreare |

| Ref | Improvement<br>Considered  | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--|--|------------------------------------|
| 1a  | A228<br>Strategic Link<br>which by-<br>passes Colts<br>Hill.                               | This route has been through detailed optioneering<br>work by Kent Highways and has been safeguarded<br>since 2006 to address existing problems with highway<br>safety and peak congestion and formed a draft policy<br>in the Draft Local Plan.<br>The route would be located west of the existing<br>carriageway on old orchard. It would involve<br>substantial land take and avoids negative impacts on<br>heritage assets 0along the existing carriageway.<br>The route allows for a minimum 30m buffer for<br>pockets of ancient woodland. Approximately 2/3 <sup>rd</sup> of<br>the route is within the AONB and the route is on<br>grade 2 and 3 agricultural soils.<br>There are far reaching views to the west and the<br>route is within the Green Belt. | Yes                                |
| 1b  | Colts Hill<br>online<br>improvements<br>including<br>offline loop<br>and new<br>roundabout | This option includes widening of the existing<br>carriageway in problem areas and an offline loop<br>around an existing cluster of dwellings north of Alders<br>Road.<br>Demolition of an existing derelict building would be<br>necessary. The offline loop allows for a minimum 30m<br>buffer for pockets of ancient woodland, is on grade 3<br>agricultural soils and adjacent to the AONB border to<br>the south. There would be some loss of roadside<br>trees.<br>There are far reaching views to the west and the<br>improvements and offline loop are within the Green<br>Belt.  | Yes                                |

| Ref | Improvement<br>Considered  | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--|--|------------------------------------|
| 1c  | Colts Hill<br>online<br>improvements   | This option includes widening of the existing carriageway in problem areas.<br>There are far reaching views to the west and the improvements are within the Green Belt.  | Yes                                |
| 2a  | Online<br>improvements<br>to existing<br>road network  | This option would involve widening Alders Road<br>which is a single carriageway rural lane. It would<br>require substantial loss of trees and hedgerows which<br>currently act as the border to the AONB. The road is<br>within the Green Belt and crosses a section of flood<br>zone 2 and 3.   | Yes                                |
| 2b  | New<br>carriageway<br>from Five Oak<br>Green to the<br>A228 via an<br>offline A228<br>loop around<br>the hamlet<br>north of the<br>Alders Rd<br>junction | This option involves the creation of approximately<br>2.2km carriageway (including the hamlet loop).<br>The route is likely to require a new bridge to be built<br>to traverse Alders Stream and an existing area of<br>flood zone 2 and 3 and is unlikely to be a risk to any<br>sites designated for biodiversity interest but does<br>represent non designated habitat severance. The<br>majority of the new carriageway would be on grade 2<br>agricultural soils.<br>The AONB is approximately 500m south and<br>setting/boundary issues may be present.<br>There are far reaching views to the west and the<br>route is within the Green Belt. | Yes                                |
| 2c  | New<br>carriageway<br>from Five Oak<br>Green which<br>connects<br>directly to the<br>A228  | This option involves the creation of approximately<br>1.8km carriageway.<br>The route is likely to require a new bridge to be built<br>to traverse Alders Stream and an existing area of<br>flood zone 2 and 3 and is unlikely to be a risk to any<br>sites designated for biodiversity interest but does<br>represent non designated habitat severance. The<br>majority of the new carriageway would be on grade 2<br>agricultural soils.   | Yes                                |

| Ref | Improvement<br>Considered  | Explanation of approach taken by SA  | Progress<br>to<br>second<br>stage? |
|-----|--|--|------------------------------------|
|     |  | The AONB is approximately 500m south and setting/boundary issues may be present.   |                                    |
|     |  | There are far reaching views to the west and the<br>route is within the Green Belt. There is a grade II<br>listed building in the hamlet north of the Alders Road<br>Junction (Colts Hill Farmhouse).  |                                    |
| 2d  | New<br>carriageway<br>from A228 to<br>north of<br>Tudeley<br>Village | This option would involve the creation of a carriageway of approximately 2.7km that travels north of the railway to reach the northern portion of the garden settlement. The route is within the Green Belt.<br>The majority of this route would be in flood zone 3.   | Yes                                |
| 3   | Online<br>improvements<br>to B2017                                   | This option involves widening to allow for buses and<br>upgrading the junction with Hartlake Road and the<br>A26.<br>The route is reasonably direct and avoids existing<br>constraints, although there may be some loss of<br>roadside hedgerows and trees. No further reasonable<br>alternatives were identified that could avoid existing<br>constraints (ancient woodland). | Yes                                |
| 4   | Online<br>improvements<br>to existing<br>highway<br>network          | This option involves upgrading the junction of the<br>A228 with the B2160, upgrading the single lane links<br>around the urban extension, upgrading the junction<br>between the B2017 and the B2160.<br>No further reasonable alternatives were identified.  | Yes                                |

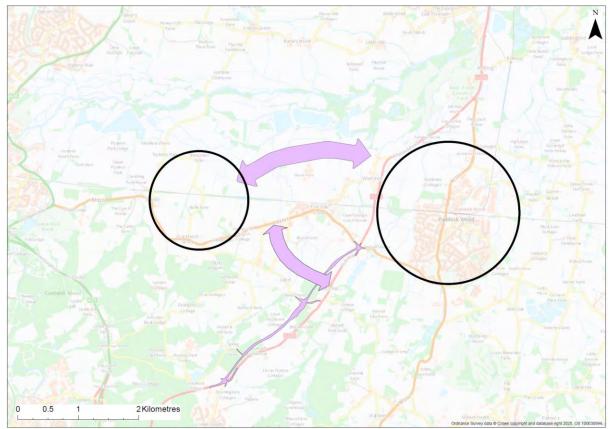

Figure 9. Transport options for the strategic sites.

Table 31. SA scores for the two alternative approaches to addressing existing and future highways safety and peak congestion on the A228.

| Sustainability<br>Objective | 1a    | 1b    | 1c    | Commentary  |
|-----------------------------|-------|-------|-------|---|
| Air                         | 0 / + | 0 / + | 0 / + | All options capable of delivering improvements.   |
| Biodiversity                |       | 0/-   | 0/-   | Reduced land take for option 1b and 1c but still some loss of roadside hedges and trees.                                |
| Business<br>Growth          | 0 / + | 0 / + | 0 / + | Improved since Draft Local Plan stage to<br>better reflect likely benefit to local businesses<br>of reduced congestion. |
| Climate Change              | ?     | ?     | ?     | Mixed score. Improved congestion will reduce idling but also encourage faster speeds.                                   |
| Deprivation                 | 0     | 0     | 0     | No direct impact.   |
| Education                   | 0     | 0     | 0     | No direct impact.   |

See Table 30 for description of each approach.

| Sustainability<br>Objective | 1a       | 1b       | 1c    | Commentary  |
|-----------------------------|----------|----------|-------|---|
| Employment                  | +        | 0 / +    | 0 / + | 1a offers greatest opportunity for jobs in construction.  |
| Equality                    | 0        | 0        | 0     | No direct impact.   |
| Health                      | 0        | 0        | 0     | No direct impact.   |
| Heritage                    | -        | 0 / -    | -     | Reduced land take for options 1b and 1c.<br>Option 1c is likely to cause harm to a heritage<br>asset (Grade II listed building).        |
| Housing                     | 0        | 0        | 0     | No direct impact.   |
| Land use                    |          | -        | 0/-   | Reduced land take for options 1b and 1c.  |
| Landscape                   |          | -        | -     | All options within or adjacent to the AONB.   |
| Noise                       | +/+<br>+ | +        | 0 / + | All are likely to bring benefits as will involve<br>resurfacing. 1b and 1c would have lower<br>speeds but be nearer existing dwellings. |
| Resources                   | 0/?      | 0/?      | 0/?   | Demolition required is for a redundant building.  |
| Services &<br>Facilities    | 0        | 0        | 0     | No direct impact.   |
| Travel                      | +++      | +/+<br>+ | +     | Improvement inherent to each option. Option<br>1a likely to be most successful solution for all<br>transport modes.                     |
| Waste                       | 0        | 0        | 0     | No direct impact.   |
| Water                       | 0        | 0        | 0     | No direct impact.   |

Table 32. SA scores for the four alternative approaches to facilitate transport links from Tudeley Village east to the A228.

| Sustainability          |       | 2b  | 2c    | 2d | Commentary  |
|-------------------------|-------|-----|-------|----|---|
| <b>Objective</b><br>Air | 0 / + | +   | 0 / + | +  | All options capable of delivering<br>improvements. Options 2b and 2d would<br>divert traffic around the A228 hamlet.<br>Lack of sensitive receptors here prevents<br>the score deteriorating further.                     |
| Biodiversity            |       | - / | -/    |    | Scores reflect the necessary land take<br>and loss of non-designated habitats.<br>Option 2a would require substantial loss<br>of roadside trees and hedgerows. Options<br>2b, 2c and 2d are predominantly arable<br>land. |
| Business<br>Growth      | 0     | 0   | 0     | 0  | Improvements would facilitate increased<br>growth only. There are no significant<br>existing congestion problems that are<br>preventing business growth.  |
| Climate<br>Change       | ?     | ?   | ?     | ?  | Mixed score. Improved congestion will reduce idling but also encourage faster speeds.   |
| Deprivation             | 0     | 0   | 0     | 0  | No direct impact.   |
| Education               | 0     | 0   | 0     | 0  | No direct impact.   |
| Employment              | 0 / + | +   | +     | +  | 2a offers least opportunity for jobs in construction as is a simpler solution with no new carriageway to be constructed.  |
| Equality                | 0     | 0   | 0     | 0  | No direct impact.   |
| Health                  | 0     | 0   | 0     | 0  | No direct impact.   |
| Heritage                | -/    | -   | -/    | -  | Options 2a and 2c are more likely to have<br>a direct effect on the setting of heritage<br>assets (listed buildings and historic<br>farmsteads).  |
| Housing                 | 0     | 0   | 0     | 0  | No direct impact.   |

See Table 30 for description of each approach.

| Sustainability<br>Objective | 2a       | 2b    | 2c       | 2d       | Commentary   |
|-----------------------------|----------|-------|----------|----------|--|
| Land use                    | 0 / -    | -/    | -/       |          | All options within MGB. Reduced land<br>take for option 2a. Option 2b, 2c and 2d<br>are likely to affect grade 2 soils   |
| Landscape                   | 0 / -    | -/    | -/       | -/       | Impacts worsen closer to the AONB in the south and with the increased land take.   |
| Noise                       | 0 / -    | 0 / + | 0 / +    | 0 / +    | 2a offers less opportunity for<br>improvement as new surfacing is unlikely<br>to be installed. Option 2b, 2c and 2d<br>divert traffic away from quiet rural lanes.                   |
| Resources                   | 0/?      | 0/?   | 0/?      | 0/?      | Demolition likely to be avoidable.   |
| Services &<br>Facilities    | 0        | 0     | 0        | 0        | No direct impact.  |
| Travel                      | +/+<br>+ | +++   | +/+<br>+ | +/+<br>+ | Improvement inherent to all options. 2b<br>likely to be more successful solution for<br>all transport modes (redundant<br>carriageway at hamlet can be devoted to<br>active travel). |
| Waste                       | 0        | 0     | 0        | 0        | No direct impact.  |
| Water                       | 0/-      | 0/-   | 0/-      |          | All options present risk to flooding. 2d is almost entirely within Flood zone 2 and 3.   |

Table 33. SA scores for the proposed transport links improvements from Tudeley Village west to Tonbridge.

See Table 30 for description (Ref 3).

| Sustainability<br>Objective | Score | Commentary  |  |
|-----------------------------|-------|---|--|
| Air                         | 0 / + | Widening will prevent congestion.   |  |
| Biodiversity                | 0 / - | Some loss of roadside hedges and trees is likely.   |  |
| Business Growth             | 0     | Improvements would facilitate increased growth<br>only. There are no significant existing congestion<br>problems that are preventing business growth. |  |
| Climate Change              | ?     | Mixed score. Improved congestion will reduce idling but also encourage faster speeds.   |  |

| Sustainability<br>Objective | Score | Commentary                                     |  |
|-----------------------------|-------|--|--|
| Deprivation                 | 0     | No direct impact.                              |  |
| Education                   | 0     | No direct impact.                              |  |
| Employment                  | 0 / + | Temporary jobs during construction phase only. |  |
| Equality                    | 0     | No direct impact.                              |  |
| Health                      | 0     | No direct impact.                              |  |
| Heritage                    | 0     | No significant impacts.                        |  |
| Housing                     | 0     | No direct impact.                              |  |
| Land use                    | 0/-   | Small loss of MGB land, greenfield and soils   |  |
| Landscape                   | 0/-   | Minor impact on local character                |  |
| Noise                       | 0     | No significant impact.                         |  |

| Services &<br>Facilities    | 0     | No direct impact.                              |  |
| Travel                      | +/++  | Improvements inherent in design.               |  |
| Waste                       | 0     | No direct impact.                              |  |
| Water                       | 0     | No direct impact.                              |  |

Table 34. SA scores for the proposed transport links improvements from PaddockWood and east Capel urban extension west to the adjacent A228.

| Sustainability<br>Objective | Score | Commentary  |  |
|-----------------------------|-------|---|--|
| Air                         | 0 / + | Improvements will prevent congestion.   |  |
| Biodiversity                | 0     | No significant impacts  |  |
| Business Growth             | 0 / + | Improved since Draft Local Plan stage to better reflect likely benefit to local businesses of reduced congestion. |  |
| Climate Change              | ?     | Mixed score. Improved congestion will reduce idling but also encourage faster speeds.                             |  |

| Sustainability<br>Objective | Score | Commentary                                     |  |
|-----------------------------|-------|--|--|
| Deprivation                 | 0     | No direct impact.                              |  |
| Education                   | 0     | No direct impact.                              |  |
| Employment                  | 0 / + | Temporary jobs during construction phase only. |  |
| Equality                    | 0     | No direct impact.                              |  |
| Health                      | 0     | No direct impact.                              |  |
| Heritage                    | 0     | No significant impacts.                        |  |
| Housing                     | 0     | No direct impact.                              |  |
| Land use                    | 0 / - | Small loss of MGB land, greenfield and soils   |  |
| Landscape                   | 0 / - | Minor impact on local character                |  |
| Noise                       | 0     | No significant impact.                         |  |
| Resources                   | 0     | No significant impact.                         |  |
| Services &<br>Facilities    | 0     | No direct impact.                              |  |
| Travel                      | +/++  | Improvements inherent in design.               |  |
| Waste                       | 0     | No direct impact.                              |  |
| Water                       | 0     | No direct impact.                              |  |

- 6.2.52 In conclusion, option 1b (online improvements and additional offline loop) provides a slightly better outcome than options 1a (new strategic link) and 1c (online improvements only) when considering how to upgrade the A228 to both solve existing problems (particularly highway safety) and to support future development.
- 6.2.53 Options 2a (online improvements), and 2b and 2c (new carriageways to Five Oak Green) have some similar scores. However, biodiversity, employment and noise impacts are predicted to be worse for Option 2a. In addition, air, heritage and travel impacts for 2a are either equal to or worse than option 2b or 2c. Land use and landscape are scored better for Option 2a largely reflecting the reduced land take required for Option 2a.
- 6.2.54 When comparing the outcome of scores for options 2b (hamlet loop) and 2c (direct connection onto the A228), 2b scores better for the travel, heritage, and air objectives. All other objectives have identical scores for both options.

- 6.2.55 When comparing the scores for options north or south of the railway, option 2d scores very poorly on the water objective due to the extensive areas of flood zone 2 and 3 that would need to be traversed. Option 2d is also scored slightly worse on the land use and biodiversity objectives reflecting the slightly greater land take required for this option. The remaining objectives are scored either equal to 2b or slightly better than option 2c.
- 6.2.56 The proposed transport improvements west of Tudeley Village and Paddock Wood and east Capel both produce a reasonable range of scores, largely neutral and with no significant negative impacts predicted.

# 7. SA of the Strategic Policies

# 7.1 Background and Method

- 7.1.1 In addition to the Development Strategy (and related place shaping strategies), 9 further strategic policies were developed for the Pre-Submission Local Plan. These are as follows:
  - STR 2 Place Shaping and Design
  - STR 3 Brownfield Land
  - STR 4 Ensuring Comprehensive Development
  - STR 5 Infrastructure and Connectivity
  - STR 6 Transport and Parking
  - STR 7 Climate Change
  - STR 8 Conserving and Enhancing the Natural, Built and Historic Environment
  - STR 9 Green Belt
  - STR 10 Neighbourhood Plans
- 7.1.2 Sustainability appraisals for each of these policies (except Strategic Policy 9: Green Belt) were carried out following the standard method described in Chapter 4.
- 7.1.3 Strategic Policy 9 related to specific releases of Green Belt land and so it was deemed appropriate to carry out a cumulative impact assessment of all sites allocated within the Pre-Submission Local Plan that included release of Green Belt land. The methodology for this is found at Appendix E.
- 7.1.4 For the remaining 8 polices, an alternative was assessed in which the policy was not included within the Pre-Submission Local Plan. Instead, the alternative placed reliance on a combination of national policies in the NPPF and its related Planning Practice Guidance, together with any relevant detailed policies proposed in the Pre-Submission Local Plan. In addition, where the policy wording in the Pre-Submission Local Plan was deemed to be materially different from that in the Draft Local Plan stage, this was assessed as a further alternative. Of note:
  - Policy STR 2: Design is a strong theme in both the Local Plan, as reflected by both the place shaping policies and the Environment and Design policies, and the NPPF. The appraisal reflects the strategic focus provided by STR 2. Since Draft Local Plan stage, this policy has been amended to include reference to healthy lifestyles. Therefore, the Pre-Submission Local Plan policy version has been appraised as a further alternative.

- Policy STR 3: Brownfield sites are limited in the borough and so there is high pressure to develop on less favourable greenfield land. Given the numerous environmental constraints in the borough, a strategic priority to develop on brownfield land goes further than would be possible relying on a 'no policy' approach in line with the NPPF.
- Policy STR 4: The NPPF provides little explicit coverage of comprehensive development, except in relation to design. Pre-Submission Local Plan policy EN1 focuses on design principles, while other policies address other local sustainability issues and allocations generally cross-refer to them, albeit not in relation to working with different land ownership patterns to secure effective delivery. Since Draft Local Plan stage, this policy has been made more holistic, helping to avoid piecemeal development and therefore the Pre-Submission Local Plan policy version has been appraised as a further alternative.
- Policy STR 5: Identifying and coordinating the provision of infrastructure is highlighted as being critical to meeting economic objectives in the NPPF and is regarded as a strategic matter. It covers a wide range of infrastructure and supports seeking appropriate provision or contributions through development. This provides the basis of the 'no policy' option. Since Draft Local Plan stage, this policy has been updated to be broader with greater consideration of sports, recreation and community services and therefore the Pre-Submission Local Plan policy version has been appraised as a further alternative.
- Policy STR 6: The NPPF gives particular attention to sustainable transport, while individual Pre-Submission Local Plan allocations address site-specific issues. However, STR 6 takes a holistic and strongly "active travel" position applied to local circumstances. The respective appraisals reflect this distinction. Since Draft Local Plan stage, this policy has been updated to be more flexible and with greater emphasis on sustainable and active transport and therefore the Pre-Submission Local Plan policy version has been appraised as a further alternative.
- Policy STR 7: Mitigation and adaptation to climate change is supported in the NPPF but the NPPF has not been updated since many Local Authorities declared climate emergencies and set targets to become carbon neutral. Like many authorities, the target for Tunbridge Wells Borough is more ambitious than that set out in the 2008 Climate Change Act (amended 2019) and the policy has been appraised on this basis. This policy is a new addition to the Pre-Submission Local Plan.
- Policy STR 8: The Pre-Submission Local Plan policy is compared to a No Policy option which relies on the NPPF and site-specific policies and relevant non-strategic policies for all aspects of the environment. Since Draft Local Plan stage, this policy has been updated to include stronger wording on landscape and archaeology and therefore the Pre-Submission Local Plan policy version has been appraised as a further alternative.

- Policy STR 9: The NPPF provides thorough coverage of Green Belt issues although, as stated above, the policy is based on making the releases set out in the Pre-Submission Local Plan, so is appraised on that basis, effectively as a cumulative assessment of the relevant individual development allocations. Alternatives to this strategy for Green Belt release are discussed in relation to STR 1: the development strategy.
- Policy STR 10: Neighbourhood planning is well supported through the NPPF, and this provides the basis of the alternative to STR 10 (which elaborates on the regard to neighbourhood plans). The amendments made to this policy since Draft Local Plan stage are not considered to be significant enough to warrant appraising the Pre-Submission Local Plan version as a stand-alone alternative.

# 7.2 Results

- 7.2.1 The sustainability appraisals for Strategic Policies 2 10 are shown below in Table 35, Table 36, Table 37, Table 38, Table 39, Table 40, Table 41, Table 42 and Table 43.
- 7.2.2 The full cumulative impact assessment which was used to derive the scores for STR 9 Green Belt can be seen in Appendix E.

| Sustainability<br>Objective | No policy | Draft Local Plan<br>Policy | Pre-Submission<br>Local Plan Policy |
|-----------------------------|-----------|----------------------------|-------------------------------------|
| Air                         | 0         | + +                        | + +                                 |

#### Commentary

Scores reflect promotion of sustainable design standards which will be compatible with all the Sustainability Appraisal objectives deemed important for the borough, albeit maximum scores are not applied because the use of these "high" standards is not guaranteed. There is currently no policy of this type in the existing Local Plan or Core Strategy and thus without it these benefits would not be realised.

The new reference to healthy lifestyles in the Pre-Submission Local Plan Policy, helps create a better score for the health objective.

| Sustainability<br>Objective | No policy | New Policy |
|-----------------------------|-----------|------------|
| Air                         | +         | + +        |
| Biodiversity                | +         | + +        |
| Business Growth             | 0         | 0          |
| Climate Change              | +         | + +        |
| Deprivation                 | 0         | 0          |
| Education                   | 0         | 0          |
| Employment                  | +         | + +        |
| Equality                    | +         | + +        |
| Health                      | 0         | 0          |

Table 36. SA findings for Strategic Policy 3: Brownfield Land.

| Housing               | +   | +     |
|-----------------------|-----|-------|
| Land use              | + + | + + + |
| Landscape             | +   | + +   |
| Noise                 | 0   | 0     |
| Resources             | +   | + +   |
| Services & Facilities | + + | + + + |
| Travel                | + + | + + + |
| Waste                 | 0   | 0     |
| Water                 | 0   | 0     |

#### Commentary

The aim of this proposed new policy is to encourage the efficient use of land and existing buildings. For this reason, it aligns well with the land use and resources objectives. There are also numerous co-benefits from facilitating development on brownfield land such as diverting development away from greenfield sites which generally have a higher biodiversity and landscape value. Likewise, brownfield sites tend to be located within reach of reasonable facilities and services which are often accessible without the use of private cars.

Whilst the allocation policies withing the Local Plan are likely to favour brownfield sites, the inclusion of a strategic policy such as this provides more certainty and focus, and thus reduces the risk of negative impacts upon these features.

| Sustainability<br>Objective | No policy | Draft Local Plan<br>Policy | Pre-Submission<br>Local Plan Policy |

Table 37. SA findings for Strategic Policy 4: Ensuring Comprehensive Development.

### Commentary

Promoting comprehensive development, master planning and potential use of compulsory purchase powers clearly offer greater opportunities for improved service provision and better integration between buildings, social settings, and their surrounding environments. These are reflected in the better, or at least equal, scores across all sustainability objectives.

It follows that without the policy, the potential for producing a sustainable development would not be realised.

The Pre-Submission Local Plan policy amendment offers improvements on the Draft Local Plan version as takes a more holistic approach, helping to avoid piecemeal development and thus covering potential issues such as under-provision of affordable housing, inefficient drainage, multiple unnecessary accesses. However, as shown, these further potential benefits cannot be reflected in the scores as they are already at the maximum of the positive range.

| Sustainability<br>Objective | No policy | Draft Local Plan<br>Policy | Pre-Submission<br>Local Plan Policy |
|-----------------------------|-----------|----------------------------|-------------------------------------|
| Air                         | +         | + +                        | + +                                 |
| Biodiversity                | +         | + +                        | ++                                  |
| Business Growth             | +         | ++                         | ++                                  |
| Climate Change              | ?         | ?                          | ?                                   |
| Deprivation                 | +         | + +                        | + +                                 |

Table 38. SA findings for Strategic Policy 5: Infrastructure.

#### Commentary

Most scores applied represent either direct benefits (e.g. water, education, services) or indirect benefits from the policy (e.g. biodiversity may improve with increased provision of green and blue infrastructure, air quality may improve with provision of highway improvements that deter private car use). Where benefits cannot be guaranteed a slightly less positive score has been applied. Several objectives are unknown as it is difficult to predict impacts without locational details. In addition, unknown scores are applied to the climate change objective to reflect the lack of guarantee that is required in both the NPPF and the one specific site for renewable

energy. The Pre-Submission Local Plan policy scores more positively on the health objective than the Draft Local Plan Policy to reflect the incorporation of expectations for sport and recreation.

Overall, without this policy, the many improved scores, and associated benefits would not be realised.

| Sustainability<br>Objective | No policy | Draft Local Plan<br>Policy | Pre-Submission<br>Local Plan Policy |
|-----------------------------|-----------|----------------------------|-------------------------------------|
| Air                         | +         | + + +                      | + + +                               |
| Biodiversity                | ?         | +                          | +                                   |
| Business Growth             | +         | +++                        | +++                                 |

| Services & Facilities       | +         | +                          | +                                   |
| Travel                      | + +       | +++                        | +++                                 |
| Waste                       | 0         | 0                          | 0                                   |
| Water                       | 0         | 0                          | 0                                   |

Table 39. SA findings for Strategic Policy 6: Transport.

#### Commentary

Most scores applied represent either direct benefits (e.g. air, noise, climate change and travel) or indirect benefits from the policy (e.g. biodiversity and landscape may improve with increased provision of green infrastructure accommodating walking and cycling routes). The strong active travel focus of the policy increases the benefits relative to the 'no policy' option.

There are elements of the Pre-Submission Local Plan policy that are an improvement upon the Draft Local Plan policy e.g. the commitment to low traffic

neighbourhoods. However, this is not reflected in the scores because the earlier policy was itself very positive and had already attained the maximum positive score.

The SA scores for specific elements of this policy such as a Five Oak Green bypass are considered in Chapter 6.

| Sustainability<br>Objective | No policy | New Policy |
|-----------------------------|-----------|------------|
| Air                         | + +       | +++        |

#### Table 40. SA findings for Strategic Policy 7: Climate Change

#### Commentary

Addressing climate change is one of the core land use planning principles of the NPPF and a statutory duty for local planning authorities under the Climate Change Act 2008 and Section 19(1A) of the Planning and Compulsory Purchase Act 2004. It is also a central consideration within sustainable development with far reaching effects on the natural environment, economic growth and communities. Thus, it is expected that clear direct and indirect benefits will be seen even without a strategic policy on this topic. The addition of a policy that recognises and supports the borough target to reach carbon neutrality (ahead of the targets within the Climate

Change Act) will bring about benefits more quickly and allow greater recovery time for features such as biodiversity that are already feeling the impact of climate change.

| Sustainability<br>Objective | No policy | Draft Local Plan<br>Policy | Pre-Submission<br>Local Plan Policy |
|-----------------------------|-----------|----------------------------|-------------------------------------|
| Air                         | 0         | 0                          | 0                                   |
| Biodiversity                | + +       | +++                        | + + +                               |
| Business Growth             | 0         | 0                          | 0                                   |
| Climate Change              | 0         | 0                          | 0                                   |
| Deprivation                 | 0         | 0                          | 0                                   |

| Water                       | + +       | +++                        | + + +                               |

Table 41. SA findings for Strategic Policy 8: Environment.

#### Commentary

This policy has highly positive benefits for the environmental objectives of heritage, landscape and biodiversity. Land Use is likely to benefit indirectly through the protection of soils and the health objective also benefits indirectly as the environment is strongly linked to wellbeing. Overall, it is notable that while the NPPF and detailed Local Plan policies provide benefits in similar respects, the strategic focus of this locally important topic, provides added benefits. While the Pre-Submission Local Plan version of this policy provides greater detail on archaeology and landscape, these two objectives were already applied the maximum score possible and the Pre-Submission Local Plan amendments are not considered materially different.

| Sustainability<br>Objective | Cumulative Assessment of<br>Green Belt release sites |
|-----------------------------|--|
| Air                         | ?  |

| Water                       | ?  |

Table 42. SA findings for Strategic Policy 9: Green Belt.

