In March 2021, Tonbridge and Malling BC received a letter from the Planning Inspector also confirming the plan as submitted had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters. TMBC requested the Inspectors issue their final report before confirming next steps, but since that request, SDC have received confirmation their own challenge had failed. We therefore wait to hear whether TMBC follow the same path, but either way, the plans housing strategy will be delayed.

As a consequence, three of the adjoining authorities are delayed in their plan preparation and housing delivery strategies; and the SoS has confirmed there are significant unmet and mounting housing needs requiring collaborative action in London within the next five years. As we elaborate on below,

affordable housing need and affordability ratios continue to rise. The aforementioned delays to adjoining LPA plan production do nothing to assist those unable to gain access to housing, serving to highlight how important it is for the emerging TWBC Local Plan to be 'positively prepared' (Paragraph 35 NPPF). Further evidence should be commissioned to test a 'reasonable alternative' option to contribute to meeting unmet needs, ensuring the plan is positively prepared and effective over the plan period, particularly in the first five years.

Housing Need

Paragraph 4.12 of the 'Review of Local Housing Needs' (Iceni, Dec 2020) recommends, in line with PPG paragraph 2a-007-20190220, that TWBC test the uncapped housing need figure of 741pa through the SA process. As we outline in our comments on adjustments for unmet needs above, TWBC sought to assess this local need figure and the unmet needs of SDC in a single alternative option (Option 11), rather than disaggregate them. TWBC then sought to distribute this need to the rural areas consistent only with Option 9 (Dispersed Countryside). This understandably led to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan.

At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss both elements. Our client contends distributing such needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a predetermined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'. Indeed, given the recommendations of Iceni in their report, it would have been reasonable to see the uncapped option tested in its own right, as the local need figure, and another option adding in unmet needs from adjoining LPAs. The TWBC approach does not therefore support a conclusion the plan is 'positively prepared'.

Moving on to adjustments required for *affordable housing need*. Paragraph 3.18 of the 'Housing Needs Assessment Topic Paper' (TWBC, 2021) confirms that some 323 affordable homes per annum are likely to be needed over the plan period. Table 9 of the 'Housing Supply and Trajectory Topic Paper' (TWBC, Feb 2021) confirms total projected housing completions of 13,257 over the plan period. Table 10 of this paper also confirms that crudely applying the Policy H3 thresholds of the TWBC PSLP to this figure, the Council are likely to fall well short of this requirement (224pa). Net additions from sites 6-9 units within the AoNB under this policy are not listed, but seem unlikely by their nature to contribute significantly to addressing this deficit. For avoidance of doubt the Council should therefore confirm the number of units anticipated from this source.

Paragraph 2.18 of the TWBC PSLP confirms, *'that in 2019, entry level house prices were approximately 12 times the (workplace based) earnings of households in the borough, representing around a 38% increase since 2009, from around eight times the earnings.'* (Our emphasis).

In addition, at paragraph 4.17 of the 'Review of affordable housing needs in the context of 'First Homes'' (jg consulting, Feb 2021) the consultant concludes:

'It does seem that there are many households in Tunbridge Wells who are being excluded from the owner-occupied sector. This can be seen by analysis of tenure change, which saw the number of households living in private rented accommodation increasing by 76% from 2001 to 2011 (with the likelihood that there have been further increases since). Over the same period, the number of owners with a mortgage dropped by 7%.' (Our emphasis).

The underlined sections serve to highlight the acute affordability issues in the borough, which seem likely to continue to worsen under a policy approach that seeks to undershoot need by some margin. It is unclear why therefore TWBC have not sought to adjust their housing requirement to help meet more of such needs. For all the above reasons, we feel there are strong grounds to make an upward adjustment to the baselinerequirement to improve the delivery and affordability of homes across the area. As drafted, the housing requirement is neither justified, effective nor positively prepared.

Housing Land Supply, Distribution and Delivery

National guidance [Paragraph: 010 Reference ID: 2a-010-20201216 (NPPG, 2020)] goes on to state, that the housing requirement *'....will need to be assessed prior to, and separate from, considering how much of the overall need can be accommodated (and then translated into a housing requirement figure for the strategic policies in the plan).'*

As outlined in the preceding sections, we are concerned that the housing requirement deduced as the base for the Local Plan has not been positively prepared, or informed by a robust SA process that

aligns with the SEA Regulations. Taking this our as position, we have nevertheless sought to examine the housing land supply and spatial distribution of homes proposed in the PSLP.

As set out in Policy STR1 and Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021), the Council are seeking to deliver around 67- 69% of total new site allocations at Tudeley Village and Paddock Wood (inc. East Capel). This places a significant onus on two sites to deliver the bulk of the boroughs housing needs for the next 15 years. As a result, one would expect to see a high degree of contingency built into the plans housing supply and trajectory assumptions to ensure a continuous five year supply of land for housing is maintained.

On closer examination, we contend that the lead in times for delivery of both sites, and the expected annual yield from Paddock Wood (inc. East Capel) are overly optimistic and insufficiently justified by evidence. Paragraph 4.6 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) references an evidence source as '*Start to Finish: How Quickly do Large-Scale Housing Sites Deliver?*' (Lichfields, 2016). This report was updated in 2020, and is now entitled '*Start to Finish What factors affect the build-out rates of large scale housing sites? SECOND EDITION*' (Lichfields, 2020).

Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) assumes that the Paddock Wood (inc. East Capel) site will have commenced development within three years of anticipated adoption of the PSLP, and will deliver 300 homes in its first year of production in year four. As the latest referenced Lichfield Report concludes in its summary 'Key Figures', sites over 2000 homes are more likely on average to take 8.4 years from a valid planning application to the first dwelling being completed on site.

Given the PSLP development strategy relies so heavily on the delivery of these two strategic sites (67-69% of total allocations) in one particular geography of the borough (north west), it is essential in our view the Council take a realistic, if not cautious approach to such lead in times. We therefore request TWBC provide further information on the lead-in times for planning applications for this site, as this is not evident from paragraph 5.29 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021). This rate is just short of double the rate evidenced in the latest Lichfields Report (160pa). TWBC have sought to justify the 300pa figure by taking an average of just 14 national case studies over 2000 units listed in Annex AX26 of the older Letwin Review (2018). This is not only an excessively small sample, it includes sites of a scale five times that of Paddock Wood, with a far greater number of outlets and wholly within the London HMA. The more recent Lichfields study we argue is a more comprehensive and up to date study, and is more reasonable as a basis to deduce such national baselines. TWBC have not presented evidence of comparable sites either locally or regionally to support such a significant departure. Given these two sites make up nearly 70% of proposed allocations relied upon for the entire plan period, we suggest this is a significant omission. Both the lead in time and delivery rates assumed therefore appear overly optimistic. These are not justified and are unlikely to be effective in delivering the proposed development strategy.

As a consequence, it seems likely a sizeable proportion of the two strategic sites will need to be delivered beyond the current plan period. Additional allocations should accordingly be made to compensate for this, with an opportunity to balance growth in the eastern parts of the borough in the process. Our clients site (Site 25) is respectfully recommended as a suitable opportunity to contribute to reducing this shortfall, one that is wholly deliverable in the first five years of the plan period.

Further clarification is also sought over the overall capacity of the Paddock Wood option. Paragraph 7.14- 7.16 of the Strategic Sites Topic Paper (TWBC, 2021) suggests '*discussions with the Environment Agency remain ongoing*' with respect to the sites capacity. As a result, the same paragraphs suggest an option for 2840 homes has been tested through the Councils viability assessments. At this level, the Council's viability consultants Dixon Searle raised potential issues with delivering the proposed 40% plan requirement for affordable housing. This needs clarification and assurance. If there is any doubt over this, additional suitable and readily deliverable allocations should be made to compensate for this. In this respect, our clients site (Site 25) at Cranbrook we contend should be allocated to contribute to this. This is suitable and wholly deliverable within the first five years of the plan period.

In respect of Tudeley Village, whilst we have no particular issue with the annual delivery rate, we have the same concerns on lead in time for this site. Particularly as this is a new garden village, as opposed to an urban extension, where significant new infrastructure will be critical to phasing and delivery. This includes, amongst many other items, on and off-line improvements to the A228 around Colts Hill, and the provision of a new highway which bypasses Five Oak Green. We elaborate further on this in our

comments to Policy STR/SS3, with specific reference to the Lichfield report '*Start to Finish What factors affect the build-out rates of large scale housing sites? SECOND EDITION*' (Lichfields, 2020).

It is evident from this, that the lead in time proposed for Tudeley Village in Table 9 of the Housing Supply and Trajectory Topic Paper (TWBC, 2021) is therefore unjustified and likely to lead in an ineffective development strategy.

In addition, very little if any evidence is presented on the implications for absorption rates for two strategic sites of this scale so close together. As Table 9 of the Housing Supply and Trajectory Topic Paper illustrates, both sites are envisaged to be up to full production within the fourth year post anticipated adopted. A significant amount of infrastructure disruption is likely given the scale of the projects and their proximity to each other. Existing local housing market delivery, coupled with two large strategic sites being delivered at the same time will inevitably influence market absorption rates. Further work is advised on this given how critical the delivery path and rates for these two sites are to the Council's Development Strategy.

Given the proportion of supply these two strategic sites contribute to total housing land supply, it is essential delivery rates are realistic and justified by evidence. It is equally important that sufficient contingency is built into the housing land supply to account for slower delivery rates and yields, particularly in the first five years of the plan period.

The Council's latest five year housing land supply statement was published in September 2020, with a base date of 1st April 2020. This confirmed TWBC could only demonstrate a 4.83 years supply. Delivery rates for the three previous years in question were at or about 500pa. Indeed, Figure 1 of the Housing Supply and Trajectory Topic Paper (paragraph 4.12) illustrates completion levels over the last 20 years have never exceeded 575pa. Whilst we agree and accept future completion levels will rise with the allocation of two large strategic sites, which have multiple outlets, these will take time to come on line. We fear that this will take much longer than the Council anticipate, as outlined above. It therefore seems a significant leap of faith to expect such significant step changes in supply in the first phase of the plan period. As is evident at Figure 3 (page 33) of the Housing Supply and Trajectory Topic Paper, TWBC envisage a significant step change rising to 932 pa even before the Local Plan's anticipated adoption. We are not the only ones to question the justification for this.

The Council's own consultants Icenl concluded similarly in December 2020 when commenting on the proposed housing trajectory in their 'Review of Local Housing Needs' (Icenl, Dec 2020).

At paragraph 7.35, the consultant concludes that the:

'particularly high completions envisaged in Year 2 look to be potentially overly optimistic, particularly given the wider economic backdrop which could arise,...'

At paragraph 7.37 of the same report, the consultant comments:

'The particular question which arises is whether the very high delivery rates in Years 1-5 can be achieved given the potential for housing market conditions to weaken in the short-term as unemployment rises as a result of the Covid-19 pandemic and Government support, such as through the Stamp Duty holiday, finishes. It is important to make a distinction here between potentially "deliverable supply" in terms of what could be delivered, which is influenced by planning, and what the market may in fact achieve, which is influenced by wider market conditions.

We share concerns with the delivery rates proposed being overly optimistic, particularly in advance of adoption of the Local Plan and bringing on stream the strategic sites.

Conclusion

In light of the evidence cited above, we contend the housing requirement requires an upward adjustment to account for more of the areas local needs, and to reduce the shortfall in affordable housing provision. This is particularly important when three of the adjoining LPAs have had their emerging plans found to be legally non-compliant, and have been withdrawn or delayed as a consequence.

There is equally evidence to suggest an upward adjustment is required to account for known and mounting unmet housing needs in the relevant functional housing market areas for TWBC. As we outline, the evidence presented in the SA to conclude no contribution could be made is in our view flawed, and based on an unreasonable alternative option destined to fail.

In housing land supply terms, we have shown the Council's housing land supply trajectory to be overly optimistic both in the critical first five years of the plan, and with respect to the lead in and delivery

rates for the two strategic site options that make up 67-69% of total new allocations proposed within the plan period. We contend this is likely to result in the delivery of these sites beyond the plan period, and there is a consequential need to allocate additional sites to compensate for this within the plan period.

We have also asked a question of the capacity of the Paddock Wood strategic site, to deduce if the Environment Agency require reduced net developable areas to address flooding issues. If so, any deficit should be compensated for by new allocations. Our client's site at Cranbrook (Site 25) is put forward as a suitable site to contribute to addressing some of this deficit, a site that is wholly deliverable within the first five years of the plan.

The Council provide a contingency of 8.6% in their land supply assumptions (inc. windfall) over the 15 year plan period. TWBC anticipate the cumulative completion of 13257 homes, versus a current target of 12204 homes (Table 9 of Housing Supply and Trajectory Topic Paper, TWBC, 2021). This buffer obviously reduces if, as we contend, the baseline housing requirement rises and/ or a proportion of the strategic sites delivery extends beyond the plan period. We would urge the Council and / or Inspector to accordingly increase this buffer, through the allocation of additional deliverable sites in sustainable locations, thereby ensuring the Development Strategy is positively prepared, effective and justified. In its current form, we contend the Development Strategy is unable to satisfy any of these tests.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR 7 – Climate Change

1. Effective Spatial Planning

Tudeley Village

The proposed garden village of Tudeley is of insufficient scale to be self - sustainable, and will as a consequence rely heavily on Paddock Wood, Tonbridge and other locations. The absence of a rail station as part of the proposal is a significant negative for a location such as this, and will inevitably increase the need to travel by car. Reliance in this respect is placed on the delivery of significant strategic road infrastructure / junction improvements to service this alongside the strategic site proposed at Paddock Wood. It is not clear therefore how this serves to reduce the need to travel by car, a key

sustainability and climate change objective under this policy. The strategic site policy STR/SS3 therefore contradicts Policy STR 7, as this is not effective spatial planning in our view. As a consequence we would question the justification for Policy STR/SS3 as an effective policy that aligns with STR 7 and the Council's stated climate change emergency plans.

Alternative distributions without STR/SS3 should be explored again to deduce the contribution more sustainable settlements, such as Cranbrook, could make to redress the deficit and provide a more balanced spatial strategy west to east.

Horsmonden

Table 5 of the Settlement Role and Function Study (TWBC, 2021) confirms this settlement ranks 12th out of 21 settlements assessed to deduce their sustainability and appropriateness to accommodate further growth. This is in recognition of the fact it is a small rural settlement with very few local services and facilities. Yet the level of growth (320 homes) proposed to this rural settlement rivals that proposed at Cranbrook (429 homes), which is ranked second only after Southborough. The level of growth proposed at Horsmonden is therefore out of kilter with the conclusions of the TWBC study. The paucity of local services and facilities is therefore likely to increase the need to travel by car, leading to unsustainable travel patterns that run contrary to Policy STR 7. We would suggest growth at this settlement is reduced to address local needs only, commensurate with local services and facilities.

Any deficit should be directed to more sustainable settlements, such as Cranbrook. Growth at the latter was reduced from the Regulation 18 document to the Regulation 19 publication. Mainly by omitting proposed allocations that TWBC subsequently agreed were more peripheral and contrary to the sustainability objectives of the plan. However, there are sites adjacent to the centre of Cranbrook, such as our clients site (Site 25) that could make a modest contribution (circa 70 units) to meeting such needs, in a more sustainable manner. The growth proposed at present to Horsmonden is not in our view effective or consistent with Policy STR 7.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

TUNBRIDGEWELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR/ SS1 – Strategy for Paddock Wood, including land at east Capel

For the avoidance of repetition, we refer to our comments / objections to Policy STR1 in relation to the overly optimistic capacity, lead in time and delivery rates assumed for this site. We contend the application of more realistic rates will likely result in the delivery of these sites beyond the plan period, and a consequential need to allocate additional sites to compensate for this within the plan period. In this respect, we purport the benefits and modest contribution our clients site (Site 25) can make to assist in addressing such deficits.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGEWELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR/SS3 – Strategy for Tudeley Village

For the avoidance of repetition, see our comments / objections to Policy STR1 and STR 7 in relation to the capacity, lead in time and delivery rates assumed for this site; and conflicts with the plans climate change objectives. We suggest there is a consequential need to allocate additional sites in place of, or in addition to this, to compensate for deficits within the plan period. In this respect, we purport the benefits and modest contribution our clients site (Site 25) can make to assist in addressing such deficits.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR/CRS1 – The Strategy for Cranbrook and Sissinghurst Parish

The population of Cranbrook is rapidly ageing. Since 2011, the number of residents aged 50 plus has increased by 14% while other cohorts have reduced by 10% [ONS (2019) Population estimates for small areas, Cranbrook - Cranbrook BUASD]. In parallel, average house prices in Cranbrook having risen at a faster rate (39%) than the wider borough (32%) over the five years (2013-2018). The average price paid for housing in Cranbrook in 2018 for example was the highest in at least a decade [Turley analysis of Land Registry price paid data, based on postcodes in built-up area of Cranbrook].

A failure to retain and replenish the younger population could therefore threaten the long-term vitality of the settlement if such trends continue. Cranbrook has an important role and function in the eastern parts of the borough, which is reflected in its ranking (2nd) in Table 5 of the Settlement Role and Function Study (TWBC, 2021). The importance and role this settlement plays for those who live and work in the eastern parts of the borough will arguably grow, given 67-69% of new allocations in the PSLP are proposed to the west of the borough around Paddock Wood/Tudeley.

As we highlight in our comments to Policy STR1, there is an acute shortage of affordable housing and affordability issues across the borough that will not be addressed in the PSLP as drafted. The level of growth directed to Cranbrook has been reduced from that consulted on at Regulation 18 stage, to this Regulation 19 stage. Largely through the omission of proposed allocations that were conceded to be more peripheral and contrary to the sustainability objectives of the plan. However, there are sites, such as our clients (Site 25), that could have made a modest contribution to compensate for this loss. This site is well screened, and in a far more suitable and sustainable location. One that is partly within the existing urban area, and within a short walk of the High Street.

Whilst our client therefore continues to support the need for and benefits of additional growth at Cranbrook (see our comments on Legal Compliance and Policy ST1), they contend the Sustainability Appraisal (2021) and SHELAA (2021) that informed Policy STR/CRS1 contains fundamental site assessment errors and inconsistencies, which appear to have contributed significantly to the omission of SHELAA Site Ref: 25 in favour of less sustainable and peripheral sites around this settlement. The policy has not therefore been informed by reasonable alternatives, but a pre-determined outcome to exclude an otherwise suitable and highly sustainable site. For avoidance of repetition, we refer to our detailed objections on this matter in relation to the PSLP Sustainability Appraisal (2021) above.

This site should be allocated to make a modest contribution to addressing the deficits we suggest are likely at borough level within the plan period, and particularly in the first five years of this period (see our comments in relation to Policy STR 1).

Our clients site (Site 25) comprises a logical, suitable, sustainable and integrated extension to Cranbrook. This comprises a relatively modest development (around 70 homes) that respects the character and context of its location (see Document A); and importantly is readily deliverable within the first five years of the plan period. Our client therefore respectfully requests that TWBC re-assesses the benefits of allocating this modest site in liaison with the examining Inspector.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

TUNBRIDGEWELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

AL/CRS3 – Turnden Farm, Hartley Road (SHELAA Reference: Site 430)

The development of Site CRS3 would continue built form substantially south west of Cranbrook and the existing adopted allocation to the immediate north east of the site. The cumulative impact of both these sites would be the substantial sprawl of Cranbrook south westwards away from its core, eroding the sense of separation and separate identities of Cranbrook and Hartley. Development in the eastern part of the site would also be highly visible from the public footpath to the south, which currently experiences open rural views across this area.

We respectfully recommend the benefits of allocating Site 25 be reassessed, as a suitable, logical and sustainable site for around 70 homes, either in addition to CRS3 or in place of part of this (noting some is already now consented for 36 units). We contend that Site CRS3 is not justified for allocation at the expense of Site 25, which scores more favourably in the SA process as a reasonable alternative site. For avoidance of repetition, see our comments in relation to Legal Compliance matters above.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGEWELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

PSTR/HO1 – Strategy for Horsmonden Parish

For avoidance of repetition, see our comments on Policy STR7. The quantum of growth proposed at this village is not commensurate with its sustainability rank in Table 5 of the Settlement Role and Function Study (TWBC, 2021). Growth should be reduced to that which is commensurate with the village's sustainability, assisting the Council in fostering more sustainable travel patterns and adherence to Policy STR7. The deficit should be directed to more sustainable settlements, such as Cranbrook.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

EN2 – Sustainable Design Standards

As the requirements for residential developments are yet to be finalised in national policy, it is not clear the extent to which this requirement has been accounted for in whole plan viability assessments, or the SA process as a whole. To ensure the policy is effective for the plan period, we would recommend this requirement be removed and references national guidance only. This will ensure the policy does not need amending when the national guidance confirms such requirements.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

EN9 – Biodiversity Net Gain

This policy will need to have regard to the final form of an enacted Environment Bill, when finalised. In this regard, the reference at criteria bto a greater potential requirement deduced through an SPD should be deleted. It is for the policy to set such requirements, and the SPD to provide supplemental guidance on its application, not the other way around. This would neither be justified, effective or consistent with national policy.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

TUNBRIDGEWELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective

strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

EN14 – Green, Grey, and Blue Infrastructure

The words 'protect existing' may contradict the effectiveness of Policy EN9 or EN14 which adopt more appropriate, effective and practical approaches to existing features, with overall net gains at their heart. Whilst it may be desirable to retain and where possible enhance existing features as part of a development, some may be better replaced and enhanced in the form of new features on or off-site as part of a comprehensive approach to development. Suggest these words be revised to be consistent with Policy EN9 and others that instil the required flexibility to be effective and endure the plan period.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

EN26 – Sustainable Drainage

The aim for run off to be reduced below existing greenfield rates may be laudable, but equally may be undeliverable in all situations, particularly on brownfield sites. For the policy to be effective, it may be more appropriate to reframe the policy to seek to deliver runoff rates no worse than existing, and preferably where feasible and viable to do so, net improvements.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR/SS 2 The Strategy for Paddock Wood Town Centre

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Local Cycling and Walking Infrastructure Plan: Phase 2

For starters I want to put on record that the way this consultation has been put together in a way to obscure from the public the true agenda as so much detail appears to have been deliberately hidden in the sub reports. For example the proposal to close the railway bridge in Paddock Wood to cars.

However rather than being totally negative to the proposals I must say that there are some elements that I am in agreement. Those items include the new walking and bike routes such as the Hawkhurst Branch from Paddock Wood. De-cluttering by the removal of fencing etc.

Closure of the road to cars over the railway bridge in Maidstone Road is not a sensible proposal as it will cause an awful lot of chaos and will not result in the assumed improvements. For starters it will mean lots of motorists will have to take a long diversion to get into town. How can it be environmentally good to increase the mileage of each car of between 2 to 3 miles? Also cars wishing to access Paddock Wood will be forced to go down Badsell Road. Even at the best of times that road has been busy and is likely to be even busier once the new developments at Capel and Mascals are completed. You can only justify closing the railway bridge if there is a via alternative. Please can you suggest one?

Whilst I understand the intention is to persuade people to use their bikes, walk or use buses I suspect that very few persons will be using the bridge for those purposes. For starters the North is predominately industrial/trading. Those coming to Paddock Wood by train will have absolutely no reason to use the bridge unless they drive to the station and most of those live too far away to walk or bicycle. Chances of persons switching to bus is also problematic as the current bus services for Paddock Wood are hardly frequent and there is no service in the evenings. Unless Kent County Council is prepared to provide more frequent subsidised bus services in the area there is unlikely to be a modal shift away from cars.

Another concern to me is the proposal of a town wide speed limit of 20 mph for Paddock Wood. Have you tried driving in Tonbridge? It is not natural doing 20 mph for long periods. I believe these speed limits are of dubious value.

Also I want to point out that the recent experiment to close the lower half of Commercial Road to cars was an absolute nightmare. Like many I was incensed that this introduced with absolutely no consultation with locals. Closing roads to cars in Paddock Wood such as the Railway Bridge and Commercial Road would result in inadequate provision of routes in the town. How would the town cope with roadworks or accidents? With the proposed increase in housing it is likely things will get worse.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

[TWBC: non-working link has been removed with permission of responder].

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made) – Ref pages 7-9 Extracts: (page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom. (Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods as the point where it meets Hungershall Park (and where it is presumed the proposed “emergency exit” will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

1. Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused (89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons: 1 a) The proposed access would be likely to create unacceptable additional hazard to traffic. 2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic 3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality. 4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested ‘North’ secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
- . By default the access point becomes a tacit ‘extra access’ immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council’s planning permission access refusal 1990.
- . There is a high probability for this access to become a local shortcut

Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area. 2. The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

3. Adequate servicing and parking to serve the expanded commercial use on the site;

4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.

2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the "no cycling" rule there.

3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.

4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation

6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common;

The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access. 7. Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the

development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan is sound with removal of development of Wyevale site

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)
---	---

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:	<input type="checkbox"/> Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation Norman F Taylor for myself

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CA 1 paragraph 2: 'Provide a new garden settlement..'

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

<input type="checkbox"/>	It is not justified
<input type="checkbox"/>	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposal for a new garden settlement in Capel Parish is not legally compliant because it involves building on land designated as green belt. It is not sound because this location is not capable of supporting such a settlement: it does not have adequate transport links nor a satisfactory prospect of creating them. It would cause unjustified damage to an area of high landscape value. The proposal has already attracted overwhelming opposition at the previous stage of consultation, so a duty to cooperate with those with most at stake has not been fulfilled.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

An alternative site or sites should be proposed in order to provide compliance with the minimum housebuilding requirements that TMBC must fulfil. Proposals set out by a potential developer for the site at Castle Hill, on the edge of the built area of Tunbridge Wells has much more to recommend it: good road transport links, pedestrian and cycle access to High Brooms Station, less landscape impact, with the prospect of preserving the area of the iron age hillfort as an attractive park.

[TWBC: text of attached supporting document has been copied below for ease of reference, with reference made to the attachment to view images and maps].

Objections to the TWBC Pre-Submission Local Plan

Landscape grounds

The middle Medway valley is an exceptionally beautiful landscape. It has a smooth, shallow curving cross section, no doubt much enhanced by the hand of man in creating arable fields, orchards and pasture, with few patches of woodland on the lowest slopes. I can think of no parallel among lowland rivers. Because it is shallow, the view is easily obscured by trees or built features. To the north, there are no close vantage points for this reason, although there are some excellent far ones, from the steeper slopes above Hadlow, such as the Southern tip of Mereworth and Hurst Woods. On the south side, there is one viewpoint that stands out above all others and that is at the very middle of the upper edge of the planned development, at TQ 626449, the junction of B2017 and the unclassified road

towards Bank Farm and Tudeley Hale. As you drive on this B road eastwards from Tonbridge parallel with the river, at the first spur crossed, which runs down from Somerhill Schools, the view is completely obscured by woodland. The road descends, reaching a right-angle right near All Saints Tudeley church. The road then rises and, as it passes over the top of the next spur, the land opens out on the left to a glorious view. Taking a footpath uphill opposite, one can get an even wider view. The lack of large blocks of woodland means that the whole sweep from left to right can be seen, especially in winter. As a recent arrival living in Tonbridge, I found it thrilling to suddenly come upon this. Because the slopes are shallow, it shows poorly in a photograph and needs to be experienced to be fully appreciated.

I cannot find any comparable spot to see the valley in this way, yet it does not seem to be famous as a viewpoint. Whether much noticed or not, to lose this vista to a mass of houses would be a tragedy that could not be compensated: it is irreplaceable. The High Weald Area of Outstanding Natural Beauty runs from the south and inexplicably stops at the line of this B road. The projected development area is immediately to the north and currently fulfils most AONB criteria, being a high quality partly man-made landscape with a striking landform, with absence of much visible housing and – the road excepted – tranquility. Standing at this spot in spring, the skylarks provide an uplifting accompaniment.

see supporting document for image: Looking northwest from viewpoint on road. The distance to Tudeley Church (centre) is less than half the width of the projected settlement. The development would obliterate everything except perhaps views between building gaps of the distant greensand ridge and North Downs. (15.04.21 0730)

see supporting document for map: Height map to show the 2 ridges that the B2017 passes over, viewpoint on road arrowed

see supporting document for image: Looking north-northwest from the higher viewpoint. The near buildings are on the B2017. (15.05.21 1801)

see supporting document for map: Contour map (5m intervals) to show that the site occupies a large portion of the relatively open valley side, an area that can be seen from the viewpoint marked and from the footpath that leads up the hill to the south (shown broken green, woodland shown green). The contour line at the position of the church shows that it is located on a slight promontory.

The Church

All Saints' Tudeley is a unique church in an exceptional setting. I first saw it at a distance, having been walking a footpath and was immediately drawn towards this unusual-looking building. In my ignorance, I couldn't have guessed what would be next. First, a lane leading off the B road, rising towards the church straight ahead. Through the gate and into a hedged oasis surrounded by fields, with large yew trees hinting at its ancient origins. Walking the beaten grass path to the east end, the choice of the original builders becomes clear: the church sits at the highest point and the land falls away gently to the river valley beyond. While only slightly above its surroundings it commands its own special knoll. I found the door unlocked and was able to stand alone in the small nave, but the windows! Glorious swirls of colour by – it was obvious before starting to read anything – Marc Chagall. Later, on a late spring evening, I attended a chamber concert there. The experience of the music, the images and the constant changes of colour as the sun sank was unforgettable. After, we stepped outside into a dark, star – spangled night.

The story, which can be readily found online, is that Chagall was commissioned to make a window as a memorial to mark the tragic death of Sarah D'Avigdor Goldsmid. When he came to see it installed, he declared 'It's magnificent! I will do them all!'. He had a lifelong need to express his deeply held belief in the religious spirit, irrespective of the varied rituals and traditions that man attaches to it. That combination of a building that has kept that flame alive since the 7th century and its interaction with the surrounding landscape must have struck a powerful chord in Chagall. When the work was finished in 1982 he was too infirm, at 98, to witness it but before he died he knew that his vision was complete. The psalm that was his inspiration includes the words 'you made him ruler over the works of your hands; you put everything under his feet; all flocks and herds, and the beasts of the field, the birds of the air, and the fish of the sea, all that swim the paths of the seas'. Dr Jonathan Sacks, in describing these windows wrote '(they) can but serve to enhance the spirituality of the beautiful surroundings in which they are placed, advance the fervour with which the Almighty is worshipped, and increase the devotion of those coming under the inspiration of Chagall's divinely-inspired talent.' It would be an irony indeed if man's dominion were next expressed in the way that this development's proposers intend.

I very strongly feel that the land surrounding this church should be left just as it is: open and rural, with no room for compromise. No 'design solution' could mitigate the harm caused by building here. What stands there today is a complete synthesis of centuries of use and care and interaction with its landscape and one exceptional artist's response to it and to a family's tragedy. He saw it as one spiritual whole and so it should remain, for ourselves and for generations to come. In Simon Jenkin's 'England's thousand best churches' (1999), he ends his introduction to Kent with 'But the story ends with a blaze: Marc Chagall's glorious windows at Tudeley'.

More prosaically, the complex of buildings that includes the church is a jewel, with Church Farm House and the barns and oast having been sensitively converted for living in, together with a pond and orchard. They make a harmonious whole that deserves to remain intact and inviolate within an open landscape. On a visit, there were signs that badgers had been rooting in the turf beside the gravel road. May they continue to do so and not be displaced by ribbons of tarmac endowed with favourite housebuilders' names such as 'Badgers Close'!

see supporting document for image: Passing the church porch, looking east. The start of the footpath that runs east to Bank Farm can be seen as a gap in the perimeter hedge. (15.04.21 0630)

see supporting document for image: View from east end of church, looking northwest towards the river valley. The line of trees in the middle distance coincides with the western edge of the site. (15.04.21 0648)

see supporting document for image: The church from the line of the footpath that runs east – obliterated by ploughing at this time. May mine be the only kind of long shadow that is cast on this scene! (15.04.21 0657)

see supporting document for image: The complex of farm buildings and Tudeley Church from the southwest. This also illustrates the siting of the church at the highest point. (15.04.21 0742)

Summary and general thoughts

This 'village' is planned to have a built area of 94.7 hectares and a total area of 170 hectares. This is comparable to that of the largest city in Roman Britain, Corinium (Cirencester), at 97.2 hectares, while a lesser city such as Silchester is 43.3 hectares. It would have a train line bisecting it that the new residents could gaze at but, we are reliably informed, never use. The rationale, if that is not too kind a word, appears to not be based on balancing competing factors such as housing need, communication links, or considerations of landscape or heritage value but rather on the convenience of the site being in one ownership, being outside the High Weald AONB and being just within the borough promoting this plan. I urge the inspector to make a site visit to personally experience the characteristics of this place that I describe. They cannot be adequately conveyed in what can be written nor in photographs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I would like the opportunity to further articulate my reasons for deleting the proposal for development in Capel Parish that are stated in the attached file [TWBC: text of supporting document has been

copied to Question 7 for ease of reference, with reference made to the attachment to view images and maps].

If you would like to attach a file in support of your comments, please upload it here. [Tudeley Village objections Norman Taylor.docx](#)

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

If you consider that the Local Plan is not sound, please answer this question.

Question 5

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

I consider the Tunbridge Wells Borough Council (TWBC) Local Plan proposal to be **unsound** for the following reasons.

- Section 3.9 of the Tunbridge Wells Borough Council Infrastructure Delivery Plan (March 2021) states :-

I am a resident of Hadlow which lies on the A26 between Tonbridge and the M20. I have concerns regarding the potential increase in traffic through Hadlow as a result of Local Plan proposals by both TWBC and TMBC.

Many residents of local villages and other savvy drivers use Victoria Road and Hartlake Road to access South Tonbridge and the A21 to avoid the congestion and delays into Tonbridge along the A26. TWBC's proposal to close Hartlake Road will clearly force that traffic back onto the A26. That additional traffic will not have been captured in the SWECO surveys at junction 86, and will exacerbate the already over capacity scenarios.

Furthermore, SWECO mitigation schemes relating to the A228 to satisfy the huge housing allocations proposed at Paddock Wood and Tudeley have entirely failed to recognise the congestion that already occurs on the A228 Malling Road at Kent Street.

I consider the Highways Infrastructure assessments and proposals in the Tunbridge Wells Borough Council Local Plan to be **unsound**.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I feel like your current plan in regards to closing Hartlake Road disrespects the residents of Tonbridge, Golden Green, East Peckham and Tudeley.

The proposal to shut Hartlake Road will have a massive effect on the already busy Hadlow Road in Tonbridge and the A228 between Five Oak Green and East Peckham.

The proposed plans include building on a flood plain and you haven't even considered additional infrastructure to support the thousand or so homes you want to build.

All this plan is going to achieve is money in the pockets of the councils and the people proposing the ideas. Including the builders.

The area doesn't need more houses, it needs less landlords. It needs more home owners and less tenants. This is why the area is in such a mess. More landlords exploiting those with less money who can't afford their own homes, which leads to less homes available for sale.

I've been saying it for years but no one listens.

I have yet to see anything in the plans that can adequately deal with the strain on the infrastructure of Paddock Wood, whether this is traffic, parking, transport links, or flooding & drainage. Nothing in this takes into account that large scale overdevelopment of any one area will do nothing but blight the area & take away from it any individuality. The lush farmland of orchards & crops will be lost forever and the affects on our environment will have nothing but a detrimental effect.

Dear Sir,

I am a resident of the Borough of Tunbridge Wells and I live on the boundary between TWBC and TMBC. The boundary between the two boroughs follows the stream which run through our garden. We pay council tax to Tunbridge Wells.

My personal details are:

Name: David Hugh Tennent

Response category: I am responding as an individual

Email address: xxx [TWBC: full personal contact details redacted]

Postal address: xxxxx Postern Lane, Tonbridge, Kent

Post Code: TN11 xxx

Telephone number: landline xxx. Mobile xxx

I have been fortunate enough to benefit from the beautiful Kent countryside afforded by the green belt, which we very much hope will be protected and enhanced, as required by the National Planning policy.

The Postern is a grade II* listed building, dating from 1753.

I have been a schoolmaster at Tonbridge School, teaching biology and geography, for 37 years (with a keen interest in ecology) and we have lived at The Postern for 28 years. We know the locality well and feel very privileged to live here.

I am writing to object to "The Strategy for Tudeley Village" (Policy STR/SS3).

- . Creating a garden settlement at Tudeley of 2,800 houses will cause harm to residents of the Parish of Capel **and** to residents of Tonbridge. There will be a significant increase in traffic in to Tonbridge from the B2017, exacerbating the extreme traffic congestion that exists on this road every morning (and many afternoons).
- . People living in Tudeley will use Tonbridge Station for commuting and it is Tonbridge town services which will need more parking. Its roads are already extremely full at peak times.
- . The increased numbers of passengers on already packed commuter trains from Tonbridge Station will be unsustainable. Parking in and around Tonbridge Station will be even more difficult and more passengers will have to stand on the trains during rush hour.
- . Most people living in the new garden settlements will drive privately owned cars, despite initiatives to encourage bus and bicycle use. The costs of infrastructure on the Tonbridge & Malling side

of the boundary will have to be carried by Tonbridge & Malling residents, whilst Tunbridge Wells will receive council tax from the residents in the new houses.

- . The cost to Tonbridge-based businesses due to traffic issues may drive businesses from the area.
- . There will be an increase in pressure on Tonbridge health services, amenities and car parking as residents from the new garden settlement at Tudeley will use Tonbridge as their local town, rather than Tunbridge Wells, because Tonbridge is much closer. GP practices are already extremely busy and getting appointments can be difficult.
- . Large parts of the developments will occur on the Medway floodplain with flood risk assessments based on old data that may not allow for the impact of climate change. Flood mitigation measures may help, but flood risk will increase. Covering farmed fields with houses and roads will make the Medway flood more often and accelerate run-off, increasing flood risk not only in Tudeley but in Golden Green, East Peckham, Tonbridge and Yalding. These are all areas which have suffered from flooding in the past.
- . There will be an increase in air, light and noise pollution that will spread across the boundary to Tonbridge & Malling and views from Tonbridge to the Low and High Weald will be impaired, damaging the setting of historic assets like All Saint's Church in Tudeley and the Hadlow Tower. The church at Tudeley may well end up being surrounded by houses, which will cause great harm to this world renowned heritage site, with its magnificent set of Marc Chagall windows. We had some Australians staying with us recently and the chance to see the windows was one of the most important reason for them visiting the area.
- . The garden settlement at Tudeley can never be one settlement as it is divided by a railway line. Putting in crossings at frequent points across the railway may be possible, but it won't tie the two halves of the settlement together enough to make it one settlement, so it will never satisfy garden settlement principles.
- . Creating so much housing in Capel Parish will require the destruction of woodland, hedgerows, meadows, and farmland that is Green Belt land which should be protected. It will spoil the landscape and kill wildlife that is very special to the area, including rare species. This area should remain rural with agricultural land that can be used to provide food.
- . Planning guidelines state that housing need calculated by the government can be reduced if it requires development of Green Belt land unless "exceptional circumstances" exist. TWBC is already providing more housing than they need in the draft Local Plan. And do we need to build houses on this scale? Recent ONS figures show that population growth in the borough is slowing.
- . TWBC is using Capel to dump their housing needs on green fields and meadows, polluting a rural area rather than spreading development across the borough on brownfield sites or placing the garden settlement in the middle of the borough, to make it accessible north and south. The developments in Tudeley is unsustainable and place huge pressure on Tonbridge.

Thank you for reading this submission. We feel very strongly that the Green Belt should be preserved for all the reasons outlined above.

Yours sincerely

David Tennant

xxx, Postern Lane, Tonbridge, TN11xxx

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Postern Lane for 28 years and we have been fortunate to benefit from the Green Belt around this area, which we very much hope will be protected as required by The National Planning Policy. In 2016 the Inspector said that there was no need to allocate any land in the Green Belt to planning as there are a number of Brown Field and alternative sites available.

The main reason for the Green Belt is to prevent urban sprawl. This plan would effectively join Tonbridge to Paddock Wood via Tudeley and East Capel.

2% of the TWBC population live in Capel Parish, with this plan, 51% of the local housing plan is forced on Capel Parish. It is on the edge of TWBC, who will receive the Council Tax and Tonbridge and Malling will have all the traffic, the residents using the station, and schools.

Building so many houses in Capel and Tudeley will cause a significant increase in traffic, as most houses would have 2 cars. There is already extreme traffic congestion on the B2017 every morning and afternoon with people going to the local schools and the station and it is often difficult to get out of the Lane on to the B2017. The many extra cars would also be detrimental to air quality.

The increased number of people using the train from Tonbridge will be unsustainable as the commuter trains are already packed. There was a suggestion that Network Rail will put in another station near Capel, but apparently they will not approve or fund a station or the disruptive work required for bridges and tunnels.

The beautiful landscape across the Medway Valley will be altered forever and for at least 15 years, it will be a construction sight, visible for miles around. A rural Parish will change to an urban one and the existing community will be overwhelmed.

Development at East Capel is entirely on a flood plain. Tudeley has a high flood risk and the water would then go to nearby towns.

Hundreds of acres of good quality agricultural land would be lost forever.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

There are various brown field and alternative sites which would be suitable for houses, rather than building on the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

A large part of the developments will be on the Medway Floodplain and covering good agricultural land with houses will make the Medway more liable to flood and increase the flood risk in Golden Green, East Peckham, Tonbridge and Yalding.

There will be a huge increase in air, light and noise pollution to the Low and High Weald. Many people visit All Saints Church at Tudeley with the beautiful Marc Chagall windows and this Church would be surrounded by houses instead of the lovely Kent countryside.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

REPRESENTATIONS ON BEHALF OF TESCO STORES LIMITED TOWN AND COUNTRY PLANNING (LOCAL PLANNING) REGULATIONS 2012 TUNBRIDGE WELLS (REGULATION 19) LOCAL PLAN CONSULTATION

As you know, we act on behalf of Tesco Stores Ltd, in respect of their various interests in Tunbridge Wells Borough and respond on their behalf to the Regulation 19 Tunbridge Wells Local Plan consultation, under the following headings.

Background

MRPP has extensive knowledge of both Tesco's activities in the Borough and the present (and historic) formalisation of planning policy in the Borough. We welcome the opportunity to engage with the emerging Local Plan and do so positively both in terms of representing our client's interests, and in terms of helping the Council to formulate effective policies which support development for the benefit of the Borough's businesses and residents.

Tesco Stores Ltd engaged with various components of the adopted Local Plan, both in terms of the development needs identified in the existing Core Strategy (primarily in relation to retail capacity) and the treatment of its various interests in the Borough in the subsequent Site Allocations DPD. We have, on their behalf, thoroughly reviewed the Reg 19 Local Plan and have sought to respond only to those policies and issues which directly or indirectly affect their property interests. We trust that this targeted approach assists officers, who will find our comments generally supportive, subject to several clarifications regarding evidence and the justification for designations, allocations and policies.

For ease, we set out our representations in a single letter and have, for each relevant policy or supporting text, used the Council's recommended responses (i.e. objection, support, support with conditions, or general observation). We have also set out some basic background to our client's presence in the Borough.

Tesco in Royal Tunbridge Wells

Tesco has been represented in Royal Tunbridge Wells since 1969 when its store at 29 Grosvenor Road first opened. Tesco has continued to serve the community, uninterrupted, since then and has subsequently enhanced its presence to now include:

- Supermarket Format – Woodsgate Corner (Pembury)
- Metro Format – Grosvenor Road, Tunbridge Wells
- Rye Road, Hawkhurst
- Express Format - St. Johns Road (Tunbridge Wells), London Road (Southborough) and Commercial Road (Paddock Wood)
- One Stop Format – Badsell Road (Five Oak Green), Forest Road (Hawkenbury)

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR1 - The Development Strategy (support with conditions)

Tesco broadly supports the Council's development strategy, particularly the intention to make provision for all development needs inside the Borough boundary (i.e., without the assistance of neighbouring authorities). Tesco also supports the proposed growth of Paddock Wood (see later) but questions, in terms of the scale of new development to be directed there, and to Capel/Tudeley, whether the full potential of existing settlements to accommodate growth has been explored, and in so doing, enhancing their sustainability. Indeed, there appears to be an imbalance between the scale of development directed to certain settlements relative to their scale and sustainability. Such distribution must be fully justified and, if maintained as currently proposed, accompanied by proposals for commensurate improvements in local infrastructure, and services.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We reserve the right to attend any hearing sessions on the topic matters we have commented on accompanying written representations should the Inspector need to raise any questions during the Local Plan Examination.

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR6 - Transport and Parking (support)

The entirety of this policy is supported (in terms of encouraging sustainable behaviour), and it is welcomed that the Council have considered the rural character of the Borough by promoting the development of the strategic sites (Paddock Wood and east Capel and Tudeley Village), that are surrounded by rural settings by requiring integrated active travel, together with improvements to inter-settlement travel. It is satisfying that the Council will work alongside Kent County Council, Highways England, Network Rail and other train operating companies to maximise the provision of public transport infrastructure which will reduce travel demand through the securing of such infrastructure, which will meet the day-to-day needs of residents and businesses.

The proposed local highway improvements to mitigate and address the impacts on the highway network are welcomed and the measures together with the A228/A264 including junction capacity improvement at Woodgate Corner and a roundabout at the Pembury Road/Halls Hole Road/Blackhurst Lane. These improvements will directly benefit the existing Tesco Superstore in Pembury and the proposed allocated site AL/PE 6.

We also observe that despite the policy heading including 'parking', the policy does not contain explicit objectives for parking in the Borough (albeit we note the provisions of Policy TP3). In this regard, we would point out that where opportunities for reduced parking provision exist, care should be taken not to rely on a formulaic approach, but to take account of the actual operational characteristics of the existing and/or proposed development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We reserve the right to attend any hearing sessions on the topic matters we have commented on accompanying written representations should the Inspector need to raise any questions during the Local Plan Examination.

However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR/SS1 - Strategy for Paddock Wood, including land at east Capel (support)

Tesco broadly supports the strategic approach for the expansion of Paddock Wood and east Capel and acknowledges the improvements to three neighbourhood centres providing approximately 2,000sqm of commercial floorspace (Class E) in total. It is agreed that this would be appropriate given the substantial planned growth in population here, secure more sustainable attitude and provide qualitative benefits (i.e., choice and competition).

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

REPRESENTATIONS ON BEHALF OF TESCO STORES LIMITED TOWN AND COUNTRY PLANNING (LOCAL PLANNING) REGULATIONS 2012 TUNBRIDGE WELLS (REGULATION 19) LOCAL PLAN CONSULTATION

As you know, we act on behalf of Tesco Stores Ltd, in respect of their various interests in Tunbridge Wells Borough and respond on their behalf to the Regulation 19 Tunbridge Wells Local Plan consultation, under the following headings.

Background

MRPP has extensive knowledge of both Tesco's activities in the Borough and the present (and historic) formalisation of planning policy in the Borough. We welcome the opportunity to engage with the emerging Local Plan and do so positively both in terms of representing our client's interests, and in terms of helping the Council to formulate effective policies which support development for the benefit of the Borough's businesses and residents.

Tesco Stores Ltd engaged with various components of the adopted Local Plan, both in terms of the development needs identified in the existing Core Strategy (primarily in relation to retail capacity) and the treatment of its various interests in the Borough in the subsequent Site Allocations DPD. We have, on their behalf, thoroughly reviewed the Reg 19 Local Plan and have sought to respond only to those policies and issues which directly or indirectly affect their property interests. We trust that this targeted approach assists officers, who will find our comments generally supportive, subject to several clarifications regarding evidence and the justification for designations, allocations and policies.

For ease, we set out our representations in a single letter and have, for each relevant policy or supporting text, used the Council's recommended responses (i.e. objection, support, support with conditions, or general observation). We have also set out some basic background to our client's presence in the Borough.

Tesco in Royal Tunbridge Wells

Tesco has been represented in Royal Tunbridge Wells since 1969 when its store at 29 Grosvenor Road first opened. Tesco has continued to serve the community, uninterrupted, since then and has subsequently enhanced its presence to now include:

- Supermarket Format – Woodsgate Corner (Pembury)
- Metro Format – Grosvenor Road, Tunbridge Wells
- Rye Road, Hawkhurst
- Express Format - St. Johns Road (Tunbridge Wells), London Road (Southborough) and Commercial Road (Paddock Wood)
- One Stop Format – Badsell Road (Five Oak Green), Forest Road (Hawkenbury)

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy STR/SS2 - Strategy for Paddock Wood Town Centre (support/object with conditions)

Tesco notes and supports the shift in the Council's approach here, from a relatively small, allocated area in the present Local Plan (i.e., Site Allocations DPD), to a much broader policy approach towards the town centre generally.

However, the previous objections remain to the town centre allocations here, primarily on the basis that the Council's focus on commercial and community facilities, and enhanced public realm (whilst laudable), is unrealistic given complex ownership, site constraints (e.g., flooding) and a lack of viability. Indeed, the Council's own Viability Consultant previously advised the Council that the current allocation was fundamentally unviable, even taking account of a modest number of dwellings.

The previous objection sought assurances from the Council that it would: (a) use its own resources to coordinate with landowners in respect of the intended Masterplan; (b) use its compulsory purchase powers to help assemble the site; (c) support high density residential development over ground floor commercial uses to improve viability; and (d) seek s106 obligations from urban extension schemes elsewhere in Paddock Wood to fund public realm improvements in the town centre. It is acknowledged that the foregoing has been included within the policy criteria and these additional points of clarity are welcomed.

The Council's aspiration for a Master planned approach remains, with a separate Paddock Wood Town Centre, Framework Masterplan SPD to set out the strategic vision of the town centre. However, the production of the town centre masterplan is subject to feeding into the production of the four wider masterplans for the surrounding parcels of land surrounding Paddock Wood for development extension, as identified in Map 27. We uphold our previous objection in which we stated that the latter are long-term, phased proposals which could take many years to come forward and therefore harm the town centre in the meantime and is not an acceptable sustainable planning outcome.

Thus, whilst Tesco still maintains support for the broad redeveloping parts of the town centre, the policy text must reflect relevant constraints and issues as they stand today, and not complicate them further through onerous criteria. This could be addressed by:

1. Removing the need for a town centre masterplan (and certainly the contingency on the wider masterplanning of Paddock Wood);
2. Using Policy STR/PW1 to better define the Council's aspirations

and by also confirming (as the present policy does) that individual sites within the allocated area may come forward now on the basis they do not prejudice the delivery of the intended uses across the wider areas;3. Facilitate and encourage development by making a clear statement about its own position as freeholder of the existing town centre car park;4. Confirming within the policy text that the Council will, if necessary, use its various planning and compulsory purchase powers;5. Setting out the detail of a mechanism for cross-subsidy from growth surrounding Paddock Wood (with necessary changes to those policies and allocations); and6. Reinforcing that higher density residential development will, subject to meeting relevant design criteria, be supported to enhance viability.

Notwithstanding these suggested changes, our sense is that expanding the area covered by the allocation is ultimately problematic and less certain, and should be replaced with a series of smaller, more targeted allocation policies, where, arising from engagement with relevant interests (primarily landowners, but also occupiers, residents, business, and the Town Council) clearly defined allocation policies can be drafted.

Following the previous written representations submitted by MRPP on behalf of Tesco Stores Ltd during the two Regulation 18 consultation stages of the emerging Local Plan, we welcome Tunbridge Wells Borough Council acknowledging part of the previous comments and discussions points raised and implementing them within the various policies identified in this Regulation 19 representation.

We trust our comments are of assistance and we look forward to continuing to liaise with officers and other interest groups in respect of the emerging Local Plan. We reserve the right to attend any hearing sessions on the topic matters we have commented on above should the Inspector need to raise any questions during the Local Plan Examination.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We reserve the right to attend any hearing sessions on the topic matters we have commented on accompanying written representations should the Inspector need to raise any questions during the Local Plan Examination.

However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy PSTR/PE1 - The Strategy for Pembury Parish (support)

Tesco widely supports the strategy for Pembury Parish, particularly the allocation AL/PE 6, for the Woodsgate Corner, Pembury (See our response to AL/PE 6) and the proposed highway improvement and mitigation measures, which include the improvement to the crossroads at Woodgate Corner. These improvements will benefit visitors to the Tesco superstore in Pembury as well as the future development on the adjacent allocated site AL/PE6.

However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy AL/PE6 – Woodsgate Corner (support with conditions)

As you may be aware, Hendy Group previously promoted the redevelopment of the site for a Motor Village proposal on surplus land at Pembury. Tesco firmly supported this proposal and wrote to the Council on 15/07/2019 confirming its position.

Following the second Regulation 18 Consultation process in 2019, Hendy Ford submitted a formal planning application ref:19/00884/FULL, for the Motor Village proposal, which was recommended by officers for a grant of planning permission subject to planning conditions and entering into a legal agreement. The application was presented at Planning Committee on 28/10/2020. A motion was proposed by Councillors to approve the application, on the basis that members were satisfied that all relevant planning considerations had been covered within the committee report. This motion was not carried, and a separate motion was proposed by other Councillors to refuse the application, which was upheld resulting in the application being refused planning permission.

The primary reasons for the application's refusal, centred around failing to demonstrate the three overarching objectives of sustainable development within the NPPF, along with failing to demonstrate exceptional circumstances that the development is in the public interest and failing to comply with the AONB test within the paragraph 172 of the NPPF 2019. Subsequently, Hendy Group have now abandoned their intentions to pursue any future development upon this site.

The site is currently being allocated within the emerging local plan under Policy AL/PE6 for extra care accommodation (Class C3)/ residential care home (Class C2). In respect of Policy AL/PE6, Tesco supports the policy criteria subject to the following comments:

- Paragraph 5.731 of Policy AL/PE6 states that Use Class C2 does not count as fully equivalent dwellings for housing supply purposes. The capacity range is identified as 62-80 units net. Therefore, should a Class C2 scheme come forward on the site, the allocation needs to allow for the potential for general needs housing (Class C3) to come forward as well, otherwise the site is not delivering the housing supply anticipated within the Plan period. Flexibility to provide general needs housing (Class C3) as part of a care led (Class C2/C3) scheme is also required, to make efficient use of land should the optional quantum of care accommodation in this location not fully optimise the development potential of the site. This approach is supported by paragraph 117 of the NPPF 2019 to promote the effective use of land in meeting the needs for homes and other uses.

- In this respect Tesco, propose the following amendments (highlighted in bold) to Policy AL/PE6 to allow for the provision of general needs housing (Class C3) in order to contribute towards the housing supply, that has been identified to be delivered from this site during the Plan period:

“...This site, as defined on the Pembury Policies Map, is allocated for provision of specialist housing for older people and others with care needs. The allocation provides for up to 80 units of extra care accommodation (Use Class C3) or up to 120 units of residential care home/nursing care (Use Class C2). **A proportion of general needs housing (Class C3) will also be acceptable to make efficient use of land and contribute to the Council’s housing supply identified from this site during the Plan period...**”.

- The ‘open space and landscape buffer’ shown on the southern edge of the site on Map 67 should be reconsidered to allow the development footprint to be expanded to fully maximise the development potential of the site for housing and C2/C3 care. The developable area should be expanded to reflect the site boundary approved under planning permission 09/01265/FULMJ which established the principle of development within the buffer zone (see attached plan).

- It is welcomed that the allocation AL/PE 6 is included and retained within the new LBD boundary as referenced within the Limits to Built Development Topic Paper for Pre-Submission Local Plan February 2021.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

REPRESENTATIONS ON BEHALF OF TESCO STORES LIMITED TOWN AND COUNTRY PLANNING (LOCAL PLANNING) REGULATIONS 2012 TUNBRIDGE WELLS (REGULATION 19) LOCAL PLAN CONSULTATION

As you know, we act on behalf of Tesco Stores Ltd, in respect of their various interests in Tunbridge Wells Borough and respond on their behalf to the Regulation 19 Tunbridge Wells Local Plan consultation, under the following headings.

Background

MRPP has extensive knowledge of both Tesco's activities in the Borough and the present (and historic) formalisation of planning policy in the Borough. We welcome the opportunity to engage with the emerging Local Plan and do so positively both in terms of representing our client's interests, and in terms of helping the Council to formulate effective policies which support development for the benefit of the Borough's businesses and residents.

Tesco Stores Ltd engaged with various components of the adopted Local Plan, both in terms of the development needs identified in the existing Core Strategy (primarily in relation to retail capacity) and the treatment of its various interests in the Borough in the subsequent Site Allocations DPD. We have, on their behalf, thoroughly reviewed the Reg 19 Local Plan and have sought to respond only to those policies and issues which directly or indirectly affect their property interests. We trust that this targeted approach assists officers, who will find our comments generally supportive, subject to several clarifications regarding evidence and the justification for designations, allocations and policies.

For ease, we set out our representations in a single letter and have, for each relevant policy or supporting text, used the Council's recommended responses (i.e. objection, support, support with conditions, or general observation). We have also set out some basic background to our client's presence in the Borough.

Tesco in Royal Tunbridge Wells

Tesco has been represented in Royal Tunbridge Wells since 1969 when its store at 29 Grosvenor Road first opened. Tesco has continued to serve the community, uninterrupted, since then and has subsequently enhanced its presence to now include:

- Supermarket Format – Woodsgate Corner (Pembury)
- Metro Format – Grosvenor Road, Tunbridge Wells
- Rye Road, Hawkhurst
- Express Format - St. Johns Road (Tunbridge Wells), London Road (Southborough) and Commercial Road (Paddock Wood)
- One Stop Format – Badsell Road (Five Oak Green), Forest Road (Hawkenbury)

It is well documented that Tesco, having secured planning permission for a substantial replacement superstore at Pembury, took the difficult decision not to implement this, arising from significant changes in the convenience shopping sector and other local factors. However, several of its stores, including Pembury, have undergone improvements as part of the firm's 'refresh' programme, with a greater focus on customers, merchandising and the quality of the retail environment.

Responses to Policies

Policy EN15 Local Green Space (support)

Tesco support the Council, reconsidering allocating the 'Green space adjacent to Tesco Superstore, Pembury' as Local Green Space under Policy EN15 as identified in the Local Green Space Assessment (draft Publication February 2021).

Respondent's Name and/or Organisation	Michael Coggles, Royal Tunbridge Wells & Area Access Group

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Comments on whole Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS BOROUGH LOCAL DEVELOPMENT PLAN:

My members have asked me to respond to this consultation as follows, stressing areas that directly affect disabled and elderly people.

Further to my letter dated 16th March 2021 to Stephen Baughen the recent statement made to the House by the Secretary of State for Communities & Local Government, that his department are:-

"Seeking a rethink on housing quotas in the south east to avoid it being concreted over and to rebalance the population and industry to the north to support the growth of the Northern Powerhouse".

The following remain our major concerns regarding the legitimacy of the Pre-Submission of the Local Development Plan:-There is a lack of clarity regarding the legal duties and enforcement to bring about inclusion and meet the complex independent access needs of all disabled people now a legal duty. In endeavouring to meet the needs of all groups you have failed to meet the complex and costly needs of disabled people within this document, breaching the legal duty imposed within the Equality Act 2010, which my members and a wider Campaigning for the Rights of all People with Disabilities group of disabled people resident within the Tunbridge Wells area see as a discriminatory fudge:-

1. There is no prominent statement setting out that all developments etc within the LDP must be "totally independently accessible to all". The requirement was imposed on the council at the original Planning Inspector's inquiry and made clear that:-

"Developers must have due regard for Articles 9, 19 & 28 of the UN Convention on the Rights of People with Disabilities, the legally binding UK Disability Strategy 2012 & Action Plan with particular reference to Part 6 to ensure that all newbuild and refurbished buildings, dwellings and workplaces are independently accessible to all."

1.1 The implications of the above statement will alter radically the design and unit size of all new-build dwellings, reducing dramatically the number of units on development sites as well as increasing cost.

1.2 This has been a legal duty imposed on all Local Planning Authorities since the introduction of the Equality Standards in Local Government Targets 2000, the forerunner of the Public Sector Equality Duty, which required "adoption and full compliance" with the said UN Convention and both the Borough and County Disability Policies introduced in 2001 as part of that legal duty.

