The old rural lanes special guidance report identified that Kent is poorly provided with bridleways, 10 percent of PROW network compared with 20 percent nationally. Even with the inclusion of toll rides and permissive rides many rural lanes are regularly used by riders either for linking the off road network or because there is no off road resource at all in their locality. The reality is that while other areas have worked hard to increase their bridle or multi user path network often getting close to 30%, within TWBC this percentage is actually significantly less than 10 percent in many areas with just 2% within my local parish of Brenchley and Matfield. There must be a plan to upgrade the foot path network of PROW's in all rural villages to ensure that we at least achieve 20 percent of paths being upgraded to multi user or bridle paths by the end of the plan as a bare minimum.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The focus of the specific active travel improvements mentioned seems to be far too heavily centred around new development which is within or adjacent to existing towns, who already benefit from pavements and 20 mph zones.

My issue is there is a complete absence of proposals to address how active travel can be implemented in more rural areas where the need is greatest. The plan spans too long a time period for this to be ignored. You cannot discriminate against the rural communities in this way. It's not prioritisation, although I understand the need for that, it's neglect and in this respect I do not feel the draft plan as it stands is fit for purpose. It's a failure to develop a plan to address a well know and long standing problem situation that was accurately described over 25 years ago.

The rural lanes special planning guidance has brought about no discernable change in the last 25 years with the last approach, and the next report you commission will tell you what it did last time. That the rural lanes are a hostile environment for walkers, families with push chairs, wheel chair or mobility scooter users, cyclists and horse riders. This forces most rural families to run not just one but multiple vehicles. At one point when our children learned to drive we were a seven car family and we are most certainly not alone in this.

The key difference now though is that it's now critical that these lanes can be used for active travel that are not just recreational, but also for access to shops, schools and transport which makes it even more vital that they are made safer.

Waiting until the next special guidance report is just kicking the can down the road and is basically a failure to plan to resolve the hostile environment you are already very well aware of. I have no doubt that you are also aware that housing developments are adding to the heavy usage of country lanes. for example cars cutting through the back lanes from new developments at Paddock Wood and Horsemonden rather than using main roads to reach the A21.

It was also well documented within the Highways England plan that the relatively recent dual carriageway which ends at Kippings Cross would result in endless traffic jams during the rush hour and any sunny weekend that force A21 users to take the the rural lanes making life intolerable and even more dangerous for the local residents between Pembury and Lamberhurst. This is a known problem which has been exacerbated by the councils own decisions and must be addressed and not ignored.

If we exclude A or B roads the vast majority of rural lanes are narrow meaning it's virtually impossible for any vehicle to pass a vulnerable road user safely by allowing for a 2m gap.

With no verges, high hedges and banks and the winding nature of the lanes there are many blind bends.

The vast majority will be national speed limit which is unacceptably high for the above mentioned road conditions and places all vulnerable road users at risk. While we cannot change the nature of the lanes we can reduce this speed limit and this should be done as a blanket change.

TWBC have made no meaningful progress in resolving this in the last 25 years and need to find a different and bolder approach to drive change. My recommendation is that you adopt the same strategy as places like the New Forest and introduce a High Weald AONB zone where as you turn off the A or B roads you see a sign indicating you are now entering the High Weald AONB zone, where a 30 mph speed limit applies to all lanes within the zone and unless you see a sign saying you are leaving the zone, everything is a 30 mph limit. The signage should warn drivers they should expect to see walkers,

cyclists and horse riders and should clearly show that vulnerable road users should be passed wide (2m) and slow (less than 15 mph). This would allow for the removal of a vast amount of signage related to speed limits and save the costs of upkeep on these signs. It would also make it easier for the police to prosecute dangerous driving where it is obviously in excess of 30 mph. Visually it would massively reduce clutter and improve the visual appearance of the AONB.

This could be combined with all villages as home zones at 20 mph and the introduction of a network of quiet lanes within each parish linking key equestrian establishments to bridle paths, TROT rides or other permissive rides.

To drive change at a faster pace there should be a presumption that all new rights of way WILL BE multi user paths accessible to pedestrians, families with push chairs, wheel chair or mobility scooter users and horse riders as this offers the best value for tax payer investment given it can be used by the largest number of people.

The work done for the Brenchley and Matfield neighbourhood plan has indicated that equestrianism is second only to agriculture in providing employment. Most other rural villages will be exactly the same and yet there is no evidence of support for this industry which provides employment and could thrive by providing much needed recreational and tourist income if some effort were actually invested in resolving the deficit of bridle paths within the area. The same is probably also true of off road cycling where a better network would significantly increase the income of cafes, pubs and tourist accommodation.

The old rural lanes special guidance report identified that Kent is poorly provided with bridleways, 10 percent of PROW network compared with 20 percent nationally. Even with the inclusion of toll rides and permissive rides many rural lanes are regularly used by riders either for linking the off road network or because there is no off road resource at all in their locality. The reality is that while other areas have worked hard to increase their bridle or multi user path network often getting close to 30%, within TWBC this percentage is actually significantly less than 10 percent in many areas with just 2% within my local parish of Brenchley and Matfield. There must be a plan to upgrade the foot path network of PROW's in all rural villages to ensure that we at least achieve 20 percent of paths being upgraded to multi user or bridle paths by the end of the plan as a bare minimum.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Through our duty to co-operate discussions and regular meetings, it is clear that SDC and TWBC share similar issues and ambitions, including:

- . Providing high quality and well-designed development that meets identified needs.
- . Encouraging the re-use of previously developed brownfield land in sustainable locations.
- . Providing infrastructure to support sustainable growth.
- . Conserving and enhancing the AONB.
- . Protecting the Green Belt.

SDC continues to work with TWBC to address strategic cross boundary issues. Engagement has been constructive, active and on-going during the production of our respective Local Plans. In this regard, SDC is content that TWBC has met the requirements of Section 33A of the Planning and Compulsory Purchase Act 2004. We look forward to further engagement in relation to strategic matters and the possible production of a revised Statement of Common Ground.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	. No, I do not wish to participate in examination hearing session(s)
---	--

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

At this stage, SDC is content to rely on written submissions to express its views on TWBC's emerging Local Plan. Officers will inform you as soon as possible should this position change.

SDC is supportive of joint working with TWBC and other development partners to address strategic, cross boundary matters. You will be aware of the evidence which demonstrates on-going and constructive engagement between our authorities since 2015, on matters such as housing, infrastructure and employment needs. Much of the discussion has taken place as part of the wider West Kent group with Tonbridge & Malling Borough Council.

In May 2019, a Statement of Common Ground was signed between SDC and TWBC. This document sets out the issues and actions raised during duty to co-operate engagement, which include how both local authorities were seeking to meet a variety of development needs. We have discussed the preparation of an updated Statement of Common Ground and the latest version is with you for comment. The updated document will reflect the extent to which our respective strategic development needs can be met and a range of other cross boundary policy matters, including those related to employment, retail and strategic infrastructure.

All legal challenges associated with SDC's Local Plan have now concluded and the Council is working with stakeholders to ensure that an updated document can be put in place as soon as possible. We will keep you updated on this process as part of duty to co-operate discussions.

SDC is of the view that TWBC's approach to the pre-submission Local Plan is positive, proactive and reflects the requirements of the duty to co-operate. We will continue to engage with TWBC as both authorities progress their Local Plans. This will include further discussion on the extent to which our respective housing needs can be met.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

In relation to education and health infrastructure, SDC recognises that many pupils and patients travel between our respective authorities to access these services. We are committed to working with TWBC, Kent County Council and the Kent and Medway Clinical Commissioning Group to deliver the services that are necessary for sustainable growth.

In relation to highway and rail infrastructure, SDC recognises the importance of the A21 and rail service to London in particular. We are committed to working with TWBC, Kent County Council and Network Rail to ensure any necessary improvements to support sustainable growth are delivered in a timely manner.

SDC will continue to work with infrastructure providers and partners on cross boundary matters, including through mechanisms such as the production of Infrastructure Delivery Plans.

Question 1

Respondent's Name and/or Organisation Simon Harkins, SGN

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

General comments on whole Plan.

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

From reviewing the Pre-Submission Local Plan and other provided documents, my only comments at this time are in relation to the Site Allocations. Below is a summary and a bit more information you may find of use.

NETWORK OVERVIEW

All sites reviewed should be in a location where the gas network is close by, so the initial physical connection to the system should not be a problem.

Gas demand for the Site Allocations was estimated based on the number of dwellings. This was then added and analysed on our Network Analysis Model. From the review I found that the Intermediate Pressure (IP) and Medium Pressure (MP) tiers of the network are relatively robust in Tunbridge Wells and *at this time* the addition of the proposed sites did not pose a risk to the operation of the system or the capacity on these gas tiers.

Please note:

- . Reinforcement of the existing Low Pressure (LP) network may be necessary to support development on this scale, dependant on the site demand and the final point of connection to SGN's network. This will usually only be known when a connections enquiry/request is made.
- . SGN are unable to book capacity and the above assessment does not guarantee the availability of future capacity which is offered on a 'first come, first served basis'.
- . The UK Governments plan to stop all domestic connections to the gas network post 2025 was partly taken into consideration, please be aware of this possible new regulation.

STATUTORY OBLIGATIONS

Where required, SGN will look to manage the provision of any off-site infrastructure improvements, in line with the overall development growth and / or timescales provided. The full extent of these works will be dependent on the nature and location of the requested load(s), potentially requiring LP reinforcement in addition to that required for the IPMP networks and will only become clear once a developer's request has been received. Reinforcement solutions are likely to involve the provision of a new pipeline in parallel to SGN's existing mains system but may also include the installation of above ground apparatus involving land purchase.

As this is a high-level assessment and response, the information provided is indicative only and should be use as a guide to assist you on your assessment. While information obtained through consultation and / or engagement on Local Development Plans is important to our analysis, it only acts to identify potential development areas. Our principle statutory obligations relevant to the development of our gas network arise from the Gas Act 1986 (as amended), an extract of which is given below:-

Section 9 (1) and (2) which provides that:

9. General powers and duties

(1) It shall be the duty of a gas transporter as respects each authorised area of his:-

(a) to develop and maintain an efficient and economical pipe-line system for the conveyance of gas; and

(b) subject to paragraph (a) above, to comply, so far as it is economical to do so, with any reasonable request for him -

(i.) to connect to that system, and convey gas by means of that system to, any premises; or

(ii.) to connect to that system a pipe-line system operated by an authorised transporter.

(1A) It shall also be the duty of a gas transporter to facilitate competition in the supply of gas.