#### Commentary

Green Belt land is being released to allow for various types of development in the plan period. Scores are applied to reflect the impacts that the proposed Green Belt releases would have on each sustainability objective; thus this is, in effect, a cumulative impact assessment of Green Belt release sites. The small addition of 1.1ha of land to the Green Belt (Land West of Colts Hill, close to Badshell Road) is also considered within the cumulative scores as are the compensatory measures being considered by the Council. The scale of Policy STR/SS 1 and STR/SS 3 in comparison to the other allocations, dominates this assessment of cumulative

effects. Mixed scores are assigned for air and water to reflect the wide variety of scores across the sites.

Without this policy, these benefits and adverse effects would not be realised.

Alternatives to this strategy are discussed in Chapter 6.

See Appendix E for more detailed scoring.

| Sustainability<br>Objective | No policy | New Policy |
|-----------------------------|-----------|------------|
| Air                         | + +       | ++         |
| Biodiversity                | + +       | +++        |
| Business Growth             | + +       | +++        |
| Climate Change              | + +       | + +        |

Table 43. SA findings for Strategic Policy 10: Neighbourhood Plans.

#### Commentary

Under the basic conditions, neighbourhood plans are required to promote sustainable development. This is equivalent to and compatible with the Sustainability Appraisal objectives deemed important for the borough.

The policy promotes neighbourhood plans, including through information sharing, and the weight to be given them, so scores somewhat better particularly in relation to most social objectives.

The Pre-Submission Local Plan policy is not considered to be materially different from the Draft Local Plan policy.

# 7.3 Findings

- 7.3.1 In summary, when objectives are divided into the three pillars of sustainable development the following observations can be made:
  - the economic and social objectives score either positively, neutral or unknown for all strategic policies. There are no negative scores.
  - the environmental objectives are scored as positive, neutral or unknown for most strategic policies. However, some negative scores are recorded in Policy STR 9 (Green Belt) to reflect the potential impacts upon sensitive settings and, in the case of the climate change objective, large demand for energy and fuel.
- 7.3.2 The main findings of the above appraisals of the respective strategic policies are:
  - the preferred strategic policies make a positive contribution towards meeting sustainability objectives
  - where applicable, the preferred new Local Plan policies generally score notably better than options that rely on the NPPF, benefitting from their regard to local circumstances

# 8. SA of the Potential Development Sites

# 8.1 Background and Method

- 8.1.1 All sites have been separately assessed against a robust methodology which is set out in the Strategic Housing and Economic Land Availability Assessment (SHELAA). This included all sites received through two Call for Sites processes, sites received since then but prior to the 22<sup>nd</sup> February 2019 (known as late sites or additional sites/A\_S), and sites received during the Regulation 18 and 19 consultation process (known as DPC and PSPC sites).
- 8.1.2 Sites received since 22nd February 2019 are assessed using this same methodology for possible inclusion in the Pre-Submission version of the Local Plan (Regulation 19). Likewise, any further sites received as part of the Regulation 18 consultation on the Draft Local Plan and Regulation 19 consultation of the Pre Submission Local Plan are also assessed for possible allocation using the same methodology.
- 8.1.3 A number of sites were filtered out during a first stage initial assessment of sites. For the purposes of this SA report, these are sites that are not considered to be reasonable alternatives requiring a sustainability assessment. Further details are contained in the SHELAA report, but it is noted that sites filtered out at this initial first stage assessment stage include sites:
  - Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances, some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions;
  - Not well related to a settlement; this has included sites that may be in relatively close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way;
  - Clearly likely to provide less than 10 residential units;
  - About which there is significant landscape concern, which it is considered is unlikely to be overcome;
  - About which there is significant topography concern, which it is considered is unlikely to be overcome;
  - About which there is significant heritage concern, which it is considered is unlikely to be overcome;
  - About which there is significant concern that development of the site would cause the coalescence of settlements;
  - That are wholly Ancient Woodland or a significant proportion of the site is Ancient Woodland, significantly reducing the developable area of the site; in some cases,

depending on the extent of developable area remaining, sites have continued to be assessed through the assessment process. Sites with a developable area likely to yield below 10 residential units have been filtered out as per the bullet point above;

- That are a designated Local Wildlife Site or there are other ecological reasons for not taking a site forward;
- That are protected by a Tree Preservation Order on the whole site;
- That have received planning permission and are substantially under construction;
- Located entirely outside the Tunbridge Wells Borough boundary
- 8.1.4 It is noted that site assessment work has been an on-going iterative process and that some sites initially filtered out may have subsequently been re-assessed.
- 8.1.5 In carrying out the sustainability assessment of reasonable alternatives, the following assumptions were made:
  - Generally, a yield of 30 units per hectare was applied. A high-level indicative yield was taken, calculated using 30 units per developable hectare based on the extent of the site area minus any 'level 1' constraints which are defined as constraints that would preclude most forms of built development for example ancient woodland, Sites of Special Scientific Interest (SSSI) and Flood Zone 3;
  - There were exceptions to this rule including on larger sites for example. It was recognised that some sites would require land-take for the provision of open space and landscape buffers. In such instances, a high-level judgement has been made which has informed the sustainability assessment of the site;
  - Some sites achieved an indicative high-level yield exceeding 10 units. However, a judgement was made informed by recent appeal decisions on the sites, which lead officers to believe that a realistic yield would in fact be below 10 units. As such these sites were ruled out as reasonable alternatives in line with the criteria set out above. In other cases where yields were borderline but above 10 units, sites were assessed as reasonable alternatives with the knowledge that detailed refinement work would be needed to inform a more realistic yield for the site;
  - Reasonable alternative sites were assessed on the basis of them being for a wholly residential scheme. There were exceptions to this where a site would clearly facilitate an extension to an existing non-residential use;
  - When assessing reasonable alternative sites against the education sustainability objective, in rural settlements an assumption has been made that the site will generate a demand at the school serving that particular settlement.
  - Assessing sites against the education sustainability objective at Royal Tunbridge Wells was more complex as children here tend to go to schools that are more spread out across the main urban area. A judgement has been made based on one or two schools as necessary.
- 8.1.6 Following the determination of reasonable alternatives, the methodology for sustainability appraisal set out in Chapter 4 of this report was followed for each site.
- 8.1.7 All sites were initially scored according to the above method and recommendations for mitigation were made. When draft site allocations were being formulated, a further

stage of SA was undertaken, taking account of the type of development proposed on each site and the specific draft criteria that it should meet.

- 8.1.8 Where proposals were put forward for inclusion in the Local Plan to safeguard land for a particular purpose, the SA objectives tended to be scored as neutral for all objectives except any that related directly to the proposed purpose for safeguarding. For example, land safeguarded for future road improvements was scored as neutral for all objectives except Travel which was assigned a positive score.
- 8.1.9 Sites were then grouped into parishes and cumulative sustainability appraisals were carried out for the parish as a whole by reflecting on the range of scores across the parish in combination with the Strategic Policy for the parish and any other policies in the Local Plan that were relevant to the parish. For example, DM policy TP 6 was considered in the cumulative scores for Pembury parish.
- 8.1.10 Tables containing the scores for allocated sites including cumulative impacts were completed for each parish (and Royal Tunbridge Wells), followed by a discussion of impacts. The purpose of the cumulative impact assessment was to predict the combined effects of the strategic policies and allocations. Measures were proposed to enhance beneficial impacts and reduce adverse impacts, which have informed the development parameters of individual site allocations and strategic policies for parishes wherever possible (Appendix C). An example in which it was not possible to incorporate these suggestions is the retention of hedgerows which is not always possible because of access requirements.
- 8.1.11 Within these tables, site references in these tables correspond with the refences within the SHEELA and policy references correspond with those within the Pre-Submission Local Plan.

# 8.2 Results

- 8.2.1 Summary tables for each parish including cumulative impacts assessments are provided below. More detailed commentaries for individual sites can be viewed in Appendices F U.
- 8.2.2 It should be noted that it does not necessarily follow that the sites with the most favourable SA score should be allocated for development, as there are other factors which must be considered. Caution is also given in respect of simply adding up respective scores, as they must be understood in the context of the site under consideration, as well as the overall strategy.
- 8.2.3 At a high level, the site selection has regard to the contribution it may make to meeting the overall need for housing and employment development and the earlier findings in terms of the most appropriate development strategy (as reflected at Policy STR 1 of the Pre-Submission Local Plan).
- 8.2.4 Further factors outside of the SA process were also considered when making decisions over sites to be allocated. The Borough Council placed great emphasis in

the preparation of this Plan on working with local communities, particularly Town and Parish Councils. Such engagement in combination with a consideration of national policy requirements contributed to the selection of sites for shortlisting, as well as the proposed site allocations.

8.2.5 In addition, consultation was carried out with service providers such as KCC Highways and Transportation, KCC Education and Southern Water. In some cases, sites have been ruled out for practical reasons such as highway safety and access, where they might have originally been considered appropriate. Deliverability is noted as being another important consideration, largely beyond the scope of the SA.

# Commentary

Development proposed in Royal Tunbridge Wells is largely sustainable with half of the objectives scored as positive or neutral when considering cumulative effects (STR/RTW 1).

Scores for environmental objectives range from - / - - to 0. The air quality objective scores as mixed overall due to the likelihood that some of the development in Royal Tunbridge Wells will increase traffic in the AQMA, whilst at the same time bringing with it financial contributions for improvements and being served by a wide range of facilities and services so that private car use is not essential. Land Use and Resources are also scored as 'mixed' to reflect the wide-ranging scores across the allocations. Noise and Water are scored negatively to reflect the collective impact of all proposed development.

Economic and social objectives for STR/RTW 1 are all positive or highly positive largely reflecting the expected gains in employment and housing within a settlement that has a wide range of services, facilities and travel options. Further commentary on the key issues that were considered when applying scores for both the allocated sites and the reasonable alternatives can be found in Appendix F.

The Town Centre Policy (STR/RTW 2) is also largely sustainable with mostly positive or neutral scores across all three pillars of sustainable development.

The three exceptions to this are the heritage objective which scores slightly negatively to reflect the potential risk to sensitive assets, and the noise and air objectives which are given mixed scores because focussed development in the town centre could bring about more traffic (particularly increased commercial, employment and cultural development), but the policy plans for reduced private car dependency. These later two scores were prevented from being more negative by the emphasis on active travel infrastructure in the policy and low traffic neighbourhoods.

The climate change and resources objectives score as 'mixed' to reflect that demolition and rebuild is likely to be necessary, but redevelopment could provide more energy efficient buildings in a town where private car use is not essential.

On the whole, the reasonable alternatives that were not chosen for allocation had more negative scores than those that were allocated. In some locations across the settlement, reasonable alternative scores reflected the sensitivity of the local environment for example sites near the northern stretch of the Pembury Road. In other locations, the scale of the reasonable alternative was considered detrimental and the cause of negative scores; for example, the cluster of sites in the north west of the settlement. Finally, some reasonable alternative sites were scored poorly for more specific reasons (despite adjacent sites being suitable for allocation), such as the very sensitive landscape that would be impacted upon by Site 434.

Some Reasonable Alternatives were discounted for reasons outside of the scope of the SA, such as accessibility concerns for site 237, yield concerns for site 249 or, in the case of sites SALP AL/RTW 20 and EA\_195, by a decision to retain the existing uses of the site via the Development Management process.

Since Draft Local Plan stage, the Retail, Leisure and Town Centre Uses Study has been undertaken a proposal has been made for a Town Centre Area action plan. This updated information has been taken into account and scores adjusted to sites appropriately. For example, site 176 (AL/RTW 11) is now allocated for only residential development (rather than retail/employment plus residential) to ensure retail remains focussed on the town centre, rather than locations out of the town centre.

It is also noted that three planning applications are being (or will soon be) considered bordering Royal Tunbridge Wells but in neighbouring Wealden District Council. Together, if approved, these developments could amount to a further c.400 additional dwellings (including c.150 care units). On a precautionary basis, these are considered with the site allocations for cumulative effects. The sites are in the south east of the town and thus near to Sites 238, 249 and 434. Landscape effects reflecting the sensitive AONB landscape are expected to be similar to these sites but more negative due to the large size of the Wealden sites. The sites will increase demand; thus air, noise and education impacts are predicted to be negative. The sites will benefit from the services and facilities provided by the town centre, but the urban edge location may mean some residents are reluctant to choose active travel modes. These key findings have been taken into account when assigning cumulative impact scores in Table 46 above.

Table 48. SA scores for allocated sites in Southborough

# Commentary

Development proposed in this parish (STR/SO 1) is largely sustainable with mostly positive or neutral scores.

Scores for the social and economic objectives are all positive whereas scores for the environmental objectives ranged from – to 0. The air quality objective scores as mixed overall due to the likelihood that most development in Southborough will increase traffic in the AQMA, whilst at the same time bring financial contributions for improvements and being served by a wide range of facilities and services so that

private car use is not essential. The intention to develop a Low Traffic Neighbourhood is also recognised. Noise and water are scored slightly negative to reflect the collective impact of all proposed development.

More detailed commentary can be found in Appendix G.

Scores and commentary have been updated to reflect comments made during consultation and the findings of additional studies undertaken in 2020 such as the Landscape and Visual Impact Assessment Report.

The sites chosen for allocation above largely scored more positively than the reasonable alternatives shown in Appendix G. For example, the sensitive locations of sites 10, 45, 335 and 445 in terms of landscape, biodiversity and/or Green Belt caused these sites to have more negative scores.

The remaining reasonable alternatives were awarded similar or better scores than the chosen allocated sites but rejected for reasons of outside of the SA remit such as deliverability (site 441), unsuitable yield (site 327), or highway concerns (site 8).

Table 50. SA scores for allocated sites in Capel Parish

\* Scores represent a combination of options 1b, 2b, 3 and 4 from Chapter 6.

## Commentary

Most scores for STR/CA 1 are positive with very positive scores being applied for the social and economic objectives. Environmental objectives are mostly negative, reflecting the scale of development proposed. However, the water objective has been given a mixed/positive score to reflect the betterment in flooding proposed for Five Oak Green and Paddock Wood. The scale of Policy STR/SS 3 in comparison to the other allocations, dominates the assessment of cumulative effects for this parish.

NOTE: The majority of STR/SS 1 is within Paddock Wood parish. However, there is some overlap with Capel parish and thus scores for STR/SS 1 are included in this assessment too.

Detailed explanations for how the scores for the STR/SS 1 and STR/SS 3 were determined can be found in Table 28 and Table 29.

Further commentary can be found in Appendix H.

The remaining reasonable alternative sites in the parish were rejected for allocation due to issues such as concern that allocating sites around Five Oak Green would tend toward coalescence and the loss of its discrete identity.

Whilst the A228 Colts Hill bypass covered by policy TP 6 does fall within the parish boundaries, it is not given great weight when determining cumulative impacts, as there is no certainty that the scheme would be delivered (policy safeguards the route only).

#### Paddock Wood

Table 52. SA scores for allocated sites in Paddock Wood Parish

\* Scores represent a combination of options 1b, 2b, 3 and 4 from Chapter 6.

### Commentary

Most scores for STR/PW 1 are positive or neutral with very positive scores being applied for all the social and economic objectives. Environmental objectives are mostly negative reflecting the scale of development proposed. However, the water

objective has been given a mixed/positive score to reflect the betterment in flooding proposed for Five Oak Green and Paddock Wood. Likewise, biodiversity is scored as slightly positive overall to reflect the enhancements that are possible with STR/SS 1.

The majority of STR/SS 1 is within Paddock Wood parish. However, there is some overlap with Capel. The scale of Policy STR/SS 1 in comparison to the other allocations, dominates the assessment of cumulative effects for this parish.

Detailed explanations for how the scores for STR/SS 1 were determined can be found in Table 29.

Further commentary can be found in Appendix I. The remaining reasonable alternative sites in the parish were rejected for allocation for reasons such negative landscape and land use scores or because they were ear-marked for an alternative use as gypsy intensification site.

# Commentary

Cumulative impacts for this parish are mixed. Economic and social objectives range from + + to -, reflecting the allocations for residential housing an education whilst also considering the slightly negative scores for provision of, and access to, services and facilities. Environmental objectives range from 0 to - -. This is indicative of the sensitive environmental features in the parish and relatively large loss of greenfield land. Collectively, the proposed allocations in this parish are within in a sensitive landscape and thus do create a negative landscape score overall.

At Draft Local Plan stage, this parish had one of the worse cumulative impacts of all the parishes especially for land use (greenfield, soil loss) and landscape (overall scale out of keeping with settlement, loss of GI), outside of parishes with strategic sites. The heritage score was also highly dependent upon wording in the strategic policy to 'provide a framework for a positive heritage strategy', and had the potential to be more negative.

All Sissinghurst allocations are let down by poorer range of services and facilities than Cranbrook and the relatively large scale of development proposed for the village size at Draft Local Plan stage.

As the Sustainability Appraisal was developed further in 2020, amendments were made to the previously applied scores to address findings of further studies and to address comments raised during consultation in Autumn 2019. This was particularly the case for the objectives of biodiversity, landscape and heritage.

It is noted that the 2020 AONB Setting Analysis Report has revealed potential impact from sites 120 and 159 in this regard and the landscape scores for these sites have been adjusted to reflect this expected short-term impact.

The 2020 Landscape and Visual Impact Assessment study provided additional information about site 430, the Hartley parcel and site LS\_32 and landscape scores for these sites have been adjusted as necessary. Of particular note is the recommendation not to allocate site LS\_32. This advice has resulted in the very negative landscape score being applied.

Likewise, the 2020 Grassland Study concluded that Sites 125, 442, 68 and the western sites at the Hartley parcel were considered to have either ecological or botanical importance (or both) and the biodiversity scores have been adjusted as appropriate.

The removal of some sites for allocation has helped to improve the cumulative impact scores for certain objectives. For example, air quality, climate change, landscape and water scores benefit from the reduced number of dwellings. For other objectives, the reverse is true i.e. fewer dwellings means less support for local business growth and employment. Finally, a deterioration in the cumulative score for biodiversity since Draft Local Plan stage reflects new information to inform scores for sites.

On the whole, the final selection of sites for allocation provide benefits to environmental, social and economic objectives. Where sites were not allocated but had a better range of scores than the allocated sites, there were frequently reasons outside of the SA remit to consider for example highway problems, access issues or deliverability concerns within the plan period e.g. site 409.

Further commentary can be found in Appendix J.

## Commentary

All environmental, social and economic objectives have both positive and negative elements to them in this parish thus bring about a mixed score cumulatively.

Collectively, the proposed allocations in this parish are within in a sensitive landscape and thus do create a negative landscape score overall. Likewise, the cumulative score for air quality is negative to reflect the total number of dwellings and to recognise that there is an AQMA on Cranbrook Road which is in the process of being declared. The cumulative air quality score is prevented from being more negative by the commitment in allocation policy to avoid unacceptable impact.

The cumulative effects of the two allocations in Gills Green brings benefits to the Business Growth and Employment objectives. Likewise, the combined effect of the residential housing allocations ensures the housing objective scores positively.

Travel in the parish is most likely to use private car use and development at Gills Green in particular causes the travel objective to be scored negatively at parish level.

Noise scores negative overall to reflect cumulative impact upon the new Important Areas for Road Noise (IARN) at Flimwell and the Water objective is scored as slightly negative to reflect the total scale of development and pressures on supplies.

In some cases, the reasonable alternatives that were not chosen for allocation scored more negatively than those that were not allocated reflecting the scale of the site and/or the sensitivity of the local environment for example sites LS\_3, 52 and 394. In other cases, the allocations were made based on local need for community or employment. For example, employment land at Gills Green or community facilities at King George V recreation ground. Further commentary can be found in Appendix K.

As the Sustainability Appraisal was developed further in 2020, amendments were made to the previously applied scores to address finding of further studies and to address comments raised during consultation in Autumn 2019. This was particularly the case for the objectives of biodiversity, air and landscape.

The 2020 Landscape and Visual Impact Assessment study provided additional information about site 115, 413, 78/419, 102 and 422 and landscape scores for these sites have been adjusted as necessary.

Likewise, the 2020 Grassland Study concluded that Sites 78 and 86 were considered to have either ecological or botanical importance (or both) and the biodiversity scores have been adjusted as appropriate.

The removal of some significant sites for allocation has helped to improve the cumulative impact scores for certain objectives. For example, climate change, landscape, land use, education, heritage and water scores benefit from the reduced number of dwellings. For other objectives, a deterioration in the cumulative score since Draft Local Plan stage reflects new information to inform scores for sites e.g. air, biodiversity and noise.

Table 58. SA scores for allocated sites in Benenden Parish

## Commentary

Proposed sites are largely reasonable on a cumulative scale. Environmental objectives score as neutral or slightly negative. Social and economic objectives score as positive, neutral and negative.

Lack of services, facilities and travel options is a key issue for all development in this settlement, and the sites in East End cause the score for Services and Facilities, Climate Change and Travel to be particularly negative overall. However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.

Further commentary can be found in Appendix L. In light of the alternatives, the above options were chosen for allocation because they provided the best scores particularly with regard to the heritage, landscape and travel objectives.

The 2020 Grassland Study shows site LS\_16 has moderate-low botanical importance and moderate ecological importance thus the score for biodiversity has changed to reflect this.

#### Bidborough

Only one site from Bidborough Parish was submitted in the call for sites process (Land Fronting Penshurst Road). This site was not deemed reasonable and thus an SA was not completed. No other reasonable alternatives were identified given the constraints of the parish.

The Local Plan contains a Strategic Policy for the parish (PSTR/BI 1). However, lack of information on site locations for windfall means the SA objectives can only be scored as 'unknown'.

Table 60. SA for allocated sites in Brenchley and Matfield Parish

# Commentary

The cumulative assessment (PSTR/BM 1) assigns 6 neutral scores, 2 slightly positive scores, and 10 negative scores for the proposed development in the parish of Brenchley and Matfield.

Environmental scores are neutral or negative, social scores range from very negative to slightly positive, and economic scores range from positive to negative.

Whilst a road scheme covered by policy TP 6 does fall within the parish boundaries,

it is not given great weight when determining cumulative impacts as there is no certainty that the scheme would be delivered (policy safeguards the route only).

The policies in this parish represent a reasonable score for the housing objective. However, the scores are diminished by the fact that Matfield (where all development is proposed) lacks many facilities and services, thus making the housing less suitable for the elderly or disabled. That being said, travel to Paddock Wood is more convenient from Matfield and thus there is an advantage in this proposed pattern of growth. The negative land use score is due to all policies representing a loss of BMV soils and the negative landscape score reflects all sites being located within the AONB. Water and education scores reflect the pressures of 90 new dwellings on existing services.

Generally, sites in Brenchley were rejected for allocation due to landscape, biodiversity and/or setting concerns for example sites 215 and LS\_7. The most preferable sites were those which aligned well with the existing settlement pattern and provided the best balance between the social, economic and environmental objectives.

There are several reasonable alternative sites that score better than the allocated sites e.g. sites 220, 76, 288, 403, 406 and LS\_33 (see Appendix M). However, the SHEELA notes explain they are unsuitable for allocations for reasons such as not being logical extensions to the LDB, lack of appropriate access and uncertainty about delivery. These are all aspects the SA does not consider.

Since Draft Local Plan stage, cumulative impact scores for landscape and heritage have been improved following the removal of Site 253 for allocation. Site 353 was a relatively large site in a location out of keeping with the existing settlement pattern with some adverse landscape impacts, as well as having regard to the overall limited services role of the settlement.

Commentary for all reasonable alternatives in this parish can be found in Appendix M.

| Site<br>Ref | Site Address                                 | Policy Ref    |
|-------------|--|---------------|
| 349         | Pound Hill Field, Biddenden Road, Frittenden | Not allocated |
| LS_28       | Land at Cranbrook Road, Frittenden           | AL/FR 1       |

Table 61. List of reasonable alternative sites in Frittenden Parish

Two reasonable alternative sites came forward in Frittenden parish during the call for sites process but only one of these was allocated for development in the Draft Local Plan (late site 28). This site is retained in the Pre-Submission Local Plan; hence, the cumulative impact assessment is therefore identical to the scores for late site 28. See Appendix N for full details on this site.

Table 63. SA scores for allocated sites in Goudhurst Parish

# Commentary

The cumulative impacts of development in this parish (PSTR/GO 1) are mostly neutral. The scores for all three pillars of sustainable development range from slightly negative to slightly positive except the environmental objectives which have no positive scores. Out of the 10 environmental objectives, 7 score as neutral.

The limited range of services and facilities is the largest detractor from development in this parish. Loss of greenfield land within a sensitive landscape is also reflected negatively in the cumulative assessment scores. Travel options are limited with active travel less likely due to steep topography and narrow roads. The nearest train station at Marden is relatively near but the direct bus service is poor thus private car use is likely to dominate. The education score reflects the capacity of the existing service rather than the pressures of 26 new dwellings. The creation of temporary construction jobs allows the employment objective to be positive. However, this objective is afforded low weighting overall as unemployment in the borough is generally low.

In comparison to the Reasonable Alternatives shown in Appendix O, the allocated sites above have a better outcome for the sensitive AONB landscape and heritage environment. The allocated sites also score more positively on the equality objective as are more accessible, including for people with mobility impairments.

Further commentary can be found in Appendix O.

Table 65. SA scores for allocated sites in Horsmonden Parish

# Commentary

The cumulative impacts of development in this parish (PSTR/HO 1) are mixed.

Economic impacts range from positive to negative reflecting the positive impact that a relatively large number of new dwellings and new residents could have in supporting local businesses, and the improvement that a new GP surgery and village hall brings for the services and facilities objective. Social impacts all score as positive except health (neutral) and travel (negative). Environmental impacts score as negative to neutral, largely reflecting the potential for impact upon some sensitive landscape and heritage features such as the setting of the AONB. It is noted that the 2020 AONB Setting Analysis Report has revealed potential impact from AL/HO 3 in this regard and the landscape score has been adjusted to reflect this expected shortterm impact. The cumulative score has not been adjusted as the impact is expected to dimmish in the long-term such that it is no longer considered significant.

As for all small rural settlements, one of the main detractors from this settlement is the lack of local facilities and private car use dependency. This is reflected in scores for air, transport and services. Water and education scores reflect the increased pressure on existing services (with allowances made to account the intention to safeguard land for education).

Generally, allocated sites are given less negative scores than those deemed unsuitable for allocation especially in relation to the environmental objectives of land use, landscape and heritage. Exceptions occur in the case of Sites 355 and LS\_42. However, these sites have significant access difficulties which the SA does not score directly.

Further commentary can be found in Appendix P.

Since Draft Local Plan stage, numerous updates have been made to the scores for reasonable alternatives. These are summarised below:

- Education score for Site 162 (now AL/HO 2) has been updated since Draft Local Plan stage to better reflect the pressures on existing services. However, the cumulative impact score remains unchanged as the parish will benefit from the safeguarded land for education.
- Heritage score for the reasonable alternative Site 207 has declined to reflect detailed investigations that were undertaken as a result of the recent planning application that was subsequently refused. Likewise, the heritage score for reasonable alternative Site 321 has been reduced to reflect the impact upon the setting of the adjacent listed building.
- Biodiversity score for the reasonable alternative Site 321 has declined to better reflect the large pond on site.

### Lamberhurst

| Site<br>Ref | Site Address   | Policy Ref    |

Table 66. List of reasonable alternative sites in Lamberhurst Parish

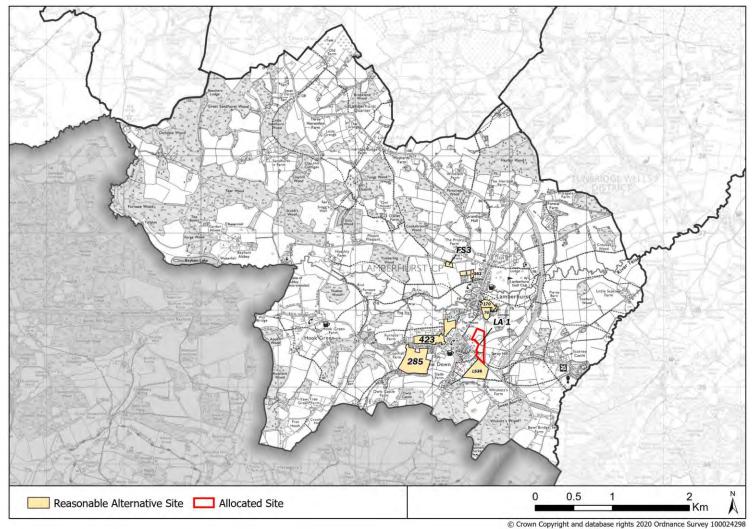

Figure 21. Map of reasonable alternative sites within Lamberhurst Parish..