1.2.1 The Cabinet Office reaffirmed in 2016, 2018 & 2020 that:-

"The articles of the said Convention are non negotiable and must be complied with by 2025, or sooner if resources permit. It is not normal for government to incorporate into UK Law international treaties, Tony Blair then Prime Minister, used the legal device of the Equality Standards in Local Government Targets 2000, the forerunner of the Public Sector Equality Duty to impose the legal requirement, at the lowest level of compliance, "to adopt and fully comply with the said UN Convention" bringing the UN Convention and all its articles into UK Law, together with the requirement for formal ratification by parliament in 2009, to produce regular reports and a UK Disability Strategy by 2012. Many flagship policies are predicated on the long held assumption by successive administrations of compliance, including Welfare to Work and the Personal Independence Payment Regulations."

1.3 Hence the acceptance by the UK Supreme Court in two separate cases of the "disability paper trail", that the UN Convention and the legally binding UK Disability Strategy 2012 were "stand alone not part of the Equality Act 2010 but additional to it". The Equality Act 2010 imposes a legal duty to:-

"Ensure that all disabled people are treated more favourably than other groups to enable and empower them to participate fully in society"

The failure to comply to the letter will have serious implications in the form of sanctions and litigation by all resident disabled people within the borough area against both county and borough for failures

which will doubtless impact upon all councillors and officers past and present directly tasked post 2001 with meeting the said legal duties unless radical changes are made within the EIA document.

2. 2. By 2025 all footways and townscapes must be "totally independently accessible to all", the townscapes must meet the complex requirements for those with visual impairment, having the appropriate tactile delineators and on all footways a wayfinding line, as the minimum requirement for their safety, as well as being independently accessible to all wheelchairs. All signage must be accessible to all, for example pictograms for those with learning or mental health impairments. All crossing points using traffic signals, including temporary ones, must have knurled nobs fitted to enable blind people to detect when it is safe to cross.

3. All cycle tracks must be totally segregated from the pedestrians to accord with the KCC "Vision Zero Road Safety Policy" on Safer Streets, Article 9 UN Convention and the Cycle Tracks Act 1984.

4. By 2025 all buildings and workplaces built or refurbished since 2009, must be totally independently accessible, failure to achieve this will fall on the local planning authorities and those responsible at the time for approving such plans.

Both TWBC & KCC disability equality policies since 2001 are based upon the above and should, if read in conjunction with all the legal duties, (well hidden) be complied with.

5. Whilst I am aware of the need to house people, I am also aware of the growing concerns made to the Secretary of State by the High Weald AONB team about development encroachment. Also the growing concerns of local people regarding the numbers of houses being constructed within Paddock Wood on the Medway water table, Capel, Matfield & Brenchley and the proposed expansion of Tudeley Village, which will affect already overburdened GP, NHS primary & acute services, schools and other local and rail and transport services. The later raised at the recent Local Transport Forum Virtual Meeting.

5.1 The other serious concern for all local planning authorities is that since we have left the EU we can no longer depend upon fresh food and other products coming to us from the EU countries and the UK must once again become an independent food producer, which means that we cannot afford to use up farmland which could and should be used to grow crops or for animal husbandry. The pandemic has indicated the need to retain green field sites within urban areas for recreational and health purposes as well as retaining corridors for wild life.

6. POPULATION CONTROL:

This is an emotive issue, but must be addressed. On a island like the UK which has a finite amount of land available to meet all our needs, it is crucial that we have a clear policy on land use and it is no good saying "this is an issue for the policymakers", it starts at the grass roots, with local people. There is a need locally to ensure that there is a population balance, the 2011 census is out of date, indicators of an imbalance are dear to see with the growing numbers of retirement flats and homes being built or planned within the borough and its wider area, which will, as already stated, affect and impact dramatically the ability of GP, NHS primary and acute services to deal with an aging population. The pandemic has already proved this to be the case. (Eastbourne and the Coastal South East - Report 1985) and later government reports made clear that this must be resisted at all costs to ensure a "balanced population". That unpleasant duty falls within the remit of planning policy and the LDP.

There is a need for an immediate rethink in the light of the Jenrick statement and the current LDP needs to enshrine the duties imposed by the abovementioned legal duties and requirements in full. The Access Group will be happy to provide further detail on the exact legal wording to ensure total compliance is met and enforced.

7. The UK government is committed to maximise the economic and environmental opportunities of zero carbon emission vehicles which will mean a radical redesigning of our townscapes by 2030. To this end the RNIB & Age UK survey on the "public realm" which requires all existing unsegregated shared facilities to be segregated, in the light of cycles, powered cycles, e-scooters, e- skateboards and electric pods, which are inherently silent and cannot be heard by blind, deaf/blind and many elderly people. The suggestion that these groups should be accompanied at all times is now illegal as it is discriminatory, all groups of disabled people have a legal right to independent access and it is the duty of the authority responsible, irrespective of the cost, to provide that safe independent access.

7.1 Until that difficult issue of this group of silent vehicles has been addressed by the Department for Transport (DfT), they remain illegal and their use restricted.

7.2 PLANNING EFFECTS OF ELECTRIC & HYBRID VEHICLES:

Regulations introduced from July 2021, will mean that all newly registered electric and hybrid electric cars, vans, HGV's and buses must have an Acoustic Vehicle Alerting System (AVAS), the regulations ensure that such vehicles produce a specific level of noise, however, the regulations do not cover the other electric vehicles mentioned; it is my understanding that such e-vehicles if permitted, they can only be used on totally segregated tracks. If on-footway cycle tracks, they must have a trapezoidal delineator (see Off's Guidance on Tactile Paving Surfaces) which is very costly; there is a cheaper version of the design which can be seen in Port Madoc, Wales, as the minimum requirement to segregate these electric vehicles from the pedestrian and meet the requirements of KCC's "Safer Mobility Strategy" and new Road Safety Policy.

7.3 The requirement will be enforced on all authorities, so I suggest that in future when planning authorities consider a new development application, one of the legally enforceable conditions they can impose is that all footways must comply with that design, thus saving the council and county council additional costs at a later date.

The document in its current form fails to meet these legal duties and needs to be reworded.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy STR/SS1 – Paddock Wood (Western Parcel).

On behalf of my clients, the Exall family, I write to detail their representations in respect of the above referred matter.

The Exall family own the extent of land as detailed on the attached plan. It represents a proportion of the Western Parcel of the wider Paddock Wood allocation as set out at Policy STR/SS1.

The wider policy designation promotes a comprehensive mixed use development for Paddock Wood, encompassing approximately 3,490 – 3,590 dwellings, employment provision, new primary schools, a new health centre, and sports, recreation and play facilities.

The Western Parcel is located to the north-west of the town, immediately to the west of Eastlands Estate (which is where, amongst other commercial occupiers, Baxall Construction are based), to the west of the houses on Maidstone Road and Nursery Road, and to the north of the commercial units on Eldon Way.

The Exall family are supportive of both the wider aspirations for the growth of Paddock Wood, and the identification/allocation of their land as part of that allocation.

However, alongside Policy STR/SS1, it is important to have regard to Map 28, which details a conceptual 'structure plan' for the wider allocation. That structure plan, although presumably only indicative at this stage, shows my clients land as part of a 'Strategic Landscape Corridor'.

Having regard to the characteristics of the site, though, I would question if this is the most logical approach to land use planning.

My clients land is previously developed – being largely covered in hardstanding and historically used for commercial purposes (being the former Paddock Wood brickworks).

By reference to the sustainability agenda, surely the use of previously developed land to accommodate new development is sequentially preferable to the use of greenfield components of the allocated land?

Or, to put it more simply, it makes more sense to build on previously developed land, rather than to return said previously developed land to a greenfield status whilst using adjacent greenfield land to accommodate new development.

As such I would respectfully suggest, on behalf of my clients, that Map 28 is in need of review, with a more sustainable focus on the allocation targeting new built form to areas of existing previously developed land located within the wider site allocation, before (sequentially) extending that focus to the greenfield components.

I hope that the foregoing sufficiently details my clients position, but should you require any additional information then please do not hesitate to contact me.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

[TWBC: additional supporting information is attached to this representation].

Dear Sirs

Publication of Pre-Submission Local Plan - Representation

Land to the north of Birchfield Grove

Paras 5.389 -5.392

Policy AL/HA 5

Map 47

We are instructed by the members of The Grove (Hawkhurst) Management Company Limited who represent the resident occupiers of Birchfield Grove, who object to Policy AL/HA 5 that seeks to allocate land to the North of Birchfield Grove ['Site'] for the reasons set out below. In so doing, the council is urged to instead allocate land for a medical centre at The King George V playing fields at the Moor.

Preface

A previous scheme for 120 homes was dismissed on appeal in April 2014^[1]. Whilst permission was later granted for the homes that form Birchfield Grove, the council distinguished that land from the land to its north, and it is clear a defensible boundary to the North (given the school site to the immediate West) was created. Regrettably in September 2019 the Site (and more land – then called Site 413) was included in the draft Local Plan for a medical centre and 100 houses, but significant objections led to its withdrawal. For reference a copy of the residents' objections submitted as part of the consultation on the Local Plan is attached.

On 4 January 2021 Site 413 was removed from the Pre-Submission Local Plan (PSLP). There were many written objections to the Site's inclusion in the Plan, in particular AONB concerns, and second KCC Highways' objection to any significant increase in traffic along Rye Road. Instead TWBC suggested that the medical centre should be co-located with a new Community Centre at another site in Hawkhurst (The King George V (KGV) playing fields at the Moor ['KGV']). In this context, we note that TWBC have already worked with Cranbrook and Sissinghurst Parish Council to develop a joint facility in Cranbrook on exactly the same lines. Our client maintains that co-location at KGV is the appropriate solution for Hawkhurst.

Between the Site's removal from the PSLP and the Extraordinary TWBC Council meeting on 3 February 2021 to approve the PSLP, what appears to have happened is that the owner of Site 413 offered for free 0.79 hectare for a medical centre, representatives from the two existing medical surgeries approached Stephen Baughen (Head of Planning at TWBC Planning) to reverse the decision made in January and alter the Local Plan to include a medical centre at the Site.

We understand that the two surgeries will be amalgamating later this year i.e. before the emerging local plan could be adopted in any event. The proposed medical centre is intended to provide premises for the combined practice, and quite possibly other medical services. A meeting on 4/2/21 between the doctors' surveyor and, amongst others, TWBC Planning Dept and representatives of the Parish Council led our client to understand that it is likely to be a two-storey building with parking for over 50 cars. The Site area has capacity to accommodate that level of development, likely to exceed 1,000 sqm floor space, and it is reasonable to assume that would be achieved, when formulating these submissions.

Principal objections

AONB

The very significant weight to be given to the protection of AONB has not materially changed since the inspector's decision of April 2014. The Site is no different seven years later, part treed greenfield open farmland and the description of the special interest arising is very important to consider. We remind the council of those findings.

The inspector's findings equally apply now to the Site as follows (with policy references updated, bold for emphasis):

“Great weight should be given to conserving landscape and scenic beauty in AONBs which have the highest status of protection in relation to landscape and scenic beauty. Paragraph [172] of the Framework states that planning permission should be refused for major developments in these designated areas except in exceptional circumstances and where it can be demonstrated they are in the public interest. Consideration of such application should include an assessment of the need for the development including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; the cost of and scope for developing elsewhere outside the designated area, or meeting the need for it in some other way; and any detrimental effect on the environment the landscape and recreational opportunities, and the extent to which that could be moderated”

The proposal will constitute major development. There is no exceptional circumstance to justify encroachment into this beautiful landscape when there is scope for meeting the need for it in some

other way i.e. at KGV where the impacts would be significantly less and not cause harm to local resident amenities. The inspector made these further findings that do not apply to KGV:

Around 70% of borough is designated AONB. The scenic beauty of the AONB is derived from undulating and rolling countryside, dispersed settlements, historic farmsteads, ancient tracks and routeways, ancient woodlands, heaths and shaws, with a heritage of woodland industries and iron workings, and small irregularly shaped and productive fields[2].

The Site is quite unlike KGV. KGV is already built upon and distinguishable from the wider landscape. The Inspector went on (bold for emphasis) when refusing permission in 2014 for Site 413:

Hawkhurst is located in a broad high plateau on the main ridge line between the Rother Valley and Hexeden Channel. It is conspicuous along the ridgeline. It dates from before the 13th century. The historic settlement pattern is characterised by the layout of the traditional village centre and clusters of white painted dark framed weather boarded dwellings nestled around a small green. The settlement is considerably larger and there are examples of modern developments in the locality.

The site is part of a network of peaceful managed farmed landscape of pasture and open arable fields on the gentle open slopes rolling down from the plateau. The undulating topography of the site plays an important role on the landscape character. Given the rising and falling nature of the landscape the development will be visible from various public vantage points. The undeveloped quality of the site makes a significant contribution to the landscape character. The development would be seen as an urban extension to Hawkhurst and it would be out of keeping with the character of the settlement pattern due to the location and built form of the site.

Additionally the location and siting would represent a significant encroachment into the countryside. Despite the hedgerow as part of a mitigation scheme the access would be seen as an alien feature on the landscape and it would be out of keeping with the undeveloped character of this part of the countryside.

In this location the development would be seen as an unacceptable visual protuberance on landscape. This is because of the extent and scale of the development. I find that would have a materially detrimental visual effect upon the natural scenic and beauty of this part of the AONB, and it would undermine the open and mainly undeveloped appearance of the site thereby harming features which are integral to the character of Hawkhurst.

The undulating topography of the site reinforces the historic rural setting of Hawkhurst and I have strong reservations about the effect of the development upon the appearance of Hawkhurst

I find development would have a significant and demonstrable visual effect upon the landscape character of the AONB. The development fundamentally conflicts with advice contained within paragraphs [172 and 173] of the Framework which seek to restrict this kind of development in designated areas such as the AONB. Accordingly the development fails to comply with the main aims and objectives of the development plan.

The scale and location of the development would have a significant and demonstrable visual effect on the wider landscape.

The undulating topography of the site reinforces the historic rural setting of Hawkhurst.

Harmful visual effects upon the AONB would fail to comply with local and national planning policies given the potential effect upon the character and appearance of Hawkhurst. I consider it would be of greater weight that the grant of planning permission for this scheme would materially harm the visual landscape and landscape character of the AONB because of the site's location and would fail to represent a high standard of urban design given the scale of the development.

The exceptional case?

NPPF 172 requires that great weight should be given to conserving and enhancing landscape and scenic beauty in the AONB and the scale and extent of development should be limited, and planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.

Whether a proposal is 'major development' in the context of NPPF 172 is a matter for the decision maker (having regard to footnote 55). In this instance, the proposed development is major development

in the AONB having regard to its nature, scale and setting and the significant adverse impacts of the development as set out below.

The site is part of a network of peaceful managed farmed landscape of pasture and open arable fields on the gentle open slopes rolling down from the plateau. The undulating topography of the site plays an important role on the landscape character. Given the rising and falling nature of the landscape the development will be visible from various public vantage points. The undeveloped quality of the site makes a significant contribution to the landscape character. The development would be seen as an urban extension to Hawkhurst and it would be out of keeping with the character of the settlement pattern due to the location and built form of the site. Additionally, the location and siting would represent a significant encroachment into the countryside, seen as an alien feature on the landscape and it would be out of keeping with the undeveloped character of this part of the countryside, an unacceptable visual protuberance on landscape. The nature of the development will erode this relatively tranquil rural environment, a generator of traffic set within a rural landscape, the scale of the use would be substantial, involving large numbers of people and large built form intrusive in this rural setting, when the Site is devoid of any building. Considering setting, the proposal would take place within a part of the landscape that is integral to the setting and charm of the village and it would erode its rural landscape setting. Its scale and height would be prominent in this location, a major and permanent disruptive change to landform, harmful to the character and appearance of the AONB.

The level and intensity of the proposed use of the site would also impact on the tranquillity of the area, which is a recognised key component characteristic of AONB designation. Moreover, artificial light associated with the development, together with noise and activity would impact on bio-diversity and contradict the “dark skies” policy adopted for Birchfield Grove. The ecological value of the Site, and ancient woodland priority would mean allocation would be contrary to policy. Whilst there would be some economic and social benefits, the high-quality environment of the High Weald AONB within and around Hawkhurst is of considerable importance and this carries great weight. Overall, the development would result in significant erosion of the landscape character of the AONB with significant adverse impact on the character and appearance of the area and would not conserve or enhance the landscape and intrinsic scenic beauty of the AONB and the purposes for which the area has been designated. The proposal does not present exceptional circumstances necessary to justify major development within the AONB or outweigh the environmental harm identified particularly as alternatives(s) exist with significantly less harmful impacts.

Beauty

The Framework is currently being reviewed again and it is clear that NPPF until 2019 from its inception, and PPG prior to that, gave significant weight to protection of the countryside for its own sake (see for example paragraph 170b NPPF 2019). The Ministry consulted upon, and is set to introduce, a far higher policy test, thanks to the January 2020 Building Better, Building Beautiful Commission “*Living with Beauty*” report. This tells us to “*ask for beauty*” and “*refuse ugliness*”. Our client asks that now. It not merely chimes with the findings of the 2014 Inspector, nor is Beauty being merely reinstated from the previous NPPF position - it will be fundamental to sustainable development as defined before the Plan is adopted.

Other serious adverse impacts

Building a medical centre at the Site runs contrary to current and future policy, it is on the above mentioned ridge upon which the 2014 Inspector gave great weight in terms of protection. The proposed medical centre would dominate that ridge and would be a prominent and discordant feature when viewed from country lanes and footpaths to the north on the other side of the valley (see attachments labelled photos 01 and 02 from the North). From redacted minutes of a meeting between Rydon and TWBC Planning in January 2019, there is confirmation that this is regarded as the most ‘sensitive’ part of site – see documents labelled FOI 1 to 4, in particular FOI 2. It should also be noted that the Birchfield Grove development is surrounded by an Ecological Mitigation Area (approximately 2-3m wide – see attachment labelled Ecological Strip). Not only will this strip of land be breached to allow access to the Site but in addition any protection for wildlife, fauna and flora that the strip was meant to offer will be undermined by building a medical centre next to it.

Given that Site 413 was excluded from the January draft of the PSLP because of AONB concerns, what has changed to allow such a large structure to be built on the same site? Nothing material has changed since the 2014 Inspector made his findings.

The Site is a good ten minutes' walk from the Hawkhurst Crossroads and for patients living to the north, south and west of this, car would be the preferred mode of transport. The Hawkhurst Crossroads is already very busy. KCC Highways has made the point that the Crossroads it is 'at capacity', and has recently objected to another proposed housing development (71 homes), also to the south of the Crossroads, "owing to worsening congestion at the Hawkhurst crossroads junction" which they also note, quoting an August 2020 TA is "already operating over capacity" – see attachment labelled FULL KCC Highways (letter dated 25 February 2021 in Application TW/20/02788/FULL, KCC Highways and Transportation). To reinforce the point, this application has now been refused by TWBC's Planning Committee on the grounds of the impact on both the High Weald AONB and road congestion. (Decision made on 12 May 2021).

The intensification of use of the access road (Birchfield Grove) has already been objected to by Kent County Council highways (see TW/14/00547/OUT 1/5/2014). The borough council gave reserved matter approval to the current layout apparently unaware (from fair reading the officer assessment report) of the implications of leaving an aligned road near the northern boundary, which was not part of the presentation layout made by the developer to borough council members when they granted planning permission. Residents and their solicitors were similarly unaware when purchasing their properties in Birchfield Grove. Unlike the private road element that closes off Birchfield Grove at its northern end, the Site's proposed access was not segregated compared to the remainder, to leave open an access to more development. To the contrary, the landscaping proposed to borough council members was a defensible barrier to further development to the North i.e. including the Site (see Application 16/07797, Approval of Reserved Matters 2/10/17, Agent Response to Parish Council comments).

The escalation of use, were the Site allocated and then developed as drafted, would have profound implications for our client residents in terms of harm to their amenities. It is obvious from the significant escalation in traffic movement, this will lead to noise, fumes, vibration and disturbance to what is otherwise currently a quiet cul-de-sac that does not facilitate access beyond. Indeed, all residents, and even more so, those abutting or overlooking the Site would be adversely impacted. Here again the 2014 inspector raised significant concern in respect of harm by way of less than high quality design, but in 2014 the Framework provisions were less effective than now.

The position is currently set out in the 2019 Framework under section 12, commencing at paragraph 124. Put short, it has since then been a **"fundamental"** requirement that **development makes better the places in which people live their lives**, to be acceptable to communities. It will fail that fundamental test and it is explicit the Framework requires such development to be regarded as unsustainable. The test is no different when considering allocation of land in a new local plan since planning permission would still be required.

The air quality in Hawkhurst is one of the worst in Kent due to the Crossroads. Bringing both surgeries to the Site is likely to add to the poor air quality as patients to the south of Hawkhurst who previously attended the surgery located in the south of the village (Wish Valley) will now have to drive up Highgate Hill and turn right at the Crossroads. Perhaps more significantly, on their return journeys all visitors to the medical centre would turn right into Rye Road (see below for access and sightline problems) before distributing three ways at the Crossroads.

The junction from Birchfield Grove to Rye Road – this junction has poor sightlines and would struggle to handle the increased volume of traffic. In this context, a planning application to build six bungalows on the other side of the Rye Road (virtually opposite Birchfield Grove) was turned down recently mainly because of concerns around access to the Rye Road – see (see web link)

Accordingly, the Site must not be allocated, but protected from development. There is no plausible planning case otherwise simply because a landowner offers land for free. So where else should a medical centre be allocated? The answer is not difficult.

Alternative site availability.

This is a key point given the above Framework requirements. KGV was suggested by TWBC in the January draft of the PSLP before the offer of free land at Site emerged. Our client believes KGV has considerable advantages over the Site – notably, it is already developed (there is a Sports Pavilion; parking; tennis courts; playing fields and a playground) so would not damage or undermine the AONB. In addition, it believes this site can meet the doctors' requirements for the new medical centre, including parking. The idea in the January PSLP was that the medical centre would be co-located with a proposed new Community Centre. This would potentially generate a number of synergies. Finally, it believes

access would not be an issue given that KGV already accommodates the traffic associated with its existing facilities. It is also worth noting that there are two other potential sites at the local Community Hospital which lies on the outskirts of the village and at the proposed development at the Golf Club which includes provision for a new medical centre too.

Future housing north of the Site if the allocation were adopted

Although the current proposal is limited to a new medical centre and parking, it seems highly unlikely that the owner of Site would offer it without any prospective benefit, notwithstanding the gift of the land for the medical centre. It is also virtually certain that Rydon, who own the 'Access Option' from Birchfield Grove to the Site and beyond, would not allow access for the development of the medical centre unless it opened up the prospect of building houses beyond the Site at some point in the future. The landowner's track record for that is established. The offer of the land cannot be given any weight in terms of planning merit.

The doctors' professional adviser was understood to have been asked about 'ringfencing' the medical centre so that no further access could be made to the remainder of the land (site 413) through the medical centre/Site but at a meeting with representatives of Hawkhurst Parish Council and TWBC planning turned that down. This fuels concern that the medical centre is a 'trojan horse' for significant future housing on site 413.

Conclusions

The 2014 Inspectorate decision made findings with which the allocation of this Site is in fundamental conflict. For the planning system to be reputable, consistency is crucial. The Neighbourhood Plan policy position does not support allocation of this Site. LP2 maintains the AONB protection and AM3 gives generalised support to a replacement facility, but does not identify this Site.

Accordingly, in terms of Framework dimensions, there is no **economic benefit compared with KGV**, and in terms of **environment**, the position firmly tips against the Site, plus as a less harmful alternative site exists, that will equally meet the **social dimension**. It does not meet the Framework 3 tests, so it would be **"Unsound"** to leave the Site shown as a proposed allocation. This is very clear in 'place' and 'plan' making terms. The council should instead identify KGV as the viable site for the medical centre.

Yours faithfully,

Kingsley Smith

Kingsley Smith Solicitors LLP

Copy of the residents' objections submitted as part of the consultation on the Local Plan published July 2020

Representations to TWBC re Fowler's Park, Hawkhurst (Policy AL/HA 4)

TWBC has included a site in Hawkhurst (Fowler's Park) ("the Site") in its Regulation 18 Consultation draft new Local Plan ("the Draft Plan"), which is being consulted upon in a first round of publication between 20 September and 1 November 2019. The detailed proposals for the Site is set out in Policy AL/HA 4 of the Draft Plan. Briefly, the Site is allocated for residential use (C3) of approximately 100 dwellings, a medical centre or community facility (together with sufficient parking space), and safeguarded land for future school expansion.

We are instructed by residents of Birchfield Grove, Hawkhurst, the road from which any new development at the Site is to gain access. The representations contained in this letter have been approved by **[a number of other residents by whom we are not expressly instructed but from whom we have received confirmation, via our clients, that it also reflects their concerns with regard to the development of the Site]**

Our clients have several serious concerns regarding the suitability of the Site for the development which is being proposed in the Draft Plan. As set out in the draft policy, the Site in undeveloped "greenfield" land, it is within the Area of Outstanding Natural Beauty, is rural, comprises an area of Ancient Woodland and contains several Tree Preservation Orders and Veteran Trees. There is some development abutting the Site to the south and west, generally consisting of residential gardens and playing fields.

The issues which will be addressed in this representation are:

- 1 Transport / highways issues
- 2 Consistency of decision-making with plan-making
- 3 The earlier decision by the Secretary of State (13/00014) of 14 April 2014
- 4 AONB Protection
- 5 ClientEarth letter, September 2019
- 6 Sustainability / future-proofing
- 7 Housing Supply
- 8 The Relief Road

Transport / highways issues

The Site will be accessed through the new development (which our clients occupy) at Birchfield Grove. Birchfield Grove was only constructed very recently, between November 2018 and April 2019, our clients taking occupation of their property in March 2019, only some six months ago. The properties in Birchfield Grove were still being sold up to September this year. At no point during the transfer of their property (or, we understand, any of the others on the development) was the possibility of development on the Site mentioned. Whilst it is fully appreciated that this is not a material planning consideration, it goes to the consistency and transparency of cumulative local government decisions and how the failure to hold those principles affects not only the sustainability of the area but also individuals' lives and futures.

The Site will cater for, the Draft Plan indicates, about 100 new dwellings. With the average car ownership for a 3-bedroomed house being 2, that number increasing exponentially with the size of the home, this equates to an average (qualified guestimate) of 200 additional cars going through what was expected to be a quiet cul-de-sac by many of the purchasers. Birchfield Grove will be the only point of access for the Site as the consideration of any access from Whites Lane has been restricted by paragraph 2 of the draft policy.

Hawkhurst suffers terribly from congestion, rippling back from the busy crossroads in the centre of the village. It is noted that a relief road is proposed in the Draft Plan in the Development Strategy ST1 for the whole borough (paragraph 4) but the details of this are in no way sufficiently advanced (or if they are, they are not yet publicised) to enable any adequate consultation on development which it may 'relieve', taking place.

As far as the logistics of the Site itself, on leaving Birchfield Grove, the sightlines both to left and right are poor. The width of the mouth of the road joining Rye Road is too narrow to allow a vehicle to exit safely onto Rye Road if another vehicle is turning in at the same time. Whilst this is manageable in the context of 26 dwellings (that permitted and constructed at Birchfield Grove), the situation would likely become highly dangerous with the number of vehicles associated with the 100 extra houses proposed for the Site, public parking for 15 vehicles and a medical centre with its own parking. It should be noted that in relation to the application reference 19/01299 to build six bungalows opposite Birchfield Grove, KCC Highways and Transportation commented (26 July 2019) that:

"Rye Road is a busy distribution route where the last recorded speeds in connection with the development opposite [that is, Birchfield Grove], were in excess of 40 mph."

In this context it should be noted that despite the 30mph zone being extended beyond the Birchfield Grove development several months ago, almost all vehicles exiting the village eastward accelerate to or beyond 40mph even before arriving at the Birchfield Grove junction.

It is noted that the draft policy AL/HA4, paragraph 11 states that *"Confirmation from the highway authorities that there is no objection to the impact of the development at the crossroads at Highgate"* is a requirement for any development of the Site.

The added volume of westbound traffic from Birchfield Grove would add significantly to pressure on the crossroads already under considerable strain.

Although Birchfield Grove is quite short at approximately 130 metres long, it has been constructed with appropriate minimal width and with four curves along its length to give the development a rural character. If Birchfield Grove had been planned as part of a larger development of 126 dwellings, public parking for 15 vehicles and a medical centre with its own (somewhat transient) parking facilities for staff and visitors, which is what it will become if the proposal for the Site goes ahead, such a curved road of minimal width would never have been contemplated. Birchfield Grove is of a width appropriate only to its current size and visitors' parking is limited to space for only two vehicles. If the proposals

for the Site as outlined in the Draft Plan go ahead, Birchfield Grove will become highly congested with through traffic to and from the proposed development.

Consistency of decision-making with plan-making

In the decision made by TWBC with regard to the development of Birchfield Grove, the applicant's agent agreed to remove any reference to access being maintained to the Site in response to representations made by Hawkhurst Parish Council that there was no future development proposed on the Site. An email from the applicant's agent to the local authority dated 30 March 2017 containing its agreement was published on TWBC's planning portal against application no.16/07797 on 29 September 2017 **[enclosed]**. It can therefore be presumed by the reasonable observer that it was considered by the applicant and the local authority that there was no element of access to the Site which should properly fall to be considered in the decision-making process for the development of Birchfield Grove. Our clients feel that, if the local authority (as a body) were aware of access being required for any potential future development (either in principle or properly formulated) at the Site at the time that it made the decision in the Birchfield Grove site, that information should have been a material planning consideration and should have been referred to in the material submitted for, and the subsequent decision of, Birchfield Grove. The local planning authority is put to proof regarding the timing of its knowledge of the Site coming forward for development either by way of application or as part of the Call for Sites for the Draft Plan and the decision taken in the Birchfield Grove application (decision notice issued: 29 September 2017).

The earlier decision by the Secretary of State (13/00014) of 14 April 2014

Furthermore, a Planning Inspector, in the appeal against the decision of the Council to refuse application no.13/00014 (an application for the development of a larger site at the same location) dismissed an appeal against the refusal of 120 dwellings at the Site for the following reasons:

- (i) The development would have a materially harmful visual effect on the AONB
- (ii) It would fail to represent the high standard of urban/rural design required by policy

The AONB reason over-ride all of the other issues raised by the appellant in terms of housing numbers (the Council could not satisfy its 5yr HLS at that time), its generally sustainable location, the lack of material harm to the biodiverse ecology of the Site, identified and quantified economic, environmental and social benefits to the development, highways issues, drainage problems and the provision of affordable housing, all of which the Inspector felt could be addressed through the planning agreement but none of which would overcome the inherent and long-standing damage that would be caused to the AONB by the development of 120 houses on the Site.

AONB Protection

Paragraph 11 of the National Planning Policy Framework (the NPPF) states that:

"Plans and decisions should apply a presumption in favour of sustainable development.

*For **plan-making** this means that:*

- (a) plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;*
- (b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, **unless**:*
 - (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area; or*
 - (ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."*

One of the policies specifically mentioned in the NPPF that "protect areas or assets of particular importance" described in paragraph 11(b)(i) is that regarding Areas of Outstanding Natural Beauty.

Paragraph 170 of the NPPF, in particular, states that, *"planning policies and decisions should contribute to and enhance the natural and local environment by:*

- (a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan);*

(b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland;

(c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate;

(d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures;

(e) preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans; and

(f) remediating and mitigating despoiled, degraded, derelict, contaminated and unstable land, where appropriate.”

More specifically, paragraph 172 states that, “Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks. Where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality and the Broads. The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major developments other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of:

(a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;

(b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and

(c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated.”

Where there are sufficiently robust policies in place to counter-balance the presumption in favour of sustainable development, reasons for refusal may be sustained. In the Inspector’s consideration of all of the policy factors, nothing outweighed the importance of the AONB, not even a lack of housing supply for the local authority.

The importance of the AONB cannot be under-estimated. Once it is gone, it is gone forever; there is no return. The Inspector described the Site as being “*part of a network of peaceful, managed, farmed landscape of pasture and open arable fields on the gentle open slopes rolling down from the plateau. The undulating topography of the site plays an important role on the landscape character*” and “*the undeveloped quality of the site makes a significant contribution to the landscape character*”. [Enclosure: Decision Letter: paras 49 & 50]

In plan-making (i.e. the allocation of sites for development), a similar approach should be taken, as outlined by the NPPF.

The Draft Plan considers the AONB at Policy EN 21, which clearly states, at the first paragraph that:

“All development within, or affecting the setting of, the High Weald AONB shall seek to serve and enhance its landscape and scenic beauty, having particular regard to the impacts on its character components, as set out in the High Weald AONB Management Plan.”

The preceding explanatory paragraphs to the draft policy are also set out below:

“6.224 *The High Weald AONB covers approximately 70% of the borough and has the highest status of protection nationally in relation to landscape and scenic beauty, equal to that of National Parks. The Local Planning Authority has a statutory duty to conserve and enhance the natural beauty of the High Weald AONB. The High Weald AONB Management Plan 2019-2024 provides the following statement of significance:*

‘Time depth and objective analysis has defined the High Weald AONB as characterised by dispersed settlement, particularly historic farmsteads, ancient tracks and routeways, an abundance of ancient woodland, wooded heaths and shaws with a heritage of woodland industries and iron working and small, irregularly shaped and productive fields. These are all draped over a deeply incised and ridged landform of clays and sandstones with numerous gill streams, and are closely related to socio-economic characteristics that have roots extending deep into history. The essential character of the High Weald was established by the 14th century and has survived major historical events and social and technological changes. It is considered to be one of the best surviving coherent medieval landscapes in northern Europe. This fundamental and largely immutable character is the essence of the natural beauty of the AONB’.

6.225 *The High Weald AONB Management Plan is structured around the five key components of this character:*

- . *geology, landform, water systems, and climate;*
- . *settlements;*
- . *routeways;*
- . *woodland; and*
- . *field and heath.*

6.226 *The Local Planning Authority will have particular regard to these components in determining development proposals affecting the High Weald AONB and, where relevant, areas of the High Weald National Landscape Character Area that adjoin the designated area.”*

The draft policy, in paragraph 2, then attempts to preclude from itself those sites which are allocated in the draft NLP but which are within the boundaries of the AONB:

“Development in the AONB on sites not allocated in the Local Plan will need to be of a limited scale appropriate in terms of its nature and location, and demonstrate a positive contribution to the objectives of the AONB Management Plan...”

This statement goes entirely against the rationale behind national policy (the NPPF), the statutory duty imposed upon the LPA contained in section 85 of the Countryside and Rights of Way Act 2000 (“the CROW Act 2000”) and also the Draft Plan’s own preceding explanatory paragraphs.

Whilst it is appreciated that the LPA has discretion when drafting Plans to determine the weight to apply to matters which are given materiality by the NPPF and the PPG, protection for the Area of Outstanding Natural Beauty is required **in law** by the application of section 85 of the CROW Act 2000. This states at sub-paragraph (1) that:

“In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty.”

It is submitted that by attempting to remove the statutory protection from those sites which are allocated in the Draft Plan, the LPA is acting contrary to section 85 of the CROW Act 2000.

ClientEarth letter, September 2019

In response to the letter written by ClientEarth to the LPA putting it on notice of the potential it faces to violate its legal environmental obligations, the Draft Plan must ensure the introduction of “proper” climate change plans, including evidence-based carbon reduction targets which are central to those new plans. ClientEarth describes the need to include carbon targets in local planning policies as a “core objective against which all other policies and decisions will be tested”.

It must therefore be questioned whether the use of the Site for 100 new houses satisfies the LPA’s legal obligation to achieve a net zero carbon footprint for the UK. The LPA must be absolutely sure it can comply, via the imposition of appropriate planning conditions and, more importantly, the strong and targeted enforcement of any breaches of those conditions, with its statutory duty to uphold the law as set out in section 19(1)(A) of the Planning and Compulsory Purchase Act 2004, in that:

“development plan documents must (taken as a whole) include policies designed to secure that the development and use of land in the local planning authority’s area contribute to the mitigation of, and adaptation to, climate change”

Sustainability / future-proofing

The government has recently announced the target requirement for the country to achieve zero net carbon emissions by the year 2050.

Should these site-specific objections not be successful and the Site be allocated as proposed by the LPA in the Draft Plan, any developer must be strictly required to ensure that the development of the Site achieves this high degree of sustainability and that neither the village, the county nor the region suffers any detriment to its air quality or available amenity land to provide services for future generations of its inhabitants.

Housing Supply

As mentioned above, the Inspector's decision from 2014 highlighted the importance of the AONB, even over a lack of housing supply.

Our clients are fully aware of the need for the LPA to meet the figures set out annually by central government in the Housing Delivery Test, or undertake the consequential actions required where there has been a failure to do so. If the LPA can identify its housing supply, either including this Site or not, at the time of considering the Draft Plan, or at a later date prior to the Examination of the draft policies contained in the Draft Plan then there will be less pressure to allocate sites which are considered unsustainable or have additional designated national protection.

It can be seen that much relies on the timing of the coming forward of sites for inclusion in the Draft Plan and also the number of houses being built in the years leading up to a Plan's examination and adoption.

Our clients are strongly of the view that in order to satisfy its housing targets, the LPA (a) does not need to include this Site in its allocation; or (b) should consider alternative sites outside Hawkhurst before it over-runs the village with development that it cannot sustain either in the medium- or long-term.

The Relief Road

The provision of a relief road in Hawkhurst from Cranbook Road to Rye Road/High Street (as mentioned above, referred to in the Development Strategy policy STR1) is only required as a result of the enormous scale of development now proposed in the village and does not appear in the Transport section of the Draft Plan (paragraphs 6.506-6.540; policies TP1-6).

Our clients are extremely concerned that it will not relieve the traffic concerns in relation to this particular Site as it is at the opposite end of the village. Its effect will be negligible.

Furthermore, it would appear that a proper assessment of the relief road and its effects has not been conducted, or at least not officially reported upon and analysed in order for it to be published as part of the Draft Plan.

Until such analysis is available on the real prospects of the relief road benefitting the village, or its surrounding area, and complying with all sustainability principles, the allocation of development sites which it is suggested would be better served by the existence of the relief road, is open to challenge.

Conclusion

The obvious remedy to facilitate the ability of the LPA to achieve its given target of net zero carbon emissions, to comply with all of its statutory obligations to conserve and enhance the AONB, and to protect any future detriment to the amenity of the residents of Hawkhurst, is to remove this Site (as well as others in Hawkhurst) from the Draft Plan.

9 October 2019

Thomson Snell & Passmore LLP

[2] The High Weald AONB Management Plan 2009

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The siting of a large medical centre in a prominent position in the AONB in land to the north of Birchfield Grove is so inappropriate by reason of (i) damage to the AONB when there is an alternative site that offers no damage to the AONB, (ii) unacceptable additional pressure of traffic flows on Rye Road and at the Hawkhurst crossroads and (iii) excessive and unacceptable pressure from traffic on Birchfield Grove, that the only possible modification to the Local Plan to make it sound is to remove it from the plan and reposition the medical centre at King George V Playing Fields.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Number One Community Trust
Question 2	
Agent's Name and Organisation (if applicable)	Evolution Town Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 15 Land at Showfields Road and Rowan Tree Road

Paragraph No(s) 5.95-5.98

Policies Map (Inset Map No) 15

Question 4

Do you consider that the Local Plan:

Is sound

No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst the trustees have welcomed the opportunity to discuss the proposals for redevelopment with Town and Country and the other stakeholders, the Trustees remain concerned at the current proposed wording of Policy AL/RTW 15, which allocates land and facilities within the ownership of the Number One Community Trust for development, without sufficient safeguards to truly enhance and protect the community facilities.

Since the Trust's previous objections have not been adequately incorporated into any amendments to this policy, as a land owner, we consider there to have been a failure to comply with the **Duty to Cooperate**. Moreover, we consider that the policy is rendered **unsound**, because it has not overcome fundamental concerns of a landowning stakeholder. We therefore consider that the policy is not **positively prepared**, is not **effective** and is not **justified**.

The Trust therefore **objects** to the current wording of this policy. The reasons for the objection are set out below.

Potential for loss in flexibility, amplification and freedoms of uses

Policy AL/RTW15 includes as a central and key proposal that the land is allocated for the redevelopment of the whole area, to include *'residential development providing approximately **155 additional dwellings and health and community uses***'.

Given the relatively small area being allocated, this is a substantial increase in residential uses, and this is in addition to the dwellings already present in the area. Given that this part of Tunbridge wells is already an area which is predominantly flats and maisonettes, some of which are in private ownership, an **additional 155** new homes will lead to a very high residential density in this area, which is far in excess of all neighbouring residential densities. It is clear that this intensification of uses can only be achieved if the redevelopment of community uses includes residential living space above it, and if the existing residential units are redeveloped to be smaller and more cramped. We have concerns about this and the impacts of this on residential amenity and the freedoms our community trust currently benefits from.

It has been confirmed to us in consultation meetings that such a development would seek to intensify residential use, so as to make the proposal viable. Whilst there are residences above part of the Trust's Centre, those elements of the Trust's landholding which have the potential for greatest noise (the hall and large D2 space occupied by a library, toddler group and church) have the benefit of being completely free from residential uses above. This is a situation which the Trust wish to maintain for community uses within its freehold ownership.

These spaces have high ceilings, a flexible format operate without any noise or hours of operational restrictions. Both spaces are used flexibly by the community and have the potential to accommodate a range of noisy uses, free from conflict with noise sensitive uses. Whilst the proposed developers have suggested mitigation measures and potentially putting office uses between the community uses and residential uses, we remain concerned that this will still represent an infringement upon the trust's current freedoms and we remain concerned that the LPA will be under pressure to condition the use of the Community Facilities. The Trustees would strongly oppose such restrictions, since the community centre (and the hall especially) currently enjoy freedom from noise sensitive uses and any restrictions on their operations. This freedom has been crucial to the Trust's success over the last 30 years. **We therefore continue to resist the provision of replacement community facilities with any uses located above them.**

Potential for loss in quality and flexibility in spaces

Policy AL/RTW15 states 'Development on the site shall accord with the following requirements: (1.) *'A comprehensive redevelopment of the site to include the re-provision and enhancement of the existing residential dwellings alongside enhanced and improved community facilities, to include a new medical centre. The community and health facilities to be provided in accordance with an agreed timetable, relative to the phasing of the residential element of the development'*.

As currently worded, the Trustees of the Number One Community Trust cannot support this policy, since it does not adequately protect the flexibility of the facilities or make clear what 'improved' community facilities will mean.

We have concern that this policy, as drafted, does not adequately protect the Trust from what it would consider to be an erosion of its facilities. Whilst the policy states that any development would be required to provide 'enhanced community facilities', these would need to be quantified and qualified for the Trustees to consider offering support to this policy. The Trustees comments on the previous version of the Local Plan have not been taken into consideration, and this represents a failure of the duty to cooperate, given that the Number One Community Trust are freehold owners on this site.

The Trust currently owns/leases/uses the following facilities, and has reviewed the quantitatively and qualitative benefits of its existing provision:

[TWBC: for table, please see full representation attached as a supporting document]

The Trust would need to be satisfied that every element of both qualitative and quantitative provision would be protected and significantly enhanced in order to support this policy. The policy has not been revised since the previous submission, which demonstrates that the Trust's concerns have not been considered. The policy continues to need to be much more specific with regard to what enhancements will look like, without encroaching on or eroding the Trust's existing facilities and freedoms.

Naturally, as landowners, the Trust will also want to ensure continued ownership of their facilities.

Residential Ownership

In addition to the community facilities which the Trust owns, the Trust also owns a number of flats in the residential offer at the site. These let very well, and are an attractive offer on the housing market. The Trustees would be unwilling to lose any ownership of their flats, and would need to be satisfied that any replacement provision was an enhancement on their existing flats. It is important to the Trust that they own the income-earning flats within the complex, and as such, they would be unwilling to accept a purchase of their flats to enable development, without such guarantees.

The trustees are concerned that redeveloping existing housing, whilst seeking to deliver at least 155 additional houses, is likely to lead to replacement dwellings being cramped and at a much higher density than other surrounding areas. Since this area is already the highest density area of the three 'social housing estates' in Tunbridge Wells, it is considered inappropriate to seek to increase the density of this area so substantially. The trust is concerned that any proposed replacement dwellings would be at too high a density to be considered an adequate replacement for the existing dwellings.

Disruption during construction / loss of street frontage location

Finally, we object to this policy on the grounds that we are not convinced that a redevelopment could be accommodated without the Trust losing either access to their facilities for significant lengths of time, or being permanently located in a non-street frontage location: both would be entirely unacceptable to the Trustees.

The success of this Trust's Centre, compared with any other community centre run by a charitable trust within Tunbridge Wells, is based on its visibility on the street and the continued availability of its facilities to the community, without disruption.

Temporarily sending occupiers and groups to other locations may mean that they never return. Likewise, inadequately housing occupiers in portacabins may mean that the Trust (and the community) loses valuable groups and community assets. Similarly, providing a permanent replacement building, whilst the existing buildings are remaining in use would lead to the community buildings relinquishing their street frontage, which will undermine their long-term viability. We do not see how any temporary relocation could enable us to keep employing all the local staff that we offer work to. As such neither development option is supported by the Trustees. We therefore have strong reservations that such a major redevelopment could be accommodated without potentially fatal implications for this valuable community resource and as such, we oppose the redevelopment and the allocation of the trusts buildings in policy AL/RTW15. As trustees we have agreed that a better way forward for us as a significant land owner in this site would be to begin improving and investing in the properties we own.

We object to this policy on the basis that:

- . The trust's previous comments have been ignored, and therefore there has been a **failure to cooperate** with a major stake holder and land owner.
- . It is **not sound**, since 155 new residential uses cannot be delivered without serious infringement on the freedoms and flexibility of use the community centre currently enjoys.
- . As such, this policy is **not positively prepared, ineffective and unjustified**.

See attached report for a full explanation of these reasons.

[TWBC: for full representation please see supporting documents]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy AL/RTW 15 Land at Showfields Road and Rowan Tree Road The Showfields Estate

This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for residential development providing approximately **no more than 155 additional dwellings (spread throughout the estate and not centred upon one small area) and health uses and quantitatively and qualifiedly enhanced community uses**. As this development would comprise the redevelopment of an estate, affordable housing provision should be in accordance with Policy H 4: Estate Regeneration. Development on the site shall accord with the following requirements:

1. A comprehensive redevelopment of the site to include the re-provision and enhancement of the existing residential dwellings alongside enhanced and improved **quantitatively and qualifiedly enhanced** community facilities, to include a new medical centre. The community and health facilities to be provided in accordance with an agreed timetable, relative to the phasing of the residential element of the development. **In order for community uses to be genuinely quantitatively and qualifiedly enhanced, the community provision must comply with the following:**

a) Freehold ownership for the Number One Community Trust must be assured.

b) The community uses must include a genuine like for like replacement (or increased) floorspace for each of the following uses – multi-use library space, café, pre-school, lobby and offices, hall, community garden and playground area. Where these are indoor facilities they must continue to benefit from the same ceiling heights, unrestricted use and hours of operation, and those uses which do not currently have any uses above them must be replaced without any other uses above them.

c) The Number One Community Centre must retain its prime street front location and integrated position with the play space and the village green.

d) During the redevelopment, there must be no disruption to the ongoing activities which run at the Number One Community Centre.

e) If the residential density of the area increases as a result of the proposals, enhancements to the Number One Community Centre will be sought through S106 measures in order to provide for the new households.

2. The design and layout to take the form of a Low Traffic Neighbourhood, ensuring pedestrian and cycle permeability through the site, both to retain existing routes and to provide new routes, including pedestrian and cycle linkages with the surrounding area;

3. Any proposals should take account of the designated Village Green status of the open space within the site and **must not encroach upon it in any way**;

4. Provision of on-site amenity/natural green space and children's and youth play space;

5. Contributions are to be provided to mitigate the impact of the development in accordance with Policy STR/RTW 1.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? ☐ Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Number One Community Trust is a stake holder and land owner, and our views need to be considered and incorporated, as without the agreement of the Trust this policy is undeliverable.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1032 Evolution Planning for Number One Community Trust SI Represenation.pdf](#)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Considering the wider context, of the Borough and Tunbridge Wells in particular, we make the further observations, with reference to the Local Plan headings and numbering:

Section 3

Visions and Objectives

- a. Despite some points made in the Local Plan 3.1 to 3.5 we dispute that there is any Vision about “what sort of place we want the borough to be in the future”, ie what it should look like, the facilities available, recreational and creative aspects. Where is the Vision relating to the visual features, enhancement of beauty and the artistic and, in terms of heritage, anything in the documents about enhancing the “Spa” aspect of Royal Tunbridge Wells by the provision of water features? (Note: Tunbridge Wells is twinned with Wiesbaden in Germany, another spa town.)
- b. The Local Plan appears to be defined by development, building sites and commensurate infrastructure, but there is more to quality of life than this. We note the degree of attention and finance over recent years to road changes and hard features in the centre of Tunbridge Wells – hardly a tourist attraction.
- c. Little reference is made in the Local Plan to actions necessary to be taken to enhance the historic and cultural side of Tunbridge Wells. (Note – cessation of “The Day at the Wells”)
 - 1 For example, the failure to move forward with the derelict site of the old cinema, the failure of a plan to enhance the Assembly Hall which would not be ruinous or fail to capture the support of the people of TW.
 - 2 Lack of inspiration to market the town in its Spa context through the use of water features, and soft visual features, together with road congestion, all leading to declining tourism.
 - 3 We note “The Water in the Wells Working Group” report c2012 sets out to promote the installation of high quality water features at key locations in and around the town to:
 - 1 Create landmarks and meeting points,
 - 2 Provide modern play places,
 - 3 Refresh the environment,
 - 4 Emphasis the unique TW spa brand, and
 - 5 Raise the profile of TW and thus visitors/tourism.

Nothing in the Local Plan picks up these ideas or follows this thinking. The contrast between Tunbridge Wells and Wiesbaden is noted in the report as “could not be more stark”.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, ‘Northern Powerhouse’, it is possible that the housing needs in the south-east may need to be re-assessed downwards.

- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.
- 4 While it promotes the use of "active travel", the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Strategic Objectives

- a. There are 11 points raised, yet the majority are found relating to development,
 - 1 Transport is limited to a policy of giving priority to active travel and public transport,
 - 2 There is but reference to “ensuring the borough is vibrant, culturally rich, and economically buoyant”, and
 - 3 “conserving and enhancing the valued historic, built and natural environments, including Green Belt”, however
- b. The majority of the Plan relates to “sustainable development”, sites and their uses, and there is nothing specific or being envisioned about the matters raised in “Vision and Objectives” above.

Infrastructure and Connectivity

- a. 4.91 states “It is expected that future infrastructure to mitigate the impact of development....funded by....”, “to ensure that the development is acceptable in planning terms”.
- b. However, there is little infrastructure proposed that mitigates the likely increase in traffic movements by the up to 15000 cars that will be generated by the proposed developments in the vicinity of Pembury, Capel and Paddock Wood.
- c. Indeed there is little being proposed to alleviate the existing and declared congestions on the roads surrounding Tunbridge Wells. It may meet the “planning terms” but is distinctly unlikely to meet the aspirations of those who reside in the borough, who are already frustrated by the congestion and use of “rat runs” for their necessary travel needs.
- d. The only mitigation involving additional or new roads is the Colts Hill bypass. While the dualling of the A21 from Kippings Cross to Lamberhurst is noted it is unlikely to be aspirational for many years if the Tonbridge Kipping Cross section is anything to go by.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, ‘Northern Powerhouse’, it is possible that the housing needs in the south-east may need to be re-assessed downwards.
- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.

- 4 While it promotes the use of “active travel”, the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

a. There are 11 points raised, yet the majority are found relating to development,

- 1 Transport is limited to a policy of giving priority to active travel and public transport,
- 2 There is but reference to “ensuring the borough is vibrant, culturally rich, and economically buoyant”, and
- 3 “conserving and enhancing the valued historic, built and natural environments, including Green Belt”, however

b. The majority of the Plan relates to “sustainable development”, sites and their uses, and there is nothing specific or being envisioned about the matters raised in “Vision and Objectives” above.

Policy STR 6

Transport and Parking

a) Active travel

b) We note that “Active travel” is inclusive of walking, cycling and emerging electrical personal vehicles. If the definition of “emerging electrical personal vehicles” is an electric powered cycle, then please say so. If it is a car with electrical power, while it is government policy to change to electric, this will have no effect on the congestion issues.

c) A cycling policy is one which works in the flat and densely populated Netherlands but, apart from a minority of dedicated cyclist who cycle largely for pleasure, has little practical capacity in the hilly Weald of Kent for daily activities such as shopping, taking children to school, the elderly, infirm, and indeed use for job related travel.

d) In short this policy is likely to have limited impact on the use of roads by either petrol or electric cars, even with enhanced public transport.

e) It is a policy that does not differentiate between leisure active travel, daily essential travel and business use. It would impact on employers having to provide changing and showering facilities, and would be a questionable all-year-round means of essential travel.

c) Highway network

a) We are disappointed that there are only mitigating actions in relation to the highway problems (funded by S106) rather than positive improvement and a strategy for the future.

b) There is no strategic road plan for the future, and in the knowledge that major road improvement takes years to bring into fruition, such a highway strategic plan needs to be included in this Local Plan.

c) The Document “Draft Consultation Response on behalf of the Tunbridge Wells Town Forum” – March 2013 – sets out approaches to the transport issues of Tunbridge Wells and notes that there would be an estimated 10% increase in vehicles from 2013 to 2026, not a decline as appears to be

the underlying presumption from all the Local Plan statements. It also includes the map of the Civic Association by-pass scheme of 1945, produced at the request of TWBC, when the then congestion around Tunbridge Wells was considered to become extreme. Such a scheme, with the noted relief roads, needs to be considered as part of the Local Plan.

d) Such a ring road would enhance Tunbridge Wells from many perspectives:

- 1 Through access from North/South and East/West without going through TW centre,
- 2 Access to/from areas of TW without travelling through the centre,
- 3 Reduce journey times, encouraging more leisure visits, enhanced shopping experience, and tourism.
- 4 Reduced congestion times, with more favourable air quality and lower carbon impact.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, 'Northern Powerhouse', it is possible that the housing needs in the south-east may need to be re-assessed downwards.
- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.
- 4 While it promotes the use of "active travel", the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of The Pembury Society, I write to register its formal response to the Draft Pre-Submission Local Plan ('Local Plan').

We are aware of the response from Pembury Parish Council dated 11 May, which we endorse in its entirety, but subject to further observations we would make as follows (para numbers as per Parish letter):

- 1 **Para 2.1** We strongly endorse the suggestion for 20 mph speed restrictions by the school and would support such a limit throughout the village. In addition the "rat-runs" of Cornford Lane and, in recent days, Romford Road/Foxhole Lane/Kings Toll need to be addressed urgently. The Kippings Cross A21 congestion arises frequently and the Pembury Bo-Peep turnoff is used by a continuous stream of fast traffic down these very narrow country roads, which have frequent walkers, cyclists and horse riders.
- 2 **Para 2.3** We agree that 30 spaces at the village hall is not enough. The Hall seats approx. 2000, and all roads in the vicinity have yellow lines. We would suggest it should have a minimum of 60 spaces. We would also suggest that parking problems at the Bo-Peep end of Hastings Road, where many houses have no off-street facilities, could be alleviated by the provision of a further car park in PE3.
- 3 **Para 2.5** Pembury is a village and there must be sufficient places at Pembury Primary School to accommodate all the children of the Parish. This would also reduce traffic movements in the area. We note that about 260 of the proposed new houses are likely to be for families and, therefore an additional form per year may be required, and must be planned for.
- 4 **Para 2.6** If car use is to be discouraged a far better public bus service has to be implemented, extended daily hours must be provided with greater frequency and better routing (eg there is no direct service from Pembury to North Farm retail park).
- 5 **Para 3.1 to 3.8** We wish to emphasize the importance of these S106 allocations.
- 6 **Para 4.3** As stated above we would like to see the provision of a car park for local residents who have no off-street car parking facilities.
- 7 **Para 4.4** We have strong reservations about access into the proposed development from Church Road, and would like alternative access provision to be made on to Maidstone Road.

SUMMARY

- 1 The Local Plan concentrates on achieving and ticking a box regarding Government objectives in order to meet a calculated housing need, while we note that such number mechanisms are already being seen as flawed. Should Government pursue the strategy of levelling between north and south, 'Northern Powerhouse', it is possible that the housing needs in the south-east may need to be re-assessed downwards.

- 2 The Local Plan majors on development and development sites in order to achieve numbers and has little to do with the aspirations of the people of the Borough.
- 3 While the Local Plan does seek to detail all the relative aspects to be considered in relation to development sites, Neighbourhood Development Plans urgently need to be developed with relative local support, ensuring that each community has such housing as is beneficial and sustainable, in the context of each community's needs, available employment, enhanced infrastructure and supporting services.
- 4 While it promotes the use of "active travel", the impact of essential travel as opposed to leisure use is, in our view, highly suspect and vehicle use is likely to increase. This necessitates a much deeper look at long term highway strategy, which should be part of this Local Plan.
- 5 The enhancement of Tunbridge Wells for tourism, leisure, artistic and cultural amenities, as well as shopping experience, will only come about with renewed vision, and a major scheme to remove road congestion such as a ring road.
- 6 Finally, we would like transparency on the financial aspects of the proposed site developments, and the vision that arises from the use of the extra rateable value, which on the basis of say 12,200 dwellings (alone), amounts to £18,300,000 pa by the end of the Local Plan period, 2038, at current values.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Comment

Consultee	The Rev Canon Andrew Lenox-Conyngham [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Birmingham [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	The Rev Canon Andrew Lenox-Conyngham [REDACTED]
Comment ID	PSLP_514
Response Date	27/05/21 14:38
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.8
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Andrew Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Inset Map 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_514 & PSLP_515]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see (see web link)

- . Looking at the issue in terms of its hectarage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

- . Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

- . The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant**

Supporting Documents

- . **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

[TWBC: Incorrect web link removed for formatting purposes]

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are

no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic

value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect. An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has

demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

[TWBC: Incorrect web link removed for formatting purposes]

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID).

How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Consultee	The Rev Canon Andrew Lenox-Conyngham [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Birmingham [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	The Rev Canon Andrew Lenox-Conyngham [REDACTED]
Comment ID	PSLP_515
Response Date	27/05/21 14:38
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.4
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Andrew Lenox-Conyngham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Map 18

[TWBC: this representation has been input against Policies AL/BE 3 and AL/BE 4 – see Comment Numbers PSLP_514 & PSLP_515]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1 The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

- . Looking at the issue in terms of its hectareage:
 - . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
 - . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
 - . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring

parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were

first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

1 **The plan is unsound because of the untimely publication of site allocations**

- . Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site “allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

- . The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

1 **The plan is unsound because the evidence on which it is based is inaccurate or irrelevant** **Supporting Documents**

- . **AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates.** November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- . is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- . fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
 - . that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- . the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- . the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- . that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

1 **Sustainability Appraisal**

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

[TWBC: Incorrect web link removed for formatting purposes]

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are

no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic

value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF" (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013,

to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

[TWBC: Incorrect web link removed for formatting purposes]

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the

Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 1	
Respondent's Name and/or Organisation	Jeremy Skene, The Russell Hotel
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy ED7 and Paragraphs 6.499 & 6.500	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We kindly request your attention to the following matters concerning Policy ED 7 and its implications upon conversion of existing tourist accommodation into other uses.