(2) It shall also be the duty of a gas transporter to avoid any undue preference or undue discrimination -

(a) in the connection of premises or a pipe-line system operated by an authorised transporter to any pipe-line system operated by him; and in the terms of which he undertakes the conveyance of gas by means of such a system.

SGN would not, therefore, develop firm extension or reinforcement proposals until we are in receipt of confirmed developer requests.

As SGN is the owner and operator of significant gas infrastructure within the area and due to the nature of our licence holder obligations;

- . Should alterations to existing assets be required to allow development to proceed, such alterations will require to be funded by a developer.
- . Should major alterations or diversions to such infrastructure be required to allow development to proceed, this could have a significant time constraint on development and, as such, any diversion requirements should be established early in the detailed planning process.

SGN would therefore request that, where the Council are in discussions with developers via the Local Plan, early notification requirements are highlighted.

Additionally, SGN are aware of the advances being made in renewable technologies, especially those related to the production of biomethane. Should any developer be proposing to include such technology within their development, then we would highlight the benefits of locating these facilities near existing gas infrastructure. Again, where the Council are in discussions with developers via the Local Plan, we would hope that these early notifications requirements are highlighted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

- 1 The Allocations at Paddock Wood, Capel/Tudeley are unsound because it is not based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground;
- 2 The main service areas for these developments are either Paddock Wood or Tonbridge. Most of the Tudeley development will look to Tonbridge as their main service centre which is within the Borough of Tonbridge and Malling.
- 3 The following will impact on Shipbourne residents:
 - **The capacity of the railway station**

This is currently Shipbourne's nearest mainline station to London that provides a fast and regular service; Capel and Tudeley new residents will use Tonbridge rather than Paddock Wood due to proximity. Congestion around the railway station, parking issues and capacity of the rail system are issues that should have been discussed with South Eastern Railways and Tonbridge and Malling BC as part of the Duty to Cooperate. Have these conversations been undertaken and if so what were the outcomes?

. **Increase the existing problems of air pollution within Tonbridge High Street**

Tonbridge and Malling has proposed allocations at the southern end of Tonbridge which if included in the next Local Plan will already put the High Street under undue pressure in relation to air quality. Air quality in Tonbridge High Street is of interest to Shipbourne residents as secondary children pass through the High Street on a regular basis to access the secondary schools. It is also the nearest large service centre for Shipbourne residents. Has Tonbridge and Malling Borough Council discussed the problems of air quality with Tunbridge Wells BC as part of the Duty to Cooperate? If so what are the actions that Tunbridge Wells BC propose to undertake to ensure that Tonbridge High Street is protected from increase in poor air quality caused by increase in traffic from Tudeley and Capel allocations? The SA indicates that the Capel/Tudeley allocation would create 'a worsening of the AQMA on Tonbridge High Street must be considered (cross boundary impacts)'.(Page 93)

Impact on the number of secondary school places available and opportunities for adult education for Shipbourne residents.

Has the school provision been part of the discussion with Tonbridge and Malling Borough Council as part of the duty to cooperate? The Comprehensive school at Paddock Wood is already oversubscribed.

If so what provision will be made for the education of Tunbridge Wells's children? When will the proposed secondary school at Tudeley be built and commissioned in relation to the build out of the development? Will there be restrictions on the entry into Tonbridge schools from Tunbridge Wells? The Schools serving Tonbridge and Malling already accept children travelling into Tonbridge from outside the Borough. The SA states 'All new educational pressures created are expected to be met by provision of new or extended schools. Adult education facilities are not considered, and it is expected that Royal Tunbridge Wells would continue to meet this demand.'

i) How, where and when is the secondary school provision to be made in relation to the programming of development?

ii) It is likely that the Adult education provision in Tonbridge would be used in preference to Tunbridge Wells' provision due to proximity.

Impact on Tonbridge and Malling from flashy run off into the flood plain of the River Medway

This will be exacerbated as climate change impacts increase. Flooding in Tonbridge High Street impacts on residents of Shipbourne as it is their main service centre and most of the secondary pupils need to pass through Tonbridge to reach their schools. The economic impact of major flooding within the Borough of Tonbridge and Malling as a result of allocations impacting on flash run off into the Medway could be major unless correct flood prevention methods are undertaken in the Medway valley which will address the situation. When and how will this be done in relation to the build out of the new developments? Will SUDS in the new developments at Capel and Tudeley be sufficient alone? The impact of flood waters downstream of Tonbridge (within Tonbridge and Malling), back up of flood waters into Tonbridge town centre and downstream flooding at Yalding has not been properly assessed or talked about in the Local Plan. There is no evidence that this has been sufficiently addressed with Tonbridge and Malling Borough Council and the Environment Agency as part of the Duty to Co-operate.

1 Conclusion :

None of the above issues have been addressed sufficiently in the Sustainability Appraisal or through the Duty to Cooperate with Tonbridge and Malling Borough Council. Issues have been left for consideration subsequent to the adoption of the Local Plan. This is unacceptable. The issues raised above should be identified in the Local Plan and unless they can be satisfactorily addressed with programmed actions set out in policies within the Local Plan it is considered that the plan is unsound. Furthermore it is considered that unless these issues have been fully considered and discussed with TMBC under the duty to co-operate (DTC) and there is a statement of common ground addressing these issues that the Local Plan fails on its DTC.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Actions needed to be addressed to make the plan sound:

The issues raised above should be identified in the Local Plan and unless they can be satisfactorily addressed with programmed actions related to the build out of development which are set out in policies within the Local Plan it is considered that the plan is unsound.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This plan does not take into account the amount of traffic going from Paddock Wood to both Tonbridge & Tunbridge Wells. The roads are used for commuting and schools. Both the Government & Royal Family (Prince Charles) are promoting the planting of more trees, being outdoors and encouraging wildlife habitats. This plan is doing the opposite - vast amounts of land to be descimated for housing. With the developments already happening in Paddock Wood we were promised infrastructure first. The main road at the junction of Badsell Road was due to be changed to allow for the development. This hasn't happened.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plan is no longer in line with the Government guidelines since the pandemic has has happened. People will no longer need to commute in the numbers as previously as more home working will take place. Government are now advising green spaces to be of more importance than ever. This plan is going to do the complete opposite.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 1

Respondent's Name and/or Organisation	Julie Shrubb
---------------------------------------	--------------

Question 3

To which part of the Local Plan does this representation relate?	Paragraph(s)
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

5.238, 5.239, 5.256

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:**
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

As stated there is only 1 road in & out of Paddock Wood. This is already busy at peak times. With additional housing/population this will increase. Promised infrastructure has not been put in place.

Paddock Wood is liable to flood as it is on a flood plain. Tonbridge has experienced recent flooding due to over development. The flood barrier does help but the Capel development will add more pressure.

The housing is not affordable. Most young local residents do not earn enough to buy the cheapest of these properties - approximately £255,000 for a 1 bedroom apartment.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Capel Plan should not go ahead. Paddock Wood needs the High Street (Commercial Road) to be used. A crossing by the library would enable people to cross safely & encourage use. Do not close the railway bridge to all traffic except buses. This will mean a detour to Seven Mile Lane, driving back towards Five Oak Green and back into Paddock Wood for some residents to get to school, doctors, shops etc. There is also an ambulance depot which could mean somebody may lose their life if there is a delay.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

- If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?**
- . No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan:

Is legally compliant	Don't know
----------------------	------------

Is sound	No
----------	----

Complies with the Duty to Cooperate	Don't know
-------------------------------------	------------

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I would to state teh following reasons makes this local plan unsound:

The current sit eproposal for 40-45 units is very different to anything else around thi spart of Upper Grosvenor Road and will increase the development of the area.

These buildings will be far taller than anything else in th enear vicinity creatinga major eyesore foe everyone living nearby or visiting the area.

Aware there are tree presevations in place but they will not be sufficienet to restrict the impact that these large dwellings will create by removal of trees and large shrubs.

Upper Grosvenor Road around this area has limited street parking and any extra traffic\vans or people arriving to the area cannot be catered for. Especially with the hill and two bends around this area cause significant issues already.

Significant noise increase in the area - Both sides will be affected while at present there is shielding from the un

The road is busy with school children and young families walking to and from school and going to Hilbert Rec. Excessive traffic and site works etc will cause major issue son this front. Especailly with restrictive parking and cars and buses mounting pavements to get up and down the road.

This proposed planning will completely change this are of St Johns and the surrounding area, reducing the amount of green space. Two talll buildings twice the height of anything else nearby will also be an eyesore for everyone and multiple trees etc will no doubt be removed as part of the building works taking place.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18 [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).
6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:
"The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14

hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that: [https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

“2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale.”

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

“Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable”

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *“the residential aspect is not a sustainable location.”* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *“Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle.”* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

“4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough’s town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)”

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported

in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard’s Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more

investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (*St Albans City Council v Hunston Properties* [2013] EWCA Civ 1610; *Solihull Metropolitan B.C. v Gallagher Estates Ltd* [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in *Hunston* and *Gallagher* in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4

need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_96

Comment

Consultee	Mr Alex Simcox [REDACTED]

Address	[REDACTED] [REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Alex Simcox [REDACTED]
Comment ID	PSLP_1724
Response Date	04/06/21 15:47
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.8
Files	PSLP_1724,1735-1736, 1738_A Simcox_SI.docx
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Alex Simcox
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1724, PSLP_1735, PSLP_1736 and PSLP_1738]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

- 1 These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
- 2 These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
- 3 As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

- 1 Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

- 1 *Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;*

5. The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17.[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf]Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18[https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

"The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14

hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

- 1 Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;
- [...]

- 1 Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

- 1 Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.
- 2 In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]
- 3 Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).
- 4 Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

- 1 The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden ('the Site'). It is connected to Benenden by Goddard's Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).
- 2 The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.
- 3 In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extant planning permission

- 1 There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that:[https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf]

“2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale.”

- 1 In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

“Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable”

- 1 This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *“the residential aspect is not a sustainable location.”* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.
- 2 The Site was deemed to be remote, isolated and unsustainable *prior to* the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

- 1 Policy STR3 of the Local Plan states that *“Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle.”* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

“4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough’s town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)”

- 1 On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of

- sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.
- 2 It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.
 - 3 Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.
 - 4 First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:
 - *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
 - *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*
 - 1 If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.
 - 2 Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.
 - 3 As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

- 1 These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.
- 2 Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.
- 3 Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard’s Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.
- 4 At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

- 5 For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

- 1 The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).
- 2 This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

- 1 It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.
- 2 These differences were summarised by Holgate J in R (Crownhall Estates Limited) v Chichester District Council [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic policies of the adopted development plan (in so far as it exists) as a whole . Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”;

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed

against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (St Albans City Council v Hunston Properties [2013] EWCA Civ 1610; Solihull Metropolitan B.C. v Gallagher Estates Ltd [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in Hunston and Gallagher in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

- 1 The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.
- 2 However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.
- 3 It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.
- 4 This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan’s initial comments of 26 March 2021.
[<http://www.benendenneighbourhoodplan.org/wp-content/>]

uploads/2021/04/Benenden-Initial-comments.pdf]He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

- 1 Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.
- 2 For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_96

Comment

Consultee	Mr Alex Simcox [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Alex Simcox [REDACTED]
Comment ID	PSLP_1735
Response Date	04/06/21 15:47
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.8
Files	PSLP_1724,1735-1736, 1738 A Simcox SI.docx
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Alex Simcox
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1724, PSLP_1735, PSLP_1736 and PSLP_1738]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. *Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;*
- 1 The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18 [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).