Nine sites (excluding KC\_1) came forward in Lamberhurst parish during the call for sites process but only one of these has been allocated for development in the Local Plan (site 279). The cumulative impact assessment is therefore identical to the scores for this site. Generally, all sites in this parish were let down by the limited range of facilities, services and transport options. Site 279 scored the most positively of all these sites and therefore was recommended for allocation. The remaining sites scored more negatively for landscape, heritage and/or water reflecting the sensitive AONB location and flood zones.

See Appendix Q for full details on this site. It should be noted that scores have been reviewed and updated to address comments made during consultation in Autumn 2019.

Whilst a road scheme covered by policy TP 6 does fall within the parish boundaries, it is not given great weight when determining cumulative impacts as there is no certainty that the scheme would be delivered (policy safeguards the route only).

### Pembury

# Commentary

The cumulative impacts of development in this parish (PSTR/PE 1) are mixed. Economic impacts range from + + to -. Social impacts range from + + to neutral with no negative scores. Environmental impacts range from 0 to - - with no positive scores.

The score for the education objective is a combination of the adverse effects that come from the cumulative pressures that the new dwellings could place on the existing school which does not have room for expansion. Despite the benefits of policy TP 6, the cumulative effects of all the proposed developments has resulted in a slightly negative air quality score overall. The contributions that will be collected from all developments to enhance active travel prevent this score from being any more negative (likewise the travel objective). The services and facilities objective scores slightly negative overall and is linked to the access to existing services. The water objective is influenced by the groundwater source protection zones across the parish and also the pressure that approximately 400 new dwellings has on supplies.

Whilst a road scheme covered by policy TP 6 does fall within the parish boundaries, it is not given great weight when determining cumulative impacts as there is no certainty that the scheme would be delivered (policy safeguards the route only).

Further commentary can be found in Appendix R.

In most cases, sites chosen for allocation had a more positive range of scores than those that were rejected. For example, sites 64, 290, 332, 367 and 373 which all experience negative effects due to their location further out from on the edge of the settlement.

However, in some circumstances, sites with similar or better scores to the allocated sites were rejected for reasons outside of the SA remit. For example, sites 191 and 290 are likely to be undeliverable due highway and/or access concerns.

### Rusthall

| Site<br>Ref          | Site Address  | Policy Ref    |

Table 69. List of reasonable alternative sites in Rusthall Parish

Four sites came forward in Rusthall parish during the call for sites process but only one of these was allocated for development in the Draft Local Plan (site SALP AL/RTW 9). Site SALP AL/RTW 9 scored the most positively of all these sites and therefore was recommended for allocation. The other reasonable alternatives all scored more negatively for land use and heritage reflecting the sensitive Green Belt location. The cumulative impact assessment is therefore identical to the scores for site SALP AL/RTW 9. See Appendix S for full details on this site.

Table 71. SA scores for allocated sites in Sandhurst Parish

### Commentary

The cumulative impacts of development in this parish (PSTR/SA 1) tend towards neutrality but are mixed overall. They were judged not to be significantly different from the scores for the individual sites because the number of dwellings recommended for each allocation was relatively small. Economic and social impacts range from negative to positive. Environmental impacts range from slightly negative to slightly positive.

Generally, allocations in this parish are let down by poor services and transport options. In addition, risk to the AONB and heritage assets are present.

These sites were selected for allocation because the alternatives had more negative scores for the environmental objectives and, in the case of sites LS\_11 and LS\_50, slightly more negative travel scores reflecting the more distant location of these sites in relation to services and facilities. Further commentary can be found in Appendix T

Site 147 was previously allocated as Policy Ref AL/SA 2 in the Draft Local Plan. This site has now received planning permission for a development with a number of dwellings that does not meet the threshold for consideration described in paragraph 0 and thus has now been filtered out from the list of reasonable alternatives in Table 70 above.

Finally, a Grassland Study was undertaken in 2020 and determined that there was low botanical and moderate-low ecological interest on AL/SA 1. The score for biodiversity remains unchanged.

### Speldhurst

| Site<br>Ref | Site Address  | Policy Ref    |

Table 73. SA scores for allocated sites in Speldhurst Parish

### Commentary

The cumulative impacts of development in this parish (PSTR/SP 1) are largely neutral or slightly positive or negative. Economic impacts range from + to 0 / -. Social impacts range from + to -. Environmental impacts range from 0 to 0 / - with no positive scores.

The reasonable alternatives in Speldhurst parish are found in Appendix U. Sites 94 and 337 were similar to AL/SP 1 but scored slightly more negatively to reflect the difficulty of providing access. For this reason, it was not recommended that these sites be allocated. Likewise, sites 27, 42, 338, 386, and LS\_15 had several highly negative scores reflecting either the

scale of the site or the environmentally sensitive location (or both) and were not recommended for allocation. Further commentary can be found in Appendix U.

Since DLP stage, the size of AL/SP2 (previously AL/SP3) has increased to incorporate an existing recreation ground, giving potential for further space for overspill parking and the option for enhanced sport and recreation facilities. Differences are not expected to be significant and thus scores are unchanged.

Finally, a Grassland Study was undertaken in 2020 and determined that there was low botanical and ecological interest on AL/SP 1 thus the score for biodiversity remains unchanged.

# 9. SA of Development Management Policies

# 9.1 Background and Method

- 9.1.1 The Development Management Policies are contained in Section 6 of the Draft Local Plan and form part of the policy framework along with the strategic, place-based and site allocation policies, which aim to achieve the Vision for Tunbridge Wells borough and the Strategic Objectives of the Local Plan. The development management policies provide more detail for decision making in relation to particular issues and for assessing the acceptability of certain types of development. These policies will replace the policies which form part of the existing Development Plan Documents the Tunbridge Wells Borough Local Plan 2006, the Tunbridge Wells Core Strategy 2010 and the Tunbridge Wells Site Allocations Local Plan 2016.
- 9.1.2 The Pre-Submission Local Plan is the last of three stages in preparing the new Local Plan. The first stage was the publication of the Issues and Options document in the summer of 2017, for public consultation. The Issues and Options document set out the main issues facing the borough, with reference to the following seven themes: 1. Natural and Built Environment, 2. Infrastructure, 3. Housing, 4. Economy, 5. Transport and Parking, 6. Leisure and Recreation and 7. Sustainability. The Draft Local Plan built on the Issues and Options document and the feedback received during consultation. Its Development Management policies were based on the continuation of these themes, which are retained in the Pre-Submission Local Plan. They address the following topic areas:
  - Environment and Design
  - Natural Environment
  - Air, Water, Noise, and Land
  - Delivery of housing
  - Types of housing delivery
  - Employment Provision
  - Town, Rural Service, Neighbourhood, and Village Centres
  - Transport and Parking
  - Open Space, Sport, and Recreation

9.1.3 Table 74 provides a full list of the Development Management Policies.

- 9.1.4 The following reasonable alternative options were applied to the Development Management (DM) Policies:
  - No Policy rely on NPPF/PPG where guidance relating to a particular topic or policy area applies. Where the NPPF/PPG requires that a specific policy is provided in the local plan e.g. climate change, bio/geodiversity, water supply, air quality, custom/self build, Gypsies and Travellers and therefore, No Policy was not an option in these cases.
  - No Policy where there is no reference to a particular topic or policy area in the NPPF/PPG

- Keep the existing 2006 Local Plan Policy(ies) and/or 2010 Core Strategy Policy(ies) (where applicable)
- Revision/amendment to existing 2006 Local Plan Policy and/or 2010 Core Strategy Policy (where applicable). This was applied where a similar policy could have been considered with an update due to change in circumstances and/or relevant guidance.
- New Policy application of the new development management policy as set out in the Draft Local Plan
- A different type of option(s) was applied where there is a clear/alternative approach e.g. affordable housing, build to rent as there may be further options or thresholds available.
- 9.1.5 With regard to Policy EN13 Ashdown Forest Special Protection Area and Special Area of Conservation, no further option is proposed because reasonable alternatives, which now form part of the new policy (i.e. the 7km zone of influence and forms of mitigation), were already considered in detail as part of the Sustainability Appraisal and Habitat Regulations Assessment for the Tunbridge Wells Site Allocations Local Plan 2016 and as such the relevant legal requirements have been met.
- 9.1.6 Also, in relation to Policy EN16 Green, Blue and Grey Infrastructure, this new policy carries forward NPPF advice, associated guidance and other relevant sources of information and it is considered that there is no reasonable alternative in this case.
- 9.1.7 In general, a No Policy option which relied wholly on Neighbourhood Development Plan (NDP) policies was not considered to be reasonable because not all parishes are implementing NDPs.
- 9.1.8 Following the determination of reasonable alternatives, the methodology for sustainability appraisal set out in Chapter 4 of this report was followed for each DM policy.
- 9.1.9 Tables containing the scores for the policies were completed for each development management theme, followed by a discussion of the findings.

## 9.2 Results and Mitigation

9.2.1 Summary tables for each development management theme are included below and are followed by a discussion of the findings.

### Environment and Design

| Table 75. SA scores for EN 1 – Sustainable Design |  |
|---|--|

| Services & Facilities       | +                               | 0  | + +        |
| Travel                      | +                               | 0  | + +        |
| Waste                       | 0                               | +  | + +        |
| Water                       | 0                               | 0  | + +        |

### Commentary

Option 3 provides more detail, clarity and guidance which will benefit and enhance the built and natural environment as well as all the environmental objectives. The only negative is for the business growth objective due to the greater expectations on developers than currently in place.

Since the Draft Local Plan Stage, this policy has been expanded to incorporate a broader range of sustainable design criteria. As such there is no longer a need for a secondary sustainable design policy that sits behind a more general design policy. This change ensures sustainable development is integral to the design process and scores reflect this.

|                          | Option 1: | Option 2:  |
|--------------------------|-----------|------------|
| Sustainability Objective | No policy | New policy |
| Air                      | 0         | ++         |
| Biodiversity             | 0         | ++         |
| Business Growth          | 0         | -          |
| Climate Change           | -         | +++        |
| Deprivation              | 0         | 0          |
| Education                | 0         | 0          |
| Employment               | 0         | 0          |
| Equality                 | 0         | 0          |
| Health                   | 0         | ++         |
| Heritage                 | 0         | +          |
| Housing                  | 0         | +          |
| Land use                 | 0         | +          |
| Landscape                | 0         | ++         |
| Noise                    | 0         | +          |
| Resources                | 0         | ++         |
| Services & Facilities    | 0         | +          |
| Travel                   | 0         | ++         |
| Waste                    | 0         | ++         |
| Water                    | 0         | ++         |

Table 76. SA scores for EN2 – Sustainable Design Standards

### Commentary

Option 2 provides a workable standard which will be beneficial to all environmental objectives. The only negative score assigned is for the business growth objective due to the greater expectations that would be placed on developers. There is currently no equivalent requirement in the NPPF and, of the objective topics, climate change is felt to be the furthest behind recent expectations hence is applied a negative score in Option 1.

|                          | Option 1:  | Option 2:  |
|--------------------------|--|------------|
| Sustainability Objective | Rely and NPPF and keep existing<br>policy (CP5) in 2010 Core<br>Strategy | New policy |
| Air                      | +  | 0          |
| Biodiversity             | +  | +          |
| Business Growth          | 0  | ++         |
| Climate Change           |  | +++        |
| Deprivation              | 0  | + +        |
| Education                | 0  | 0          |
| Employment               | 0  | 0          |
| Equality                 | +  | 0          |
| Health                   | +  | ++         |
| Heritage                 | +  | 0          |
| Housing                  | 0  | 0          |
| Land use                 | +  | +          |
| Landscape                | +  | ++         |
| Noise                    | +  | 0          |
| Resources                | +  | 0          |
| Services & Facilities    | 0  | 0          |
| Travel                   | 0  | 0          |
| Waste                    | +  | 0          |
| Water                    | +  | ++         |

Table 77. SA Scores for EN3 – Climate Change Mitigation and Adaptation

### Commentary

Option 2 provides a proactive and detailed approach which will be beneficial to climate change objectives and have numerous co-benefits for other environmental objectives. Existing Policy CP5 in the 2010 Core Strategy briefly covers a wider range of environmental and social issues. However, a focus on climate change is

lacking. Also, Option 2 was felt to provide greater benefits than the current NPPF can provide alone.

Business objective scores positively to reflect the focus on the rural economy and benefit to businesses of climate change adaptation.

Since the Draft Local Plan stage, this policy has been expanded to incorporate a broader range of sustainable design criteria. As such there is no longer a need for a secondary sustainable design policy that sits behind a more general design policy. This change ensures sustainable development is integral to the design process and scores reflect this.

|                          | Option 1:                    | Option 2:  |
|--------------------------|------------------------------|------------|

#### Table 79. SA scores for EN5 – Heritage Assets

### Commentary

Option 2 provides a more proactive and detailed approach for each of the heritage assets which will be beneficial to heritage, landscape, business, health and services objectives.

Since Draft Local Plan stage, the policy wording has been strengthened to further benefit the historic environment. However, this cannot be reflected in the Option 2

score for heritage as this objective had already been assigned the maximum positive score.

|                          | Option 1:  | Option 2:  |
|--------------------------|--|------------|
| Sustainability Objective | Keep existing policy (EN6) in<br>2006 Local Plan | New policy |
| Air                      | 0  | 0          |
| Biodiversity             | 0  | 0          |
| Business Growth          | +  | +          |
| Climate Change           | 0  | 0          |
| Deprivation              | 0  | 0          |

### Commentary

Option 2 provides more detail, clarity and guidance which will benefit the heritage, landscape and business objectives.

Since Draft Local Plan stage, the policy wording has been strengthened to further benefit the landscape objective. This has been reflected in the Option 2 score.

|                          | Option 1:  | Option 2:  |
|--------------------------|--|------------|
| Sustainability Objective | Keep existing policy (EN8) in<br>2006 Local Plan | New Policy |
| Air                      | 0  | 0          |
| Biodiversity             | -  | ++         |
| Business Growth          | 0  | 0          |

#### Table 82. SA scores for EN8 – Outdoor Lighting & Dark Skies

### Commentary

Option 2 provides more detailed guidance which will be beneficial to meeting the biodiversity, climate change, heritage and landscape objectives.

9.2.2 In summary, the Environment and Design preferred policies have almost entirely neutral or positive scores, with positive scores especially in relation to biodiversity, heritage and landscape objectives.

| Water                    | 0                                     | ++         |

### Commentary

Option 2 provides more detail, clarity and guidance which will benefit and enhance the biodiversity, climate change, health and landscape and water objectives.

Since Draft Local Plan stage, the policy wording has been strengthened to further benefit the biodiversity objective making use of a robust metric compulsory. However, this cannot be reflected in the Option 2 score for biodiversity as this objective had already been assigned the maximum positive score.

|                          | Option 1:  | Option 2:  |
|--------------------------|--|------------|

Table 84. SA Scores for EN 10 – Protection of Designated Sites and Habitats

### Commentary

Option 2 provides detail, clarity, guidance and a hierarchal approach which will benefit and enhance the biodiversity, climate change, health, landscape and water objectives.

Since Draft Local Plan stage, the policy wording has been strengthened to further benefit the biodiversity objective ensuring protection is given greater emphasis. However, this cannot be reflected in the Option 2 score for biodiversity as this objective had already been assigned the maximum positive score.

| Sustainability Objective | New Policy |  |
|--------------------------|------------|--|

| Water                    | 0          |  |

#### Table 85. SA scores for Policy EN 11 – Ashdown Forest SPA and SAC

### Commentary

The new policy wording was devised working in partnership with other affected LPAs (within a strategic zone of influence affecting the SPA & SAC). This option provides a more holistic approach in working with other affected LPAs with more detail, clarity and guidance which will benefit biodiversity, climate change and landscape objectives.

See paragraph 0 for an explanation of why no reasonable alternative was tested in comparison to this new policy.

| Water                    | + +        |  |

Table 88. SA scores for Policy EN 14 – Green, Grey and Blue Infrastructure

### Commentary

This option provides detail, clarity and guidance which will benefit many environmental objectives. The transport objective also benefits from the expectation for green routes specifically designed for walking a cycling.

See paragraph 0 for an explanation of why no reasonable alternative was tested in comparison to this new policy.

|                          | Option 1:                 | Option 2:  |

#### Table 94. SA scores for EN 20 – Agricultural Land

#### Commentary

Option 2 provides more clarity on grades of land and other factors relating to quality which is more beneficial to the natural environment objectives of biodiversity and land use.

9.2.3 In summary, the preferred Natural Environment policies all have positive or neutral scores, notably against the biodiversity, heritage and landscape objectives, as well as in relation to climate change and health.

#### Air, Water, Noise and Land

|                          | Option 1:   | Option 2:  |

### Commentary

Option 2 provides a more proactive and detailed approach which will be beneficial to the biodiversity, climate change, landscape and water objectives.

Since the Draft Local Plan stage, this policy has been expanded to incorporate more detail on water resource conservation. As such there is no longer a need for a secondary water conservation policy.

Table 102. SA scores for EN 28 - Land Contamination

### Commentary

The scoring is the same, but Option 2 provides more detail, clarity and guidance which will benefit the biodiversity, health, housing, landscape and water objectives.

9.2.4 In summary, the preferred Air, Water, Noise and Land policies are notably positive in relation to air, climate change, health, water and, to a lesser extent, biodiversity objectives, with no identified adverse impacts.

#### Housing

|                          | Option 1:   |  |

| Water                    | 0   | 0   | 0  |

### Commentary

Option 3 provides a locally applicable approach for both greenfield and brownfield sites which will bring particular benefits to the deprivation, housing and landscape objectives.

It is noted that similar scores would result if contributions were obtained for 6-9 dwellings.

|                          | Option 1: | Option 2:  |

#### Table 107. SA scores for Policy H 5 – Rural Exception Sites

### Commentary

There is similar scoring across Options 2 and 3 but Option 3 provides a more detailed and locally applicable approach which will particularly benefit the housing delivery, landscape, services and travel objectives

# Table 108. SA scores for H 6 (part 1 of 2) – Housing for Older People (Meeting Need)

|                          | Option 1:             | Option 2:             |

| Water                    | 0                     | 0                     |

### Commentary

Option 1 provides a more flexible approach which will benefit housing delivery (for a specific group), alongside the equality, landscape and services objectives while Option 2 would provide more certainty in terms of location but with some unknown

factors at this stage. A mixture of both options may be the best way forward in meeting the relevant SA objectives.

| Water                       | 0   | 0   | 0   | 0   |

### Commentary

Option 2 with a lower threshold would provide greater distribution and is more proactive but this is balanced to some extent by a likely impact on the delivery of smaller sites. Option 3 is more likely to have some benefits in terms of landscape and resources but, based on current requirements, is likely to create a surplus of self/custom build plots and thus benefits are negated somewhat. 2020 evidence now suggests that it will be possible to deliver the majority of the self/custom build development needs through windfall sites which will provide greater distribution across the borough than other options. However, some specific allocations will be required in areas with high needs. The scores for Option 4 reflect this balance.

#### Table 112. SA scores for Policy H9 – Gypsies and Travellers

#### Commentary

Option 1 provides a workable and detailed approach which will benefit housing delivery (for a specific group and family needs) and landscape and noise objectives while Option 2 could be hindered by the landscape or land use objectives and result in less preferred locations in terms of meeting specific family needs.

Gypsy and Traveller needs in the borough are minimal and can mostly be accommodated on existing pitches by adding between 1 and 3 additional pitches. Significant impacts are not predicted from expanding existing pitches. The Pre Submission Local Plan makes one proposal for a new gypsy and traveller site at Greenfields Farm (site DCP\_15) which could potentially accommodate 3 additional pitches. The SA scores for this new site are considered in Chapter 8.

Table 115. SA scores for Policy H 12 – Extensions to Curtilages outside the LBD

### Commentary

Option 2 provides a prescriptive approach as well as detailed guidance which will benefit Landscape, Travel, Land Use, Heritage and Biodiversity objectives.

- 9.2.5 In summary, the preferred Delivery of Housing policies (H1 H5) are generally positive (mainly for Housing and Land Use) or neutral. An exception to this is a negative deprivation score for the vacant building credit policy, but this is the same for the option of no local policy, with no clear potential for mitigation, given the nature of the provision.
- 9.2.6 Similarly, the preferred Types of Housing policies (H6 H12) represent the most sustainable option for each policy area, although it is worth highlighting that options around the extent of a requirement for accessible and adaptable homes, and for site size thresholds for the provision of custom and self-build homes, will be influenced by findings on viability, which is largely outside the scope of the SA.

#### Table 121. SA scores for ED 6 – Commercial etc. Uses in the Countryside

#### Commentary

Option 2 provides a proactive and detailed approach which will be beneficial to economic, landscape, heritage and biodiversity objectives.

Since Draft Local Plan stage, this policy has been updated to provide greater protection to the existing landscape. However, the maximum score has already been applied for this objective and so scores remain unchanged.

| Water                    | 0  | 0          |

#### Commentary

Option 2 provides a more proactive and detailed approach which will be beneficial to air, climate change, employment, landscape and travel objectives.

Since Draft Local Plan stage, this policy has been updated to refer to the Green Belt. As such, the land use objective score has been improved.

9.2.7 It is notable that none of the preferred employment policies score negatively against the objectives, due mainly to the provisions in the respective policies to take account of a wide range of sustainability considerations.

Table 127. SA scores for Policy ED 12 – Retention of Local Services and Facilities

### Commentary

Option 2 provides more detail and guidance which will particularly benefit the travel objectives.

9.2.8 In summary, both existing policies and the proposed revised/updated ones score well, notably against Business Growth, Employment and Services and facilities objectives, with no negative impacts. This is explained by the relevant criteria within policies, with the new policies representing some improvements.

| Water                    | 0   | 0                                  | 0   |

#### Commentary

Option 3 provides more detail, clarity and guidance which will be particularly beneficial to the air, business, health, noise, services and travel objectives.

Removal of the thresholds for requiring travel plans from the Pre-Submission Local Plan policy gives more flexibility and ensures all relevant developments would be subject to preparation of a travel plan. This brings further benefits to the air, climate change and travel objectives (although the travel objective had already been assigned the maximum score so this cannot be demonstrated).

#### Commentary

The scoring for Options 2, 3 and 4 are similar but Option 3 provides more detail, clarity and guidance which supports a locally applicable approach with the

introduction of additional parking zones (based on levels of car ownership for residential schemes) as well as introducing the new concept of car club, while other forms of non-private car mode transport and active travel are encouraged which will be particularly beneficial to travel and landscape objectives.

There are elements of the Pre-submission Local Plan Policy that are an improvement upon the Draft Local Plan policy e.g. the provision of exceptions to the mandatory parking spaces. This amendment will have benefits to the air, climate change and travel objectives. However, this is not reflected in the travel score because the maximum positive score has already been applied.

Table 134. SA scores for TP 6 – Safeguarding Roads (A21 Kippings Cross/ Lamberhurst).

### Commentary

Option 2 provides opportunity for the long-term safeguarding of road improvements as well as improvements to bus services and other forms of active travel which will benefit the travel objective. The climate change score is mixed score to reflect the fact that easing of congestion will reduce idling but also encourage faster speeds See paragraph 0 for an explanation of how scores were determined for this policy.

9.2.9 In summary, the preferred new Transport and Parking policies are improvements on existing policies in terms of a few objectives. The 'safeguarding roads' policies are difficult to assess in detail, as there is no commitment to a scheme.

### Commentary

Although the scoring is similar for Options 1 and 2, Option 2 provides a more prescriptive and detailed approach which will particularly benefit the equality, landscape, noise services and travel objectives.

9.2.10 In summary, the preferred new Open Space, Sport and Recreation policies are found to represent some improvements over existing policies, both for the retention of existing and provision of new open spaces.

# 9.3 Findings

- 9.3.1 The main findings of the above appraisals of the respective development management policies are:
  - the preferred development management policies make a clearly positive contribution towards meeting sustainability objectives
  - where applicable, the preferred new Local Plan policies generally score notably better than options that rely on the national policy framework, benefitting from their regard to local circumstances
  - where preferred Local Plan policies are refinements of existing Local Plan policies, the appraisals often show only marginally improved scores, although these are material and support the proposed changes

# 10. Monitoring

## **10.1** Need for Monitoring

- 10.1.1 The next step following formation of a new Plan and accompanying SA is to monitor the effects of the Plan. Monitoring is a key mechanism to ensure that the implementation of the policies and proposals is consistent with the sustainable aspirations of the Draft Local Plan. The SEA Regulations state that monitoring must be undertaken on the likely significant environmental effects of the implementation of each plan or programme in order to identify at an early stage unforeseen adverse effects and be able to undertake appropriate remedial measures. In line with the integrated approach to impact assessment, monitoring these through the SA is a way of demonstrating success in delivering the Local Plan's targets and reducing its environmental, social and economic impacts.
- 10.1.2 The role of the SA monitoring is to measure the SA indicators and establish a causal link between the implementation of the Local Plan and the likely significant effect being monitored. This enables TWBC to carry out an evaluation of the effectiveness of the Local Plan as a whole in facilitating sustainable development.

## **10.2** Proposed Measures for Monitoring

- 10.2.1 Table 137 below sets out suggested monitoring indicators that could identify whether the overall sustainability aims and objectives of the Draft Local Plan are being delivered.
- Table 137. Monitoring Indicators to determine whether sustainability aims are being delivered.