Summary

The proposed changes appear to tighten and restrict existing regulations at a time when the hotel industry faces severe challenges from the changes brought about by the pandemic and the effect of Brexit upon European travellers. Whilst the essence of Policy T2 is retained and even strengthened under Article 6.500, the addition of Policy ED 7 serves to specify blanket conditions which may be imposed irrespective of the individual circumstances prevalent in each application. Consequently the practical flexibility possible under existing regulations is entirely removed with pre specified requirements that uni formally process all small family businesses alongside large scale corporate concerns. We consider that such measures may unfairly penalise small operators utilising old converted residential houses that may no longer viably serve the needs of modern customers and are unsuited to cost effective technological and facility modernisation. In many cases this may lead to serious financial loss and hardship to private owner operators who have diligently served the local community for decades only to find themselves unable to compete against major hotel chains operating newly built large scale premises designed to meet modern tourist needs.

Detailed elements

Paragraph 6.499

The term 'adequate supply' does not distinguish between the aspirations of the council and the actual usage by tourists of each range of accommodation available. No indication of bed number requirements is given and there is no suggestion that the licensing of new hotels in the borough might permit the proportional decommissioning of older and less suited premises when tourist demand is proven to have been satisfied.

Moreover there is no consideration that changing tourist profiles, requirements and numbers may be evidenced and considered in each application for change of use. Our data indicates a steady fall in tourist numbers since 2000 particularly since the decline of town centre attractions such as Scandals at the Spa, the Chalybeate Spring and regular bandstand concerts. In some cases small hotels, without the possibility of conference or function facilities, have experienced a 75% fall of tourist income. There is no evidence that increased hotel accommodation actually increases tourist numbers and without detailed published data of actual tourist demand and requirements any estimation of 'an adequate supply' of accommodation cannot be substantiated. **The council is therefore requested to take into**

account firm evidence of actual tourist demand by sector when assessing the merits of any application.

Paragraph 6.500 and Policy ED 7

These two elements appear to overlap in several paragraphs and are thereby considered together.

The need for a professional viability report is entirely supported. It is assumed that non viability remains the cornerstone of any application and that all other criteria are only designed to evidence that assertion - for otherwise entirely non viable businesses could be forced to operate at a continuous loss or face closure of their premises. **However this clarification is not clearly stated in the Policy and consideration of the need to do so is requested.**

Criterion 1 stipulates the need to use all feasible marketing channels despite that some of these may not be relevant to the business concerned. Small budget hotels often use on line marketing channels, web sites, online travel agents and Google rather than printed brochures or media advertisements which do not cost effectively increase trade. **We suggest that only suitable marketing channels for that particular business need be proven rather than others only applicable elsewhere.**

Criterion 2 centres upon the need to market the business at a 'market price' reflecting the existing use and condition. However it does not take into account the depreciation of that market price brought about by the licensing of large new hotels able to operate at low rates subsidised by other hotels in that chain. The realisation of those circumstances, already apparent in the Tunbridge Wells budget sector since the opening of the Travel Lodge, automatically and considerably reduces the 'market price' of those other budget hotels unable to price match it. Together with the Premier Inn, this development provides 190 budget rooms sold at prices that no small family operator can match. Hence, in the event of sale, the reduced valuation of small budget hotels effectively denies owners their former equity and thereby the chance to buy elsewhere or retire. Moreover, where a business has been driven into non viability it would only be of interest to speculators who might close it down and wait for circumstances to change in their favour.

Thereby it can be argued that if the council encourages and facilitates the construction of large new hotels, it should also indemnify those smaller businesses that are driven into non viability because of them. Permission for change of use should thereby be properly facilitated under these circumstances as the most efficacious solution for both parties. The recent government directive for easier planning laws to permit more residential accommodation and the shortage of family sized homes in the borough indicates the benefits that should be considered when formerly residential houses are no longer viable as small hotels.

We very much hope that these considerations can be taken into account when finalising the new regulations under discussion.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see the bold text in the answer to Question 5, above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I believe my comments to be important and participation in the hearings will facilitate a clear and unambiguous understanding of the issues.

Policy ED 12	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes
Is sound	No

Complies with the Duty to Cooperate

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We do not consider Policy ED 12 to be sound because it is too limited in its scope and contains flaws which could undermine valued facilities in the district.

The policy only appears to apply to smaller and more local facilities as outlined in paragraph 6.534. This means the district's larger facilities and valued cultural assets such as theatres are not protected by policy. This means the policy is not consistent with paragraph 92 of the NPPF which includes cultural buildings within the scope of community uses. The issue is important because with potential development of a new theatre as part of the Civic Hall project there could during the plan period be a threat to the Assembly Hall Theatre. More broadly there are a number of other valued cultural venues within the district; with these venues having been hardest hit by Covid restrictions inevitably some may be vulnerable within the plan period. Strong policy will be needed to ensure potentially viable facilities are retained.

We are also concerned by paragraph 6.535 because it affords opportunity for valued and/or potentially viable facilities to be lost. The presence of more than one of the same type of facility does not mean they are both the same or that the users of one can be absorbed by the other. For example in the case of pubs it may be the case that one is more of a quiet community 'local' whereas the other hosts live music or other events. The loss of one would likely mean complete loss of a function to the detriment of the community.

Cultural facilities contribute to the social and cultural wellbeing of local people, and are important anchors which draw people into town centres in turn boosting footfall and supporting other businesses. There is clear merit and justification in protecting them from loss.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend revision of the policy and its supporting text to ensure it is applicable to cultural facilities, and that part 1 of Policy ED 12 is removed. This will ensure conformity with paragraph 92 of the NPPF and ensure effectiveness by preventing loss of facilities that meet local need and contribute to the diversity of the district's cultural, community and social offer.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

There are a number of valued cultural facilities in the area which have not been afforded protection through policy. The Trust has previously made representation seeking the amendments set out above.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Having only recently found out that there is an indicative location to put a Gypsy/Traveller site on Ledgers Work, Queen Street, Paddock wood, TN12 6NN, myself and my husband aswell as our neighbours absolutley, vehemently oppose this decision. The Ledgers Works location is directly next door to my property and inbetween my neighbours home. Who in their right mind would consider putting a gypsy/traveller site between 2 residential homes!! Not only would this have a financial impact on our home but it would also deem it unsellable. We have worked very hard for many year for this not to happen.

We brought our property in a rural location for peace and quiet, so not only do we have to contend with the fact that 100's of homes are now proposed to be built directly around our home we have now found out about the traveller site.

Not only am I having sleepless nights thinking about what the decision will be in the future, this is also having a impact on my mental health! I don't want to be back on medication again because someone/people have these ideas but don't think about the impact that it's going to have on the people that live in these areas.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Jeremy Thompson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 2 The Strategy for Paddock Wood Town Centre

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I would like to make the following comments.

LCWIP 4.12

The idea of having a Low Traffic Town is a very good idea in theory. However, limiting the flow of traffic over the railway bridge on Maidstone Road will be an economic disaster for businesses in the Town. If this idea was to go ahead the damage to the environment would increase as people wanting to come to the town approaching from the north would have to make a detour along the Whetstead by Pass to the Colts Hill roundabout and then go along Badsell Road and Maidstone Road to enter the Town.

Local Green Space Assessment. Site 150

Recreation Ground and Memorial Park Maidstone Road,

With three new housing developments already being constructed the loss of any green space needs very serious consideration. 89% of the Memorial Playing Field is already designated as local green space and the remaining 11% should also be designated in the same manner. This land was previously mentioned in Regulation 18 and the planning application 20/03848 has still not been scheduled to appear in a TWBC planning committee meeting. It is considered to be an important green space within the settlement that contributes to its character/setting and local visual amenity. There are other sites that are more appropriate within the Town for a Community Centre. If this site is built on then Paddock Wood will no longer be able to host hard ball Cricket matches at a time when cricket has an increasing popularity. The residents of the Town have already made their feelings known through the Parish Poll which has been ignored by our own Town Council. It is worth mentioning that the deeds of this land state that it is for the purpose of providing a recreation ground. I cannot find any mention of a Community Centre or a pre school.

A proposed development on this site by the Girl Guides Association in 1987 was turned down by the Secretary of State and the comments made then are still applicable today.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Respondent's Name and/or Organisation	andrew thomson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3: The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I object to the 1000 houses at Tudely. A rural green belt area with poor roads and public transport will increase congestion in Tonbridge and should only be built if dedicated rail station with 10 mins walk of all houses is also built with regular stopping services

Increased housing of 1000 properties in Tudely will adversely affect greenbelt type area separating Tonbridge from Paddock Wood and will increase congestion in Tonbridge. As roads are built there will be pressure to infill the area between Tonbridge and Paddock Wood creating urban sprawl. To be sustainable it should be built around a new railway station with regular services. Much more effort should be made by the council to build on brownfield and infill sites with sustainable transport options without reliance on private cars.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Increased housing of 1000 properties in Tudely will adversely affect greenbelt type area separating Tonbridge from Paddock Wood and will increase congestion in Tonbridge. Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Paragraph Nos. 2.16, 2.18, 4.10

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Evidence in the plan proposes an ONS figure of 5% population growth over the plan period, equating to an increase of 6155 people. The plan submitted clearly follows the national guidelines and standard methods mandated. But the consequence is to deliver a housing unit demand of 678 per annum to a total of 12,200 units, eg double required for the projected population.

This is unsound as currently the population is falling due to Brexit European departures, COVID deaths of over 500 people in Tonbridge and Tunbridge Wells health areas alone (and sadly this is not over yet) and ironically housing and rent costs locally.

The above paragraphs also describe housing costs locally at 12 x average earnings. It is intrinsic to the plan that adding supply will alleviate this bubble. It has never done in the past and it won't in this plan either. House pricing is not as a result of medium term supply constraints, but is Government policy delivered through financial measures eg supporting buyers and builders to buy what people cannot afford. "Sub prime" definitions of mortgage debt is not something that happened in 2008. It now applies to most first time mortgage applications.

The plan cites Conservative manifesto commitments to build at a rate of 300,000 units by mid term in the plan. Are we really setting development plans on political party manifestos? This is not sound, as anyone with a memory or common sense can attest to. Manifestos do not always turn into Government policy, especially when the states finances have been ravaged by pandemic spending.

The basis of the overall strategy is therefore unsound and not justified by the supporting evidence.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A. Base the strategic plan on real projected demographic population increases, plus a reasonable margin and not twice that number.

B. Insert in the plan actions to mitigate and release underused housing stock eg big houses with low occupancy. Incentivise conversions to multiple occupancy, not currently considered.

C. Repurpose large areas of retail usage to central town living accommodation, as the current retail closures will accelerate due to e-commerce activity and changed consumer behaviour.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The structure of the plan at 592 pages plus hundreds more attachments coupled with the restrictive response forms successfully stifle big objections to fundamental aspects of this plan.

It is not through challenging hedgehog counts, or identifying individual trees for retention that real change or influence can be brought to bear.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability is a word which no longer has meaning, because of the definitions used by planning. At the current rate of concrete pouring, carbon emissions and habitat destruction, this plan is not in any true meaning sustainable for life on this planet. It is not compliance with wordsmiths or political manifesto definitions that really matters, but whether in reality the projected plan really changes our current trajectory for better or worse.

This plan proposes building on Green Belt land, areas of outstanding natural beauty and flood plains. Our water courses are being depleted locally, and we have the most polluted rivers in Europe. It removes areas of ancient woodland and is proposing new roads, when reducing travel is required. The word "Sustainability" is used thousands of times in this plan.

We need to get real and act now. As this plan comes into effect in 2022. COP 26 takes place in UK this year. Is this a good time to "set in concrete" a "sustainable" plan before the outcome is known?

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

LegalCompliance. This strategy has no direct quantifiable linkage to The Paris Agreement and UK Climate Act which are both referred in the plan. Both of these legal acts demand quantifiable immediate actions to reduce carbon emissions and to taking other related steps. The UK has signed these acts and treaties.

There are volumes of well meaning words, but no quantifiable targets or steps or measurements. Therefore this plan is legally playing lip service to these acts. If implemented as it stands we will be breaking these laws.

Paragraph .4.112 of the plan states; " climate adaption must be understood as the main priority for long term planning to secure climate resilience, and must be accepted as equally as important as meeting household needs."

If that were true in this plan we would see a target commitment to total carbon emission reductions. We would see the carbon impact of building over the detailed pieces of land planned for roads, and houses which the plan describes. We would see the calculated carbon impact of farmland, flood plane and woodland destruction. But we see none of this. We do see copious numeric detail on the building plans, but nothing on the "equally as important meeting of household needs", the climate. Why is this?

We have the science base and methodology to do the work. We have the tools, and specialists to do the work. But despite the "equivalent importance" the work has not been done. The plan is at variance to its stated objectives, and has no means to achieve them. It is therefore planning to be in breach of these legal acts.

The plan is unsound. Effectiveness and justification. For any strategic plan to be effective it must have targets, measurements and way points to review the actions taken and progress made. If we consider for a moment that we took the same approach in the plan for housing, we might end up with a plan that states " we intend to build enough housing to meet our needs, somewhere, at some point, and enough roads and schools to meet the target of 12000." This, you might think would be ridiculous. You would be right. But that is where this plan is with its "equally important climate strategy." This strategy is therefore not effective, and cannot be so.

And neither can it be justifiable. Climate change is stated as the World's and the UK's greatest strategic threat. (Despite the COVID pandemic) It cannot be justifiable to deliver a 592 page plan and a further huge sustainability report without showing a numeric linkage between the building, transport and other plans and its climate and net zero impacts. It is easily possible to do this. Can anyone justify why it would not be done? It is our most immediate existential threat.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Additions to policy STR7.

New paragraph 1. The current emissions output from the Tunbridge Wells planning area is currently X. For those topics addressed by this plan eg housing, transport, energy etc the discrete emissions are currently Y.

The additional emissions impact of building housing, roads etc contained in this plan will be Z for each category.

The impact on the total emissions of this plan will be xxxxx.

New Paragraph 2. The following strategies to hit net zero will be the following, with targets and dates.....please draft when work completed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because I have a horrible feeling that this Proposed plan is not a strategic plan that treats climate objectives equally, as it states with household needs, but a building plan with lots of details and quantifiable information and plans for development, and plenty of warm words about sustainability, and no detailed quantifiable or measurable steps to hit net zero.

It is really a building plan, not a strategic plan. And this is really serious, and must be heard, and acted upon urgently. If not now, within this planning cycle to 2038 then when? We all know we are late on this and behind the curve. We cannot allow the legal and stated net zero end targets in the plan to be kicked down the road with warm words and no data or detailed plans. We have no excuse not to act now.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See above.

Future Notifications

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Thank you for the opportunity to comment on the above consultation.

The consultation draft of the emerging Tunbridge Wells Local Plan was considered at an extraordinary meeting of this Council's Planning and Transportation Advisory Board on the 17th May 2021 and this response incorporates the views expressed by Members.

Tonbridge and Malling Borough Council welcomes the amendments made to the Regulation 18 draft of the Local Plan in response to the comments by this Council made in October 2019 and recognises the ongoing and pragmatic engagement in respect of the Duty to Cooperate to address the relevant cross-boundary issues and the continuing contributions to the infrastructure planning and master planning of the two strategic allocations at Tudeley and Paddock Wood.

However, the impact of these strategic sites, particularly on Tonbridge and the rural settlements of Hadlow, Golden Green and East Peckham, remains a serious concern. Having reviewed the Pre-Submission version of the Local Plan and the supporting evidence Members wish to make the specific comments set out below, which have also been included in this Council's on-line response. TMBC wishes to reiterate the importance of ensuring that the necessary infrastructure and mitigation measures are finalised and implemented in a timely and effective way. Continued close collaboration between the two authorities in respect of the master planning of both sites and the proposed Supplementary Planning Documents to refine the details is strongly encouraged.

The Local Plan has been prepared in accordance with the requirements of national policy as set out in the National Planning Policy Framework (2019) and Section 33A of the Planning and Compulsory Purchase Act 2004 in respect of the Duty to Cooperate. Please note that the Statement of Common Ground, which will reflect the matters raised in this Council's Regulation 19 response, will now be considered by the Planning and Transportation Advisory Board at its meeting on the 29th June 2021 before being agreed by Cabinet on 6th July.

Specific Comments

The transport evidence base documents underpinning the Local Plan are inconsistent, contradictory and unrealistically optimistic. There is therefore a lack of clarity regarding the infrastructure interventions required to deliver a sustainable plan.

To illustrate this point, the transport assessments, modelling assumptions and proposed mitigations do not take into account normal organic growth and planned development proposals in the Borough of Tonbridge & Malling or other neighbouring authorities and therefore do not adequately address the impacts on the local highway network and the consequential negative impacts on local communities.

Notwithstanding this, the mitigations proposed are considered to be insufficient to fully address all of the impacts on Tonbridge, for example, increased traffic flows into Tonbridge and surrounding villages causing increased congestion and a likely worsening of air quality.

The highway impacts on this Borough will extend beyond Tonbridge, Hadlow, Golden Green and East Peckham, for example additional traffic heading north along the A228 to access the M20 and A26 towards Maidstone and these should also be addressed.

The evidence for the impact on the landscape in the vicinity of the strategic site allocations and biodiversity is incomplete because the Landscape and Visual Impact Assessment only applies to sites located within the High Weald Area of Outstanding Natural Beauty.

The proposed closure of Hartlake Road to through traffic is a concern as it is a well-used route at peak times and it is not clear how the new accesses and internal road layout will provide an alternative north-south route. Whereas, if Hartlake Road were to remain open after the delivery of the Tudeley,

East of Capel Parish and Paddock Wood developments then this road and the lanes beyond would be inadequate for the significant new traffic being introduced and the wide reaching consequences described above would be even greater.

The strategic site allocations will increase the flood risk of the area to the north of Tudeley/Capel Parish, which is already prone to flooding, and this will have an adverse impact on the Medway flood plain.

As a result of this it is understood that the Upper Medway Internal Drainage Board will be seeking developer contributions. Has this been taken into account with regard to the whole plan viability study?

The Tudeley Garden Village master plan anticipates the delivery of new local service centres after phase 3 and the new secondary school will be delivered even later. This will put pressure on infrastructure in Tonbridge in the short to medium term, which the Local Plan seeks to avoid. Therefore, how will these impacts be mitigated?

Whilst recognising that there is not a requirement for a new railway station at Tudeley and that Network Rail has confirmed that the proposed growth in Tunbridge Wells borough does not require specific rail capacity interventions the omission of any mitigation of any impacts is a concern. TMBC encourages TWBC to continue to promote the opportunity for future provision with Network Rail and the rail operators and that this is revisited at the first review of the Plan. Without a new railway station undue pressure will be put on both Tonbridge and Hildenborough stations and TMBC members fear that the car parks serving both stations and the rail services themselves will be unable to cope with the increased demand created by the proposed development in Tudeley in particular.

The inclusion of cross-boundary walking and cycle routes both from the new settlement at Tudeley and associated with the Mabledon House Policy is a welcome contribution towards more sustainable means of transport, but concerns remain that this together with the proposed additional bus services will not result in the anticipated modal shift from private car use of 10%.

Paragraph 4.12 refers to the situation with respect to unmet housing need in neighbouring Sevenoaks District as being 'unclear' although it recognises that a potential shortfall of 1,900 dwellings may be further tested in the event the Local Plan Examination is allowed to continue. Since the Tunbridge Wells Local Plan was published for consultation on 26th March the request by Sevenoaks District Council to appeal the Judicial Review decision in respect of their Local Plan has been declined. Therefore, this contextual paragraph should now be updated.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

There appears to be a mapping error in respect of Map 33 and Map 34, which show the location of the new Secondary School as outside of the Garden Village site boundary, while Map 32 shows the school within the site boundary. For consistency, the maps should make clear that the site is inside the boundary, as the delivery of the school is now addressed by Policy STR/SS3.

I hope these comments are of assistance.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1

Respondent's Name and/or Organisation Ian Bailey, Tonbridge & Malling Borough Council

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: see also representations PSLP_1495 (Covering letter on whole Plan), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the evidence base supporting the two strategic site allocations at Tudeley and East Capel/Paddock Wood:

The transport evidence base documents underpinning the Local Plan are inconsistent, contradictory and unrealistically optimistic. There is therefore a lack of clarity regarding the infrastructure interventions required to deliver a sustainable plan.

To illustrate this point, the transport assessments, modelling assumptions and proposed mitigations do not take into account normal organic growth and planned development proposals in the Borough of Tonbridge & Malling or other neighbouring authorities and therefore do not adequately address the impacts on the local highway network and the consequential negative impacts on local communities.

Notwithstanding this, the mitigations proposed are considered to be insufficient to fully address all of the impacts on Tonbridge, for example, increased traffic flows into Tonbridge and surrounding villages causing increased congestion and a likely worsening of air quality.

The highway impacts on this Borough will extend beyond Tonbridge, Hadlow, Golden Green and East Peckham, for example additional traffic heading north along the A228 to access the M20 and A26 towards Maidstone and these should also be addressed.

The evidence for the impact on the landscape in the vicinity of the strategic site allocations and biodiversity is incomplete because the Landscape and Visual Impact Assessment only applies to sites located within the High Weald Area of Outstanding Natural Beauty.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To revise the evidence base to address the omissions identified and ensure that the necessary mitigations are implemented

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Ian Bailey, Tonbridge & Malling Borough Council
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1498-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the evidence base supporting the two strategic site allocations at Tudeley and East Capel/Paddock Wood:

The transport evidence base documents underpinning the Local Plan are inconsistent, contradictory and unrealistically optimistic. There is therefore a lack of clarity regarding the infrastructure interventions required to deliver a sustainable plan.

To illustrate this point, the transport assessments, modelling assumptions and proposed mitigations do not take into account normal organic growth and planned development proposals in the Borough of Tonbridge & Malling or other neighbouring authorities and therefore do not adequately address the impacts on the local highway network and the consequential negative impacts on local communities.

Notwithstanding this, the mitigations proposed are considered to be insufficient to fully address all of the impacts on Tonbridge, for example, increased traffic flows into Tonbridge and surrounding villages causing increased congestion and a likely worsening of air quality.

The highway impacts on this Borough will extend beyond Tonbridge, Hadlow, Golden Green and East Peckham, for example additional traffic heading north along the A228 to access the M20 and A26 towards Maidstone and these should also be addressed.

The evidence for the impact on the landscape in the vicinity of the strategic site allocations and biodiversity is incomplete because the Landscape and Visual Impact Assessment only applies to sites located within the High Weald Area of Outstanding Natural Beauty.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To revise the evidence base to address the omissions identified and ensure that the necessary mitigations are implemented

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Ian Bailey, Tonbridge & Malling Borough Council
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No. 5.217

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The inclusion of cross-boundary walking and cycle routes both from the new settlement at Tudeley (and associated with the Mabledon House Policy) is a welcome contribution towards more sustainable means of transport, but concerns remain that this together with the proposed additional bus services will not result in the anticipated modal shift from private car use of 10%.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Further evidence of the estimated modal shift of 10% from motorised travel to Active Travel would be welcomed.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst recognising that there is not a requirement for a new railway station at Tudeley and that Network Rail has confirmed that the proposed growth in Tunbridge Wells borough does not require specific rail capacity interventions the omission of any mitigation of any impacts remains a concern.

TMBC encourages TWBC to continue to promote the opportunity for future provision with Network Rail and the rail operators and that this is revisited at the first review of the Plan. Without a new railway station undue pressure will be put on both Tonbridge and Hildenborough stations and TMBC members fear that the car parks serving both stations and the rail services themselves will be unable to cope with the increased demand created by the proposed development in Tudeley in particular.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Tudeley Garden Village master plan anticipates the delivery of new local service centres after phase 3 and the new secondary school will be delivered even later. This will put pressure on infrastructure in Tonbridge in the short to medium term, which the Local Plan seeks to avoid. Therefore, how will these impacts be mitigated?

The proposed closure of Hartlake Road to through traffic is a concern as it a well-used route at peak times and it is not clear how the new accesses and internal road layout will provide an alternative north-south route. Whereas, if Hartlake Road were to remain open after the delivery of the Tudeley, East of Capel Parish and Paddock Wood developments then this road and the lanes beyond would be inadequate for the significant new traffic being introduced and the wide reaching consequences described above would be even greater.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The local infrastructure and services at Tudeley planned to meet the needs arising from the strategic allocations and reduce the need to travel further afield to centres like Tonbridge should be delivered earlier in the master planning of the new settlement.

The proposed closure of Hartlake Road to through traffic should be reconsidered.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The supporting text states that development will be supported by a cohesive drainage strategy, however, the strategic site allocations will increase the flood risk of the area to the north of Tudeley/Capel Parish, which is already prone to flooding, and this will have an adverse impact on the Medway flood plain.

As a result of this it is understood that the Upper Medway Internal Drainage Board will be seeking developer contributions. Has this been taken into account with regard to the whole plan viability study?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Confirmation that the flood risks have been fully taken into account.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation Ian Bailey, Tonbridge & Malling Borough Council

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 4.12 and 4.13

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 4.12 refers to the situation with respect to unmet housing need in neighbouring Sevenoaks District as being 'unclear' although it recognises that a potential shortfall of 1,900 dwellings may be further tested in the event the Local Plan Examination is allowed to continue.

Since the Tunbridge Wells Local Plan was published for consultation on 26th March the request by Sevenoaks District Council to appeal the Judicial Review decision in respect of their Local Plan has been declined. Therefore, this contextual paragraph should now be updated.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 4.13 recognises that there may be some unmet housing need and that it is therefore appropriate to assess the potential for also contributing to unmet needs. If this exercise has already been carried out, then there should be signposting to the relevant part of the evidence base. However, in light of the events described in paragraph 4.12, it may be more appropriate to update both paragraphs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Ian Bailey, Tonbridge & Malling Borough Council
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Maps 32, 33 and 34 (Policy STR/SS3)

[TWBC: see also representations PSLP_1495 (covering letter whole Plan), PSLP_1496 (Policy STR/SS1), PSLP_1497-1501 (Policy STR/SS3), PSLP_1502 (Policy STR1) and PSLP_1503 (Policy STR/SS3 Maps 33 and 34)].

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There appears to be a mapping error in respect of Map 33 and Map 34, which show the location of the new Secondary School as outside of the Garden Village site boundary, while Map 32 shows the school within the site boundary.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For consistency, the maps should make clear that the site is inside the boundary, as the delivery of the school is now addressed by Policy STR/SS3.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Tonbridge Civic Society
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy STR/SS1

Tonbridge Civic Society – the largest amenity society in Tonbridge with almost 500 members – objects to the above proposals, which would have a big impact on Tonbridge and the countryside near it.

The proposal for 2,160 houses in East Capel taken together with the plans for a further 2,800 dwellings in the proposed Tudely “garden settlement” dealt with under policy STR/SS3, essentially amounts to a more or less continuous urban sprawl between Tonbridge and Paddock Wood.

This massively increased population will naturally focus for facilities on their nearest significant town, Tonbridge, which will be swamped by this pressure on its roads, railway station, healthcare and the like, which are already overburdened by substantial development in the town in recent years, with more proposed in Tonbridge and Malling Borough’s own local plan. This is totally unacceptable, particularly given that Tonbridge is in a different borough that will receive none of the rates levied on the new households.

Meanwhile this very substantial development will have a negligible impact on Tunbridge Wells, the centre of the TWBC that will be in receipt of the rates.

We see no evidence in the plan that the impact on Tonbridge has been assessed leave alone addressed

Most of our comments on the Tudely village proposal apply equally to this part of the plan and we would request that those applicable are taken into account here as well.

In addition, we note that this policy proposal casually brushes aside the fact that groundwater levels are high in the northern part of this area due to the proximity of the Upper Medway flood plain. It is clearly environmentally irresponsible to plan such substantial housing development on a flood plain and once again the increased flood risk will impinge on Tonbridge as well as other settlements along the river and not on Tunbridge Wells. We already have more than enough worries on this count

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To explain in more detail the injurious impact of the proposal on Tonbridge

Tonbridge Civic Society – the largest amenity society in Tonbridge with almost 500 members – objects to the above proposals, which would have a big impact on Tonbridge and the countryside near it.

We oppose very strongly on environmental, amenity and infrastructure grounds the proposal to build up to 2,800 dwellings at Tudeley, which is less than 2 miles from Tonbridge (and much closer to Tonbridge than to Tunbridge Wells):

It is environmentally irresponsible to build what is in effect a new small town in an area with no existing public transport, a town whose 5000 or so inhabitants will be dependent on cars to go anywhere;

A development of this size in the Green Belt and immediately adjacent to the High Weald Area of Outstanding Natural Beauty is unacceptable and will destroy the fine, pastoral landscape at Tudeley: it would be contrary to national planning policy;

All Saints, Tudeley has become one of the most visited small churches in England because of its Chagall glass: it attracts visitors from all over western Europe. They see now a church amidst fields. If the plan goes ahead, they will see a church in a housing estate. It is extraordinary that Tunbridge Wells Borough Council is prepared so to compromise one of Kent's most important buildings.

The impact on Tonbridge of this development would be severe. The town has significant traffic problems at peak times because of the concentration of schools and the presence of one of the busiest commuter railway stations in south east England. It would be inevitable that a large development at Tudeley, combined with yet another secondary school on the edge of Tonbridge proposed in this plan, would make those problems worse;

Existing overcrowding at Tonbridge railway station would be exacerbated.

The impact on Tonbridge would be in addition to that of the extensive new development which has recently taken place in the town and which is proposed in Tonbridge and Malling Borough Council's own plan.

The fact that one landowner has accumulated a great deal of land round Tudeley with the aim of developing it is not a reason for allowing this proposal to go ahead. The proposal needs to be looked at objectively, not regarded as a matter of convenience for the Council and the landowner. Looked at objectively, the case against it is overwhelming.

It would make much more sense to develop the large tract of unbuilt land on the north-eastern edge of Tunbridge Wells between Pembury Road and the A21 which would offer easy access to the centre of Tunbridge Wells, including its railway station and to the railway station at High Brooms, both of which are much less busy than that at Tonbridge.

The Civic Society also objects to the building of a new secondary school on the eastern edge of Tonbridge. Tonbridge already has one of the highest concentrations of secondary schools of any town of its size in England. It will be a major traffic-generator, drawing yet more people from the east and south-east of the town towards Tonbridge.

Moreover, urban sprawl east of Tonbridge is undesirable and will impinge visually on Somerhill and its park. If Kent County Council and Tunbridge Wells Borough Council judge that a new secondary school is needed in west Kent, it should be built at Paddock Wood or Pembury.

We request these comments are considered together with our comments on STR/SS1 which are interconnected as far as Tonbridge is concerned.

Tonbridge Line Commuters is the local public transport user group for the Tonbridge & Paddock Wood Area. We have over 50 years of experience in dealing with successive railway administrations and local bus companies in order to maintain and improve services

As an organisation we believe that the proposed Tunbridge Wells Local Plan does not properly address the public transport aspects of building large amounts of housing on greenfield land, and does not ensure that adequate transport infrastructure will be provided *prior* to the major expansion of housing in the Paddock Wood area.

Specifically;

- It is inevitable that due to the largely "dormitory" nature of the proposed Paddock Wood area developments that most adult residents will need to travel outside the immediate area to work, even if post Covid-19 there remains a significant element of home working.
- The existing road infrastructure in the area is already inadequate. Paddock Wood, which would be the most likely rail-head for commuting, would require a major increase in car parking provision, as well as road infrastructure upgrades *before* a further increase in housing. We do not see a strong enough commitment by TWBC to achieving this.
- We are not convinced that a bus network centred around travel to and from Paddock Wood town centre and railway station would be economically viable enough to develop and sustain a regular enough service with long enough operating hours to significantly reduce car journeys.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Tonbridge Line Commuters is the local public transport user group for the Tonbridge & Paddock Wood Area. We have over 50 years of experience in dealing with successive railway administrations and local bus companies in order to maintain and improve services

As an organisation we believe that the proposed Tunbridge Wells Local Plan does not properly address the public transport aspects of building large amounts of housing on greenfield land, and does not properly ensure that adequate transport infrastructure will be provided *prior* to the development starting.

Specifically;

- It is inevitable that due to the largely "dormitory" nature of the proposed Tudeley development that most adult residents will need to travel outside the immediate area to work, even if post Covid-19 there remains a significant element of home working.

- The existing road infrastructure is already inadequate for the volume of traffic. Tonbridge, which is the nearest more major settlement, and the most likely rail head, suffers serious congestion and lack of car parking availability. We are not convinced that a bus link between Tudeley and Tonbridge will be economically viable enough to sustain a regular service with sufficiently long operating hours to significantly reduce car journeys from the development.

- The plan's stated aim of eventually adding a railway station at Tudeley to serve the new development is in a noble idea, but in practice is not likely to be deliverable during the lifetime of the plan. The railway through the centre of the development is a main line, not a metro or branch line, and any current or future railway operator would not wish to add a further station on a such a line between two existing stations that are already only some 6 miles apart, even if the land acquisition and station building cost was to be fully funded.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

RE: Tunbridge Wells Borough Council Local Plan Pre-Submission (Regulation 19 Version)

We write on behalf of Town and Country Housing (TCH) in respect of the Pre-Submission (Regulation 19 Version) of the Tunbridge Wells Local Plan. TCH is a major land owner on the estate.

CH support the inclusion of the Showfields Estate within draft policy AL/RTW 15 (Land at Showfields Road and Rowan Tree Road). TCH note that the extent of the policy allocation has changed since the previous version of the local plan and this is welcomed.

The condition of some of the flats and houses on the Showfields Estate is a concern for TCH and the useable life of some of the buildings is limited without significant intervention and investment.

The Showfields Estate is in a highly sustainable location with excellent public transport links and opportunities for walking and cycling. It is well placed for residents to access local shops and services including those in Tunbridge Wells town centre. TCH is excited about the future regeneration of the Showfields Estate and the potential to create long lasting change for existing and future residents.

Whilst TCH support the allocation, it is considered that there are a number of issues which should be recognised by policy AL/RTW 15 including:

- **Fragmented Ownership** – the estate is in multiple ownership and whilst TCH support comprehensive regeneration, any future development will be constrained by land ownership issues which are outside of the control of TCH. Specifically, it is considered important that the policy recognises that the community uses are in separate ownership with a range of different interests. It is noted that within the draft policy AL/RTW 15, point 1 states that ‘*development on the site shall accord with a number of requirements including 1) a comprehensive redevelopment of the site to include the re-provision and enhancement of the existing residential dwellings alongside enhanced and improved community facilities to include a new medical centre. The community and health facilities to be provided in accordance with an agreed timetable, relative to the phasing of the residential element of the development*’.

TCH request that this part of the draft policy is amended to account for the fact that the delivery of the enhanced community facilities will be subject to phasing, land ownership and operator requirements.

- **Phasing** – given the scale of the existing estate, which is currently in full occupation, the policy should recognise that any future redevelopment will need to be phased appropriately to allow decanting to take place.
- **Housing** – regeneration of the Showfields Estate offers the potential to provide better quality private and affordable homes including family housing with a mix of unit types and tenures to meet demand. The draft policy currently refers to providing approximately 155 additional dwellings. It is considered that the reference to 155 dwellings is removed and that the policy provides an indicative range of a suitable number of new dwellings to allow maximum flexibility, recognising that the number of new units will be subject to a range of design issues and constraints including building heights and car parking requirements.
- **Community Uses** – TCH fully acknowledge the importance of the community uses on the estate and are committed to working in partnership with the relevant stakeholders to deliver improved community use provision. TCH would welcome a reference to retail, food and drink (café) and leisure uses within policy AL/RTW 15 to reflect the diverse range of uses which serve the community both now and in the future. TCH also support the desire within the policy to maintain the designated Village Green.
- **Design and Layout** – the design of any future regeneration scheme will need to address a number of significant shortcomings in terms of the existing design of the estate. The policy should recognise the potential to reconfigure the design and layout of the estate to improve natural surveillance, public realm, landscaping and environmental credentials.
- **Low Traffic Neighbourhood** – Point 2 of draft policy AL/RTW 15 notes that the design and layout of future development is to take the form of a Low Traffic Neighbourhood. Given that the design and layout of any redevelopment proposals will need to address a range of different aspects, including those noted in the bullet points above, it is considered that the reference to a Low Traffic Neighbourhood is deleted from the policy. Instead, the wording of the policy should focus on the requirement to provide safe and convenient access to modes of transport other than the private car, to encourage walking and cycling and promote active travel within a safe environment for existing and future residents. Furthermore, the Showfields Estate is primarily a residential area with very limited through traffic. Any future regeneration proposals are unlikely to change this and the requirement to introduce a Low Traffic Neighbourhood to reduce the impact of through-vehicular traffic on local streets is not considered necessary for the Showfields Estate.
- **Contributions to mitigate impact of development** – Point 5 of the draft policy AL/RTW 15 states that ‘contributions are to be provided to mitigate the impact of the development in accordance with Policy STR/RTW 1’. Whilst TCH recognise the need for the Council to ensure that the impacts of development are mitigated, it is considered that Point 5 should acknowledge that any redevelopment at Showfields is likely to provide significant benefits for the estate and such benefits should be recognised and taken into account when considering developer contributions. The level of contributions sought should also take into account the requirement of the draft policy AL/RTW 15 to provide a level of affordable housing in accordance with draft policy H4 (Estate Regeneration).

TCH also make the following comments in respect of other policies in the draft plan:

- Point 14 of draft policy STR/RTW 1 (The Strategy for Royal Tunbridge Wells) notes the strategic requirement to allocate land at Showfields and Rowan Tree Road for a new medical centre. The requirement for a new medical centre is also referenced in draft policy AL/RTW 15. TCH is concerned that the reference to provide a new medical centre as part of the regeneration proposals for Showfields is aspirational and that the specific requirements of potential operators has not been sought and there may not be an end user willing to operate a new medical practice in this location, which would impact on its delivery. This is of concern to TCH and TCH would urge the Council to consider this requirement in more detail.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

RE: Tunbridge Wells Borough Council Local Plan Pre-Submission (Regulation 19 Version)

We write on behalf of Town and Country Housing (TCH) in respect of the Pre-Submission (Regulation 19 Version) of the Tunbridge Wells Local Plan. TCH is a major land owner on the estate.

CH support the inclusion of the Showfields Estate within draft policy AL/RTW 15 (Land at Showfields Road and Rowan Tree Road). TCH note that the extent of the policy allocation has changed since the previous version of the local plan and this is welcomed.

The condition of some of the flats and houses on the Showfields Estate is a concern for TCH and the useable life of some of the buildings is limited without significant intervention and investment.

The Showfields Estate is in a highly sustainable location with excellent public transport links and opportunities for walking and cycling. It is well placed for residents to access local shops and services including those in Tunbridge Wells town centre. TCH is excited about the future regeneration of the Showfields Estate and the potential to create long lasting change for existing and future residents.

Whilst TCH support the allocation, it is considered that there are a number of issues which should be recognised by policy AL/RTW 15 including:

- **Fragmented Ownership** – the estate is in multiple ownership and whilst TCH support comprehensive regeneration, any future development will be constrained by land ownership issues which are outside of the control of TCH. Specifically, it is considered important that the policy recognises that the community uses are in separate ownership with a range of different interests. It is noted that within the draft policy AL/RTW 15, point 1 states that ‘*development on the site shall accord with a number of requirements including 1) a comprehensive redevelopment of the site to include the re-provision and enhancement of the existing residential dwellings alongside enhanced and improved community facilities to include a new medical centre. The community and health facilities to be provided in accordance with an agreed timetable, relative to the phasing of the residential element of the development*’.

TCH request that this part of the draft policy is amended to account for the fact that the delivery of the enhanced community facilities will be subject to phasing, land ownership and operator requirements.

- . **Phasing** – given the scale of the existing estate, which is currently in full occupation, the policy should recognise that any future redevelopment will need to be phased appropriately to allow decanting to take place.
- . **Housing** – regeneration of the Showfields Estate offers the potential to provide better quality private and affordable homes including family housing with a mix of unit types and tenures to meet demand. The draft policy currently refers to providing approximately 155 additional dwellings. It is considered that the reference to 155 dwellings is removed and that the policy provides an indicative range of a suitable number of new dwellings to allow maximum flexibility, recognising that the number of new units will be subject to a range of design issues and constraints including building heights and car parking requirements.
- . **Community Uses** – TCH fully acknowledge the importance of the community uses on the estate and are committed to working in partnership with the relevant stakeholders to deliver improved community use provision. TCH would welcome a reference to retail, food and drink (café) and leisure uses within policy AL/RTW 15 to reflect the diverse range of uses which serve the community both now and in the future. TCH also support the desire within the policy to maintain the designated Village Green.
- . **Design and Layout** – the design of any future regeneration scheme will need to address a number of significant shortcomings in terms of the existing design of the estate. The policy should recognise the potential to reconfigure the design and layout of the estate to improve natural surveillance, public realm, landscaping and environmental credentials.
- . **Low Traffic Neighbourhood** – Point 2 of draft policy AL/RTW 15 notes that the design and layout of future development is to take the form of a Low Traffic Neighbourhood. Given that the design and layout of any redevelopment proposals will need to address a range of different aspects, including those noted in the bullet points above, it is considered that the reference to a Low Traffic Neighbourhood is deleted from the policy. Instead, the wording of the policy should focus on the requirement to provide safe and convenient access to modes of transport other than the private car, to encourage walking and cycling and promote active travel within a safe environment for existing and future residents. Furthermore, the Showfields Estate is primarily a residential area with very limited through traffic. Any future regeneration proposals are unlikely to change this and the requirement to introduce a Low Traffic Neighbourhood to reduce the impact of through-vehicular traffic on local streets is not considered necessary for the Showfields Estate.
- . **Contributions to mitigate impact of development** – Point 5 of the draft policy AL/RTW 15 states that ‘contributions are to be provided to mitigate the impact of the development in accordance with Policy STR/RTW 1’. Whilst TCH recognise the need for the Council to ensure that the impacts of development are mitigated, it is considered that Point 5 should acknowledge that any redevelopment at Showfields is likely to provide significant benefits for the estate and such benefits should be recognised and taken into account when considering developer contributions. The level of contributions sought should also take into account the requirement of the draft policy AL/RTW 15 to provide a level of affordable housing in accordance with draft policy H4 (Estate Regeneration).

TCH also make the following comments in respect of other policies in the draft plan:

- . Point 14 of draft policy STR/RTW 1 (The Strategy for Royal Tunbridge Wells) notes the strategic requirement to allocate land at Showfields and Rowan Tree Road for a new medical centre. The requirement for a new medical centre is also referenced in draft policy AL/RTW 15. TCH is concerned that the reference to provide a new medical centre as part of the regeneration proposals for Showfields is aspirational and that the specific requirements of potential operators has not been sought and there may not be an end user willing to operate a new medical practice in this location, which would impact on its delivery. This is of concern to TCH and TCH would urge the Council to consider this requirement in more detail.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Patricia Townend
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 3 The Strategy for Tudeley Village	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The construction of such a large built-up area on the margins of a very sensitive part of the Medway floodplain has no proper provision for the loss of permeable ground which will exacerbate the flooding problems along this stretch of the Medway, a problem which will only be increased as climate change affects flood risk in the UK.

The Tonbridge and Malling Borough Council have also objected to the siting of the development on the grounds that it will have an inordinate impact on facilities, road and rail capacity in Tonbridge Town, which is only two miles away.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Removal of the Tudeley Garden Village from the Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

5.91, 5.92, 5.93, 5.94

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

5.91 Existing vehicular access to the site is directly from the A26 Eridge Road to the south east corner of the site, close to the bend in the Eridge Road. The Spa Valley Railway Line is located south of the site, including a bridge that crosses the Eridge Road just south of the site access. The existing access from the site onto the Eridge Road is already dangerous with a steep slope onto a busy bend with restricted visibility. The proposed development will add considerably to the traffic using this access road and so will represent a much greater risk of accident.

There is no pedestrian footpath on the garden centre side of the Eridge Road and so the pedestrians from the houses on the development going into town will need to cross a busy road on a dangerous bend.

Therefore:

1) Traffic Safety and Hazard: Vehicle access point on A26 Eridge Road. Road Traffic Safety compromised due to additional vehicle movement volumes; with a traffic hazard as there is restricted line of sight (ref. also 5.94) Note: Existing access considered to be on apex of bend, not as defined above as 'close to the bend'. 2) Pedestrian Safety and hazard: No available pavement on the Common side of the A26 pedestrians will be crossing the A26 at a dangerous busy point

5.92 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location. What to date have been the compensatory improvements to the remaining Green Belt?

The 2019 Plan describes the site as being part of a Biodiversity Opportunity Area where any development should demonstrate net gains for nature and biodiversity. Reference was also made to the DEFRA "MAGIC" website which described the area as suitable as woodpasture and parkland. Both these descriptions have been removed from the current plan.

5.93 It lies adjacent to the Royal Tunbridge Wells Conservation Area and to Tunbridge Wells Common, which is a designated Local Wildlife Site. Part of the site is also covered by the Environment Agency's Flood Zone 3.

River Grom flooding Report 2017 (Currently Correct /Relevant unless structural changes have been made)– Ref pages 7-9 Extracts:(page 7 – 2.3 para 4)To the south and east of The Pantiles, much of the area has separate surface water and foul water drainage. The surface water sewers generally discharge to watercourses which ultimately flow into the River Grom.(Page 9 – 2.4.1 para 3).... There is a Combined Sewer Overflow (CSO) from the public combined sewer in the culverted section of the River Grom that allows the combined sewer in the Pantiles area of Tunbridge Wells to discharge into it if its capacity is exceeded.

The development is in a river valley. Under present conditions High Rocks Lane regularly floods at the point where it meets Hungershall Park (and where it is presumed the proposed "emergency exit" will be for the development). As a result the road is always in a poor condition with potholes that reappear quickly after frequent repairs. The road at this point is a blind bend with no footpath so

pedestrians and cyclists often veer across the roadway to avoid the potholes and create a real danger of accidents to oncoming vehicles. This situation will only get worse once a large area of the valley floor is concreted over as a result of the development.

It was recently noticed by local residents that the site currently suffers from a sewage problem. A large manhole cover had been dislodged and was surrounded by household waste which had obviously been forced out. It is hoped that this would be resolved as part of the development, especially as the River Grom is in close proximity and there is a seasonal flooding issue in that area, as referred to above in the 2017 flooding report.

5.94 *Development would need to be sensitively designed to respect the location in proximity to the Common, the conservation area, and the topography of the site. However, it constitutes a sustainable site on the edge of the town centre and could accommodate a mix of uses, to include the retention/expansion of the existing garden centre business and the introduction of some residential development within the site. However, Kent County Council, as the local highways authority, considers that the scale of development on the site may be limited due to the current access constraints. 108 Tunbridge Wells Borough Local Plan Regulation 19 Consultation Pre-Submission Local Plan Map 14 Site Layout Plan*

Policy AL/RTW 14 Land at Tunbridge Wells Garden Centre This site, as defined on the Royal Tunbridge Wells Policies Map, is allocated for the expansion of the existing Use Class E (a) commercial use (garden centre) with an element of residential of approximately 25-30 residential dwellings, of which 30 percent shall be affordable housing. Development on the site shall accord with the following requirements:

1. *Means of access, including secondary and emergency means of access, to be informed by a transport statement; it is likely that the scale of any development may be limited by the quality of access arrangements that can be achieved within the confines of the site. An emergency access is likely to be required to the north;*

Planning consents often require provision of social/affordable housing under Section 106 Agreements, but invariably the developer comes back to the local authority later and pleads that it renders the scheme unviable. The 30% (eg) then falls away to 10% or less. The infrastructure requirements on this site will render development especially expensive. The contribution this site could make to meeting housing need is negligible.

Previous planning for access - Refused(89/02011/FUL | New vehicular access. New gate and 1.8m high chain link boundary fence | Wyevale Garden Centre Eridge Road Royal Tunbridge Wells Kent TN4 8HP (midkent.gov.uk)) Ref. No: 89/02011/FUL | Received: Tue 07 Nov 1989 | Validated: Thu 14 Jun 1990 | Status: Decided Council Letter 1990 - Extracts detailing the Refusal reasons:1 a) The proposed access would be likely to create unacceptable additional hazard to traffic.2 a) The sight lines are inadequate and would create unacceptable additional hazards to traffic3 a) The proposal would be undesirable in an area which is predominately rural in character, and would be detrimental both to the appearance and to the rural amenities of the locality.4 a) The proposal would be likely to be unacceptably detrimental to residential amenities of adjacent dwellings

The only change since 1990 is higher volumes of traffic on High Rocks Lane and Hungershall Park.

No known local precedents have been set for a requirement of a secondary and/or an emergency access. Example: The existing adjacent large estate has no secondary or emergency access.

Access: The suggested 'North' secondary and emergency access point will:

- . Destroy a Bio Diverse habitat, impacting the natural rural dynamic .
 - . By default the access point becomes a tacit 'extra access' immediately opening onto High Rocks Lane with hazardous restricted/limited line of sight which is onto a speed de-restricted area and is a width constricted lane, plus opposite another lane entrance point; as highlighted in the council's planning permission access refusal 1990.
 - . There is a high probability for this access to become a local shortcut
- Proposing a Secondary and Emergency access appears to be a leverage argument to open up the site with another access point thereby ignoring the hazards identified, refer to previous valid refusal rational.

There is a high probability for dangerous additional 'on road parking' at the lower end of Hungershall Park/ corner of High Rocks lane/ Cabbage Stalk Lane. The proposed new developments at Spratsbrook

Farm and the old Plant & Tools Hire site by The West Station which is to have access directly on to Eridge Road, will both increase traffic flows along this busy stretch and force drivers to find alternative routes.

Newts and a variety of amphibian wildlife have been seen in the site North aspect / River Grom area of this location.

In traffic management terms an emergency exit would require either traffic light control, or a roundabout (taking up additional land) further eroding the natural character of the area.² *The provision of pedestrian and cycle access to the north and improved pedestrian and cycle access into the town;*

If the access point is allowed to the north, then the suggested access is onto a hazardous speed de-restricted and width restricted lane. This was one of the reasons the previous planning for access was refused.

This would also create a safety hazard for pedestrians as there is no pavement from the suggested access secondary/emergency point towards Cabbage Stalk Lane.

3. Adequate servicing and parking to serve the expanded commercial use on the site;

4. Provision of a green route through the site from east to west connecting to existing Public Rights of Way on Tunbridge Wells Common and Cabbage Stalk Lane; Site East West access – Cabbage Stalk Lane will cause additional volume of use. This poses the following problems: 1) Compromise to safety and hazard as now a designated cycle path. Several near misses have already occurred with current multi-use volumes; as the majority of cyclists appear to disregard this lane as being a shared facility with pedestrians, pedestrians and dog walkers, plus vehicular access traffic.

2) Cyclists coming out of the new development will generally turn right into Cabbage Stalk Lane, adding to the volumes of cyclists using that lane. Furthermore, this will surely add to the number of cyclists on the Common who increasingly seem to be ignoring the “no cycling” rule there.

3) For those who might turn left into High Rocks Lane, this would add to the number of cyclists on this narrow lane with blind corners and numerous potholes - adding yet further risk to themselves, pedestrians and cars.

4) This is likely to further increase the volume of cyclists coming down the hill in Hungershall Park and towards the proposed development. Residents are increasingly concerned about the number of cyclists coming around the corner at very high speed and oblivious to the blind entrance several drives. There have been near misses recently and including one cyclist who recently came off his bike near the entrance to the drive at no. 12 Hungershall.

5. Development shall be located on the areas identified for mixed use on the site layout plan; Tunbridge Wells Borough Local Plan 109 Pre-Submission Local Plan Regulation 19 Consultation

6. Green infrastructure shall be provided on the areas shown indicatively in green on the site layout plan, and these shall be retained and enhanced. This shall include suitable buffering and enhancements to the River Grom corridor and to the setting of the adjacent Tunbridge Wells and Rusthall Common; The plan shows a green space buffer running alongside Cabbage Stalk Lane. The current woodland buffer is substantial and therefore the developer is likely to bulldoze and excavate as much as is feasible subject to ground stability and the preservation of valuable and species trees etc. The trees provide cover and privacy for wildlife and seclusion for walkers and local residents but are not in themselves wonderful specimens but are nevertheless very important to the semi rural nature of the area. The retention of as much tree cover as possible is very important.

The River Grom flows along the Southern boundary of the plot alongside the railway line. The woodland and the river provide a habitat for deer and other wild animals. It would be desirable if the western end of the plot be preserved for wildlife, not be built upon and not used for vehicular access.⁷ *Regard will be given to existing hedgerows and mature trees on-site, with the layout and design of the development protecting those of most amenity value, as informed by an arboricultural survey and a landscape and visual impact assessment;*

The development will inevitably destroy and erode an established valuable bio-diverse habitat in a unique rural area.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The proposed development adjoins our property so we will be directly and adversely affected by the development

Policy AL/HA 4 Land off Copthall Avenue and Highgate Hill

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I wish to record my comments on the proposals for sites for housing in Hawkhurst as contained in your Pre-Submission Local Plan, in particular that contained in Policy AL/HA 4 Land at Copthall Avenue and Highgate Hill, Hawkhurst (Highgate) and Policy AL/HA 5 Land to the north of Birchfield Grove (medical centre).

Regarding Policy AL/HA-4, the recent dismissal of the Planning Application by the TWBC Planning Committee for the reasons stated show ample cause as to why this site should not be considered for development. In addition, I would state that the potential for traffic accidents at the point of entry on to Highgate Hill, both from traffic coming at speed down the Hill and with traffic attempting to cross into what is very often a static line of traffic waiting at the traffic-lights on the "Up" section are further reasons for turning this site down. The matter of access to the shopping centre at Highgate by pedestrian or cycle means is, in my opinion, a non-starter due to the steep hill, any resident in development on this site is going to use their car. This, in its turn, will contribute to the severe pollution already arising from traffic using Highgate. The Inspector, on dismissing the appeal for a development site in Heartenoak Road - Appeal Ref: APP/M2270/W/20/3247397 – gave ample reasons why that development should not proceed: I consider the same reasons apply with equal force against this site being approved for housing development.

Concerning Policy/HA-5, my only comment is that this site should be for the Medical Centre **only**, with neither any housing attached nor any provision made for a feeder road leading off site to any potential future development in Fowlers Park fields.

I would like these comments to be added to those you may have already received on this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Paddock Wood for over 30 years. In that time there have been new housing developments, not one of which has added to the cultural life and community of Paddock Wood, other than the Green Lane playing field with its mostly locked changing building. No new allotments have been provided, no dedicated cycle lanes, no park with interesting and imaginative plantings. No cultural hub such as art gallery, theatre or any kind of public art. In that time on street parking has become a real issue everywhere, and the traffic has become a real problem. Locally the bookshop and toyshop closed down years ago, and the so-called high street has empty buildings and an inordinate number of charity shops.

House prices are so high that local young people cannot afford them. The increase in the number of cars now parking at each house are a sign of the number of adult children now having to stay with their parents, but the housing was not planned to accommodate 3 and 4 cars per house. You can't stop people having their cars, as there is no feasible way of travelling without a car. Tunbridge Wells is not very accessible by train, and the buses are infrequent, very expensive, and don't run after 5 pm. The bus stops are far away from the majority of the housing in Paddock Wood. There is no way that a resident of Paddock Wood can participate in any evening (i.e. cultural) activity in Tunbridge Wells using public transport. Tonbridge is accessible by train, but there are few buses from the rest of the town to the station. – there is no joined up transport policy.

So we see a dormitory town, where most people work away from the town, travelling by car, and there is little in the town to engender a sense of community. Your plan consigns Paddock Wood to being no more than a town with some railway history – yet celebrates Tunbridge Wells as a tourist attraction and cultural hotspot. This attitude is so negative and fails to show any vision of sharing the cultural attributes of the area so everywhere becomes somewhere with a feature of which it can be proud. Yet the plan dumps the majority of the housing on Paddock Wood, with nothing to compensate. Just a very much larger dormitory town with no real centre or civic amenities.

The newest developments have no corner shops – no community halls or places for residents to meet. People have to drive to get to the local shops – the distances are greater than most people have time for by walking, and there is no safe cycle route.

This comment now focuses on STR/SS1.

I do not believe this is the right place to build the number of homes proposed.

The land is in a flood plain. The number of new homes is so vast as to increase the size of the town by a factor of 3. I see no evidence in the plan that flooding and drought issues, or local shops and local places for people to meet have been addressed. The plan state that there are likely to be flooding issues in the wet months (it is a floodplain) – and water supply issues in the dry months. Where is the plan to collect the excess water in the wet months and use it in the dry months? There need to be reservoirs, which would add habitat for water birds and wildlife. Note that the new estate off Green

Lane in Paddock Wood has tarmac driveways, causing more water runoff. Why were these not made water permeable? It is evidence that no real effort is being made to address the local flooding and water collection issues.

The transport issues are huge. The roads are poor. The B2017 is narrow, poorly maintained, and a nightmare when there are cyclists. The A228 similarly has no space to overtake cyclists, and is far too narrow for the type of traffic that it takes. Yet this is the road that everyone will have to use to access Paddock Wood, Tunbridge Wells or Tonbridge. So there is not sufficient infrastructure.

There is a nationwide shortage of GPs. How is there to be sufficient medical provision or dental provision for the increased population? I do not believe there is the capacity to serve the health needs of the increased population.

There is a site in Tunbridge Wells that has been an eyesore for decades – the old cinema site. Use that first for housing before moving onto Green Belt, unspoilt land in an area with no facilities and transport.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Reduce the number of houses, and aim to use brownfield sites elsewhere as much as possible.

Provide transport infrastructure in advance of the building, so people have real alternatives to car use.

Make dedicated cycle lanes all over the existing Paddock Wood town and on B2017, A228 and all other roads so cycling is a safe alternative. Cycles and pedestrians don't mix; cycles and cars don't mix.

Have a joined-up transport policy with cheap buses (as in London), through tickets on bus and train, buses that run near to people's homes to a hub where regular, frequent and useful bus and train service connect so people can access Tonbridge, Tunbridge Wells, and other local towns and villages throughout the day and evening, every day and evening.

Deal with flooding issues by collecting floodwater in wet months for use in dry times. Insist that parking surfaces are water permeable to replenish the groundwater and avoid water running into the overwhelmed drainage system.

Provide allotments for the houses - the pandemic and Brexit has shown that we need to have the opportunity to grow plants for better mental health and also produce our own low-carbon vegetables.

Provide more attractive green spaces - interesting plantings, imaginative landscaping using drought tolerant plants. Give residents ideas for how they can plant their gardens for less water use and sustainability for wildlife and pollinators.

Address the lack of meaningful cultural and sustainable living opportunities in Paddock Wood and Capel. Local theatre, small cinema, art gallery, craft workshops, repair facilities, no-waste shops. Community halls and gardens available in each housing area for use by the community - for birthday parties, yoga, music making, support services such as Sure Start, hearing aid services - whatever the community needs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have already explained my association since 1989 with Paddock Wood in my comment on STR/SS1.

As in the previous comment, there are too many homes added here.

Paddock Wood does not have the capacity to absorb the size of the suggested development, and have any sense of community. The proposed new hall on the Memorial Field, which was needed **before** the new houses were/are built, will not be sufficient for the people coming with the vast number of new homes. The road system is not suited to take the number of new journeys - the environment will suffer from more air pollution, more noise, congestion, carbon used up waiting in traffic queues.

The policy suggests two more forms added to Mascalls School. I live in Siskin Gardens, and getting out onto Mascalls Court Road at school end times is a disaster. The parked cars cause obstruction, as do the children crossing Mascalls Court Road without pause or supervision, so no traffic can flow in either direction. An extra two forms will hugely increase this parking nuisance - where do you envisage the parents parking? They already use Linnet Avenues, Mascalls Court Road, Putlands Sports Centre, and there is no more space. It is no good saying they shouldn't do it - they do, because there is no alternative under the expensive and discriminatory school bus policies and the lack of safe cycle routes. No one can expect a child to walk 3 miles along a main road with no pavement, yet this is what the school bus policy expects. Parents will use their cars - so you need to change the bus policy and provide proper school buses to where people live. We need safe, dedicated cycle routes, separate from all other traffic. We need a proper joined-up transport policy.