6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/_data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden (‘the Site’). It is connected to Benenden by Goddard’s Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal ('the SA') and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood, should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that:[\[https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf\]](https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf)

"2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale."

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

"Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable"

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *"the residential aspect is not a sustainable location."* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *"Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle."* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

"4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough's town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR

1: *The Development Strategy*. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)"

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be "remote" and "isolated" and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *"Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard's Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an 'active travel link' between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of

development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard's Green Road, contrary to Policy EN1. Moreover, these proposed policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic policies of the adopted development plan (in so far as it exists) as a whole. Thus, there is no need to

consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy. The more limited requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

*iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (*St Albans City Council v Hunston Properties* [2013] EWCA Civ 1610; *Solihull Metropolitan B.C. v Gallagher Estates Ltd* [2014] EWCA Civ 1610).*

*v) Those policies in the NPPF (and hence the principles laid down in *Hunston* and *Gallagher* in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”*

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing

the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Supporting Information File Ref No: SI_96

Comment

Consultee	Mr Alex Simcox [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Alex Simcox [REDACTED]
Comment ID	PSLP_1736
Response Date	04/06/21 15:47
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.6
Files	PSLP_1724,1735-1736, 1738 A Simcox SI.docx
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Alex Simcox
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3, AL/BE 4 and STR 10 – see Comment Numbers PSLP_1724, PSLP_1735, PSLP_1736 and PSLP_1738]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Draft Tunbridge Wells Local Plan – Regulation 19 consultation response

Introduction

1. These representations are made on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden.
2. These representations are concerned with the policies in the draft Tunbridge Wells Local Plan ('the Local Plan') affecting Benenden, in particular Policy PTSR/BE1, Policy AL/BE3 and Policy AL/BE4. These representations further concern Policy STR10 insofar as Tunbridge Wells Borough Council's ('the Council') stated intention to withdraw local plan policies in the event that neighbourhood plans are adopted prior to the completion of the examination of the Local Plan. Beyond these identified policies, these representations are not concerned with either the legality or soundness of the Local Plan as a whole.
3. As currently drafted, the identified policies are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development

4. Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

1. *Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;*
5. The proposed limits to built development ('LBD') for Benenden are shown on Inset Map 17. [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0008/387962/Inset-Map-17-Benenden.pdf] Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18 [https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/387963/Inset-Map-18-Benenden-Hospital.pdf], Policies AL/BE3 and AL/BE4 of the Local Plan).
6. The purpose of LBDs is to act as settlement boundaries, the effect of which being that that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

“The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

2. Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

9. Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

7. This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

“The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs”

8. Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4) and define areas beyond the LBD as countryside. As a result, of this development proposals outside of the LBDs will be significantly harder to obtain permission for.

9. In our view the LBD currently proposed for Benenden fails to accord with the Local Plan. It unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086, and also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *“limited key facilities and bus service making them unsustainable in this context.”* [Paragraph 3.1(b) of the Limits to Built Development Topic Paper https://tunbridgewells.gov.uk/__data/assets/pdf_file/0009/388098/Limits-to-Built-Development-Topic-Paper.pdf]

10. Furthermore, the boundary of the LBD is artificially constrained within Benenden itself. This avoids any prospect of in-filling in suitable sites within and immediately adjacent to the village and has in turn informed the site-selection process and excluded several suitable sites in sustainable village locations (Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4).

11. Policy STR1(3) states that the Local Plan will provide *“for the growth of settlements, having regard to their role and function, constraints, and opportunities.”* However, the LBD as currently drawn for Benenden and Benenden Hospital, fails to apply this reasoning. It has resulted in sustainable, appropriate sites for development being excluded from Benenden and pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

Policies AL/BE3 and AL/BE4

12. The land subject to policies AL/BE3 and AL/BE4 is situated approximately 4km to the north east of Benenden (‘the Site’). It is connected to Benenden by Goddard’s Green Road / Benenden Road (a designated rural lane). At present, there is nothing on the Site beyond houses and the hospital (with associated buildings).

13. The Site contains some land which is previously developed, but also 3 Local Wildlife Sites, greenfield areas and rare grassland (see TWFDLP Comments, DLP_3458). In any event, the presence of some previously developed hospital infrastructure within the Site, which itself is placed within an isolated and wholly rural setting, does not override its fundamental unsustainability in local or national planning policy terms for development on the scale proposed.

14. In this regard, the Site is clearly unsustainable. This is demonstrated by both the Sustainability Appraisal (‘the SA’) and the extant planning permission. The extant permission does not set a precedent for development on the Site but rather was a highly fact-sensitive decision which, properly understood,

should not be used as a justification for further development. There are other more appropriate sites in Benenden which, had the SA been properly applied, would have been selected.

The extent planning permission

15. There is currently permission for 24 new dwellings on the Site (TW/12/03130, subsequently amended by 14/505641/FULL). The justification for the 2012 application can be seen from paragraphs 2.07 – 2.08 of the Committee Report for the 2012 permission, which state that:[\[https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf\]](https://twbcpa.midkent.gov.uk/online-applications/files/C51CE242B260EDEE3F5806A1D9D5B596/pdf/12_03130_EIAMJ-Committee_Report-3829324.pdf)

“2.07 The Design and Access Statement identifies that the redevelopment aspirations of the hospital follow consideration of a number of development options including a new build solution. It was concluded (by the Hospital Trust) that the preferred strategy for the future of the site would be to centralise development on the existing hospital through a process of new build extension to enable a consolidation of services and the optimisation of functional arrangements.

2.08 In looking at the options the Hospital Trust concluded that those parts of the estate surplus to requirements could potentially be marketed for sale in order to generate funding support for the scheme. This subsequently led to the confirmation that the administrative South East quadrant (excluding Peek Lodge, Windmill Cottage and Joy Carey buildings) would be put up for sale.”

16. In our view, it is significant that the primary justification for the residential aspect of the 2012 permission was to generate funding for the re-development of the hospital facilities. At no point was this intended to demonstrate the suitability of the Site for wide-spread development. Rather, this was a bespoke planning permission which has to be understood on its own facts. Whilst permission was granted, the 2012 report expressly noted at paragraph 10.27 that:

“Relevant factors also include the fact that the site is in a remote, isolated location and therefore the site is not a sustainable one – seeking a higher density of residential development would lead to such matters as higher car use for example which would not be sustainable”

17. This accords with the consultation response from the expert Highways Authority, Kent Highways Services, summarised at paragraph 6.43, which notes, among other things, that *“the residential aspect is not a sustainable location.”* There is no provision made in the 2012 permission to address the unsustainability of the Site in terms of transport.

18. The Site was deemed to be remote, isolated and unsustainable *prior* to the 2012 permission being granted for, among other things, the development of 24 houses. There is no provision in the 2012 permission to address the unsustainability of the Site. It follows that the Site is still unsustainable, if not more unsustainable given the additional issues which will be caused by the development of the 24 houses. Allocations in the Local Plan (AL/BE3 and AL/BE4) cannot be justified on the basis of funding healthcare development at the hospital given the Local Plan cannot specify who will financially benefit from building out AL/BE3 and AL/BE4. On this basis alone it is clear that further residential allocations on the Site are wholly inappropriate.

Policies AL/BE3 and AL/BE4 – sustainability

19. Policy STR3 of the Local Plan states that *“Proposals that provide for the effective use of redundant, disused, or under-utilised brownfield land and buildings in sustainable locations will be supported in principle.”* Paragraphs 4.68 and 4.70 of the explanatory text to Policy STR3 state that:

“4.68 - A key principle underpinning the overall strategy set out in the Local Plan for the pattern and scale of development is that it makes as much use as possible (optimal use) of suitable PDL (previously developed land)/brownfield sites and under-utilised land, including optimising the density of development, particularly in the borough’s town centres and other locations well served by public transport

[...]

4.70 - The Local Plan includes a number of site allocations on brownfield sites, making effective use of such sites, as required by the NPPF, helping to achieve the overarching need for sustainable development. Such sites tend to be located within established LBDs. This is reflected in Policy STR 1: The Development Strategy. (Para 1 Policy STR1 - Promotes the effective use of urban and previously developed (brownfield) land, having due regard to relevant Plan policies;)”

20. On any reading, the support in Policy STR3 for use of brownfield land and buildings is predicated on those sites being sustainable. The position in the Local Plan is that brownfield sites in sustainable

locations will be supported in principle. It is not that brownfield sites in any location will be supported in principle. This accords with the broad definition of sustainable development given in the NPPF, based on the three overarching objectives of economic, social and environmental. Whilst the use of brownfield land may go to the environmental objective of sustainability, the presence of some previously developed infrastructure within a site cannot be dispositive of whether sites and developments are themselves sustainable.

21. It is unarguable that the Site is sustainable. As made clear above, the Site was found to be “remote” and “isolated” and therefore unsustainable in 2012. No infrastructure has been introduced since. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location.

22. Furthermore, as made clear in earlier representations as part of the regulation 18 consultation response to the Local Plan submitted on behalf of Euan Burrows, Mockbeggar Lane and a group of residents who all live in East End, Benenden, there are significant issues in the SA which have resulted in Policies AL/BE3 and AL/BE4. Those representations have been appended to these representations rather than repeated in full, but a number of points are reiterated here.