- 10.2.2 For the purpose of derivation of the sustainable indicators for the Draft Local Plan, monitoring sustainability indicators could be analysed using the following sources:
- 10.2.3 The sources of information for the monitoring of the sustainability impacts are listed below:
  - KCC Business Intelligence Publications including aspects of population, poverty, housing, economy and employment (broken down into borough level data)

- Internal TWBC monitoring including the five-year housing land supply and a review of planning applications within or near to environmental constraints
- Various additional sources already listed within Appendix B of the Stage A Scoping Report

10.2.4 This list can be refined as the Local Plan process progresses towards Reg 19.

# Appendix B – Decision-aiding question used for scoring SA objectives

| Торіс      | Objective               | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting                        | Comments / Limitations  |
|------------|-------------------------|---|----------------------------------|---|
| Air        | 1. Reduce air pollution | help meet $NO_2$ and $PM_{10}$ targets along the A26 in Royal Tunbridge Wells?  | HIGH<br>Legislatively<br>driven. | Consideration was given to what extent a development was likely to increase traffic in the AQMA (or in the AQMA of neighbouring authorities)  |
| (as above) | (as above)              | support opportunities for improving<br>air quality such as low emission<br>vehicles, expansion of existing car<br>club and other shared transport<br>options? |                                  | The following guide was implemented for residential dwellings:<br><50 dwellings: 0<br>50 - 150 dwellings: - or +<br>>150 dwellings: or + +  |
| (as above) | (as above)              | promote forms of active travel including cycling and walking?   |                                  | Desirable travel distances were considered. Where a site was within desirable walking distance, the<br>following guide was implemented for residential dwellings:<br><50 dwellings: +<br>>50, <150 dwellings: + +<br>>150 dwellings: + + +<br>Where a site was not well located or outside of desirable walking distance, the following guide was<br>implemented for residential dwellings:<br><1km - (<50 dwellings), (>50 dwellings)<br>>1km (<50 dwellings), (>50 dwellings)<br>CIHT define desirable walking distances as follows:<br>town centre = 200m<br>commuting/school = 2000m<br>elsewhere = 1200m |

Table 141. Decision-aiding questions used for scoring sustainability objectives

| Торіс              | Objective  | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting   | Comments / Limitations   |
|--------------------|--|---|---|--|
| (as above)         | (as above)   | help reduce premature deaths from poor air quality (cause by PM <sub>2.5</sub> )?   | HIGH<br>Lives at stake.                                       | Consideration was given to sensitive receptors.  |
| Biodiversity       | 2.Protect and<br>enhance<br>biodiversity<br>and the natural<br>environment | protect and enhance sites of<br>biodiversity value across the borough<br>(LNR, LWS, SLNCV, RNR, BOA and<br>undesignated habitat)?   | MEDIUM<br>Many sites are<br>finite habitats                   | Undesignated habitat includes corridors, networks and linking routes. Consideration of whether a site would protect or improve a site of biodiversity value, or whether there is a risk of degradation or loss.  |
| (as above)         | (as above)   | avoid inappropriate development in<br>the Ashdown Forest protection zone<br>and ensure compliance with the<br>Habitat Regulations?  | HIGH<br>Ashdown Forest is<br>of international<br>significance | Consideration of whether likely significant effects will occur and whether effective mitigation is available (SANGS/SAMMS)   |
| (as above)         | (as above)   | support work to improve condition of SSSIs?   | HIGH<br>SSSIs are of<br>national<br>significance              | Consideration of whether a site would protect or improve a SSSI, or whether there is a risk of degradation or loss. Impact Risk Zones are taken into account.  |
| Business<br>Growth | 3.Encourage<br>business<br>growth and<br>competitivenes<br>s               | help support existing business and the growth of new businesses?  |   | Consideration of the four reasons for business decline in the borough: broadband speeds, suitability of premises, useful transport links and availability of staff. In most cases the contribution of new customers to support existing business was considered insignificant. |
| (as above)         | (as above)   | support growth of the local<br>economy from professional and<br>financial services, health and<br>education, and construction-related<br>activities.  |   | Where construction services would be supported on a temporary basis only, no benefit was recorded.   |
| (as above)         | (as above)   | prevent loss of economic floor<br>space in preference for housing and<br>other non-employment generating<br>used within Key Employment Areas<br>and other well located employment<br>sites (where appropriate)? |   | Scores adjusted to reflect the scale of economic flood space that would be lost or gained.   |
| (as above)         | (as above)   | recognise and help develop the rural economy?   |   | Impacts on rural economy from loss of agriculture not considered significant unless large scale losses were proposed.  |

| Торіс                         | Objective   | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting  | Comments / Limitations   |
|-------------------------------|---|---|--|--|
| Climate<br>Change &<br>Energy | 4.Reduce<br>carbon<br>footprint and<br>adapt to<br>predicted<br>changes | relieve the pressures of climate<br>change such as extreme weather on<br>agriculture, health services, transport<br>network, ecology etc. through<br>adaptation measures? |  | Small development (<50 dwellings) was deemed unlikely to provide significant adaptation.<br>For larger development, benefits would depend on successful implementation of DM policy and development priorities. In these cases, an unknown score was often applied.  |
| (as above)                    | (as above)  | support reduction in carbon and<br>energy so targets are consistently<br>met?   | HIGH<br>Targets are<br>currently not being<br>met. | The following guide was implemented for residential dwellings:<br><50 dwellings: 0<br>50 - 150 dwellings: -<br>150 - 500 dwellings:<br>>500 dwellings:   |
| (as above)                    | (as above)  | support opportunities to utilise biomass in the borough?  |  | Consideration was given to existing local air quality, with areas of poor air quality considered inappropriate locations for biomass.<br>In other areas, benefits would depend on successful implementation of DM policy and development priorities. For this reason, an unknown score was often applied.            |
| (as above)                    | (as above)  | support opportunities to install<br>community heating schemes?  | LOW<br>Opportunities are<br>limited                | Consideration was given to viability and practical constraints such as reliable heat sources. This sort of heating scheme is unlikely to be possible for small settlements.  |
| Deprivation                   | 5.Reduce<br>poverty and<br>assist with<br>regeneration                  | address pockets of deprivation and encourage regeneration?  |  | Regeneration was considered to be development in a location that is run-down and without purpose.  |
| (as above)                    | (as above)  | reduce rates of fuel poverty?   |  | New dwellings would be built to more stringent energy efficiency standards than existing. However, they are likely to be unaffordable to lower incomes residents who may also suffer from fuel poverty so benefit unlikely to be seen. For this reason, most new development did not have an impact upon this issue. |
| Education                     | 6.Improve<br>educational<br>attainment and<br>enhance the               | meet demand for school places?  |  | Consideration of local circumstances including the ratio of applicants to places at the nearest primary school (average taken for last 5 years) and scale of potential residential development.  |

| Торіс          |  | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting  | Comments / Limitations  |
|----------------|--|---|--|---|
|                | skills base  |   |  |   |
| (as above)     | (as above)   | continue to support a high<br>proportion of highly qualified<br>residents?                            |  | Consideration of the provision of adult education centres.  |
| Employmen<br>t | 7.Facilitate and<br>support<br>employment<br>opportunities                 | improve employment opportunities in key wards?  | LOW<br>Unemployment in<br>borough is very low<br>generally | Consideration of employment opportunities in terms of their provision, access via public transport<br>and potential for developing new skills. Where job creation is likely, scores improve in wards with<br>relatively high unemployment rates at present (St James and Sherwood). Many proposed<br>development sites score a + to reflect the temporary jobs created by construction.                                   |
| Equality       | 8.Increase<br>social mobility<br>and inclusion                             | improve physical activity rates for low income population groups?                                     |  | Measures considered necessary to improve physical activity rates included leisure centres, improved sports provision and outdoor gyms/open space.   |
| (as above)     | (as above)   | improve social mobility problems<br>caused by selective grammar<br>schools?                           |  | Fee paying schools were ignored in this consideration. The county council offers free transport to the nearest appropriate school over 3 miles. Thus 3 miles was used as a cut off. Where there was choice of non-selective schools within 3 miles, positive scores were applied. Where the nearest non-selective school was over 3 miles and one or more selective schools were closer by, negative scores were applied. |
| (as above)     | (as above)   | promote independent access to facilities for people with mobility, sensory and cognitive impairments? | HIGH<br>Legislatively<br>driven.                           | Independent access was considered possible where facilities could be reached safely without the use of a car. Desirable walking distances (see air quality objective above) were not applicable to this objective. Instead, distances of 1 mile or greater were considered inconvenient and scored negatively.  |
| Health         | 9.Improve<br>health and<br>wellbeing, and<br>reduce health<br>inequalities | meet demand for elderly care services?  | HIGH<br>Growing elderly<br>population.                     | This objective considered the potential for C2 use.   |
| (as above)     | (as above)   | improve physical activity rates for at risk population groups?  |  | This objective was scored where high populations of at risk groups lived i.e. RTW, Southborough,<br>Paddock Wood and Cranbrook. Measures considered necessary to improve physical activity rates<br>included leisure centres, improved sports provision and outdoor gyms/open space.  |
| (as above)     | (as above)   | address pockets of health deprivation and specialist health   |  | Pockets of health deprivation have been recorded in Hawkhurst, Sandhurst, Benenden, Cranbrook, Pembury, Sherwood, Southborough, High Brooms, Rusthall, Broadwater and St James. Specialist  |

| Торіс      |   | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting   | Comments / Limitations   |
|------------|---|---|---|--|
|            |   | needs?  |   | health care needs included provision for cancer, mental illness, stroke and asthma sufferers.  |
| (as above) | (as above)  | meet need for accessible green<br>open space and recreation facilities<br>for all?                          | HIGH<br>TWBC is already<br>behind on these<br>standards                             | Scores applied depending on the extent to which a proposal or location meets all of the ANG standards. Where none are met, the distance to, and size of, the nearest area determined how negative the score should be. |
| (as above) | (as above)  | ensure residents can access<br>heritage assets?   |   | Consideration of accessibility related to provision (or lack of) pedestrian routes and new modes of travel or access routes.   |
| Heritage   | 10.Preserve<br>and enhance<br>historical and<br>cultural<br>heritage assets | protect sites, features, areas and settings of archaeological, historical and cultural heritage importance? | HIGH<br>Assets and settings<br>are often finite or<br>hard to restore<br>once lost. | Scores reflected protection (or risk to protection) and the extent of harm or enhancement that would result.   |
| (as above) | (as above)  | provide a framework for a positive<br>heritage strategy including<br>enhancements in line with NPPF?        |   | This score was applied where specialist heritage advice identified opportunities.  |
| Housing    | 11.Provide<br>sufficient<br>housing to<br>meet identified<br>needs          | meet identified needs for affordable housing?   | HIGH<br>Housing demands<br>are in borough are<br>not being met.                     | The following guide was implemented for residential dwellings to reflect the high need in all locations:<br><50 dwellings: 0<br>50 - 150 dwellings: + +<br>>150 dwellings: + +   |
| (as above) | (as above)  | meet demand for independently accessible housing and housing suitable for older people?                     | HIGH<br>Housing demands<br>are in borough are<br>not being met.                     | Successful adoption and implementation of DM policy would determine whether housing is accessible. Housing suitable for older people considered safe distance to local facilities and services.                        |
| (as above) | (as above)  | meet demand for 2 and 3 bed<br>market housing to suit expanding<br>families?                                | HIGH<br>Housing demands<br>are in borough are<br>not being met.                     | DM Housing Mix Policy would address this where it is relevant to local needs.  |

| Торіс      | Objective  | Decision-aiding questions:<br>Does the Policy/Plan/Objective?   | Weighting                         | Comments / Limitations  |
|------------|--|---|-----------------------------------|---|
| (as above) | (as above)   | make allowances in housing<br>targets due to environmental<br>constraints in the borough?   |                                   | Scores were applied to reflect whether the degree to which a high quantum of development was reduced to provide environmental protection.   |
| Land use   | 12.Protect<br>soils, and<br>reuse<br>previously<br>developed land<br>and buildings | protect Green Belt?   |                                   | Consideration given to whether a policy would detract or respect/enhance the 5 purposes of the Green Belt.  |
| (as above) | (as above)   | develop on previously developed in<br>preference to greenfield land?  |                                   | Positive scores were applied to policies that proposed development on brownfield land and negative to those on greenfield land (with consideration of scale of greenfield land lost and location of brownfield land). |
| (as above) | (as above)   | prioritise development on lower grade agricultural soils?   |                                   | Consideration of the area of soils that are lost or protected where the loss or protection of >20ha of best and most versatile soils is scored as or + + + respectively.  |
| Landscape  | 13.Protect and<br>enhance<br>landscape and<br>townscape                            | protect and enhance the High<br>Weald AONB and historic<br>landscape?   | Great weight as<br>per NPPF       | Consideration of risk to or protection of AONB features and the scale/setting/pattern of development.   |
| (as above) | (as above)   | protect and enhance ancient<br>woodland and provide opportunities<br>for management of new and existing<br>woodland that would benefit local<br>and global environment, landscape,<br>biodiversity, recreation, tourism, jobs,<br>health & wellbeing, water quality,<br>flooding? | HIGH<br>AW is a finite<br>habitat | Consideration of the risk to or protection of these features alongside availability of management opportunities. This includes a consideration of light pollution.  |
| (as above) | (as above)   | strengthen Green Infrastructure?  |                                   |   |
| (as above) | (as above)   | protect and enhance landscape<br>and townscape character and<br>quality?  |                                   | Judgement of whether impacts are likely to be adverse or positive and to what extent. Landscape character sensitivity also considered.  |
| Noise      | 14.Reduce<br>noise pollution   | consider noise pollution in<br>Important Areas for Road Noise?  |                                   | Includes a consideration or both new noise generation and experience of existing noise by receptors. The following score guide was for implemented for residential dwellings:   |

| Торіс                         | Objective   | Decision-aiding questions:<br>Does the Policy/Plan/Objective?  | Weighting  | Comments / Limitations   |
|-------------------------------|---|--|--|--|
|                               |   |  |  | Adjacent: -<br>Adjacent and >100:<br>Adjacent and > 500:   |
|                               |   |  |  | DEFRA noise maps were viewed   |
| (as above)                    | (as above)  | consider noise pollution from aircraft and trains?   |  | Consideration of the extent to which residential development is located within the main Gatwick flight path or near to mainline railway, and the provision of mitigation to improve the existing situation.  |
| Resources                     | 15.Reduce the<br>impact of<br>resource<br>consumption                     | prevent unsustainable demolition<br>and rebuild projects?  |  | The extent to which demolition of existing structurally sound development is required or prevented.  |
| (as above)                    | (as above)  | improve use of responsible sourced<br>and low environmental impact<br>materials e.g. traditional<br>weatherboarding? |  | Responsible sourcing/low impact materials to be encouraged through policy. Would depend on successful implementation of DM policy and development priorities. In these cases, an unknown score was often applied.  |
| Services<br>and<br>facilities | 16.Improve<br>access to and<br>range of key<br>services and<br>facilities | support the contribution to the local economy from tourism?  | LOW<br>Tourism<br>contributes a<br>relatively small<br>amount to local<br>economy                          | The extent to which tourism is supported or discouraged by policy.   |
| (as above)                    | (as above)  | support superfast broadband<br>connectivity in final 5% of the<br>borough?   | LOW<br>Most locations now<br>have reasonable<br>speeds   | Consideration of availability and speeds of broadband at appropriate local postcode.   |
| (as above)                    | (as above)  | improve range of services and facilities especially in rural settlements?  | HIGH<br>A critical issue<br>when determining<br>where to develop.<br>More weight if a<br>rural settlement. | Consideration of availability of the 9 key services i.e. post office, convenience store, public house, doctor's surgery, primary school, secondary school, frequent bus service (hourly Mon-Sat), train station and supermarket. Scores applied as follows:<br>9 services: +<br>6-8 services only: -<br>5 service or less: |

| Торіс      | Objective  | Decision-aiding questions:<br>Does the Policy/Plan/Objective?                  | Weighting  | Comments / Limitations  |
|------------|--|--|--|---|
|            |  |  |  | 5 services or less and loss of existing:  |
|            |  |  |  | More positive scores reflect provision of additional services.  |
| (as above) | (as above)   | retail and leisure growth?   |  | Leisure interpreted as including sports, cinema and restaurants. Scores reflect provision or removal of retail and leisure.   |
| (as above) | (as above)   | improve access to services and facilities especially in rural settlements?     | HIGH<br>A critical issue<br>when determining<br>where to develop.<br>More weight if a<br>rural settlement. | Consideration of desirable walking distances and accessibility by various modes of transport. Where services can only be reached via private car, a score is applied.   |
| Travel     | 17.Improve<br>travel choice<br>and reduce the<br>need to travel<br>by private<br>vehicle | support priority transport projects?   |  | Project identified in the borough's transport and cycling strategies.   |
| (as above) | (as above)   | prioritise easy access to train<br>stations within and outside the<br>borough? |  | <ul> <li>3-5 miles or limited public transport: -</li> <li>5-10 miles or very limited public transport:</li> <li>&gt;10 miles or no public transport</li> <li>Positive scores reflect accessibility by various modes of transport for stations within 3 miles. Where a train station can be accessed conveniently and safely on foot a + + + score is applied.</li> </ul> |
| (as above) | (as above)   | improve rural bus services and retain viability of urban bus services?         | LOW<br>Bus users are<br>generally low in<br>borough  | Consideration of whether a bus service would be improved or worsened by policy.   |
| (as above) | (as above)   | support opportunities for active travel including cycling and walking?         |  | Same scoring method as for air quality.   |
| Waste      | 18.Reduce<br>waste<br>generation and   | support continued decline in household waste reduction?                        |  | Proposed site allocation unlikely to make a significant difference to this objective.   |

| Торіс      | Objective   | Decision-aiding questions:<br>Does the Policy/Plan/Objective?  | Weighting                                       | Comments / Limitations  |
|------------|---|--|---|---|
|            | disposal  |  |   |   |
| (as above) | (as above)  | improve rates of household waste diverted from landfill?   |   | Outside the scope of proposed site allocations.   |
| (as above) | (as above)  | reduce construction waste?   |   | Would depend on successful implementation of DM policy and development priorities. In these cases, an unknown score was often applied.  |
| Water      | 19.Manage<br>flood risk and<br>conserve,<br>protect and<br>enhance water<br>resources | reduce water consumption rates?  |   | Would depend on successful implementation of DM policy and development priorities. In these cases, an unknown score was often applied.  |
| (as above) | (as above)  | manage impacts from flooding?  |   | Improvements resulted in a positive score, maintaining the status quo or worsening impacts resulted in a negative score.  |
| (as above) | (as above)  | exacerbate flood risk on or off site?  | HIGH<br>Legislatively<br>driven.                | Consideration of flood zones and areas of flooding identified by the SFRA. Development in flood zone 1 was scored as + + + where the site did not feature on the 1 in 30 or 1 in 200 exceedance maps in the SFRA. |
| (as above) | (as above)  | support improvements in groundwater quality?   |   | Consideration of groundwater sources protection zones and risk of their contamination.  |
| (as above) | (as above)  | relieve ecological pressures in<br>water bodies from agriculture, water<br>industry and rural land management<br>activities? | HIGH<br>Water stress in the<br>region is severe | The following guide was implemented for residential dwellings:<br><50 dwellings: 0<br>50 - 150 dwellings: -<br>150 - 500 dwellings:<br>>500 dwellings:  |

# Appendix C – Mitigation Measures and Recommendations

Mitigation measures proposed by the SA for the Local Plan varied depending on the aspect being considered. For site allocations, specific mitigation measures such as the requirement for landscape buffers were recommended. Other parts of the plan were more nuanced and involved a slight change in policy wording or emphasis to better meet the goals of sustainable development.

The following list provides a summary of the recommendations that were made during the process of drafting the Local Plan in order to mitigate adverse effects and enhance positive effects. The Local Plan has taken all these recommendations into account and made changes wherever possible.

#### **Strategic Objectives**

- Reference to climate change should be made.

#### Strategic Objectives including the Spatial Development Strategy

- The Local Plan should be guided by the availability of infrastructure e.g. regarding education and green infrastructure.
- In rural areas, growth should be accompanied by improvements to services, facilities and transport.
- An approach for growth combining elements of multiple strategies would be beneficial in helping to minimise negative impacts.
- Position a garden settlement in a location that:
  - o is well outside the AONB;
  - o can achieve Accessible Natural Greenspace Standard;
  - o benefits a pocket of deprivation;
  - o draws traffic away from the AQMA;
  - o eliminates impacts from flooding; and,
  - o provides employment opportunities for key wards

## **Potential Development Sites**

- Numerous site-specific recommendations were made. Examples are included below:

- Incorporate landscape and open space buffers to sites with sensitive landscape features
- Incorporate management expectations for well-related sites of biodiversity value
- Include wording that offers protection for trees and non-ancient woodland
- Policy wording should include appropriate reference to flood zones and associated mitigation
- Strengthen wording on transport mitigation and promotion of active/sustainable travel especially in Royal Tunbridge Wells
- Add reference to community heating schemes in Royal Tunbridge Wells
- Provide greater detail about retail, leisure and energy expectations in Tudeley Village policy
- Add expectation for improvements to Accessible Natural Greenspace Standards to the expectations for both the Tudeley Village and the Paddock Wood extension
- Make reference to car share facilities, Electric Vehicle infrastructure and climate change mitigation such as reduced fuel use in new dwellings
- Strengthen wording relating to protecting heritage features from 'have consideration to' to 'protect and enhance'
- Seek contributions to bus services and make reference to demand responsive bus services wherever feasible
- Replace word 'explore' in relation to employment provision with 'provide'
- Strengthen wording regarding ecological mitigation
- Provide for safer pedestrian access routes
- Seek contributions for improved allotment provision
- Make reference to SSSI Impact Risk Zones and Biodiversity Opportunity Areas
- Make reference to Groundwater Source Protection Zones
- Include wording to avoid demolition wherever possible
- Include a requirement for new secondary schools to be non selective and mixed gender
- Provide noise barriers
- Protect soils with the highest value for agriculture
- Retain hedgerows

#### **Development Management Policies**

- Implement new Development Management policy that cover the following topics:
  - o Preventing loss of economic floor space in preference for housing
  - Resource conservation and waste management
  - Water conservation and implementation of the government's higher options technical standard for water
  - o Fuel poverty

- Improve policy wording for elderly care (C2)

# Appendix D - Cumulative Impact Assessment Methodology

For each settlement, a table was produced summarising the individual matrices for the sites proposed to be taken forward for allocation. The table shows how each proposed site allocation for that settlement impacts on each sustainability objective. Reading down the columns it is possible to see how many of the site allocations impact on each objective and whether that impact is beneficial or adverse, and minor or significant. At the bottom of each table, a row has been inserted showing the likely cumulative effect of the individual sites against each sustainability objective. The cumulative score has been determined as follows:

- where a high number of the sites generate a beneficial impact against the sustainability appraisal, the cumulative impact is likely to be a significant beneficial effect
- where a high number of sites generate an adverse impact against the sustainability appraisal, the cumulative impact is likely to be a significant adverse effect
- where a high number of sites generate an uncertain impact against the sustainability appraisal, the cumulative impact is likely to be uncertain
- where a high number of sites generate no significant impact or where the beneficial and adverse impacts are likely to cancel each other out, the cumulative impact is likely to be no significant impact

Where effects can be summed such as in the case for pressure on the climate, education or water resources, a more highly negative or positive score is applied than the average across the sites.

Where the impacts are more mixed, including both beneficial and adverse impacts, a judgement is made as to whether the cumulative impact is likely to be minor beneficial, minor adverse, not significant or uncertain.

### Commentary

See settlement tables in Appendices F, I, H, R and U for commentary on individual allocated sites. Green Belt land is being released to allow for various types of development in the plan period. Scores are applied to reflect the impacts that the proposed Green Belt releases would have on each sustainability objective thus this is, in effect, a cumulative impact assessment of Green Belt release sites. The addition of 1.1ha of land to the Green Belt (Land West of Colts Hill, close to Badshell Road) is also considered within the cumulative scores. The scale of Policy STR/SS 1 and STR/SS 3 in comparison to the other allocations, dominates this assessment of cumulative effects. Mix scores are assigned for air and water to reflect the wide variety of scores across the sites.

Note. C/B House: Land at Colebrook House, Pembury Rd is not allocated within the Local Plan but will be released from the Green Belt

| Waste                       | 0   | 0   | 0   | 0  |
| Water                       | 0   | 0 / +   | 0   | 0  |
| Commentary                  | The majority of objectives for this site<br>score as unknown, neutral or positive.<br>The negative score given for heritage is<br>informed by the location of the site in the<br>Tunbridge Wells Conservation Area and<br>the positive contribution the existing<br>buildings and their setting is considered<br>to make to the Conservation Area.<br>Demolition of these buildings is expected<br>to be necessary. | Air quality score is mixed to reflect fact that<br>development here is likely to increase traffic in<br>the AQMA whilst also presents opportunities to<br>make improvements most likely in the form of<br>contributions that benefit the wider town. Flood<br>zones 2 and 3 present on site are unlikely to<br>prevent development and can be factored into<br>scheme design. 2020 MGB Study: Overall Harm<br>Rating is Low Moderate. The resources objective<br>is informed by the minor impact on Superficial<br>Sub-Alluvial River Terrace deposits. | This is a large site that would make a<br>significant positive contribution to the<br>housing objective. However, the<br>substantial use of private vehicles in this<br>location causes the noise and air objectives<br>to score very negatively. The site also has<br>sensitive biodiversity, heritage and<br>landscape features, and is in a parcel of<br>Green Belt that would constitute very high<br>harm if released for development. This<br>causes the land use objective to be given a<br>highly negative score. | This site scores mostly neutral scores with some positive ones. It is let<br>down on its heritage score, influenced by the sites location in the<br>Tunbridge Wells Conservation Area and being adjacent to Dunorlan<br>Park, an Historic Park and Garden. Part of the site has archaeological<br>potential which influences this score too. The site is a greenfield site<br>and a small part of a larger Green Belt parcel the release of which<br>would cause very high harm. The score for land use has been adjusted<br>to reflect the size of the site. The negative landscape score is influenced<br>by the impact the site has on the setting of the landscape whilst the<br>negative score for noise has been informed by the sites position along<br>the Pembury Road. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 2 of 12)

|                             | 53   | 53  | 57  | 72  |
|-----------------------------|--|---|---|---|
| Sustainability<br>Objective | WHOLE SITE: Plot A: Land to the north of Hawkenbury<br>Recreation Ground and Plot B: Land to the east and north of<br>Hawkenbury allotments, Hawkenbury,   | PART SITE: Plot A: Land to the north of<br>Hawkenbury Recreation Ground and<br>Plot B: Land to the east and north of<br>Hawkenbury allotments, Hawkenbury,  | Land adjacent to Longfield Road, Tunbridge<br>Wells   | Former North Farm landfill site,<br>North Farm Lane, Tunbridge<br>Wells TN2 3EE (including 261)   |
| Services &<br>Facilities    | +++  | +++   | 0   | +   |
| Travel                      | +  | +   | 0 / +   | 0 / +   |
| Waste                       | 0  | 0   | 0   | 0   |
| Water                       | 0  | 0   | 0   | 0 / +   |
| Commentary                  | This site on balance is highly sustainable, the parcel to the north being<br>less so as it is more detached from the built up area than the southern<br>parcel. Most scores are neutral and there are positive scores. The site<br>scores negatively for heritage being a large site immediately adjacent<br>to an Historic Park and Garden and having a negative impact on the<br>setting of this and the landscape setting of Tunbridge Wells. A negative<br>score for land use is influenced by the loss of a greenfield site, part of a<br>broader Green Belt parcel that would cause very high harm if released<br>from the Green Belt, the score adjusted to reflect fact that site is part<br>of the bigger parcel. It also results in the loss of grade 3 agricultural<br>soils. The site forms part of the landscape setting of Tunbridge Wells<br>and would result in the loss of a greenfield site in the AONB (negative<br>landscape score given). | This site is highly sustainable. All objectives<br>are neutral or positive except for<br>landscape, land use and noise which is<br>slightly negative due to the potential for<br>sports uses to create disturbance. When<br>scoring the Landscape objective, it was<br>assumed that the proposed use of flood<br>slights would cause some negative impact<br>to dark skies. The 2020 LVIA study also<br>influences landscape score. Health and<br>services score better than most sites in the<br>vicinity due to the proposal for sports use.<br>2020 MGB Study: Overall Harm Rating is<br>Moderate. | The Employment objective scores very highly due to<br>the creation of new jobs in a ward that has one of<br>the highest levels of unemployment in the borough.<br>Landscape score reflects the significant but, but<br>short-term impacts that will lessen once the<br>woodland to the east matures (2020 LVIA report).<br>2020 Grassland study found site to have moderate<br>botanical importance and moderate ecological<br>importance. Biodiversity score adjusted. Business<br>growth score reflects the large scale of the site and<br>probability that the business park would support<br>growth of the local economy in key industries. 2020<br>MGB Study: Overall Harm Rating is Moderate. | Water objective is given an<br>unknown score as, while it is likely<br>that flood issues on site can be<br>overcome, the specific proposed<br>use is not detailed and thus<br>consumption requirements are<br>unclear. The Employment objective<br>scores very highly due to the<br>creation of new jobs in a ward that<br>has one of the highest levels of<br>unemployment in the borough.<br>Climate change objective is scored<br>as unknown as there is potential for<br>a solar farm on the site but no<br>guarantees are given. |

|                             | 73   | 99  | 101  | 100   |

| Services & Facilities       | ++  | ++  | 0  | ++   |
| Travel                      | +   | +   | 0 / +  | + +  |
| Waste                       | 0   | 0   | 0  | 0  |
| Water                       | 0   | 0   | 0  | 0  |
| Commentary                  | This site scores a number of neutral scores with<br>some positive ones. Negative scores are given<br>for air, heritage, land use and landscape and<br>noise. The site is a greenfield site in the AONB,<br>part of a larger Green Belt parcel of land that<br>would cause very high harm if released from the<br>Green Belt. The land use score has been adjusted<br>to reflect site is a smaller part of the larger<br>parcel. The location of the site along Pembury<br>Road relative to distance to key services and<br>facilities and ease of use by pedestrians is likely<br>to encourage car use. This has informed the air<br>score given. Noise score reflects location along<br>the busy Pembury Road. | This site scores a number of neutral scores with some positive<br>ones. Negative scores are given for air, climate change, heritage,<br>land use, landscape and noise. The site is a greenfield site in the<br>setting of the AONB and part of a Green Belt parcel of land that<br>would cause high harm if released. The location of the site along<br>Pembury Road relative to distance to key services and facilities is<br>likely to encourage car use. This has informed the air score and<br>climate change score given. Noise score reflects location along<br>the busy Pembury Road. The site forms part of the landscape<br>setting of the main urban area of Tunbridge Wells and helps<br>prevent coalescence between Tunbridge Wells and Pembury,<br>the frontage is within the Conservation Area. This has influenced<br>the heritage and landscape scores given. | The Employment objective scores very highly due to the creation of new jobs in a ward that has one of the highest levels of unemployment in the borough. Air Quality scores slightly negatively compared to the adjacent site (Policy RTW 17) because of the direct vehicular access with the A21 making extensions to bus routes serving the retail park more cumbersome, and encouraging private car use.2020 Grassland study found site to have low-moderate botanical importance and moderate ecological importance. Biodiversity score adjusted slightly. Business growth score reflects the scale of the site and probability that the business park would support growth of the local economy in key industries. 2020 MGB Study: Overall Harm Rating is Moderate. | This site has a range of strong<br>positive scores. It is let down by<br>the land use score which reflects<br>the loss of greenfield land in the<br>Green Belt. 2020 MGB Study:<br>Overall Harm Rating is Low<br>Moderate. |