I do not think it is sufficient merely to 'seek' developer contributions to infrastructure. This should be mandatory. Without the necessary infrastructure the town is unviable. Residents, old and new, should not suffer while developers make unseemly profits out of degrading the environment for the people, who seem to have so little say in any of this.

The cycle routes proposed do not seem helpful at all, nor do they seem to be dedicated. If I want to cycle to Tonbridge, I need to cycle along the B2017. I need a dedicated cycle route all the way from my home to Tonbridge, along the most direct route. We need sustainable active transport, not a half-hearted attempt that will not make it possible for even those keen to try. It is the hesitant and cautious who you need to get out of their cars - not those who are already cycling enthusiasts in their lycra who can cope with lorries passing within a whisker of their vulnerable bodies. You need to enable people who are visiting their friends in Tonbridge for a cup of tea, or popping to the shops or the doctors, wearing normal clothes, to feel able to cycle.

The number of new homes will surely require a new primary school. That is not mentioned.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I wish to formally register my objection to the proposals to permanently , or even temporarily close Hartlake Road as a solution to concerns about increased traffic from the new developments. Hartlake Road has a major bridge over the river for one , and two the road closure would create a major congestion of roads from Hadlow, east Peckham and the whole surrounding area . It's an old historic road , and a relief road for Tonbridge due to the bridging point.

This is not a viable option.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

A. SUMMARY AND CONCLUSIONS

1. This document has been prepared in response to the publication of the Pre-Submission Local Plan for Tunbridge Wells ("the draft Local Plan") in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012.
2. This representation has been prepared by DLBP Ltd on behalf of Mr and Mrs Tucker, residents of Bayford House, Sandhurst, and relates primarily to the land at Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent TN18 5HR ("the site"). It also relates to the Council's overall strategy for Sandhurst. In relation to these matters, Mr and Mrs Tucker formally object to the draft Local Plan.
3. The site (1.54 hectares) is proposed to be allocated for residential development within Royal Tunbridge Wells Council's ("the Council") draft Local Plan for 10-15 dwellings (draft Local Plan ref. AL/SA2).

4. The draft Local Plan proposes new residential development in Sandhurst, including at the site, and in the surrounding area. The Council's own evidence confirms that Sandhurst is not a sustainable location for growth, it has poor services and facilities and development in it and the surrounding area will lead to a high risk of a significant and adverse impact on air quality.

5. The proposed allocation at AL/SA2 does not have regard to the Council's own decision on planning application 19/01493/OUT. This development was for up to 16 units on the site, and so a scale that is comparable to the proposed allocation (and a reduction from the 31 units assessed). However, the Council's Planning Committee expressed specific concerns regarding the impact of such a development on the High Weald Area of Outstanding Natural Beauty (AONB) and designated heritage assets. The planning application was refused on these grounds in February 2021, with the Planning Committee determining that the scheme of 16 units would not constitute sustainable development.

6. On this basis, the draft Local Plan is unsound as it has not been positively prepared, will not be effective, is not justified and is inconsistent with national policy.

7. Modifications are required to the Local Plan to make it sound. In relation to 'Policy PSTR/SA 1 The Strategy for Sandhurst parish', the following changes should be made to points 1 and 2 (of the draft policy):

1. Set Limits to Built Development for Sandhurst village, as defined on the Policies Map (Inset Map 31) as a framework for new development over the plan period, incorporating the allocation Policies AL/SA 1 and AL/SA 2 into the Sandhurst Limits to Built Development;

2. Build approximately 20-30 new dwellings (including 40 percent affordable housing) on two sites at Sandhurst village, as allocated under Policies AL/SA 1 and AL/SA 2;

8. In relation to the Policies Map, the LBD boundary should not be extended to include sites AL/SA 1 and AL/SA 2.

9. 'Policy AL/SA 2 Sharps Hill Farm, Queen Street' and its supporting text should be deleted in its entirety.

B. INTRODUCTION

10. This document has been prepared in response to the publication of the Pre-Submission Local Plan for Tunbridge Wells ("the draft Local Plan") in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

11. This representation has been prepared by DLBP Ltd on behalf of Mr and Mrs Tucker, residents of Bayford House, Sandhurst, and relates primarily to the land at Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent TN18 5HR ("the site"). It also relates to the Council's overall strategy for Sandhurst.

12. The site (1.54 hectares) is proposed to be allocated for residential development within Royal Tunbridge Well Council's ("the Council") draft Local Plan for 10-15 dwellings (draft Local Plan ref. AL/SA2).

The site

13. The site fronts onto Queen Street and is 1.54 hectares in size. The site currently consists of a residential property, its curtilage and multiple outbuildings. To both the east and south of the residential curtilage the site is greenfield, featuring the natural features of a stream and pond to the north east corner.

14. The site is located next to approximately eight residential dwellings on Stream Pit Lane to the east - all of which are one storey bungalows - and a property to the west. To the north, south and west the landscape is open green space.

15. The site is located within the High Weald Area of Outstanding Natural Beauty (AONB), adjacent to a Conservation Area (Sandhurst), Listed building (Bayford House) and non-designated heritage asset (Sharps Hill Oast).

16. The site has a strong bucolic character, a character that is distinctly different from the residential development to the east of the site.

Planning history

17. A planning application ref 19/01493/OUT was made to the Council in June 2019. The application as originally made was for the development of the site for 31 dwellings. During the course of the application, the scale of the development was reduced to 16 dwellings. The Council's Planning Committee on 3 February 2021 refused to grant planning permission on the basis of the following reason:

- . The proposed development would not constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon nearby designated heritage assets. The benefits of the proposal would not outweigh this harm and therefore the proposed development is contrary to Paragraphs 8, 11, 130, 172, 193, 194 and 196 of the National Planning Policy Framework, the provisions of the National Planning Policy Guidance, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy June 2010 and Policies LBD1, EN1, EN5 and EN25 of the Tunbridge Wells Borough Local Plan 2006.

18. No appeal against the Council's refusal of the application has been lodged.

C. THE SPATIAL STRATEGY FOR SANDHURST AND POLICY PSTR/SA 1

19. There are a number of reasons that render Sandhurst an unsustainable location for the levels of new development set out in the draft Local Plan. It is of note that within the settlement hierarchy set out in the Council's current Core Strategy, Sandhurst is designated as a 'village' and sits at the bottom of the hierarchy.

20. The Strategic Housing and Economic Land Availability Assessment for the Pre-Submission Local Plan (SHELAA, January 2021) assessed the suitability of sites put forward for development in the Sandhurst Parish. Nine sites were in Sandhurst itself, and only two of these were deemed to be 'suitable for Local Plan allocation'.

21. The accompanying 'Site Assessment Sheets for Sandhurst Parish' sets out a more detailed assessment of the sites. It is noted that three main sites for development were considered, these being:

- . Site Reference DPC-12 (Local Plan Allocation AL/SA2) at Sharps Hill Farm, Queen Street, Sandhurst with a potential development yield of 15 units;
- . Site Reference 320 Land at Old Well House, Rye Road, Sandhurst with a potential development yield of 31 units; and
- . Site Reference 149 (includes Local Plan Allocation AL/SA 1 (part site)) overlap with site submission 227 at Land on the south side of Sayville, Rye Road and west of Marsh Quarter Lane, Sandhurst with a potential yield of 64 units (or 15 units on smaller site).

22. In all three cases, the sustainability assessment notes that the sites are:

...let down by poor services, facilities and travel options in this rural settlement...

23. This overarching issue of the suitability of Sandhurst for development is noted in the draft Local Plan itself. 'The Strategy for Sandhurst Parish' is outlined within Policy PSTR/SA 1. Paragraph 5.757 notes that (emphasis added):

*Sandhurst village is located approximately 2.9 miles from Hawkhurst to the north west and approximately 3.6 miles from Benenden to the north. Northiam, in the neighbouring district of Rother, is approximately 4.1 miles away to the south east. **The nearest rail stations are at Etchingham, approximately eight miles away and Staplehurst, approximately 11 miles from Sandhurst.** There are bus services that currently run to Hawkhurst, Maidstone, and Royal Tunbridge Wells, which all run more frequently on weekdays Monday-Friday. **There are currently no bus services running at peak times.***

24. As set out in the SHELAA Site Assessment, this makes clear that:

- . the two closest train stations are eight and 11 miles away;
- . but there are no direct buses to these; and
- . there are currently no bus services running at peak times, which are the most important times for encouraging sustainable modes of travel and a modal shift away from travel by private car.

25. The above not only renders Sandhurst an unsuitable location for new development, but as a consequence of the limited travel options and poor connectivity there would be major adverse impact on air quality. The Site Assessment Sheets for Sandhurst Parish goes on to set out for the three sites referred to above that the poor services, facilities and travel options would result in "subsequent effects...on the air quality objective".

26. The Council's 'Air Quality Topic Paper for Pre-Submission Local Plan' notes that the Council intends to declare an Air Quality Management Area (AQMA) to the north of Hawkhurst crossroads because of an existing Nitrogen Dioxide (NO₂) issue.

27. Table 4 of the Air Quality Paper sets out the maximum number of daily car trips to ensure impacts would be no worse than 'Moderate Adverse', where any number higher than this would be unacceptable. For 2027 the number of 'unacceptable' trips is 2001 (based on Table 4). Table 5 of the Air Quality Report states that the maximum number of dwellings to ensure impacts would be no worse than moderate adverse by 2027 would be 400. Paragraph 4.41 of the Air Quality Topic Paper states that (emphasis added):

*The Pre-Submission Local Plan proposes that a maximum of 170 new dwellings are built within Hawkhurst during the plan period of 2020-2038 which equates to 850 daily vehicle trips per annum (170 multiplied by 5 in accordance with paragraph 3.42). Furthermore, when factoring in the proposals in neighbouring Cranbrook (maximum of 429) and Sandhurst (maximum of 30), **the total number of new dwellings becomes 629 which equates to 3,145 daily vehicle trips per annum.***

28. Thus, the scale of development planned for this part of the district, including in Sandhurst, would lead to a daily number of trips some 57% higher than the level deemed to cause an unacceptable impact on air quality.

29. Paragraphs 3.42 and 3.43 of the Air Quality Paper sets out that the Council's strategy to deal with this is, in effect:

- . note that not all vehicle movements generated by the new development will pass through the AQMA, and so the overall impacts will be less than the maximum worst case scenario. Whilst it is likely to be the case that not all vehicle movements will pass through the AQMA, there is no quantitative analysis as to what the difference will be so as to ensure that the 'unacceptable' levels are not breached; and
- . note that not all of the planned level development will have been constructed by 2027.

30. Paragraph 5.760 of the draft Local Plan sets out that:

*At Hawkhurst, exceedances of the Annual Mean Objective for Nitrogen Dioxide (NO₂) have been identified in Cranbrook Road (the A229), to the north of the crossroads, close to the traffic lights and going down the hill for approximately 150m. The Council is declaring an Air Quality Management Area (AQMA) to the north of Hawkhurst crossroads because of this. **Proposals for 'Major' development (10 plus dwellings or new floorspace of more than 1,000sqm) within Sandhurst parish may exceed a threshold of additional vehicular movements through the Hawkhurst crossroads, which could affect air quality.** This will therefore be a consideration in the determination of any future planning applications in Sandhurst parish.*

31. The Council's approach is to allocate development in an area where it knows there is a real and tangible risk that there will be harmful and unacceptable air quality impacts. Its strategy to deal with this is to, in effect, hope that not all vehicle movements created by new development pass through the AQMA and expect that not all development will be delivered in a timely manner. However, with respect to the first point, there is no imperial evidence to support the Council's hope; and with respect to the latter, there are no time limit or other restrictions in the site allocations that would prevent planning permission being granted and all being built out by 2027.

32. Figure 1 of the Air Quality Topic paper indicates the air quality monitoring stations in the district, and is reproduced below:

[TWBC: for map, please see full representation attached as a supporting document]

33. What is of note here is that for the entire eastern half of the District there is only one air quality monitoring station, this being at the Hawkhurst crossroads. Given this, it is clear that this area, including Sandhurst, is not suitable for such a scale of new residential development due to the potential air quality impacts where almost the entire rest of the eastern part of the District does not have such a constraint.

34. In regards to local amenity within the Parish of Sandhurst, it is outlined within paragraph 5.766 of the Pre-Submission Local Plan that the Infrastructure Delivery Plan (IDP) (2021) shows that there is a deficiency in primary education provision, health and medical provision, library provision, youth play space provision, and allotments. It is also outlined that drainage improvements are needed and football

pitches are in short supply. This strongly suggests that Sandhurst is not well enough equipped in terms of local amenities and services, to provide for new residents.

35. This is further highlighted within the Sustainability Appraisal of the Pre-Submission Local Plan (2021) of which classes the sustainability objectives of transport, services and facilities, all as 'negative' for Sandhurst (as shown in Table 70).

36. It is also shown within Table 70 of the Sustainability Appraisal, that the sustainability objectives of air, heritage, land use and landscape are not met in the Parish of Sandhurst, as these are all classed as 'slightly negative'.

37. It should be further noted that the Sustainability Appraisal for Sandhurst returned no 'positive' or 'very positive' results in terms of the sustainability objectives. These results suggest that development in this parish at this time, would be very unsustainable.

D. ASSESSMENT OF PROPOSED ALLOCATION OF SITE AL/SA2 AND THE POLICIES MAP

High Weald Area of Outstanding Natural Beauty (AONB)

38. Site AL/ SA2 is located within the High Weald Area of Outstanding Natural Beauty (AONB). Core Policy EN21 of the Tunbridge Wells Core Strategy (2010) and the High Weald AONB Management Plan (2019-2024) seek to enhance and conserve the natural beauty of the AONB.

39. Policy EN21 of the draft Local Plan cites Paragraph 172 of the Framework concerning major development in AONBs:

Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues... The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.

40. The SHELAA Site Assessment states that development on the site (AL/SA2) would cause "slight negative" impact on the surrounding area, particularly the AONB. It then asserts that this could be overcome through design.

41. Although not clearly set out, this is presumably based on the findings of the 'Tunbridge Wells - Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB' (November 2020). This document assessed 21 sites within the AONB, including the Sharps Hill Farm site (referred to as DPC12). The assessment was based on the scale of the development being 30 units. The report concludes at paragraph 6.10.7.1 that:

The quantum of development initially assessed for the site is likely to give rise to adverse effects on the settlement pattern of Sandhurst and consequently the AONB. It is likely that a sensitively designed scheme with reduced numbers and retained features to the north and east, would reduce the predicted adverse effects. If the site is put forward as an allocation within the regulation 19 draft plan, it should set out the expectation for a design that responds positively to its location on the edge of settlement and the existing, well treed character of the site.

42. It is in part on the basis of this evidence that the site is proposed to be allocated in the draft Local Plan for up to 15 dwellings.

43. However, the analysis of the landscape assessment on the AONB has been overtaken by events, as it is not consistent with the Council's own decision on planning application 19/01493/OUT. This development was for up to 16 units, and so a scale that is comparable to the proposed allocation (and a reduction from the 30 units assessed). However, the Council's Planning Committee expressed specific concerns regarding the impact of such a development on the AONB.

44. This is a significant and material consideration. It effectively concludes that the development of this site cannot take place even with 'sensitive design' because such a proposal has already been considered and rejected. This is not a case of conjecture or supposition. The Council already has the detailed evidence on this in the form of the documents provided for planning application 19/01493/OUT, including the assessment on the AONB, and the decision of its own Planning Committee, the primary decision making body in the Council with respect to planning matters.

Heritage

45. Development on the site will result in the settlement encroaching on the setting of the heritage assets, replacing the current rural setting of Bayford House and Sharps Hill Oast with residential development, thereby impacting on the significance of their setting. In particular, the development would result in a domestication of the use of the site that is at odds with its original purposes, resulting in highly intense residential use with associated noise, lighting and activity. This activity will have an adverse impact on the rural and quiet significance of the setting of the Bayford House, and whilst we concur this is in the less than substantial category, in our view it is at the higher end of this scale.

46. The heritage significance of Bayford House and the associated Sharps Hill Oast relate to the rural agricultural setting of the settlement, set away from the village.

47. As noted above, the planning application on this site was for up to 16 units and has been subject to a detailed and thorough examination of the heritage impacts. The Conservation Officer's consultation response to the recent application objected to development in this area due to concerns over the impact on surrounding heritage assets. It is therefore unclear, as to how the new site allocation differs from the proposal, so as to not significantly impact upon the surrounding heritage assets.

48. Therefore, as described above, development on the site will result in less than substantial harm to the the grade II listed Bayford House, the Sharps Hill Oast non-designated heritage asset, and the Conservation Area of Sandhurst.

49. The site is also adjacent to the Conservation Area of Sandhurst. The conservation area includes the historic settlement of Sandhurst which has developed in a linear fashion along Queen Street. It is noted that the Conservation Area has lost some of its historic character over time, particularly due to housing development at the western edge of the settlement, south of Queen Street.

50. This allocation will therefore, further exacerbate the loss of historic character of the settlement as the proposed layout does not reflect the linear development patterns of the village, and will extend residential development into the existing rural context of the Conservation Area.

51. As with the AONB, the Council's Planning Committee considered a proposal to develop the site, with the scale of development comparable to that suggested in the draft Local Plan allocation. The Council's Planning Committee had the benefit of the technical and supporting documents provided with that application, as well as the advice of its key statutory consultees, the Conservation Officer. The decision of the Planning Committee was to reject the development on this site on the basis of harm to heritage assets. It is axiomatic that the site cannot be allocated for development in the draft Local Plan as it will cause harm to heritage assets, with case law confirming that great weight should be afforded to their preservation and setting out a presumption against development that causes harm.

Policies Map (Inset 31)

52. This indicates that the Limits to Built Development (LBD) boundary will be extended to include proposed allocation at the site.

53. The evidence base document the 'Limits to Built Development Topic Paper for Pre- Submission Local Plan (February 2021) assesses the potential changes to the LBD boundaries. Table 1 is entitled the 'Criteria used to determine what should or should not be included within LBD boundaries'. Criteria (d) is:

have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance

54. With respect to the proposed allocation at the site, the LBD is indicated on the Policies Map as extending around this site. However, criteria (a) and (d) are listed as two of the supporting principles for this change. With respect to criteria (a), this requires that the the extension be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside. The development of the site would lead to a harmful encroachment into the countryside. With respect to the Council's assessment of criteria (d), this is clearly wrong - as already acknowledged by the Council, development on the site would lead to adverse impacts on the AONB and designated heritage assets, contrary to established planning policy.

55. Table 1 also sets out a list of criteria that should be assessed to exclude sites. Criteria VI is '*buildings in spacious grounds on the edge of the settlement*'. This describes the proposed allocation site. Paragraphs 1.01 and 1.02 of the Planning Committee report for the refused application describes the site as follows:

The application site consists of approximately 1.55 hectares and is located on the south side of Queen Street in the Sandhurst Parish of the Borough. The site comprises a detached dwelling known as Sharps Hill Farm, its residential curtilage and agricultural/paddock land that hosts two, relatively small, stable like structures. The agricultural/paddock land is currently divided and in use as private paddock land for the keeping of horses associated with the current owner of the dwelling. The site is largely grasses surfaced, other than small areas of hardstanding around the dwelling and stable structures. The land level slopes upwards from Queen Street towards the south of the site.

The boundaries of the site are marked largely by trees and hedging. A pond is located towards the north east corner of the site and there is a stream which runs along the east boundary of the site. The site is largely overgrown and unmaintained in parts particularly to the eastern boundary of the site where a relatively dense woodland area lies. Outside of this woodland there are a small number of trees within the site, otherwise the site is largely open in nature.

56. It is clear from this description that the site comprises a building in spacious grounds on the edge of the settlement and on the basis of the Council's own assessment criteria, should be excluded.

E. ASSESSMENT OF SOUNDNESS

57. The draft Local Plan is unsound in relation to the Council's strategy for development in Sandhurst and in its approach to the proposed allocation for Sharps Hill Farm, Queens Street, Sandhurst (AL/SA2) when assessed against the tests of soundness as set out in paragraph 182 of the National Planning Policy Framework.

Positively prepared

58. The draft Local Plan has not been positively prepared, particularly when the proposed allocation of the site AL/SA2 is looked at in the context of the previous planning application on the site for a comparable scale of development (as the allocation).

59. Planning application 19/01493/OUT for the '*residential development of up to 16 no. dwellings with associated parking, amenity and landscaping*', was rejected by the Council earlier this year, on the grounds that the location was unsuitable and "*would constitute unsustainable development*". This has not been addressed within the Local Plan site allocation, and the decision to reject the previous proposal, but encourage development within the Local Plan is evidence that the plan is not positively prepared. The plan must meet the objective needs in a sustainable way and the allocation of this site and wider development in Sandhurst would be contradictory to the principles of sustainable development.

Justified

60. The draft Local Plan is not justified as it is not clear what alternatives have been explored to avoid the identified air quality impacts that will occur with respect to the Hawkhurst AQMA.

Effective

61. The draft Local Plan is not effective as the plan does not take into account the significant potential environmental concerns connected to the development of land in an unsuitable area.

62. The draft Local Plan will not be effective as it is based on assumptions around when development will take place in Sandhurst and the wider area that, if wrong, would lead to a direct and significant impact on air quality in the AQMA.

Consistent with national planning policy

63. The development of this site conflicts with both the draft local policy document itself, and national policy.

64. The draft Local Plan's proposed allocation of development in Sandhurst and specifically at site AL/SA2 would be wholly inconsistent with national planning policy because:

- . the Council's own evidence and assessment of the sites considered for development in Sandhurst acknowledges that they are in an unsustainable location and are let down by poor services and facilities;
- . the draft Local Plan allocates land in Sandhurst and the surrounding area where there is a high risk of a significant and adverse impact on air quality; and
- . the development of the site will lead to specific AONB and heritage impacts which individually and collectively are significant and a level of harm that outweighs any benefits associated with housing delivery. The nature of the surrounding landscape is protected for valid reasons. The

location adjacent to heritage assets, a conservation area and within an AONB are all classed as assets or areas of particular importance. The Council has already reached this view on the planning application submitted on the site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

F. MODIFICATIONS TO THE PLAN

65. In order to address the issues identified in this representation and make the Local Plan sound, the following changes should be made.

66. In relation to 'Policy PSTR/SA 1 The Strategy for Sandhurst parish', the following changes should be made to points 1 and 2:

1. *Set Limits to Built Development for Sandhurst village, as defined on the Policies Map (Inset Map 31) as a framework for new development over the plan period, incorporating the allocation Policies AL/SA 1 and AL/SA 2 into the Sandhurst Limits to Built Development;*

2. *Build approximately 20-30 new dwellings (including 40 percent affordable housing) on two sites at Sandhurst village, as allocated under Policies AL/SA 1 and AL/SA 2;*

67. In relation to the Policies Map, the LBD boundary should not be extended to include sites AL/SA 1 and AL/SA 2.

68. 'Policy AL/SA 2 Sharps Hill Farm, Queen Street' and its supporting text should be deleted in its entirety.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To raise issues of soundness and discuss necessary modifications.

If you would like to attach a file in support of your comments, please upload it here.

PSLP 1908-1909 DLBP for Mr & Mrs
Tucker SI Representation

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mr & Mrs Tucker
Question 2	
Agent's Name and Organisation (if applicable)	Dominic Lawson Bespoke Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/SA 2 Sharps Hill Farm, Queen Street

Policies Map (Inset Map No(s)) 31

[TWBC: this representation has been input against Policies PSTR/SA 1 and AL/SA 2 - please see Comment Numbers PSLP_1908 and PSLP_1909]

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

A. SUMMARY AND CONCLUSIONS

1. This document has been prepared in response to the publication of the Pre-Submission Local Plan for Tunbridge Wells ("the draft Local Plan") in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

2. This representation has been prepared by DLBP Ltd on behalf of Mr and Mrs Tucker, residents of Bayford House, Sandhurst, and relates primarily to the land at Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent TN18 5HR ("the site"). It also relates to the Council's overall strategy for Sandhurst. In relation to these matters, Mr and Mrs Tucker formally object to the draft Local Plan.

3. The site (1.54 hectares) is proposed to be allocated for residential development within Royal Tunbridge Wells Council's ("the Council") draft Local Plan for 10-15 dwellings (draft Local Plan ref. AL/SA2).

4. The draft Local Plan proposes new residential development in Sandhurst, including at the site, and in the surrounding area. The Council's own evidence confirms that Sandhurst is not a sustainable location for growth, it has poor services and facilities and development in it and the surrounding area will lead to a high risk of a significant and adverse impact on air quality.

5. The proposed allocation at AL/SA2 does not have regard to the Council's own decision on planning application 19/01493/OUT. This development was for up to 16 units on the site, and so a scale that is comparable to the proposed allocation (and a reduction from the 31 units assessed). However, the Council's Planning Committee expressed specific concerns regarding the impact of such a development on the High Weald Area of Outstanding Natural Beauty (AONB) and designated heritage assets. The planning application was refused on these grounds in February 2021, with the Planning Committee determining that the scheme of 16 units would not constitute sustainable development.

6. On this basis, the draft Local Plan is unsound as it has not been positively prepared, will not be effective, is not justified and is inconsistent with national policy.

7. Modifications are required to the Local Plan to make it sound. In relation to 'Policy PSTR/SA 1 The Strategy for Sandhurst parish', the following changes should be made to points 1 and 2 (of the draft policy):

1. Set Limits to Built Development for Sandhurst village, as defined on the Policies Map (Inset Map 31) as a framework for new development over the plan period, incorporating the allocation Policies AL/SA 1 and AL/SA 2 into the Sandhurst Limits to Built Development;

2. Build approximately 20-30 new dwellings (including 40 percent affordable housing) on two sites at Sandhurst village, as allocated under Policies AL/SA 1 and AL/SA 2;

8. In relation to the Policies Map, the LBD boundary should not be extended to include sites AL/SA 1 and AL/SA 2.

9. 'Policy AL/SA 2 Sharps Hill Farm, Queen Street' and its supporting text should be deleted in its entirety.

B. INTRODUCTION

10. This document has been prepared in response to the publication of the Pre-Submission Local Plan for Tunbridge Wells ("the draft Local Plan") in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

11. This representation has been prepared by DLBP Ltd on behalf of Mr and Mrs Tucker, residents of Bayford House, Sandhurst, and relates primarily to the land at Sharps Hill Farm, Queen Street, Sandhurst, Cranbrook, Kent TN18 5HR ("the site"). It also relates to the Council's overall strategy for Sandhurst.

12. The site (1.54 hectares) is proposed to be allocated for residential development within Royal Tunbridge Well Council's ("the Council") draft Local Plan for 10-15 dwellings (draft Local Plan ref. AL/SA2).

The site

13. The site fronts onto Queen Street and is 1.54 hectares in size. The site currently consists of a residential property, its curtilage and multiple outbuildings. To both the east and south of the residential curtilage the site is greenfield, featuring the natural features of a stream and pond to the north east corner.

14. The site is located next to approximately eight residential dwellings on Stream Pit Lane to the east - all of which are one storey bungalows - and a property to the west. To the north, south and west the landscape is open green space.

15. The site is located within the High Weald Area of Outstanding Natural Beauty (AONB), adjacent to a Conservation Area (Sandhurst), Listed building (Bayford House) and non-designated heritage asset (Sharps Hill Oast).

16. The site has a strong bucolic character, a character that is distinctly different from the residential development to the east of the site.

Planning history

17. A planning application ref 19/01493/OUT was made to the Council in June 2019. The application as originally made was for the development of the site for 31 dwellings. During the course of the application, the scale of the development was reduced to 16 dwellings. The Council's Planning Committee on 3 February 2021 refused to grant planning permission on the basis of the following reason:

- . The proposed development would not constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon nearby designated heritage assets. The benefits of the proposal would not outweigh this harm and therefore the proposed development is contrary to Paragraphs 8, 11, 130, 172, 193, 194 and 196 of the National Planning Policy Framework, the provisions of the National Planning Policy Guidance, Core Policies 4 and 14 of the Tunbridge Wells Borough Core Strategy June 2010 and Policies LBD1, EN1, EN5 and EN25 of the Tunbridge Wells Borough Local Plan 2006.

18. No appeal against the Council's refusal of the application has been lodged.

C. THE SPATIAL STRATEGY FOR SANDHURST AND POLICY PSTR/SA 1

19. There are a number of reasons that render Sandhurst an unsustainable location for the levels of new development set out in the draft Local Plan. It is of note that within the settlement hierarchy set out in the Council's current Core Strategy, Sandhurst is designated as a 'village' and sits at the bottom of the hierarchy.

20. The Strategic Housing and Economic Land Availability Assessment for the Pre-Submission Local Plan (SHELAA, January 2021) assessed the suitability of sites put forward for development in the Sandhurst Parish. Nine sites were in Sandhurst itself, and only two of these were deemed to be 'suitable for Local Plan allocation'.

21. The accompanying 'Site Assessment Sheets for Sandhurst Parish' sets out a more detailed assessment of the sites. It is noted that three main sites for development were considered, these being:

- . Site Reference DPC-12 (Local Plan Allocation AL/SA2) at Sharps Hill Farm, Queen Street, Sandhurst with a potential development yield of 15 units;
- . Site Reference 320 Land at Old Well House, Rye Road, Sandhurst with a potential development yield of 31 units; and
- . Site Reference 149 (includes Local Plan Allocation AL/SA 1 (part site)) overlap with site submission 227 at Land on the south side of Sayville, Rye Road and west of Marsh Quarter Lane, Sandhurst with a potential yield of 64 units (or 15 units on smaller site).

22. In all three cases, the sustainability assessment notes that the sites are:

...let down by poor services, facilities and travel options in this rural settlement...

23. This overarching issue of the suitability of Sandhurst for development is noted in the draft Local Plan itself. 'The Strategy for Sandhurst Parish' is outlined within Policy PSTR/SA 1. Paragraph 5.757 notes that (emphasis added):

*Sandhurst village is located approximately 2.9 miles from Hawkhurst to the north west and approximately 3.6 miles from Benenden to the north. Northiam, in the neighbouring district of Rother, is approximately 4.1 miles away to the south east. **The nearest rail stations are at Etchingham, approximately eight miles away and Staplehurst, approximately 11 miles from Sandhurst.** There are bus services that currently run to Hawkhurst, Maidstone, and Royal Tunbridge Wells, which all run more frequently on weekdays Monday-Friday. **There are currently no bus services running at peak times.***

24. As set out in the SHELAA Site Assessment, this makes clear that:

- . the two closest train stations are eight and 11 miles away;
- . but there are no direct buses to these; and
- . there are currently no bus services running at peak times, which are the most important times for encouraging sustainable modes of travel and a modal shift away from travel by private car.

25. The above not only renders Sandhurst an unsuitable location for new development, but as a consequence of the limited travel options and poor connectivity there would be major adverse impact on air quality. The Site Assessment Sheets for Sandhurst Parish goes on to set out for the three sites referred to above that the poor services, facilities and travel options would result in "subsequent effects...on the air quality objective".

26. The Council's 'Air Quality Topic Paper for Pre-Submission Local Plan' notes that the Council intends to declare an Air Quality Management Area (AQMA) to the north of Hawkhurst crossroads because of an existing Nitrogen Dioxide (NO₂) issue.

27. Table 4 of the Air Quality Paper sets out the maximum number of daily car trips to ensure impacts would be no worse than 'Moderate Adverse', where any number higher than this would be unacceptable. For 2027 the number of 'unacceptable' trips is 2001 (based on Table 4). Table 5 of the Air Quality Report states that the maximum number of dwellings to ensure impacts would be no worse than moderate adverse by 2027 would be 400. Paragraph 4.41 of the Air Quality Topic Paper states that (emphasis added):

*The Pre-Submission Local Plan proposes that a maximum of 170 new dwellings are built within Hawkhurst during the plan period of 2020-2038 which equates to 850 daily vehicle trips per annum (170 multiplied by 5 in accordance with paragraph 3.42). Furthermore, when factoring in the proposals in neighbouring Cranbrook (maximum of 429) and Sandhurst (maximum of 30), **the total number of new dwellings becomes 629 which equates to 3,145 daily vehicle trips per annum.***

28. Thus, the scale of development planned for this part of the district, including in Sandhurst, would lead to a daily number of trips some 57% higher than the level deemed to cause an unacceptable impact on air quality.

29. Paragraphs 3.42 and 3.43 of the Air Quality Paper sets out that the Council's strategy to deal with this is, in effect:

- . note that not all vehicle movements generated by the new development will pass through the AQMA, and so the overall impacts will be less than the maximum worst case scenario. Whilst it is likely to be the case that not all vehicle movements will pass through the AQMA, there is no quantitative analysis as to what the difference will be so as to ensure that the 'unacceptable' levels are not breached; and
- . note that not all of the planned level development will have been constructed by 2027.

30. Paragraph 5.760 of the draft Local Plan sets out that:

*At Hawkhurst, exceedances of the Annual Mean Objective for Nitrogen Dioxide (NO₂) have been identified in Cranbrook Road (the A229), to the north of the crossroads, close to the traffic lights and going down the hill for approximately 150m. The Council is declaring an Air Quality Management Area (AQMA) to the north of Hawkhurst crossroads because of this. **Proposals for 'Major' development (10 plus dwellings or new floorspace of more than 1,000sqm) within Sandhurst parish may exceed a threshold of additional vehicular movements through the Hawkhurst crossroads, which could affect air quality.** This will therefore be a consideration in the determination of any future planning applications in Sandhurst parish.*

31. The Council's approach is to allocate development in an area where it knows there is a real and tangible risk that there will be harmful and unacceptable air quality impacts. Its strategy to deal with this is to, in effect, hope that not all vehicle movements created by new development pass through the AQMA and expect that not all development will be delivered in a timely manner. However, with respect to the first point, there is no imperial evidence to support the Council's hope; and with respect to the latter, there are no time limit or other restrictions in the site allocations that would prevent planning permission being granted and all being built out by 2027.

32. Figure 1 of the Air Quality Topic paper indicates the air quality monitoring stations in the district, and is reproduced below:

[TWBC: for map, please see full representation attached as a supporting document]

33. What is of note here is that for the entire eastern half of the District there is only one air quality monitoring station, this being at the Hawkhurst crossroads. Given this, it is clear that this area, including Sandhurst, is not suitable for such a scale of new residential development due to the potential air quality impacts where almost the entire rest of the eastern part of the District does not have such a constraint.

34. In regards to local amenity within the Parish of Sandhurst, it is outlined within paragraph 5.766 of the Pre-Submission Local Plan that the Infrastructure Delivery Plan (IDP) (2021) shows that there is a deficiency in primary education provision, health and medical provision, library provision, youth play space provision, and allotments. It is also outlined that drainage improvements are needed and football

pitches are in short supply. This strongly suggests that Sandhurst is not well enough equipped in terms of local amenities and services, to provide for new residents.

35. This is further highlighted within the Sustainability Appraisal of the Pre-Submission Local Plan (2021) of which classes the sustainability objectives of transport, services and facilities, all as 'negative' for Sandhurst (as shown in Table 70).

36. It is also shown within Table 70 of the Sustainability Appraisal, that the sustainability objectives of air, heritage, land use and landscape are not met in the Parish of Sandhurst, as these are all classed as 'slightly negative'.

37. It should be further noted that the Sustainability Appraisal for Sandhurst returned no 'positive' or 'very positive' results in terms of the sustainability objectives. These results suggest that development in this parish at this time, would be very unsustainable.

D. ASSESSMENT OF PROPOSED ALLOCATION OF SITE AL/SA2 AND THE POLICIES MAP

High Weald Area of Outstanding Natural Beauty (AONB)

38. Site AL/ SA2 is located within the High Weald Area of Outstanding Natural Beauty (AONB). Core Policy EN21 of the Tunbridge Wells Core Strategy (2010) and the High Weald AONB Management Plan (2019-2024) seek to enhance and conserve the natural beauty of the AONB.

39. Policy EN21 of the draft Local Plan cites Paragraph 172 of the Framework concerning major development in AONBs:

Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to these issues... The scale and extent of development within these designated areas should be limited. Planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.

40. The SHELAA Site Assessment states that development on the site (AL/SA2) would cause "slight negative" impact on the surrounding area, particularly the AONB. It then asserts that this could be overcome through design.

41. Although not clearly set out, this is presumably based on the findings of the 'Tunbridge Wells - Landscape and Visual Impact Assessment of Proposed Allocation Sites within the High Weald AONB' (November 2020). This document assessed 21 sites within the AONB, including the Sharps Hill Farm site (referred to as DPC12). The assessment was based on the scale of the development being 30 units. The report concludes at paragraph 6.10.7.1 that:

The quantum of development initially assessed for the site is likely to give rise to adverse effects on the settlement pattern of Sandhurst and consequently the AONB. It is likely that a sensitively designed scheme with reduced numbers and retained features to the north and east, would reduce the predicted adverse effects. If the site is put forward as an allocation within the regulation 19 draft plan, it should set out the expectation for a design that responds positively to its location on the edge of settlement and the existing, well treed character of the site.

42. It is in part on the basis of this evidence that the site is proposed to be allocated in the draft Local Plan for up to 15 dwellings.

43. However, the analysis of the landscape assessment on the AONB has been overtaken by events, as it is not consistent with the Council's own decision on planning application 19/01493/OUT. This development was for up to 16 units, and so a scale that is comparable to the proposed allocation (and a reduction from the 30 units assessed). However, the Council's Planning Committee expressed specific concerns regarding the impact of such a development on the AONB.

44. This is a significant and material consideration. It effectively concludes that the development of this site cannot take place even with 'sensitive design' because such a proposal has already been considered and rejected. This is not a case of conjecture or supposition. The Council already has the detailed evidence on this in the form of the documents provided for planning application 19/01493/OUT, including the assessment on the AONB, and the decision of its own Planning Committee, the primary decision making body in the Council with respect to planning matters.

Heritage

45. Development on the site will result in the settlement encroaching on the setting of the heritage assets, replacing the current rural setting of Bayford House and Sharps Hill Oast with residential development, thereby impacting on the significance of their setting. In particular, the development would result in a domestication of the use of the site that is at odds with its original purposes, resulting in highly intense residential use with associated noise, lighting and activity. This activity will have an adverse impact on the rural and quiet significance of the setting of the Bayford House, and whilst we concur this is in the less than substantial category, in our view it is at the higher end of this scale.

46. The heritage significance of Bayford House and the associated Sharps Hill Oast relate to the rural agricultural setting of the settlement, set away from the village.

47. As noted above, the planning application on this site was for up to 16 units and has been subject to a detailed and thorough examination of the heritage impacts. The Conservation Officer's consultation response to the recent application objected to development in this area due to concerns over the impact on surrounding heritage assets. It is therefore unclear, as to how the new site allocation differs from the proposal, so as to not significantly impact upon the surrounding heritage assets.

48. Therefore, as described above, development on the site will result in less than substantial harm to the the grade II listed Bayford House, the Sharps Hill Oast non-designated heritage asset, and the Conservation Area of Sandhurst.

49. The site is also adjacent to the Conservation Area of Sandhurst. The conservation area includes the historic settlement of Sandhurst which has developed in a linear fashion along Queen Street. It is noted that the Conservation Area has lost some of its historic character over time, particularly due to housing development at the western edge of the settlement, south of Queen Street.

50. This allocation will therefore, further exacerbate the loss of historic character of the settlement as the proposed layout does not reflect the linear development patterns of the village, and will extend residential development into the existing rural context of the Conservation Area.

51. As with the AONB, the Council's Planning Committee considered a proposal to develop the site, with the scale of development comparable to that suggested in the draft Local Plan allocation. The Council's Planning Committee had the benefit of the technical and supporting documents provided with that application, as well as the advice of its key statutory consultees, the Conservation Officer. The decision of the Planning Committee was to reject the development on this site on the basis of harm to heritage assets. It is axiomatic that the site cannot be allocated for development in the draft Local Plan as it will cause harm to heritage assets, with case law confirming that great weight should be afforded to their preservation and setting out a presumption against development that causes harm.

Policies Map (Inset 31)

52. This indicates that the Limits to Built Development (LBD) boundary will be extended to include proposed allocation at the site.

53. The evidence base document the 'Limits to Built Development Topic Paper for Pre- Submission Local Plan (February 2021) assesses the potential changes to the LBD boundaries. Table 1 is entitled the 'Criteria used to determine what should or should not be included within LBD boundaries'. Criteria (d) is:

have no adverse impact on designated areas of national and local landscape, archaeological, geological, ecological or heritage importance

54. With respect to the proposed allocation at the site, the LBD is indicated on the Policies Map as extending around this site. However, criteria (a) and (d) are listed as two of the supporting principles for this change. With respect to criteria (a), this requires that the the extension be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside. The development of the site would lead to a harmful encroachment into the countryside. With respect to the Council's assessment of criteria (d), this is clearly wrong - as already acknowledged by the Council, development on the site would lead to adverse impacts on the AONB and designated heritage assets, contrary to established planning policy.

55. Table 1 also sets out a list of criteria that should be assessed to exclude sites. Criteria VI is '*buildings in spacious grounds on the edge of the settlement*'. This describes the proposed allocation site. Paragraphs 1.01 and 1.02 of the Planning Committee report for the refused application describes the site as follows:

The application site consists of approximately 1.55 hectares and is located on the south side of Queen Street in the Sandhurst Parish of the Borough. The site comprises a detached dwelling known as Sharps Hill Farm, its residential curtilage and agricultural/paddock land that hosts two, relatively small, stable like structures. The agricultural/paddock land is currently divided and in use as private paddock land for the keeping of horses associated with the current owner of the dwelling. The site is largely grasses surfaced, other than small areas of hardstanding around the dwelling and stable structures. The land level slopes upwards from Queen Street towards the south of the site.

The boundaries of the site are marked largely by trees and hedging. A pond is located towards the north east corner of the site and there is a stream which runs along the east boundary of the site. The site is largely overgrown and unmaintained in parts particularly to the eastern boundary of the site where a relatively dense woodland area lies. Outside of this woodland there are a small number of trees within the site, otherwise the site is largely open in nature.

56. It is clear from this description that the site comprises a building in spacious grounds on the edge of the settlement and on the basis of the Council's own assessment criteria, should be excluded.

E. ASSESSMENT OF SOUNDNESS

57. The draft Local Plan is unsound in relation to the Council's strategy for development in Sandhurst and in its approach to the proposed allocation for Sharps Hill Farm, Queens Street, Sandhurst (AL/SA2) when assessed against the tests of soundness as set out in paragraph 182 of the National Planning Policy Framework.

Positively prepared

58. The draft Local Plan has not been positively prepared, particularly when the proposed allocation of the site AL/SA2 is looked at in the context of the previous planning application on the site for a comparable scale of development (as the allocation).

59. Planning application 19/01493/OUT for the '*residential development of up to 16 no. dwellings with associated parking, amenity and landscaping*', was rejected by the Council earlier this year, on the grounds that the location was unsuitable and "*would constitute unsustainable development*". This has not been addressed within the Local Plan site allocation, and the decision to reject the previous proposal, but encourage development within the Local Plan is evidence that the plan is not positively prepared. The plan must meet the objective needs in a sustainable way and the allocation of this site and wider development in Sandhurst would be contradictory to the principles of sustainable development.

Justified

60. The draft Local Plan is not justified as it is not clear what alternatives have been explored to avoid the identified air quality impacts that will occur with respect to the Hawkhurst AQMA.

Effective

61. The draft Local Plan is not effective as the plan does not take into account the significant potential environmental concerns connected to the development of land in an unsuitable area.

62. The draft Local Plan will not be effective as it is based on assumptions around when development will take place in Sandhurst and the wider area that, if wrong, would lead to a direct and significant impact on air quality in the AQMA.

Consistent with national planning policy

63. The development of this site conflicts with both the draft local policy document itself, and national policy.

64. The draft Local Plan's proposed allocation of development in Sandhurst and specifically at site AL/SA2 would be wholly inconsistent with national planning policy because:

- . the Council's own evidence and assessment of the sites considered for development in Sandhurst acknowledges that they are in an unsustainable location and are let down by poor services and facilities;
- . the draft Local Plan allocates land in Sandhurst and the surrounding area where there is a high risk of a significant and adverse impact on air quality; and
- . the development of the site will lead to specific AONB and heritage impacts which individually and collectively are significant and a level of harm that outweighs any benefits associated with housing delivery. The nature of the surrounding landscape is protected for valid reasons. The

location adjacent to heritage assets, a conservation area and within an AONB are all classed as assets or areas of particular importance. The Council has already reached this view on the planning application submitted on the site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

F. MODIFICATIONS TO THE PLAN

65. In order to address the issues identified in this representation and make the Local Plan sound, the following changes should be made.

66. In relation to 'Policy PSTR/SA 1 The Strategy for Sandhurst parish', the following changes should be made to points 1 and 2:

1. *Set Limits to Built Development for Sandhurst village, as defined on the Policies Map (Inset Map 31) as a framework for new development over the plan period, incorporating the allocation Policies AL/SA 1 and AL/SA 2 into the Sandhurst Limits to Built Development;*

2. *Build approximately 20-30 new dwellings (including 40 percent affordable housing) on two sites at Sandhurst village, as allocated under Policies AL/SA 1 and AL/SA 2;*

67. In relation to the Policies Map, the LBD boundary should not be extended to include sites AL/SA 1 and AL/SA 2.

68. 'Policy AL/SA 2 Sharps Hill Farm, Queen Street' and its supporting text should be deleted in its entirety.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To raise issues of soundness and discuss necessary modifications.

If you would like to attach a file in support of your comments, please upload it here.

PSLP 1908-1909 DLBP for Mr & Mrs
Tucker SI Representation

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Mrs Joanne Tucker
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/SA 2 Sharps Hill Farm, Queen Street	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not positively prepared
	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 Our comments relate primarily to Sharps Hill Farm, Queen Street, Sandhurst, Kent TN18 5HR. It also relates to Tunbridge Wells Council's strategy for development in Sandhurst.
- 1 Planning permission at Sharps Hill Farm was sought in May 2019 and refused in February 2021 under ref.19/01493/OUT. The Planning Decision Notice stated that the development would not *constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon nearby designated heritage assets*. No account has been taken of this refusal in the Local Plan.
- 1 No appeal has been lodged against this decision.
- 1 Paragraph 5.766 of the Pre-Submission Local Plan shows that there is a lack of primary education provision, medical provision, library provision and youth recreation provision indicating that Sandhurst is not sufficiently equipped to provide for new residents.
- 1 Planning permission for Sharps Hill Farm was sought in 2019 and refused in February 2021 under ref.19/01493/OUT. The Planning Decision Notice stated that the development would not *constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty and upon nearby designated heritage assets*.
- 1 No appeal has been lodged against this decision.
- 1 Paragraph 5.766 of the Pre-Submission Local Plan shows there is a lack of primary education provision, medical provision, library provision and youth recreation provision indicating that Sandhurst is not sufficiently equipped to provide for new residents.
- 1 Sandhurst is a rural village with poor connectivity unless using private transport. Paragraph 5.757 of the Local Plan highlights the issue of travel sustainability noting that:
The nearest rail stations are at Etchingham, approximately 8 miles away and Staplehurst, approximately 11 miles from Sandhurst. There are bus services that currently run to Hawkhurst, Maidstone and Royal Tunbridge Wells, which all run more frequently on weekdays, Monday-Friday. There are currently no bus services running at peak times.
- 1 In terms of sustainability, the allocated sites (Sharps Hill Farm and Land south of Sayville, Rye Road) for Sandhurst both score negatively in terms of Services and Facilities, Travel, Heritage, Landscape and Air.
- 1 Appendix T of the Sustainability Appraisal notes that allocated sites, Sharps Hill Farm and Land south of Sayville, Rye Road
are let down by poor services, facilities and travel options in this rural settlement and the subsequent effects of this on the air quality objective.

- 1 Tunbridge Wells Council intends to declare an Air Quality Management Area to the north of the traffic lights in Hawkhurst because of the presence of nitrogen dioxide. Any major development in Sandhurst, would increase these levels of nitrogen dioxide because of the reliance on private transport and the increased traffic travelling through Hawkhurst.
 - 1 Further, Appendix T of the Sustainability Appraisal shows no 'positive' or 'very positive' scale of impact returns for the two preferred sites in Sandhurst.
 - 1 Sandhurst lies within an Area of Outstanding Natural Beauty (AONB). Any major development at Sharps Hill Farm would cause significant harm to the AONB and any benefits would not be outweighed by this harm.
 - 1 In terms of the harm to heritage assets, any development at Sharps Hill Farm would cause harm to grade II listed Bayford House and a non designated heritage asset, Sharps Hill Oast. Tunbridge Wells Council's Conservation Officer concluded that less than substantial harm at the lower end of the scale would be likely. Whilst we are in agreement that harm is in the less than substantial category, we believe it is at the higher end of the scale.
 - 1 The Conservation Officer noted that the land at Sharps Hill Farm *contributes to the significance of Bayford House as a high status house set well outside the village in a semi-rural setting – there are likely to be some views from the house which will be affected by the presence of a housing development.*
 - 1 As the owners of Bayford House (we consider ourselves to be custodians of this lovely building and its setting), we wish to point out that any development at Sharps Hill Farm will have an adverse effect on the historically rural setting of this listed building.
 - 1 The original planning application on this site, 19/01493/OUT, was refused by Tunbridge Wells Planning Committee *in particular due to the harm ... upon nearby designated heritage assets.* Therefore, it is self evident that the site cannot be allocated for development in the draft Local Plan as it will cause harm to heritage assets. Case law confirms that great weight should be afforded to the preservation of heritage assets setting out a presumption against development that causes harm.
 - 1 The site is also adjacent to the Sandhurst Conservation Area. The Conservation Area has, over time, lost some of its historic character particularly at the western edge of the village. This allocation will further exacerbate the loss of historic character of the settlement as the proposed layout does not reflect the linear development patterns of the village, and will extend residential development into the existing rural context of the Conservation Area.
 - 1 The Council's Planning Committee refused the original planning application, 19/01493/OUT, as *The proposed development would not constitute sustainable development in the context of the National Planning Policy Framework in particular due to the harm to the High Weald Area of Outstanding Natural Beauty.*
 - 1 The Limits to Built Development Topic Paper for Pre-Submission Local Plan outlines in Table 1 the 'Criteria used to determine what should or should not be included within LBD boundaries. Certain criteria (a) (b) (c) (d) (e) (f) and (g) are given as supporting principles for the changes to Limits to Built Development. Certain of these criteria are incorrect.
- 17.Criteria (d) is '*have no adverse impact on designated areas of national and local landscape archaeological, geological, ecological or heritage importance*'. This is clearly wrong, as the Council has already acknowledged, development on this site would lead to adverse impacts on the AONB and designated heritage assets.
- 18.Criteria (a) is '*be adjacent to and form a logical extension to the built up area and not result in harmful protrusion into the countryside*.' This is wrong as the site would result in harmful protrusion into the countryside and does not form a logical extension to the built up area as it is separated by a stream, a pond and woods.
- . Criteria (c) '*has no adverse impact on landscape character*' This is incorrect as the site would clearly have an adverse impact on the landscape character and on the AONB.
- 20.Criteria (e) '*be of a scale/nature in keeping with the form and function of the settlement and result in no harm to its character, appearance or setting-does it relate more to the built environment or to the surrounding countryside?*' This is wrong as the site is surrounded by pasture and is bounded by one listed and one non designated heritage asset on the western aspect, and by fields to the south.
- 21.Criteria (g) '*allow reasonable access to local facilities and services (non-private car mode)*.' This is wrong as the site is approximately 1 kilometre from the centre of Sandhurst village. Bus services to and from Sandhurst are not frequent and do not operate at peak hours.

- 1 22. Table 1 also sets out a list of criteria that should be assessed to exclude sites. Certain of these Exclusions apply to this site and should therefore preclude it from inclusion in the Limits to Built Development.

21C23 Exclusion VI 'buildings in spacious grounds on the edge of the settlement', Exclusion IV 'Large rear gardens or paddocks stretching well out from the main built up form of the settlement' and Exclusion IX 'woodlands/forested areas' 'These Exclusions describe the proposed allocation site. Paragraphs 1.01 and 1.02 of the Planning Committee report for the refused application describes the site as follows:

The application site consists of approximately 1.55 hectares and is located on the south side of Queen Street in the Sandhurst Parish of the Borough. The site comprises a detached dwelling known as Sharps Hill Farm, its residential curtilage and agricultural/paddock land that hosts two, relatively small, stable like structures. The agricultural/paddock land is currently divided and in use as private paddock land for the keeping of horses associated with the current owner of the dwelling. The site is largely grasses surfaced, other than small areas of hardstanding around the dwelling and stable structures. The land level slopes upwards from Queen Street towards the south of the site.

The boundaries of the site are marked largely by trees and hedging. A pond is located towards the north east corner of the site and there is a stream which runs along the east boundary of the site. The site is largely overgrown and unmaintained in parts particularly to the eastern boundary of the site where a relatively dense woodland area lies. Outside of this woodland there are a small number of trees within the site, otherwise the site is largely open in nature.

- 1 Exclusion XVII 'hamlets and small clusters of existing development'. Sharps Hill Farm, Sharps Hill Oast and Bayford House form an enclave of development in the countryside and therefore should be regarded as a 'small cluster of existing development'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In our view, in order to make the Local Plan sound, the following changes should be made.

In relation to 'Policy PSTR/SA 1 The Strategy for Sandhurst parish', the following changes should be made to points 1 and 2:

Point 1 - Delete the wording "incorporating the allocation Policies AL/SA 1 and AL/SA 2 into the Sandhurst Limits to Built Development;"

Point 2 – Delete the wording "Build approximately 20-30 new dwellings (including 40 percent affordable housing) on two sites at Sandhurst village, as allocated under Policies AL/SA 1 and AL/SA 2;"

In relation to the Policies Map, the LBD boundary should not be extended to include sites AL/SA 1 and AL/SA 2.

For the reasons stated earlier, we believe the actual allocation of the land at Sharps Hill Farm should be deleted from the local plan and therefore 'Policy AL/SA 2 Sharps Hill Farm, Queen Street' and its supporting text should be deleted in its entirety.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please accept this letter as my response to the consultation by Tunbridge Wells Borough Council (TWBC) on the Pre-Submission Local Plan. Though I do not represent any part of the borough of Tunbridge Wells in Parliament I am responding to this consultation, as I did during Regulation 18, as some of the proposals will have a clear and direct impact on Tonbridge, Golden Green, East Peckham and surrounding areas, which I am privileged to represent.

I am aware that the current, Regulation 19, consultation is separate from previous consultations undertaken by TWBC on this Local Plan. Therefore, completeness I am enclosing a copy of my letter to TWBC dated 29 October 2019 as my response to the previous consultation. This is so it can be included in the submission to the Planning Inspectorate.

The reason I do this is because the fundamental shape of the Local Plan has not changed, and the vast majority of the impacts I describe in this letter remain; as do the concerns of residents across Tonbridge and Malling. Since 2019 I have spoken with hundreds of people who have reservations about the scale and location of development on the border with Tonbridge and Malling, which is why these concerns still stand.

The representations in question focus on STR/SS1, Strategy for Paddock Wood, including land at east Capel and STR/SS3, Strategy for Tudeley Village specifically. This includes around half of the proposed development within the period that the TWBC Local Plan runs for, allocated for such a small part of the borough against the Tonbridge and Malling borough boundary, where there are already severe infrastructure issues that residents have to contend with.

I am pleased that some minor changes have been made since the TWBC Regulation 18 consultation in 2019. For example, no longer allocating land directly adjoining Tonbridge for use as a Secondary School is very welcome; the concentration of excellent existing secondary schools in south Tonbridge leads to traffic issues every morning and afternoon with so many children already travelling from afar for their education. In addition, I know that the impact of the allocation of this site on Tonbridge, especially through increased drainage and flood risk, was causing severe concerns from residents immediately neighbouring the allocation.

However, this is not to suggest that the other issues mentioned in the letter of 29 October 2019 have been resolved and I would draw attention towards the detailed comments made then, since they remain relevant. It is the strong view of the majority of residents I have spoken to across Tonbridge and Malling that the proposed mitigations are considered to be insufficient, especially in relation to the impact on the road network. In addition, the concerns referenced regarding rail and bus capacity remain, all of which would place an unsustainable burden on infrastructure in Tonbridge.

Finally, in addition to the matters discussed I wanted to mention significant concerns which have been raised by residents in East Peckham and Golden Green especially around the proposed road changes in Tunbridge Wells borough, which will have a detrimental impact on residents in Tonbridge and Malling. First, I understand that supplementary documents associated with this Local Plan proposed the closure of part of Maidstone Road in Paddock Wood, resulting in longer journey times from the central area of Paddock Wood, where the majority of amenities are located, to the north. This would clearly have an impact on the ability of East Peckham residents to visit Paddock Wood, now the location of their nearest GP practice too, increasing the distance of any car journey.

The other road change which would have a severe impact on Tonbridge and Malling would be the closure of Hartlake Road near Golden Green, which is a well used route, especially at peak time, and risks diverting even more cars on to the already congested A26 Hadlow Road through Tonbridge. As with the proposed closure in Paddock Wood, I have not yet seen any modelling which identifies the impact of either of these closures on Tonbridge and Malling, which should be a pre-requisite before any changes are made.

I had hoped that my response to this consultation would be very different, and the vast majority of the concerns raised in 2019 would have been addressed. Sadly this isn't the case which is why I have no choice but to attach a copy of my letter of 29 October 2019 which details the key changes necessary to reduce the impact of the Local Plan on Tonbridge and Malling.

I have also copied this letter to The Rt Hon Greg Clark MP and Helen Grant MP, who represent Tunbridge Wells borough.

[TWBC: see letter of 29 October 2019 attached as supporting information]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	TW Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst Tunbridge Wells Labour Party supports the development at Tudeley, we are of the view that the planned expansion of Paddock Wood is unjustified, excessive and poorly thought out.

STR1 also does not contain a commitment to provide the much needed genuinely affordable social housing which the Borough needs.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)
--	--

Question 1	
Respondent's Name and/or Organisation	TW Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 7 Climate Change

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is not ambitious enough on Climate Change and fails to fully embrace the extent of change needed to ensure that new development is fully compliant with the policy set by the council to be carbon neutral by 2030.

It does not contain the range of comprehensive measures needed that reflect the reality of the climate emergency that we are facing.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

For an example of a Local Plan which is more ambitious on climate change see this link

<https://www.salford.gov.uk/planning-building-and-regeneration/planning-policies/local-planning-policy/salfords-development-plan/salford-local-plan/revised-draft-local-plan-chapters/6-climate-change/>

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This policy omits reference to providing genuinely affordable housing in the town centre and the valuable contribution more residential development of mixed tenures could have to help revitalise our town centre.

It also takes insufficient account of the changing work patterns arising from COVID-19 and the need for flexible and affordable workspace for a wide range of individuals and organisations.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The provision of genuinely affordable housing and workspace is a policy priority in the revitalisation of Tunbridge Wells Town centre.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy H 3 Affordable Housing

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Labour Party believes that the Local Plan should be far more ambitious for the Borough's residents in the provision of genuinely affordable housing at social rent and that the Council should commit itself to be a builder of council homes and a registered social landlord.

We are concerned that government planning reforms in relation to social housing has the potential to undermine the delivery of housing at social rent levels. The new starter homes proposals will not meet the needs of residents who require access to genuinely affordable housing.