23. First, and fundamentally, the filtering exercise carried out in the SA which led to the selection of the Site over other options has been misapplied. The first two bullet points of paragraph 8.1.4 of the SA provide that sites will be filtered out if they are:

- . *“Located in remote locations away from existing settlements; such sites considered unlikely to be sustainable in this context; in some instances some remote sites have been considered in the context of a new garden settlement where applicable or as urban extensions; (Bullet Point 1)*
- . *Not well related to a settlement; this has included sites that may be in relative close proximity to a settlement but are not well related to the built form of the settlement for example because they are cut off / separated from the settlement / built form in some way; (Bullet Point 2)*

24. If these points were to have been correctly applied, it is inconceivable that AL/BE3 and AL/BE4 would have emerged as a preferred option. The Site is acknowledged to be located in a remote location away from existing settlements and is not well related to the nearest settlements of Benenden and Biddenden, both of which are 4km away. The only means of transport between East End and Benenden is along the narrow Goddard’s Green Road. There is no walking path and no cyclepath between East End and Benenden. Indeed, this lack of relation to Benenden is clearly acknowledged by the wording of AL/BE3 and AL/BE4, which require the provision of an ‘active travel link’ between the site and Benenden village.

25. Second, and leading on from this point, the SA itself identifies that the Site is unsustainable but then suggests that this can be addressed through future development. However, this is fundamentally misguided. The correct approach is to consider a potential site as it exists, not after hypothetical development has taken place. Otherwise, all sites would be acceptable, thereby rendering the site-selection process pointless.

26. As such these policies are unjustified. They are the result of an inconsistent approach to determining limits to built development and a fundamentally flawed SA.

Policies AL/BE3 and AL/BE4 – conclusion

27. These policies would result in the development of an isolated residential outpost in an unsustainable location on the edge of the AONB.

28. Policies AL/BE3 and AL/BE4 are unjustified. They are the result of an inconsistent and erroneous approach within the SA. This is reflected in the proposed LBD for Benenden which have artificially excluded a number of viable sites for development, pushing development to an isolated, remote and unsustainable location in the East End.

29. Policies AL/BE3 and AL/BE4 are inconsistent with the Local Plan. They are not sustainable, contrary to Policy STR1. The existence of some previously built development does not render the scale of development now sought on the site compatible with STR3 or overcome its fundamental incompatibility with the wider local applicable policy framework. In particular, the Site is isolated and remote and will necessitate travel by car, contrary to Policies STR6, STR7 and TP2. This will result in severe residual cumulative impacts on Goddard’s Green Road, contrary to Policy EN1. Moreover, these proposed

policies for the Site also fail to afford protection to the setting of the AONB, contrary to Policy EN20, which is a fundamental requirement in this rural area.

30. At the national level, Policies AL/BE3 and AL/BE4 are also inconsistent with the NPPF. They represent unsuitable development in an unsustainable location, contrary NPPF chapter 2 and paragraphs 78 – 79. The development is not located to existing settlements and would have an unacceptable impact on local roads, contrary to NPPF paragraph 84. These policies do not and cannot promote sustainable transport, contrary to NPPF chapter 9.

31. For these reasons, Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Policy STR10 – interaction between draft Neighbourhood Plans and the Local Plan

32. The stated intention of the Local Plan is to withdraw policies in the Local Plan if Neighbourhood Plans are adopted prior to the examination of the Local Plan which contain policies similar to those in the Local Plan (paragraph 4.145, Policy STR10).

33. This stated intention applies directly to Benenden. Paragraphs 5.420 – 5.422 of the Local Plan provide that:

“5.420 Local policies are also being prepared through the Benenden Neighbourhood Plan (BNP), which will become an increasingly important consideration as it progresses. The BNP was submitted to Tunbridge Wells Borough Council in October 2020 and was consulted on between 30 October and 11 December 2020. The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan.

5.421 If the BNP progress through the relevant stages, including referendum, a decision will be made by the Full Council of Tunbridge Wells Borough Council whether to make the Benenden NDP part of the development plan for Tunbridge Wells borough. If this is agreed, all decisions on planning proposals within the parish of Benenden will be required have regard to its policies.

5.422 If this occurs while this Plan is still under consideration, the allocation Policies AL/BE1, AL/BE2, AL/BE3, and AL/BE4 will be omitted. Rather, the settlement chapter in the Local Plan for Benenden will refer to the site allocations, and other relevant policies in the made BNP. This would be undertaken through modifications to the Local Plan, which would be consulted on.”

34. It is well-established that the examination of a draft local plan is wholly distinct from the examination of a draft neighbourhood plan and must be assessed on its own merits. A draft local plan can only be adopted if it is sound. There is no requirement to consider whether a draft neighbourhood plan is sound. Instead, the question to determine is whether it is appropriate to make the plan having regard to national policies and advice. As a result of this distinction there is no requirement to consider whether a draft neighbourhood plan is the most appropriate strategy for the area nor to consider whether it is based upon proportionate evidence as there is with a draft local plan.

35. These differences were summarised by Holgate J in *R (Crownhall Estates Limited) v Chichester District Council* [2016] EWHC 73 (Admin). He identified the following relevant principles at paragraph 29:

“i) The examination of a neighbourhood plan, unlike a development plan document, does not include any requirement to consider whether the plan is “sound” (contrast s. 20(5)(b) of PCPA 2004) and so the requirements of soundness in paragraph 182 of the NPPF do not apply. So there is no requirement to consider whether a neighbourhood plan has been based upon a strategy to meet “objectively assessed development and infrastructure requirements”, or whether the plan is “justified” in the sense of representing “the most appropriate strategy, when considered against reasonable alternatives” and based upon “proportionate evidence”;

ii) Where it is engaged, the basic condition in paragraph 8 (2)(e) of schedule 4B to TCPA 1990 only requires that the draft neighbourhood plan as a whole be in “general conformity” with the strategic policies of the adopted development plan (in so far as it exists) as a whole. Thus, there is no need to consider whether there is a conflict or tension between one policy of a neighbourhood plan and one element of the local plan;

iii) Paragraph 8(2)(a) confers a discretion to determine whether or not it is appropriate that the neighbourhood plan should proceed to be made “having regard” to national policy. The more limited

requirement of the basic condition in paragraph 8(2)(a) that it be “appropriate to make the plan” “having regard to national policies and advice” issued by SSCLG, is not to be confused with the more investigative scrutiny required by PCPA 2004 to determine whether a local plan meets the statutory test of “soundness”.

iv) Paragraphs 14, 47 and 156 to 159 of the NPPF deal with the preparation of local plans. Thus local planning authorities responsible for preparing local plans are required to carry out a strategic housing market assessment to assess the full housing needs for the relevant market area (which may include areas of neighbouring local planning authorities). They must then ensure that the local plan meets the full, objectively assessed needs for the housing market area, unless, and only to the extent that, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole, or specific policies in the NPPF indicate that development should be restricted (*St Albans City Council v Hunston Properties* [2013] EWCA Civ 1610; *Solihull Metropolitan B.C. v Gallagher Estates Ltd* [2014] EWCA Civ 1610).

v) Those policies in the NPPF (and hence the principles laid down in *Hunston* and *Gallagher* in the interpretation of those policies) do not apply to the preparation by a qualifying body of a neighbourhood plan. Although a neighbourhood plan may include policies on the use of land for housing and on locations for housing development, and may address local needs within its area, the qualifying body is not responsible for preparing strategic policies in its neighbourhood plan to meet objectively assessed development needs across a local plan area. Moreover, where the examination of a neighbourhood plan precedes the adoption of a local plan, there is no requirement to consider whether it has been based upon a strategy to meet objectively assessed housing needs.”

36. Significantly, a draft neighbourhood plan is examined for general conformity with an adopted local plan and not against policies in an emerging local plan. Paragraph 006 of the PPG ‘Plan-making’ states that:

“They [neighbourhood plans] can be developed before, after or in parallel with a local plan, but the law requires that they must be in general conformity with the strategic policies in the adopted local plan for the area (and any other strategic policies that form part of the statutory development plan where relevant, such as the London Plan). Neighbourhood plans are not tested against the policies in an emerging local plan although the reasoning and evidence informing the local plan process may be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested.”

37. The point of this is that, if adopted, as a matter of law the Neighbourhood Plan will have been subject to a far less rigorous examination than the Local Plan. Importantly, policies in the Benenden Neighbourhood Plan will not have been tested against the Local Plan. This means that there is no basis on which it can be said that the Benenden Neighbourhood Plan is in “general conformity” with the Local Plan. Whilst it may be the case that the draft Neighbourhood Plan has been prepared with the Local Plan in mind, it cannot be concluded that if both are adopted the Benenden Neighbourhood Plan will be in conformity with the Tunbridge Wells Local Plan given substantial main modifications may be required to ensure that the Tunbridge Wells Local Plan is sound.

38. However, notwithstanding these stark differences, at present Policy STR10 seeks to abandon the provision of site-specific policies for Benenden in the event that the draft Neighbourhood Plan is adopted. The practical result of this is that the Tunbridge Wells Plan would effectively “adopt” site allocations and other relevant policies in the Benenden Neighbourhood Plan (paragraph 5.422) which have not been found to be sound and which have not been tested against the Tunbridge Wells Local Plan. To be sound, Policy STR10 rests upon the wholly improper premise that policies in the Neighbourhood Plan would not only be found to be in general conformity with the Local Plan but also that those Neighbourhood Plan policies would be “sound” if tested against the Local Plan, given they will replace the provision of any site-specific policies in the local plan. Given the Local Plan has not yet been examined, this conclusion is simply not open to the local planning authority.

39. It is clear that this should not and cannot prevent the Neighbourhood Plan being examined and adopted prior to the examination and potential adoption of the Local Plan. Furthermore, we neither object to the desire to avoid repetition within development plan documents nor to avoid potentially unnecessary superseding of neighbourhood plan policies. However, none of this justifies circumventing the proper local plan procedure. Given the uncontroversial marked procedural differences and requirements between the two examination processes, it is our case that it is unlawful and unsound to read neighbourhood plan policies into a local plan where those neighbourhood plan policies have not been subject to the rigorous examination of draft local plan policies to test them as sound. At no

point will those neighbourhood plan policies been found to even be in general conformity with that local plan, let alone tested for soundness. At the least, Policies AL/BE1, AL/BE2, AL/BE3 and AL/BE4 need to be tested against the draft Local Plan to ensure that they are sound, even if this subsequently results in them being withdrawn by main modification.

40. This is especially true given there are a number of significant differences between site specific policies in the Neighbourhood Plan and the Local Plan, as noted by the examiner appointed to inspect the Neighbourhood Plan's initial comments of 26 March 2021. [<http://www.benendenneighbourhoodplan.org/wp-content/uploads/2021/04/Benenden-Initial-comments.pdf>]

He stated at paragraph 26 of his initial comments that:

"I note that the Pre-Submission Version of the Local Plan also allocates the same four sites for development, but the contents of the respective policies differ. Is there merit in the policies, at least having the same policy expectations within them? For example, if the neighbourhood plan is made first, then I understand that the intention of the Borough Council is to withdraw these allocations from the Local Plan and in which case, the requirements which are only found in the local plan, and are not within the neighbourhood plan, will be lost. Is there scope for at least a consistent approach to the policy requirements and would further discussions between the two parties be helpful? I would then be able to consider whether to accept any possible modification in my recommendations."