|                             | 114  | 116  | 134  | 137  |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 4 of 12)

|                             | 114  | 116  | 134   | 137   |
|-----------------------------|--|--|---|---|
| Sustainability<br>Objective | Land at Sandown Park, west of<br>A21, Royal Tunbridge Wells TN2<br>4RT   | Land south of Pembury Road,<br>Tunbridge Wells   | Land around Sandstone House,<br>Longdrift, Court Lodge &<br>Shallowdene, Broadwater<br>Down, TN2 5PE  | PART SITE: Land to the west of Eridge Road at Spratsbrook Farm, Royal Tunbridge<br>Wells TN3  |
| Services & Facilities       | ++   | ++   | ++  | ++  |
| Travel                      | 0  | +  | + / + +   | +/++  |
| Waste                       | 0  | 0  | 0   | 0   |
| Water                       | 0  | 0  | 0   | ?   |
| Commentary                  | This site scores a number of neutral<br>scores with some positive ones.<br>Negative scores are given for air,<br>land use and noise. Land Use score<br>is informed by the loss of a<br>greenfield site which is part of a<br>Green Belt parcel the release of<br>which would cause high harm. Air<br>and noise scores are influenced by<br>the location of the site adjacent to<br>the A21 and close to the Pembury<br>Road. | Site scores neutral scores and some<br>positives. Negative scores have been<br>given for land use, landscape and<br>biodiversity. The site is a greenfield site<br>in the AONB, a woodland parcel, the<br>loss of which would be detrimental to<br>the AONB, reflected in the negative<br>landscape score given along with<br>impact on the setting of Tunbridge<br>Wells. Land use is influenced by the site<br>being the Green Belt, part of a parcel<br>that would cause very high harm if<br>released. The negative biodiversity<br>score is influenced by the wooded<br>nature of the site. | This site scores mostly neutral<br>scores with several positive ones.<br>It scores a slight negative for<br>noise, a reflection of the location<br>of the site near the A26 Eridge<br>Road. The heritage and landscape<br>scores are informed by the<br>possibility that development of<br>the site will impact upon the<br>setting of the Conservation Area<br>and affect townscape quality. | This site traverses the boundary with Wealden district thus cross boundary impacts have<br>been considered. Negative impacts that have been predicted for the landscape objective<br>apply to the AONB in both constituencies.<br>The scores for this site are mixed. Despite likely contributions to improved active travel and<br>sustainable transport options, air quality is scored as negative overall because of the large<br>size of the development and likelihood that new vehicles will utilise the A26 as a through<br>route. The Water objective is scored as mixed overall to reflect the conflict between the site<br>being in flood zone 1 but also increasing demand on existing water supplies. A negative score<br>is applied for noise because the site is near to the main Gatwick flight path and is likely to<br>result in a large increase of vehicle movements onto a road that already experiences high<br>levels of road noise. The negative land use and landscape scores reflect impact upon the<br>sensitive AONB landscape and the loss of greenfield land which is also Green Belt. Heritage is<br>scored negatively due to the compromised setting of the Hill Fort (a Scheduled Ancient<br>Monument) and loss of assart field. 2020 MGB Study: Overall Harm Rating is Low Moderate. |

|                             | 140   | 145  | 165   | 175  |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 5 of 12)

|                             | 140   | 145   | 165   | 175  |
|-----------------------------|---|---|---|--|
| Sustainability<br>Objective | Knights Park, Tunbridge Wells, TN2 3UW<br>(including 138 and 139)   | Turner Pie Factory Site, Broadwater Lane,<br>Tunbridge Wells TN2 5RD  | Pantiles Car Park, Major Yorks Road, Tunbridge<br>Wells TN2 5TP   | Court Lodge & Land to rear of Sandstone<br>House, 44 Broadwater Down, Tunbridge<br>Wells TN2 5PE   |
| Travel                      | 0 / +   | + / + +   | + / + +   | + / + +  |
| Waste                       | 0   | 0   | 0   | 0  |
| Water                       | 0   | 0   | 0   | 0  |
| Commentary                  | Scores were applied based on an assumption that this<br>site would provide further retail and leisure uses. The<br>Employment objective scores very highly due to the<br>creation of new jobs in a ward that has one of the<br>highest levels of unemployment in the borough. A<br>slight positive score for Air reflects the probability that<br>intensification of leisure use will involve loss of some<br>parking spaces thus forcing users to consider the<br>alternative modes of transport that already exist and<br>would be further improved by this allocation.<br>However, business growth and services objective score<br>negatively to reflect the findings of the Town Centre<br>Uses report that states that future development<br>should be focussed in the centre of the town. | This is a reasonable site with potential noise<br>and air issues being the only slight detractors<br>along with Business Growth. Noise and air<br>scores are informed by the location of the site<br>near the A26 and the Business Growth score is<br>influenced by loss of employment space on the<br>site. However, it is accepted that the existing<br>busines was no longer viable, so this score is<br>only slightly negative. | This site scores a number of both neutral and<br>positive scores. It scores negative on biodiversity,<br>heritage, land use and landscape as well as noise.<br>The biodiversity score is influenced by the sites<br>position, surrounded by the Tunbridge Wells and<br>Rusthall Common a designated Local Wildlife Site.<br>The land use score is influenced by the site location<br>in the Green Belt, being part of a larger parcel the<br>release of which would cause very high harm. The<br>landscape score is reflective of the contribution the<br>site along with the wider Common makes to the<br>setting of Tunbridge Wells and concern about effect<br>on townscape arising from development of the site.<br>The negative noise score is influenced by the site<br>location relative to the A26. | This site scores mostly neutral scores with<br>several positive ones. It scores a slight negative<br>for noise, a reflection of the location of the site<br>near the A26 Eridge Road. The heritage and<br>landscape scores are informed by the possibility<br>that development of the site will impact upon<br>the setting of the Conservation Area and affect<br>townscape quality. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 6 of 12)

|                             | 176   | 198  | 226   | 235  | 236   |
|-----------------------------|---|--|---|--|---|
| Sustainability<br>Objective | Former Plant and Tool Hire site on<br>Eridge Road, Tunbridge Wells TN4 8HJ  | Tunbridge Wells<br>Telephone Engineering<br>Centre, Broadwater Lane,<br>Tunbridge Wells TN2 5RE  | St Mark's Recreation Ground,<br>Frant Road, Tunbridge Wells,<br>TN2 5LS   | Land at Culverden<br>Stadium, Culverden<br>Down, Royal Tunbridge<br>Wells, TN4 9SG                     | Land at Bayham Sports Field West, Bayham Road,<br>Tunbridge Wells   |
| Travel                      | +/++  | +/++   | +   | +  | 0   |
| Waste                       | 0   | 0  | 0   | 0  | 0   |
| Water                       | 0   | 0  | 0   | 0 / +  | 0   |
| Commentary                  | The majority of objectives for this site score<br>as unknown, neutral or positive. However,<br>unknown scores for the Business and<br>Employment objectives relate to the<br>uncertainty about the proposed<br>development type and it is not possible for<br>these to turn negative when these details<br>are confirmed. For this reason, it is<br>expected that the site will pass the<br>exception test for development in flood<br>zone 3. This is reflected in the neutral score<br>for the water objective. | This is a reasonable site with<br>potential noise and air issues<br>being the only slight<br>detractors. Climate Change<br>and Water objectives also<br>score slightly negative<br>because of increased carbon<br>emissions from new<br>dwellings and increased<br>pressure on water<br>resources. | This site has been given mostly<br>neutral scores with some positive<br>ones. The proximity to main urban<br>area of Tunbridge Wells means that<br>the Services objectives scores well.<br>Negative scores have been given<br>for landscape and land use,<br>influenced by the greenfield nature<br>of the site and the likely impact on<br>the townscape/settlement edge<br>through the release of this site. It is<br>a historic field. | A largely sustainable site<br>with loss of greenfield land<br>being the only significant<br>detractor. | This site lies in close proximity to the boundary with Wealden<br>district thus cross boundary impacts have been considered.<br>Negative impacts predicted for the landscape objective apply to<br>the AONB in both constituencies. Likewise, Broadwater<br>Down/The Warren has been taken into account when<br>considered access to open space for the Health Objective. The<br>site has been given mostly neutral scores. The proximity to main<br>urban area of Tunbridge Wells means that the Services<br>objectives scores well. Lack of pedestrian access along Bayham<br>Road means the housing, transport and equality objectives<br>cannot score as highly as other sites in the urban area. The<br>presence of Groundwater Source Protection Zone on the site<br>was considered and felt to have a low risk of contamination. |

|                             | 237  | 238   | 249   | 250  | 258   |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 7 of 12)

|                             | 237   | 238   | 249  | 250  | 258   |
|-----------------------------|---|---|--|--|---|
| Sustainability<br>Objective | Land at Cadagan Sports Field, St<br>John's Road, Tunbridge Wells  | Land at Colebrook Sports Field,<br>Liptraps Lane, Tunbridge Wells   | Cemetery Depot, Benhall Mill Road,<br>Tunbridge wells  | Land at Royal Victoria Place,<br>Tunbridge Wells (including site<br>251)   | TN2 Centre and adjacent land,<br>Greggs Wood Rd, Sherwood   |
| Travel                      | +/++  | +/++  | +  | +  | ++/+++  |
| Waste                       | 0   | 0   | 0  | 0  | 0   |
| Water                       | 0   | 0   | 0  | 0  | 0   |
| Commentary                  | Air quality is scored as mixed overall<br>because the site is easily accessed by<br>sustainable and active transport modes<br>but is still likely to increase traffic in the<br>AQMA. The removal of existing sports<br>facilities causes the health objective to<br>score poorer than other sites in the area<br>as local residents will lose out. | Education objective scores positive as<br>local schools have adequate capacity.<br>Score for the health, services and<br>equality objectives are not as high as<br>they could be due to the loss of sports<br>facilities and accessible open space for<br>the residents of Sherwood, which is an<br>area with relatively high-income<br>deprivation. Flood zones 2 and 3<br>present on site are unlikely to prevent<br>development and can be factored into<br>scheme design. | This site transverses the boundary with<br>Wealden district thus cross boundary<br>impacts have been considered.<br>This site has been given mostly neutral<br>scores. The proximity to main urban<br>area of Tunbridge Wells means that the<br>Services objective is scored as<br>unknown due to the specialist advice<br>that would be required. | A largely sustainable site. Air quality<br>score is scored as mixed overall<br>because the site is easily accessed by<br>sustainable and active transport modes<br>but is still likely to increase traffic in the<br>AQMA. | This nature of this allocation allows it<br>to score highly for the health objective.<br>Air and transport scores reflect the<br>accessible location. Whilst landscape<br>and biodiversity scores relate to the<br>sensitive adjacent land. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 8 of 12)

|                             | 260   | 260   | 262   | 264  | 267   |
|-----------------------------|---|---|---|--|---|
| Sustainability<br>Objective | WHOLE SITE: Auction House<br>and public car park, Linden<br>Park Road, TN2 5QL      | PART SITE; Auction House<br>and public car park, Linden<br>Park Road, TN2 5QL   | Mount Pleasant car park and surgery, Mount Pleasant<br>Avenue, Tunbridge Wells (including 263)  | Town Hall/Town Centre site,<br>Royal Tunbridge Wells   | Rowan Tree Road, Showfields,<br>Tunbridge Wells   |
| Travel                      | +/++  | +   | +   | +  | +   |
| Waste                       | 0   | 0   | 0   | 0  | 0   |
| Water                       | 0   | 0   | 0   | 0 / +  | ?   |
| Commentary                  | Highly sustainable site which<br>utilises an existing previously<br>developed site. | Highly sustainable site which<br>secures a change of use of<br>existing business premise and<br>reuse of existing building. | This site has a mixed range of scores. Air quality score is scored as mixed overall because the site is easily accessed by sustainable and active transport modes but is still likely to increase traffic in the AQMA. Loss of greenspace with connectivity to a SLNCV has caused the biodiversity objective to be scored negatively. Likewise, the land use objective is scored slightly negatively due to the loss of greenfield land. Positive score for services reflects the benefits the proposals would bring to tourism and leisure. Health scores slightly positively due to the wellbeing benefits of providing a more inviting entrance to Calvary Grounds (a Historic Park and Garden) and attracting more visitors. Conversely, the loss of some of the existing heritage asset, causes the heritage objective to score negatively. The Landscape/Townscape objective scores as slightly negative due to the loss of green open space in Calvary Grounds and alteration to the park setting. | Highly sustainable site. Air<br>quality score is scored as mixed<br>overall because the site is easily<br>accessed by sustainable and<br>active transport modes but is still<br>likely to increase traffic in the<br>AQMA. This location is not suited<br>to residential housing. Adjacent<br>sites are meeting local demand<br>and scores have been applied on<br>this basis. The Landscape/<br>Townscape objective scores as<br>partially unknown due to the<br>difficulty of assessing impacts<br>without a design. | This is a highly sustainable site with<br>positive scores reflecting the<br>improvement to services and<br>suitable location. The climate<br>change score reflects the fact that<br>proposals are for redevelopment of<br>existing facilities rather than<br>creation of new facilities. Private<br>car use is not essential in this<br>location and the provision for a low<br>traffic neighbourhood make the air<br>quality score mixed despite the<br>proximity to the AQMA. The<br>resources objective has a<br>mixed/negative score to reflect the<br>demolition that would be<br>necessary. |

|                             | 268   | 328  | 359   | 400   | 411  |

Scores for Reasonable Sites in Royal Tunbridge Wells (part 9 of 12)

|                             | 268   | 328   | 359  | 400   | 411  |
|-----------------------------|---|---|--|---|--|
| Sustainability<br>Objective | Vale Avenue and Torrington Car Park,<br>Tunbridge Wells (including 200)   | Land at Eridge Road &<br>Eastlands Close, Royal<br>Tunbridge Wells  | Land to the east of Halliwell Nursing<br>Home, Kingswood Road, Tunbridge<br>Wells  | Land to the east of Halliwell Nursing<br>Home, Kingswood Road, Tunbridge<br>Wells   | Land at Sandown Park between<br>Pembury Grange and A21, Royal<br>Tunbridge Wells   |
| Travel                      | +/++  | +/++  | + / + +  | + / + +   | 0  |
| Waste                       | 0   | 0   | 0  | 0   | 0  |
| Water                       | 0   | 0   | 0  | 0   | 0  |
| Commentary                  | Air quality is scored as mixed overall<br>because the site is easily accessed by<br>sustainable and active transport modes but<br>is still likely to increase traffic in the AQMA.<br>There is an existing high demand for school<br>places locally and thus the education<br>objective score negatively. Travel and<br>Services objectives score particularly well<br>because the central location means new<br>residents have access to a wide range of<br>services and would not necessarily require<br>a private car. The Landscape/Townscape<br>objective scores as partially unknown due<br>to the difficulty of assessing impacts<br>without a design. | This is a site that scores several<br>neutrals and some positive<br>scores. Negative scores have<br>been given for noise due to the<br>sites location along the A26. The<br>site also receives a negative score<br>for landscape due to the loss of<br>the green open space and the<br>contribution this makes to the<br>approach into Tunbridge Wells<br>and the townscape. The loss of<br>the green space has informed the<br>land use score given. | This site scores mostly neutral scores with<br>some positive ones. It scores negatively<br>on heritage due to it being adjacent to an<br>historic park and garden and adjacent to<br>an area of archaeological potential. The<br>site is a greenfield site and a small part of<br>a larger Green Belt parcel the release of<br>which would cause very high harm. The<br>score for land use has been adjusted to<br>reflect the size of the site. The negative<br>score for noise has been informed by the<br>sites position in close proximity to the<br>Pembury Road. | This site scores mostly neutral scores with<br>some positive ones. It scores negatively<br>on heritage due to it being adjacent to<br>the Conservation Area, forming part of its<br>setting and adjacent to an historic park<br>and garden and area of archaeological<br>potential. The site is a greenfield site and<br>part of a larger Green Belt parcel the<br>release of which would cause very high<br>harm. The score for land use has been<br>adjusted to reflect the size of the site.<br>The negative score for noise has been<br>informed by the sites position in close<br>proximity to the Pembury Road. | This site scores a number of neutral<br>scores with some positive ones. Negative<br>scores are given for air, land use,<br>landscape and noise. Land use score is<br>informed by the loss of a greenfield site<br>which is part of a Green Belt parcel the<br>release of which would cause high harm.<br>Air and noise scores are influenced by<br>the location of the site adjacent to the<br>A21 and close to the Pembury Road. The<br>landscape negative score is influenced by<br>the loss of a greenfield site which<br>contributes to the landscape setting of<br>Tunbridge Wells. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 10 of 12)

|                             | 434   | SALP AL/RTW 2B   | SALP AL/RTW 22   | 459  |
|-----------------------------|---|--|--|--|
| Sustainability<br>Objective | Tutty's Farm, Hawkenbury, Royal Tunbridge<br>Wells  | Former cinema site, Mount Pleasant Road  | Land at Lifestyle Ford, Mount<br>Ephraim/Culverden Street/Rock Villa<br>Road   | Land at 202 and 230 Upper Grosvenor<br>Road  |
| Travel                      | 0 / +   | +/++   | +/++   | +/++   |
| Waste                       | 0   | 0  | 0  | 0  |
| Water                       | 0   | 0  | 0  | 0  |
| Commentary                  | This site transverses the boundary with Wealden<br>district thus negative impacts that have been predicted<br>for the landscape objective apply to the AONB in both<br>constituencies.<br>This site scores a mix of scores, with several neutral<br>scores and some positives. Negative scores are given<br>for heritage, land use and landscape. The heritage<br>score is informed by likely impact on the settlement<br>edge and landscape setting of Tunbridge Wells. The<br>site is a Green Belt parcel that if released from the<br>Green Belt would cause high harm, it a greenfield site<br>that has agricultural land classification 3. This has<br>informed the land use score given whilst the loss of the<br>greenfield site and its likely effect on the settlement<br>edge has informed the landscape score given. | A mostly sustainable site. Air quality score is scored as<br>mixed overall because the site is easily accessed by<br>sustainable and active transport modes but is still likely<br>to increase traffic in the AQMA. The proposal for the site<br>would represent a form of regeneration in an area of<br>medium income deprivation and thus scores slightly<br>positively for deprivation. There is an existing high<br>demand for school places locally and thus the education<br>objective score negatively. Travel and Services objectives<br>score particularly well because the central location<br>means new residents have access to a wide range of<br>services and would not necessarily require a private car.<br>The Landscape/Townscape objective scores as partially<br>positive due to the improvement in the townscape likely<br>to occur as a result of development in an area1thought<br>of as an eye sore. | Air quality is scored as mixed overall because<br>the site is easily accessed by sustainable and<br>active transport modes but is still likely to<br>increase traffic in the AQMA. Loss of business<br>space in favour for residential housing causes<br>the business objective to be scored negatively.<br>Preventing some demolition enables the<br>resources objective to score positively. The<br>Landscape/Townscape objective scores as<br>partially unknown due to the difficulty of<br>assessing impacts without a design. | A largely sustainable site with a range of<br>neutral or slightly positive scores. Strong<br>positives for services and travel reflect the<br>urban location. Noise objective scores<br>negatively to reflect the adjacent railway line. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 11 of 12)

|                             | SALP AL/RTW 5   | SALP AL/RTW 20   | DPC 5  | 137  | PSPC_1   |
|-----------------------------|---|--|--|--|--|
| Sustainability<br>Objective | Land at 36-46 St John's Road  | Land at 77 Mount Ephraim (Sturge<br>House, Brockborne House)   | Land north of Hawkenbury<br>Road   | WHOLE SITE: Land to the west of<br>Eridge Road at Spratsbrook Farm,<br>Royal Tunbridge Wells TN3   | Mitsubishi Garage, St James' Road  |
| Travel                      | + / + +   | +  | 0 / +  | + / + +  | +/++   |
| Waste                       | 0   | 0  | 0  | 0  | 0  |
| Water                       | 0   | 0  | 0  | ?  | 0  |
| Commentary                  | Air quality is scored as mixed overall because the<br>site is easily accessed by sustainable and active<br>transport modes but is still likely to increase traffic<br>in the AQMA. Loss of business space in favour of<br>residential housing causes the business objective to<br>be scored negatively. The requirement for<br>demolition means the Resources objective to score<br>negatively. The Landscape/Townscape objective<br>scores as partially unknown due to the difficulty of<br>assessing impacts without a design. Likewise,<br>housing and Education objectives are partially<br>unknown because it is not known if the housing<br>would be specifically for older persons or not. | Air quality is scored as mixed overall<br>because the site is easily accessed by<br>sustainable and active transport<br>modes but is still likely to increase<br>traffic in the AQMA. Likewise, noise<br>levels on the A26 which is already a<br>sensitive location. Travel and Services<br>objectives score particularly well<br>because the central location means<br>employees do not necessarily require<br>a private car. | This site scores a mix of scores,<br>with several neutral scores<br>and some positives. Negative<br>scores are given for heritage,<br>land use and landscape. The<br>heritage score is informed by<br>likely impact on the<br>settlement edge, loss of an<br>assart field and landscape<br>setting of Tunbridge Wells.<br>The biodiversity score reflects<br>the fact that the entire site is<br>designated as a Local Wildlife<br>Site. | This site traverses the boundary with<br>Wealden district thus cross boundary<br>impacts have been considered. Negative<br>impacts that have been predicted for the<br>landscape objective apply to the AONB in<br>both constituencies.<br>The scores for this site are mixed and<br>tend to be more extreme versions of<br>those applied to the appraisal of the part<br>site. The commentary for the Part Site<br>should be referred to for greater details. | Sustainable brownfield site with mostly<br>positive or neutral scores. The business<br>growth score is influenced by the loss of<br>the existing business. However, good<br>transport links and plentiful services<br>make the site suitable for residential<br>development or for a mix of residential<br>and commercial development. |

#### Scores for Reasonable Sites in Royal Tunbridge Wells (part 12 of 12)

|                             | SALP AL/RTW 10  | SALP AL/RTW 16  | EA_195  | PSPC_4  |
|-----------------------------|---|---|---|---|
| Sustainability<br>Objective | Land at former Gas Works, Sandhurst Road  | Land at Beechwood Sacred Heart School   | Land at 1 Meadow Road and 8 Upper<br>Grosvenor Road   | Hermes House, St John's Road  |
| Waste                       | 0   | 0   | 0   | 0   |
| Water                       | ?   | 0   | 0   | 0   |
| Commentary                  | This site scores largely neutral or positive. The scale<br>of development influences many scores. Air score<br>reflects relatively large contributions for improving<br>active travel links and location of site near mainline<br>train station meaning private car use is not essential.<br>Proximity and connectivity to Hilbert Woods LNR<br>cause the biodiversity objective to score slightly<br>negatively. The Water objective is scored as mixed<br>overall to reflect the conflict between the site<br>improving flooding for new and existing residents<br>but also increasing demand on existing water<br>supplies with a large number of new dwellings.<br>Deprivation scores positively due to the regeneration<br>in an Area of Income Deprivation. | The location of this site on the Pembury Road<br>causes a few objectives to score slightly negatively.<br>For example, air is slightly negative due to the<br>potential for bringing sensitive receptors in contact<br>with high levels of pollutants. However, the health<br>objective scores positively due to proposal that this<br>site meets needs for residential care in the<br>borough. | Highly sustainable site. Air quality score is scored as<br>negative overall as the position of the site would<br>bring young people into contact with poor air<br>quality. The education objective scores positively<br>due to the nature of the proposed site use.<br>Preventing some demolition enables the resources<br>objective to score positively. | Largely sustainable brownfield site with mostly<br>positive or neutral scores. However, the air quality<br>score is scored negatively to reflect the site<br>location within the AQMA buffer. The business<br>growth score is influenced by the fact that the<br>existing business is planning to relocate with the<br>town. Reasonable transport links and service<br>provision make the site suitable for residential<br>development. |