It is imperative that the Local Plan is adopted prior to the effect of government changes in planning policy taking effect as they would be so damaging for the provision of new housing at social rent levels.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Local Plan should commit to the delivery of genuinely affordable housing including those at social rent levels. The use of the term 'affordable' has been undermined repeatedly and is a term used for many forms of subsidised though still unaffordable homes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy TP 4 Public Car Parks

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

There is an over provision of car parking in Tunbridge Wells Town Centre and it is not sound to retain the number of existing parking places. This policy is not compatible with efforts to reduce car use, improve air quality and meet the challenge of the climate emergency. A reduction in car parking spaces would support the Council objectives and policy to build a more sustainable borough. This policy actively undermines this objective.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Surplus town centre car parks and parking spaces should be identified and options considered for their use for the public good. This could include the provision of Council built social housing on redundant car parks that are too expensive to maintain and are no longer required (i.e. Meadow Road)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The impact of potentially moving Tunbridge Wells Football Club from its home at the Culverden Stadium would have an impact on Hawkenbury with increased traffic also the idea of having a stadium surrounded by 11-a-side football pitches would not work with traffic and congestion this would cause on match days. There has been no official meeting to discuss this proposal and how the potential financial effect.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Summary

The PSLP has not been properly prepared because:

1. Despite being asked to build far more houses than a constrained Borough like Tunbridge Wells can responsibly accommodate, the Council failed to try and influence the Government to change the calculation method. As the Green Party highlighted in their 2019 DLP submission, adoption of the ONS's revised 2016 methodology would result in a 35% reduction in the number of houses to be built, and thereby enable use of the Green Belt to be avoided altogether.
2. The Council was misled in the documentation for its 3 Feb 2021 Full Council meeting by a statement that the Housing Minister's Dec 2020 reform of the standard method applies "mostly to cities", meaning Councillors were not briefed on the Secretary of State's reformed standard method, and hence their decision to approve the PSLP going to Regulation 19 consultation was invalid.

The PSLP is unsound because:

3. The PSLP ignores the Secretary of State's Dec 2020 clarification of his reformed standard method, which he said should use the housing numbers derived from the standard method as a "starting point" for planning around constraints, and instead places some 50% of the ca 8,500 new dwellings in the Green Belt; it also puts many in sensitive AONB locations.
4. The PSLP contains an additional 1,050 dwellings above the number derived from use of the standard method, resulting in particularly damaging developments being included in the PSLP, which further contributes to its being unsound.

[TWBC: For PSLP Figures Table, please see supporting documents]

Discussion

1. Not rejecting the excessive Government housing target for Tunbridge Wells

In round figures, the PSLP proposes placing some 50% of its 8,500 new houses in Green Belt areas, which is so serious, it means this valuable planning constraint has effectively been ignored.

The spreadsheet calculation of this percentage, based on the figures available to the public in January 2021 is attached, and while the PSLP's final figures are slightly different, it is valid for this submission's purposes.

When this gross intrusion into the Green Belt had become clear, the Council should have fed back to the Government the implications of the excessive housing numbers, and pressed for a reduction, preferably via a revised standard method, such as the "2016" version proposed by the Office for National Statistics.

The interactive map in this website demonstrates the impact the use of the 2016 methodology would have on Tunbridge Wells' numbers – a reduction of 35%:

(see web link)

It is noted that the Council DID push back on the "mutant algorithm" proposed by the Ministry for Housing, Communities and Local Government (MHCLG) in Q3 2020, and after many other Councils and MPs joined in, the proposed algorithm was dropped by MHCLG; Tunbridge Wells Borough Council should have done the same for the 2014 standard method, rather than continue to simply implement its damaging repercussions.

The PSLP has thus not been properly prepared.

2. Tunbridge Wells Borough Council was misled by the statement that the Dec 2020 reform of the standard method applies "mostly to cities"

On 26 January 2021, in the run-up to the Full Council meeting of 3 February 2021, TWBC issued a version of the PSLP for Councillors to review and approve, along with a preceding 23-page Summary document.

In paragraph 3.19 on page 10 of that Summary document, there is a statement that *"MHCLG confirmed, on 16th December 2020 that the changes to the standard method would essentially only apply to city areas."*

The crucial clarification of the reform of the standard method by MHCLG quoted in 3. below was not included in this guidance to Councillors, and together with the statement in paragraph 3.19, left the Councillors inadequately informed on the basis for the numbers in the PSLP, and the obligation on LPAs to make plans that take account of the Green Belt and other similar constraints.

This procedural error renders the 3 Feb 2021 Full Council decision to approve and progress the PSLP invalid, and means the PSLP itself has not been properly prepared.

3. Ignoring the Secretary of State's Dec 2020 statement clarifying the application of his reformed standard method

On 16th December 2020 the Minister of Housing, Communities and Local Government (MHCLG) Robert Jenrick stated on the Gov.uk website (where it remains) in relation to his reform of the standard method for assessing local housing need that:

"Within the current planning system the standard method does not present a 'target' in plan-making, but instead provides a starting point for determining the level of need for the area, and it is only after consideration of this, alongside what constraints areas face, such as the Green Belt, and the land that is actually available for development, that the decision on how many homes should be planned for is made. It does not override other planning policies, including the protections set out in Paragraph 11b of the NPPF or our strong protections for the Green Belt. It is for local authorities to determine precisely how many homes to plan for and where those homes most appropriately located. In doing this they should take into account their local circumstances and constraints. In order to make this policy position as clear as possible, we will explore how we can make changes through future revisions to the National Planning Policy Framework, including whether a renaming of the policy could provide additional clarity".

TWBC ignored this Ministerial statement, and continued to propose a Pre-Submission Local Plan (PSLP) that took no account of the Green Belt constraints, and it has put forward a PSLP that places some 50% of its new dwellings in the Green Belt, and also contains some developments in the High Weald Area of Outstanding Natural Beauty (AONB) that conflict with the intent of the NPPF.

The PSLP is thus unsound.

4. Including 1,050 additional houses above the standard method's numbers in the PSLP

Compounding the error caused by taking the outcome of the standard method as a "target" rather than a "starting point", TWBC retained 1,050 dwellings in its average target above the standard method's calculated numbers, with no robust rationale other than referring to it as a "buffer".

Examination of the PSLP at a high level reveals that this has resulted in some particularly damaging developments being left in, when they could have been omitted to the benefit of the environment, the local communities impacted, and the Borough as a whole.

Examples of this include, but are not limited to:

AL/RTW16 Land to the west of Eridge Road at Spratsbrook Farm (known locally as Ramslye Field); Green Belt - 120 dwellings

AL/RTW14 Land at Wyevale Garden Centre; Green Belt - 25 to 30 dwellings

AL/RTW5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenbrook Farm; Green Belt - 100 dwellings

STR/SS1 The Strategy for Paddock Wood's most flood-prone areas, including Site numbers 20, 79, 141, 142 and 309; Green Belt - some 600+ dwellings

AL/BE3 & BE4 Land at Benenden Hospital, East End; AONB - 75+ dwellings

The arbitrary addition of these 1,050 dwellings renders the PSLP unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Full reassessment of the Local Plan on the basis of a number of houses that can be developed without impacting the Green Belt or involving destructive developments in the High Weald AONB.

In any case, removal of the arbitrary additional 1,050 houses from the total, and deletion of the developments listed in paragraph 4 of our representation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The representation made above describes some fundamental shortfalls in the PSLP and how it has been developed and approved, and I believe it would assist the Inspector if I could explain them in person.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

No additional comments, thanks.

If you would like to attach a file in support of your comments, please upload it here.

Question 1

Respondent's Name and/or Organisation Tunbridge Wells Older People's Forum (TWOPF)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Various comments on aspects of whole Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TWOPF very much welcomes the opportunity to respond to the consultation on the comprehensive and in-depth Local Plan. TWOPF seeks to ensure that all residents enjoy the many natural, social, cultural and economic advantages Tunbridge Wells offers.

TWOPF focuses on such elements locally that benefit all people, and especially those who may be older and/or less able to be fully independent whether through, permanent or temporary limitation in their access to, interaction with and enjoyment of Tunbridge Wells' life, facilities and services.

TWOPF recognises the demographic profile and the forecast growth of an ageing population nationally and within the Tunbridge Wells Borough Council area. To that end, TWOPF wishes to flag some key practical aspects that can make a huge and positive impact on the well-being, integration and contribution of older people to the community.

Housing

1 Affordable

The proportion and category of affordable housing development should be in accordance with the local plan policy quota.

1 Older People's housing needs

- . More and appropriate choice of purpose built housing for older people.
- . All new housing to be built with adaptability for disabilities.

Infrastructure

Good infrastructure helps enable older people to have fulfilling independent lives for as long as possible. This should be a prerequisite of any new housing, civic or commercial development. For established communities, existing facilities should be protected or improved. The infrastructure should support people getting out and about safely, easily and in a timely manner.

Well-being, Exercise and Access

- 1 Outdoor space – all housing should have some outside space, whether a garden or a balcony.
- 2 Well maintained, wide and level pavements and dropped kerbs with safe, identifiable and visible crossing points.
- 3 Car parking that enables easily navigable pay systems.
- 4 Sufficient disabled parking bays in central or high demand locations.
- 5 Living in a “walkable town or village” – and as such any new housing and commercial development should be local and have easily access to daily life facilities including General Practitioner Surgeries, pharmacies, banks, post office, shops, library and community centre.
- 6 Public transport should have easily accessible vehicles, have multiple routes that link residential areas and the town and village centres, and services are frequent and give extensive timetables.

Local Green spaces

- 1 Safeguarding the number and overall volume of green areas, increasing the numbers and variety of trees and greenery in line with a greener and healthier vision.
- 2 Maintaining the extent, worth and value of nature and the local wildlife.
- 3 Promoting a litter free communities, green areas and park spaces.
- 4 Support rewilding of parks, verges and other spaces to promote enjoyment of the natural environment and an improved ambiance.
- 5 Introduce electric vehicle charging points in new housing and commercial developments.

Celebrating outdoor community life

1 Safe, widespread and freely accessible places to rest and/or socialise – actively encouraging people to mix in and benefit from their community; and actively combatting loneliness and isolation. New developments to have a proportion of outdoor space which is sheltered or undercover.

1 To have widespread, clean and well maintained civic amenities and facilities that invite and support people of all ages to retain their independence and confidence:

Specifically:

- 1 Public lavatories throughout the town and be adapted for people with disabilities.
- 2 Ample seating / resting areas – including park and street benches; bus stop seats and benches with IT connectivity.
- . Obstruction and clutter-free pavements which help older and disabled people to go where and when they choose (whether on foot, in a wheelchair, mobility scooter etc.)

For more detail please see TWOPF Covid-19 Report. [TWBC: see attached report]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you would like to attach a file in support of your comments, please upload it here.

Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The so-called Tudeley Village development (by the time it is complete it will be a town not a village) creates so many negatives concerning traffic, infrastructure, AONB setting, environment, bio-diversity, flood risk, urban sprawl. TWBC has failed to cooperate with its neighbouring boroughs. It does not comply with government policy on green belt provision.

I have lived in Tonbridge for nearly 36 years and have seen the town grow hugely, especially in the last 10 years with the result that local roads are congested with traffic and parking. I opposed the original Tunbridge Wells Borough Council Local Plan under Reg 18 because the size and scale of the proposed development at Tudeley and Paddock Wood was well beyond what the area was capable of sustaining. Despite hundreds of objections the Council has ignored most of them and have even, unbelievably, substantially increased the size of the proposed developments at both Tudeley and Paddock Wood. My comments below are on the Tudeley proposal.

The TWBC draft plan being submitted to the Planning Inspector under Reg 19 is a cynical attempt to foist a massive house building scheme (50% of the total in the PLP) on one out of 20 wards in the borough, away from Tunbridge Wells and adjacent to the border with Tonbridge & Malling Borough. Tonbridge will suffer a huge impact on its infrastructure and quality of life for its residents whilst receiving no benefits from increased council tax or developer contributions. It shows a complete lack of understanding of the constraints which Tonbridge lives with currently.

It is extremely likely that most of the proposed housing will be sold to people re-locating from London. Since Covid there has been a surge in the Tonbridge housing market as London residents seek to leave the city. Inevitably many will commute into London or have to travel out of the 'village' for work even post-Covid. And how will they travel? A large proportion will drive to Tonbridge Station or through Tonbridge. No-one is going to go to Paddock Wood Station and pay more for that extra 7 minutes on the train. The 'aspirational' station at Tudeley is never likely to be built. Very few will cycle. Very few will take the bus (which does not exist at the moment and isn't planned for some years). Where will these residents shop, where will they go to school, visit the dentist or the doctor? The proposed primary school and secondary school will not be completed until a large number of homes have been built. It is naïve to think that as soon as they are opened parents will uproot their children from schools they have been attending previously, possibly for some years.

So the number of journeys between Tudeley and Tonbridge will rise considerably on top of what the town has to cope with now. The problem is that Tonbridge, being bisected west to east by the River Medway, only has two roads which cross the river north to south; the A227 High Street which takes you to the car parks near the station and the A21, and the A26 Cannon Lane/Vale Road which goes through the industrial estate and connects to the Tudeley road, the B2017. These roads and the junctions close to the town centre are already heavily congested and not just at morning and afternoon rush hours. A minor incident can grid-lock the whole area within minutes. At peak times traffic can queue from Five Oak Green to the B2017/A26 junction and then to join the A21 or travel into Tonbridge

to join the A26 to Tunbridge Wells. Tonbridge & Malling Borough Council's own Plan aims to put another 400 plus homes on a road where the only way out is onto the A26 not far from the station at a mini-roundabout. The town is not able to solve the problem and adding more and more homes aggravates an already very difficult situation. In addition, some warped logic on the part of TWBC proposes that Hartlake Road be closed to through traffic. They create the possibility of considerably more traffic and then close a road which provides an alternative to those wishing to by-pass Tonbridge from the east. This will create even more pressure on the Hadlow Road into the town which is already.

Of course, the traffic problem does not start when the whole development is complete. There will be years of heavy construction traffic using country lanes to access the Tudeley site before any additional road provision is made. This will be in addition to similar amounts of such traffic accessing the East Capel and Paddock Wood sites. Air and noise pollution levels for current residents will increase.

The Tudeley development will swallow up large swathes of prime agricultural land, plus hundreds of acres of precious Green Belt. Once built over it is gone for ever. In the owner of Hadlow Estate, TWBC have found a landowner who is prepared to profit from selling a substantial amount of the land he inherited instead of being a custodian of the countryside and protecting it and ensuring his tenants' futures. It saves TWBC so much effort instead of finding small pockets of land which can be sensitively developed where they would have to negotiate with numerous landowners. The town of Tunbridge Wells itself has development sites which have been derelict for many years and it is in serious decline, in need of regeneration with many opportunities for housing.

The Conservative Government, in the person of the Prime Minister, has said that Green Belt should be protected but TWBC, a Conservative council, seem not to agree. In addition to building on Green Belt they are planning to extend quarrying which will swallow up another 200 acres. The Green Belt is supposed to protect against urban sprawl. By ignoring its designation in this case the space between Tonbridge, Tudeley, Five Oak Green and Paddock Wood will practically disappear. As well as constructing housing land will be sacrificed to widening or building new roads. There will be more and more built environment instead of green space. Obviously with the loss of so much agricultural and green belt land biodiversity can only suffer. They have not taken the character of the landscape into account, the Green Belt and the High Weald AONB.

Flooding is a significant issue in the Tudeley area. Hartlake Road was closed for days at a time in the winter just passed, 2020/21, as it has been in the majority of the winters for the last ten years. How does adding 2,000 plus homes as well as commercial, educational and medical facilities and the necessary roads and paths help to control flooding from the River Medway? The farmland can absorb the water during the winter and still be viable the rest of the year for production. The Tudeley development will exacerbate the problem locally and push the problem downstream as well. The mysterious 'mitigation' of the flood risk is not explained.

As far as I can see, Tunbridge Wells Borough Council have ignored the objections raised at the Reg 18 stage of the PLP. They have considered their borough in isolation, as if it is an island with no relevance to the boroughs which surround it and their Local Plans.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation	Mrs Esther Twinley
---------------------------------------	--------------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy H 9 Gypsies and Travellers

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Object: The capacity of the site should be increased from 3 pitches to 10 pitches. The allocation of land at Greenfields Farm is supported in principle. A planning application has been submitted for 10 pitches which is currently being considered by the council (21/00600/FULL). Gypsy and Traveller pitches will be made available quickly and within the next three years. The site is viable and deliverable. Please see the attached block plan, and site layout plan (*TWBC Comment - maps attached*). Each pitch is between 400 and 500 sqm and there is sufficient space for a mobile home, a commercial van, a touring caravan, family car, and garden space.

I therefore object to the allocation of the site for only 3 pitches and request the capacity is amended to 10. 3 pitches would not be an efficient use of land, because the density would be very low, contrary to criteria 1 of the proposed policy. Drainage infrastructure (swales and storage pond) and contributions to the District Level Licencing Scheme (which has already been agreed by Natural England) would make viability for only 3 pitches very challenging.

There is significant interest in the site from local Gypsy families and there is a clear demand. Indeed, a simple borough wide 'need' figure is almost impossible to accurately estimate because the Gypsy community do not restrict their site search to administrative boundaries and not everyone makes themselves available for research questionnaires to determine future demand. We also know of numerous Gypsies in 'brick and mortar' accommodation who want to live in a mobile home. In any case, the identified need is a minimum figure only and it would be a positive and proactive response for the site to be used to a higher density.

The pitches will be provided to rent and this increases the number of accommodation options, i.e. transit sites, rented sites and owned sites.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Amend the capacity of the Gypsy and Traveller site at Greenfields Farm (Policy H9, site reference DCP15) to 10 Gypsy and Traveller pitches.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To respond to any questions the Inspector has and ensure that the plan delivers sustainable development.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I disagree with the assessment that the site is remote. It is a suitable location for a Gypsy and Traveller site. Cycle parking will be made available and proposed extensions to Paddock Wood mean that the site will be very close indeed to the urban area. The manager of the site proposes to ensure that car sharing for school and shopping trips reduces the number of car movements. Furthermore, there is a bus stop nearby.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Whilst U+I and RSB support the allocation of Land adjacent to Longfield Road (Policy AL/RTW 17) for employment use and Land at the former North Farm landfill site (Policy AL/RTW18) for recreational use, they have significant reservations about the overall development strategy for realistically meeting the required housing need of 12,204 dwellings over the plan period, and therefore formally object to the Plan. Please see letter of representations for further detail.

[TWBC: the following text is from the Letter of Representation - for the full representation, including Annex 1, please see supporting documents]

Tunbridge Wells Borough Council Pre-Submission Local Plan – Representations relating to Land South of Appletree and Devils Wood

On behalf of U+I Group PLC (U+I) and Robert Sheridan Bowie ('RSB'), we submit below representations in response to the Regulation 19 Tunbridge Wells Borough Council ('TWBC') Pre-Submission Local Plan issued for public consultation until 4 June 2021.

By way of background we have proactively engaged with the Council through the Local Plan preparation stages, including the submission of two sites at Land adjacent to Longfield Road and Land South of Appletree and Devils Wood in July 2016, in response to the Call for Sites for the Strategic Housing

and Economic Land Availability Assessment. We subsequently responded to the Issues and Options consultation and Call for Sites in June 2017, promoting these sites for development as a natural extension to the existing industrial area to the north of the city. In November 2019 we submitted further representations in response to the Regulation 18 Draft Local Plan public consultation, promoting Land South of Appletree and Devils Wood for future housing development.

Employment Land

U+I and RSB welcome the allocation of Land adjacent to Longfield Road for a new business park under Policy AL/RTW 17. U+I is committed to the delivery of this site to assist in meeting the Council's employment needs in the short to medium term. An application for outline planning permission for development was permitted on 12 March 2021 (ref. 19/02267/OUT).

Housing Land

U+I and RSB are aware of the wider development pressures and the need to accommodate considerable amounts of new housing development over the plan period to meet the needs of the Borough. The standard method housing need figure for the Borough is 678 dwellings per year; over the full plan period 2020-2038, this equates to a need of some 12,200 dwellings.

The proposed strategy for meeting this housing need is consolidated by Policy STR1, which sets out the quantum of development that will be allocated within or around settlements to meet the identified needs of the borough over the plan period. This strategy seeks to meet the majority of the Council's need via the delivery of a new Garden Village at Tudeley and through the strategic extension of Paddock Wood/East Capel, plus smaller sites distributed across the borough and limited Green Belt release.

It is noted that Land South of Appletree and Devils Wood has not been allocated in the Pre-Submission Local Plan. The site has previously been promoted by U+I and RSB as a sustainable option for future housing development and we consider that it can make a valuable contribution to meeting housing need. The site constitutes a parcel of land, under single ownership, to the north of Tunbridge Wells with an area of 53.95 ha. The site would form a natural extension to the existing residential development to the south west, with connections to Kingstanding business park, including new infrastructure and services to be delivered under outline permission 19/02267/OUT and has the potential to deliver circa 600 residential units.

Representations

U+I and RSB welcome the opportunity to comment on the Pre-Submission Local Plan and the Council's commitment to meeting the needs of the area. Whilst they support the allocation of Land adjacent to Longfield Road (Policy AL/RTW 17) for employment use and Land at the former North Farm landfill site (Policy AL/RTW18) for recreational use, they have significant reservations about the overall development strategy for realistically meeting the required housing need of 12,204 dwellings over the plan period, and therefore write to formally object to the Plan.

Development Strategy and Strategic Policy STR1

U+I and RSB's objections largely relate to the balance between strategic and non-strategic site allocations and the anticipated delivery trajectory. Of the new housing allocations (set out in Table 4 of the Pre-Submission Local Plan), 67% are to be delivered as part of the strategic extension to Paddock Wood (3,590 homes) and the new Garden Community at Tudeley (2,100 homes within the plan period). U+I and RSB have concerns that such a large proportion of the Borough's housing is concentrated in a small part of the Borough and on strategic sites. The development of both of these sites will require a fully master-planned approach, and the preparation of SPDs (see paras 5.193 and 5.229 of the Plan). These will need to be adopted before any planning permissions for substantial new development are granted and will therefore be a time-consuming process.

In relation to build-out rates, we would draw the Council's attention to Lichfields' 2020 research document – 'Start to Finish', which provides evidence pertaining to the speed and rate of delivery of large-scale housing, based on 180 assessed sites. It identifies that the average time taken from outline decision notice to first dwelling completion is 3 years on sites of 500+ homes. For larger scale sites (2,000+ homes) it estimates an average 8.4 years from validation of the first planning application to the first dwelling being completed.

The Housing Supply and Trajectory Topic Paper (HS&T) (2019) forecasts that the Tudeley Garden Community will begin to deliver homes from 2025/26 onward, with an initial build out rate of 150 dpa, rising to 200 dpa from year 6 onwards. Delivery of the site is expected to extend beyond the Plan

period (2036+). For the Paddock Wood extension, homes will start to be delivered in 2024/25 at an average build out rate of 333 dpa – which is over double the average rate for larger schemes identified in Lichfields' research (estimated 160 dpa for a scheme of 2,000+ dwellings). The higher build out trajectory is based on the fact that numerous house builders would be involved in the construction of different phases – although it is stated within the HS&T that TWBC cannot confirm how many housebuilders will deliver this site.

The Council appear to have underestimated the delivery/build-out rates of large strategic sites and Garden Communities. We refer to recent case law which comments on this matter - Inspector Roger Clews letter to the North Essex Authorities (15 May 2020) (IED/022) on the Examination of the Shared Strategic Section 1 Plan. The Inspector concludes that:

"I find there is no evidence to support the view that the proposed GC sites are capable of delivering at that level consistently (300 dpa)...over that timescale, the best evidence on likely delivery rates at the proposed GCs remains 'Start to Finish's' annual average figure of under 200dpa for greenfield sites of more than 2,000 dwellings." (para. 174 IED/022).

In relation to lead-in times, the Inspector states:

"In general terms, it is reasonable to assume that the planning approval process would allow housing delivery at any GC to start within four or five years from the adoption date of the plan (or plan revision) which establishes the GC in principle." (Para 176 of IED/022).

It is U+I and RSB's view the Council have applied an overly optimistic development trajectory for the delivery of these strategic sites, both in terms of the start date for completions and expected build out rates, disregarding the conclusions of the Lichfields' Start to Finish Report and the time it would take to masterplan and deliver the strategic sites. This fails to accord with para. 72 of the NPPF which requires strategic policy-making authorities to make a realistic assessment of likely rates of deliver, given the lead-in times for large scale sites.

TWBC's latest Five Year Housing Land Supply Statement (2019/20) identifies that the Council can currently demonstrate a housing land supply of 4.83 years. U+I and RSB are concerned that if the housing delivery slips beyond the trajectory identified in the HS&T, this result in less dwellings in the 5 year period, resulting in a fragile 5 year HLS. It is therefore considered that the Council should allocate more small-medium sized sites that could deliver homes in the short-medium term and help to bolster the 5 year HLS until Tudeley Village and Paddock Wood begin to delivery housing.

In addition, being overly reliant on a Garden Community, which does not benefit from existing infrastructure, to deliver the majority of the planned supply within the Plan period is not an appropriate strategy. The proposed infrastructure improvements to deliver Tudeley Village are significant and include:

- . On and off-line improvements to the A228 around Colts Hill;
- . The provision of a new highway which bypasses Five Oak Green;
- . Significant improvements to various local junctions;
- . Six-form entry secondary school, a three-form entry primary school; and
- . Cycling linkages to Paddock Wood.

Having reviewed the Infrastructure Delivery Schedule (Appendix 1 of the TWBC Infrastructure Delivery Plan, March 2021), the funding and delivery timetable of the above infrastructure is still relatively vague. It is also considered that the delivery of this significant infrastructure may prove highly vulnerable to obstacles to delivery, particularly given the Borough's environmental constraints. A greater proportion of development should therefore be directed towards the Borough's main settlement at Royal Tunbridge Wells, which is only allocated 18% of the total allocations (1,536 homes). This is a sustainable location for growth, already benefitting from significant infrastructure, which is to be further improved via the new plans under outline consent ref: 19/02267/OUT, and being the main settlement in the Borough, is a hub for employment, retail, education and public transport for the wider region.

Exceptional Circumstances for Green Belt Release

The Council has already identified that exceptional circumstances exist, in relation to meeting the Borough's housing need, to alter the boundaries of the Green Belt and to remove land from the designation for proposed development (para. 4.125). In essence, the Council have determined that there are no other reasonable alternatives other than releasing Green Belt land to meet the housing needs of TWBC. The NPPF (para. 138) indicates that when drawing up Green Belt Boundaries, the

Council should consider the need to promote a sustainable pattern of development, channelling development towards the urban area.

The Borough is heavily constrained with 74.5% of designated Green Belt land also within the AONB. Virtually any growth of the more sustainable parts of the Borough e.g. Royal Tunbridge Wells, would impact on the Green Belt and/or the AONB. Neighbouring local authorities have confirmed they are unable to meet any of TWBC's and therefore the release of Green Belt land is necessary to meet the identified development needs of the borough.

In addition to housing need, the following are considered to constitute exceptional circumstances that would justify releasing Land South of Appletree and Devils Wood from the Green Belt:

- . The allocation of the site would assist in the delivery of economic, social and environmental gains in accordance with the NPPF;
- . The site benefits from a sustainable location close to the Borough's main settlement, Royal Tunbridge Wells and in close proximity to local shops, services and employment opportunities within the Kingstanding Business Park;
- . There are sustainable modes of travel within close proximity to the site and there is also the opportunity to improve east to west pedestrian and cyclist connectivity;
- . The site can be delivered in the short to medium term; and
- . The entire site is under single ownership and is available for development.

For these reasons, it is considered that Land South of Appletree and Devils Wood could provide a natural extension to the existing urban area of Royal Tunbridge Wells and meets the exceptional circumstances test to be released from the Green Belt.

Site Suitability

Sustainable Location

Whilst the site falls outside of the boundary to Tunbridge Wells, it is considered suitable for residential development due to its close proximity to shops, other local services and employment opportunities located within the Kingstanding Business Park (allocated under Policy AL/RTW 17) and the existing employment area of North Farm.

There is a good level of sustainable modes of travel (bus and rail – High Brooms station is within close proximity) which connect the site to London, as well as other nearby facilities in Royal Tunbridge Wells centre. Significant improvements to cycling infrastructure and other sustainable and active modes are being provided through the development on the adjacent site (ref. 19/02267/OUT) and the site will benefit from this increased connectivity. The site also supports TWBC's aspirations to improve east to west pedestrian and cyclist connectivity, which could be achieved by utilising the existing bridleway/public right of way to the north of Land adjacent to Longfield Road, promoting routes through the site and providing a continuation of the development.

The site would integrate with the allocated adjacent site at North Farm (under Policy AL/RTW18), which is allocated for renewable or sustainable energy, sport, recreation, or leisure uses, and could provide an extension to this allocation. The proposed development would be led by a masterplan approach to ensure that the design is appropriate to its context and it is considered that through this approach supported by robust technical assessments site constraints can be responded to and mitigated as necessary.

Deliverability

The proposed allocation and development of the site will make a valuable contribution towards meeting the quantitative and qualitative needs of the community through delivering c. 600 residential dwellings. An illustrative masterplan for the site has been prepared and is included at Annex 1 of this letter.

The entire site is under single ownership and is available for development. It offers an opportunity for U+I to lend its significant technical knowledge and draw upon its longstanding track record of sensitive and successful delivery of development sites to help TWBC to meet their local housing needs. As is demonstrated by U+I's ongoing work to deliver employment land at Kingstanding, it is committed to high-quality design that responds to the sensitive site context.

The NPPF states that for a site to be both deliverable and developable, there should be a reasonable prospect that housing will be delivered on the land within five years. It is considered that the site presents a viable development opportunity with no abnormal site constraints on development anticipated at the site.

Accordingly, the site will be readily available and deliverable over the plan period and can make a substantial contribution to meeting housing need in TWBC as part of an appropriate strategy in the Local Plan. Given the TWBC's reliance on strategic sites to provide the majority of its housing requirement, this site could make an important contribution in the short-medium term and meet unmet need.

Whilst the site is located within the High Weald AONB, it is considered that its sustainability and early deliverability, as demonstrated above, provide the exceptional circumstances to justify its release from the Green Belt.

Concluding Remarks

These representations have been prepared by U+I and RSB in response to the Tunbridge Wells Borough Council Pre-Submission Local Plan Consultation. U+I and RSB has previously promoted Land South of Appletree and Devils Wood for residential redevelopment as part of the previous stages of the Local Plan review via the 'Call for Sites' process.

The purpose of these representations is to provide comment on the Council's proposed development strategy and specific proposals for allocated sites within the plan. In this respect, we consider the Local Plan strategy relies heavily on the delivery of strategic sites that would require the provision of supporting infrastructure. In addition, the Council have applied optimistic projections to the delivery of housing for the extension of Paddock Wood and the Tudeley Garden Village and as a result, will mean housing is delivered much later in the plan period.

We would therefore reiterate the importance of making efficient use of addition site available within the borough that are suitable for development. We consider that Land South of Appletree and Devils Wood meets the exceptional circumstances test to be released from the Green Belt and is suitable for residential development for the following reasons:

- . The entire site is under single ownership and is available for development.
- . It presents a natural, high quality extension to the north of Royal Tunbridge Wells in a sustainable location.
- . It presents a viable development opportunity with no abnormal site constraints on development anticipated at the site.
- . It could be delivered in the short to medium term.

It is U+I and RSB's view therefore that the site should be allocated. This will help to ensure that sufficient housing is brought forward early in the plan period avoiding the need to rely solely on the strategic sites.

We trust the contents of this representation are clear and we would welcome the opportunity to discuss further the real development potential of the site with TWBC.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We consider that Land South of Appletree and Devils Wood meets the exceptional circumstances test to be released from the Green Belt and should be allocated for residential development. Please see letter of representations for further detail.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is important the TWBC are able to meet their housing targets over the plan period. There will be important matters to discuss at the hearing sessions to ensure that the plan is sound in this regard.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 2134 Lichfields for U+I & RSB Representation & Annex 1](#)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Hello,

I live on Broadwater Down along the road from the potential development site. I have spent many hours walking and wandering around the beautiful fields and forests surrounding the Ramslye fields since I moved here last year - its been one of the few things that keeps me sane in a world that is becoming more and more insane... Surprisingly, I've never walked across those fields and thought to myself "you know what James, the only thing that would make this walk better is if there were 120 poorly built houses that all look the same with the same terrible monotonous architecture that seem to be being built almost everywhere at the moment". It seems pretty criminal that developments like this are allowed to be built on green belt land when there are so many potential brown field sites available. Is England going to become one giant 1984 like Persimmon housing estate by 2050 - a continuous repetition of the exact same houses that cost £50,000 to build but get sold as 'affordable housing' for £400,000 because they've been built in the South East. Keeps the shareholders happy though.

The problem is, its not just the site that would be developed. The surrounding land will all suffer and become remarkably less wild due to the encroachment of humans and all the dross that follows. As I'm writing this I'm wondering if anyone has actually emailed this address and been for this development. I can't understand who is actually the driving force behind it. Perhaps we should start building development sites in the back gardens of every Conservative party members gardens because, lets face it, if you're in that club you've probably got a 50 acre garden and probably own the fields surrounded so no-one can build there. Alas, the rest of us have to grasp every slither of countryside that has a tiny bit of open access to escape from reality and the reality is, more and more of it is disappearing. Look at HS2 for example, a train line no one asked for, no one really wants at the enormous expense to the taxpayer and also a colossal impact to all the countryside and forest being churned up to save people 30 minutes of travelling across the UK from their home(which definitely has a computer) to sit in a cubicle in London to look at another computer. Its almost like a satire. Although satires are normally funny.

Kind regards

James Vann

Just say no to building on the Ramslye fields.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Have you ever run from Goldsmid Hall up to Somerhill and paused half way up to take in the spectacular views of the surrounding green belt countryside? Or run down from Half Moon Lane through the serenely pretty woods and fields to Tudeley church? This area is agonisingly beautiful.

I am a resident of nearby Postern Lane and have lived in the area for 3.5 years. I suffer the regular inconvenience of heavy rush hour traffic, mainly going in and out of Tonbridge, which is the town principally serving Tudeley.

Situating a new garden town next to Tonbridge will only increase the burden on Tonbridge and its infrastructure rather than burdening/benefitting Tunbridge Wells.

This is one of many puzzling outcomes of the TWBCs plan. Proposed new roads cutting a swathe through large sections of green belt would be a travesty to such a beautiful environment, not to mention the loss of biodiversity, night skies, flood run off etc.

I noted from the many hundreds of pages of plan documents reference to discussions with gas companies. This at a time when we should be fully considering renewable energy sources as opposed to fossil fuels. This again appears to fly in the face of other government initiatives.

Renewable energy and destructive infrastructure are just 2 examples of where the plan is badly thought through. This is then amplified when one of the initial proposals was to situate development close to the A21 corridor meaning better links to existing infrastructure and the other benefits this would bring.

The main argument for development appears to be a single landowner ready to cash in. This is lazy planning and such a legacy would be an unfortunate legacy for all involved if it went ahead.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

I write again, to further object to your plans for the new town in the parish of Capel. You will no doubt have seen the outpouring of objection to this development with all the letters and documents that have been sent over.

It seems incredible to the residents of this area that our elective representatives have continued down the route of approval for the new town.

We bring, again, to your attention the very real concerns about further risk of flooding to our area, challenges with traffic on very fast and narrow roads and most importantly the destruction of a vast swathe of land in the green belt. Tudeley new town has been sighted on a very high piece of ground which will mean changing the far-reaching views for miles around. Currently this area of the landscape is punctuated by historic farmsteads which, if the proposals go ahead, will for ever be islands within a broader urban sprawl. It has been seen in other areas, that where developments like this occur, these farmsteads and historic buildings will fall into disuse and potentially disrepair. Leaving, in time, a blot on the landscape and a permanent loss of our historic environment.

The new bypass which will cut through land near Five Oak Green finishes up outside the local primary school. The parents regularly park on the current main road and so questions about the safety of the children are paramount when considering this proposal.

Another huge issue we have in this area is the education of a secondary school aged children. There is a huge local wish - to virtual fever pitch with multiple tutors employed, appeal processes etc - for parents to get their children into the grammar school system. This overarching ambition of local parents leads to many people moving to the area to take advantage of these lauded schools and despite the developers intention to build a new secondary school within the new town, it is obvious that parents will want to get their children into the grammar schools in Tonbridge and Tunbridge Wells. The traffic to reach the schools every morning puts huge pressure on the local roads already. By 8am traffic is already backing up to the new Tudeley town area and queuing all the way into Tonbridge and Tunbridge Wells. This has never been a problem for decades as I attended school in the area in 1980s and we crawled through traffic in our school bus then.

Put simply, I would ask that your legacy is not to approve this new town but to take a braver stance and look for alternative solutions. This new town will no doubt be a blot on a stunning landscape. Finally, and of particular concern, are conversations I had with councillors at the time of a recent council meeting when they voted for this new development. I was distressed to learn that some councillors were voting for it simply because it meant that they wouldn't then need development in their own wards. This surely isn't good due process as they were effectively being NIMBYs within their own council community. That is to say they did Not feel that this was a good plan or a plan with any merit, but that it simply mean their constituents would not have to deal with the concerns and issues that our parish is facing. This is not good for community spirit meaning that parishes are effectively fighting with each other to manage the future sustainable development of their own areas.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS 1 Paddock Wood inc land at East Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not effective
- ☐ It is not justified
- ☐ It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I've been a resident in Five Oak Green for 17 years, having moved here in 2004 with my wife, the rural location immediately appealed, with a village school and good, local amenities, it was the perfect place to start and raise our family whilst being able to commute easily to London for work. I have always been concerned about traffic increases, flood risk, noise increases, school place availability, access to good medical care and having access to green belt land for walking. These local plans seem to increase the risks of all my concerns, with no consideration to the current village residents and as such I believe the plans are unsound. With a young family, I do not want to be surrounded by extra traffic, noise/sound/light pollution and increased flood risk due to building on green belt land. There are other local sites such as Castle Hill that can cater for the increased housing demand much better. Destroying green belt land for housing which will be out of reach for younger locals seems illogical.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- ☐ Yes, I wish to participate in hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Losing farm land and flood plains - destroying green belt land for housing is unsound offers very little other than income for the property developers.

Consultation Point	Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel (View)
Status	Processed
Submission Type	Web
Version	0.3
Question 1	
Respondent's Name and/or Organisation	Jenny Vincent
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS 1 Strategy for Paddock Wood, including land at east Capel	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Five Oak Green since 2004 and moved into the village newly married with my Husband. It is an lovely small community surrounded by amazing countryside that us and locals enjoy. We now have 2 daughters now 12 & 9 who also love their village location, they both attended the local Capel Primary and my eldest is now at Weald Grammar in Tonbridge, which is 3 miles away. The rush hour traffic (outside of covid restrictions) sees the traffic levels more than doubling the journey time for this short distance and it is not uncommon for the traffic jam to tailback right to FIVE OAK GREEN to the primary school. How can a proposal putting 4,000 houses into 1 location not have any impact on an area. Tonbridge & surrounding areas will just completely ground to a halt with over 4,000 extra cars on the roads. The parish will increase 500% in size and the infrastructure to supposedly help with the traffic (additional roads concreting yet more local fields/ local countryside) will never be in place before the volume of new houses are built. One proposed road would mean concreting farmers field which are home to cows & crops. My daughters have especially loved watching the different crops grow over lockdown and even written to local farmers and become friends with them and even been allowed to name the new calf's after showing such an interest. All this will be lost. With regards to infrastructure I am concerned also as to how sewerage system will cope with the 500% increase in homes in the area. It struggles to cope at the best of times and over the last few years Paddock wood have had sewerage collapses from the strain of new homes built in the area where with infrastructure not considered first. The water companies may suggest wonderful plans but will they be in place before any vast scale of building went ahead? I could continue on much more infrastructure problems, school oversubscriptions in the area as new primary & secondary schools will not be built again until xx amount of houses are built and places in the area are already oversubscribed. With 25+ years to build the housing to this scale you can see that the local problems will get far worse with not infrastructure happening before the plans start. Flooding is also another big issue for the proposed areas. The parish has suffered local flooding in recent years with excess water coming off of the fields that are proposed to be built on. Concreting these areas is just going to exacerbate these problems for the new homes and surrounding areas. How is this a plausible plan? Finally the local wildlife will be dramatically affected. We have seen recently on walks so many animals my daughters have never seen before, lizards, multiple butterflies, buzzards, herons and these are just to name a few. There will be so many animal habitats affected by this vast proposal. Why could the plan not see other brown sites be considered including the Castlefield's area to reduce the impact of the whole area being placed on the boroughs boundary where it is out of site out of mind for the other 19 wards. The proposed housing needs (to which are questionable on them being the realistic 'true' figures) need to be spread amongst the ward in the borough and greatly reduce the size of the proposal in Tudeley. I am concerned that the supposed housing allowance for 'local people ' in these figures will never be truly met when greedy developers put a price tag on them. I can see my daughter's who love this area will never get to bring their families up in this area as it will be too expensive to live and who would want to live in a concrete city?

Five Oak green will just become a continued extension of the ever increasing housing in Paddock Wood & with the plan also for 1,000 houses by the hop farm through the Maidstone borough council will mean virtually any field left in the local area, these again are on flood plains. How big will these expanding plans get if all the boroughs keeps getting these plans passed

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Why have other suitable sites not been considered within the borough?. there are other suitable brownfield sites that should be considered and haven't within the borough, there are now empty office buildings, such as AXA that are for sale, also the old cinema site and the main one at Castlefields site that have suitable land that is not an AONOB. I understand that there is a housing need but not to this level and certainly not to this scale in one area. If Tudeley is to be considered, if numbers are not met in other suitable locations, then this must be as an absolute minimum distribution to the greenbelt in terms of size and scale

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please come and visit our area when reviewing this plan and walk the areas to see how vast the scale and destruction will be to a local small ward of the borough. This needs to be considered in person to see the flaws in the plan not just looking at it on paper .
Thank you for your time in considering my response

Question 2	
Agent's Name and Organisation (if applicable)	Town & Country Planning Solutions
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/HA 1 The Strategy for Hawkhurst parish

Paragraph No(s) 5.351–5.359

Policies Map (Inset Map No) 10

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

These representations are made on behalf of VS LandPro and relate to a former housing site allocation, known as Santer's Yard, Gills Green, Hawkhurst. The site previously formed part of draft Policy AL/HA 9 of the Regulation 18 Consultation version of the draft Tunbridge Wells Local Plan.

However, this draft site allocation was removed as part of the Regulation 19 Consultation Version and these representations seek to demonstrate that its removal is unjustified.

This assessment is provided under separate cover, which has been appended to this form.

[TWBC: for full representation, please see supporting documents]

Representations on behalf of VS LandPro Ltd

1) Introduction

- 1 These representations are submitted on behalf of VS LandPro Ltd (the developer) in relation to a site known as Santer's Yard, Gills Green, Hawkhurst. The site previously comprised a site allocation under draft Policy AL/HA 9 (site assessment reference 422) of the draft Tunbridge Wells Local Plan (regulation 18 consultation), to provide up to 37 dwellings (including 35%

affordable housing) together with employment land falling under B1, B2 and B8 uses (see extract below).

[TWBC: for Site Plan, please see full representation attached as a supporting document]

- 1 However, the site has now been omitted, along with three other sites as part of the Regulation 19 submission version of the draft Plan. This represents a reduction from a housing target 731 dwellings for Hawkhurst down to just 170 dwellings, a reduction of over 75%.
- 2 It is the case of the developer that the removal of the Santer's Yard site is unjustified and as such the proposals for Hawkhurst the plan are unsound. As such, this objection related to draft Policy STR/HA1 and Inset Map 10 of the Submission Draft (i.e. Regulation 19) version of the Plan, which set out the strategic objectives for Hawkhurst over the plan period.

2) Objection to draft Policy STR/HA1 and Inset Map 10

- 1 The Site Assessment Sheet for site AL/HA 9 (reference 422) forming part of the background evidence for the Regulation 19 Submission Version of the Plan is contained in **Appendix 1** attached. Having previously been considered suitable as a housing and employment allocation in the Regulation 18 version of the Draft Plan, the site is considered unsuitable due to the perceived adverse impact upon the landscape character of the High Weald Area of Outstanding Natural Beauty (HWAONB) and the distance from Hawkhurst.

[TWBC: for Appendices, please see supporting documents]

- 1 In terms of the perceived impact upon the HWAONB, the Site Assessment Sheet states that the Council's Landscape and Visual Impact Assessment (LVIA) concluded that the development of the 'whole site would have a severe impact upon the AONB'. However, the relevant section of the Council's LVIA contained in **Appendix 2** suggests that instead of removing the whole site allocation, that the employment land at the northern part of the site should be removed and replaced with public open space and that the residential element at the southern part of the site could be retained without causing significant harm to the HWAONB, subject to the retention of the existing natural boundary features. The Assessment states that;

"The removal of the employment allocation from the site would reduce the potential harm to local landscape character as a result of the proposed development and would provide opportunities to implement enhancements within the site. This change would also protect the settlement pattern and character of Gill's Green. Approximately half of the site would be retained within open space land uses..."

...The proposed housing allocation is in keeping with the existing settlement pattern, however the proposed employment allocation to the north of the site is inconsistent. The proposals are likely to affect the connection to the countryside for a limited number of residents within Gill's Green

The measures set out within the draft allocation policy and additional GI prescriptions would protect the existing boundary vegetation of the site and protect the historic field pattern. It would allow for the introduction of new characteristic features within the proposed open space, which could further screen the settlement from the surrounding landscape.

The policy controls would ensure that the design of the proposals is well thought through and designed to minimise visual intrusion to the landscape.

Careful location of any vehicular access on the southern or south-western boundary, combined with the replacement planting of any lost hedgerow or trees, would maintain the rural character to the two routeways adjacent to the site.

These measures would reduce predicted effects on local landscape character, the amenity of the existing routeways and would protect key features that contribute to the positive character of the site. They would also provide opportunities to improve recreation and pedestrian and cycle connectivity within Gill's Green."

[TWBC: for Appendices, please see supporting documents]

- 1 Prior to the publication of the Council's LVIA, the Applicant submitted a preapplication consultation to the Borough Council, which sought to remove the employment land allocation and replace it with public open space, with an illustrative masterplan showing how the rest of the land might be develop for housing (provided overleaf and reproduced in Appendix 3).

[TWBC: for extract image, please see full representation attached as a supporting document]

[TWBC: for Appendices, please see supporting documents]

- 1 However, despite concluding that the residential allocation at the southern part of the site could be retained in principle, the Council elected to remove the whole site allocation from the submission version of the Plan, with concerns also being raised over the sustainability of the site location.
- 2 As such, VS LandPro have also undertaken a pre-application consultation with Kent County Council Highways, in order to determine whether the proposal would be likely to have a harmful impact upon the local highway network. The County Council's response suggested that a residential development in this location would raise 'some concern', but that this might be addressed through the provision of highway improvements, including the creation of a roadside pathway linking the site to local bus stops and vehicle passing points on Patchwork End.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see wording modifications within the attached document.

[TWBC: for full representation, please see supporting documents]

3) Suggested modifications to Policy STR/HA1 and Inset Map 10

- 1 The Council's own LVIA indicated that the southern part of the site could be allocated for residential uses without having a harmful visual impact upon with HWAONB. As such, the Applicant is proposing that the northern part of the site is retained for public amenity space and ecological enhancements, with the southern part only being allocated for residential uses.
- 2 The illustrative masterplan shows how this scheme might be delivered without having any harmful impact upon the HWAONB. The Applicant's pre-application consultation with ESCC Highways suggests that mitigation measures could be included within the scheme to ensure that the proposal would not have a harmful impact upon the local highway network.
- 3 As such, there was no justification for the removal of this site which would make a valuable contribution to the housing supply in the Borough and as such, this site should be reallocated as a housing site for up to 37 dwellings (including 35% affordable housing), together with the provision of public amenity and ecological enhancement land within the Tunbridge Wells Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

N/A

If you would like to attach a file in support of your comments, please upload it here.

Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a resident of Golden Green, not far from the proposed new housing development at Tudeley (Policy STR/SS 3). I have lived here for 24 years. Our son attended Skinners School.

One of the crucial deciding factors in my decision to buy here was the fact that the house was built on the brownfield site of an old factory and no countryside was destroyed.

I walk extensively in the countryside around Golden Green and am particularly concerned with promoting biodiversity, being a member of several conservation organisations. I have won two Silver Awards for my wildlife garden in the Kent Wildlife Trust's Wildlife Garden annual awards. I have also conducted annual bird surveys locally for the British Trust for Ornithology for the past 15 years.

My objections to "The Strategy for Tudeley Village" (Policy STR/SS 3) are as follows.

- 1 Creating the proposed garden settlement at Tudeley will cause immense habitat destruction and be detrimental to residents of the Parish of Capel and Tonbridge. Green Belt woodland, hedgerows, meadows and farmland must be protected. Flora and fauna that is very special to the area will be destroyed or displaced, including rare species. We are very fortunate in this area to still have turtle doves, nightingales and cuckoos, species that are declining at an alarming rate. (See *State of Nature 2019* report <https://nbn.org.uk/stateofnature2019/>). Urbanisation, including road building, was identified as one of the main drivers of decline.
- 2 It has been acknowledged by the government, mental health charities and the scientific community that engaging with nature is beneficial to people with mental ill-health and it can contribute to a reduction in levels of anxiety, stress, and depression. As our countryside disappears under concrete, where will they go? Many don't have the means or ability to travel distances to national parks or country parks. This necessity for access to nature has been particularly highlighted by the lockdowns during the Covid-19 pandemic.
- 3 Covering farmed fields with houses and roads will make the Medway flood more often and increase flood risk not only in Tudeley but also in Golden Green, East Peckham, Tonbridge and Yalding. Flood risk mitigation and "betterment" could have disastrous consequences for all, as the measures being looked at are based on old data that does not fully consider the impact of climate change.
- 4 Pollution will inevitably occur – air quality will degrade, and noise and light pollution will increase. Most people living in the new garden settlements will drive privately owned cars and the traffic congestion in and around Tonbridge will become totally unacceptable. The proposed closure of Hartlake Road will only exacerbate this.
- 5 People living in Tudeley will use Tonbridge Station for commuting and the increased numbers of passengers on already packed commuter trains from Tonbridge Station – already the busiest station in the South East outside London - will be unsustainable. Parking in and around Tonbridge Station will be even more difficult. Network Rail have confirmed that a station at Tudeley is not viable at present and so will not be built in this plan period.

- 6 The costs of infrastructure on the Tonbridge & Malling side of the boundary will have to be carried by Tonbridge & Malling residents whilst Tunbridge Wells will receive council tax from the residents in the new dwellings. There will be an increase in pressure on Tonbridge health services, amenities and car parking because residents from the new garden settlement at Tudeley will use Tonbridge as their local town, not Tunbridge Wells, because Tonbridge is much closer and hence more convenient.
- 7 The housing need calculated by the government is based on erroneous and out-of-date calculations. Recent ONS figures show that population growth in the borough is slowing and does not take into account the effect of Brexit.
- 8 Finally, on a warm day last summer, I sat in the churchyard of All Saint's Church in Tudeley. The peace and quiet and the wonderful bucolic views were a balm to the soul. When it's surrounded by houses and busy roads, who will count the cost of what we have lost?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Version	0.3
Question 1	
Respondent's Name and/or Organisation	Sean Waddingham
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a resident in Golden Green for over 20 years and living in the area supported by TMBC I strongly feel that the proposed development of Tudeley village is an ill thought-out and poorly considered attempt to plant an unsupported mass of housing on the very boundary of TWBC's area where it will depend and overstress Tonbridge's resources whilst contributing revenue to Tunbridge Wells' coffers. I do not consider there has been adequate effort in the "duty to co-operate".

At a time when Government policy is supposed to be above "levelling up" development across England the reinforcement of the natural economic attractiveness of the South-East by eroding the protection afforded by the "Green Belt" policy to allow large scale housing development, is surely insupportable. Protection under the Green Belt policy should not be waived for convenience. The current plan is based on obsolete information and policies, and should be rejected as unsound as it fails to comply with current national policies.

The Tudeley site is separated from any existing employment opportunities, and the nearest are all located in Tonbridge, since the proposed site is as far as possible from Tunbridge Wells central, creating huge pressure on local transport infrastructure. It may well be that a considerable part of the employed population will be London commuters, needing to use Tonbridge station which is already overstressed at rush hours, as it already has a large catchment area. None of the required infrastructure for employment, education and commercial activity is included in the plan, which is a "dormitory development" relying on an adjacent authority for all its support measures.

The creation of a huge new rainfall run-off paved area at Tudeley instead of remaining productive, absorbent farming land, and which can only exacerbate existing flooding problems downstream of the Leigh Barrier is incompatible with policy. New expenditure planned to enhance the Leigh Barrier's protection for Yalding and other potentially flooded areas including my own home at Golden Green will be wasted if a new source of run-off is created outflanking this defence.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Andrew Wadsworth [REDACTED]

Question 1	
Respondent's Name and/or Organisation	Andrew Wadsworth
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 5.410 to 5.470

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 & 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_112, PSLP_113 and PSLP_125]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Sophia Wadsworth
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 5.410 to 5.470

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 & 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_114, PSLP_115 and PSLP_126]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.5
Data inputter to enter their initials here	KJ
Question 1	
Respondent's Name and/or Organisation	Sophia Wadsworth
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph Nos. 5.410 to 5.470

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End and

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

Inset Maps 17 & 18

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 3 – see Comment Numbers PSLP_114, PSLP_115 and PSLP_126]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

1 Regulation 3(2) of the Town and Country Planning (Local Planning) (England) Regulations 2012, as amended provides:

“where within these Regulations a person may make representations on any matter or document, those representations may be made—(a) in writing, or

(a) in writing, or

(b) by way of electronic communications”.

These options are not stated to be available on the website, except by using the Representation Form. The process of getting to download and complete this response form is unnecessarily convoluted, which has the effect, if not the intention, of making it difficult for the ordinary citizen without special IT skills. For example, we are asked to log in to an organisation to which this process has no doubt been outsourced, complete a separate form for each representation which we wish to make, and limit ourselves to specific areas of comment. This is unnecessarily laborious and does not meet the requirements of Regulation 3(2).

1 Paragraphs 5.421 and 5.422 state that in the event that the Benenden Neighbourhood Plan is adopted all the policies relating to Benenden AL/BE 1 to 4 will be omitted and the Neighbourhood Plan will be used instead. It is submitted that this is unlawful. Nowhere in the Act or in the Regulations is the Local Planning Authority given the power to delegate its statutory duty to another authority. Regulation 5 does not have this effect. Section 15 of the Planning and Compulsory Purchase Act 2004, as amended, requires the Local Planning Authority to prepare and maintain a local development scheme which must specify development plan documents. Section 19 (2) sets out the matters to which it must have regard. Nowhere is it given power to

pass the duty over to a parish council. This is important because the *merits* of a Local Plan must undergo an independent examination (see Section 20) whereas the merits of a Neighbourhood Plan do not. They are subject to independent scrutiny to see whether they comply with the rules, thus a Neighbourhood Plan may be adopted without any consideration of its merits. This amounts to a breach of the rules of Natural Justice (*delegatus non potest delegare*).

- 2 Under the Town and Country Planning (Local Planning) (England) Regulations 2012 as amended, regulation 18 (3), the Local Planning Authority *must* take into account any representation made in response to a representation made under Regulation 18 (1). The Local Authority has been told in the clearest terms in my previous submission of 30 October 2019 and that of many others at the same time, that there is no shop nor pre-school nursery at the East End. Yet paragraph 5.413 of the Plan perpetuates the myth that there is a shop in the hospital and nursery/pre-school facilities at the East End. This statement appears in the original versions of the Local Plan, to which its attention was drawn in many other earlier objections. There are no public amenities at the East End, there is an in-house café at the hospital, reserved for patients and staff, not open to the public. The Planning Authority should know this. This affects the sustainability of the proposals at AL/BE 3 and AL/BE 4.
- 3 Policy PSTR/BE1 item 3b and c requires that developers who acquire land in Benenden village will have to make contributions which will be used towards the provision of the expansion of Hawkhurst primary school (which does not serve Benenden since it has its own primary school) and library provision, adult learning and social care at a new Cranbrook Community Hub, which has nothing to do with Benenden. These items do not appear in the Benenden Neighbourhood Plan for obvious reasons. They cannot properly amount to proposals for Benenden.

4 **Soundness, consistency and correct evidence**

The Local Plan (LP) sets out a vision and strategies which are undermined by its allocations, particularly by its allocations to the East End of Benenden at the two hospital sites, AL/BE3 & 4, sites which are roughly 3 miles equidistant from both Benenden and Biddenden (but just in the parish of Benenden). The LP is not sound nor are its strategies consistent with its policies in relation to AL/BE 3 & 4.

1 **Vision**

Vision Objective 1: “to improve access to suitable, especially affordable housing, including for local young people and older households.”

- . Para 5.467 states of AL/BE3 “it is likely that residents of development in this location will rely heavily on private cars”. The same is said for AL/BE4.
- . The plan allocates affordable housing to an area with intrinsically higher living costs instead of to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre
- . While the LP asks for 30% affordable housing, the Benenden Health Society (BHS) is asking, in its comments on the TWLP draft plan, to have this figure reduced
- . The sites will not be suitable for the elderly who will be unable to walk to shops or amenities, yet the LP states that the over 65s are an increasingly important part of the population. They are expected to increase, as a percentage of the total population, by 40% during the period of this plan.

The viability of the two sites depends almost entirely on the plan’s attempt to mitigate the problem of unsustainability. The mitigation proposals are unsound.

1 **Transport:**

- . The proposal is for public transport connections and active travel links, but the BHS in its response to the TW draft LP states (DLP_4956.3) that it not a transport provider and will not run a daily service into Benenden, nor a regular service to Tenterden. All it offers is some financial contribution towards such services. Who will bear financial and organisational responsibility for them? This proposal is based on conjecture and wishful thinking.
- . The LP does not map out any active travel links with the village because there are none. Establishing such links would require land purchase. Who will purchase the land and set up the links? The proposal is based on conjecture and wishful thinking. Even if such a link in the form of a cycle path is provided, it would only be used for leisure cycling, not for shopping or taking the children to school.

1 **Amenities:**

The SHELAA acknowledges that the hospital sites are unsustainable. It states they are “remote from a settlement centre”. The unsustainable nature of site AL/BE4 is demonstrated in Table 58 of the Sustainability Appraisal (page 163). AL/BE4 scores as being “very negative” to “negative” on the

sustainability topic of Services and Facilities, and as being “negative” on the sustainability topic of Travel. The same is true of AL/BE3. Sites 158 in the village, and LS8 in Iden Green, on the other hand, have no very negative scores, appendix L page 331.

The amenity problem is to be partly overcome, according to the LP, by establishing public access to the hospital shop and to its café, but this mitigation measure is wholly unsound because:

- . There is no hospital shop at present
- . The BHS states in its response to the TW draft LP that its facilities, including the café, have been designed solely for hospital use so even if there were a shop, it would not be available to the public.
- . The land at AL/BE 3 is currently up for sale. Once it has been sold, the BHS could not be bound by any planning conditions, which run with the land.

1 Strategies

The LP's policies on AL/BE 3 & 4 undermine the following Strategic Policies

Policy STR1, which calls for a focus on new development within LBDs and for a limit to development in the countryside.

Sites AL/BE 3 & 4 are almost three miles outside the LBD and in the countryside, midway between the villages of Benenden and Biddenden.

Policy STR 2

“The Council requires the use of master planning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..”

This is undermined since no master plan has been produced for sites AL/BE 3 & 4

Policy STR 3 Calls for the use of brownfield sites “within settlements” and in “sustainable locations.”

AL/BE 3 & 4 are neither.

AL/BE 3 consists of disused medical buildings and 2 Local Wildlife Sites (LWS), one of them containing fine specimen trees and another an important collection of waxcap fungi. BHS plans for the site show houses built over the LWS and beyond the footprint of existing buildings.

There is no such plan for AL/BE 4 which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and available to let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP, with the LP potentially including the LWS in the area to be developed. The BHS in its response to the LP has stated that its proposals for an additional 25 houses is based on the land allocated it in the LP, and not on the land allocated in the BNP. This implies that the BNP does not offer them sufficient hectareage. It is unsound to proceed with a plan when the developer's plans and the land that they are expecting to develop are not clearly stated, especially when an LWS is at stake. It is unsound to accept a proposal ‘on trust’. **The Benenden Neighbourhood Plan cannot be used as a substitute for AL/BE 3 or 4 when it is at variance with it.**

Policy STR 5 states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.”