41. Accordingly, the effect of Policy STR10 is not only to circumvent the requirements of the local plan examination procedure but also to then "adopt" policies that differ from those currently in the Local Plan. This is unsound.

42. For these reasons, as presently drafted Policy STR10 is unsound and would be unlawful if adopted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We shall attend with Counsel.

Points will be made with reference to National and Local Planning Policy, together with applicable legal obligations

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy STR/PW 1 The Strategy for Paddock Wood

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have looked at the proposed developments for Paddock Wood and have several concerns. I have tried to access the consultation online but it has been an absolute nightmare - unwieldy, unhelpful, bureaucratic and impossible. Is this how objections are curtailed?! Please advise if emails are not being taken into account for this consultation.

Whilst I fully appreciate the need for more use of walking & cycling, other factors need to be taken into account. Paddock Wood is a rapidly growing town. It has the potential to be a really good town with already a large secondary and primary school with good reputations, a sports centre (missing a much-needed swimming pool) and a shopping centre which provides nearly every thing you need.

1). Paddock Wood also serves the rural community and cutting off access by closing the bridge and closing car parks will make it much more difficult for these people to visit the town.

2) There is NO public transport for outerlying areas to use. There is currently 1 bus a week into Paddock Wood from Collier Street for example. It is too far to cycle particularly for the elderly population in villages.

3). By cutting access to Paddock Wood from the main road into the town means that large numbers of lorries will use (or try to) the small and entirely unsuitable country lanes.

4). In order for Paddock Wood to flourish people need to access the shops. This proposal will strangle commerce in the town. Apart from those who can walk others will go elsewhere. Tunbridge Wells might profit from this with its retail parks but Paddock Wood will struggle & quite possibly end up a dormitory town for commuters. It needs shops & restaurants.

5). Shutting Commerce Road last year was a complete disaster and I really can't see how it will be anything else. Again, where do people who have to come to the town by car actually park if the car parks are closed?

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Policy AL/SP 2 Land at and adjacent to Rusthall Recreation Ground, Southwood Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This site allocation is wholly unnecessary, has minimal public support and does not meet the needs of local residents. It will result in additional unsustainable vehicle movements, undermine a successful community football club and develop land located within the AONB. It's continued allocation in the Local Plan is ill thought through, based on an old assessment of need and needs to get re-examined.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Remove from the Local Plan

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Paragraphs 5.99 thru 5.103

Policy AL/RTW 16: Land to the west of Eridge Road at Spratsbrook Farm

Inset Map 16

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

- Do you consider that the Local Plan is not sound because:
- . It is not positively prepared
 - . It is not effective
 - . It is not justified
 - . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate because:

- . Paragraphs 5.99 thru 5.103 do not provide any supporting statements to justify the rationale for proposing housing development on this site.
- . Clearly states that consultations will be required with other authorities, who should have been consulted before the plan was proposed.
- . States that road access on to Eridge Road will be required but provides no details of that road access will be positioned or calculations as to the impact on an already strained road network.
- . If implemented will dramatically place existing primary infrastructure under pressure.
- . Does not recognised that part of the site is (as shown on DEFRA records) an area of historic land fill. Any land contaminated with hazardous or toxic materials is potentially a serious cause of pollution, as well as a threat to human health; it can also migrate into watercourses, impacting not only on water quality, but also biodiversity. Contamination can derive from previous uses, such as industrial processes involving chemicals, intensive agriculture, or closed waste disposal sites where landfill gas and leachate are still present.
- . Will have a serious ad detrimental impact to the Green belt.
- . Will harm and permanently harm for future generations an AONB.
- . Is not supported by a resultant increase in public services required to support such housing development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The proposal should be abandoned altogether

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Because, the proposal is fundamentally flawed, ill thought through, detrimental and takes no cognizance of reality in respect of historic land fill, the Green belt and the AONB.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

I hold the view that no sustainability appraisal of the economic, environmental and social effects of this proposal has been undertaken in respect of Land to the west of Eridge Road at Spratsbrook Farm from the outset of the preparation process, to allow decisions to be made that accord with sustainable development.

xxxx Nursery Road

Paddock Wood

I have been a resident at the above address [TWBC: Full postal address redacted for data protection purposes] since 1982 working in London for the last 28 years of my working life. I have been fully retired for 6 years.

I have participated in local organisations for some years and worked for 6 years with the Citizens Advice Bureau in Paddock Wood.

I am particularly interested and concerned with the proposed very rapid growth of the town and how this will affect all residents.

A. Compliance with Legal and Procedural Requirements

I am not competent to comment on whether the process which Tunbridge Wells Planners have followed meets legal requirements.

My main concern is that these processes have taken place in a severely restricted climate due to the Covid Pandemic. The consequences of this are that many residents do not realise what the borough council's proposals for Paddock Wood are and how it is likely to impact their lives.

Current housing approvals under construction are likely to increase the population by 30% with no improvements to the area infrastructure which is already severely stretched.

The new proposals being commented on in this document are likely to double the population of Paddock Wood in the next few years. This will radically change the living environment of the local population.

The borough council has been unable to communicate adequately to local people because of the severe restrictions on movement imposed by the government. However, they have continued to progress schemes and gain borough council approval without the possibility of proper communication to Paddock Wood and Capel residents and not allowing for comment and opinion to be voiced in a democratic way.

Paddock Wood Town Council has been involved in the communication loop but has not been able to involve residents as might reasonably have been expected. The Town Council members voted against the Plan, but this was overridden by the Borough Council.

I believe that a "time out" should now be put into the programme to allow proper communication with and input from residents. The plan should then be discussed again by the Borough Council under examination with more evidence being available before any implementation.

B. Soundness of Plan

- 1 Flooding – Much of the area of the proposed construction of 3,500 new houses in the Paddock Wood / East Capel area is in Environmental Agency designated flood risk zones 2 and 3. **The Borough recognised these risks by designating the area as not suitable for further development in the last Local Plan 2016.** This proposal therefore is a sharp reversal of uninformed opinion. The Kent County Council has instigated various investigations over the last 20 years as a result of many flood incidents in Paddock Wood. These have been carried out by specialist consultants, the most recent in 2014 / 15 by Jackson - Hyder. This was called the "Paddock Wood Flood Alleviation Study." Hydraulic Modelling of the local water courses was

undertaken, and recommendations were proposed to mitigate the risk of future flooding to varying degrees based on the remedial actions taken or not taken.

I believe it is essential to update these studies before building work is considered in the area, to take account of changes which have taken place in the intervening years. This study should also consider and predict the effect of the considerable impact from new building works and increased surface water drainage to water courses. This change should initially consider impacts from the Mascall's Court Road site involving Berkeley Homes and the Church Road and Mascalls Farm sites. The footprints of building, walkways and roads is considerable with water run-off into existing water courses. Past modelling work of flows will be made irrelevant as a result of these large new developments. Then the modelling must consider the much greater impact of the proposed Paddock Wood / East Capel developments.

More is now known also of the impact of Climate Change on the frequency and intensity of severe weather events and the Environment Agency should be asked to respond to the effects on Paddock Wood and its' residents.

The potential blocking of ducts under road and railway must be of considerable concern in times of high rainfall and the responsibility for maintenance of these is unclear.

Flood alerts have been issued by the Environmental Agency on many occasions to the high- risk areas. This has certainly been the case in areas to the north of the railway and to the west of the Maidstone Road in my experience.

Household insurance with respect to flooding, has been available to residents at a premium but the impact of approved developments and in particular the Paddock Wood / East Capel major development may make insurance prohibitively expensive or not offered by insurers. **New studies must be undertaken to investigate the impact of proposals before work starts. The studies must be under the control of an expert authority with no clear interest in the outcomes.**

Removing wooded and agricultural areas will inevitably reduce the ability to absorb surface water. The need is for a "betterment" of existing flood risks and not the deterioration which is inevitable from construction on this scale on high flood risk land.

1 Infrastructure

- . Medical facilities in Paddock Wood are stretched now before the impact of the 1000 houses currently under construction bringing maybe a further 3000 people into the town. This is a major concern to residents without the impact of such a significant further expansion from the Paddock Wood / East Capel proposals. It has been difficult to attract Doctors to the Woodlands Health Centre, especially those working 5 days per week. This is already a town priority.
- . There has been no permanent police presence in Paddock Wood for many years and we rely on a service from the CranbrookTonbridge In emergency situations this is unacceptable to us. Visible police presence in central town areas does not happen. Control of vehicular speed though the town and of illegal parking no longer happens. **There appear to be no plans for an improved service with these major town expansion schemes?**
- . The most recent new housing occupancy indicates that each household has 1 or 2 cars. There are significant traffic flow problems in Paddock Wood already during busy periods of the day. Expansion plans in the town and surrounding areas show no road improvement schemes affecting Paddock Wood. Applying new bus routes and cycle lanes is to be applauded but there is no indication that residents now, and in the future, will not still use their cars most of the time. Traffic hazards and flow interruptions will become an even greater problem than at present.
- . The capacity of the town effluent treatment plant and pumping station has been reached. It was believed Mascalls Farm new properties would not be connected to the treatment works, instead relying on cess pits. Now it seems the decision may have been reversed? Either way, significant new investment will be required in order to accommodate the foul effluent from 3,500 new houses. Who will be pay for this other than Water Company customers and when will this investment be made? **I believe think the risk of overflows from the treatment plant direct to the Medway in times of high rainfall will be significantly increased.**
- . There appears to have been a reduction in fresh water supply main pressure as new housing is brought on-line. Major investment will be required in water supply to housing and business to meet future demands.
- . There will be insufficient school capacity to meet the demands of the 1000 homes currently under construction, but the Kent County Council has turned down the application for a new primary

school. If 3500 homes are built in this proposal new capacity will be required early in the development programme. How will this be funded?

- . In summary the Town infrastructure is weak now and will need considerable work in the future with the extensive expansion. The draft plan suggests all kinds of possibilities but who will be accountable for implementing these? Experience indicates no interest from the borough in making investment in this area and the appointed developers will have low priority on spending in areas which has no financial return. I have no faith in the delivery of the “promises” of the plan.