Scores for Reasonable Sites in Southborough (part 1 of 2)

|                             | 8  | 10   | 45   | 90   | 232   |
|-----------------------------|--|--|--|--|---|
| Sustainability<br>Objective | Wheelers Field, Powder<br>Mill Lane  | The Piggery, Powder Mill Lane,<br>Southborough   | Land adjoining Birchwood Avenue/Dower<br>House Crescent  | Mabledon, London Road, Southborough, TN4 0UH   | Land at Bright Ridge, and<br>Speldhurst Rd (former<br>allotments)   |
| Resources                   | 0/?  | 0/?  | 0/?  | ?  | 0/?   |
| Services & Facilities       | +  | +  | 0 / -  | 0 / +  | +   |
| Travel                      | +  | +  | +  | +  | + / + +   |
| Waste                       | 0  | 0  | 0  | 0  | 0   |
| Water                       | 0  | 0  | 0  | 0  | 0 / +   |
| Commentary                  | This is a reasonably located<br>site which scores several<br>neutrals and positives, a<br>reflection of its location on<br>the edge of the<br>settlement/main urban area<br>and the services and facilities<br>including transport available.<br>The heritage score is let<br>down by a significant portion<br>of the site having<br>archaeological potential. | This is a reasonable site which scores<br>neutrals and positives, a reflection of<br>its location close to the edge of the<br>settlement/main urban area and the<br>services and facilities including<br>transport available. It is let down on<br>its land use score due to it being<br>Green Belt land, part of a parcel that<br>has very high harm if released. It<br>scores negatively on landscape and<br>biodiversity as part of the site is a<br>wildflower meadow and the site is<br>adjacent to a Local Nature Reserve. | This site includes a mix of scores. It scores<br>positively in terms of housing provision and<br>transport but is let down by its land use score<br>(Green Belt location the release of which would<br>cause moderate harm to the Green Belt) and<br>landscape score (loss of a greenfield site in the<br>AONB in an historic landscape). It is let down by<br>a lack of key services and facilities within a<br>desirable walking distance from the site. It is an<br>assart field which lowers the heritage score of<br>the site and the biodiversity score is informed<br>by its location adjacent to Ancient Woodland, a<br>Local Wildlife Site and a wildflower meadow. | This site transverses the boundary with Tonbridge and<br>Malling district thus negative impacts that have been<br>predicted for the objectives consider aspects in the<br>adjacent constituencies e.g. the AONB, Tonbridge AQMA.<br>The benefit to wellbeing of opening up a heritage asset to<br>the public ensures the health objective scores highly.<br>Carbon scores negatively for this site as the hotel and<br>leisure facilities will have high energy demands and are<br>likely to be visited by private car only. However, the<br>provision of new leisure facilities allows the services and<br>health objectives to score positively. The adverse impacts<br>on the AONB predicted by the 2020 LVIA report has been<br>considered in the Landscape and Heritage scores. | The site is entirely within flood<br>zone 1 and would not put great<br>pressure on existing water supplier<br>so the water objective scores<br>slightly positively. Noise scores<br>negative due to the location of the<br>edge of the main Gatwick flight<br>path. Air quality score is scored as<br>mixed overall because the site is<br>located so that a wide range of<br>services can be reached without<br>private car but it is still likely to<br>increase traffic in the AQMA. |

|                             | 233  | 327  | 335   | 441                               | 445   | DPC13   |

#### Scores for Reasonable Sites in Southborough (part 2 of 2)

|                             | 233   | 327   | 335   | 441   | 445  | DPC13   |
|-----------------------------|---|---|---|---|--|---|
| Sustainability<br>Objective | Land to the rear of<br>Hornbeam Avenue and<br>Walnut Way  | Land at Blackthorn<br>Avenue, Royal<br>Tunbridge Wells  | Land to the north of<br>Speldhurst Road & west of<br>Bright Ridge   | Southfields Park, St<br>John's Rd   | Mabledon & Nightingale east of A26 & south of the A21  | Land at Baldwins Lane, North Farm<br>Rd, Southborough   |
| Travel                      | +   | +   | +/++  | + +   | +  | + + / + + +   |
| Waste                       | 0   | 0   | 0   | 0   | 0  | 0   |
| Water                       | 0   | 0   | 0 / +   | 0   | 0/-  | 0   |
| Commentary                  | A reasonable site that<br>scores several neutrals<br>and positives which is well<br>located in terms of<br>provision of services,<br>facilities and transport.<br>The site is let down on<br>biodiversity grounds as it<br>is a designated Site of<br>Nature Conservation<br>Value. | This is a reasonably<br>located site which<br>scores several neutrals<br>and positives, a<br>reflection of its<br>location where there<br>are services and<br>facilities and transport. | This site scores some<br>neutrals and positives but is<br>let down on its heritage,<br>land use and landscape<br>scores. The whole site has<br>archaeological potential and<br>is an historic field. Land use<br>score reflects the findings of<br>the Green Belt Study | This is a reasonable site,<br>located within accessible<br>distance to key services<br>and facilities and transport<br>provision. Being adjacent<br>to the A26 London Road it<br>is let down on its noise<br>score. | This site has mixed scores. Water score<br>reflects fact that there are areas of flood zone<br>2 and 3 within the site. Business and housing<br>objectives scores positively as the proposed<br>site use is for extensive land-based economic<br>development thus benefitted the rural<br>economy, whilst also meeting housing needs.<br>There are large sites of biodiversity value in<br>the area and, without detail on layout and<br>design, there is a risk these could be<br>negatively impacted upon. The adverse<br>impacts on the AONB predicted by the 2020<br>LVIA report have been considered in the<br>Landscape and Land Use scores. | Largely sustainable site. The resources<br>objective is scored to reflect the necessity<br>for demolition. The remaining negative<br>scores are minor and reflect los of existing<br>business space and noise sensitive<br>location. The urban location means<br>reliance on private car use is not essential<br>for access the wide range of facilities and<br>services. |

| Commentary                  | This site receives a mix of scores<br>including neutrals and some positives.<br>It is let down on its noise score<br>because of its location close to the<br>main railway line. Land use also scores<br>a negative as the site is part of a Green<br>Belt parcel the release of which would<br>cause moderate harm and for heritage<br>and landscape, being adjacent to<br>historic farmsteads. | This site receives a mix of scores including<br>neutrals and some positives. It is let down<br>on its noise score because of its location<br>close to the main railway line. Land use<br>also scores a negative as the site is part of<br>a Green Belt parcel the release of which<br>would cause moderate harm, though it is<br>influenced by existing built development<br>on the site, and for heritage and<br>landscape, being adjacent to historic<br>farmsteads. | This site receives a mix of scores including<br>neutrals and some positives. It is let down<br>on its noise score because of its location<br>close to the main railway line. Land use<br>also scores a negative as the site is part of<br>a Green Belt parcel the release of which<br>would cause moderate harm and for<br>heritage and landscape, being adjacent to<br>historic farmsteads. | This site receives a mix of scores,<br>several neutrals and some positive<br>ones. Landscape, land use and noise<br>receive negative scores, a reflection<br>of this Green Belt, greenfield site<br>and its position close to the main<br>railway line. | This site scores mostly neutrals with<br>some positive scores. It is a greenfield<br>site in the Green Belt and forms a parcel<br>the release of which would cause high<br>harm to the Green Belt. This influences<br>the land use score. The loss of a<br>greenfield site in the historic landscape,<br>adjacent to an historic farmstead which<br>forms part of the setting of Five Oak<br>Green influences the negative landscape<br>score given. |

| Water                       | 0/-   | 0 / -   | 0/-  | 0  | 0 / -  |
| Commentary                  | This sites scores mostly neutrals with<br>some positive scores. It is a greenfield site<br>in the Green Belt and forms part of a<br>larger parcel the release of which would<br>cause very high harm to the Green Belt.<br>The site is a relatively small part of that so<br>the score has been adjusted to reflect this.<br>This influences the land use score. The loss<br>of a greenfield site in the historic<br>landscape, adjacent to an historic<br>farmstead which forms part of the setting<br>of Five Oak Green influences the negative<br>landscape score given. | A site that scores several neutrals<br>and some positives. It is let down<br>on its land use and landscape<br>score reflecting the loss of a<br>greenfield site located within the<br>Green Belt being part of parcel<br>FG3 which scores moderately in<br>the Green Belt Study. A large part<br>of the site is also agricultural<br>Grade 2 which influences this<br>score. This site would have a<br>negative impact on the landscape<br>setting of the settlement. | A site that scores several neutrals and<br>some positives. It is let down on its<br>land use and landscape score<br>reflecting the loss of a greenfield site<br>located within the Green Belt being<br>part of a larger broad parcel (score<br>adjusted to reflect this) that would<br>have very high harm if released from<br>the Green Belt. A large part of the site<br>is also agricultural Grade 2 which<br>influences this score. This site would<br>have a negative impact on the<br>landscape setting of the settlement. | A mixed site. Bus travel is likely to<br>be preferred for most to access the<br>school from TGS which represents a<br>slight worsening of noise pollution<br>and air quality compared to the<br>current rural baseline. However,<br>the improvements in bus services<br>create a positive transport score<br>thus this is a rare site where these<br>objectives do not reflect one<br>another. Heritage score affects<br>impact upon the setting of<br>Somerhill House grade 1 listed<br>building. | A site that scores several neutrals and some<br>positives. It is currently constrained by the lack<br>of suitable pedestrian access to the settlement<br>but it is likely this could be overcome. It is let<br>down on its land use and landscape score<br>reflecting the loss of a greenfield site located<br>within the Green Belt being the significant<br>extent of parcel FG3 which scores moderately in<br>the Green Belt Study. A large part of the site is<br>also agricultural Grade 2 which influences this<br>score. This site would have a negative impact on<br>the landscape setting of the settlement and<br>whilst some parts of the site are closer to the<br>services and facilities of the settlement, some<br>parts are less accessible. |

# Appendix I - Paddock Wood

| Water                       | -  | 0   |
| Commentary                  | This is a large site with capacity for<br>significant benefits to the housing<br>objective. The Water score scores<br>negatively to reflect the areas of flood<br>zone 2 and 3 in the north. The travel, air<br>and equality objectives reflect the<br>distance to the town centre and<br>facilities. The narrow shape of the site<br>makes it an inefficient use of land. | This site has a range of positive and negative scores. Increased pressure that the new residents would put on the local primary school is negated somewhat by the construction of a new primary school opposite Mascalls Secondary school (construction started in 2019). The relatively large numbers of dwellings here mean increased pressure on water supplies negates the benefits created by improving drainage and flooding on site. Air quality impacts are improved by the connectivity with PW and thus reduced need for private vehicles, but still remain slightly negative overall as private car use is still likely in this edge of semi-rural settlement location. It is expected that recreational pressure will occur on the adjacent Local Nature Reserve. Overall, the development represents a significant change to the setting of the historic landscape. 2020 MGB Study: Overall Harm Rating is Very Low. However, site still represents a large loss of greenfield land. |

Scores for Reasonable Sites in Paddock Wood (part 3 of 3). Nb. potential urban extension sites are considered in Chapter 6.

|                             | STR/SS 2  | DPC_15   |
|-----------------------------|---|--|
| Sustainability<br>Objective | Town Centre (including sites 272, 276 and DPC 14)   | Greenfields, adjacent to Paddock Wood Parish boundary  |
| Services                    | ++  | 0/-  |
| Travel                      | ++/+++  | 0 / -  |
| Waste                       | 0   | 0  |
| Water                       | 0 / +   | 0  |
| Commentary                  | This policy is largely sustainable. It would have a highly positive impact upon<br>regeneration as Paddock Wood is one of the worst Areas of Income Deprivation in<br>the Borough. The proposal would also provide employment and opportunities for<br>growth of key businesses, as well as improving the range of available retail and<br>leisure. It is likely that this regeneration will have positive impacts upon local<br>townscape. The proposal scores positively for the water objective as the master<br>planning approach is likely to provide an opportunity to improve upon the existing<br>impacts from flooding in the town through SUDs for example. | This site has been assessed for the use being proposed by the Pre Submission<br>Local Plan for Gypsies and Travellers. The remote nature of the site does not<br>improve travel choice or improve access to or range of services or facilities.<br>However, the relatively modest nature of the proposed use means these aspects<br>are not scored significantly negatively.<br>Likewise, nearby environmental feature such as the historic farmstead at Little<br>Old Hay are unlikely to be impacted on significantly by the Local Plan proposals. |

#### Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 1 of 7)

|                             | BK_1   | 25  | 29   | 54  |
|-----------------------------|--|---|--|---|
| Sustainability<br>Objective | Land at Brick Kiln Farm, Cranbrook   | Land to the west of Frythe Way and east of Freight Lane, Cranbrook  | Land at Boycourt Orchards, A229 Angley<br>Road, Wisley Pound, Cranbrook TN17 2HR   | Land on the east side of Mill Lane, Sissinghurst,<br>TN17 2HX   |
| Resources                   | - / ?  | ?   | 0 / ?  | 0/?   |
| Services & Facilities       | 0/-  | 0   | -  | -   |
| Travel                      | -  | 0/-   | -/   | 0/-   |
| Waste                       | 0  | 0   | 0  | 0   |
| Water                       | 0/-  | 0 / -   | 0 / +  | 0   |
| Commentary                  | Landscape scores are negative to reflect the scale of development<br>being out of keeping with the settlement and impact upon the AONB.<br>Impacts on heritage assets such as historic farmsteads will also be<br>unavoidable. Biodiversity score reflects risk of recreational pressure<br>on the Local Nature Reserve and location of site within the impact<br>risk zone for Robins Wood SSSI. Development at this site will<br>contribute to the already high noise levels and could affect the<br>Important Areas for Road Noise (IARN) at Wisley Green. The large size<br>of the site allows the housing objective to score highly positively. The<br>resources objective is informed by the minor impact on Superficial<br>Sub-Alluvial River Terrace deposits. | This site scores largely neutral with some<br>benefit to housing provision. It scores<br>negatively on land use and landscape<br>impact informed by the loss of a<br>greenfield site in the AONB which lies<br>adjacent to an historic settlement and<br>which has historic routeways (PROW)<br>adjacent to it. | A range of scores with Land Use,<br>Landscape, Land Use and Travel<br>objectives scoring most negatively<br>reflecting loss of greenfield land in the<br>AONB and limited transport options in<br>Sissinghurst. The limited transport<br>options also prompts the air quality<br>objectives to become negative.<br>Development here would risk dilution of<br>the historic settlement character. | Largely neutral-scoring site. Education is scored<br>slightly negative to reflect increase pressure on a<br>school that is already in high demand. Loss of<br>greenfield land and potential boundary issues with<br>the AONB contribute to the negative scores for<br>Land Use and Landscape.<br>2020 Grassland study found site to have low<br>botanical importance and low-moderate ecological<br>importance. Score unchanged. Heritage and<br>landscape scores adjusted to better consider the<br>setting of the rural lane. |

## Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 2 of 7)

|                             | 110   | 120   | 122  | 125   |
|-----------------------------|---|---|--|---|
| Sustainability<br>Objective | Land to the west of Co-operative, High Street,<br>Cranbrook TN17 3DQ  | Land east of Camden Lodge, adjacent to Mill Lane and<br>Sissinghurst Road, Sissinghurst   | Gate Farmland at Charity Farm, Swattenden Lane,<br>Cranbrook TN17 3PS  | Land adjoining Wilsley Farm, adjacent to Angley<br>Road and Whitewell Lane, Cranbrook, TN17 2LE   |
| Travel                      | 0 / +   | 0/-   | -/   | 0 / -   |
| Waste                       | 0   | 0   | 0  | 0   |
| Water                       | 0   | 0   | 0  | 0 / +   |
| Commentary                  | This site scores mostly neutral with some<br>benefit potentially to housing provision and<br>employment. It scores negatively in land use<br>terms being loss of a greenfield site in the<br>AONB. It is however within the Limits to Built<br>Development of Cranbrook, which lessons<br>impact. | Largely neutral-scoring site. Education is scored slightly<br>negative to reflect increase pressure on a school that is<br>already in high demand. Loss of greenfield land and<br>potential boundary issues with the AONB contribute to<br>the negative scores for Land Use and Landscape.<br>2020 Grassland study found site to have moderate<br>botanical importance and moderate ecological<br>importance. Score adjusted. Heritage and landscape<br>scores adjusted to better consider the setting of the rural<br>lane and the AONB. | This rural site scores negatively for numerous<br>objectives, particularly in landscape and land use<br>terms and for travel and lack of key services and<br>facilities. Biodiversity also scores negatively to<br>reflect proximity to Robins Wood SSSI. The site is<br>within the impact risk zone and a PRoW brings<br>people into contact with the boundary of the site.<br>Indirect effects are likely. | A mixed site with slight positive and negatives<br>across the objectives. Loss of greenfield land<br>causes the most negative impact to be on Land<br>Use.<br>2020 Grassland study found site to have low-<br>moderate botanical importance and low-<br>moderate ecological importance. Score adjusted<br>slightly. |

|                             | 129  | 130  | 131                                   | 132                                    | 133   |

## Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 3 of 7)

|                             | 129   | 130   | 131  | 132   | 133  |
|-----------------------------|---|---|--|---|--|
| Sustainability<br>Objective | Big Side Playing Field adjacent to Quaker<br>Lane and Waterloo Road, Cranbrook  | Cranbrook School Main Campus,<br>Waterloo Road, TN17 3JD<br>(including site 128)  | Jaegers Field, Angley Road, Cranbrook  | Rammell Field, Bakers Cross, Cranbrook  | Land adjoining Cranbrook Primary<br>School, Quaker Lane Cranbrook (includes<br>site 71)  |
| Travel                      | 0   | ?   | 0  | 0   | 0  |
| Waste                       | 0   | ?   | 0  | 0   | 0  |
| Water                       | 0 / +   | ?   | 0 / +  | 0   | 0 / +  |
| Commentary                  | Largely sustainable site with the only<br>negatives being related to the sensitive<br>environmental features such as the rural<br>character of Quaker Lane which would be<br>compromised by development here. Site is<br>reasonably well located for walking or<br>cycling access to services. However, a<br>mixed score is applied for the health<br>objective as it was felt that development<br>could compromise use of the field for<br>sports. | This policy prompts mostly<br>unknown scores as details<br>about specific proposal are not<br>available. However, it is<br>assumed that education would<br>benefit. | Largely sustainable site with the only<br>negatives being related to the sensitive<br>environmental features. However, a<br>mixed score is applied for the health<br>objective as it was felt that development<br>could compromise use of the field for<br>sports. | A site that scores mostly neutrals with<br>some positives. It scores negatively on its<br>heritage score as a result of the<br>contribution the site makes to<br>Conservation Area and its setting. The<br>Landscape Objective also scores<br>negatively as the loss of the site would<br>result in the loss of an historic field in the<br>AONB. | Largely sustainable site with the only<br>negatives being related to the sensitive<br>environmental features.<br>2020 Grassland study found site to have<br>low botanical importance and low-<br>moderate ecological importance. Score<br>unchanged. |

| Commentary                  | Social objectives for this site are given a<br>range of scores. Educational pressures are<br>expected on the already oversubscribed<br>primary school but the equality, health and<br>housing objectives score positively. 2020<br>AONB Setting Study showed short term<br>impacts and thus the landscape score has<br>been adjusted accordingly. | This site scores mostly negative,<br>particularly in landscape and land use<br>terms and for travel. It scores positively in<br>terms of housing provision. The negative<br>scores are informed by the loss of a<br>sensitive greenfield site in the AONB<br>which is adjacent to an historic<br>settlement and historic routeway (road).<br>It lies within close proximity of a SSSI. | Development here would risk<br>dilution of the historic settlement<br>character.<br>2020 Grassland study found site to<br>have low botanical importance and<br>low ecological importance. Score<br>unchanged. | This site scores largely neutral with some<br>benefit to housing provision. It scores<br>negatively in landscape terms informed by<br>the loss of an historic field in the AONB and<br>adjacent to historic farmstead. | A site with a range of scores<br>including neutrals with some<br>positives reflecting the location on<br>the edge of the town centre.<br>Heritage scores negatively as a<br>result of the contribution the site<br>makes to Conservation Area and its<br>setting. A negative score is also<br>applied to the landscape objective<br>because development of the site<br>would result in the loss of a historic<br>field in the AONB. |

#### Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 5 of 7)

|                             | 407   | 409   | 430   | 68  | LS_6   |
|-----------------------------|---|---|---|---|--|
| Sustainability<br>Objective | Land at Brooksden, High Street,<br>Cranbrook  | The High Weald Academy, Angley Road,<br>Cranbrook   | Turnden Farm, Hartley Road, Cranbrook   | Land at corner of Frittenden Road and Common Rd, Sissinghurst.  | Part OS Plot 2429 Common Road,<br>Sissinghurst, Cranbrook  |
| Travel                      | 0   | 0   | -   | 0/-   | 0/-  |
| Waste                       | 0   | 0   | 0   | 0   | 0  |
| Water                       | 0   | 0   | 0/-   | 0   | 0/?  |
| Commentary                  | This site scores largely neutral with some<br>benefit to housing provision. The negative<br>land use score reflects the part greenfield<br>nature of the site in the AONB. The<br>central location of the site in relation to<br>services and facilities prevents the air and<br>travel objectives from being negative. The<br>scores reflect the relatively small size of<br>this site. It is borderline whether a yield<br>of 10 dwellings could be achieved. | A reasonable site that scores positively<br>for land use as it is a Previously<br>Developed site. It scores several neutral<br>scores and some unknown scores for<br>education and employment which<br>reflect the current educational use of<br>some of the site and uncertainty about<br>the loss of this and associated<br>employment. | A relatively large site that would<br>contribute a significant benefit to<br>housing numbers but is scored highly<br>negatively for environmental objectives<br>to reflect the sensitive features that are<br>at risk. 2020 Grassland study found site<br>to have low botanical importance and<br>low-moderate ecological importance.<br>Score adjusted to account for large<br>scale of site. Business growth score has<br>been updated to reflect the fact<br>allocation does not include employment<br>space. 2020 LVIA report and Landscape<br>officer comments state allocation is<br>possible. Score unchanged. | As for all sites in Sissinghurst, this site is<br>let down by accessibility to services and<br>facilities and public transport. Of<br>particular note is the biodiversity score<br>is influenced by the 2020 Grassland<br>study found site to have low-moderate<br>botanical importance and moderate<br>ecological importance. In addition, this<br>site is BAP priority habitat for orchard. | This site scores mostly neutral, with<br>some positive scores. It is let down by<br>accessibility to services and facilities<br>and public transport and also land<br>use and landscape scores which are<br>in turn informed by the loss of a<br>greenfield site and location of site<br>relative to settlement. |

## Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 6 of 7)

|                             | LS_30   | LS_32   | LS_37   | FS1   |
|-----------------------------|---|---|---|---|
| Sustainability<br>Objective | Pinecroft, Frittenden Road, Sissinghurst,<br>TN17 2AQ   | Land off of Golford Road, Cranbrook,  | Glenn House, Hartley Road, Cranbrook. TN17 3QP  | Courtlands, Turnden Road,<br>Hartley, Cranbrook   |
| Waste                       | 0   | 0   | 0   | 0   |
| Water                       | 0/?   | -   | 0   | 0   |
| Commentary                  | This site scores mostly neutral, with some<br>positive scores. It is let down by<br>accessibility to services and facilities and<br>public transport. In addition, landscape<br>score informed by location of site relative<br>to settlement. | The proposed housing density is<br>considered high for this site given<br>sensitive landscape and edge of<br>settlement location. The site would suit<br>low density, farmstead style<br>development. The negative water score<br>reflects adjacent flood zone 3, and the<br>very negative landscape score reflects<br>the recommendation of the 2020 LVIA<br>report not to allocate this site. | A site that scores several neutrals with some positives along with<br>several negative scores. It is let down by accessibility to key<br>services and facilities and public transport and would result in the<br>loss of a greenfield site in the AONB located adjacent to and<br>forming part of the setting of an historic settlement. The equality<br>score is let down by concerns about the ability of the less able to<br>gain access to the services and facilities with their being a lack of<br>pavement along Turnden Road, whilst the score on biodiversity is<br>negative, influenced by potential scale of development in a SSSI<br>impact risk zone and rural area and proximity to Ancient<br>Woodland and Biodiversity Opportunity Area further north of the<br>site. | This site scores similar to site<br>LS_37 with adjustments made<br>to some objectives to reflect<br>the smaller scale of this site. |

|                             | 59 / LS_14   | 292   | SC_1                | FS8   | 442                                   |

## Scores for Reasonable Sites in Cranbrook and Sissinghurst (part 7 of 7)

|                             | 59 / LS_14   | 292  | SC_1  | FS8  | 442  |
|-----------------------------|--|--|---|--|--|
| Sustainability<br>Objective | Hartley Parcels (including sites 70, 323, 345 and LS_53)   | Land South of Corn Hall, Crane Valley,<br>Cranbrook  | Sissinghurst Castle   | Land Adjacent to The Barracks,<br>Cranbrook  | Land at Frittenden Road, Sissinghurst  |
| Waste                       | 0  | 0  | 0   | 0  | 0  |
| Water                       | 0  | 0  | 0   | 0 / +  | 0  |
| Commentary                  | This group of sites has positive impacts<br>on some economic and social objectives<br>but it let down by the distance to<br>Cranbrook town centre.<br>2020 Grassland study found western side<br>of site cluster to have low-moderate<br>botanical importance and moderate<br>ecological importance. Score adjusted<br>slightly. Landscape score downgraded<br>following AONB Units advice to better<br>reflect impact upon the AONB and 2020<br>LVIA study. | Landscape scores are negative to<br>reflect impact upon the AONB. Impacts<br>on heritage assets will also be<br>unavoidable. Biodiversity score reflects<br>risk of recreational pressure on the<br>Local Nature Reserve and location of<br>site within the impact risk zone for<br>Robins Wood SSSI. Land use score<br>largely reflects loss of greenfield land<br>with likely pockets of best and more<br>versatile soils. | This policy scores largely neutral or<br>positive with specific benefits to<br>tourism, access to heritage assets and<br>improvements to transport modes. | This site scores similar to site 296 with<br>adjustments made to some objectives<br>to reflect the larger scale. The<br>Conservation Area is particularly<br>vulnerable to development at this site<br>and this is reflected in the heritage<br>score. | This site is scored similarly to site 68<br>with adjustments made to some<br>objectives to reflect the smaller<br>scale. |

### Scores for Reasonable Sites in Hawkhurst (part 2 of 7)

|                             | 55   | 86  | 102  | 107  |
|-----------------------------|--|---|--|--|
| Sustainability<br>Objective | March's Field, Lime Grove, Gill's Green TN18 5BD   | Land at Highgate Hill, Hawkhurst<br>(Phase 2)   | Hawkhurst Station Business Park, Gill's Green TN18 5BD   | Hawkhurst Place Farm, Rye Road, Hawkhurst TN18<br>5DA  |
| Travel                      | - /  | 0   | -/   | 0/-  |
| Waste                       | 0  | 0   | 0  | 0  |
| Water                       | 0/?  | 0   | 0/?  | 0/-  |
| Commentary                  | Gills Green is a Key Employment Area and several<br>objectives are scored as neutral or positive to reflect<br>suitability of allocation for employment use. Travel<br>and air quality objectives score poorly due to the<br>topography and distance for reaching the services at<br>Hawkhurst using active travel. Landscape issues are<br>also negative due to far reaching views and the<br>impact upon the character of the AONB. Land use<br>score reflects the loss of greenfield land and useful<br>soils within the AONB. The air score reflects the risk<br>this relatively large site creates to air quality in the<br>AQMA that is about to be declared, and dependency<br>on private car use in this location. | Scores mostly neutral with some<br>positives though has negative<br>landscape and land use scores<br>reflecting loss of historic field /<br>greenfield site in AONB and historic<br>landscape, with grade 3 agricultural<br>soils. The air score reflects the risk<br>this relatively large site creates to<br>air quality in the AQMA that is<br>about to be declared. | Gills Green is a Key Employment Area and several objectives<br>are scored as neutral or positive to reflect suitability of<br>allocation for employment use. Travel and air quality<br>objectives score poorly due to the topography and distance for<br>reaching the services at Hawkhurst using active travel.<br>Landscape issues are also negative due to far reaching views<br>and the impact upon the character of the AONB. Land use<br>score reflects the loss of greenfield land and useful soils within<br>the AONB. 2020 Grassland study found site to have low<br>botanical importance and moderate ecological importance.<br>Biodiversity score adjusted slightly. 2020 LVIA confirms<br>development could take place here without significant adverse<br>effects on the AONB. The air score reflects the risk this<br>relatively large site creates to air quality in the AQMA that is<br>about to be declared, and dependency on private car use in<br>this location. | A site that scores neutrals and some positives. It is<br>let down on its land use score influenced by the<br>loss of a greenfield site, with grade 3 agricultural<br>soils and landscape score being the loss of an<br>historic field in the AONB. There is an historic field<br>and lies adjacent to an historic farmstead which<br>informs the heritage score. |

#### Scores for Reasonable Sites in Hawkhurst (part 3 of 7)

|                             | 115  | 167   | 201  | 284  |
|-----------------------------|--|---|--|--|
| Sustainability<br>Objective | Land forming part of the Hawkhurst Golf Course to the north of High Street, Hawkhurst TN18 4JS   | Land on the north west side of<br>Heartenoak Road, Hawkhurst  | Land at Sessele House and Marlborough<br>House School, High Street, TN18 4PY   | Dee House, Rye<br>Road, Hawkhurst  |
| Travel                      | 0 / +  | 0 / -   | 0 / -  | 0  |
| Waste                       | 0  | 0   | 0  | 0  |
| Water                       | 0 / -  | 0 / -   | 0  | 0  |
| Commentary                  | Appraisal assumed site would provide a relief road in additional to new dwellings.<br>A significant site with mixed scores. The large size of the site benefits the housing objective but is out of keeping with the existing rural settlement and thus will have very adverse impacts on heritage assets and the character of the AONB (confirmed by 2020 LVIA report). Adverse land use, carbon and water scores also reflect the pressures created by a large site in this location. Despite being a predominantly greenfield site, the previous use as a golf course would mean impacts upon biodiversity are limited and can be adequately controlled with protection buffers. The large site also brings benefits in the form of likely onsite provision of open space and community facilities which could help address inequalities and bring significant contributions to help improve bus services and active travel links. The relief road is a significant piece of transport infrastructure and is likely to bring large noise and air benefits to the centre of Hawkhurst by diverting traffic away from the AQMA on Cranbrook Rd. However, transboundary effects may be experienced at the Flimwell junction (Rother District Council) as more traffic is diverted this way. It is not known whether closing Cranbrook road would reduce passing trade or benefit local business by making a more pleasant pedestrian environment. For this reason, impacts upon the business objective are unknown. Slight negative scores for services and facilities reflect the fact that Hawkhurst lacks a train station, is distant from key shopping areas and car travel is preferable in rural settlements. Some residents within the site will be outside of desirable walking distances. The resources objective is informed by the minor impact on Superficial Sub-Alluvial River Terrace deposits. | A site with a mixture of mostly<br>neutral and positive scores. It is<br>let down on landscape and land<br>use grounds. Part of the site is an<br>historic field and there are<br>historic routeways. The site is<br>outside of desirable walking<br>distance so car use will dominate<br>especially as Hawkhurst lacks a<br>train station and is distant from<br>significant retail and leisure<br>facilities. The air score reflects<br>the risk this relatively large site<br>creates to air quality in the<br>AQMA that is about to be<br>declared. | A site that scores mostly neutral. It is<br>part of an existing school and as such<br>deliverability is uncertain. It results in<br>loss of a greenfield site in the AONB,<br>but impact likely to be limited as is a<br>small site. | A site that scores<br>mostly neutral that<br>includes existing<br>built development. |

|                             | 291                                | 334   | 350  | 351                                      | 361   |