Developers themselves would have to provide the infrastructure at AL/BE 3&4, since no one else would. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. BHS suggests, in its response to the earlier draft LP (DLP_4956.3 3.14) that it may encroach on the LWS and it is unlikely to provide play-grounds, sports facilities and tennis courts. Since BHS has put part of the site up for sale, it is clear that, if it sells, it will no longer be bound by any planning conditions, and the purchaser will have no power to make use of facilities in the hospital itself. There is no provision in the published layout for any such facilities on site. The LP's approach is therefore unsound.

Policy STR 6

The LP proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.”

In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport and to prioritise active travel and public transport. The Benenden hospital

sites have no active travel link with the village, no existing daily bus route and neither the LP nor the BHS provide credible information on how these links are to be provided. As for the proposal to create links suitable for electrical personal vehicles, such as mobility scooters (as suggested under STR 6) it is difficult to see, when the only link with the village is a single-track lane, how it can be used by personal electric vehicles.

Policy STR 7

The LP proposes in dealing with TWBC's legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030.

It is unsound with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages, where it is accepted that all journeys will be by motor car.

Policy STR 8

The LP states that development should contribute to and enhance ... rural landscapes with particular regard to the HW AONB and developers will have to demonstrate that they do this. The LP promotes nature conservation. Its biodiversity objective is to achieve net gains and where possible secure long-term managements of sites for biodiversity. The proposals for a suburban-style estate of 92 houses, plus a further 6 at Cleveland's Farm, if passed, produces the very opposite effect. No commercially viable scheme can produce net gains in a rural setting such as this. Sites AL/BE 3 and 4 are surrounded by the AONB, although this is not shown on the Inset map 18, in distinction to map 17, which does show it for the rest of the village. The sites are plainly land which affects the AONB, for the purposes of section 85(1) of the Countryside and Rights of Way Act 2000, which says: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty." (my italics)

1 Irrelevant and misguided supporting document

Part of the LP's conclusions are based on supporting document *AONB Settings Study, Plans and Photos of Benenden Hospital*, by *Hankinson & Duckett*. This report is on the entire hospital site and not on sites AL/BE 3 & 4 on their own. Their conclusions that the north western car park might look better with houses on it may or may not be true, but since this area is not part of the site under consideration, the conclusion is irrelevant.

Its review of Green Lane to the south is relevant to AL/BE3 but the conclusions fail to impress. Green Lane is a rural lane which, according to TWBC's *Rural Lanes: Supplementary Planning Guidance*, scores very highly in terms of its landscape, recreational value, natural beauty and history. As such it is designated part of National Route 18, a 42-mile cycle ride between Ashford and Tunbridge Wells, running largely through unspoilt country lanes with wide grass verges and undisturbed rural scenery. AL/BE 3 proposes two major entrances onto this lane for a housing estate of up to 49 houses. Such a development would almost certainly entail a widening of the lane itself and the abolition of its grass verges which would be a contravention of Kent Structure Plan Policy ENV13: *Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.*

1 Local Wildlife Sites (LWS)

There are 60 LWS in the entire borough and of these, 4 are situated in Benenden hospital grounds, with 3 in the grounds proposed for almost 100 new houses. One of these is in the northern site of AL/BE4 and two are in AL/BE3. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI.

The LP purports to protect the LWS but Para 3.21 of the BHS submission on the LP shows plans to remove one of the LWS.

"3.21. The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area." This is ecologically illiterate. Moving a LWS

by digging it up and putting the earth somewhere else is unlikely to protect the rare waxcap fungi which are of national importance. Indeed, the LP now speaks of the LWS in AL/BE3 in the singular, (para 5.451) as if one of the sites had already been removed.

High value environmental area

Comment DLP_3458 from the High Weald AONB Unit states that the Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”*

No respect for LWS

Although the LP claims building will only be within existing footprints, the developers, with whom the BNP Steering Committee is working closely, do not appear to reflect the same standards. Plans for 47 new houses in the SE Quadrant, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS. The TW Local Plan has allocated sites originally allocated by the BNP (the only parish in the borough to allocate its own sites) and the hospital sites are the major target for all building in the parish.

Long-term Management plans

Long-term management plans of green spaces within housing estates are, unfortunately, no substitute for natural wild spaces of the kind you find in field hedgerows and shaws. A ‘managed’ and regularly mown green space set between tarmacked streets, lit housing estates and pavements is less likely to promote biodiversity and less likely to conserve wildlife than an ‘unmanaged’ green space of the kind you currently find along our country lanes. Net biodiversity gain from the construction of a housing estate in the countryside is a contradiction in terms.

1 The AONB

The LP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454) but the claim is not supported by the evidence (*Hankinson & Duckett*) and differs from the HW AONB unit’s own assessment of the plans.

See the comment on TW Draft Plan **DLP_3458 High Weald AONB Unit:** *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

1 Failure to hold consultations with stakeholders or to hold them in a timely fashion.

- . The BNP, on which the LP’s allocations are based, allocated sites in its first draft in February 2019. These are the same sites that appear today in the LP.
- . These sites were allocated before writing to the SEA requesting a review of sites.
- . The BNP steering committee did not ask the High Weald AONB Unit to review the hospital sites, although it asked them to review the other sites.
- . Heritage England was, we believe not invited to review the plan and was only able to make comments on publication of the draft TW LP

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses,

preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

TUNBRIDGE WELLS LOCAL PLAN PRE-SUBMISSION VERSION – REGULATION 19 CONSULTATION – REPRESENTATIONS ON BEHALF OF WAITROSE & PARTNERS

On behalf of our clients Waitrose & Partners, we wish to submit representations to the Pre-Submission (reg.19) consultation draft of the Tunbridge Wells Borough Local Plan. Our representations specifically relate to the robustness of the Council's proposed policy approach to accommodating the identified quantitative convenience (food) goods retail needs which the supporting evidence base to the new Local Plan has identified.

The Pre-Submission Draft Local Plan is supported by an up-to-date retail needs assessment, the 'Tunbridge Wells Retail, Commercial Leisure and Town Centre Uses Study Update 2021' ('the retail study'), which was prepared by Nexus Planning and published in February 2021. This study identifies a positive residual convenience goods spend in the Borough throughout the period of the new Local Plan, including a current (2021) surplus of £39.0m of convenience goods spend, which is available to support the development of new convenience goods floorspace. This surplus convenience spend will increase to £68.2m by the end of the new Local Plan period in 2038, a growth of £29.2m. It is considered that this represents a significant level of expenditure growth to leave unaccounted for from a spatial planning perspective.

The retail study identifies that the above levels of surplus convenience spend translates into a positive requirement for new convenience goods floorspace (i.e., new foodstore floorspace) At the retail study and Local Plan base year, 2021, this requirement for new convenience floorspace is identified by the retail study as being between 3,100 sq.m and 5,400 sq.m net of additional floorspace which is required in the Borough. It is important to emphasise that this represents a current requirement to serve the existing residential population of Tunbridge Wells Borough, before any increases in population and expenditure growth are factored in. Therefore, the capacity identified is not long-term, strategic needs predicated on potential levels of population growth - it is capacity which is required to serve the current population of the Borough. As set out above, this is a significant level of capacity which is, under the current proposed policy approach, not accounted for in a spatial planning perspective.

Convenience goods floorspace capacity will increase further in the future as population and expenditure growth comes forward, and the retail study identifies a floorspace capacity of between 5,300 and 9,300 sq.m net additional convenience goods floorspace by 2038 in Tunbridge Wells. This is a significant quantitative requirement which will need to be met through the provision of several new foodstores

across the Borough, both in existing urban areas such as Royal Tunbridge Wells, and to serve both new communities/growth areas and existing residents.

In the case of the Royal Tunbridge Wells urban area alone there is a growth in convenience goods spend of £8.4m over the Local Plan period. The Council's retail study identifies that the majority of convenience goods floorspace in the Borough, and particularly larger format 'supermarket' floorspace (i.e. stores which meet main/ weekly shopping trips e.g. Sainsbury's at Linden Park Road and Tesco at Pembury) is already trading at significantly above average levels, and this will become further pronounced as population growth (and thus additional retail spend) comes forward. It is well-established that overtrading of floorspace is an important qualitative consideration when considering the 'need' for new retail floorspace.

Notwithstanding this clear identified 'need', Para 4.30 of the Reg.19 Local Plan confirms the Council does not intend to allocate any sites to meet the requirements identified by up-to-date evidence. Referencing the findings of the retail study, para 4.30 of the Reg.19 Local Plan states that:

'Although it [the retail study] does identify a quantitative capacity for new convenience floorspace, it is not recommended that specific allocations should be made to meet this need, but rather this floorspace capacity should be achieved through the bolstering of existing or proposed stores within existing centres in the adopted retail hierarchy, given the substantial amount of vacant retail floorspace currently available, particularly in Royal Tunbridge Wells Town Centre.'

Given the significant levels of population and expenditure growth identified, coupled with the substantial over-trading of existing larger foodstores in the Royal Tunbridge Wells area, it is therefore not considered robust that the Local Plan does not seek to positively plan for accommodating the identified needs by up-to-date evidence.

Furthermore, the proposed policy approach of strengthening existing/proposed stores (as set out above) will not accommodate the needs identified. For example, in Royal Tunbridge Wells, existing town centre foodstores are small-scale and on sites which do not readily lend themselves to expansion. Similarly, whilst we do not dispute the fact that there is vacant floorspace in Royal Tunbridge Wells town centre, for the Local Plan to infer that this floorspace can accommodate the identified convenience goods capacity is considered to be inaccurate. The floorspace currently vacant in Royal Tunbridge Wells town centre is split across a large number of units, most of which are small-scale in nature and unsuitable for foodstore operations. It is imperative that any site allocated should be capable of accommodating a foodstore that can compete effectively with the existing larger-format supermarkets in terms of its size, range of goods sold and car parking facilities.

In instances where town centres cannot meet the levels of need identified, the Planning Practice Guidance 'Town Centres and Retail' (Online - Paragraph: 005 Reference ID: 2b-005-20190722) makes it clear that ***'planning authorities should plan positively to identify the most appropriate alternative strategy for meeting the identified need for these main town centre uses, having regard to the sequential and impact tests (our emphasis).*** Accordingly, in line with this guidance, the Council should consider alternative sites outside of the Town Centre to meet the identified need for convenience goods floorspace where they satisfy the sequential approach and impact tests. In tandem, this approach could also ensure that new convenience goods floorspace can be provided on sites well related to the proposed housing growth locations, particularly in the southern part of Royal Tunbridge Wells.

It is important to note there continues to be active retail operator demand for store representation from foodstore operators such as Waitrose & Partners in Royal Tunbridge Wells and the Local Plan should provide clear guidance on where new convenience retail can be accommodated in order to meet residents' needs in a sustainable manner. We therefore disagree with the assertion at para 5.23 of the Reg.19 Local Plan that *'In terms of convenience retail, although there is some need identified, it is not considered necessary to allocate sites to meet this need.'*

On the basis of the above, it is requested that the Council's current policy approach of not allocating sites to meet the significant convenience (food) goods needs which have been identified by up-to-date evidence is reconsidered.

Waitrose & Partners would welcome discussions with officers on the points made in these representations once they have had an opportunity to review. In the meantime we look forward to receiving confirmation of receipt and that the representations have been duly made

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 2	
Agent's Name and Organisation (if applicable)	Lesley Wakeling
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Paragraph 1,2,3 - with reference mainly to these points as they form the basis of the plan.	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	Don't know

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I object to the plan of building so many houses in green belt area. I also object that the infrastructure is not being put in place prior to the consideration of starting building works. The impact on the current residents is terrible and frankly scary. I am aware that consideration is being made to close the railway bridge on Maidstone Road to through traffic which cuts the town in 2. You have defined that most people live in the south of the town and there is a massive employment opportunity in the North, yet the bridge is the link to the 2. The intended traffic flow to enter PW from the North would cause massive congestion at Badsell Road, Mascalls junction and into the town. This would in turn cause shoppers to not come to PW and the shops would close. Look at Tonbridge High Street. People do not walk or cycle as they have lives where the car is integral to work/childcare/schools etc. Please reconsider this crazy decision and stop trying to turn what was a country town, the place I chose to live into a concrete maze where I do not wish to remain. Please consider the current residents and not the future ones who may or may not work locally/commute to London due to the change in working trend. These plans were drawn up prior to Covid 19 and should be reviewed.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I would ask that you consider the programme for any work and put infrastructure in place first, then build accordingly with consideration for current residents and their current needs. To make alterations just to tick 'Green Policies' is wrong. Yes we consider the future but how can having to drive twice as far to get to and from work because of a major detour with the railway bridge closed be an effective benefit to the environment. All the traffic sitting in a queue with engines running.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

i do not support the long term plan for Paddock Wood. It is harmful to the environment and to my mind the infrastructure of the area is not being given priority. I think the plan needs a review following the change in lifestyles and work patterns due to Covid 19. Will people travel to London. Will people work locally, meaning 10-15 mile radius, therefore needing easy access to the full circumference of PW. If the retail area is to be encouraged then it needs to invite easy access for outsiders or it will close and die.

People rely on cars for their busy lives. Walking and cycling is a thing of the past for day to day living. Mum doesnt have time to walk the children to school, go home, get the car, go to work, drive home, walk to school etc and likewise with the shopping.

The railway bridge closure idea is mad and not a step forward at all.

I think TWBC is jut out to wreck Paddock Wood.

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paddock Wood: Totally against the Draft Plan for 4000 Houses for Paddock Wood, East Capel & Tudley Village.

We Need Social Housing in the Area, for People who Live In Paddock Wood and Capel. But before that we need infrastructure in place before any Houses are built! The mention Infrastructure is in the Draft Plan.

The Green Belt will be concrete over and lost of Wildlife, Trees Hedgerows as well as Farmland for Farmers to grow Food etc for the County and Nation. Instead of Garden Of England, it be called Concrete Of England.

I totally reject the Draft Plan for 4000 Houses in Paddock Wood & Capel.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 1	
Respondent's Name and/or Organisation	Gail Watson
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not effective
- ☐ It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Capel for more than 20 years, having moved to the area from Sevenoaks because of the peaceful countryside and to get away from traffic congestion and a built up area. We live on the outskirts of Five Oak Green and will be directly affected by the proposed link road which will run from Capel Primary School immediately in front of our house.

Since moving to the area the road traffic has become more of a problem, with cars racing down Church Lane and along the main road in Five Oak Green, where it is amazing that there have not been serious fatalities. There are times each day when we cannot go out by car because of cars parked on both sides of Church Lane, during term time. Occasional mobile speed cameras have no effect. Even today there are times when there are lengthy delays to get to/from Tonbridge because of the hold ups near the Somerhill schools, and having TGV next door will make this even worse. The area around the FOG shop is already very dangerous, with traffic constantly passing and no easy parking, with cars parked all around the green and on pavements and delivery lorries making it impossible to pass at certain times of the day. Increased traffic volumes will make all of this considerably worse.

The building plans are totally out of proportion to the local area, meaning that Capel will be swamped by a huge number of houses nearby. It is currently very difficult to get a doctor's appointment, meaning that thousands of families will be joining already stretched surgeries. There will be a similar knock on effect in respect of all other local services and transport.

The plans for the land East of Capel and surrounding Paddock Wood, together with TGV will almost all be built on farmland to the benefit of one already wealthy individual, and will make life a lot easier for TWBC as there is only one landowner to deal with. It was only a few years ago that TWBC turned down a modest planning application from the Poacher and Partridge pub saying that this would spoil the surrounding countryside, yet the same individuals are now happy to build 4000 houses literally next door.

The current proposals have taken no regard to alternative sites proposed, such as the Castle Hill proposal. Equally no consideration has been made to scaling down the proposals to a more manageable level. As such, I feel that the public consultation is a tick box exercise and a sham.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposals do not take into account any alternative sites or the possibility of a scaled down version (ie far fewer houses)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because having local people participate is the only way to stop this development taking place

I have been made aware recently that your new plans for the enormous development at Tudeley now includes closing Hartlake Road and I therefore address most of my comments to Policy STR/CA1 The Strategy for Capel Parish and Policy AL/CA1 Tudeley Village.

I have previously emailed to state my objects to the development based on the horrific impact it will have on the environment, the worrying impact it could have on an area which already struggles with flooding and the massive increase in traffic the development will cause.

The answer to reducing traffic cannot be to close the road. That is lazy and incompetent and simply moves the problem to other areas - namely the Hadlow road and Tonbridge town. I live in Golden Green - at one end of Hartlake road. My children (in Reception and Year 1) attend Bishop Chavassee - at the other end of Hartlake road. It currently takes me between 5 and 10 minutes to get there, and the same to get back, morning and afternoon for school drop off and collection. Is your plan for people in my situation that I now need to make a journey all the way through the already overcrowded Tonbridge town centre to the school? A trip which will take at least 45 minutes each way for the next 6 years?! This is not the answer to clearing congestion, you are simply moving the congestion to make it someone else's problem. You are negatively impacting many thousands of lives in the borough of Tonbridge, as well as destroying Kent's beautiful green belt in order to line the pockets of Tunbridge Wells borough council. It is a shameful and cowardly thing to do and I urge you to rethink your plans.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have very recently been made aware of new plans for the enormous development at Tudeley now including closing Hartlake Road and I therefore address most of my comments to Policy STR/CA1 The Strategy for Capel Parish and Policy AL/CA1 Tudeley Village.

I have emailed before stating my objections to the development. This is primarily based on the huge detrimental impact it will have on the environment, the flooding in the area and the massive increase in traffic.

Closing Hartlake Road is a dreadfully lazy and ill-considered idea. It reeks of incompetence. It does nothing more than move the traffic problem to other areas, ie, the Hadlow road and Tonbridge town. My family and I live in Golden Green - at one end of Hartlake road. Our children (in Reception and Year 1) attend Bishop Chavasse - at the other end of Hartlake Road. This is currently a 5 to 10 minutes journey. Do we now need to make a journey all the way through the already overcrowded Tonbridge town centre to the school? A trip which will take at least 45 minutes each way for the next 6 years?! This is not the answer to clearing congestion, you are simply moving the congestion to make it someone else's problem. You are negatively impacting many hundreds of lives in the borough of Tonbridge, as well as destroying Kent's beautiful green belt in order to line the pockets of Tunbridge Wells borough council.

Your plan is ill-considered and fundamentally flawed. It is shameful and cowardly and I urge you to rethink your plans.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
----------------------	-----

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

With respect to legal compliance and specifically duty to cooperate matters, Wealden District Council and Tunbridge Wells Borough Council have signed a Statement of Common Ground (SoCG) in March 2021. The overall aim of the SoCG between the two parties is to demonstrate that ongoing and appropriate engagement and co-ordination is taking place between the parties that includes planning for identified cross-boundary strategic planning issues that exist and/or likely to arise resulting from the emerging Tunbridge Wells Borough Pre-Submission Local Plan that has now been published for its representation stage under regulation 19 of the Town and Country Planning (Local Planning) Regulations 2012 (as amended). This was agreed by Wealden District Council's Portfolio Holder for Planning and Development on 12th March 2021.

The SoCG confirms that effective cooperation is taking place between the parties in relation to matters that includes development on the administrative boundary between the two local planning authorities, housing provision, economic development, cross boundary infrastructure issues and matters relating to the natural environment, including the Ashdown Forest Special Area of Conservation (SAC) and Special Protection Area (SPA).

With respect to development on the administrative boundary between Tunbridge Wells Borough and Wealden District, the local authorities have agreed to work cooperatively on such issues and have agreed a protocol and set of principles for dealing with development on or close to the border between Royal Tunbridge Wells and Wealden District. These are set out in the SoCG under paragraph 2.6. It is noted that the emerging Tunbridge Wells Local Plan has allocated land under Policy AL/RTW 16 (named as Land to the west of Eridge Road at Spratsbrook Farm) for 120 dwellings. The Council is satisfied that the policy addresses the impacts on the adjacent land within the Wealden District Council area, and in terms of infrastructure provision with the relevant highway authority's.

In terms of housing provision, it is clear that the emerging Tunbridge Wells Borough Pre-Submission Local Plan sets out to at least meet its own need under the 'standard methodology', which equates to 678 dwellings per annum, or 12,204 homes over the plan period for 2020-2038. Indeed, the total supply expected from the emerging Local Plan ranges from 13,059-13,444 net dwellings, which allows for a buffer to either meet the unmet housing needs from neighbouring local authorities (most notably Sevenoaks District Council) or to ensure the deliverability of the Local Plan if certain housing allocations are delayed or do not come forward. The emerging Wealden District Council Local Plan, although at an earlier stage in the plan-making process, is also intending to meet its own housing needs that equates to 1,225 dwellings per annum under the 'standard methodology'. Wealden District Council will need to test this through the production of its new Local Plan.

It should be noted that Tunbridge Wells Borough Council formally wrote in early October 2020 to Wealden District Council (amongst other neighbouring local planning authorities) to ask what capacity

we would have to assist in delivering housing given the requirement for local planning authorities to look beyond the Green Belt first before releasing such land for development (paragraph 137 of the National Planning Policy Framework (NPPF)), as well as limiting major developments in Areas of Outstanding Natural Beauty (AONB) to where there are exceptional circumstances and in the public interest (paragraph 172 of the NPPF). The Council responded to this request and this is detailed within the SoCG at paragraph 3.2.8.

It should be noted that both authorities are intending to meet their own economic development needs, retail needs and gypsy and traveller accommodation needs through their respective Local Plans. There has been no request from Tunbridge Wells Borough Council or Wealden District Council at this stage to meet each other's needs in this regard. Both Councils will continue to operate existing joint working arrangements, as detailed in the SoCG, to ensure that suitable provision can be made as appropriate.

With respect to the Ashdown Forest Special Area of Conservation (SAC) and Special Protection Area (SPA), it is noted that the Habitats Regulation Assessment (HRA) accompanying the Tunbridge Wells Borough Pre-Submission Local Plan concludes that at this point in time, the Development Plan Document (DPD) does not present any potential risks to European Sites that it is considered are not capable of being mitigated. Both local authorities will continue to work as part of the Ashdown Forest working group for air quality and the Strategic Access Management and Monitoring Strategy (SAMMS) partnership to address visitor pressure in order to secure a common understanding and agreement on effects, avoidance, mitigation and monitoring and where possible to agree and cost share future studies or surveys.

It is considered that the Regulation 19 Tunbridge Wells Borough Pre-Submission Local Plan does not raise any new cross-boundary strategic issues in relation to matters identified above and therefore the Council is satisfied that the legal requirements of the duty to cooperate have been met with respect to Wealden District Council.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

[TWBC: the below text is from relevant sections of the submitted representation, which has also been attached as a supporting document]

TUNBRIDGE WELLS BOROUGH - LOCAL PLAN

REGULATION 19 PRE-SUBMISSION CONSULTATION

LAND AT STREATLEY, HAWKHURST

REPRESENTATIONS SUBMITTED ON BEHALF OF WEALDEN HOMES

June 2021

1.0 INTRODUCTION

1.1 These representations are submitted on behalf of Wealden Homes in response to the Tunbridge Wells Borough Local Plan - Regulation 19 Consultation. The Consultation (26 March – 04 June 2021) comprises a "Pre-Submission" consultation document as part of the Local Plan process. It follows the earlier Reg 18 "Issues and Options" (May – June 2017) and Reg 18 "Draft Local Plan" (Sept – Nov 2019) stages of the Local Plan to which Wealden Homes has previously made representations to.

1.2 Wealden Homes is a local and SME housebuilder and has interests at land at the Streatley property on Horns Road, Hawkhurst (the “site”) which forms an omission site in the Local Plan. The site is assessed under site reference no. 52 as part of the Sustainability Appraisal (SA) and SHELAA processes.

1.3 Notwithstanding our client’s interests, these representations have been prepared in objective terms and assesses the Local Plan against the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). In this regard, we set out below the main aspects of these representations as follows:

a) Local Plan Strategy – Meeting Housing Need

- The Local Plan seeks to meet the Government’s Standard Method for new homes (678dpa) over an 18-year Plan period (2020 – 2038);
- This entails a need for 12,204 units over 18 years;
- The Local Plan seeks to provide 13,069 – 13,444 dwellings during the Plan period;
- Taking the mid-point of the above, this provides a buffer of 8.6%;
- We consider that a buffer closer to 20% would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks;
- We consider that the range of dwellings proposed provides uncertainty as to the extent of housing need being met.

b) Land at Streatley, Horns Road, Hawkhurst

- Our client’s site provides a “suitable”, “achievable”, “available” and “deliverable” site for development up to 40 dwellings;
- These representations object to assessments of the site set out in the SA and SHELAA;
- The proposals would respond positively towards meeting housing need in the Borough area;
- The proposals would make a meaningful contribution towards achieving a 20% buffer in the Local Plan;
- Development of the Site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client’s site can be considered positively in this context.

1.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client’s site can make a meaningful contribution towards achieving a 20% buffer.

2.0 LOCAL PLAN STRATEGY – “MEETING HOUSING NEEDS”

2.1 This section sets out our representations on the Local Plan spatial strategy with regard to meeting housing need. This has particular reference to **Policy STR1 (The Development Strategy)** and its supporting paragraphs.

a) Housing Need

2.2 In line with the Government’s Standard Method for housing need, the Local Plan needs to plan for the delivery of 12,204 new homes during the Plan period 2020 – 2038. This amounts to 678 dwellings per annum.

2.3 The emerging Local Plan is seeking to provide for a “lower” and “upper” range in the quantum of development, as extending from 13,059 – 13,444 dwellings. This is made up of existing committed sites and proposed allocations as follows:

Table 1: Local Plan housing strategy

Housing Strategy

Requirement

12,204

12,204

Buffer

855 (7%)

1,240 (10%)

2.4 We support the ability of the Plan to seek to meet its own needs in full. However, the use of “lower” and “upper” ranges, as above, provides uncertainty in terms of the quantum of development to be achieved by the Local Plan. In this context, we note that the Local Plan seeks to achieve a 7 – 10% buffer and this range entails a difference 385 dwellings.

2.5 We consider that the Plan should be seeking to achieve a greater buffer of up to 20%. There are a number of factors underpinning this objective as set below.

i. Delivering a sufficient supply of homes

2.6 Tunbridge Wells Borough Council has not been able to demonstrate a 5-year supply of housing land for a number of years (c. 5 years+). TWBC’s stated supply currently stands at 4.83 years.

2.7 Equally, the Housing Delivery Test Measurement (2020) amounts to 85% delivery in Tunbridge Wells in the previous three measurement years as follows:

Table 2: Housing Delivery Test Measurement 2020 (as at Feb 2021)

2017-18

2018-19

1,807

No. of homes delivered

519

553

474

1,540

Shortfall/Surplus

85%

Action required

Action Plan

2.8 It is evident from the above that there has been recent and continued under delivery of homes in TWBC. The NPPF (footnote 39) is clear in-so-far as a 20% buffer should be applied whereby the HDT falls below 85%. The objective of this is to redress previous shortages in supply and in this light, we consider that up to/in the region of a 20% buffer should be applied for the Local Plan. This will ensure that flexibility in supply is provided as well as securing choice and competition in the market for new homes.

ii. Addressing Affordability

2.9 The ability to afford a home is a problematic issue in TWBC. This is the result of many socioeconomic factors; one of which relates to housing demand and the shortfall in supply. Delivery over the past 10 years (2010/11 – 2019/20) has averaged 330dpa in TWBC. This is **half** the housing need determined by the Council's Objective Assessment of Housing Need (OAN) determined under the policies of the 2012 NPPF (648dpa). The 2019 NPPF introduced the 'Standard Method' for calculating **minimum** local housing need, replacing the OAN. The **minimum** need calculated by this method is higher than the OAN at 678dpa for Tunbridge Wells. However, it is important to note how this figure is 'capped' due to the acute affordability problems in the Borough. If the Standard Method were uncapped, it shows need of 764dpa in Tunbridge Wells. As the PPG (ID2a-007) states, "*The cap is applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible*" however it also states that "*The cap reduces the minimum number generated by the standard method, but **does not reduce housing need itself***" (our emphasis). The minimum that should be targeted by the Council is delivery of 678dpa, as **actual** housing need in Tunbridge Wells is higher at 764dpa.

2.10 To put the affordability issues in context, the median affordability ratio is used for the purposes of calculating the Standard Method minimum. The ratio in Tunbridge Wells is currently 13.27. This means a household earning a median salary would require 13.27 times that salary to afford a median priced home in the Borough. A median priced home costs £390,000 as of 2020. The median ratio compares to an average of only 7.84 nationally, 9.92 in the south-east, and 10.06 across Kent. This means the ratio in Tunbridge Wells is 69% higher than the national average, 34% higher than the regional average, and 32% higher than the Kent average. The ratio also increased most from the previous 2019 ratio in Kent, and is the 12th highest in the country outside of London.

2.11 It is clear that additional housing is required in the Borough to address the acute affordability problems inherent there, which have only been exacerbated by the lack of delivery over the past decade. This is needed to address both supply and demand, thereby driving down price. A 20% buffer is therefore considered appropriate having regard to the above market signals and the need to address affordability concerns. Such a buffer has been accepted at Examinations for other nearby local authority areas (with similar/lower affordability ratios) including Canterbury (2017), Mid Sussex (2017/18) and Guildford (2018). It is thereby recommended that the planned supply of homes is increased in the Plan in order to secure a 20% buffer.

iii Responding to potential unmet needs from Sevenoaks

2.12 TWBC shares a number of functional relationships with adjacent local authority areas. This includes migratory patterns for school, work, etc. with other authorities including Sevenoaks, Tonbridge and Malling, Maidstone, Ashford, Rother and Wealden.

2.13 Tunbridge Wells shares the “West Kent Housing Market Area” with Sevenoaks and Tonbridge and Malling. Para 4.12 of the Local Plan refers to potential/“unknown” unmet needs (c. 1,900 dwellings) arising from Sevenoaks. TWBC’s Duty-to-Cooperate Statement (March 2021) goes on to refer to a formal request from Sevenoaks (April 2019) in terms of assisting with unmet need. The issue of Sevenoaks unmet needs was also the subject of lengthy discussions at the recent (Oct 2020) Examination of the Tonbridge and Malling Local Plan.

2.14 The DtC Statement recognises the current uncertainty regarding the progress of the emerging SDC and TMBC Local Plans. It is therefore considered that the Tunbridge Wells Local Plan should provide the appropriate flexibility in seeking to positively grapple with the unmet needs arising from Sevenoaks.

2.15 This can be achieved through an uplifted buffer to 20% and it is considered that the uplift in need can be addressed across Tunbridge Wells Borough, as including Hawkhurst. In this context, we note that TWBC has direct functional relationships to Sevenoaks, including the shared mainline train services to London. It is therefore a good location for unmet needs arising from Sevenoaks to be met.

iv Summary

2.16 The Local Plan currently seeks to provide a buffer of 7 – 10% above the identified need for new homes. A buffer in the Plan is welcomed, however, the current proposals provide uncertainty as to what can be achieved. This is important given the context set out above (items *i – iii*) and it is considered that the Plan should be seeking to secure a definitive buffer of up to 20%. This can be achieved by identifying and allocating further sites in the Local Plan.

2.17 In the next section, we address our client’s site at Streatley in the context of the ability of the site to make a meaningful contribution towards achieving an uplifted 20% buffer in the Local Plan.

b) Small to Medium sized sites

2.18 Wealden Homes is a member of the Kent SME Developers Network and as referred in separate representations submitted by the Network, Wealden Homes is disappointed that the Local Plan fails to support or recognise the role of SME developers/housebuilders in the Plan.

2.19 In this regard, the NPPF sets out that small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should identify land to accommodate at least 10% of their housing requirement on small – medium sites (para 68). This amounts to 1,460 dwellings to be identified on small sites (having regard to a 20% buffer).

2.20 As referred in the Kent SME representations, TWBC’s evidence base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. Equally, even if the total number of small – medium sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites – a shortfall of c. 800 small – medium sized sites. The Local Plan is thus considered unjustified in failing to meet its 10% target for small – medium sites.

i SME Small Sites Policy

2.21 Wealden Homes is concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB.

2.22 Through its work with the Kent SME Network, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments, where there are limited opportunities through allocations in which the Council has made (i.e. on larger sites).

2.23 This recommended policy is set out below:

Table 3: Kent SME Network – Small Sites Policy

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small sites, the council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- I. The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;
- II. The site is being brought forward by a recognised SME Developer and is not part of a larger site;
- III. The proposed development delivers;
 - a. A bespoke design approach;
 - b. A high quality design that is locally distinctive;
 - c. Is sympathetic to the character of its location;
- IV. All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;
- V. The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.
- VI. A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. When on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

2.24 A Small Sites policy can allow for SMEs to operate within the Plan Led system and will allow both small and medium sites to come forward (i.e. for sites up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation, etc and a flexible approach to the delivery of Affordable Housing.

2.25 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The policy would also secure development that meets the “building better, building beautiful” objectives and potentially addressing Climate Change issues.

2.26 The policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe.

2.27 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. As volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

2.28 The Network recognises that other Kent LPAs are seeking to introduce a Small sites policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME. The above recommendations enable to Local Plan to be “sound” and the land at Streatley is able to make a meaningful contribution (40 dwellings) towards the small-medium sites quantum for the Local Plan.

[TWBC: Section 3 has been inputted against Policy STR/HA 1 (The Strategy for Hawkhurst Parish), please see Comment Number PSLP_1862]

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous

shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.2 Our client's site provides a viable option for meeting uplifted housing needs in the Borough. Contrary to the SA and SHELAA assessments, development of the site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client's site can be considered positively in this context.

4.3 The site is "suitable", "available", "achievable" and thus "deliverable" for development in the short-term and it is capable of delivering the following benefits:

- Up to 40no. dwellings (providing a range and mix of homes);
- The site could deliver a lesser extent of development in line with the objectives of the Hawkhurst Neighbourhood Plan;
- All units would be built to lifetimes homes standards and including provision for bungalows for older people;
- The site can offer a valuable contribution to the growth of Hawkhurst without expensive and challenging improvements to the infrastructure of the settlement. Equally the development of the site would lead to limited impacts upon the Hawkhurst crossroad as Horns Road offers an alternative route to the main A21 route to the west;
- Open space provision;
- New access road;
- Appropriate parking provision;
- On-site drainage/treatment facility placing no pressure on existing drainage system in Hawkhurst;
- Provision of 40% affordable housing; and
- Other obligations towards infrastructure provision (Incl. Community Hall).

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be "Sound" in accordance with the NPPF. Our client's site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

1 Swale BC included such a policy in its Regulation 19 Local Plan Consultation.

2 Refer to Draft Local Plan (Reg 18 Consultation), Sept – Nov 2019

APPENDICES

APPENDIX 1 - Wealden Homes representations to Reg 18 Draft Local Plan (Sept - Nov 2019)

APPENDIX 2 - Wealden Homes – Landscape and Visual Impact Assessment

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to supporting submitted representations.

[TWBC: the below text is from the submitted representation, which has also been attached as a supporting document]

b) Small to Medium sized sites

2.18 Wealden Homes is a member of the Kent SME Developers Network and as referred in separate representations submitted by the Network, Wealden Homes is disappointed that the Local Plan fails to support or recognise the role of SME developers/housebuilders in the Plan.

2.19 In this regard, the NPPF sets out that small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should identify land to accommodate at least 10% of their housing requirement on small – medium sites (para 68). This amounts to 1,460 dwellings to be identified on small sites (having regard to a 20% buffer).

2.20 As referred in the Kent SME representations, TWBC's evidence base confirms that only 290 dwellings across 9 sites are identified in the Local Plan that are yet to obtain a Planning Permission. Equally, even if the total number of small – medium sites (including those with a Planning Permission) are taken into account, this still amounts to only 641 dwellings across 17 sites – a shortfall of c. 800 small – medium sized sites. The Local Plan is thus considered unjustified in failing to meet its 10% target for small – medium sites.

i SME Small Sites Policy

2.21 Wealden Homes is concerned that the current Local Plan does not facilitate or support SMEs to bring forward housing in the Borough, particularly in rural areas, which in Tunbridge Wells is often covered by AONB.

2.22 Through its work with the Kent SME Network, it has sought to introduce a policy into emerging Local Plans that seeks to support small and medium sized developments, where there are limited opportunities through allocations in which the Council has made (i.e. on larger sites).

2.23 This recommended policy is set out below:

Table 3: Kent SME Network – Small Sites Policy

Policy [insert Policy Number] Small Sites

In order to recognise the value of SMEs and small sites, the council will support development of unallocated or windfall small scale housing (C3) and approve applications providing the harm does not demonstrably outweigh the benefits; and where:

- I. The site does not exceed 60 dwellings (net) and is of an appropriate scale to its location;
- II. The site is being brought forward by a recognised SME Developer and is not part of a larger site;
- III. The proposed development delivers;
 - a. A bespoke design approach;
 - b. A high quality design that is locally distinctive;
 - c. Is sympathetic to the character of its location;
- IV. All dwellings meet National Design Standards and endeavor to deliver a range of Carbon reduction build techniques;
- V. The proposed development preserves residential amenity, designated heritage assets and core environmental assets and increase net biodiversity.
- VI. A flexible approach will be encouraged to the delivery of Affordable Housing assessed on a site by site basis. When on site provision is demonstrated through evidence to be unviable or unattractive (less than 70% Open Market Value) to recognised Registered Providers, the Council will permit alternative levels of Affordable Housing or alternative forms of tenure, including First Homes, payment in-lieu of on site provision or another form of recognised Affordable Product as defined in the NPPF.

It is recognised that SMEs can deliver quickly and applicants are encouraged to explore if a reduced implementation period is appropriate.

2.24 A Small Sites policy can allow for SMEs to operate within the Plan Led system and will allow both small and medium sites to come forward (i.e. for sites up to 60 dwellings). Such a policy will allow an SME to come forward with a planning application that meets locally defined specific criteria, such as high-quality design, low carbon footprint, reduced time limits for implementation, etc and a flexible approach to the delivery of Affordable Housing.

2.25 Such a policy would provide for additional weight to be afforded to an SME application, and thus allow greater weight to be applied to the application in the overall planning balance. This would reduce risk to an SME and increase certainty at the planning stages, as the SME can tailor their scheme to meet the specific criteria. The policy would also secure development that meets the “building better, building beautiful” objectives and potentially addressing Climate Change issues.

2.26 The policy is designed to deliver up to 60 dwellings (and thus meet the M of SME as much as the S) but is worded in a way that seeks to ensure the development coming forward in any given location is consistent and respectful to the area that it is in i.e. a scheme of 60 dwellings may not be appropriate for a small village, but 20 maybe.

2.27 In addition, the 60 dwelling threshold is very much seen as the scale of developments where larger SME's start to compete with Volume housebuilders on sites. As volume housebuilder will tend not to drop below 60 dwellings and thus the Policy is designed to really assist SME delivery and support the delivery of bespoke high-quality development, but also directly respond to certain SME challenges, such as how to deliver small numbers of Affordable Housing on any given site.

2.28 The Network recognises that other Kent LPAs are seeking to introduce a Small sites policy¹ and a key aim for the policy is that there is a level of consistency in the wording across a number of LPAs, in order that the interpretation and understanding of the policy is also consistent on a cross boundary level – again seeking to reduce the risk at the planning stages to an SME. The above recommendations enable to Local Plan to be “sound” and the land at Streatley is able to make a meaningful contribution (40 dwellings) towards the small-medium sites quantum for the Local Plan.

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client's site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Wealden Homes considers that the Local Plan housing supply should be uplifted by c. 1,500 homes. Accordingly, it considers that its site at Streatley, Hawkhurst can make a meaningful contribution to the supply and should thus be allocated. The site can also positively address the shortfall in small-medium sites. Wealden Homes would accordingly seek to present its planning arguments at the relevant examination hearing sessions.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please refer to supporting submitted representations.

If you would like to attach a file in support of your comments, please upload it here.

TUNBRIDGE WELLS BOROUGH - LOCAL PLAN

REGULATION 19 PRE-SUBMISSION CONSULTATION

LAND AT STREATLEY, HAWKHURST

REPRESENTATIONS SUBMITTED ON BEHALF OF WEALDEN HOMES

June 2021

1.0 INTRODUCTION

1.1 These representations are submitted on behalf of Wealden Homes in response to the Tunbridge Wells Borough Local Plan - Regulation 19 Consultation. The Consultation (26 March – 04 June 2021) comprises a "Pre-Submission" consultation document as part of the Local Plan process. It follows the

earlier Reg 18 “Issues and Options” (May – June 2017) and Reg 18 “Draft Local Plan” (Sept – Nov 2019) stages of the Local Plan to which Wealden Homes has previously made representations to.

1.2 Wealden Homes is a local and SME housebuilder and has interests at land at the Streatley property on Horns Road, Hawkhurst (the “site”) which forms an omission site in the Local Plan. The site is assessed under site reference no. 52 as part of the Sustainability Appraisal (SA) and SHELAA processes.

1.3 Notwithstanding our client’s interests, these representations have been prepared in objective terms and assesses the Local Plan against the National Planning Policy Framework (NPPF) and National Planning Practice Guidance (NPPG). In this regard, we set out below the main aspects of these representations as follows:

a) Local Plan Strategy – Meeting Housing Need

- The Local Plan seeks to meet the Government’s Standard Method for new homes (678dpa) over an 18-year Plan period (2020 – 2038);
- This entails a need for 12,204 units over 18 years;
- The Local Plan seeks to provide 13,069 – 13,444 dwellings during the Plan period;
- Taking the mid-point of the above, this provides a buffer of 8.6%;
- We consider that a buffer closer to 20% would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks;
- We consider that the range of dwellings proposed provides uncertainty as to the extent of housing need being met.

b) Land at Streatley, Horns Road, Hawkhurst

- Our client’s site provides a “suitable”, “achievable”, “available” and “deliverable” site for development up to 40 dwellings;
- These representations object to assessments of the site set out in the SA and SHELAA;
- The proposals would respond positively towards meeting housing need in the Borough area;
- The proposals would make a meaningful contribution towards achieving a 20% buffer in the Local Plan;
- Development of the Site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client’s site can be considered positively in this context.

1.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client’s site can make a meaningful contribution towards achieving a 20% buffer.

[TWBC: Section 2 has been inputted against Policy STR 1 (The Development Strategy), please see Comment Number PSLP_1871]

3.0 PROPOSED SPATIAL STRATEGY – HAWKHURST

3.1 In this section, we address the spatial strategy for Hawkhurst including the opportunity our client’s site presents as against the SA and SHELAA assessments of it.

a) Policy STR/ HA 1 – The Strategy for Hawkhurst Parish

3.2 The strategic framework for the Local Plan is broadly based on securing strategic development at Tunbridge Wells, Paddock Wood and Tudeley, as well as development dispersed across other settlements of the Borough.

3.3 The above policy identifies new development at Hawkhurst to provide 161 – 170no. new homes, as well as aligned infrastructure delivery. This includes the provision of a new community centre at King George V playing fields, medical facilities in Hawkhurst, as well as the proposed expansion at Hawkhurst Primary School.

3.4 We note that the previously allocated site at Hawkhurst Golf Club (and associated Relief Road from Cranbrook Road to High Street)2 has been removed from the Local Plan strategy. This (and other

factors) has resulted in a reduction on the growth earmarked to Hawkhurst from 681 – 731no. new homes (previous Reg 18 Local Plan) to 161 – 170no. homes (current Reg 19 Local Plan).

3.5 Wealden Homes considers that the Local Plan should seek to plan for an extra c. 1,500 new homes in order to reach the 20% buffer in the Plan (this makes provision for the already planned for 7% buffer). In this regard, Hawkhurst is a suitable location in the Borough for planned residential growth (and aligned infrastructure provision) and it is considered that the Local Plan should seek to aim for previous higher levels of growth earmarked to the settlement.

3.6 Wealden Homes acknowledges the importance placed in the Local Plan for much needed local facilities. This is supported through the Neighbourhood Plan for Hawkhurst (as modified – 2020) which seeks the provision of a new Community Hall (Policy CM2) in the settlement. To this extent, development of the site at Streatley could make a significant contribution towards the delivery of the Community Hall, in the form of a £1m contribution should the site be identified for up to 40 dwellings in the Local Plan.

3.7 Wealden Homes also recognises and supports the ambition of the Local Plan to secure a range of new homes including at Hawkhurst. This will include meeting the needs for both young families as well as for older people and in this regard, the Wealden Homes site is able to secure 1 and 2-bed flats, terraces and bungalows, in addition to 2, 3 and 4 bed bungalows and chalets for older people.

b) Site at Streatley, Horns Road, Hawkhurst

Sustainability Appraisal

[TWBC: for comments on the Sustainability Appraisal, please see Question 8]

c) Summary

3.22 Wealden Homes supports the Local Plan spatial strategy insofar as it earmarks growth to Hawkhurst. However, it considers that the extent of growth to the settlement should be uplifted given the need to achieve a 20% buffer in the Plan.

3.23 Wealden Homes does not consider that the evidence base assessments of the site are justified or sound. Rather, it considers that the site is “suitable”, “available”, “achievable” and thus “deliverable” for development in the short-term. The site is capable of delivering the following benefits:

- Up to 40no. dwellings (providing a range and mix of homes);
- The site could deliver a lesser extent of development in line with the objectives of the Hawkhurst Neighbourhood Plan;
- All units would be built to lifetimes homes standards and including provision for bungalows for older people;
- The site can offer a valuable contribution to the growth of Hawkhurst without expensive and challenging improvements to the infrastructure of the settlement. Equally the development of the site would lead to limited impacts upon the Hawkhurst crossroad as Horns Road offers an alternative route to the main A21 route to the west;
- Open space provision;
- New access road;
- Appropriate parking provision;
- On-site drainage/treatment facility placing no pressure on existing drainage system in Hawkhurst;
- Provision of 40% affordable housing; and
- Other obligations towards infrastructure provision (Incl. Community Hall).

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.2 Our client's site provides a viable option for meeting uplifted housing needs in the Borough. Contrary to the SA and SHELAA assessments, development of the site would secure a sensitive design response in the AONB in which the site is located. We note that the AONB washes over Hawkhurst and other settlements in the Borough and the Local Plan includes site allocations in other parts of the AONB. Our client's site can be considered positively in this context.

4.3 The site is "suitable", "available", "achievable" and thus "deliverable" for development in the short-term and it is capable of delivering the following benefits:

- Up to 40 no. dwellings (providing a range and mix of homes);
- The site could deliver a lesser extent of development in line with the objectives of the Hawkhurst Neighbourhood Plan;
- All units would be built to lifetimes homes standards and including provision for bungalows for older people;
- The site can offer a valuable contribution to the growth of Hawkhurst without expensive and challenging improvements to the infrastructure of the settlement. Equally the development of the site would lead to limited impacts upon the Hawkhurst crossroad as Horns Road offers an alternative route to the main A21 route to the west;
- Open space provision;
- New access road;
- Appropriate parking provision;
- On-site drainage/treatment facility placing no pressure on existing drainage system in Hawkhurst;
- Provision of 40% affordable housing; and
- Other obligations towards infrastructure provision (Incl. Community Hall).

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be "Sound" in accordance with the NPPF. Our client's site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

1 Swale BC included such a policy in its Regulation 19 Local Plan Consultation.

2 Refer to Draft Local Plan (Reg 18 Consultation), Sept – Nov 2019

APPENDICES

APPENDIX 1 - Wealden Homes representations to Reg 18 Draft Local Plan (Sept - Nov 2019)

APPENDIX 2 - Wealden Homes – Landscape and Visual Impact Assessment

[TWBC: for appendices, please see supporting documents]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to supporting submitted representations.

[TWBC: the below text is from relevant sections of the submitted representation, which has also been attached as a supporting document]

3.5 Wealden Homes considers that the Local Plan should seek to plan for an extra c. 1,500 new homes in order to reach the 20% buffer in the Plan (this makes provision for the already planned for 7% buffer). In this regard, Hawkhurst is a suitable location in the Borough for planned residential growth (and aligned infrastructure provision) and it is considered that the Local Plan should seek to aim for previous higher levels of growth earmarked to the settlement.

4.0 CONCLUSION

4.1 These representations, as prepared on behalf of Wealden Homes, support the aspiration of the Local Plan to meet its housing needs in full. This should however be supplemented by a buffer closer to 20% rather than the current 7 – 10% buffer proposed in the Local Plan. This would address previous shortfalls, affordability issues in the Borough, as well as the potential for unmet needs arising from Sevenoaks.

4.4 In summary, we consider that the Local Plan should achieve a 20% buffer in order for it to be “Sound” in accordance with the NPPF. Our client’s site can make a meaningful contribution towards achieving a 20% buffer in addition to the 10% requirement for small – medium sites.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Wealden Homes considers that the Local Plan housing supply should be uplifted by c. 1,500 homes. Accordingly, it considers that its site at Streatley, Hawkhurst can make a meaningful contribution to the supply and should thus be allocated. The site can also positively address the shortfall in small-medium sites. Wealden Homes would accordingly seek to present its planning arguments at the relevant examination hearing sessions.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Please refer to supporting submitted representations.

[TWBC: the below text is from the submitted representation, which has also been attached as a supporting document]

b) Site at Streatley, Horns Road, Hawkhurst
Sustainability Appraisal

3.8 The Site is assessed in the Sustainability Appraisal (as accompanying the Reg 19 Local Plan) on the basis of it being a “reasonable alternative” to the selected proposed allocations at Hawkhurst.

3.9 The assessment for the site (page 324 of the SA) largely aligns with the assessment undertaken in the Interim SA as part of the Reg 18 Draft Local Plan consultation. We therefore do not repeat the

full set of comments, instead we rely upon Wealden Homes' Reg 18 representations (Nov 2019) at Appendix 1.

3.10 We note that the SA scoring with regard to both "Air Quality" and "Biodiversity" has been downgraded since the previous Reg 18 Draft Local Plan from "Neutral" to "Slightly Negative" (Air Quality) and from "Neutral" to "Slightly Neutral/Negative" (Biodiversity).

3.11 The SA seeks to offer an explanation with regard to the downgrading on Air Quality, noting that this seeks "to better reflect high likelihood of private car use". The SA does not however explain the amendment to the "Biodiversity" scoring.

3.12 The rationale for the "Air Quality" scoring is unclear particularly given that scoring in relation to "Services and Facilities" and "Travel" remains unchanged from the previous Interim SA. Furthermore, this does not appear to have regard to future uplift in electric vehicle use and the Government's commitment for all new vehicles to be powered by electricity by 2030. Accordingly, we consider that the SA scoring for Air Quality should revert back to "Neutral".

3.13 Equally, we consider that Biodiversity Net Gains can be achieved across the site as demonstrated in previous planning submissions for the site. This is feasible through the provision of a broad package of landscape and ecological measures, including open space, SuDS, boundary hedgerow provision and linear ecological "corridors" running through the site. Accordingly, we consider that Biodiversity scoring should be "Neutral/Positive".

Strategic Housing and Economic Land Availability Assessment - SHELAA

3.14 The site is assessed in the SHELAA – Site Assessment Sheets for Hawkhurst Parish (pages 15 – 16). This provides a brief assessment of the site and confirms that the site is "available" and "achievable".

3.15 In terms of suitability, the SHELAA finds the site as "unsuitable" and the reason for this is as follows:

Development of this site on the edge of the settlement would have an adverse impact upon the landscape character and settlement pattern, located in the AONB.

3.16 Wealden Homes objects to this and considers that the SHELAA provides too simplistic a reasoning behind the suitability criteria for the site.

3.17 In this regard, we note that the Council's "Landscape and Visual Impact Assessment of Proposed Allocated Sites in the High Weald AONB (Nov 2020)" does not contain a detailed assessment of the site.

3.18 Instead, a comprehensive and robust Landscape Visual Impact Assessment (LVIA – Appendix 2) has been submitted by Wealden Homes as part of previous planning applications at the site. This identifies that the development on the site would not cause any significant or adverse effects upon landscape character or the visual amenity of the locality, with particular regard to the wider High Weald AONB. The LVIA identifies that the proposed development would have a minimal impact on the visual amenity of the surrounding landscape of Hawkhurst, as well as from existing residential properties.

3.19 The LVIA includes a package of landscape-led and biodiversity measures that ensure conservation of strategic green infrastructure, green links to the countryside and enhancement of habitats. The LVIA concludes there would only be some alteration of the land from the effects of the change from open pasture to built development, however the significance of this change would be negligible given the additional woodland and landscape buffer zones created. The LVIA confirms that with the proposed enhancements of landscape features, including green links, substantial planting and woodland extensions, the overall effect upon the landscape would be low and consequently not harmful to the AONB.

3.20 In summary, the LVIA confirms development on the Site would have a moderate effect upon built and historic character and a negligible effect upon all types of valued landscape features, including that of the High Weald AONB and the nearby Conservation Area of The Moor. The impact of the development would however be mitigated through enhanced landscape measures, as drawn from the conclusions of the LVIA.

3.21 In light of the above, we do not consider the SA or SHELAA assessments to be justified or sound in accordance with the NPPF.

If you would like to attach a file in support of your comments, please upload it here.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Please accept this email as my formal objection to the plans to build the additional houses at Tudeley.
Regards, Jonathan Webber.

Objections to Capel plan

The Capel plan is ill conceived and is very likely, based on past experience, to be poorly executed.

The Capel plan is ill conceived for the following reasons:

1. The infrastructure in terms of roads, trains and other transport is insufficient to meet the needs of the current users, let alone a significant increase:
 - a. The B2017 is backed up for well over a mile most mornings between 8-9am from Somerhill up to and beyond Alders Road, and then along the road leading to the A21. Hartlake Road is insufficient for today's traffic, let alone the increased level and is constrained in terms of width by existing properties and the bridges, including the main line railway bridge. The updated proposal suggesting that Hartlake road is permanently closed will cause even more stress for local residents.
 - b. In pre-COVID times – and for our future of commuting, the trains from Tonbridge were already frequently overcrowded and standing room only and there is insufficient parking at the station to cope, leading to residential streets being clogged up
 - c. There is a real lack of decent secondary school places in the area and whilst I applaud your decision to build another school, it's position in terms of transport can only be described as woeful
 - d. The doctors surgeries are overflowing and are unable to cope with the existing patients that they have today. It is not possible to get a telephone appointment for a non-urgent case – as determined by the patient and therefore likely wrong – within one month
2. Flooding in the area is a real concern and you are deliberately putting residents in Hildenborough, Tonbridge and Yalding in higher risk of flooding
 - a. Hartlake Road is a flood plain and is managed, particularly during winter months with these towns in mind. By concreting over the local fields immediately adjacent and the hills that naturally run into the flood plain is a ridiculous idea creating higher water levels and creating danger for the housing already on the Hartlake Road itself
 - b. More of the gravel pits have been recently excavated suggested that there is a real lack of joined up thinking here; where exactly do you expect the water to go?
 - c. There seems to be a real lack of forethought regards water management as a result of “new town” Capel and I have yet to see any plans in this regard
3. Regeneration of Tonbridge may be seen as a result of these plans, although it is doubtful that this even features as a valid concern for Tunbridge Wells council. If regeneration is a thought here, then the “new town” will singly fail to provide an answer
 - a. The “new town” is in the wrong place and it's distance from Tonbridge will not provide easy access without additional buses along a congested road (see 1a)
 - b. The residents are most likely to see Tonbridge as a train station stop rather than a town in its own right and merely clog up the roads in parking (see 1b) creating resentment rather than regeneration
4. The location of the “new town” is utterly beautiful. Unlike Kings Hill, which was an old airfield, the fields surrounding Capel provide fresh air, walks and enjoyment not just for the local residents but

many from the wider area. COVID saw a huge increase to the numbers of people who have enjoyed the countryside. The views up to and from the hillside by Tudeley church provide huge well-being benefits which once lost will never be replaced

5. The local residents strongly object for a number of reasons. They have chosen to live outside of towns and find themselves being subjected to this issues of towns such as Tunbridge Wells, without much interest or limited and apathetic consultation merely for the wealth benefits of a few local, and likely wealthy landowners. There is a sensible alternative overcoming many of the transport issues linked above, namely Castle Hill.

The plan is, in my opinion, likely to be poorly executed for the following reasons:

- 1 Tunbridge Wells Borough Council have a long and poor history of infrastructure management. Tunbridge Wells itself has been clogged with traffic for well over 50 years with few access roads into and out of the town. In the past 50 years, this has not stopped the council enabling infills for additional housing in multiple locations around the town. Forest Road is a typical example of a residential road which used to have circa ½ the current residents and was much easier to get through. I have frequently travelled half of the distance of the M25 in a shorter time than I've got from one side of Tunbridge Wells to the other
- 2 Tunbridge Wells Borough Council is, in effect, outsourcing it's responsibility to the very edge of its district. In other words, having messed up the main town, it is now failing to learn from its infrastructure mistakes and looking to create the same traffic issues in Capel/Tudeley. By placing the town at the very edge of its border, it is adopting an "out of sight, out of mind mentality" whilst still collecting council tax, but really making amenities the responsibility of others
- 3 There seems to be a real disconnect between the building of multiple houses and the infrastructure. The building itself will create huge logistical issues for lorries, builders even before the level of traffic created by the residents increases significantly. If you are serious about this plan – and refuse to contemplate others – then you need to create a proper road network before any house building actually starts. This means building new roads between the site and directly to the A21, not repurposing the existing roads and hoping for the best
- 4 There were multiple advantages to the Kings Hill site, not least being a brownfield site, that are not repeatable for the chosen site for Capel. It did not create 97% objection from the existing residents because it had a decent road network which could be accessed, schools, doctors etc., were part of the plan and were defined within the body of the town itself.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to Policy STR1. The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. In addition, the reliance on large strategic sites is going to result in the trajectory not being able to deliver sufficient housing early in the Plan period and so additional smaller sites are necessary to ensure delivery and so make the Plan effective.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be positively prepared, justified, effective or consistent with National Policy.

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear. However, following the failure of their High Court challenge, Sevenoaks District Council is now required to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted.

Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is also the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan – having withdrawn its draft document. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer. Tunbridge Wells Borough Council cannot legitimately argue against this strategy having removed housing allocations from the Regulation 18 draft Local Plan that were perfectly acceptable.

In relation to delivery of new homes, we are of the view that additional medium sized housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations – particularly focused on sustainable settlements, including villages, outside the AONB. Since NPPF seeks to boost the supply of housing and there is nothing preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. This would mitigate risks of delays to delivery on the larger sites and/or lower overall yields should constraints emerge during the detailed planning process. If over provision were to occur, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve. Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (Reg 18) (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines.

Table 1: Housing Need 2016-2036 (as at 01 April 2019)

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. Alter the Policy to identify a need for additional smaller and medium sized sites (under 70 units in size). The policy may need to increase by a further 2-3,000 dwellings.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To be present to test/witness the Council's strategy regarding housing numbers, the trajectory and the delivery of sites.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 2	

Agent's Name and Organisation (if applicable) Kember Loudon Williams

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/HO 1 The Strategy for Horsmonden parish

Policies Map (Inset Map No(s)) 26

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Objection to draft policy PSTR/HO1 for Horsmonden.

The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas and delivering sufficient small and medium sites to ensure the housing trajectory can be delivered. As such it has in our view resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. As a result of the lack of overall housing allocations as well as an over emphasis on large strategic sites, not maximising suitable smaller and medium sized sites that are available, the Plan cannot be said to be effective or consistent with National Policy. This explained in more detail in our representations on Policy STR1.

The overarching deficiencies have filtered down to the local level. Although a modest increase in housing numbers in Horsmonden has occurred, compared with the reg. 18 plan, this is below the

suggested uplift made in our reg. 18 representations on this site, and does not include this site within the proposed site allocations. Opportunities for suitable sites to be delivered outside of the AONB should be optimised, in order to help bolster overall delivery – especially on medium sized sites that can be delivered early in the plan period.