1 **Environment and Biodiversity**

- . The environment of the fields and wooded area of the flood zones scheduled for development is a pleasing area, much used by those exercising and dog walkers. There is a wide variety of animal and bird life. How can the proposed development improve this?
- . I estimate that up to 75% of the total green space currently in the area will be replaced by the footprint of roads, housing, driveways, footpaths and cycle paths. The massive increased water run-off into water courses will risk the environment considerably. Noise and air pollution will be substantially increased during the long construction period and forever after completion.
- . The evidence for this level of housing demand must be carefully scrutinised as in some parts of the country the figures have been shown much exaggerated.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My name is Michele Sinclair and I have been a resident of Paddock Wood since 1983. I am now retired but was Headteacher of Sackville School, Hildenborough, for 14 years prior to retirement.

I am the Chair of Paddock Wood Residents' Association, the Chair of Paddock Wood University of the Third Age - the largest community group in Paddock Wood and I am a member of Paddock Wood Flower Club. I have been involved in a number of different local associations over the years. I have brought my children up in Paddock Wood and they both attended Paddock Wood Primary School and then Bennett Memorial School, Tunbridge Wells.

As a long term resident of a small rural town I am most concerned at the impact that these vast changes will have on all residents, their children and visitors to the town.

I am not qualified to make any statement on the legality of the plan or whether it is compliant, however, I am qualified to make statements on the soundness of it.

FAIRNESS AND BALANCE

- . This proposal has been rushed through during lockdown when residents were only permitted to leave their homes for essential journeys; communication and consultation with the local population during the pandemic and lockdown has been minimal. Therefore, there is probably little realisation in many of the population of the impact this further planned town expansion will have on their lives during construction and beyond.
- . Many people do not have access to computers and those without internet access were invited to "make an appointment at Tunbridge Wells Borough Council to view the plan" - as we were under government rules not to venture from our homes, this was both disingenuous and against government rules. Our Library has been closed since March 2020 because of Covid so no-one could use the computing facilities in it.
- . As a result of this lack of proper consultation during the pandemic, organised opposition has been extremely difficult, therefore, this development must not proceed before a mass meeting of Paddock Wood and East Capel residents is called to explain the plans and to satisfactorily allay the many serious concerns that residents have, and any final decisions must be postponed so that a full and proper consultation can take place.
- . The Plan contains many hundreds of pages, written in almost unintelligible language with much repetition. No layman, no matter how concerned, can be expected to understand all the technical details, or to plough through so many hundreds of pages of such turgid prose, when with the best will in the world, it is not understood.
- . The borough of Tunbridge Wells is large, yet thousands of houses are proposed for a small area of the borough, which is neither fair nor equitable. Paddock Wood currently has three housing development sites in construction: it would be more sensible to see how these 1,000 extra houses,

people and cars settle in before any more major developments are permitted. Paddock Wood Town Council voted against the plans but were overridden by the Borough Council. Our town will more than double in size in this plan is approved and materially alter all our way of life.

- . Most of this proposed development is in Green Belt or Flood Zone and no Brown Field sites have been identified in it at all. Clearly it is more cost effective for developers to build from scratch, but it is much better to build on Brown Field sites first. Why have no Brown Field sites been identified?

JUSTIFICATION

- . The railway station at Paddock Wood has been stated as a major factor for the location of this development but when one sees the numbers of cars now in the station car parks this must be seriously questioned and the station should not be a major factor in decision making for such a massive development, nor justify a need for the expansion into green belt, flood zones and destroying prime arable land. Our rail station has a good service into London, however, the trains come up from the coast, stopping at many places, so that by the time they reach Paddock Wood they are virtually full and by Tonbridge, the next station up, it is standing room only: Southern Rail have no plans to increase capacity on the line.
- . There is a reasonable up-take of property currently under construction to the east of the town, but many more homes are still under construction and some time from release to potential buyers. Based on house prices on these new developments under construction it is unlikely that any could be considered affordable for first time buyers from Kent.
- . The national birth-rate is falling and government plans to restrict immigration to those with the skills needed in the workplace will also have an effect to decrease the future population. Where is the justification for this level of housing?
- . The Office for National Statistics' data for future housing requirements is in error in Coventry, and therefore the numbers planned/required must be seriously questioned for our area.

FLOOD RISK

- . The main objection to the proposals in the Paddock Wood / East Capel area is that land is in designated Flood Zones 2 or 3 and is likely to be inundated by river and water courses, witnessed by many Environmental Agency flood alerts over the last and many previous Winters. The borough council agreed with this information in the last Local Plan 2016 and designated much of the area now proposed for development as "unsuitable for development" because of the flooding risk. No major flood alleviation has been carried out since so the position cannot be reversed now for the sake of expediency.
- . Currently the land in question is largely used for agriculture or is wooded. In this state the land can absorb large quantities of rainwater into the water table above clay, with run-off available into water courses such as Tudeley Brook and streams unnamed when the land is saturated. It is estimated that the construction of 3,500 properties in the area will reduce the capability to drain naturally by at least 75% due to the footprint of the housing, drives, pathways, cycle tracks, parking areas, current industrial sites, and roads to be constructed. The run-off from the developments will have to drain into the existing water courses leading to a significantly increased risk of flooding of all housing in the area to the west and north west of Paddock Wood.
- . Mitigation, such as allowing water to be accommodated in a new lake to take surface water can seem to give an "appealing" environment as a paper exercise; if the lake is not allowed to fill it will be very unsightly in an urban situation, and when that lake becomes full where does the excess water go? Evaporation rates will be minimal, and it is known that severe weather events are likely to become more frequent and to cause much more flooding as Climate Change continues to occur in the future. Developers must indicate examples of similar developments in flood prone areas where mitigation has proved successful by the methods proposed and calculations should be checked by an "independent authority" which is not under the pressure to build housing: a Strategic Flood Risk Assessment must be carried out by an independent person and not one influenced by a desired outcome, as risk assessments are necessarily subjective and therefore potentially biased. The Environmental Agency must update their assessments based on the proposed new developments.
- . "Betterment" of the existing flood risks to property is required before any new schemes are considered.
- . Currently house holders in the areas of this development can get insurance cover, at a premium, based on historical data of flooding, despite the Environmental Agency's area classifications.

After building 3,500 houses in the designated flood zones, houses may well become uninsurable against flooding risk. Has the borough council consulted insurers on this issue?

- . If the development is completed and flooding occurs, as expected, with the losses to property and potentially human life, who will be held responsible for the decision to build in Flood Zones 2 and 3? Will it be the head of Planning at Tunbridge Wells Borough Council? Will it be the developers responsible for the construction? Will it be “consultants” employed by the above to provide the desired answers? Specific people are taking the decisions and those people must be accountable for any future flooding.
- . The Maidstone Road surface water drain is overloaded whenever heavy rain occurs. The solution to the regular flooding of the junction of Nursery Road and Eldon Way was to lay a new relief pipe from the flooding area in a westerly direction to the nearest fluvial take away stream. This will be effective as long as the water level in that stream allows flow and no reverse flow occurs. This was clearly the cheapest option and has been successful to date but not when new housing overloads that stream with substantially more run-off.
- . Very localised flooding has occurred in the past when water courses under roads have become blocked in times of high rainfall. Often there is considerable reduction in flow capability by small pipe diameters and inevitably these will be blocked by floating obstacles carried by the fast water flows. Housing to the north and north west of Paddock Wood is regularly threatened with flooding – I give the Environment Agency warnings as evidence.
- . The wooded area of land absorbs a substantial amount of water – I offer evidence with the Environment Agency’s maps showing where Flood Zone 3 merges into Flood Zone 2 where the land is heavily wooded: crops and trees soak up water, but concrete does not.

INFRASTRUCTURE

- . Paddock Wood has three major housing developments in progress – Mascall’s Court Farm, Mascall’s Farm and Church Road, which will add approximately 800 new houses with the option on these sites of a further 360. There have been no infrastructure changes coming from this current expansion so that the current residents can live their lives without increased difficulties due to the expected population increase. The Borough Council “infrastructure first” political statement has not been followed through, nor will it be as commercial interests are being allowed to dominate. Tunbridge Wells Borough Council has failed to offer any financial support to improve the infrastructure from current developments, with the likely 3,000 extra population.
- . Our bus service to surrounding local towns is woefully inadequate and has been severely cut in recent times and so all the new residents of the current developments will be car users of necessity.
- . The existing medical centre already struggles to cope, with no doctor working a 5- day week from choice. The Borough Council cannot force commercial interests to build another medical centre, despite the Medical Commissioning Team saying that a further centre will be needed. Often only locum doctors are available for residents with no continuity of care and the difficulties for all local residents of getting appointments.
- . Foul effluent capacity has been reached with new housing to the east of the town in some cases having to install cess pit collection. The pumping station has been at capacity for many years and simply limps along. One can foresee in times of high rainfall the effluent treatment plant for Paddock Wood overflowing raw sewage directly into the Medway without substantial investment.
- . Southern Water said some years ago that the Paddock Wood Pumping Station was at capacity: a proposed foul water ring main for Paddock Wood has **not** materialised. Southern Water has recently conducted an “internal review of modelling processes and standards” as an alternative to installing a Pumping Station and Rising Main and decided that their previous model was out of date and that a further 246 properties at Church Road can now be added to the drainage system. Modelling can produce almost whatever outcome the modeller desires, but this solution of course is so much more cost effective than building what is desperately required for Paddock Wood. When it is completely overwhelmed by heavy rainfall, we run the real risk of raw sewage flowing into our homes and streets because of this irresponsible modelling. There has been localised flooding in the Church Road area on several occasions and allowing these properties to connect to the network is a recipe for disaster. To accommodate the other new properties currently being built, Southern Water further propose putting holding tanks for sewage in Ringden Avenue which is archaic in this day and age, but it is a cheap solution. A new Pumping Station is required for all the new properties currently being built and most certainly before any other development is permitted.
- . Kent County Council refused to fund provision of a new primary school to coincide with the 3000 extra population expected with the current expansion in progress as it was not “required.” KCC

knows that it will be cheaper to provide extra Portakabins and another teacher on the existing primary school site and infill at all local primary schools. New schooling will have to be put in early within this proposed development project to improve infrastructure but needs to be funded and developers will not put in funding when houses are not sold.

- . Social Care has been significantly reduced in Paddock Wood, there is no care home for the elderly – Capel Grange is the nearest facility, and other facilities for the elderly are non-existent. The few child-care facilities are full and only one has purpose-built accommodation.
- . Carbon fibre networks are not widely available to existing houses for rapid internet service which will deter anyone working from home and thus put further pressure on the need to commute with over-crowded trains.
- . Fresh water supply will be an issue as it is noticeable that supply line pressure is dropping with the impact of demand from new housing taking its toll. This will require more investment from S.E. Water / Southern Water and / or the developers and they all seem to be extremely reluctant to make any sort of commitment.
- . In summary, infrastructure will be the last thing addressed based on historical performance and all the current residents of Paddock Wood will be made to suffer for many, many years to come.