## Scores for Reasonable Sites in Hawkhurst (part 4 of 7)

|                             | 291   | 334   | 350   | 351  | 361  |
|-----------------------------|---|---|---|--|--|
| Sustainability<br>Objective | Field at Cranbrook Road, Hawkhurst  | South west Side of Hearten Oak Lane,<br>Hawkhurst   | High Banks Garden Centre, Cranbrook<br>Road, Hawkhurst  | High Banks, Slip Mill Road,<br>Hawkhurst   | Land at The White House, Highgate Hill, Hawkhurst  |
| Travel                      | 0 / -   | -   | 0 / -   | - /  | 0  |
| Waste                       | 0   | 0   | 0   | 0 / -  | 0  |
| Water                       | 0 / +   | 0   | 0 / +   | 0  | 0  |
| Commentary                  | A site that includes some existing built<br>development. It scores neutrals and<br>some positives but is let down by a lack<br>of key services and facilities and lack of<br>public transport options. It is let down<br>on land use score influenced by<br>agricultural grade 3 land and loss of<br>greenfield land in the AONB. | A site with a mixture of mostly<br>neutral and positive scores, let down<br>on land use and landscape scores,<br>reflecting location relative to the<br>settlement centre and loss of historic<br>field in the AONB. There is concern<br>about lack of footway along<br>Heartenoak Road and pedestrian<br>accessibility to services and facilities<br>including public transport. The site is<br>outside of desirable walking distance<br>so car use will dominate especially as<br>Hawkhurst lacks a train station and is<br>distant from significant retail and<br>leisure facilities. The air score reflects<br>the risk this relatively large site<br>creates to air quality in the AQMA<br>that is about to be declared. | A site that includes some existing<br>built development. It scores neutrals<br>and some positives but is let down by<br>a lack of key services and facilities and<br>lack of public transport options. It is<br>let down on land use score influenced<br>by agricultural grade 3 land and loss<br>of greenfield land in the AONB. The<br>air score reflects the risk this<br>relatively large site creates to air<br>quality in the AQMA that is about to<br>be declared. | A site that contains existing built<br>development. It is let down by<br>the lack of key services and<br>facilities/transport. | A reasonable site with mostly neutral or positive<br>scores that largely reflect the location within<br>desirable walking distance of facilities and services.<br>Slight negative score for landscape and heritage<br>reflect the high sensitivity of the landscape and<br>change in setting of a non designated heritage<br>asset. There is also no guarantee that the asset<br>would not be demolished. However, preservation<br>of the building and sensitive design will help reduce<br>significant impacts. The site is located in an area of<br>high road noise thus scores negatively both for its<br>potential to worsen this through additional car<br>movements and for the comfort of the new<br>residents. |

### Scores for Reasonable Sites in Hawkhurst (part 5 of 7)

|                             | 391   | 392  | 394  | 413   |
|-----------------------------|---|--|--|---|
| Sustainability<br>Objective | Rear of Limes Grove Oast, Slip Mill Road, Hawkhurst   | Trewint Farm and Jacks Paddock, Slip Mill Lane,<br>Hawkhurst (includes site DPC_22).   | Land west of Slip Mill Lane at Trewint Farm, Slip Mill<br>Lane, Hawkhurst  | Land at Fowlers Park, Hawkhurst   |
| Travel                      | - /   | -/   | -/   | -   |
| Waste                       | 0   | 0 / -  | 0  | 0   |
| Water                       | 0/?   | 0  | 0/-  | 0/-   |
| Commentary                  | Gills Green is a Key Employment Area and several<br>objectives are scored as neutral or positive to reflect<br>suitability of allocation for employment use. Travel<br>and air quality objectives score poorly due to the<br>topography and distance for reaching the services at<br>Hawkhurst using active travel. Landscape issues are<br>also negative due to far reaching views and the<br>impact upon the character of the AONB. Land use<br>score reflects the loss of greenfield land and useful<br>soils within the AONB. | A site on which there is existing built<br>development, let down by access to a lack of<br>services and facilities and location of site in<br>relation to settlement centre. Negative<br>landscape score informed by impact on historic<br>field and historic routeways. | A greenfield site which is an historic field located in<br>the AONB. This is reflected in the negative<br>landscape score received and land use score<br>influenced by the greenfield site. The site scores<br>negatively for services and facilities and transport, a<br>reflection of the relatively remote location of the<br>site relative to the settlement centre and public<br>transport options. | A large site which provides a relatively significant<br>quantity of new dwellings. The sensitive edge of<br>settlement location is still likely to cause impacts<br>upon the character of the AONB and the wider<br>historic environment (confirmed by the 2020 LVIA<br>report). The large number of dwellings will also put<br>pressure upon local water resources and may<br>impact upon the AQMA about to be declared.<br>Scores for equality, air, travel and services are<br>dependent upon the availability of a more direct<br>pedestrian route onto Rye Road and could be<br>improved if one is found. Housing density seems<br>high given edge of settlement location and sensitive<br>landscape. The positive education score reflects the<br>suitability of the site to safeguard land for<br>expansion of the primary school. |

|                             | 413   | 422  | 433   | 455                                   | SALP AL/HA 1                         |

#### Scores for Reasonable Sites in Hawkhurst (part 6 of 7)

|                             | 413  | 422   | 433   | 455  | SALP AL/HA 1  |
|-----------------------------|--|---|---|--|---|
| Sustainability<br>Objective | PART SITE<br>Land at Fowlers<br>Park, Hawkhurst  | Santers Yard, Gills Green Farm, Gills Green, Hawkhurst  | OS Plot 7007,<br>Cranbrook Road,<br>Hawkhurst   | Whitewood Farm, White Lane, Hawkhurst  | Site of Former Springfield Nurseries  |
| Travel                      | 0  | -/  | 0/-   | -  | 0/-   |
| Waste                       | 0  | 0   | 0   | 0  | 0   |
| Water                       | 0  | 0/?   | 0/?   | 0/-  | 0   |
| Commentary                  | This is a relatively<br>small site and<br>significant impacts<br>are not predicted for<br>any objective. The<br>Services and<br>Facilities objective<br>reflects the benefit<br>that a new,<br>upgraded GP surgery<br>in a central location<br>will bring to the<br>whole community. | Gills Green is a Key Employment Area and several objectives are<br>scored as neutral or positive to reflect suitability of allocation for<br>employment use. Lack of facilities and services in Gills Green<br>means the location is not well suited to housing and so equality,<br>travel and services objectives score negatively (disabled persons<br>may not be able to live there). It is expected that demolition could<br>be avoided demolition makes the resources objective slightly<br>positive. Development of the whole site would have severe impact<br>on the AONB (confirmed by the 2020 LVIA report).<br>2020 Grassland study found site to have low botanical importance<br>and low-moderate ecological importance. Biodiversity score<br>unchanged. | A site that scores<br>mostly neutral that is<br>let down by lack of<br>key services and<br>facilities and sue to<br>negatives impacts<br>upon the sensitive<br>landscape. | A site with some positive and neutral scores.<br>Let down by negative scores reflecting<br>impact on landscape and potential scale of<br>development. It is a greenfield site in the<br>AONB with grade 3 agricultural soils. White's<br>Lane is rural in character and an historic<br>routeway, influencing negative land use and<br>landscape scores. The air score reflects the<br>risk this relatively large site creates to air<br>quality in the AQMA that is about to be<br>declared. | A reasonable site. However, the location at the<br>bottom of a steep hill outside of reasonable<br>walking distances means private car use is likely to<br>dominate and thus the equality and travel<br>objectives cannot score positively. The location in<br>the AONB is reflected in the slightly negative score<br>for landscape. The design must consider the<br>mature trees on site. |

### Scores for Reasonable Sites in Hawkhurst (part 7 of 7)

|                             | LS_3   | 457   | 78   | SALP AL/HA 5  |
|-----------------------------|--|---|--|---|
| Sustainability<br>Objective | Land to the west of Cranbrook Road, Gills Green  | Brook House, Cranbrook Road, Hawkhurst  | Land off Copthall Avenue and Highgate Hill,<br>Hawkhurst (including 419)   | Site at Sports Pavillion, King George V Playing<br>Fields, The Moor   |
| Travel                      | -/   | 0/-   | 0/-  | 0   |
| Waste                       | 0  | 0   | 0  | 0   |
| Water                       | 0/?  | 0   | 0  | 0   |
| Commentary                  | A site that scores several neutrals and some positives.<br>It scores a number of negatives scores. Its heritage<br>score in influenced by the presence of a listed<br>building on the site and the contribution the site<br>makes to the setting of that and the historic<br>farmstead. The site would result in the loss of a<br>greenfield site in the AONB adjacent to which is an<br>historic routeway (road), these inform the land use<br>and landscape scores. It scores negatively for<br>services, facilities and transport given the location of<br>Gill's Green relative to the settlement centre and<br>equality also due to concern about ease of access to<br>services and facilities for the less mobile. | A reasonable site. However, the location at the<br>bottom of a steep hill outside of reasonable walking<br>distances means private car use is likely to<br>dominate and thus the equality and travel<br>objectives cannot score positively. The location in<br>the AONB is reflected in the slightly negative score<br>for landscape. The design must consider the mature<br>trees on site. | This site scores similarly to Site 413 (Land at Fowlers<br>Park). Coalescence between Highgate and the Moor<br>needs consideration and impacts will be reduced by<br>open space buffers. The site is located in an area of<br>high road noise thus scores negatively for its<br>potential to worsen this situation through<br>additional car movements.<br>2020 Grassland study found parts of the site to<br>have low-moderate botanical importance and low-<br>moderate ecological importance. Biodiversity score<br>adjusted slightly given scale of site.<br>Landscape score reflects the findings of the 2020<br>LVIA report. | A largely neutral site that scores positively for<br>health and services objectives reflecting the<br>opportunity to make improvements to the<br>existing leisure facilities and the provision of an<br>improved GP surgery for the settlement. |

Scores for Reasonable Sites in Benenden (part 1 of 2)

|                             | 158  | 222   | 277   | 425   | LS_41   |
|-----------------------------|--|---|---|---|---|
| Sustainability<br>Objective | Land rear of Greenacres, The<br>Street & adjacent to New Pond Rd<br>(includes site DPC20)  | Land on the west side of Iden Green Rd  | Feoffee Cottages and<br>Land Walkhurst Rd   | Land to the east of Mockbeggar Lane   | Land at Benenden Hospital, North of Goddards Green Rd   |
| Noise                       | 0  | 0   | 0   | 0   | 0   |
| Resources                   | 0/?  | /?  | 0/?   | ?/-   | /?  |
| Services &<br>Facilities    | -/   | -/  | - /   | /   | /   |
| Travel                      | -  | -   | -   |   |   |
| Waste                       | 0  | 0   | 0   | 0   | 0   |
| Water                       | 0 / -  | 0/-   | 0   | 0   | 0   |
| Commentary                  | A site that scores several neutrals<br>with some positives, let down by<br>its land use and landscape score<br>impacted by loss of a greenfield<br>site in the AONB and lack of<br>services and facilities including<br>public transport at the<br>settlement. | A site that scores some neutrals with some<br>positives, which is let down by its land use<br>and landscape score impacted by loss of a<br>greenfield site in the AONB and impact on<br>heritage with part of the site being within<br>the Benenden Conservation Area and the<br>site forming part of the setting to the<br>Conservation Area and including part of the<br>historic settlement. There is also a lack of<br>services and facilities including public<br>transport at the settlement. | Reasonable site.<br>Minor landscape and<br>heritage issues due to<br>the sensitive<br>landscape and setting<br>of heritage assets.<br>Lack of services and<br>facilities is a key issue<br>for all development in<br>this parish. | A site that scores a number of neutrals and<br>some positives. It is a greenfield site located<br>in a remote location, reflected in the land<br>use score. Landscape scores (albeit that the<br>site is adjacent to existing built development<br>at Benenden Hospital) negatively as it results<br>in the loss of a greenfield site in an historic<br>landscape that lies adjacent to historic<br>routeways (roads). Residents will rely heavily<br>on private cars and thus air, equality and<br>travel objectives score negatively. | Good use of previously developed land resulting in a positive<br>score for the land use objective. However, residents will rely<br>heavily on private cars and thus air, equality and travel<br>objectives score negatively. Although promoted by the policy,<br>shared transport and active travel options are unlikely to take<br>precedence over private vehicle use thus air quality and climate<br>change also score negatively. The biodiversity objective score<br>reflects the balance of the risk to the well connected Local<br>Wildlife Site in the south and west, and the benefit that would<br>come from contributions to its long term management. Heritage<br>score reflects risk to the non designated heritage asset. |

| Sustainability<br>Objective | Land south of Chapel Lane, Iden Green,<br>Cranbrook   | Uphill, New Pond Road, Benenden, Cranbrook  | Little Weavers, Iden Green,<br>Benenden, Cranbrook  | Land at Benenden Hospital, South of Goddards Green Road (including site 424)  |
| Services &<br>Facilities    | /   | -/  |   | /   |
| Travel                      |   | -   |   |   |
| Waste                       | 0   | 0   | 0   | 0   |
| Water                       | 0   | 0   | 0   | 0   |
| Commentary                  | This site scores some neutrals and some<br>positives. A number of scores are negative<br>however, reflecting the remote location of the<br>site from services and facilities and public<br>transport. It scores negatively in heritage terms<br>as the site is a relatively sizeable piece of the<br>Iden Green Conservation Area. It scores<br>negatively in land use and landscape terms,<br>influenced by the loss of greenfield land within<br>the AONB and adjacent to an historic settlement. | Reasonable site. Setting of adjacent Conservation<br>Area needs consideration. Lack of services and<br>facilities is a key issue for all development in this<br>settlement.<br>2020 grassland study shows this site has<br>moderate-low botanical importance and moderate<br>ecological importance. Score changed from 0 to -<br>to reflect this. | Good use of previously<br>developed land. However,<br>residents will rely heavily on<br>private cars and thus some<br>objectives score negatively. This<br>is influenced by the lack of key<br>services and facilities and public<br>transport options. | Good use of previously developed land resulting in a positive score for the<br>land use objective. However, residents will rely heavily on private cars and<br>thus air, equality and travel objectives score negatively. Although promoted<br>by the policy, shared transport and active travel options are unlikely to take<br>precedence over private vehicle use thus air quality and climate change<br>also score negatively. The biodiversity objective scores negative overall<br>reflecting the balance of the risk to the relatively isolated Local Wildlife<br>Site, and the benefit that would come from contributions to its long term<br>management. Heritage score reflects risk to the non designated heritage<br>asset. |

#### Scores for Reasonable Sites in Brenchley and Matfield (part 1 of 5)

|                             | 18  | 34  | 36   |
|-----------------------------|---|---|--|
| Sustainability<br>Objective | Matfield House orchards and land, The Green, Matfield TN12 7JT  | Walters Farm, High Street, Brenchley TN12 7NU   | Land fronting Maidstone Road and Chestnut Lane, Matfield   |
| Resources                   | 0/?   | 0/?   | 0/?  |
| Services & Facilities       | -/  | -   | -/   |
| Travel                      | 0/-   | -   | 0/-  |
| Waste                       | 0   | 0   | 0  |
| Water                       | 0   | 0   | 0  |
| Commentary                  | Negative land use score is created by the loss of Grade 2 BMV soils. The walking route to main facilities in Brenchley is not accessible (no pavement) and far beyond desirable walking distance (1.5km) so objectives that relate to dependency on private car use score negatively (e.g. air). This is to be expected in a rural settlement like Matfield. A negative heritage score reflects the development being out of keeping with the existing linear settlement pattern and potential adverse effects on the setting of the adjacent Conservation Area and setting of the settlement also reflected in the negative landscape score. 2020 Grassland study found site to have low-moderate botanical importance and moderate ecological importance. Biodiversity score adjusted slightly. | A site that scores mostly neutral and some positive<br>scores. It is let down by a lack of key services and<br>facilities. Negative scores are given on land use<br>grounds, influenced by the loss of a greenfield site<br>in an historic landscape in the AONB. It scores a<br>negative landscape score due to potential impact<br>on the setting of the historic settlement. | Site scores negatively reflecting largely wooded nature on scores relating to biodiversity, land use and landscape and potential harm arising from this loss on the historic settlement and the AONB. The walking route to main facilities in Brenchley is not accessible (no pavement) and far beyond desirable walking distance (1.5km) so objectives that relate to dependency on private car use score negatively (e.g. air). This is to be expected in a rural settlement like Matfield. A negative score for biodiversity reflects the likelihood that the site is currently suitable habitat for wildlife and that protected species such as reptiles may need to be translocated (surveys will confirm). The site also scores several neutrals and some positives. |

|                             | 76   | 80  | 215   | 220  |

## Scores for Reasonable Sites in Brenchley and Matfield (part 2 of 5)

|                             | 76  | 80   | 215   | 220   |
|-----------------------------|---|--|---|---|
| Sustainability<br>Objective | Corsica Nursery, Brenchley Road, Matfield TN12 7PT  | Parsonage Farm, Brenchley Road, Brenchley TN12<br>7PA  | Land at Horsmonden Road, adjacent to Church Close,<br>Brenchley   | Thorn Barn, Maidstone Road, Standings Cross,<br>Matfield  |
| Travel                      | 0/-   | -  | -   | 0/-   |
| Waste                       | 0   | 0  | 0   | 0   |
| Water                       | 0   | 0  | 0   | 0   |
| Commentary                  | A site that scores several neutral scores as well as<br>positive ones. It is a small site which would have<br>limited impact on landscape, reflected in the score<br>given. Its land use negative score is influenced by the<br>grade 2 agricultural soil, though this site is small so<br>the loss of this site would not be significant given site<br>context. It is let down by a lack of key services and<br>facilities and public transport options. | Site scores positively for housing but is let down<br>by landscape and land use impacts and its score<br>for heritage impact which reflects impact on<br>AONB component parts and on setting of the<br>settlement. | Site scores some neutrals and some positives but is<br>let down on a number of scores. It forms part of the<br>landscape setting of Brenchley, a historic<br>settlement which adjoins the site. There would be a<br>loss of a greenfield site in the AONB. There is<br>concern that topography on the site would restrict<br>access to the services at Brenchley for the less able.<br>These factors contribute to some of the negative<br>scores along with a lack of key services and facilities<br>and public transport options. | A site that scores several neutrals. Part of the site is<br>an historic field, and the site is adjacent to historic<br>routeways, both factors influencing the landscape<br>score. The greenfield nature of part of the site and<br>its grade 2 agriculture land classification has<br>informed land use score. The site is let down by a<br>lack of key services and facilities and public<br>transport options in Matfield. |

|                             | 288   | 353   | 393  | 401                               | 403                             |

## Scores for Reasonable Sites in Brenchley and Matfield (part 3 of 5)

|                             | 288  | 353   | 393  | 401  | 403   |
|-----------------------------|--|---|--|--|---|
| Sustainability<br>Objective | Land lying on the west side of<br>Maidstone Road, Matfield, Tonbridge  | Ashes Plantation, Maidstone Road,<br>Matfield   | Town Farm, Palmers Green Lane,<br>Brenchley, Tonbridge   | Land at Maidstone Road, Matfield,  | Land at Oakfield Road, Matfield   |
| Travel                      | 0/-  | 0/-   | -  | 0/-  | 0/-   |
| Waste                       | 0  | 0   | 0  | 0  | 0   |
| Water                       | 0  | 0   | 0  | 0  | 0   |
| Commentary                  | A site that has several neutral scores<br>but which is let down by its location<br>further from services and facilities<br>than some other sites and a lack of<br>public transport options. Its negative<br>land use score is influenced by the fact<br>this is grade 2 agricultural land and the<br>site is a greenfield site. The greenfield<br>site has also informed the landscape<br>score along with historic routeways<br>through and adjacent to the site. | Negative land use score is created by the<br>loss of Grade 2 BMV soils. The walking<br>route to main facilities in Brenchley is not<br>accessible (no pavement) and far beyond<br>desirable walking distance (1.5km) so<br>objectives that relate to dependency on<br>private car use score negatively (e.g. air).<br>This is to be expected in a rural<br>settlement like Matfield. A negative<br>landscape and heritage score reflect the<br>development not being in keeping with<br>the existing linear settlement pattern<br>within the AONB. However, the screening<br>of the sites by trees reduces impacts. | Site scores some neutrals and some<br>positives but is let down on a number of<br>scores. It adjoins the historic settlement<br>and is important to the setting of this and<br>the landscape setting generally. There<br>would be a loss of a greenfield site in the<br>AONB, the site is partly an historic field,<br>and there are historic routeways (PROW)<br>on the site. There is concern that<br>topography on the site would restrict<br>access to the services at Brenchley for the<br>less able. These factors contribute to<br>some of the negative scores along with a<br>lack of key services and facilities and<br>public transport options. | Negative land use score is created by the<br>loss of Grade 2 BMV soils. The walking<br>route to main facilities in Brenchley is not<br>accessible (no pavement) and far beyond<br>desirable walking distance (1.5km) so<br>objectives that relate to dependency on<br>private car use score negatively (e.g. air).<br>This is to be expected in a rural<br>settlement like Matfield. A negative<br>heritage score reflects potential adverse<br>effects on the setting of the adjacent<br>Conservation Area. | Site scores several neutrals with<br>negative scores reflecting loss of a<br>greenfield site in the AONB. However,<br>the screening of the site by trees<br>reduces impacts. The walking route<br>to main facilities in Brenchley is far<br>beyond desirable walking distance so<br>objectives that relate to dependency<br>on private car use score negatively<br>(e.g. air). This is to be expected in a<br>rural settlement like Matfield. |

## Scores for Reasonable Sites in Brenchley and Matfield (part 4 of 5)

|                             | 406  | 410   | 414  | 417  |
|-----------------------------|--|---|--|--|
| Sustainability<br>Objective | Land at Glebe House, Brenchley Road, Brenchley   | Land at Brenchley Road, Matfield  | Land north-east of Maidstone Road, Matfield  | Land to the East of Horsmonden Road, Brenchley   |
| Travel                      | -  | -   | 0 / -  | -  |
| Waste                       | 0  | 0   | 0  | 0  |
| Water                       | 0  | 0/-   | 0  | 0  |
| Commentary                  | A reasonably located site that scores a number of<br>neutrals and positive scores. It is let down by a lack<br>of key services and facilities and public transport<br>and on its heritage score because of its location<br>within the Brenchley Conservation Area and<br>adjacent to an historic farmstead. There is a small<br>amount of archaeological potential on the site<br>which is located in the AONB and adjoined by an<br>historic routeway (road) and there is an historic<br>routeway (PROW) to the west of the site. | Site scores some neutrals and some positives but<br>scores negatively on heritage, land use and<br>landscape scores due to its forming a significant part<br>of the historic and landscape setting of the Matfield<br>and the Conservation Area, as well as the loss of<br>historic fields in the AONB and being greenfield land.<br>Negative score is influenced by the loss on part of<br>the site of Grade 2 BMV soils. The walking route to<br>main facilities in Brenchley is not accessible far<br>beyond desirable walking distance so objectives that<br>relate to dependency on private car use score<br>negatively (e.g. air). This is to be expected in a rural<br>settlement like Matfield. | Negative land use score is created by the loss of<br>Grade 2 BMV soils. The walking route to main<br>facilities in Brenchley is not accessible (no<br>pavement) and far beyond desirable walking<br>distance (1.5km) so objectives that relate to<br>dependency on private car use score negatively<br>(e.g. air). This is to be expected in a rural<br>settlement like Matfield. A negative landscape<br>and heritage score reflect the development not<br>being in keeping with the existing linear<br>settlement pattern within the AONB. However,<br>the screening of the sites by trees reduces<br>impacts. | Site scores some neutrals and some positives but is<br>let down on a number of scores. It abuts the<br>Brenchley Conservation Area and the listed church to<br>the north west and is important to the setting of<br>these as well as the landscape setting of Brenchley.<br>There is an historic farmstead to the south west.<br>There would be a loss of a greenfield site in the<br>AONB, the site is an historic field, and there are<br>historic routeways (PROW) crossing on the site and<br>historic routeway (road) adjacent. There is concern<br>that topography on the site would restrict access to<br>the services at Brenchley for the less able as there is<br>also a lack of pavement along Horsmonden Road.<br>These factors contribute to some of the negative<br>scores along with a lack of key services and facilities<br>and public transport options. |

#### Scores for Reasonable Sites in Brenchley and Matfield (part 5 of 5)

|                             | LS_7  | LS_27   | LS_33   | LS_46   | LS_47   |
|-----------------------------|---|---|---|---|---|
| Sustainability<br>Objective | Land at Little Puxted, High Street,<br>Brenchley, Tonbridge   | Land between Brenchley Road, Coppers<br>Lane and Maidstone Road, Matfield   | Land at Brenchley Primary School and<br>land south of Brenchley Road (including<br>sites 103 and late sites 34 and 35)  | Land off Maidstone Road Matfield  | Land at Friars, Matfield  |
| Travel                      | -   | 0/-   | -   | 0/-   | 0/-   |
| Waste                       | 0   | 0   | 0   | 0   | 0   |
| Water                       | 0   | 0   | 0   | 0   | 0   |
| Commentary                  | A site that is let down by scores relating<br>to heritage, land use and landscape<br>impact. The site is an historic field, which<br>impacts on this AONB component part.<br>Site also let down by accessibility to key<br>services and facilities. | Negative land use score is created by the<br>loss of Grade 2 BMV soils. The walking<br>route to main facilities in Brenchley is not<br>accessible (no pavement) and far beyond<br>desirable walking distance (1.5km) so<br>objectives that relate to dependency on<br>private car use score negatively (e.g. air).<br>This is to be expected in a rural<br>settlement like Matfield. Negative<br>heritage and landscape scores reflect the<br>development not being in keeping with<br>the existing linear settlement pattern and<br>the loss of a historic field within the<br>AONB. | The positive score for housing indicates<br>the suitability of the location for older<br>persons (i.e. near to facilities). However,<br>the site is still outside of desirable<br>walking distance, so objectives related to<br>dependency on private car use score<br>negatively. In particular, travel to<br>Paddock Wood to access the train line is<br>inconvenient from Brenchley. | A site that scores many neutrals but<br>which is let down by its location<br>further from services and facilities than<br>some other sites. Negative score for<br>land use is influenced by grade 2<br>agricultural land. | A site that scores many neutrals but<br>which is let down by its location<br>further from services and facilities<br>than some other sites. Negative score<br>for land use is influenced by grade 2<br>agricultural land. |

| Commentary                  | A site with several neutral<br>scores and some positive. The<br>site is let down on grounds<br>relating to both land use and<br>landscape impact, being the<br>loss of a greenfield site in the<br>AONB adjacent to a historic<br>settlement. | Reasonable site with many<br>neutral or slightly positive<br>scores. Slight negative scores<br>mostly reflect the dependency<br>on private car use, the<br>sensitive AONB landscape, loss<br>of greenfield land and<br>educational pressure. | Reasonable site with many<br>neutral or slightly positive<br>scores. Slight negative scores<br>mostly reflect the<br>dependency on private car<br>use, the sensitive AONB<br>landscape, loss of greenfield<br>land and educational<br>pressure. | This site is remote from most<br>key services and facilities<br>located further west from the<br>centre of Goudhurst. It scores<br>mostly neutrals with some<br>positive scores but is let down<br>on landscape grounds, being<br>the loss of a greenfield in the<br>AONB adjacent to an historic<br>settlement and its location<br>relative to services and<br>facilities. | This site is remote from most<br>key services and facilities<br>located further west from the<br>centre of Goudhurst. It scores<br>neutrals with some positive<br>scores but is let down on<br>landscape grounds, being the<br>loss of an historic field in the<br>AONB and is adjacent to an<br>historic routeway (road). | This site is in a very remote location<br>which would encourage use of private<br>cars to reach the nearest services and<br>facilities (which in themselves are<br>limited). The site is outside the AONB<br>but setting issues may need<br>consideration (likewise heritage assets).<br>The brownfield nature of the site<br>enables a positive score for the Land Use<br>objective. The positive health score<br>reflects the suitability of the site for C2<br>use. |

| Water                       | 0   | 0/-   | 0  | 0  |
| Commentary                  | A site that scores mostly neutral scores. It scores<br>negatively for land use reflecting the loss of a<br>greenfield site and associate soils. The landscape<br>negative score is influenced by the loss of the<br>greenfield site in an historic landscape. | Scale of this site is out of keeping with the existing<br>settlement and causes negative scores for landscape<br>and heritage especially with regard to short term<br>adverse impacts on the AONB setting. Existing public<br>transport services are unlikely to deter travel by<br>private car and the poor range of services and<br>facilities contributes to this effect. However, the site<br>would contribute positively to the housing objective<br>and the existing schools are likely to have adequate<br>capacity. | This site scores some neutrals and some positives<br>but is let down by its location detached from the<br>main services and facilities of the settlement and a<br>lack of key services and facilities generally,<br>landscape and land use impact and lack of travel<br>options. It is likely that any occupants of this site<br>would be car dependant. | This site scores some neutrals and some positives<br>but is let down by its location detached from the<br>main services and facilities of the settlement and a<br>lack of key services and facilities generally,<br>landscape and land use impact and lack of travel<br>options. It is likely that any occupants of this site<br>would be car dependant. |

| Waste                       | 0  | 0  | 0  | 0  | 0   |
| Water                       | 0  | 0  | 0  | 0  | 0   |
| Commentary                  | This site scores some neutrals and<br>some positives but is let down by its<br>location detached from the main<br>services and facilities of the settlement<br>and a lack of key services and facilities<br>generally, landscape and land use<br>impact and lack of travel options. It is<br>likely that any occupants of this site<br>would be car dependant. | This site scores a mix of neutrals and<br>positives. Negative scores received<br>reflect the lack of key services and<br>facilities at Horsmonden and a lack of<br>public transport options. It is a<br>relatively large site so the housing<br>objective scores positively. | A site that scores both neutral and positive<br>scores. It scores negatively for land use<br>reflecting the loss of a greenfield site and a<br>site that includes grade 2 agricultural land.<br>The landscape negative score is influenced<br>by the loss of the greenfield site in an<br>historic landscape. The heritage score<br>reflects the impact of the rural character<br>of the settlement pattern and the impact<br>upon a heritage asset. | This site scores a mix of neutrals and<br>positives. Negative scores received<br>reflect the lack of key services and<br>facilities at Horsmonden and a lack of<br>public transport options. A large pond<br>on the site informs the biodiversity<br>score given. Setting of the adjacent<br>listed building is likely to be affected. | This site scores a mix of neutrals and<br>positives. Negative scores received<br>reflect the lack of key services and<br>facilities at Horsmonden and a lack of<br>public transport options. There is a<br>listed building on the site, the likely<br>impact upon which influences the<br>heritage score given. |