Furthermore, a large proportion of the overall provision under this Policy is dependent on one strategic site, AL/HO3, which is a very large scale site extending the form and extent of the village significantly eastwards. This is in contrast to the site at land south of Goudhurst Road, which represents a far more modest and natural rounding off of the village. A strategic site with landscape challenges and community and educational requirements is likely to have a longer lead time than more modestly sized sites.

Additionally, there is acknowledged landscape sensitivity at AL/HO3 (see para. 5.604 of the draft Local Plan) which means lower densities may need to be adopted at the fringes of the site, therefore the total quantum of housing delivery accruing from this proposed housing allocation is very uncertain – leading to a wide range of potential housing numbers delivered from AL/HO3 (115-165 units, a range of some 50 units). There is also a fairly wide range of potential housing numbers at site AL/HO2 (80-100 units), which is the other significant contributor to the housing numbers for Horsmonden within PSTR/HO1. The combined effect is that the overall range of housing numbers given for Horsmonden under PSTR/HO1 is very broad ranging from 240-320 housing units.

Accordingly, given these uncertainties on both quantum and timing, it is considered there is scope to increase the overall upper end of the range of housing delivery in Horsmonden by a further 35 units. This is a modest level of uplift which will optimise the opportunities to deliver housing outside of the AONB and MGB constrained areas, and at the same time mitigating the risk of delivery in the village towards the lower end of the identified ranges on the two larger sites suggested for allocation, as well as helping re-balance the larger sites with smaller allocations. This will help support a smooth housing trajectory, rather than a risk of ‘backloading’.

It is therefore submitted that the land south of Goudhurst Road site be included as an additional residential allocation, under a suggested new Policy reference AL/HO4, for approximately 35 units.

The Council's Sustainability Assessment and SHELAA report revealed that the site scored favourably in comparison to the great majority of the reasonable sites in the village, and the potential concerns raised concerning access and landscape impacts have been comprehensively dealt with in this and previous submissions.

The ADAS Landscape Statement confirms that the site has a low visual value and is of medium/low sensitivity to residential development. The regulation 18 site assessment prepared by ourselves is attached by way of information – with the Landscape and Transport information submitted at that stage enclosed. These representations should be read in conjunction with this information, which set out further context regarding the credentials of the site.

At the time of the reg. 18 representations, there were two potential alternative access solutions. The deliverability of the site has further improved as the site access from Goudhurst Road, along with the rest of the site, is now under the sole control of our client.

Additional feasibility work has been undertaken recently in order to confirm that access is achievable from Goudhurst Road – this removes the potential uncertainty regarding site access. A site access report / technical note has been prepared to support these regulation 19 submission – this has been prepared by GTA Civils and is attached herewith. In summary, this concludes:

- There is a low level of recorded accidents on the local highway network, with only 1 slight injury accident in the last 5 years within 200m of the site;
- The site is in a sustainable location – local retail, education, leisure and health facilities are all located within close proximity to the site;
- Visibility splays have been confirmed on an access drawing to the standard required in a 30mph speed limit area – the required splays being 2.4m x 43m
- A 2m wide footway will adjoin the site to the existing footway to the northern side of Goudhurst Road, via an uncontrolled crossing point with a dropped kerb and tactile paving. This will connect the site to the village centre.
- Vehicle trip generation has been calculated, and will be low during the A.M and P.M peaks (17 two way vehicle trips in each), which will not represent a severe impact on the local highway network.

- Overall, the report demonstrates access and internal circulation and vehicle parking can be achieved in accordance with relevant standards and that there are no unacceptable highway or transport impacts resulting from the proposed development.

In addition to the previous KLV site submission report and enclosed Landscape and Transport submission, we also attach the illustrative layout for the site. This has been prepared taking into account appropriate advice from the wider project team, including ecologists, landscape and transport consultants as well as a professional heritage specialist.

The layout takes account of the need to retain key views from the Conservation Area through to the surrounding landscape, and is assessed as having a cumulatively neutral impacts upon the Conservation Area and preserve the settings of nearby Listed Buildings (see conclusions of the attached Assessment of Significance and Heritage Statement prepared by DGC Architectural and Historic Building Consultants). This assessment takes account of the need to demolish the garage to Bucklers which is stated to be a modern addition.

The Heritage Assessment states, on page 20:

“Due to the low density of the proposed development on the southern half of the site and the proposed landscaping scheme with enhanced planting, any views looking north would result in sections of the built form interspersed with mature planting. This would create a sense of a semi-rural openness akin to the character of the conservation area, rather than a typical suburban development, and provide a transition between the village settlement and open countryside”.

It is therefore considered that the positive credentials of the site are very clear, and the site is suitable, available and deliverable.

[TWBC: the below text is from the covering email sent by KLV to TWBC; for appendices, please see supporting documents]

we also attach the following documents in support of the representations made in respect of PSTR/HO1 and in particular, demonstrate the deliverability and strong credentials of the site at Land south of Goudhurst Road, Horsmonden:

- . Appx 1: Highways Technical Note / Report (by GTA Civils)
- . Appx 2: Illustrative Site Layout drawing
- . Appx 3: DGC Heritage Assessment
- . Appx 4: KLV regulation 18 report which set out information regarding the site that remains relevant – with ADAS Landscape Report attached within the appendices

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify PSTR/HO1 and inset map 26 as follows:

Criterion 1: Text to remain the same, but amend inset map 26 to include all but the south eastern corner of the site within the revised Limits to Built Development (LBD) for the village. The south-eastern corner of the site is to be left as an open space with landscaping.

Criterion 2: Amend the upper end of the range of units by 35 housing units, to 355 new dwellings and reference an additional allocation policy (AL/HO4) for Land South of Goudhurst Road, Horsmonden.

No changes to be made to criteria 3 and 4.

This is a modest level of uplift which will optimise the opportunities to deliver housing outside of the AONB and MGB constrained areas, and at the same time mitigating the risk of delivery in the village towards the lower end of the identified ranges on the two larger sites suggested for allocation, as well as helping re-balance the larger sites with smaller allocations. This will help support a smooth housing trajectory, rather than a risk of 'backloading'.

Policy AL/HO4 to be added to the plan for the provision of up to 35 residential dwellings which would include requirements as follows:

- To retain and enhance the existing landscape structure and retain the open view south from the site entrance at Goudhurst Road;
- The design and layout to give consideration to the edge of settlement location and the setting of the Conservation Area;
- The site to provide an area of open space at the south-eastern corner linking into the existing footpath network
- Incorporation of 40 per cent affordable housing on-site.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Wedgewood New Homes and Kember Loudon Williams wish to preserve the right to participate in order to address the issues around soundness, overall housing numbers, and the balance of strategic and smaller sites, and furthermore to promote this additional site in order to help re-balance the Plan; optimising housing delivery outside of the AONB and on smaller sites.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

"Policy STR 7 Climate Change

All development within the borough will recognise the Climate Emergency and be supportive of the Council's ultimate target to achieve net zero emissions across the borough by 2030."

The Council has failed to produce a plan which demonstrates how it will contribute significantly to achieving net zero emissions across the borough by 2030. As an example, on page 79 section 3.178 states that Borough-wide, "New development will require new gas supply connections". Given that the provision of gas boilers in new builds is to be banned by the Government from 2025 and the Local Plan covers the period to 2038 this is a crucial inconsistency.

Restoration and reuse of existing buildings is recognised as less climate damaging in terms of resources and emissions than new building yet the Council is proposing to meet its exaggerated housing need by new developments mainly on good quality agricultural land with very little input from repurposing empty or underused buildings.

There is no qualitative analysis to demonstrate how the harm for all this new development is going to mitigate the impact on emissions and the environment.

The Plan is unsound as it fails to meet the Council's own commitment to achieving net zero emissions by 2030.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

This submission is from West Peckham Parish Council on behalf of the residents of West Peckham, a small village on the east side of Tonbridge and Malling Borough.

TWBC wish to put very a major housing allocation adjacent to the border with Tonbridge and Malling Borough Council area. This will have major effects on the local road and rail infrastructure for the residents of the local parishes. No mitigation of the effects are planned.

We are concerned that the proposed development will generate significant traffic on the roads connecting to the M20 as the limited junction between the A21 and the M26 does not encourage eastbound traffic to travel via the A21.

The B2016, Seven Mile Lane, already carries a heavy and increasing traffic load as does the A228, Kings Hill, currently making it difficult to leave West Peckham village across the dangerous junctions. The increase in traffic due to the proposed major development will increase the likelihood of serious accident at the Seven Mile Road crossroad with Mereworth Road, adjacent to Mereworth Primary School and at the junction with The Street and the A228.

Many local residents commute to London and the trains at Tonbridge are already full. The increase in numbers of commuters getting on at Paddock Wood will make these crowded trains unusable, potentially causing more people to travel by car.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This submission is from West Peckham Parish Council on behalf of the residents of West Peckham, a small village on the east side of Tonbridge and Malling Borough.

TWBC wish to put very a major housing allocation adjacent to the border with Tonbridge and Malling Borough Council area. This will have major effects on the local road and rail infrastructure for the residents of the local parishes. No mitigation of the effects are planned.

We are concerned that the proposed development will generate significant traffic on the roads connecting to the M20 as the limited junction between the A21 and the M26 does not encourage eastbound traffic to travel via the A21.

The B2016, Seven Mile Lane, already carries a heavy and increasing traffic load as does the A228, Kings Hill, currently making it difficult to leave West Peckham village across the dangerous junctions. The increase in traffic due to the proposed major development will increase the likelihood of serious accident at the Seven Mile Road crossroad with Mereworth Road, adjacent to Mereworth Primary School and at the junction with The Street and the A228.

Many local residents commute to London and the trains at Tonbridge are already full. The increase in numbers of commuters getting on at Paddock Wood will make these crowded trains unusable, potentially causing more people to travel by car.

Respondent's Name and/or Organisation	Susan Westlake
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No(s)

4.125

5.47

Policy No.

AL/RTW 5

Policies Map (Inset Map No(s))

5

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It is not consistent with achieving sustainable development.

It will affect current and future generations in the locality. The A26 road already exceeds pollution limits. Speldhurst Road is already congested at peak times with parked cars causing jams and traffic extending all the way down past Kibbles Lane causing pollution.

Food should be produced on this farmland to help this country to be more self-sufficient instead of relying on imports and in view of the climate emergency.

This land has been promoted by landbankers for several years, hoping for a substantial profit. Greenfield land is more profitable for developers than brownfield. Will that profit be kept and spent locally, or end up in off-shore accounts?

Average house prices are currently at least 15 times average salaries in the area. The original plan referred to social rent homes. This plan refers to 'affordable housing' but it needs to be truly affordable for local people.

I question the manner in which the Caenwood Farm site was added to the PSLP, thus seriously prejudicing the democratic right of the residents in this area from making their arguments and opinions heard at the local level.

I strongly protest against the removal of the Green Belt status from the Caenwood Farm site and thus allow the progressive destruction of the last area of green belt. I protest against the resulting loss of a countryside buffer between Tunbridge Wells and Southborough and the consequent encroachment of urban sprawl that will result and which the current site at present prevents.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

This appraisal states 'scores for the environmental objectives ranged from – to 0. The air quality objective scores as mixed overall due to the likelihood that most development in Southborough will increase traffic in the AQMA. ... Noise and water are scored slightly negative. ... This site scores some neutrals and positives but is let down on its heritage, land use and landscape scores. The whole site has archaeological potential and is an historic field.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have no doubt the plan is strictly speaking – legal. But it's not sound from a moral or sense point of view because:

- 1 Overcrowding in the area – the locality is already overcrowded. There have been large and new substantial developments recently at nearby Hawkenbury and Benhall Mill Road. This is already placing a strain on the local infrastructure, including the roads.
- 2 Vehicle access to the new development will be via Bayham Road – which is served by Forest Road. Forest Road is already far too busy – and with a 40 mph speed limit. More traffic will put even more strain on the road. Incidentally, the 40 mph speed limit needs to be reviewed – this is out of touch with other speed limits in this residential area.
- 3 The pedestrian access via the crematorium is just not on – this needs to be a peaceful, reflective environment for families attending funerals etc – not a rat run for new housing.
- 4 More generally, the new development – and the continual movement in and out of it by people and vehicles - will defeat the need for a quiet and reflective environment at the adjoining crematorium. This must be preserved for families and friends to show their last respects to their loved ones. The development will also butt onto the cemetery and headstones – this is important for families who've lost loved ones – and who will want to visit and reflect at their graves regularly. This isn't the way to treat our deceased relatives and their friends and families.
- 5 It is difficult to see how vehicle access could be achieved as shown on the plan without taking away some of the land from the crematorium – and some of the memorials that are currently there – this isn't acceptable.
- 6 I note the development is contingent on finding alternative sports facilities – such alternative though must not lead to over-use/overcrowding at any new facility – for example, by simply cramming the Bayham Sports users at another, already well used, facility. This is likely if a new site isn't found.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at

examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

NONE!

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The guiding principles of Policy STR4, setting out the importance of adopting a comprehensive approach to the delivery of all development and that the allocated sites are delivered in complete accordance with policy provisions are sound: these are, after all, some of the founding principles of the planning system. However, as currently drafted, the policy wording is vague, imprecise and lacks the level of commitment from Tunbridge Wells Borough Council (TWBC) that is required to ensure that sites are brought forward in their entirety. This is completely envisaged by TWBC and, in the case of the large strategic sites, the Council's appointed/integrated master-planning/professional/technical consultant team. In this regard, Policy STR4 requires amendment to ensure compliance.

The National Planning Policy Framework (NPPF) establishes in Part d of Paragraph 16 that policies must be clearly written and unambiguous. Part f of the same paragraph requires that policies should serve a clear purpose. The policy as presently drafted does not fully meet these tests.

The draft wording of the policy states that where sites have several land use elements or are in multiple ownerships, comprehensive development will be secured by "an appropriate means of master planning". In broad terms this is supported, but the policy must go further to ensure that the masterplan vision is delivered in its entirety as envisaged/planned for particularly in circumstances where there are multiple or fractured land-owning interests.

Whilst a masterplan will generate the vision and guiding principles for the development of the site, the 'nuts and bolts' of its practical delivery must be supported and underpinned by a clear policy requirement that states:

- 1) TWBC will not support fractured or piecemeal forms of development aligned with land ownership;
- 2) That allocated sites must come forward in their entirety in fulfilment of the masterplan; and
- 3) That TWBC will require equalisation agreements between the various landowning/developer interests to ensure that the masterplan vision(s) are delivered comprehensively.

As currently drafted, these elements are lacking in the draft policy – it is considered ambiguous and therefore unsound.

The supporting text to the policy explains at Paragraph 4.80 that “*Different means of ensuring a comprehensive approach exist and will be case specific*”. Hence, the policy sets out the guiding principles to determine what would be most appropriate. We accept the sentiment but are concerned that the wording is not sufficiently clear and robust to ensure and support comprehensive project delivery.

The Strategic Sites Masterplanning and Infrastructure Study (February 2021), prepared by independent consultants David Lock Associates (DLA), supported by a wide ranging body of appointed professionals covering, inter alia, highway assessment, landscape and visual impact requirements, ecology, flooding and water management, has quite rightly an entire chapter dedicated solely to delivery (Chapter 7). After all, delivery is the fundamental premise of realising the development/housing/infrastructure needs of the Borough. Chapter 7 highlights that “*instances may arise where one developer is meeting the full cost of infrastructure shared by all, or one is disproportionately contributing in a different way such as by providing land*”. It then goes on to say that “*Developers should be invited to form their own collaboration agreement or alternative mechanism for the equal sharing of costs. Should this not occur, **TWBC should facilitate this process***”. The latter is key, as only with the direct and meaningful involvement of the Planning Authority can true parity and fairness occur to support the realisation of TWBC’s land-use vision.

TWBC’s own professional advisors have, therefore, clearly and correctly recommended that the TWBC must step in if it is becoming clear that an equalisation agreement is unachievable. Furthermore, they point out that this should be actioned in a timely fashion so that the delivery of the development is not delayed unnecessarily. Without the comprehensive realisation of the strategic sites as planned through collaborative working, we would question the validity and public benefit of adopting a master planning approach. This is, in our view, the correct approach, but it is reliant on being met in full.

It is therefore important that this land equalisation agreement be enshrined into the policy wording now to avoid unnecessary project suspension. The present wording contained within the draft policy (*It is highly likely the delivery of the development will require land equalisation agreements*) is weak and lacks clarity. The correct vehicle to drive through the development of Paddock Wood is through an equalisation agreement and it is critical that TWBC take charge of this process absent of private interests/agreements between the affected stakeholders. Moreover, the policy should include a clear statement that the Council will not support applications/schemes that do not meet and provide the full and comprehensive realisation of the strategic master planned sites.

It is inappropriate to defer this issue to a later stage in the development process (i.e. in a Supplementary Planning Document “SPD”). SPDs fall outside the examination process and are not, therefore, subject to full public scrutiny and the rigours of the examination. In view of this there is a real danger that in the absence of a policy requirement to fully address the land equalisation agreements and comprehensive delivery, this fundamental issue will be overlooked. Within this there is the potential and opportunity for the larger landowning and developer communities to work to their own agendas to the detriment of the wider comprehensive master planning approach.

We would respectfully ask TWBC to note that we have approached Crest Nicholson historically, and again very recently to explore collaborative working possibilities: linking in with Site DPC19. Regrettably, given the emphasis and need for comprehensiveness, these approaches have been rejected. So, despite our endeavours, at present there is no collaboration or agreement between landowners. Without TWBC’s support, there are concerns that our client’s land (and other smaller land holding interests) that form a legitimate and important part of the integrated masterplan vision will be marginalised to the detriment of the overall planned vision and interests of acknowledged importance including, amenity provision and open space, blue/green infrastructure, connectivity, ecology, bio diversity: all key and central planks of the masterplan/policy vision of the Paddock Wood expansion. Delivery is central to the soundness of the plan and it is clear that land equalisation is fundamental to this.

Put simply, this is a strategic matter which must be addressed now at the front end of the Local Plan and master planning processes. This will ensure that the planning objectives of collaboration and a comprehensive approach to development, elements that help contribute to place shaping and a good quality environment, are met in full. Failure to attend to this important component now will render the plan undeliverable and therefore unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC should adhere to their own independent consultant's advice (DLA) and commit to facilitating the process of land equalisation agreements in the absence of agreement between the affected stakeholders. The second paragraph to Policy STR4 should be replaced with the following:

"Where sites have several land use elements or are in multiple ownerships, Developers should be invited to form their own collaboration agreement or alternative mechanism for the equal sharing of costs. Should this not occur, TWBC will facilitate this process". And,

"The Council will not support piecemeal proposals that fall outside of or contradict the provisions of the policy and adopted masterplans and/or the principles of comprehensive development".

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure that the Plan is found sound.

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction and Background

Our client has land interest that forms part of Tunbridge Wells Borough Council's (TWBC) planned/proposed expansion area of Paddock Wood, which along with land at east Capel is proposed to deliver approximately 3,490 – 3,590 new houses.

Tudeley Brook Farm (the Site), is a private home with several outbuildings and set in extensive grounds which extend to approximately two hectares. The Site lies to the north of Paddock Wood directly south of Whetsted Road (A228). The full extent of the holding is identified in the Strategic Housing and Economic Land Availability Assessment (SHELAA) and referenced 'Site DPC19'. The land is also included within the masterplan vision, development strategy and draft policy allocation for the proposed extension of Paddock Wood: referenced as Local Plan Allocation STR/SS1 and identified as part of the 'Western Parcel' in Map 27 Masterplan Areas of the Local Plan.

The Site (DPC 19) was not included within the original call for sites process, during the Regulation 18 consultation stage. Following consultation, a series of strong and credible planning arguments were brought forward including, but not limited to, the beneficial relationship of the Site to Whetsted Road and Tudeley Brook presenting 'natural' tangible and defensible boundaries to the western parcel, the facility to contribute meaningfully to flood water/water management requirements to the benefit of the wider development, and with other interests, the provision of public open space/ country park, integrated

with land to the south and west for the benefit of new and planned communities: all supporting the inclusion and integration of the Site within the planned growth proposed at Paddock Wood.

The Site was then appraised by a team of highly regarded independent consultants covering amongst other disciplines, urban design and master planning, flood and water environments, transport and integration and ecology. The complete professional team, appointed by TWBC undertook the master planning work (based on garden settlement principles) to inform the proposed strategic growth at this location.

Following months of detailed assessment and appraisal across all technical disciplines, the appointed consultant team independently concurred with our view on the planning and environmental benefit of fully including the Site within the planned expansion of Paddock Wood. The land now forms part of the Western Parcel of Strategic Site STR/SS1 (as set out in Map 27 on page 148 of the Regulation 19 version of the Plan) and similarly features in the Structure Plan (as set out in Map 28 on page 149 of the Regulation 19 version of the Plan). The land has been removed from the Green Belt and is designated within the Structure Plan as land within a Green and Blue Strategic Landscape Corridor, with overarching visual/physical amenity, ecological, landscape, movement and connection benefits to manage flood waters and to support the well-being of the new communities.

Green and Blue Strategic Landscape Corridor

This green and blue infrastructure is a core component in the acceptability of the proposed development. The Site is an integral part of the masterplan vision adding real value to the wider strategic development planned around Paddock Wood and acts as a facilitator in the following ways:

- . With other land parcels adjoining to the south and west, the site provides a significant and necessary area of 'natural' public open space that will provide an appropriate quantum of amenity space for informal and formal play, whilst providing amenity value for the planned and existing houses;
- . The Site plays a crucial part in providing community infrastructure for the new and existing residents of Paddock Wood with an important green footpath running alongside the boundary;
- . The Site's northern and eastern boundaries are defined by Whetsted Road and Tudeley Brook respectively – the combination will form a strong and defensible new edge to the settlement expansion, thus protecting from future incursion into the Green Belt. Visibility to and from adjoining rural areas will be limited and cohesion between settlements will be maintained;
- . The Site will make a positive contribution to strengthening and restoring an integrated network of habitats for the benefit of nature – this is critical and is a direct response to the heightened importance of integrating biodiversity and ecological interest into new developments that is emerging through the Environment Bill, and which will receive Royal Assent shortly; and
- . Use of the Site provides an opportunity for meaningful improvement to the extant local flooding and drainage issues. It also an essential component of the wider flood alleviation measures that are so critical and necessary in this location to support the delivery of the new housing and, fundamentally, to protect the safety of future residents.

Whilst commendable, this green and blue infrastructure designation raises a requirement to facilitate land equalisation agreements for the benefit of landowners required to "give over" their land for the future benefit of the wider community. The merit and benefit that the Site brings should be acknowledged and properly accounted for in the Local Plan.

Comprehensive Masterplan

Section 3 of the Pre-Submission Local Plan reveals with visions and strategic objectives and sets out the main guiding factors for different parts of the Borough. For Paddock Wood the vision is *"to provide for **comprehensive planned strategic growth that is fully aligned with timely infrastructure provision and which delivers significant improvements** in local employment, town centre, leisure and other services/community facilities commensurate with its enhanced role, as well as ensuring that it is not vulnerable to flooding"*.

Paragraph 5.193 in the supporting text to Policy STR/SS1, also notes the vision for Paddock Wood and further comments that it is important to *"help develop the growth around Paddock Wood and east Capel **strategically and holistically**"*.

The Strategic Sites Topic Paper for Pre-Submission Local Plan (March 2021) explains that the appointed consultant team, led by David Lock Associates (DLA), correctly took an "ownership blind" approach to developing the master plan vision for the planned growth. Adopting this approach ensured that the

planned expansion fully maximised the development potential in terms of securing the important garden settlement principles, providing the key infrastructure in the right locations, without influence or favour on landowning interests.

This ownership blind approach to master planning has directly resulted in the Site being positively included within the wider strategic allocation for Paddock Wood in the Western Parcel of Strategic Site STR/SS1 (Map 27) and also in the Structure Plan (Map 28). We welcome the Site's allocation but have grave concerns that it does not feature nor is it discussed anywhere in written form in the Regulation 19 version of the plan. In other words, there is no commitment in the actual wording of any policies to support the Site and facilitate its wider integration. This is contrary to TWBC's adopted professional and independent advice from its advisors who have recommended its inclusion within the masterplan. It is essential now that TWBC commits fully to the entire masterplan vision, including the Site at Tudeley Brook Farm, to ensure that the full benefits of the masterplan are realised. Specific wording within the draft policy is required to ensure that the vision is comprehensively delivered.

TWBC's objectives for a collaborative landowner approach is reinforced in the Strategic Sites Topic Paper for Pre-Submission Local Plan (March 2021). This Topic Paper provides the background to the Strategic Sites Working Group forum and explains that all stakeholders were made aware of the requirement to deliver the growth around Paddock Wood and east Capel, and Tudeley Village, in line with garden settlement principles, *"acknowledging that these carry a higher infrastructure burden"*. Paragraph 3.5 states that site promoters were advised that they may need to *"prepare for the potential use of equalisation agreements in order to achieve ambition, but reasonable, objectives sought"*.

Chapter 7 of the same topic paper is concerned with deliverability and viability but throughout this chapter, reference is only made to the key site promoters. Regrettably, TWBC have focussed their attention on the four principal housebuilders: Crest Nicholson; Dandara; Redrow and Persimmon with little regard to the smaller site promoters. TWBC has failed to properly acknowledge that there are other important areas of land that, following independent review, now form viable and necessary component parts of the overall plan. This requires resolution in order for the plan to become effective and therefore sound.

The final paragraph to Policy STR/SS1 currently states: *"It is highly likely the delivery of the development will require land equalisation agreements. The Council will, if necessary, use its Compulsory Purchase Order powers to ensure the delivery of the appropriate master planned approach"*.

Given that TWBC have acknowledged that it is "highly likely" that the development will require land equalisation, in the interests of astute planning and deliverability, the local plan must address these land equalisation omissions now. Without the necessary controls to ensure the comprehensive delivery of the whole masterplan vision, the policy/plan is not effective and is, therefore, unsound.

Furthermore, the Strategic Sites Masterplanning and Infrastructure Study (February 2021), prepared by DLA, has a whole chapter dedicated to delivery (Chapter 7). It highlights that *"instances may arise where one developer is meeting the full cost of infrastructure shared by all, or one is disproportionately contributing in a different way such as by providing land"*. It concludes that *"Developers should be invited to form their own collaboration agreement or alternative mechanism for the equal sharing of costs. Should this not occur, **TWBC should facilitate this process**"*.

TWBC's own advisors have therefore recommended that TWBC must 'step in' if it is becoming clear that an equalisation agreement is unachievable. Furthermore, they point out that this should be actioned in a timely fashion so that the delivery of the development is not delayed.

It is therefore important that this land equalisation agreement is enshrined into the policy wording now for clarity and to avoid unnecessary delays in the delivery of the wider masterplan. The present wording contained within the draft policy (*It is highly likely the delivery of the development will require land equalisation agreements*) is vague and lacks the 'teeth' necessary to ensure that the scheme is delivered in its entirety, as envisaged. The correct vehicle to support the development of Paddock Wood is through an equalisation agreement. It is imperative that TWBC, as Planning Authority, take complete charge of this process in the public interest and absent of private agreements between the affected stakeholders.

We would respectfully ask TWBC to note that we approached Crest Nicholson, historically, and again very recently to explore collaborative working possibilities: linking in with Site DPC19. Regrettably, especially given the emphasis and need for comprehensiveness, these approaches have been rejected. So, despite our endeavours, at present there is no collaboration or agreement between landowners.

Without TWBC's support, there are concerns that our client's land (and other smaller land holding interests) that form a legitimate and important part of the integrated masterplan vision will be marginalised to the detriment of the overall planned vision and interests of acknowledged importance including: amenity provision and open space, blue/green infrastructure, connectivity, ecology and biodiversity, all of which are key and central planks to the masterplan/ policy vision of the Paddock Wood expansion. Delivery is central to the soundness of the plan and it is clear that land equalisation is fundamental to this.

Flooding

Throughout the Plan there is a stated ambition to ensure that the proposed growth strategy can be accommodated to provide betterment, without further harm and risk to areas that are vulnerable to flooding.

We have real concerns that this "betterment" will not materialise if the Site is left to stand in isolation and that the wider development will cause further harm to the Site which is already prone to flooding.

The Strategic Flood Risk Assessment "SFRA" (July 2019) shows that the Site is identified as being located in Flood Zone 2 but surrounded by land in Flood Zone 3a. The maps showing the flood zone of the site, taken from the SFRA, is provided below for reference.

[TWBC: for map, please see full representation attached as a supporting document]

Long dated on-site experience shows that following heavy rainfall, the culvert to the north west of the Site (which runs under the A228) is not fit for purposes. It has insufficient capacity even now to accommodate heavy rainfall and results in leeching from Tudeley Brook (which borders the subject site to the east) during inclement weather patterns. Our clients have funded their own flood defence strategy to ensure that the house itself remains protected during these periods but the garden areas become unusable during these weather conditions.

Flooding clearly presents a constraint that has to be managed through the masterplanning process and it is imperative that our client's land is included and used proactively to mitigate flood risk elsewhere in the wider development plans. Leaving the Site isolated will significantly increase the level of leeching to the detriment of our client's amenity.

There is a case to say that the whole of the Site (including the formal house) should be taken over and restored back into the functional flood plain. At present, there is for example a 600mm flood bunding barrier running the entirety of the Tudeley Brook elevation. Removing this bunding along with the other structures and hardstanding on the Site would significantly and materially extend the space available for flood storage. Restoring the functional floodplain would generate significant betterment and indeed this is a practice endorsed in the NPPF with Paragraph 157c.

A key objective for Paddock Wood is ensuring that the proposed growth strategy can be accommodated without further harm and risk to areas that are vulnerable to flooding, to provide betterment. If the Site is left to "row its own boat" there will be no betterment, only harm. The development scheme would go against the stated ambitions of the local plan. A mechanism for compensation needs to be put in place now in Policy STR1/SS1 and a properly conceived and managed land equalisation strategy will assist with this.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To ensure that the strategic allocation is deliverable and therefore sound, it is imperative that all the landowners are given due consideration and are fully involved in the plan making process.

The plan states at Paragraph 5.178 that site promoters have “indicated” their support for the proposals and so deliverability is “anticipated” to be achievable over the plan period. Our experience has shown that this is not the case.

In order for the plan to be effective and deliverable, stronger commitment and management from TWBC is required. The Council must take charge of this process (as advised by DLA) and we recommend that the Council seeks to ensure a land equalisation agreement is in place for the western parcel of land at Paddock Wood prior to submitting the draft Local Plan to the Secretary of State.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure that the Plan is found sound.

If you would like to attach a file in support of your comments, please upload it here. [PSLP 1125, 1129, 1132 K LW for Mr and Mrs Whetstone SI Representations redacted.pdf](#)

Question 1	
Respondent's Name and/or Organisation	Mr & Mrs Whetstone
Question 2	
Agent's Name and Organisation (if applicable)	Kember Loudon Williams Ltd
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 14 Green, Grey, and Blue Infrastructure

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The guiding principles of Policy EN14 are considered sound and reflective of the significance and importance of protecting existing green, grey and blue infrastructure and integrating/maximising opportunities to support climate change, through a combination of enhanced biodiversity and restoring and providing 'integrated networks of habitats and green spaces'. These are all positive and laudable aims that link in with the aims and aspirations of the new Environment Bill. Whilst yet to receive Royal Assent, the new Bill is a clear and necessary statement of the direction of travel in the interest of climate change, biodiversity, and ecology interests – these aims are, and should be fundamental parts of all new development proposals.

It is disappointing, therefore, that the draft policy reads more as guidance than as a development plan policy. It is unclear on how its provision should be applied by the decision maker, Tunbridge Wells Borough Council (TWBC). In this regard, the National Planning Policy Framework (NPPF) establishes in Part d of Paragraph 16 that policies must be clearly written and unambiguous. Part f of the same paragraph requires that policies should serve a clear purpose. The policy as presently drafted does not fully meet these tests.

One of the main differences between the previous Regulation 18 version of the plan and the current Regulation 19 Pre-Submission Local Plan is that there is now a Structure Plan showing broad allocations associated with the Paddock Wood Strategic Site (as shown in Map 28 on page 149 of the Pre-Submission version of the Plan). The Structure Plan, developed in association with TWBC's appointed consultant team, quite rightly places the provision, creation and integration of Green and Blue Strategic Landscape Corridors/ networks at the centre of the masterplan vision for the delivery

of housing and mixed use facilities in this location. The integration of development and the new and existing populations, with the natural environment, underpinned by the principles of sustainability, biodiversity and design will ensure that a balanced, integrated mixed-use community is provided in line with the aims and principles established through the master planning process.

These objectives, including the necessary green, blue and grey infrastructure requirements are clearly stated in the Plan, with specific designations in the Structure Plan. Regrettably, the draft wording of Policy EN14 has not be updated to reflect this enhanced status and the emerging and future importance of integrating landscape, open space networks, biodiversity, amenity and water management with the provision of new housing and communities. Amendments are required to the policy wording to ensure that the Plan is effective and therefore sound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is not enough to just “identify and protect” existing green, grey and blue infrastructure, as presently drafted in the policy.

The policy should be reimagined to make it a firm requirement that the Green and Blue Strategic Landscape Corridors (as identified in the DLA Masterplan as set on page 149 of the Regulation 19 Version of the Plan) are comprehensively planned and integrated into new residential/mixed use schemes to ensure that the aims (biodiversity, water/flood management, sustainability, ecological interests, including movement corridors, and climate change) are fully met and developed as part of a comprehensive whole.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to ensure that the Plan is found sound.

No justification for more housing and expanding the village boundary. There are no jobs in Speldhurst so this will add more through traffic to the village. The village is already drowning in speeding through traffic avoiding Tunbridge Wells.

There is no effective public transport and no provision for cycle lanes to Tunbridge Wells.

Housing should be added to existing towns where people can access jobs with public transport.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 1

Respondent's Name and/or Organisation Dr Philip Whitbourn

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph number 3.13

Question 4

Do you consider that the Local Plan:

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

To be sound, the Plan needs separate and worthwhile "Local Ambitions" for the historic town and regional centre of Royal Tunbridge Wells

Paragraph 3.6 recognises Royal Tunbridge Wells as the main commercial centre in the Borough, serving a wider catchment, reference also being made to its particular environmental qualities, and to its cultural role, while paragraph 3.7 refers to the distinctive character of Southborough, with its own services and facilities. Thus it is not sound for these two distinct towns, which differ greatly in size and nature, to be lumped together for the purposes of "local ambitions" within a shared and unworthy "vision" for their futures, and shared nebulous "local ambitions".

Royal Tunbridge Wells is a major historic town of national importance; it is a regional shopping centre; a tourist destination; and it is a transport node. Thus, its "local ambitions" should relate to those characteristics, and be separately set out from the probably rather different ambitions that may apply to the different characteristics of Southborough, a town that like Paddock wood has its own Town Council and, like Paddock Wood should be separately listed, rather than "dovetailing" with Royal Tunbridge Wells to form some amorphous sounding "main urban area" of mixed uses.. (For "Local ambitions" for Royal Tunbridge Wells, please see overleaf) [TWBC: For "Local ambitions" please see Question 6]

[TWBC: For evidence supporting this representation, please see pages 1-3 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Local ambitions for Royal Tunbridge Wells should include:

- . a priority for the preservation and enhancement of the town's unique and nationally important historic centre when considering planning proposals

- . strengthening Royal Tunbridge Wells' role as a destination town, supporting its tourist industry, and increasing its cultural offering
- . maintaining its position as a regional shopping centre
- . improving its function as a transport node

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

	Policy STR/RTW 1 The Strategy for Royal Tunbridge Wells
Question 4	
Do you consider that the Local Plan:	

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The need for a more enlightened strategy for the historic town and regional centre of Royal Tunbridge Wells

This Strategy is unsound in conservation terms, in that it places too much emphasis on “redevelopment and Intensification”, both of which can prove harmful to the character and appearance of the Conservation area.

[TWBC: For evidence supporting this representation, please see the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Item 2 should be re-worded to read: Provide additional housing, which may be delivered through the development of allocated sites, and the sympathetic refurbishment of vacant properties in the Town Centre.

Item 3 should be amended to omit the words “by the intensification of uses/sites”.

Item 5 should read: Promote the retention and, where appropriate, the expansion of existing employment and leisure premises.

Item 6 should read: Develop a strategy for the Town Centre to provide a framework for a conservation based Town Centre Area Plan, to ensure the long term vitality and viability of the centre, and to secure the future of Royal Tunbridge Wells as a nationally important historic town that is a tourist and cultural destination.

Item 7 should be omitted

Item 9 should have the added words: including proper parking arrangements for school buses.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Paragraph number 5.14
Question 4	
Do you consider that the Local Plan:	

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The need to avoid repetition of the appalling planning mistakes, in visual and conservation terms, of the Dandara and Cinema site schemes

The charm of the historic town of Royal Tunbridge Wells resides in its heritage of older buildings, and not in new developments which, like the Dandara scheme at The Pantiles, usually detract from the local scene, with their alien nature, scale and international modern style. Repeating the mistakes of the Dandara and Cinema Site schemes could soon seriously spoil the town, and new development therefore needs to be approached with a degree of caution. Paragraph 5.14 could be seen as an open invitation to property developers to move in with more such unsuitable schemes, and the paragraph should be omitted, apart from the pertinent last two lines.

[TWBC: For evidence supporting this representation, please see pages 8 and 17 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Omit paragraph 5.14, except for the last lines concerning the local highway network, which might be added on to the previous paragraph 5.13.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

Question 1	
Respondent's Name and/or Organisation	Dr Philip Whitbourn
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
	Paragraph number 5.28
Question 4	
Do you consider that the Local Plan:	

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

"Redevelopment" of the landmark, listed Civic Complex, and Great Hall car park unsound in conservation area terms

Paragraph 5.28 is seen as unsound in conservation terms, particularly with regard to the listed Civic Complex, and the Great Hall Car Park, and is in need of serious amendment.

[TWBC: For evidence supporting this representation, please see pages 10, 11, and 16 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The paragraph should be amended to accord with the proposed revised wording at the end of Policy STR/RTW 2, and omit the words "redevelopment and" from the 2nd line of Paragraph 5.30.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

Question 1

Respondent's Name and/or Organisation Dr Philip Whitbourn

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph number 5.25

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In considering the provision of additional housing in the town centre, the Plan should focus on the contribution that the sympathetic refurbishment of vacant properties can make, and not just on new build

Paragraph 5.25 speaks of the contribution “new residential development” could make to the vitality of the Town Centre. However, “new” residential development, such as the Dandara scheme, may be undesirable for other reasons, while the residential refurbishment of existing vacant properties may be highly desirable. The emphasis should, therefore not be just upon “new”.

[TWBC: For evidence supporting this representation, please see pages 8 and 9 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

On the 6th line of paragraph 5.25, replace the words “new residential development” with “additional residential use”.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

Question 1

Respondent's Name and/or Organisation Dr Philip Whitbourn

Question 3

To which part of the Local Plan does this representation relate? Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph number 5.30

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The word “redevelopment” should be omitted. And “public art” needs to be suitable, not a public eyesore, as at the Dandara scheme

In the 2nd line of paragraph 5.30 the word “redevelopment” is normally understood to mean demolishing the existing building and constructing a new one, which should certainly not come about in the case of the listed Civic Complex. The term “enhancement”, on the other hand, can be broad enough to embrace refurbishment, or perhaps some forms of reconstruction in particular circumstances, and would be better standing on its own, without the addition of the word redevelopment.

In the 2nd line of the paragraph, the “public art” could have the opposite effect to that intended, as with the Dandara scheme at The Pantiles. “Suitable” public art might well be desirable, but “elements of” public art might well not.

[TWBC: For evidence supporting this representation, please see page 15 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Omit the words “redevelopment and” from the 2nd line of paragraph 5.30.

In the 2nd line up of paragraph 5.30, for “elements of public art” read “suitable public art”.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 1

Respondent's Name and/or Organisation Dr Philip Whitbourn

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/RTW 2 Royal Tunbridge Wells Town Centre

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Vision for Town Centre, public realm, and Plan's unsound framework for the all-important Town Centre Area Plan

Items 1 and 3 of Policy STR/RTW 2 are seen as unsound in Conservation Area terms, as are the bullet points at the top of page 82, and are in need of amendment.

[TWBC: For evidence supporting this representation, please see pages 1-3, 4-15, and 18-20 of the supporting document]

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 1 of STR/RTW/2 (page 81) should be amended to read:

The overall vision for the Town Centre must be firmly based upon Royal Tunbridge Wells' recognised status as a historic town of national importance, and set out a conservation approach to ensure its preservation and enhancement as the culture centre of the Kent and Sussex Weald.

Paragraph 3 should be amended to read:

The sympathetic enhancement of the public realm, where this would improve the appearance of the historic centre, designed to minimise disruption, and subject to full consultation with traders and the wider public.

The bottom passage after paragraph 8 on page 81 should be amended to read:

The above will be delivered through a conservation based Town Centre Area Plan, and support for schemes and proposals that accord with that plan.

Three major properties are considered key to the realisation of the strategy, namely:

- The existing CIVIC COMPLEX, including the statutorily listed Town Hall, Amelia Centre, Assembly Hall, Police Station and Calverley Terrace, which are in urgent need of a sympathetic conservation scheme to form a vibrant Cultural, Community, and Civic Centre, remaining public buildings and open to the public.
- The ROYAL VICTORIA PLACE SHOPPING COMPLEX, which is in serious need of early rejuvenation, following a period of unfortunate actions by a previous owner, compounded by the recent national lock-down measures.
- THE PANTILES, which could benefit from a carefully prepared Conservation Area Plan, in close cooperation with property owners,, traders, and other interested parties.

In the longer term, the future of the Torrington and Vale Avenue area needs to be addressed, and better linked to the to the main centre.

The Cinema Site is the subject of Policy AL/RTW/1, where “high quality design” should reflect the existing architecture on the eastern side of the Mount Pleasant tree-lined boulevard.

There should be no redevelopment of Great Hall Car Park all reference to Great Hall should be deleted.

The words “and/or redevelopment” at the bottom of page 81 should be deleted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the inspector concerning my evidence and representations, as necessary

If you would like to attach a file in support of your comments, please upload it here. [PSLP_534, 535, 540, 543, 546, 549, 551_Dr P Whitbourn SI-1 Evidence supporting representation.pdf](#)

Policy PSTR/HO 1 The Strategy for Horsmonden parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposed numbers for Horsmonden will have a significant detrimental effect to the parish on a number of accounts: the loss of vital habitat and biodiversity due to the development on greenfield sites, the increase in traffic from the proposed 320 new properties, the endless construction impacts - both Horsmonden and Matfield have experienced developers breaching their construction management plans with regards to ecology and traffic. There also is insufficient infrastructure to support the proposed increase of properties. The site at Brenchley Road would be unsustainable as people cannot safely walk to the village centre, and the site at Bassetts Farm would be unsafe due to the high numbers of vehicles attempting to access Goudhurst Rd. Overall a number such as 100 would be realistic and acceptable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 1	
Respondent's Name and/or Organisation	Ian white
Question 3	
To which part of the Local Plan does this representation relate?	Paragraph(s)
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
5.131	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified
. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As per my earlier submission, I fully accept the proposal that Safeguards land PE4 (Pink) for the future expansion of the Hospice In The Weald. I believe that the remaining land should not be further developed, rather that it should be preserved as 'Green Land' in order to provide tranquil views for the Hospice residents, in keeping with its 'In The Weald' title.

The Downingbury Farmstead comprises listed buildings and mature trees, which should be preserved and provides a 'soft entrance' to Pembury.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Currently, Downingbury Farm has a successful Farm Shop and a variety of apples and soft fruits are grown and sold on site, which I believe should be preserved to support and enhance village life, while reducing the burden of excessive 'food miles'.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/PE 1 The Strategy for Pembury parish

Paragraph No(s) 5.659 & 5.664

Policies Map (Inset Map No(s)) 64

[TWBC: this representation has been input against Policies PSTR/PE 1 and AL/PE 1 - please see Comment Numbers PSLP_1116 and PSLP_1119]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

PSTR/PE1 & 5.659 – I do not accept that this is an appropriate strategy as there is no proven need for 389-417 new dwellings in the village of Pembury. These proposals should not outweigh the merits of preserving the Green Belt and AONB, especially on site AL/PE1 which is partly inside and more generally abutting the Conservation Area. The fact that the Chestnut Walk development was allowed on appeal should not afford an excuse to compound the problem with further development in this area. However in the event that this principle is not admitted I would make the following observations about site AL/PE1:

5.664 - The 2nd requirement for this policy re additional parking 'to serve the adjacent village hall and the wider public' is not justified. This new proposal for a facility to include public car parking was not mentioned in the Draft Local Plan. It is not an appropriate strategy for the following reasons:

1] The inclusion of a few public parking spaces on the site would not provide enough benefit to form a significant part of the required exceptional circumstances for construction of 50-60 houses on the Green Belt. 2] The site is in any case too far from the centre of Pembury to assist with the wider demand for public parking in the village. 3] It would be very difficult for the many different village hall users to find their way to a vehicular car park entrance via the development site.

If the car park was exclusively an overspill car park for village hall users this could be achieved far better with a one way system, IN from the existing village hall car park and OUT via the development access road. This would still achieve some wider benefit for the village as it would reduce the amount of on-street parking in the High Street when the village hall is busy.

If the car park was exclusively for village hall users it would be safe enough for them to share the relatively narrow vehicular entrance with pedestrians going to and from the entrance to the hall. Creating a pedestrian link for the wider public is an unnecessary complication with little benefit in terms of walking distance compared to using the proposed development access road.

In addition to the 40m deep landscape buffer adjacent to the A21, the scheme should incorporate a landscape buffer of approximately 10m deep between the existing Conservation Area boundary and the new housing. This would help mitigate the impact of the development on the existing properties within the Conservation Area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested revised wording of AL/PE1:

2] There shall be additional overspill parking provision of approximately 30 spaces within the design of the scheme, to serve the adjacent village hall, the area for which is shown indicatively on the site layout plan. Vehicular access to this shall be IN from the existing village hall car park and OUT via the development site itself.

6] The layout of the scheme shall include a landscape buffer of approximately 40m deep adjacent to the A21 (in addition to the existing vegetation along the A21) and a landscape buffer of approximately 10m deep between the existing East/West Conservation Area boundary and the new housing, as shown indicatively on the site layout plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

PSTR/PE1 & 5.659 – I do not accept that this is an appropriate strategy as there is no proven need for 389-417 new dwellings in the village of Pembury. These proposals should not outweigh the merits of preserving the Green Belt and AONB, especially on site AL/PE1 which is partly inside and more generally abutting the Conservation Area. The fact that the Chestnut Walk development was allowed on appeal should not afford an excuse to compound the problem with further development in this area. However in the event that this principle is not admitted I would make the following observations about site AL/PE1:

5.664 - The 2nd requirement for this policy re additional parking 'to serve the adjacent village hall and the wider public' is not justified. This new proposal for a facility to include public car parking was not mentioned in the Draft Local Plan. It is not an appropriate strategy for the following reasons:

1] The inclusion of a few public parking spaces on the site would not provide enough benefit to form a significant part of the required exceptional circumstances for construction of 50-60 houses on the Green Belt. 2] The site is in any case too far from the centre of Pembury to assist with the wider demand for public parking in the village. 3] It would be very difficult for the many different village hall users to find their way to a vehicular car park entrance via the development site.

If the car park was exclusively an overspill car park for village hall users this could be achieved far better with a one way system, IN from the existing village hall car park and OUT via the development access road. This would still achieve some wider benefit for the village as it would reduce the amount of on-street parking in the High Street when the village hall is busy.

If the car park was exclusively for village hall users it would be safe enough for them to share the relatively narrow vehicular entrance with pedestrians going to and from the entrance to the hall. Creating a pedestrian link for the wider public is an unnecessary complication with little benefit in terms of walking distance compared to using the proposed development access road.

In addition to the 40m deep landscape buffer adjacent to the A21, the scheme should incorporate a landscape buffer of approximately 10m deep between the existing Conservation Area boundary and the new housing. This would help mitigate the impact of the development on the existing properties within the Conservation Area.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Suggested revised wording of AL/PE1:

2] There shall be additional overspill parking provision of approximately 30 spaces within the design of the scheme, to serve the adjacent village hall, the area for which is shown indicatively on the site layout plan. Vehicular access to this shall be IN from the existing village hall car park and OUT via the development site itself.

6] The layout of the scheme shall include a landscape buffer of approximately 40m deep adjacent to the A21 (in addition to the existing vegetation along the A21) and a landscape buffer of approximately 10m deep between the existing East/West Conservation Area boundary and the new housing, as shown indicatively on the site layout plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I live adjacent to the A228 on the outskirts of Pembury. The area covered by the proposed development is therefore at some distance from the place where I live. although I do walk and otherwise visit and pass through that area frequently. Even though I do not live there, I feel strongly that the proposed development would destroy both the recreational value of significant areas of Green Belt, and also the character of a large area of immense charm that presently is enjoyed by far more people than just those who live close to the proposed development.

The local road infrastructure is already overloaded and certainly not capable of supporting 4000+ new homes from developments proposed for Tudeley and East Capel. In particular the A228 and the A264 will not support extra traffic into and out of Tunbridge Wells town centre. The A264 is already almost impassible at peak times. The A228 carries a great deal of ambulance traffic between Tunbridge Wells and Maidstone hospitals. I live adjacent to the A228, and already find it difficult and dangerous to join the road. Two large trucks can barely pass each other, and must slow to a crawl on the A228 between Pembury and the Five Oak Green roundabout.

A station at Tudely seems unlikely as an option to relieve pressure on road transport, but it is difficult to see how additional parking could be provided at either Paddock Wood or Tonbridge Stations where parking is already difficult.

The proposed development falls entirely within the Green Belt and an area considerably larger than the proposed development will inevitably be blighted. Associated necessary infrastructure such as new or wider roads will cause further blight. Other current infrastructure including schools, hospitals, libraries, gyms and other recreational facilities etc will be overloaded, and addition of new facilities will further blight the countryside.

The development itself would fall entirely within the Green Belt and would result in almost continuous development from Paddock Wood to Tonbridge. Apart from direct destruction of Green Belt on which the development would stand, it would serve to break apart two Green Belt areas thus substantially increasing its destructive effect.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	.	No, I do not wish to participate in examination hearing session(s)

I live adjacent to the A228 on the outskirts of Pembury. The area covered by the proposed development is therefore at some distance from the place where I live. although I do walk and otherwise visit and pass through that area frequently. Even though I do not live there, I feel strongly that the proposed development would destroy both the recreational value of significant areas of AONB and Green Belt, and also the character of a large area of immense charm that presently is enjoyed by far more people than just those who live close to the proposed development.

The local road infrastructure is already overloaded and certainly not capable of supporting 4000+ new homes from developments proposed for Tudeley and East Capel. In particular the A228 and the A264 will not support extra traffic into and out of Tunbridge Wells town centre. The A264 is already almost impassible at peak times. The A228 carries a great deal of ambulance traffic between Tunbridge Wells and Maidstone hospitals. I live adjacent to the A228, and already find it difficult and dangerous to join the road.

A station at Tudely seems unlikely as an option to relieve pressure on road transport, but it is difficult to see how additional parking could be provided at either Paddock Wood or Tonbridge Stations where parking is already difficult.

The proposed development borders directly on to the High Weald AONB so that the latter will inevitably be blighted. Associated necessary infrastructure such as new or wider roads will cause further blight. Other current infrastructure including schools, hospitals, libraries, Gyms and other recreational facilities etc will be overloaded, and addition of new facilities will further blight the countryside.

The development itself would fall entirely within the Green Belt and would result in almost continuous development from Paddock Wood to Tonbridge. Apart from direct destruction of Greem Belt on which the development would stand, it would serve to break apart two Green Belt areas thus substantially increasing its destructive effect.

The settlement at Tudeley, which includes the historic church with its Chagall windows, has immense character immense character which contributes greatly to the surroundings. This character would be lost for ever if the development goes ahead.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I do not believe the planned development is capable of modifications which would make it acceptable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Policy STR/RTW 1: The Strategy for Royal Tunbridge Wells	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

To take away 6% of the greenbelt in the borough is plain wrong. Green belt should be protected for future generations not turned into more housing.

The amount of construction (5 sites I believe) and increased traffic in the Broadwater Down area of Tunbridge Wells is far too high and to take away the AONB fields at Spratsbrook Farm next to Ramslye is an awful decision. Those fields and ancient woodlands need to be protected not have a housing estate rammed into the fields.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- . Failure to preserve or enhance AONB
- . Needs to be reduction in Hawkhurst Allocation - "enough is enough"
- . Removal of HH Golf Course site was sound and sensible decision
- . The impact of additional traffic @ Flimwell/ A21 junction will be considerable - there are already significant traffic build ups.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Revisit HA1 to reflect reduced overall housing numbers in Hawkhurst

Removal of HA4 (Cophall)

Revisit HA2 + HA3 to ensure area of landscape importance is retained

Modify HA1 to ensure no development at side limits of build

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The constant "one step forward and one back" re housing development is a constant frustration - once a decision is made then stick with it. The demise of Hawkhurst Golf Club was due to the constant "developing not developing" which over many years meant attracting new members was impossible.

Is legally compliant	Don't know
Is sound	Don't know
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As a resident of Tonbridge I feel justified in raising my concerns about proposals in the Tunbridge Wells Borough Council area. Firstly the area is effectively a single area for employment, housing, retail and entertainment (I myself have in the past both lived and worked in Tunbridge Wells and often go there for entertainment and shopping). Secondly the proposals will have a very significant impact on Tonbridge, especially as the proposed 'garden village' at Tudeley will increase the amount of traffic in my town.

The wrong housing in the wrong place and the climate emergency

Unfortunately the construction of large numbers of homes based on building what is profitable will do nothing to bring down the cost of housing. Indeed there have been reports of buyers in the United States and China looking at purchasing new-build homes in Tunbridge Wells Borough for investment purposes, as well as an ever-growing buy-to-let sector fuelled by government policies. However things could be improved significantly were a much higher minimum density per hectare adopted. As the CPRE has noted, some developments would provide less than 15 homes a hectare. Setting a minimum for all sites of 30 homes a hectare – and much higher in or adjacent to larger settlements - would halve the amount of land required and bring the cost per home down. It is also clear that low-density 'executive-style' homes lock in car – and therefore carbon – dependency and are insufficient to support local businesses and services. In July 2019 Tunbridge Wells declared a climate emergency and any new housing or commercial developments should be forced to show how they will decrease the amount of carbon emitted, something which must include a shift from personal motorised transport to public and active transport. It is also worth noting that there is increasing concern about the effect on health of emissions of particulates from braking, which may be an even more significant issue with electric cars than petrol and diesel ones.

Route for future transport infrastructure at Paddock Wood and Capel – STR/SS3 and STR/PW1

Tunbridge Wells (town) is very poorly connected by rail to most of Kent, as has been acknowledged by Network Rail. There is a UK-wide acknowledgment that railways are becoming an ever-more significant part of our transport infrastructure and for many journeys are a better option than buses. Unfortunately there is limited scope to increase the number of trains on the railways in West Kent, due to capacity constraints such as the number of platforms at Tunbridge Wells and Tonbridge stations, the single-track tunnels between Tonbridge and Hastings and the pattern of fast and stopping services between Tonbridge and Orpington. There are, however, serious proposals to reinstate rail services between Tunbridge Wells, Lewes and Brighton and to improve Medway Valley Line services.

In the longer term (albeit many decades) it would be advantageous to directly link a future Brighton to Tunbridge Wells service with the existing Paddock Wood to Strood service, thereby avoiding a reversal at Tonbridge and the heavily congested existing Tunbridge Wells to Tonbridge section of line. However the proposals for Paddock Wood West and Capel Garden Village as they stand would impede this as they would lead to development of the most logical route for such a railway (which would run above ground between Paddock Wood and Five Oak Green before entering tunnelled sections for the remaining route beneath Pembury and Tunbridge Wells).

As the existing railways in our area have in several cases been in continuous use for 175 years it is clear that their planning should be for the longer term. Such a scheme would perhaps not be viable for many decades (although any significant expansion of Paddock Wood would make it more pressing), it would be logical to identify such a route and protect it from development. Many proposals to either reopen or to construct new railway lines have foundered on the fact that development has taken place on the optimum alignment, something which is causing very significant cost increases for the ongoing East – West Rail programme to the East of Cambridge and elsewhere. A relatively small amount of protected land would avoid the need for expensive and disruptive demolition.

Council housing

The clearest way to actually address the shortage of affordable homes is by Tunbridge Wells Borough Council again becoming a significant landlord. High quality modern council estates, such as the award-winning Goldsmiths Street development in Norwich, provide excellent homes at a level of rent affordable to those living and working in the local community. Any council-owned land which has been identified for sale to developers could be used to build similar housing to meet the needs of the local community.

Tudeley Garden Village – STR/SS 3

This proposal, while exceptionally profitable for the Hadlow Estate, should be rejected. Many of the points about car dependency and low density apply quite clearly to this. Housing in Tudeley and Capel is much more expensive than in much of the borough and the unspecified proportion of ‘affordable’ housing may therefore be more expensive than the average home in Tunbridge Wells, Tonbridge and Paddock Wood. There is no serious detail about how the ‘promotion’ of walking and cycling is to be enforced but short of a complete ban on motor vehicles it seems likely that the overwhelming majority of trips to neighbouring towns will be by car, something made even more significant by the apparent failure to include a railway station or frequent new shuttle bus service. Indeed this is admitted in the plan by recognising that this development will require the construction of a new bypass. It is also concerning to see the idea that the prejudices of the Prince of Wales about architecture are to be the guiding principles behind the aesthetics of the development. Their application at Poundbury, near Dorchester, has rightly been condemned by architects.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound Don't know

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I am a resident of Rosemead flats which are on the corner of Speldhurst and Prospect Road with a lovely view across the fields opposite at present to the woodland area.

I am extremely unhappy with the proposed development for the following reasons:-

- a) I have lovely unobstructed views from my lounge and main bedroom across the road to the natural woodland and fields.
- b) Very concerned about environmental issues. At present, there is farmland with cows on, woods with deer, rabbits, birds etc, what will become of this.
- c) There is a large amount of woodland with trees to be cut down and woodland destroyed.
- d) Southborough is already extremely busy and congested with traffic especially during work and the school run times in the morning. Sometimes it is almost impossible to get up the traffic lights with the sheer weight of traffic.
- e) When not home working to which I am doing at present, I work in Tunbridge Wells and use Reynolds Lane as a cut through. Again, this is extremely busy with people double parking, people having to mount the pavement in their cars to get through the road. This will only exacerbate the problem with more houses built and obviously more cars.
- f) I do not think the infrastructure of Southborough and Tunbridge Wells can cope with more housing. The road infrastructure will not take it and it will be gridlocked, not enough schools and also I belong to St Andrews Medical Practice in Southborough which is already hugely over-subscribed with patients. Are they adding other services for the amount of houses they are planning on building.
- g) Also, I can see that there will be a huge amount of disruption for a number of years and very noisy with construction traffic.

To reiterate again, Southborough does not have the infrastructure in place for more houses. It is always gridlocked and will not be able to cope.

Unless there are plans to build some kind of bypass into Tunbridge Wells, the only routes in are either Reynolds Lane which is widely used as a "rat run" and already cannot cope and the main road into Tunbridge Wells which is always gridlocked. I don't think you comprehend the amount of excess traffic that there will be.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I do not wish this development to go ahead at all. It will spoil the village feel of Southborough which will not be able to cope.

You area already building a development further down Speldhurst Road as it is, nearby to the turning on the opposite side of the road to the Salomons.

I thought our goal going forward was to have less, traffic, congestion and be more away of green issues.

I am appalled this is going ahead and only for material gain for the developers.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Also, I wish to know why you have released this site from being Green Belt to allow it to be built on bearing in mind it has loads of trees, woodland and wild animals including deer, badgers etc.

5.49 The site was released from the Green Belt, and the Development Strategy Topic Paper and Green Belt studies set out the exceptional circumstances and compensatory improvements to the remaining Green Belt to justify the changes to the boundary in this location.