FOOD SECURITY AND BIO-DIVERSITY

- . We have seen with Brexit, that the trading of goods and vaccine supplies across our borders is very susceptible to disruption. It is essential therefore, for our small island to be more self-sufficient. This proposal removes hundreds of acres of arable land from the food supply chain and that must not be permitted: one of the farms in question was mentioned in the Domesday Book.
- . There are large swathes of wooded areas under this threat and some are ancient woodlands, e.g. Whetsted Wood. Currently we have a wonderfully bio-diverse area with a vast variety of wildlife, from bats to badgers to foxes to hedgehogs to dormice etc. plus a significant array of birdlife including owls, woodpeckers, herons, hawks, buzzards, kingfishers, cuckoos, little egrets, and the more common garden birds regularly seen. The land is home to wood anemones, bluebells, wild garlic, lady's smock and many other plants too numerous to mention. Residents have witnessed the current developers cutting down trees with nesting birds and with preservation orders, demolishing bat habitats and more - Tunbridge Wells Borough Council Officers have not protected these trees and the wildlife, which gives no comfort in their future actions. When commercial interests hold sway, biodiversity is completely ignored, and it must be protected for our future and our children's future.
- . Much of the area earmarked for this development has been used for informal recreation for many decades and it has never been more important than during this last 18 months of the pandemic when it was so important to exercise outside. Areas of open land available for recreation and dog walking are rapidly disappearing. The developers are paying lip-service to "green spaces": we already have delightful green spaces and do not need to have any manufactured spaces, and do not need our current spaces covered in concrete with houses, roads and the like.
- . Housing must be built using methods and materials at low or zero carbon input but there appear to be no clear guidelines for developers. The current new housing developments in Paddock Wood are not incorporating low energy methods of heat pumps and solar cells by decree.

EMPLOYMENT

- . The plans show housing construction but little building for employment; perhaps this is because there is minimal profit in this type of building as opposed to housing which commands a premium. Most of the employment in Paddock Wood is warehousing and storage, with a little light industry, and very little office space. Warehousing offers a very limited number of jobs so where are all these new people going to work? Tunbridge Wells Borough Council are not doing anything to stimulate employment in the Paddock Wood area so why is a huge increase in housing being proposed as there is no demand for people to move here?
- . New buyers may well have to commute to London and hence the development of a thriving community in Paddock Wood may only become another commuter town and part of an ugly urban sprawl.

TRAFFIC

- . A recent inspection of the new development at Mascall's Court Farm (the most advanced) indicates that occupied houses have one and two cars. This means maybe three hundred further cars already into the local traffic systems. The effect therefore of 3,500 new houses in the West Paddock Wood / East Capel could lead to a further 5,000 vehicles. Buses and cycle lanes are good but as soon as substantial supermarket shopping is required a car is essential. People will

slowly change habits and attitudes, but cars will remain essential to buyers of these houses as the distance to the shops is too far to walk with shopping. Our supermarket carpark is always full now and it will be overwhelmed with so many more cars.

- . The nonsensical proposal to close the main east/west through route to all but buses in order to “force” people to walk beggars’ belief! We have an ambulance Make Ready Depot in Eldon Way, north of the railway bridge, and ambulances are regularly dispatched on emergency calls from the depot – despite a planning ruling stating that they must not. For residents north of the railway bridge a short journey into the centre of Paddock Wood would, with this proposal, result in a journey of some many miles and all the resultant particulates being emitted into the air. Heavy goods lorries will be forced to use small and unsuitable roads around the town for access and this will cause untold disruption to the residents of these small lanes. Residents of out-lying villages will all be deterred from coming to Paddock Wood because of the difficulties that this closure would cause and force them to make longer journeys further afield for their shopping.
- . This same document states that Old Kent Road is a “through road” when it is a narrow one-way road, unsuitable for anything other than light traffic.
- . The proposal to remove parking in the centre of Paddock Wood to “make it look more attractive” will effectively kill all the current small business who thrive there. As part of the Covid road closure schemes, Commercial Road was closed to through traffic which resulted in disabled drivers not being able to access shops, delivery vehicles being unable to supply the supermarkets and a marked drop in shoppers to all the local businesses. The Town Council successfully appealed against it to Kent County Council, and it was rescinded.
- . There are many existing pinch points to traffic flow on the Maidstone Road both to the south of the rail bridge by Evernden cycle shop and Tom Bell fish and chip shop and to the north by the Aycliffe dentist and residential properties. The proposed significant developments will have a huge increased traffic load on this vital link to the centre of Paddock Wood. Large articulated lorries currently use the road north of the railway where it is very narrow, to enter the Eldon Way industrial estate and then past the “back” way into Transfesa. Vehicles over 7.5t regularly cross the railway bridge contrary to the road sign. If this Local Plan is given approval, then as part of the infrastructure, a new road must be constructed to take the heavy vehicles away from these narrow pinch-points and residential properties.
- . There are no plans in the proposed Local Plan to improve roads other than a by-pass of Five Oak Green which was the cheapest option by creating a new road from Capel Hill towards Tonbridge, off an already busy road to Pembury. The Health and Safety of the local population is not being considered as young children and adults will be exposed to massive traffic dangers and air pollution which will blight their lives.
- . If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . We would welcome the 20-mph speed limit as no traffic, other than a very occasional vehicle, keeps within the 30mph limit on Maidstone Road the B2160 and it feels very dangerous waking on the pavement so close to speeding traffic. There has not been a speed check on vehicles by police in recent memory whereas it used to be checked maybe 2-3 times per year and was an effective measure. Police presence is rare unless there is a road accident and a recent attempt to contact a local PCSO proved almost impossible. If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . The County Police Commissioner states a significant increase in police numbers but they are not being deployed in Paddock Wood/East Capel as there is no evidence of their presence. Our police station has been sold for re-development and we must telephone a station 8 miles away if we need a policeman: Paddock Wood effectively has no police presence.

In conclusion the proposed Local Plan is an unmitigated disaster for Paddock Wood/East Capel residents on so many grounds, and if it is approved our quality of life will suffer greatly over many years. Commercial interests have been allowed to influence the planners to such a degree that there the needs of the residents have been completely subsumed: please do not permit this to happen.

Michèle Sinclair

Paddock Wood residents' Association.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Will it be “consultants” employed by the above to provide the desired answers? Specific people are taking the decisions and those people must be accountable for any future flooding.
- . The Maidstone Road surface water drain is overloaded whenever heavy rain occurs. The solution to the regular flooding of the junction of Nursery Road and Eldon Way was to lay a new relief pipe from the flooding area in a westerly direction to the nearest fluvial take away stream. This will be effective as long as the water level in that stream allows flow and no reverse flow occurs. This was clearly the cheapest option and has been successful to date but not when new housing overloads that stream with substantially more run-off.
- . Very localised flooding has occurred in the past when water courses under roads have become blocked in times of high rainfall. Often there is considerable reduction in flow capability by small pipe diameters and inevitably these will be blocked by floating obstacles carried by the fast water flows. Housing to the north and north west of Paddock Wood is regularly threatened with flooding – I give the Environment Agency warnings as evidence.
- . The wooded area of land absorbs a substantial amount of water – I offer evidence with the Environment Agency’s maps showing where Flood Zone 3 merges into Flood Zone 2 where the land is heavily wooded: crops and trees soak up water, but concrete does not.

INFRASTRUCTURE

- . Paddock Wood has three major housing developments in progress – Mascall’s Court Farm, Mascall’s Farm and Church Road, which will add approximately 800 new houses with the option on these sites of a further 360. There have been no infrastructure changes coming from this current expansion so that the current residents can live their lives without increased difficulties due to the expected population increase. The Borough Council “infrastructure first” political statement has not been followed through, nor will it be as commercial interests are being allowed to dominate. Tunbridge Wells Borough Council has failed to offer any financial support to improve the infrastructure from current developments, with the likely 3,000 extra population.
- . Our bus service to surrounding local towns is woefully inadequate and has been severely cut in recent times and so all the new residents of the current developments will be car users of necessity.
- . The existing medical centre already struggles to cope, with no doctor working a 5- day week from choice. The Borough Council cannot force commercial interests to build another medical centre, despite the Medical Commissioning Team saying that a further centre will be needed. Often only locum doctors are available for residents with no continuity of care and the difficulties for all local residents of getting appointments.
- . Foul effluent capacity has been reached with new housing to the east of the town in some cases having to install cess pit collection. The pumping station has been at capacity for many years and simply limps along. One can foresee in times of high rainfall the effluent treatment plant for Paddock Wood overflowing raw sewage directly into the Medway without substantial investment.
- . Southern Water said some years ago that the Paddock Wood Pumping Station was at capacity: a proposed foul water ring main for Paddock Wood has **not** materialised. Southern Water has recently conducted an “internal review of modelling processes and standards” as an alternative to installing a Pumping Station and Rising Main and decided that their previous model was out of date and that a further 246 properties at Church Road can now be added to the drainage system. Modelling can produce almost whatever outcome the modeller desires, but this solution of course is so much more cost effective than building what is desperately required for Paddock Wood. When it is completely overwhelmed by heavy rainfall, we run the real risk of raw sewage flowing into our homes and streets because of this irresponsible modelling. There has been localised flooding in the Church Road area on several occasions and allowing these properties to connect to the network is a recipe for disaster. To accommodate the other new properties currently being built, Southern Water further propose putting holding tanks for sewage in Ringden Avenue which is archaic in this day and age, but it is a cheap solution. A new Pumping Station is required for all the new properties currently being built and most certainly before any other development is permitted.
- . Kent County Council refused to fund provision of a new primary school to coincide with the 3000 extra population expected with the current expansion in progress as it was not “required.” KCC

knows that it will be cheaper to provide extra Portakabins and another teacher on the existing primary school site and infill at all local primary schools. New schooling will have to be put in early within this proposed development project to improve infrastructure but needs to be funded and developers will not put in funding when houses are not sold.

- . Social Care has been significantly reduced in Paddock Wood, there is no care home for the elderly – Capel Grange is the nearest facility, and other facilities for the elderly are non-existent. The few child-care facilities are full and only one has purpose-built accommodation.
- . Carbon fibre networks are not widely available to existing houses for rapid internet service which will deter anyone working from home and thus put further pressure on the need to commute with over-crowded trains.
- . Fresh water supply will be an issue as it is noticeable that supply line pressure is dropping with the impact of demand from new housing taking its toll. This will require more investment from S.E. Water / Southern Water and / or the developers and they all seem to be extremely reluctant to make any sort of commitment.
- . In summary, infrastructure will be the last thing addressed based on historical performance and all the current residents of Paddock Wood will be made to suffer for many, many years to come.