#### Scores for Reasonable Sites in Horsmonden (part 3 of 3)

|                             | 324  | 355  | 377   | 378  | LS_42   |
|-----------------------------|--|--|---|--|---|
| Sustainability<br>Objective | Land at Bramley Cottage, Back Lane,<br>Horsmonden  | Land adjacent to Goudhurst Road,<br>Horsmonden (including PSPC_8)  | Land to the north of Brenchley Road,<br>Horsmonden  | Land to the east of Furnace Lane and Gibbet Lane, Horsmonden   | Land adjacent to Apple Tree Cottage,<br>Horsmonden  |
| Travel                      | -  | -  | -   | -  | -   |
| Waste                       | 0  | 0  | 0   | 0  | 0   |
| Water                       | 0  | 0  | 0   | 0  | 0   |
| Commentary                  | A site that scores several neutral and<br>positive scores which is let down by<br>the loss of a greenfield site and<br>concerns over potential vehicular<br>access to the site via Back Lane, and a<br>lack of key services and facilities at<br>Horsmonden and public transport<br>options. | A reasonable site let down by a lack of<br>key services and facilities and public<br>transport options as well as the loss of<br>a greenfield site in an historic<br>landscape. The negative heritage<br>score reflects impact upon the setting<br>of the Conservation Area. | A site which scores some neutrals and<br>some positives. It is let down by a lack of<br>key services and facilities and a lack of<br>public travel options. It scores negatively<br>for biodiversity influenced by location of<br>site adjacent to a National Nature<br>Reserve, and for land use as a result of<br>this being a greenfield site that contains a<br>significant proportion of grade 2<br>agricultural land as well as grade 3.<br>Landscape also scores negatively being<br>the loss of a greenfield site adjacent to<br>the AONB in an historic landscape. | A site which scores some neutrals and<br>some positives. It is let down by a lack<br>of key services and facilities and a lack<br>of public travel options. It scores<br>negatively for land use as a result of<br>this being a greenfield site that contains<br>grade 2 agricultural land as well as<br>grade 3. Landscape also scores<br>negatively being the loss of a greenfield<br>site in an historic landscape. | This site scores mostly neutral with<br>some benefit to housing provision. It<br>scores negatively in land use terms and<br>for heritage, as almost all of the site has<br>archaeological potential.<br>There is significant concern about the<br>ability to provide an appropriate means<br>of vehicular access to serve the site. |

| Commentary            | Similar to many sites in the parish, this<br>site scores several neutrals with some<br>positive scores. It is let down by a lack<br>of key services and options for public<br>transport. Land use score is slightly<br>better than other sites in the parish to<br>reflect it being partially PDL. | A site that scores several neutral scores<br>and positive scores. This site is let<br>down on the scores for land use and<br>landscape being the loss of a greenfield<br>site in the AONB adjacent to an historic<br>settlement and it scores negatively in<br>terms of services and facilities as well<br>as travel, influenced by a lack of key<br>services and facilities in the settlement<br>and lack of public transport. The<br>contribution of new development to<br>the noise levels in the adjacent<br>Important Area for Road Noise causes<br>the noise objective to score negatively. | A site that scores several neutral scores and<br>positive scores. This site is let down on the<br>scores for land use and landscape being the<br>loss of a greenfield site in the AONB adjacent<br>to an historic settlement and it scores<br>negatively in terms of services and facilities<br>as well as travel, influenced by a lack of key<br>services and facilities in the settlement and<br>lack of public transport. The area of flood<br>zone 3 and 2 on site causes the water score<br>to be negative. The contribution of new<br>development to the noise levels in the<br>adjacent Important Area for Road Noise<br>causes the noise objective to score<br>negatively. | Some positive criteria identified<br>including improved access to heritage<br>asset. However, site is not well<br>located for easy access to services<br>and travel options are limited. The<br>services and facilities score is<br>influenced by the slight improvement<br>for tourism possible with this<br>development (links to Scotney<br>Castle). | Similar to many sites in the parish, this<br>site with many largely neutral scores<br>with some slight negative scores mostly<br>reflect dependency on private car use.<br>Landscaping work undertaken in 2020<br>has confirmed that impacts upon the<br>character of the village and settlement<br>pattern would be adverse. Scores for<br>heritage and landscape objectives reflect<br>this. Groundwater source protection<br>zone also requires consideration. |

#### Scores for Reasonable Sites in Lamberhurst (part 2 of 2)

|                             | 363                                   | 423   | LS_36  | FS3  |

|                             | 363   | 423   | LS_36  | FS3   |
|-----------------------------|---|---|--|---|
| Sustainability<br>Objective | Land at 36 Brewer Street, Lamberhurst   | Lamberhurst Winery, Lamberhurst Down, Lamberhurst   | Land at Whisketts Farm, Lamberhurst, TN3 8JG   | Heathertye, Mount Pleasant Lane, Lamberhurst<br>(including sites 302, 303 and 363)  |
| Travel                      | -   | -   | -  | -   |
| Waste                       | 0   | 0   | 0  | 0   |
| Water                       | 0   | 0   | 0 / +  | 0/-   |
| Commentary                  | A site that scores many neutrals with some<br>positive scores. It is let down by a lack of key<br>services and facilities and public travel<br>options. Land use score is slightly better than<br>other sites in the parish to reflect it being<br>partially PDL. | A site that scores mostly neutral scores with some<br>positive ones. It is let down by a lack of key services<br>and facilities and public travel options and concerns<br>regarding impact on heritage and landscape<br>informed by location adjacent to Lamberhurst<br>historic settlement and a loss some greenfield land<br>in the AONB. In 2020, consideration was given to<br>whether the site could deliver development in the<br>south eastern section. It was felt that a smaller scale<br>development would not address the issues identified<br>by many of the scores above. Groundwater source<br>protection zone also requires consideration. | This site scores some neutrals and some positive<br>scores. It also scores a number of negatives, which<br>reflect the loss of an historic field in the AONB<br>adjacent to an historic settlement. It's relatively high<br>potential yield potential causes poor air quality,<br>climate change and services/facilities scores which<br>are also influenced by the location of the site relative<br>to the settlement centre and the lack of public<br>transport available. | This site is relatively large and thus prompts a<br>relatively high score for the housing objective.<br>However, development in this location would be<br>out of keeping with the rest of the settlement and<br>thus landscape and heritage objectives score<br>negatively.<br>The contribution of new development to the noise<br>levels in the adjacent Important Area for Road<br>Noise causes the noise objective to score<br>negatively. |

| Commentary     | Negative land use score is influenced by the loss of<br>Green Belt (moderate/high) greenfield land, with<br>grade 3 soils in the AONB. Landscape scores<br>negative because of location of site relative to<br>historic fields and historic farmsteads within an<br>historic landscape in the AONB. The Noise objective<br>scores negatively because residents will be exposed<br>to high noise levels and the site will contribute to a<br>deterioration in the existing noise levels. | Negative land use score is influenced by the loss of<br>Green Belt (high harm) greenfield land, with part<br>grade 3 soils in the AONB. The site is also an<br>historic field. The Noise objective scores<br>negatively because residents will be exposed to<br>high noise levels and the site will contribute to a<br>deterioration in the existing noise levels. | Negative land use score is influenced by the loss of<br>Green Belt (moderate) greenfield land, The site is<br>also an historic field located within the AONB. The<br>Noise objective scores negatively because<br>residents will be exposed to high noise levels and<br>the site will contribute to a deterioration in the<br>existing noise levels. | Negative land use score is influenced by the loss of<br>Green Belt (moderate/high) greenfield land,<br>including grade 3 soils in the AONB and part<br>historic field. The Noise objective scores<br>negatively because residents will be exposed to<br>high noise levels and the site will contribute to a<br>deterioration in the existing noise levels. |

| Commentary                  | A site that scores mostly<br>neutrals, which is let down on<br>land use and landscape grounds,<br>containing a significant chunk of<br>Ancient Woodland in the AONB,<br>and its location relative to key<br>services and facilities. Land use<br>score influenced by grade 3<br>agricultural soils and location in<br>Green Belt parcel PE3 (high<br>harm), adjusted to reflect that<br>site is part of this wider parcel. | Site scores a number of neutrals and some positives. Its<br>location adjacent to the A228 influences the air quality<br>and noise scores given. The site forms part of the setting<br>of an historic farmstead which has influenced the heritage<br>score given as well as being adjacent to listed buildings.<br>The site is parcel PE5 (moderate harm) if released from<br>the Green Belt which along with grade 3 agricultural soils<br>and greenfield nature of the site has informed the land<br>use score. The negative landscape score reflects the loss<br>of a greenfield site in the AONB, and existence of the<br>historic farmstead as well as historic routeways. 2020<br>MGB Study: Overall Harm Rating is Low Moderate. | Green Belt (moderate harm)<br>and greenfield land, with grade<br>3 soils in the AONB. The heath<br>objective scores slightly positive<br>because of the proposal to<br>safeguard land for hospice<br>expansion. Air quality scores<br>negatively largely due to the<br>distance to local facilities and<br>good local road network<br>meaning private car use will be<br>preferred. | Negative land use score is influenced by the<br>loss of Green Belt (high harm) and greenfield<br>land, with grade 3 soils in the AONB. Housing<br>in this location would not suit older persons<br>(distant from services) so the housing<br>objective does not score as high as it could.<br>Air quality scores slightly negatively largely<br>due to the distance to local facilities and good<br>local road network meaning private car use<br>will be preferred. |

### Scores for Reasonable Sites in Pembury (part 5 of 6)

|                             | 458  | 444   |
|-----------------------------|--|---|
| Sustainability<br>Objective | Land at Sturgeons fronting<br>Henwood Green Rd (site 458)  | Land north of Tunbridge Wells Hospital, Tonbridge Rd  |
| Travel                      | -  | 0/-   |
| Waste                       | 0  | 0   |
| Water                       | 0  | -   |
| Commentary                  | Positive land use score is influenced by the<br>development on brownfield land with no loss<br>of soils. Housing in this location would not suit<br>older persons (distant from services) so the<br>housing objective does not score as high as it<br>could. 2020 MGB Study: Overall Harm Rating<br>is Very Low. | This site has been appraised for development as medical facilities including education and key worker housing.<br>Education scores positively as this policy includes the provision of a medical education facility. Deprivation scores positively due to the provision of housing for key workers. The A21 corridor has been identified as an area for employment growth and several objectives are scored as neutral or positive to reflect suitability of allocation for employment use. Negative land use score is influenced by the loss of Green Belt (moderate harm) and partial loss of greenfield land. The health objective scores positively to reflect the benefits that will be seen from a hospital increasing and improving hospital facilities. The nature of the site could mean that bus and private car travel will be preferred to active travel modes. This and the risk of exposing sensitive receptors to increased levels of air pollutants, are the key reasons why the air objective is scored negatively. Development here poses a risk to the multiple designated wildlife sites contained within the site. However, buffers and schemes for enhancements will reduce biodiversity impacts. |

|-----------------------------|--|---|---|--|--|
| Sustainability<br>Objective | Land at Woodside House,<br>Woodside Road TN2 4BG   | Land at Notcutts Garden<br>Centre TN2 4QN   | Woodsgate Corner,<br>Pembury  | Owlsnest Wood, Tonbridge Road  | Cornford Court, Cornford Lane  |
| Waste                       | 0  | 0   | 0   | 0  | 0  |
| Water                       | 0/-  | 0   | 0   | 0/-  | 0  |
| Commentary                  | A site that scores mostly neutrals,<br>which is let down on land use and<br>landscape grounds and its location<br>relative to key services and<br>facilities and public transport<br>options. It results in the loss of an<br>historic greenfield site in the<br>AONB, an historic landscape and is<br>part of a Green Belt parcel the<br>release from which would cause<br>high harm. | This site scores reasonably well<br>with mostly neutral scores. The<br>roadside location causes the<br>noise objective to score<br>negatively. The land use<br>objective is neutral and<br>influenced by the brownfield<br>location. There are no significant<br>positive or negative scores. | The A21 corridor has been<br>identified as an area for<br>employment growth and several<br>objectives are scored as neutral<br>or positive to reflect suitability of<br>allocation for employment use.<br>Negative land use score is<br>influenced by the loss of<br>greenfield land, with grade 3 soils<br>in the AONB. Noise scores<br>negatively because of exposure to<br>high noise levels and also the<br>contribution to a deterioration in<br>existing levels. Health scores<br>positively to reflect need for C2<br>uses across the borough. | The A21 corridor has been identified as an area for<br>employment growth and several objectives are<br>scored as neutral or positive to reflect suitability of<br>allocation for employment use. Negative land use<br>score is influenced by the loss of greenfield land.<br>The health objective scores positively to reflect the<br>benefits that will be seen from improving hospital<br>facilities. The nature of the proposed use will mean<br>that bus and private car travel will be preferred to<br>active travel modes. This, and the risk of exposing<br>sensitive receptors to increased levels of air<br>pollutants, are the key reasons why the air<br>objective is scored slightly negatively. The<br>proposals pose a risk to the nearby designated<br>wildlife sites. However, buffers and schemes for<br>enhancements will reduce biodiversity impacts. | The A21 corridor has been identified as an area<br>for employment growth and several objectives<br>are scored as neutral or positive to reflect<br>suitability of allocation for employment use.<br>Negative land use score is influenced by the loss<br>of Green Belt (low harm) greenfield land, with<br>grade 3 soils in the AONB. Noise scores negatively<br>because of exposure to high noise levels and also<br>the contribution to a deterioration in existing<br>levels. There are also slight risks to existing<br>landscape and biodiversity due to being within<br>the AONB and adjacent to woodland. However,<br>utilising the existing development on site lessens<br>this risk. Resources scores is influenced by the<br>demolition of a building. |

|                             | 22  | 60  | SALP AL/RTW 9  | 146   |
|-----------------------------|---|---|--|---|
| Sustainability<br>Objective | Dingley Dell, Langton Road, Tunbridge Wells<br>TN4 8XG  | The Paddocks, Home Farm, 92 Lower<br>Green Road, Rusthall TN4 8TT   | Lifestyle Motor Europe, Langton Road   | Tunbridge Wells Golf Club, Langton Road,<br>Tunbridge Wells TN4 8XH   |
| Services & Facilities       | ++  | 0/-   | ++   | ++  |
| Travel                      | 0   | 0   | 0  | 0   |
| Waste                       | 0   | 0   | 0  | 0   |
| Water                       | 0   | 0   | 0  | 0/-   |
| Commentary                  | This site has mixed scores. Negative score for noise<br>because the site is within the main Gatwick flight<br>path and will result in an increase of vehicle<br>movements onto a road that already experiences<br>high levels of road noise. It scores negatively for<br>biodiversity because the site is adjacent to a Local<br>Wildlife Site. A negative land use score is given as<br>the site is part of a broader parcel of Green Belt<br>assessed as having very high harm if released. | A reasonably well located site adjacent to<br>the settlement, which has a limited range<br>of key services and facilities. This site is let<br>down by impact on the Green Belt, being a<br>greenfield site within a Green Belt parcel<br>which would have moderate harm if<br>released from the Green Belt, informing the<br>land use score. | This site is largely sustainable scoring a number of<br>neutral and positive scores. Negative score is<br>applied for noise because the site is within the main<br>Gatwick flight path and will result in an increase of<br>vehicle movements onto a road that already<br>experiences high levels of road noise. Business and<br>employment scores reflect loss of current use as a<br>car dealership. Land use scores positively to reflect<br>the brownfield site and the positive services and<br>facilities score reflects proximity to RTW. | This site has mixed scores. Negative score for noise<br>because the site is within the main Gatwick flight<br>path and will result in a large increase of vehicle<br>movements onto a road that already experiences<br>high levels of road noise. Negative land use and<br>landscape scores reflect the loss of greenfield land<br>with complex topography which is classified as very<br>high value Green Belt. Air quality is scored as<br>negative overall as it was felt that the negative<br>aspects of increased car travel could not be offset by<br>the contributions gained for active travel<br>improvements. |

# **Appendix T - Sandhurst**

#### Scores for Reasonable Sites in Sandhurst (part 1 of 2)

|                             | DPC_12                                    | 153  | 227 and 149  | 227 and 149  |

|-----------------------------|---|--|--|--|--|
| Sustainability<br>Objective | Oaklands Farm, Bodiam Road  | Land at Old Well House, Rye Road   | Kerrys Yard (New yard) Bodiam<br>Road  | Land to the rear of Sandhurst<br>Farm Shop, Queen Street   | Field to the south of Bodiam Road,<br>Sandhurst  |
| Travel                      |   | - /  |  |  | - /  |
| Waste                       | 0   | 0  | 0  | 0  | 0  |
| Water                       | 0 / -   | 0 / +  | 0 / +  | 0/-  | 0/+  |
| Commentary                  | A site that scores mostly neutral, let<br>down by poor services and facilities in<br>the settlement and more remote location<br>of site relative to settlement as well as<br>landscape impact influenced by loss of a<br>site that is part historic field in the AONB<br>and land use and a site the scale of which<br>would be out of keeping with the<br>settlement | A reasonable site let down by poor<br>services, facilities and travel options in<br>this rural settlement and the<br>subsequent effects of this on the air<br>quality objective. Although relatively<br>small, the site is likely to compromise<br>the AONB and its associated features.<br>The site results in the loss of an historic<br>field in the AONB across which is an<br>historic routeway (Public Right of Way)<br>and it lies adjacent to an historic<br>settlement and to open ponds. It also<br>lies in close proximity to Sandhurst<br>Windmill, a heritage asset and adjacent<br>to the Sandhurst Conservation Area.<br>These influences have informed<br>negative scores given for heritage and<br>landscape. | A site that scores mostly neutral, let<br>down by poor services and facilities in<br>the settlement and more remote<br>location of site relative to settlement as<br>well as landscape impact. | A site that scores mostly neutral, let<br>down by poor services and facilities in<br>the settlement and a poor heritage<br>score and landscape score reflecting<br>the extent of archaeological potential<br>on the site and historic routeways -<br>PROW and roads in the AONB that run<br>through the site and the loss of a<br>greenfield site in the AONB. | Site scores similarly to others in the<br>parish for some objectives. However,<br>landscape impacts are particularly<br>negative reflecting the loss of the soft<br>green backdrop to the settlement that<br>this site would create. The setting of<br>the listed farmhouse would also be<br>impacted and causes a negative<br>heritage score. |

Scores for Reasonable Sites in Speldhurst (part 1 of 3)

|                             | 27   | 42  | 94  | 231   |
|-----------------------------|--|---|---|---|
| Sustainability<br>Objective | 1) Land adjacent to the rear of Asher<br>Reeds and 2) Land adjacent to Cherry<br>Trees, Farnham Lane, Langton Green  | Land at High View, Langton Road, Langton<br>Green, Tunbridge Wells TN3 0BB  | Land at Milford House, Penshurst Road,<br>Speldhurst, TN3 0PH   | Land to the west of Speldhurst Road and south of Ferbies, Speldhurst, TN3 ONS   |
| Services & Facilities       | -  | -   | -   | -   |
| Travel                      | -  | 0 / -   | -   | 0 / -   |
| Waste                       | 0  | 0   | 0   | 0   |
| Water                       | 0  | 0   | 0   | 0 / +   |
| Commentary                  | A site with many neutral scores and<br>some positives to housing provision. It<br>is let down by its location relative to<br>key services and facilities and high<br>demand for school provision and on<br>land use where this would result in the<br>loss of a greenfield site in the Green<br>Belt, part of a larger parcel with very<br>high harm, and landscape given the<br>loss of this greenfield site in the AONB. | A site with many neutral scores that<br>scores positive for housing provision and<br>neutral/negative in terms of travel. Its<br>score is let down by demand for school<br>places and land use and landscape<br>impacts, being the loss of a greenfield<br>site in the AONB which forms part of a<br>broader parcel with very high impact if<br>released from the Green Belt. Score<br>informed however by the fact this is a<br>relatively small site. | This site has several neutral and single<br>negative scores, let down by a lack of<br>key services and facilities and lack of<br>pavement to the centre of the<br>settlement/likely ability to provide this<br>therefore making the site less suitable<br>for those with disabilities. Equality, air<br>and travel scores were downgraded in<br>Pre-Submission version of SA to reflect<br>confirmation of this difficultly for active<br>travel. | There are no significant negative scores for this site. The site is in a sensitive, edge of settlement location within the AONB. However, the scale is in keeping with the existing settlement and sensitive design will ensure impacts are reduced. 2020 Grassland study confirms site has low botanical and ecological importance so biodiversity impacts are not expected to be significant. The education objective scores slightly negative because the existing primary school is in high demand. The equality objective scores negative because selective education choices are easier to access than non selective, and the distance of the site to Speldhurst facilities may disadvantage disabled persons. Noise scores negatively because the site is within the main flight path for Gatwick airport. |

Scores for Reasonable Sites in Speldhurst (part 2 of 3)

|                             | 239  | 337   | 338   | 386  |
|-----------------------------|--|---|---|--|
| Sustainability<br>Objective | Land adjacent to Rusthall recreation<br>ground, Southwood Road, Rusthall | Allotment land North East of the end of<br>Southwood Road, Rusthall and adjacent to<br>Peacock Farm | Land between Ferbies and Ewehurst lane, Langton road,<br>Speldhurst | Ashwood Lodge Farm, Penshurst Road, Speldhurst,<br>Tunbridge Wells |
| Air                         | 0  | -   | 0 -   | -  |
| Biodiversity                | 0  | 0   | -   | 0  |
| Business Growth             | 0  | 0   | 0   | 0  |
| Climate Change              | 0  | 0   | 0   | 0  |

| Services & Facilities       | 0 / +  | 0/-   | -   | -  |
| Travel                      | 0  | -   | 0/-   | 0/-  |

|                             | 239  | 337   | 338  | 386   |
|-----------------------------|--|---|--|---|
| Sustainability<br>Objective | Land adjacent to Rusthall recreation ground, Southwood Road, Rusthall  | Allotment land North East of the end of<br>Southwood Road, Rusthall and adjacent to<br>Peacock Farm   | Land between Ferbies and Ewehurst lane, Langton road,<br>Speldhurst  | Ashwood Lodge Farm, Penshurst Road, Speldhurst,<br>Tunbridge Wells  |
| Waste                       | 0  | 0   | 0  | 0   |
| Water                       | 0  | 0   | 0  | 0   |
| Commentary                  | A largely neutral site that scores<br>positively for health and services<br>objectives reflecting the opportunity<br>to expand the existing leisure facilities.<br>Land use scores neutral under the<br>assumption that the site is not<br>converted entirely to hardstanding and<br>potentially valuable soils are lost. This<br>site is near to the border with Rusthall<br>parish and so cross boundary effects<br>have been considered. Landscape<br>impacts score negative to reflect the<br>fact that flood lighting would affect the<br>dark, rural skies in this area. | A reasonably well located site adjacent to the<br>settlement, which has a limited range of key<br>services and facilities. Let down by impact on<br>the Green Belt (high impact) and being the<br>loss of a largely greenfield site in the AONB.<br>There is concern about the ability to provide<br>a suitable means of access to this site and the<br>ability of some, less mobile residents to<br>access services and facilities in a safe manner<br>due to lack of suitable pavement. Equality, air<br>and travel scores were downgraded in Pre<br>Submissions version of SA to reflect<br>confirmation of this difficultly for active<br>travel. | The education objective scores slightly negative because the existing primary is in high demand. The equality objective scores negative because selective education choices are easier to access than non selective, and the distance of the site to Speldhurst facilities may disadvantage disabled persons. Land use score reflects the harm that would be caused by loss of the Green Belt, green field land and underlying soils. Bus services from Speldhurst are not regular and some services are lacking. Noise scores negatively because the site is within the main flight path for Gatwick airport. The site is in a sensitive, edge of settlement location within the AONB. The scale is in keeping with the existing settlement but sensitive design will be necessary. | A site with neutral scores, let down by a lack of key<br>services and facilities and lack of pavement to the centre<br>of the settlement/likely ability to provide this therefore<br>making the site less suitable for those with disabilities. |

|                             | 416  | LS_15   | FS_10   | LS_39  |
|-----------------------------|--|---|---|--|
| Sustainability<br>Objective | Land North of Langton House, Langton Green   | Herons Oast Farm, Speldhurst Road, Langton<br>Green, Tunbridge Wells  | Land at Hollands Farm, Speldhurst   | Dragonfly Farm, Langton Road, Speldhurst TN3 ONR   |
| Waste                       | 0  | 0   | 0   | 0  |
| Water                       | 0/?  | 0/?   | 0/?   | 0 / +  |
| Commentary                  | A site located adjacent to the existing settlement,<br>which scores mostly neutral. It scores positively in<br>terms of housing but negatively on education<br>given the high demand for school place at the<br>Primary School. It also scores negatively for land<br>use, informed by loss of the site in a broader<br>parcel of Green Belt the release of which would<br>have very high impact. It scores negatively on<br>landscape reflecting impact upon the AONB. There<br>is a large Local Wildlife Site on the majority of the<br>site which greatly reduce development potential.<br>The site adjoins and risks impacting upon the<br>setting of the Conservation Area. | A site located adjacent to the existing<br>settlement, which scores mostly neutral. It<br>scores positively in terms of housing but<br>negatively on education given the high demand<br>for school place at the Primary School. It also<br>scores negatively for land use, informed by loss<br>of the site in a broader parcel of Green Belt the<br>release of which would have very high impact. It<br>scores negatively on landscape reflecting the<br>loss of primarily greenfield land in the AONB, its<br>location adjacent to an historic farmstead and an<br>historic routeway (road). | This relatively large site is in a sensitive edge of<br>settlement location and consequently is<br>assigned some highly negative scores. The<br>majority of the site is in the AONB and the entire<br>site is within the Green Belt, the release of which<br>would have a high impact. Development here<br>would risk impact upon the setting of nearby<br>heritage assets. | The education objective scores slightly negative<br>because the existing primary is in high demand. The<br>equality objective scores negative because selective<br>education choices are easier to access than non-<br>selective, and the distance of the site to Speldhurst<br>facilities may disadvantage disabled persons. Land<br>use score reflects the harm that would be caused by<br>loss of the Green Belt, green field land and underlying<br>soils. Bus services from Speldhurst are not regular<br>and some services are lacking. Noise scores<br>negatively because the site is within the main flight<br>path for Gatwick airport. The site is in a sensitive,<br>edge of settlement location within the AONB. The<br>scale is in keeping with the existing settlement, but<br>sensitive design will be necessary. |