5.50 There are areas of ancient woodland in proximity to the site, and trees with Tree Preservation Orders within the site itself

Thank you for your notification about the publication of the above.

The plan is very extensive and, if nothing else, I am sure will be seen as a historic record of our position and thoughts in future times.

Obviously my interest is mainly related to Hawkhurst. Am I correct in thinking that Hawkhurst has the sole "made" Neighbourhood Development Plan in the Borough. Importantly, it identified sufficient sites for future housing development to meet the Government's targets.

To me the main issues in Hawkhurst are the roads and the proposed golf club development. The housing numbers sought is clearly unsustainable for many reasons as has been well documented previously.

However, money talks _ _ _

With regards to the roads I have the following thoughts:-

I understand that KCC have now withdrawn their reservations concerning the relief road, closure of the south end of Cranbrook Road, and other proposals in the planning application. There must be some reason for them to have shifted their position. For the record I have written to Highways twice in the last year about traffic noise etc but have not received any reply.

Whilst there are periodic traffic holdups in Hawkhurst, I don't think the resultant delay is ever more than five to ten minutes, so let's get the issue into perspective. Hold ups at Flimwell can be longer.

It is disappointing to read that the plan makes a case for roadworks to alleviate the perceived problem at Hawkhurst - Clause 2.35 refers. Later Clause 5.357 states "potential to provide a relief road to the northwest of the village".

The comments about air quality along Cranbrook Road would again appear to support the relief road. We should remember that Government policy is the introduction of electric vehicles throughout this decade so the problem of poor air quality is likely to get considerably better. Clause 2.36 refers. Diverting traffic onto the High Street will simply bring the same problem to the residents along the High Street.

The fact remains that a substantial percentage of the vehicles coming into Hawkhurst along the Cranbrook Road that will be diverted along the relief road will turn left on the High Street to get to the shops, and to access The Moor, and most importantly to get onto the A2244 that provides a useful alternative route to the A21 down to Hastings

Clause 5.358 states "future planning applications must consider the traffic impact and that they will not have an unacceptable impact or result in severe residential cumulative impacts. There is no doubt in my mind that the possible changes to traffic flow will result in severe residential cumulative impacts along the High Street towards Hawkhurst and at the Flimwell junction.

More generally, is there some reason why Tunbridge Wells Golf Club is listed in Appendix 2 - Schedule of designated local green space sites, but Hawkhurst Golf Club is not? What a positive move it would be to keep the golf club as a green space.

[TWBC: the above paragraph on Local Green Space has also been entered under Appendix 2: Schedule of Local Green Space - see Comment Number PSLP_44].

It seems silly for Tunbridge Wells to make up for the shortfall in Sevenoak's future housing provision. As a sleeper town, Sevenoaks residents commute north to London so taking them farther south is illogical.

A couple of the fundamental statements should not be overlooked. Policy EN19 - High Weald Area of Outstanding Natural Beauty states "Planning permission will be refused for major development unless it is in the public interest and in accordance with national policy. Any further development in Hawkhurst should be refused on these grounds.

NPPF - Government Planning policy states" development must be sustainable"

I do hope that the Government keeps within its own guidelines and doesn't just ride roughshod over our well considered development plans.

Teething problems with a new computer means I am unable to download your forms so hope you will accept this email.

It has been brought to our notice that plans include closing the railway bridge at Paddock Wood to vehicles except buses. We live in East Peckham and use Paddock Wood for main shopping, for vets and dentist. The idea of closing the bridge seems preposterous. The diversion for traffic to get to the town will add to pollution and congestion. Many people here work in Paddock Wood and use the GP surgery. When I first heard this proposal I almost felt it was a joke. At a time when we are supposed to be reducing vehicle pollution this is going to add to it greatly and will especially affect the residents living on the proposed route.

We also feel it will have a detrimental effect on the businesses in Paddock Wood. There is very little that cannot be purchased in the town. It is small, friendly and the free hours parking plus free parking at Waitrose are a great attraction. PW is a much more attractive proposition for shopping than big towns but with the closure of the bridge there will be no incentive to go there rather than Tonbridge, especially for people even further away than East Peckham.

We are also concerned to hear that there are proposals to shut Hartlake Road due to occasional flooding. It is a popular route to by-pass Tonbridge congestion and the most straightforward to access the A21. Pubs and other businesses along there will suffer and most likely close. It does not get so busy it causes problems. It is the only place to cross the river between East Peckham and Tonbridge.

The proposal to put so many new houses in the area will also be detrimental to the area. So called 'affordable' housing will be a minimum and is not affordable to a lot of young people. I have a daughter who would love to live where she grew up and buy a house locally but she and her husband both work for charities and do not earn enough to buy anything within a reasonable distance of their work. My son and his wife are sadly looking to move to Scotland where housing is much cheaper. The majority of the new properties will be purchased by people wanting to move in to the local area and not by local people already resident who want to get on the property ladder, thus pushing property prices up again.

Kentish people are being priced out of Kent. More housing squashed in to an area without the infrastructure will not improve the situation. It will eventually make it more undesirable.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Comment ID	PSLP_495
Response Date	27/05/21 10:01
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.9
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Sebastian Winny
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_495 and PSLP_499]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

Looking at the issue in terms of its hectarage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)**, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.

- Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report*), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10

terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's

consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Sebastian Winny [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Benenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Sebastian Winny [REDACTED]
Comment ID	PSLP_499
Response Date	27/05/21 10:01
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Sebastian Winny
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

Paragraph Numbers 5.420 and 5.421

Inset Map 18

[TWBC: This representation has been input against Policies AL/BE 3 and AL/BE 4 - please see Comment Numbers PSLP_495 and PSLP_499]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS. BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see web link)

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP includes both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.
- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP.* The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring

parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
- . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
- . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
- . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and

in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only “31 residents from the East End” had sent in “comments”. For the strength of today’s opposition to the BNP, see the FEE’s current online petition with over 450 signatures <https://www.change.org/EastEndFriends>

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads “The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020.” But the allocations had already been made and published by the BNP in February 2019 in its so called “Informal Draft Plan”. The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states “The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.” How can the BNP follow the PSLP’s approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern sight and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in TWBC's *Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs*, Benenden).
- offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.

- Inset Map 18 (Benenden Hospital)**, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.

- Previous Stages, Draft Local Plan, Benenden Overview**, p263, provides a basis for the PSLP but contains inaccuracies.
 - There is no "pre-school/nursery" as stated in the Overview
 - There is no "Small shop at hospital" as stated in the Overview
 - The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from (see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report*), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape

character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10

terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's

consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.).” Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS “includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.” Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south

of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Woodland Trust
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy STR 5 Infrastructure and Connectivity	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

Yes

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy and welcome the addition of the explicit reference to hedgerows and street trees, in addition to the prior welcome inclusion of woodland and community orchards, in the section headed *Green, grey and blue infrastructure*, as we requested in our response to the Regulation 18 consultation.

We support the inclusion of natural green space as part of the range of provision of space for sport and recreation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy and recommend further strengthening it with reference to the emerging requirement for Local Nature Recovery Strategies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We propose amending para 6 to read:

6. Opportunities and locations for biodiversity enhancements will be identified and pursued by the creation, protection, enhancement, extension, and long-term management of green corridors and through the development of green infrastructure networks in urban and rural areas to improve connectivity between habitats **in line with the Local Nature Recovery Strategy;**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We previously expressed concerns at this site allocation (then coded AL/RTW 18) as it was adjacent to several areas of ancient woodland, namely:

• Three Acre Wood ASNW at TQ56733831 • The Woodland Trust site Friezland Wood ASNW at TQ56443831 • Ramslye Wood ASNW at TQ56543793

We note that the housing elements of the site are now well-distanced from Three Acre Wood (60m) and Friezland Wood (320m) with landscape buffers, in line with our recommended approach.

We still have some concerns about appropriate buffering for Ramslye Wood.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Where development sites are adjacent to ancient woodland, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance.

Buffer zones can form part of the accessible natural green space required for future residents.

This will improve compliance with national policy by protecting the ancient woodland from loss or fragmentation and from harmful effects of pollution or encroachment on root areas. It will also make a positive contribution to requirements for net gain and nature recovery.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Woodland Trust is the UK's leading woodland conservation charity with specific expertise on the management and protection of ancient woodland.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We previously expressed concerns at this site allocation (then coded as AL/RTW 12) as it included several areas of ancient woodland

- King's Standing (previously Unnamed) ASNW at TQ60734254
- Well Wood ASNW at TQ61114315
- Unnamed ASNW at TQ60474291
- Pilgrim's Wood ASNW at TQ60604322

We are pleased to see that all but one of these no longer appear to be affected. However, we still have concerns about the potential impact on King's Standing ASNW at TQ60734254.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend redrawing the site boundaries to exclude Kings Standing Wood from land allocated for development.

Whether the ancient woodland is within or outside the development site, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. Buffer zones can form part of the accessible natural green space required for future residents.

This will improve compliance with national policy by protecting the ancient woodland from loss or fragmentation and from harmful effects of pollution or encroachment on root areas. It will also make a positive contribution to requirements for net gain and nature recovery.

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We previously expressed concerns at this site allocation (then coded AL/RTW 21) as it was adjacent to an area of unnamed ancient woodland ASNW at TQ57604077.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Where development sites are adjacent to ancient woodland, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance.

Buffer zones can form part of the accessible natural green space required for future residents.

This will improve compliance with national policy by protecting the ancient woodland from loss or fragmentation and from harmful effects of pollution or encroachment on root areas. It will also make a positive contribution to requirements for net gain and nature recovery.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Woodland Trust is the UK's leading woodland conservation charity with specific expertise on the management and protection of ancient woodland.

Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Woodland Trust does not take a position on the creation of new settlements on greenfield sites per se. We are however concerned about the inclusion of ancient woodland in this site, risking the protection afforded this vital habitat in the NPPF and reflected in the draft local plan policy EN13.

Ancient woodland is a precious habitat that should be protected and managed in a sustainable way to maximise its wildlife, landscape and historical value. Ancient woods are irreplaceable. They are our richest terrestrial wildlife habitats, with complex ecological communities that have developed over centuries, and contain a high proportion of rare and threatened species, many of which are dependent on the particular conditions that this habitat affords. Ancient woods are important reservoirs of biodiversity, but already highly fragmented, so that they and their associated wildlife are particularly vulnerable to encroachment from development. Further details on the necessary protection for ancient woodland can be found in the Woodland Trust's Planners Manual for Ancient Woodland (2nd edition 2019).

<https://www.woodlandtrust.org.uk/publications/2019/06/planners-manual-for-ancient-woodland/>

Existing and emerging national policy requires not only the protection of existing habitats but their enhancement and extension. Policies for biodiversity net gain and nature recovery cannot be delivered if irreplaceable ancient woodland is eroded.

The Paddock Wood and Capel site includes the following areas of ancient woodland:• Unnamed ASNW at TQ67244374• Whetsted Wood ASNW at TQ66144546• Unnamed ASNW at TQ66234528

We note and welcome the proposal in EN13 to assume a 25m buffer zone for ancient woodland. However, given the scale of development proposed at this site, we feel that a larger buffer is required to secure the necessary legal protection for the ancient woodland.

We recognise the intense pressure to identify and bring forward new sites for housing and employment uses. This pressure makes it all the more important that vital protections for ancient woodland and veteran trees are upheld.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend redrawing the site boundaries to exclude areas of ancient woodland from land allocated for development.

Whether the ancient woodland is within or outside the development site, we recommend that as a precautionary principle, a minimum 50 metre buffer should be maintained between a development and the ancient woodland, including through the construction phase, unless the applicant can demonstrate very clearly how a smaller buffer would suffice. A larger buffer may be required for particularly significant engineering operations, or for after-uses that generate significant disturbance. Buffer zones can form part of the accessible natural green space required for future residents.

This will improve compliance with national policy by protecting the ancient woodland from loss or fragmentation and from harmful effects of pollution or encroachment on root areas. It will also make a positive contribution to requirements for net gain and nature recovery, as well as better reflecting the aspirations of the England Trees Action Plan and National Model Design Code.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Woodland Trust is the UK's leading woodland conservation charity with specific expertise on the management and protection of ancient woodland.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The Woodland Trust is the UK's leading woodland conservation charity with specific expertise on the management and protection of ancient woodland.

Question 1	
Respondent's Name and/or Organisation	Woodland Trust
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy EN 1 Sustainable Design	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound

Yes

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy, in particular sections 4 and 5.

4. Landscape, trees, and amenity 1. Proposals should be accompanied by an integral landscaping (both hard and soft) scheme, which contributes to, and enhances, the natural and local environment, including sympathetic boundary treatments and green infrastructure; 2. Any proposed new landscaping, and any existing landscape feature to be retained, shall include adequate provision for future tree and hedgerow growth, and management practices.

5. Biodiversity and geodiversity 1. Proposals should maximise opportunities for increasing biodiversity potential, and retaining and enhancing blue/green infrastructure features, including SuDS; 2. Proposals that affect existing biodiversity, geodiversity, and blue/green infrastructure must be designed to avoid, mitigate, or compensate for any potential harm, resulting in a net gain; 3. Proposals should identify and not undermine the value of ecosystem services that the site provides.

We note that policy EN1 refers to policy EN9 on Biodiversity Net Gain. However, to make the policy robust and fully sound, we would like to see the requirements for net gain stated in this policy also.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We propose modifying section 5.2 to read

2. Proposals that affect existing biodiversity, geodiversity, and blue/green infrastructure must be designed to avoid, mitigate, or compensate for any potential harm, resulting in **a minimum net gain of 10% as required by legislation or greater where required by supplementary planning guidance;**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy, in particular the section on Climate Change Mitigation para 1

1. Protection, and provision, of well connected green infrastructure (especially trees) that facilitates native species' movements, facilitates sustainable drainage, provides natural shading, and is well adapted to summer drought and increased winter rainfall (refer to Policy EN 14: Green, Grey, and Blue Infrastructure);

A rapid increase in the rate of woodland creation has been proposed by the UK's Committee on Climate Change (CCC), to provide a key mechanism to lock up carbon in trees and soils, provide an alternative to fossil fuel energy and resource-hungry building material, and importantly to stem the declines in biodiversity. The Woodland Trust supports the CCC's recommended an increase in UK woodland to tackle this country's biodiversity and climate crises. More information can be found in the Trust's 2020 publication The Emergency Tree Plan.

We would further encourage the specification where possible of UK sourced and grown tree stock for new planting, to support biodiversity and resilience, in line with longstanding Government policy, most recently set out in the England Trees Action Plan (2021), in support of planting native species of broadleaf woodland.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We propose modifying the policy to read:

1. Protection, and provision, of well connected green infrastructure (especially native broadleaf trees) that facilitates native species' movements, facilitates sustainable drainage, provides natural shading, and is well adapted to summer drought and increased winter rainfall (refer to Policy EN 14: Green, Grey, and Blue Infrastructure);

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Yes

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy, in particular para 1 b:

b. the percentage of net gain shall be a minimum of 10% as required by legislation or greater where required by supplementary planning guidance

We recommend setting a greater than 10% target for net gain. By setting a more ambitious target, the Local Plan increases the chances that worthwhile amounts of net gain will be delivered, given the possibility that initiatives intended to deliver such gain may fall short in practice.

We would also encourage considering development of a local metric for more urban/brownfield sites, such as the London Urban Greening Factor, because such sites may already have a very low level of biodiversity and therefore a percentage increase may not in practice deliver significant enhancements.

Where net gain is delivered offsite, we recommend that this is part of a comprehensive Local Nature Recovery Network approach that includes conservation, enhancement and connection of existing habitats, including ancient woodland, in line with the new requirement for Local Nature Recovery Strategies.

We would further add that irreplaceable habitats, such as ancient woodland, must never be included in net gain calculations and mitigation and compensation measures must not form part of the considerations in making planning decisions.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend strengthening the wording to reflect emerging national policy requirements for Local Nature Recovery Networks:

*1. It can be demonstrated through the application of the Defra Biodiversity Metric (and any subsequent replacements), as part of a Biodiversity Gain Plan, that completion of the development will result in a measurable long-term net gain for biodiversity in both area and linear habitats, **in line with the Local Nature Recovery Strategy**, as follows...*

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy EN 12 Trees, Woodland, Hedges, and Development	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We welcome this approach, in particular the requirement to increase tree canopy cover; the presumption for the retention of existing trees; and the requirement for replacement of trees that are removed.

We recommend setting a target for canopy cover as recommended in the Woodland Trust's *Emergency Tree Plan* and reflecting emerging guidance in the National Model Design Code. We note that the borough has canopy cover levels above the national average. However, to be fully sound, we recommend strengthening the policy with a specific target for tree canopy and woodland cover, to ensure that the current level (22% in the rural district, rising to over 33% in the urban area) is not eroded by development.

We recommend strengthening this policy with a proposed ratio of tree replacement, which reflects the Woodland Trust guidance on Local Authority Tree Strategies (July 2016) with a ratio of at least 2:1 for all but the smallest trees and ratios of up to 8:1 for the largest trees.

We would further encourage the specification where possible of UK sourced and grown tree stock for new planting, to support biodiversity and resilience.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend modifying the policy in order to better secure net gain and contribute to national policy and the Council's climate and biodiversity targets by

- adding a canopy cover target for development sites;
- setting a greater than 1:1 ratio for tree replacement; and
- specifying native trees, with a preference for UK & Ireland sourced & grown stock.

We propose the following amendment, adding after the line “Developments will generally be expected to increase tree cover, especially in urban areas” the wording **“to at least 30% with a mixture of tree-lined streets, community woods, parks and gardens, to be achieved through the retention of existing trees, appropriate replacement of trees lost through development, ageing or disease, and by new planting of native species to support green infrastructure.”**

We propose the following amendment, **adding** after the line “Where there is an unavoidable loss of trees on-site, however, an appropriate number of suitable replacement trees (in terms of species and size) that replaces or exceeds that which is lost will be required to be planted on-site” the wording **“Any trees removed should usually be replaced on a greater than 1:1 basis to support levels of canopy cover and contribute to biodiversity net gain. Where possible, tree stock should be UK & Ireland sourced and grown.”**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy, which reflects the guidance set out in the Woodland Trust's *Planners' Manual for Ancient Woodland (2nd edition)* on incorporating the NPPF protection of ancient woodland in local plans.

We welcome the assumption in para 6.170 of a minimum buffer for ancient woodland, noting that the proposed 25m is greater than the Natural England minimum 15m buffer. We recommend further strengthening this policy by setting a minimum 50 metre buffer to be maintained between a development and the ancient woodland, unless the applicant can demonstrate very clearly how a smaller buffer would suffice.

We welcome the policy in para 6.171 that "Additional assessment will be required of all ammonia-emitting developments, such as intensive livestock units, within 5km of an ancient woodland site, which shall include a detailed Ancient Woodland Nitrogen Impact Assessment of the ancient woodland(s) of concern." This reflects Woodland Trust guidance, as requested in our Regulation 18 consultation response.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend adding the minimum buffer distance to the policy as follows:

5. Provision of adequate buffers (with a minimum 25m buffer and recommended 50m buffer)

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support this policy, particularly its recognition of the importance of networks of green and blue infrastructure, and its comprehensive approach including both rural and urban areas.

We recommend that this is part of a comprehensive Local Nature Recovery Network approach that includes conservation, enhancement and connection of existing habitats, including ancient woodland, in line with the new requirement for Local Nature Recovery Strategies.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We propose amending the wording of the opening section to include reference to the emerging requirements for Local Nature Recovery Strategies as follows:

Proposals for new green, grey, and blue infrastructure should aim to improve connectivity and be informed by, and respond to: 1. Biodiversity Opportunity Areas statements; 2. County and borough green infrastructure plans and mapping; 3. Ecological surveys and identified priority habitats; 4. Kent Nature Partnership Biodiversity Action Plan; 5. Landscape character assessments; 6. River basin management plans **7. Local Nature Recovery Strategies.**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We support the specification of access to natural green space and application of Natural England's Accessible Natural Green Space Standard.

We recommend supplementing this with the Woodland Trust's Woodland Access Standard, which is designed to complement the Accessible Natural Green Space Standard. Improving access to woodland is one aim of the Government's new England Trees Action Plan (2021).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We recommend adding the following to table 17

Open Space Type

Quantity standard for new provision (HA/1,000)

Access standard (radius from open space)**

Natural Green Space e.g. meadows, woodlands, river valleys, wetlands

0.8 to include natural and amenity green space for new provision

Accessible Natural Greenspace Standard (ANGST)

At least one accessible 20ha site within 2km of home

One accessible 100ha site within 5km of home

One accessible 500ha site within 10km of home

A minimum of 1ha statutory Local Nature Reserve per 1,000 population

The above to include a minimum provision of woodland:

one area of accessible woodland of no less than 2ha in size within 500m of home;

one area of accessible woodland of no less than 20ha within 4km of home

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR 3, ED 1 and ED 2 – see Comment Numbers PSLP_1838, PSLP_1841, PSLP_1842 and PSLP_1844. The full representation has been attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy STR 1: The Development Strategy

2.2 Section 1 of Policy STR 1 states that, to achieve 14ha of additional employment land over the Plan period, the Local Plan “*Promotes the effective use of urban and previously developed (brownfield) land.*”

2.3 Wrenbridge supports the re-use of brownfield land and the long-term benefits it can bring which is consistent with the sustainable development objectives set out in Local and National planning policy. However, it should be stated in the emerging Local Plan that the intensification of brownfield land is encouraged, subject to where it accords with the wider development management policies within the Plan. We believe a greater emphasis on the optimisation of previously developed land, clarified within STR3 below, would contribute to the borough’s objectively assessed employment needs.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the ‘Southborough High Broom Industrial Area’. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

2.3 Wrenbridge supports the re-use of brownfield land and the long-term benefits it can bring which is consistent with the sustainable development objectives set out in Local and National planning policy. However, it should be stated in the emerging Local Plan that the intensification of brownfield land is encouraged, subject to where it accords with the wider development management policies within the Plan. We believe a greater emphasis on the optimisation of previously developed land, clarified within STR3 below, would contribute to the borough’s objectively assessed employment needs.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We do not consider that the employment land policies are sufficiently flexible to meet with potential future market demand, as outlined in our cover letter.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy STR 3: Brownfield Development

2.4 Section 1 of Policy STR 3 states that brownfield development within the limits of existing settlements shall have “*proper regard to their detailed impacts, notably design*.” Section 2 of Policy STR1 states that brownfield proposals either within, or a short walking distance away from ‘Defined Town and Rural Service Centres’ “*will be expected to make optimal use of land and buildings*.”

2.5 Wrenbridge are supportive of Section 1 of this policy and agree that modern commercial units within existing settlements should be commensurate with the surrounding environment. However, we believe that Section 2 is reductive in only emphasising the optimal use of brownfield land within close proximity to the ‘Defined Town and Rural Service Centres’. The NPPF sets out in paragraph 117 that planning policies should make “*as much use as possible of previously-developed or ‘brownfield’ land*.” To achieve this, it is considered that the principle for the optimisation of brownfield land should instead be supported holistically, subject to all other technical matters being satisfied. The appropriateness of any intensification at a specific brownfield site can then be a matter for the decision taker at planning application stage.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the ‘Southborough High Broom Industrial Area’. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy ED 1: The Key Employment Areas

2.6 The draft policy demonstrates the “*Key Employment Areas, as defined on the Policies Maps*” to serve the borough over the plan period. Southborough High Brooms Industrial Area is designated for Class E, F, B8, and other Sui Generis uses of an appropriate type and scale.

2.7 Wrenbridge are supportive of the number of defined employment areas in the draft policy, in principle, including the retention, intensification, and redevelopment of existing commercial floorspace. Wrenbridge considers these areas as key in delivering Tunbridge Wells’ future economic strategy, particularly in recognising the need to support proposals that modernise the current stock of employment floorspace to meet the requirements of a range of small, medium and large local businesses, and to attract new businesses into the area.

2.8 However, given the established nature of the Southborough High Brooms Industrial Area, it is considered that Class B2 uses would be appropriate within this designation, and that their omission will hinder the marketability of existing or proposed commercial floorspace.

2.9 The NPPF 2019 is clear within paragraph 81 that planning policies should be:

d) be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances.

2.10 Reviewing the associated evidence base provided in support of the Local Plan, it is unclear why the B2 designation has not been assigned to Southborough High Brooms Industrial Area. The Sevenoaks and Tunbridge Wells Economic Needs Study does not preclude this use, only noting surrounding residential uses. Furthermore, no other evidence base document appears to conclude that B2 would be an inappropriate use for this estate. Importantly as noted in other parts of the Evidence Base, the presence of B2 use classes is recognised within the Estate. The Policy as drafted wholly contradicts the existing presence of these uses which support local jobs and businesses. Employment Areas should support the unfettered operations of businesses. The policy should be amended to include B2 uses, and set out the criteria (where necessary) that would need to be met to support the use.

2.11 Whilst we recognise the proximity to residential uses, there are parts of the Industrial Area that are physically screened from the residential properties by commercial/industrial buildings that would prevent the transfer of noise. Further, modern day materials can be extremely effective at insulating buildings and preventing acoustic transfer. The challenge should be upon the developers to find acceptable solutions that do not unreasonably impact upon nearby residential amenity. There are sufficient other development management policies which would be engaged in the determination of any future applications which could assess the acceptability or otherwise of a B2 use in this regard. To preclude B2 uses based on no apparent evidence would run contrary to the flexibility required by the NPPF. We would therefore strongly suggest B2 is added to the list of accepted uses for Southborough High Brooms Industrial Area..

2.12 We note that the Economic Needs Study does show a fall in the demand for B2 units over the plan period, but it remains that there is no planning reason to remove the use from Southborough High Brooms Industrial Area and the flexibility should be retained for the market to determine what is required without undue constraint through policy.

2.13 We suggest the below rewording for clarity (in italics and underlined):

Southborough High Brooms Industrial Area

Class E – financial, professional and other business uses, and appropriate leisure uses, Class F – appropriate leisure uses, *Class B2 – general industrial* Class B8 - storage and distribution and other sui generis uses of an appropriate type and scale.

2.14 Policy ED2 we believe requires rewording as it is overly onerous for those willing to redevelop sites for uses which are acceptable under Policy ED1 above.

2.15 As the following sentence is currently written “*Applicants seeking to redevelop/convert existing employment buildings and sites must demonstrate the following: [points a to d]*” leads the decision maker to believe that points a to d need to be applied to any redevelopment of a site within a designated employment area, even if it is for the same use or for the uses proposed in ED1 above.

2.16 We believe that policy ED2 should be reworded to state: “*Applicants seeking to redevelop/convert existing employment buildings and sites for non-employment uses or those inconsistent with those designated by policy ED1 must demonstrate the following: [points a to d].*” It is our belief it would be overly onerous to require 18 months of marketing for example to redevelop a site when it would be for employment generating uses on a designated employment site.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the ‘Southborough High Broom Industrial Area’. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

2.13 We suggest the below rewording for clarity (in italics and underlined):

Southborough High Brooms Industrial Area

Class E – financial, professional and other business uses, and appropriate leisure uses, Class F – appropriate leisure uses, *Class B2 – general industrial* Class B8 - storage and distribution and other sui generis uses of an appropriate type and scale.

2.14 Policy ED2 we believe requires rewording as it is overly onerous for those willing to redevelop sites for uses which are acceptable under Policy ED1 above.

2.15 As the following sentence is currently written “*Applicants seeking to redevelop/convert existing employment buildings and sites must demonstrate the following: [points a to d]*” leads the decision maker to believe that points a to d need to be applied to any redevelopment of a site within a designated employment area, even if it is for the same use or for the uses proposed in ED1 above.

2.16 We believe that policy ED2 should be reworded to state: “*Applicants seeking to redevelop/convert existing employment buildings and sites for non-employment uses or those inconsistent with those designated by policy ED1 must demonstrate the following: [points a to d].*” It is our belief it would be overly onerous to require 18 months of marketing for example to redevelop a site when it would be for employment generating uses on a designated employment site.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan's emphasis on developing brownfield land to meet the borough's employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the 'Southborough High Broom Industrial Area'. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We do not consider that the employment land policies are sufficiently flexible to meet with potential future market demand, as outlined in our cover letter.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy ED 2 Retention of Existing Employment Sites and Buildings

[TWBC: this representation has been input against Policies STR 1, STR 3, ED 1 and ED 2 – see Comment Numbers PSLP_1838, PSLP_1841, PSLP_1842 and PSLP_1844. The full representation has been attached as supporting information]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

. It is not justified

. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1.0 INTRODUCTION

1.1 These representations are made to the Regulation 19 Pre-Submission consultation for the Emerging Tunbridge Wells Borough Council Local Plan. These representations are made on behalf of Wrenbridge Land Ltd (hereafter 'Wrenbridge') by Barton Willmore LLP. Wrenbridge has a number of land interests across the borough and has successfully delivered a number of high-quality commercial redevelopments within the wider south east region. Wrenbridge specialise in providing high quality commercial developments on brownfield under-utilised land where the existing units are dated, and no longer fit for modern day business purposes.

1.2 These representations are made in relation to the pre-submission consultation outlined by the Council, in particular in regard to the employment uses across the borough and the location of such land uses.

2.0 RESPONSES TO THE REGULATION 19 CONSULTATION

2.1 This section sets out our responses on behalf of Wrenbridge to the current consultation. For brevity relevant sections and policy numbers are referenced accordingly.

Policy ED 1: The Key Employment Areas

2.6 The draft policy demonstrates the “*Key Employment Areas, as defined on the Policies Maps*” to serve the borough over the plan period. Southborough High Brooms Industrial Area is designated for Class E, F, B8, and other Sui Generis uses of an appropriate type and scale.

2.7 Wrenbridge are supportive of the number of defined employment areas in the draft policy, in principle, including the retention, intensification, and redevelopment of existing commercial floorspace. Wrenbridge considers these areas as key in delivering Tunbridge Wells’ future economic strategy, particularly in recognising the need to support proposals that modernise the current stock of employment floorspace to meet the requirements of a range of small, medium and large local businesses, and to attract new businesses into the area.

2.8 However, given the established nature of the Southborough High Brooms Industrial Area, it is considered that Class B2 uses would be appropriate within this designation, and that their omission will hinder the marketability of existing or proposed commercial floorspace.

2.9 The NPPF 2019 is clear within paragraph 81 that planning policies should be:

d) be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances.

2.10 Reviewing the associated evidence base provided in support of the Local Plan, it is unclear why the B2 designation has not been assigned to Southborough High Brooms Industrial Area. The Sevenoaks and Tunbridge Wells Economic Needs Study does not preclude this use, only noting surrounding residential uses. Furthermore, no other evidence base document appears to conclude that B2 would be an inappropriate use for this estate. Importantly as noted in other parts of the Evidence Base, the presence of B2 use classes is recognised within the Estate. The Policy as drafted wholly contradicts the existing presence of these uses which support local jobs and businesses. Employment Areas should support the unfettered operations of businesses. The policy should be amended to include B2 uses, and set out the criteria (where necessary) that would need to be met to support the use.

2.11 Whilst we recognise the proximity to residential uses, there are parts of the Industrial Area that are physically screened from the residential properties by commercial/industrial buildings that would prevent the transfer of noise. Further, modern day materials can be extremely effective at insulating buildings and preventing acoustic transfer. The challenge should be upon the developers to find acceptable solutions that do not unreasonably impact upon nearby residential amenity. There are sufficient other development management policies which would be engaged in the determination of any future applications which could assess the acceptability or otherwise of a B2 use in this regard. To preclude B2 uses based on no apparent evidence would run contrary to the flexibility required by the NPPF. We would therefore strongly suggest B2 is added to the list of accepted uses for Southborough High Brooms Industrial Area..

2.12 We note that the Economic Needs Study does show a fall in the demand for B2 units over the plan period, but it remains that there is no planning reason to remove the use from Southborough High Brooms Industrial Area and the flexibility should be retained for the market to determine what is required without undue constraint through policy.

2.13 We suggest the below rewording for clarity (in italics and underlined):

Southborough High Brooms Industrial Area

Class E – financial, professional and other business uses, and appropriate leisure uses, Class F – appropriate leisure uses, *Class B2 – general industrial* Class B8 - storage and distribution and other sui generis uses of an appropriate type and scale.

2.14 Policy ED2 we believe requires rewording as it is overly onerous for those willing to redevelop sites for uses which are acceptable under Policy ED1 above.

2.15 As the following sentence is currently written “*Applicants seeking to redevelop/convert existing employment buildings and sites must demonstrate the following: [points a to d]*” leads the decision maker to believe that points a to d need to be applied to any redevelopment of a site within a designated employment area, even if it is for the same use or for the uses proposed in ED1 above.

2.16 We believe that policy ED2 should be reworded to state: “*Applicants seeking to redevelop/convert existing employment buildings and sites for non-employment uses or those inconsistent with those designated by policy ED1 must demonstrate the following: [points a to d]*.” It is our belief it would be overly onerous to require 18 months of marketing for example to redevelop a site when it would be for employment generating uses on a designated employment site.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan’s emphasis on developing brownfield land to meet the borough’s employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the ‘Southborough High Broom Industrial Area’. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

2.13 We suggest the below rewording for clarity (in italics and underlined):

Southborough High Brooms Industrial Area

Class E – financial, professional and other business uses, and appropriate leisure uses, Class F – appropriate leisure uses, Class B2 – general industrial Class B8 - storage and distribution and other sui generis uses of an appropriate type and scale.

2.14 Policy ED2 we believe requires rewording as it is overly onerous for those willing to redevelop sites for uses which are acceptable under Policy ED1 above.

2.15 As the following sentence is currently written “*Applicants seeking to redevelop/convert existing employment buildings and sites must demonstrate the following: [points a to d]*” leads the decision maker to believe that points a to d need to be applied to any redevelopment of a site within a designated employment area, even if it is for the same use or for the uses proposed in ED1 above.

2.16 We believe that policy ED2 should be reworded to state: “*Applicants seeking to redevelop/convert existing employment buildings and sites for non-employment uses or those inconsistent with those designated by policy ED1 must demonstrate the following: [points a to d]*.” It is our belief it would be overly onerous to require 18 months of marketing for example to redevelop a site when it would be for employment generating uses on a designated employment site.

3.0 SUMMARY AND CONCLUSIONS

3.1 These representations have been produced on behalf of Wrenbridge in relation to the Regulation 19 emerging Local Plan consultation being undertaken by Tunbridge Wells Borough Council.

3.2 Wrenbridge supports the Plan's emphasis on developing brownfield land to meet the borough's employment floorspace need. However, we believe the wording within Policy STR3 could be amended to seek the optimal use of all appropriate brownfield sites, not just those within close proximity to Town and Rural Centre designations.

3.3 Wrenbridge supports the retained designation of the 'Southborough High Broom Industrial Area'. However, we query the omission of Use Class B2 within the designation. There appears to be no evidence base precluding such a use that already exists within the defined employment area, and there are sufficient development management policies particularly around noise which can be used to assess planning applications on their own merits once submitted.

3.4 Furthermore, Wrenbridge suggests that any wording for this designation allows for suitable flexibility within B8, B2 and E Class Uses so that rapid changes can be made to suit the market at the time.

3.5 Finally, we suggest the policy wording for ED2 needs to be set out more clearly, as currently the requirement to redevelop employment sites for employment uses is overly onerous and will prevent new developments coming forward that meet modern requirements.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We do not consider that the employment land policies are sufficiently flexible to meet with potential future market demand, as outlined in our cover letter.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Yalding Parish Council
Question 2	

Agent's Name and Organisation (if applicable) Graham Simpkin Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 6, STR/SS 1, STR/PW 1 - see Comment Numbers PSLP_616, PSLP_622, PSLP_623, PSLP_624, PSLP_625]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	
Respondent's Name and/or Organisation	Yalding Parish Council
Question 2	

Agent's Name and Organisation (if applicable) Graham Simpkin Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 4 Ensuring Comprehensive Development

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 6, STR/SS 1, STR/PW 1 - see Comment Numbers PSLP_616, PSLP_622, PSLP_623, PSLP_624, PSLP_625]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Yalding Parish Council
Question 2	

Agent's Name and Organisation (if applicable) Graham Simpkin Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 1 The Strategy for Paddock Wood, including land at east Capel

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 6, STR/SS 1, STR/PW 1 - see Comment Numbers PSLP_616, PSLP_622, PSLP_623, PSLP_624, PSLP_625]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Yalding Parish Council
Question 2	

Agent's Name and Organisation (if applicable) Graham Simpkin Planning

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/PW 1 The Strategy for Paddock Wood

[TWBC: this representation has been input against Policies STR 1, STR 4, STR 6, STR/SS 1, STR/PW 1 - see Comment Numbers PSLP_616, PSLP_622, PSLP_623, PSLP_624, PSLP_625]

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Representations on the Tunbridge Wells Local Plan 2021 on behalf of Yalding Parish Council

1 INTRODUCTION

1.1 Graham Simpkin Planning has been instructed by Yalding Parish Council to review the Pre-submission (Regulation 19) Tunbridge Wells Local Plan 2021 (hereinafter referred to as the Local Plan) and its associated evidence base as to the potential effects of the plan on Yalding Parish and to consider whether the Local Plan is legally compliant and meets the test of soundness.

1.2 Yalding Parish lies immediately adjacent to the Tunbridge Wells Borough Council (TWBC) administrative area on its north-eastern edge with the southern part of the parish lying less than a mile from the existing northern part of the built-up area of Paddock Wood which contains a number of employment sites, a railway station on the Ashford to Tonbridge-London main-line and convenience retailing as well as a secondary school.

1.3 Yalding lies within Maidstone Borough Council's administrative area. To the west of the parish runs the A228, to which Yalding is connected by Gravelly Ways/Beltring Road at Beltring and the B2162 Hampstead Lane via the B2015 through the parish of Nettlestead. The parish also has a direct road connection through to Horsmonden to the south east via the B2162. Roads also connect Yalding village to Paddock Wood via Laddingford and Queen Street and along Willow Lane and Lucks Lane. Yalding village lies towards the north of the parish with Laddingford village to the south. The parish is heavily influenced by the three rivers that run through it (Medway, Teise and Beult) which all converge in Yalding. The parish is also served by the Medway Valley railway line which runs between Maidstone and Paddock Wood, with two stations at Yalding and Beltring.

1.4 The Parish are aware that any representations at this stage should relate to matters of compliance with legal and procedural requirements and the soundness of the Local Plan, as these are the matters that will be examined.

2 Legal Compliance

2.1 The Local Plan appears to have been prepared in line with the adopted Local Development Scheme (February 2021) and the adopted Statement of Community Involvement.

Duty to cooperate

2.2 Yalding Parish Council do not wish to specifically comment on whether the Plan is legally compliant in terms of the Duty to Cooperate preferring to leave that for the examining Inspector to determine. The Parish is also aware that there are likely to be imminent changes with regard to the Duty to Cooperate and that these are currently being considered by the Government alongside other potential reforms to the current planning system.

2.3 However, Yalding PC is aware that the emerging Local Plans of two local planning authorities have fallen at the Examination stage (Wealden and Sevenoaks) and that there are on-going concerns with regard to the Tonbridge and Malling Local Plan. The common problematic issue to all three plans is the Duty to Cooperate.

2.4 All of these Councils immediately adjoin TWBC.

2.5 Given that the Duty to Cooperate works in both directions, there must be some doubt therefore, that TWBC has met its legal obligations in this area and TWBC should have made clear how the Council has responded to the cooperation challenges identified by planning inspectors reporting on Local Plans in the above three council areas. They have failed to do so.

2.6 The Parish would also wish to put on record, as an adjoining authority whose administrative area lies immediately adjacent to the proposed significant expansion of Paddock Wood including newly proposed employment areas, that other than through the general consultation processes that have taken place in the preparation of the new Local Plan they have not been directly consulted by TWBC or been invited to actively engage with them as they have prepared this pre-submission (Reg 19 draft).

Sustainability Appraisal (SA)

2.7 Again the Parish Council do not wish to specifically comment on the comprehensiveness or assumptions and findings of the SA preferring to leave that for the examining Inspector to determine.

2.8 TWBC must however have clearly set out in the SA how they have approached the various options assessed and how they have reached the conclusions on their preferred options and why some have progressed and some not. It is incumbent on the Council to demonstrate that the SA has not been designed in a way that justifies its own preferred approach rather than genuinely considering potential spatial development options and then basing the preferred strategy on how each option performs. Given that the Council's preferred strategy has not fundamentally changed since the Reg 18 consultation, the fact that additional spatial development scenarios have been added to the SA since the Regulation 18 draft does provide a degree of uncertainty as to whether the SA has actually led the development of the Council's preferred spatial strategy or has been designed to justify it.

3 Soundness

3.1 Yalding Parish Council's comments have been considered in the light of and are based on the four tests of soundness.

- . **Positively prepared** – providing a strategy which, as a minimum seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring authorities is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- . **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- . **Effective** - deliverable over the plan period and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- . **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in the NPPF.

3.2 The Parish Council expressed concerns in their response to the Regulation 18 Consultation in relation to the proposed strategy in two main areas that of Transportation and Flooding and in particular, the potential implications of the proposed significant expansion of Paddock Wood on both as they may directly affect land within the Parish Council's area.

3.3 In its Regulation 19 Pre-Submission version of the Local Plan, TWBC are still proposing very significant growth at Paddock Wood and East Capel of approximately 4000 new dwellings (Table 4/page 42), plus employment (11.2ha - Table 5/page 43) and associated leisure and education and health/community facilities. As stated above, Paddock Wood lies very close to the southern boundary of Yalding Parish and Maidstone Borough Council's administrative area. Indeed, the proposed urban extension of Paddock Wood would extend almost to the boundary shared by the Boroughs.

3.4 Yalding PC acknowledges the master-planning work that has taken place since the Regulation 18 consultation, in particular that of the Strategic Sites Working Group that Maidstone BC is represented on. In this regard, the progress which has led to the Paddock Wood and East Capel Structure Plan (map 28 page 149) which has sought to clarify and provide more detail on how the expansion might be delivered is noted.

3.5 We also note the fact that extensive SuDS and Green and Blue Strategic Landscape Corridors are proposed on the northern side of Paddock Wood, whilst noting that the proposed employment areas have significantly less of these proposed features.

3.6 Nevertheless the Parish Council remain of the view that it has not yet been demonstrated that the plan is positively prepared, justified and effective on the grounds of Transport and Flood Risk and the potential for the significant levels of new development proposed for the Paddock Wood area to impact on traffic through the Parish and the risk of flooding downstream.

As a result, the Parish Council have particular concerns regarding elements of the following policies;

STR1 The Development Strategy

STR5 Ensuring Comprehensive Development

STR6 Transport and Planning

STR/SS1 The Strategy for Paddock Wood including land at East Capel

STR/PW1 The Strategy for Paddock Wood

The reasons for which are discussed in greater detail below.

4 TRANSPORT

4.1 The Paddock Wood economic opportunities report (December 2020 by SQW) prepared as part of the evidence base of the Regulation 19 Plan and the master-planning work indicates that only 30% of the workforce in Paddock Wood live and work in the town, 30% commute to Tunbridge Wells, 20% commuting out to Tonbridge and Malling and some 5% commuting out to Maidstone and. In terms of in-commuting some 30% commute in from Tonbridge and Malling, 25% from Tunbridge Wells and 15% from Maidstone.

4.2 Having analysed the economic baseline of Paddock Wood SQW concludes as follows;

'7.2 The strategic context and rationale for this paper is that the DLP plans for the significant growth of Paddock Wood in terms of housing and population: the town will nearly double in size. The clear focus of all of TWBC's adopted and emerging planning and economic development policy is on Tunbridge Wells itself, and its relationship with the wider functional economic area, including Tonbridge and Sevenoaks. The target sectors and economic priorities / objectives do not align well with the Paddock Wood economy: one that is principally and increasingly dominated by large-scale wholesale/distribution and logistics employers, growing at the expense of other economic sectors; housing unaffordability for those who live and work in Paddock Wood is growing; outward commuting is increasing as well.

7.3 Sat within this context, there is a risk that a consequence of the planned growth of Paddock Wood could be a significant increase in out-commuting with a mis-match between the future population and the employment base/sectors.'

4.3 Whilst the Plan has been amended to reflect some of the recommendations of SQW it is difficult to see how the Council will ensure that the wholesale/distribution and logistics sectors will not continue

to dominate employment provision in Paddock Wood especially in the light of potential longer-term structural changes to working patterns and consumer demands as a result of fall-out from the Covid-19 pandemic.

4.4 Any significant increase in out-commuting would inevitably lead to a proportion of those additional journeys heading towards Maidstone and passing through Yalding Parish and potentially in particular the constrained historic bridges that are already congested.

4.5 If out-commuting increases as a result of the dominance of the wholesale/distribution/logistics sector, and the jobs are not filled by Paddock Wood residents then it is logical that they will be filled by workers from elsewhere including from within Maidstone District, again with potential implications for traffic flows into and out of Yalding Parish.

4.6 The Regulation 19 Plan and relevant policies/supporting text (see paragraph 3.6 above) and supporting evidence is silent on this issue and thus in the opinion of Yalding Parish Council not effective or justified.

4.7 Then there is the issue of modal shift and the extent of the Plan's reliance on this and the proposed public transport improvements. The proposals for significant development in the Paddock Wood area remain predicated on the fact that significant public transport improvements, alongside junction and highway improvements will ensure that additional transport impacts on the local road network will be sufficiently mitigated. The supporting evidence base is clear, that in order to mitigate the effect of this substantial planned growth the active transport measures, enhanced public transport and the associated highway improvement works are all required to render the proposed level of development at Paddock Wood/East Capel anywhere near acceptable in terms of impact on the local highway network.

4.8 Clearly work as part of the master-planning for the proposed allocation has put some further 'flesh on the bones' of the public transport improvements in an attempt to highlight anticipated modal shift targets and shed further light on the highway works necessary to mitigate some of the impact of the proposed growth on the local highway network.

4.9 However, the analysis behind this conclusion still does not guarantee that there will be the significant modal shift necessary to mitigate the impact of planned growth.

4.10 Public Transport is largely run on a commercial basis and whilst contributions to 'kick-start' services can be sought from developers, these cannot fund the provision of these services in-perpetuity and in any event it is also very likely to be the case that the improvements will only be provided once a 'critical mass' of new homes to supply the passengers has been reached. There is also of course no guarantee that once any developers' subsidy/contribution ceases or is exhausted, that the services will be at that stage be commercially viable and continue. Or for that matter, there is no guarantee that people can be enticed from their private cars onto public transport in the first instance.

4.11 As with the earlier Regulation 18 Consultation draft, the Regulation 19 Draft and the supporting evidence base does not sufficiently consider cross-border traffic movements and therefore fails to consider whether there will be traffic impacts beyond the areas where public transport improvements are proposed.

4.12 Currently there is an established level of commuter traffic movements between Maidstone and Tunbridge Wells that use 'B' roads and other roads that connect to the A228 corridor that run through the Yalding Parish. With the level of development proposed for Paddock Wood and TWBC's aspirations for Tunbridge Wells itself and the changes to the employment offer of both, there is potential for these movements to increase.

4.13 There is also inconsistency between the assumptions in the Stantec Access and Movement Report for Paddock Wood/East Capel and Tudeley Village and the SQW report as to the extent of internal and external movements.

4.14 Due to the longer distance of these commuting movements the proposed public transport improvements that are focussed on Paddock Wood are not considered to present a suitable mitigation package.

4.15 It is also clear that even with the highway mitigation proposed key junctions on the A228 and others to the north of Paddock Wood will be over capacity. The two junctions on the A228, the 'Hop Farm' roundabout and the Branbridges Road/Boyle Way roundabout, have both been assessed as being over capacity and yet mitigation is only proposed for one of them. Given that the Beltring Road/Gravelly Ways junction (one of the key connections with the A228 for the highway network in

Yalding Parish also falls in this section it is likely that users of this road will be affected, particularly due to the need to use both roundabouts if travelling from Tunbridge Wells/Paddock Wood to Yalding. (Refer to SWECO March 2021 Report Appendix G).

4.16 Given that the public transport improvements will not extend into the Yalding Parish it is considered that it is reasonable to assume that there will at least be an increase of traffic movements affecting key junctions within Yalding Parish although it cannot be established how significant these increases would be. A similar concern is also raised about the development proposed for Horsmonden and the potential increase in traffic on the B2162. Modelling that has been undertaken shows an increase in potential distribution of traffic northwards on the B2162 towards Yalding

4.17 There are also concerns about a potential indirect impact of the proposed 'Colts Hill Bypass' on the A228. Currently due to the constraints of this part of the A228 some commuters travelling from the Maidstone area to the Tunbridge Wells/Tonbridge area seeks alternative routes that avoid the A228 mainly going via the A26 and thus avoiding both the A228 and the Yalding area. It is possible that with the creation of the bypass that some of this traffic will return to using the A228 including accessing it via routes that run through Yalding Parish.

4.18 Overall it is argued that the transport evidence base insufficiently considers cross-border impacts with Yalding Parish and this therefore impacts on the conclusion as to whether the level of development in the Paddock Wood area is sustainable or whether it would lead to additional unmitigated impact on the local road network in Yalding Parish, particularly to the south of Yalding and Laddingford as well as the High Street/Town Bridge area of Yalding.

4.19 Yalding Parish Council also wishes to put on record at this stage their concerns and strong objections to the suggested possibilities (however remote and medium to long-term they may be) at paragraph 4.12 of the Local Cycling and Walking Infrastructure Plan (LCWIP): Phase 2 prepared by PJA for the closure to all vehicular traffic, except buses, of the Maidstone Road Railway Bridge and to close Commercial Road to through traffic in effect reinstating measures that had been installed by KCC and subsequently removed. This is likely to render access to Paddock Wood Town Centre and its services very problematic for residents of Yalding Parish, forcing them to use unsuitable rural lanes to the east of Paddock Wood or onto the congested A228 Whetsted Road and B2017 Badsell Road to gain access to the Town Centre and local services. The Parish notes that the above possibilities do not appear in the costed proposed set of cycling and walking improvements that are set out in the LCWIP and would hope that the possibilities set out at paragraph 4.12 are nothing more than a 'kite-flying' exercise. They also note that the Stantec report does not mention this as possibility, but they do note the Strategic Sites Masterplanning & Infrastructure Study (David Lock Associates) does raise the possibility of introducing a new bridge and link over the railway to the west of the Town Centre to provide easier access to the northern employment areas and reduce traffic on Maidstone Road, but recognises that this will require extensive discussions between the various landowners/developers and Network Rail (or their successor body).

4.20 It is the case that significant elements of the proposed transport mitigation package remain to be determined and are uncertain. In this regard the Parish Council considers the plan and the policies relating to Paddock Wood to not be justified or effective.

5 FLOODING

5.1 The impact of any development on the river network remains a significant consideration for Yalding Parish. The parish is the meeting point for three rivers; Medway, Teise and Beult. On reviewing the local plan and the relevant parts of the evidence base, the Parish has concerns regarding the impact of the proposed development strategy on two of these river networks; the Medway and the Teise.

5.2 Flooding issues within Yalding arise from three types of flooding (fluvial, surface water and groundwater).

5.3 In respect of fluvial flooding, the SFRA recognises that a primary cause of fluvial flooding events on the River Medway is the overloading of foul and/or sewer systems in the Paddock Wood area. The proposed level of development is thus potentially likely to increase this issue. The Parish Council recognises that additional work has been undertaken by JBA in association with the 'Structure Plan' for Paddock Wood/East Capel undertaken on behalf of TWBC by David Lock Associates. JBA have stated the following in their January 2021 Technical Note.

'The proposed Masterplan layouts have not been assessed in the River Medway flood risk model, as modelling of development parcels prepared for the Level 2 SFRA indicated that the influence of

development on flood risk from the Medway was smaller in scale than from Paddock Wood Streams. Flood risk from the River Medway is confined to the northern extent of the masterplan area (at the periphery of the River Medway floodplain), and potential impacts brought about by development are more influenced by potential loss of floodplain storage, compared with potential obstruction to flood flows as in Paddock Wood.'

It is clear that more work is required to ensure that the proposed level of development does not result in the loss of floodplain storage which in turn will have a potential knock-on effect on flood risk from the River Medway and as a direct consequence an adverse impact on land and property in Yalding Parish. It is essential that this work is undertaken to avoid the level of development and any loss of floodplain storage having an adverse cross-boundary impact.

In this regard Yalding Parish Council do not consider the plan to be effective or justified.

5.4 Yalding Parish Council note the work that has been done to include and assess the impact of 'conveyance routes' across the new development to ease previous concerns about development blocking flood paths.

5.5 They welcome the apparent conclusion that these conveyance routes and other potential mitigation appear to show a possible reduction, albeit minor, across significant areas of the Queen Street and Fowle Hall areas of the Parish east of the Medway Valley railway-line. See extract from Appendix B of the JBA Technical Note (1%AEP +70% Climate change) plan below.

[TWBC: For extract map, please see full representation attached as a supporting document]

The JBA Technical Note concludes

'While this strategic representation of the sites and conveyance routes still shows some areas with increased flood depths, the majority of these areas are within the masterplan area. The modelling demonstrates the benefit of localised drainage measures and it is considered that more comprehensive drainage arrangements accompanied by more detailed analyses would enable the development of the residential sites outlined in Option 1 to be brought forward without any off-site increases in flood depths being predicted. On this basis it is considered that the principle of development can be supported for the layout described by Option 1 (TWBC's preferred Option) provided that appropriate provision is made for the layout of drainage and flow routes through the proposed development. These measures would need to be supported by more detailed analyses that reflected the level of design detail and evidenced that the measures were appropriate. Consideration would need to be given to the long-term management and maintenance of the mitigation measures, so these were not inadvertently compromised for the lifetime of the development.'

5.6 So while it is clear that a potentially significant step forward has been made in terms of modelling Flood Risk much work remains to be done to ensure that the potential level of development and detailed drainage design achieves what is considered theoretically possible in the Technical Note bearing in mind the final caveat of the Technical Note states;

'The layout, form and location of the conveyance routes has been chosen to provide a strategic understanding of the implications of proposed development and should not be used as the basis to define the detailed design or geometry of the measures that will need to be included in the preparation of more detailed development layout designs. It is also possible that there are other mitigation options or measures that could be considered, and the results of the study are not intended to imply that other options would not be appropriate.'

5.7 Yalding Parish Council remains to be convinced that the proposed expansion of Paddock Wood and its environs will not have a resultant knock-on effect on land and property with the Parish Boundary in terms of increased Flood Risk.

5.8 In respect of the River Teise, the SFRA is heavily focused on issues at Paddock Wood and fails to consider the potential surface water impacts of development at Matfield and Horsmonden on the River Teise and no further work appears to have been undertaken since the Regulation 18 Consultation draft.

5.9 A key issue with the SFRA is that in respect of cross-border issues it places emphasis on the development management role rather than seeking to analyse and address potential issues at the local plan examination stage. It is considered unsustainable and ineffective to propose a high level of development in and around a settlement where there are recognised surface water and fluvial flooding issues without consideration of cross-border issues at the local plan stage.

5.10 Pertinently, the continued lack of consideration of cross-boundary issues at this stage does not comply with DEFRA guidance which seeks to address cross-boundary flooding issues at the local plan preparation stage. Overall it is considered that this is an ineffective approach to consideration of flooding matters within the local plan and that the plan is not justified or effective in this regard.

6 CONCLUSION

6.1 Yalding Parish Council recognises there has been a step forward with regard to some aspects of the assessment of flood risk but there remains a worrying lack of consideration of the impact on the River Medway flood plain and a lack of detail and uncertainty in other areas. Leaving the details to application stage is not an effective and justified way to prepare a Local Plan.

6.2 The Local Plan and evidence base is also relatively and unacceptably silent on cross boundary traffic implications regarding the scale and mix of the proposed level of development at Paddock Wood/East Capel, particularly with regards to the concerns of SQW with regard to the on-going structure of the Paddock Wood economy and the availability and location of the workforce needed to service the economy. There is a consequent danger that inward and outward commuting from an expanded Paddock Wood will have considerable impact on the road network through Yalding Parish and this has not been appropriately or effectively modelled.

6.3 The Plan places great emphasis on public transport and active travel measures to mitigate the impact of the development on the local highway network, yet even with these and the proposed highway improvements junctions that provide vital links to the road network to and from Yalding Parish will remain over-capacity and some of these are not proposed to be mitigated in any event. There is no certainty that the public transport and active travel measures will be sustainable and effective in the long term.

6.4 In conclusion, the review of the Regulation 19 Local Plan and its associated evidence base has raised concerns about whether the Local Plan's approach to and the proposed level of development in the Paddock Wood Area is justified and effective in terms of potential cross-boundary implications in particular for Yalding Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 1	
Respondent's Name and/or Organisation	Mr Andrew Yates
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/PE 3 Land north of the A21, south and west of Hastings Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Aside of the flood risk and traffic hazard detailed in other representations, the issue with already stretched local civic resources also need to be taken into consideration.

Schools and doctors' surgeries are already at capacity (I speak from personal experience).

No provision has been considered or even suggested by TWBC to make allowances for this.

Without doubt, this proposal has been pushed through very quietly and, without adequate consultation with the local residents and I question the legality of the approval.

Now we are aware we shall ensure that all local residents likely to be impacted by the proposed development are canvassed, fully informed (as TWBC should have done) to ensure everyone is aware of the local impact this might have.

We were only informed by a local neighbour 3 weeks ago of this proposal!!!

I suggest that, any proposed project I development works now be put on hold until all residents are given adequate notification, full development detail and, the opportunity to seek representation.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development of the land contained in the above map should be removed from the Local Plan for reasons stated above.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

See above Section 6

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

See above Section 6

[TWBC: Comments from Section 6 and 5 stated below for ease of reference]

Section 6

Development of the land contained in the above map should be removed from the Local Plan for reasons stated above.

Section 5

Aside of the flood risk and traffic hazard detailed in other representations, the issue with already stretched local civic resources also need to be taken into consideration.

Schools and doctors' surgeries are already at capacity (I speak from personal experience).

No provision has been considered or even suggested by TWBC to make allowances for this.

Without doubt, this proposal has been pushed through very quietly and, without adequate consultation with the local residents and I question the legality of the approval.

Now we are aware we shall ensure that all local residents likely to be impacted by the proposed development are canvassed, fully informed (as TWBC should have done) to ensure everyone is aware of the local impact this might have.

We were only informed by a local neighbour 3 weeks ago of this proposal!!!

I suggest that, any proposed project I development works now be put on hold until all residents are given adequate notification, full development detail and, the opportunity to seek representation.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Young, member of the Speldhurst Road Community Action Group
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 5: Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

1. I have lived in Speldhurst Road for more than 40 years and have seen it evolve from a road where horses could ride safely, to a race track for high performance week-enders,

Owing to successive roadworks on the A26 it is now used as a bypass to Southborough, as is Reynolds Lane to St.Johns. To countenance further traffic from an access for 100 houses on this site is unthinkable. Even if the road is widened, where is the increased traffic to go? In addition: The New Life Church hosts a large number of family events, including Mothers and Toddlers. There is insufficient parking within the Church and the mothers are forced to park in the road, sometimes on the pavements. The A26 is already extremely busy, and the T junction between Speldhurst Road and Kibbles Lane would create a traffic block for those seeking to avoid Southborough. Kibbles Lane down to Southborough pond is already very dangerous, with more traffic building up on returning to the A26. It is a residential area with a large number of pedestrians.

2. Strategic objectives in the Local Plan include:

"To protect the valued heritage, and built and natural environments of the boroughand to achieve net gains for nature,"

"To release appropriate land from the Green Belt...and to protect the openness of the remaining Green Belt land,"

We are concerned that the approval for 100 houses will lead to approval in the future for more houses on the rest of the land owned by the same person.

We would advise that many of the wooded areas to the south of Speldhurst Road are protected and are a haven for wildlife. Much of the land is well tended.

The 100 houses will adversely change the area and will lead to the unwelcome urbanisation of the Northwestern edge of Tunbridge Wells.

We would urge you to reconsider this allocation.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?