FOOD SECURITY AND BIO-DIVERSITY

- . We have seen with Brexit, that the trading of goods and vaccine supplies across our borders is very susceptible to disruption. It is essential therefore, for our small island to be more self-sufficient. This proposal removes hundreds of acres of arable land from the food supply chain and that must not be permitted: one of the farms in question was mentioned in the Domesday Book.
- . There are large swathes of wooded areas under this threat and some are ancient woodlands, e.g. Whetsted Wood. Currently we have a wonderfully bio-diverse area with a vast variety of wildlife, from bats to badgers to foxes to hedgehogs to dormice etc. plus a significant array of birdlife including owls, woodpeckers, herons, hawks, buzzards, kingfishers, cuckoos, little egrets, and the more common garden birds regularly seen. The land is home to wood anemones, bluebells, wild garlic, lady's smock and many other plants too numerous to mention. Residents have witnessed the current developers cutting down trees with nesting birds and with preservation orders, demolishing bat habitats and more - Tunbridge Wells Borough Council Officers have not protected these trees and the wildlife, which gives no comfort in their future actions. When commercial interests hold sway, biodiversity is completely ignored, and it must be protected for our future and our children's future.
- . Much of the area earmarked for this development has been used for informal recreation for many decades and it has never been more important than during this last 18 months of the pandemic when it was so important to exercise outside. Areas of open land available for recreation and dog walking are rapidly disappearing. The developers are paying lip-service to "green spaces": we already have delightful green spaces and do not need to have any manufactured spaces, and do not need our current spaces covered in concrete with houses, roads and the like.
- . Housing must be built using methods and materials at low or zero carbon input but there appear to be no clear guidelines for developers. The current new housing developments in Paddock Wood are not incorporating low energy methods of heat pumps and solar cells by decree.

EMPLOYMENT

- . The plans show housing construction but little building for employment; perhaps this is because there is minimal profit in this type of building as opposed to housing which commands a premium. Most of the employment in Paddock Wood is warehousing and storage, with a little light industry, and very little office space. Warehousing offers a very limited number of jobs so where are all these new people going to work? Tunbridge Wells Borough Council are not doing anything to stimulate employment in the Paddock Wood area so why is a huge increase in housing being proposed as there is no demand for people to move here?
- . New buyers may well have to commute to London and hence the development of a thriving community in Paddock Wood may only become another commuter town and part of an ugly urban sprawl.

TRAFFIC

- . A recent inspection of the new development at Mascall's Court Farm (the most advanced) indicates that occupied houses have one and two cars. This means maybe three hundred further cars already into the local traffic systems. The effect therefore of 3,500 new houses in the West Paddock Wood / East Capel could lead to a further 5,000 vehicles. Buses and cycle lanes are good but as soon as substantial supermarket shopping is required a car is essential. People will

slowly change habits and attitudes, but cars will remain essential to buyers of these houses as the distance to the shops is too far to walk with shopping. Our supermarket carpark is always full now and it will be overwhelmed with so many more cars.

- . The nonsensical proposal to close the main east/west through route to all but buses in order to “force” people to walk beggars’ belief! We have an ambulance Make Ready Depot in Eldon Way, north of the railway bridge, and ambulances are regularly dispatched on emergency calls from the depot – despite a planning ruling stating that they must not. For residents north of the railway bridge a short journey into the centre of Paddock Wood would, with this proposal, result in a journey of some many miles and all the resultant particulates being emitted into the air. Heavy goods lorries will be forced to use small and unsuitable roads around the town for access and this will cause untold disruption to the residents of these small lanes. Residents of out-lying villages will all be deterred from coming to Paddock Wood because of the difficulties that this closure would cause and force them to make longer journeys further afield for their shopping.
- . This same document states that Old Kent Road is a “through road” when it is a narrow one-way road, unsuitable for anything other than light traffic.
- . The proposal to remove parking in the centre of Paddock Wood to “make it look more attractive” will effectively kill all the current small business who thrive there. As part of the Covid road closure schemes, Commercial Road was closed to through traffic which resulted in disabled drivers not being able to access shops, delivery vehicles being unable to supply the supermarkets and a marked drop in shoppers to all the local businesses. The Town Council successfully appealed against it to Kent County Council, and it was rescinded.
- . There are many existing pinch points to traffic flow on the Maidstone Road both to the south of the rail bridge by Evernden cycle shop and Tom Bell fish and chip shop and to the north by the Aycliffe dentist and residential properties. The proposed significant developments will have a huge increased traffic load on this vital link to the centre of Paddock Wood. Large articulated lorries currently use the road north of the railway where it is very narrow, to enter the Eldon Way industrial estate and then past the “back” way into Transfesa. Vehicles over 7.5t regularly cross the railway bridge contrary to the road sign. If this Local Plan is given approval, then as part of the infrastructure, a new road must be constructed to take the heavy vehicles away from these narrow pinch-points and residential properties.
- . There are no plans in the proposed Local Plan to improve roads other than a by-pass of Five Oak Green which was the cheapest option by creating a new road from Capel Hill towards Tonbridge, off an already busy road to Pembury. The Health and Safety of the local population is not being considered as young children and adults will be exposed to massive traffic dangers and air pollution which will blight their lives.
- . If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . We would welcome the 20-mph speed limit as no traffic, other than a very occasional vehicle, keeps within the 30mph limit on Maidstone Road the B2160 and it feels very dangerous waking on the pavement so close to speeding traffic. There has not been a speed check on vehicles by police in recent memory whereas it used to be checked maybe 2-3 times per year and was an effective measure. Police presence is rare unless there is a road accident and a recent attempt to contact a local PCSO proved almost impossible. If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . The County Police Commissioner states a significant increase in police numbers but they are not being deployed in Paddock Wood/East Capel as there is no evidence of their presence. Our police station has been sold for re-development and we must telephone a station 8 miles away if we need a policeman: Paddock Wood effectively has no police presence.

In conclusion the proposed Local Plan is an unmitigated disaster for Paddock Wood/East Capel residents on so many grounds, and if it is approved our quality of life will suffer greatly over many years. Commercial interests have been allowed to influence the planners to such a degree that there the needs of the residents have been completely subsumed: please do not permit this to happen.

Michèle Sinclair

Paddock Wood residents' Association.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Michele Sinclair [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Michele Sinclair [REDACTED]
Comment ID	PSLP_354
Response Date	24/05/21 14:55
Consultation Point	Policy STR/PW 1 The Strategy for Paddock Wood (View)
Status	Processed
Submission Type	Web
Version	0.2
Question 1	
Respondent's Name and/or Organisation	Michele Sinclair Paddock Wood Residents' Association
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS1 Strategy for Paddock Wood, including land at east Capel	
STR/SS2	
STR/PW1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My name is Michele Sinclair and I have been a resident of Paddock Wood since 1983. I am now retired but was Headteacher of Sackville School, Hildenborough, for 14 years prior to retirement.

I am the Chair of Paddock Wood Residents' Association, the Chair of Paddock Wood University of the Third Age - the largest community group in Paddock Wood and I am a member of Paddock Wood Flower Club. I have been involved in a number of different local associations over the years. I have brought my children up in Paddock Wood and they both attended Paddock Wood Primary School and then Bennett Memorial School, Tunbridge Wells.

As a long term resident of a small rural town I am most concerned at the impact that these vast changes will have on all residents, their children and visitors to the town.

I am not qualified to make any statement on the legality of the plan or whether it is compliant, however, I am qualified to make statements on the soundness of it.

FAIRNESS AND BALANCE

- . This proposal has been rushed through during lockdown when residents were only permitted to leave their homes for essential journeys; communication and consultation with the local population during the pandemic and lockdown has been minimal. Therefore, there is probably little realisation in many of the population of the impact this further planned town expansion will have on their lives during construction and beyond.
- . Many people do not have access to computers and those without internet access were invited to "make an appointment at Tunbridge Wells Borough Council to view the plan" - as we were under government rules not to venture from our homes, this was both disingenuous and against government rules. Our Library has been closed since March 2020 because of Covid so no-one could use the computing facilities in it.
- . As a result of this lack of proper consultation during the pandemic, organised opposition has been extremely difficult, therefore, this development must not proceed before a mass meeting of Paddock Wood and East Capel residents is called to explain the plans and to satisfactorily allay the many serious concerns that residents have, and any final decisions must be postponed so that a full and proper consultation can take place.
- . The Plan contains many hundreds of pages, written in almost unintelligible language with much repetition. No layman, no matter how concerned, can be expected to understand all the technical details, or to plough through so many hundreds of pages of such turgid prose, when with the best will in the world, it is not understood.
- . The borough of Tunbridge Wells is large, yet thousands of houses are proposed for a small area of the borough, which is neither fair nor equitable. Paddock Wood currently has three housing development sites in construction: it would be more sensible to see how these 1,000 extra houses,

people and cars settle in before any more major developments are permitted. Paddock Wood Town Council voted against the plans but were overridden by the Borough Council. Our town will more than double in size in this plan is approved and materially alter all our way of life.

- . Most of this proposed development is in Green Belt or Flood Zone and no Brown Field sites have been identified in it at all. Clearly it is more cost effective for developers to build from scratch, but it is much better to build on Brown Field sites first. Why have no Brown Field sites been identified?

JUSTIFICATION

- . The railway station at Paddock Wood has been stated as a major factor for the location of this development but when one sees the numbers of cars now in the station car parks this must be seriously questioned and the station should not be a major factor in decision making for such a massive development, nor justify a need for the expansion into green belt, flood zones and destroying prime arable land. Our rail station has a good service into London, however, the trains come up from the coast, stopping at many places, so that by the time they reach Paddock Wood they are virtually full and by Tonbridge, the next station up, it is standing room only: Southern Rail have no plans to increase capacity on the line.
- . There is a reasonable up-take of property currently under construction to the east of the town, but many more homes are still under construction and some time from release to potential buyers. Based on house prices on these new developments under construction it is unlikely that any could be considered affordable for first time buyers from Kent.
- . The national birth-rate is falling and government plans to restrict immigration to those with the skills needed in the workplace will also have an effect to decrease the future population. Where is the justification for this level of housing?
- . The Office for National Statistics' data for future housing requirements is in error in Coventry, and therefore the numbers planned/required must be seriously questioned for our area.

FLOOD RISK

- . The main objection to the proposals in the Paddock Wood / East Capel area is that land is in designated Flood Zones 2 or 3 and is likely to be inundated by river and water courses, witnessed by many Environmental Agency flood alerts over the last and many previous Winters. The borough council agreed with this information in the last Local Plan 2016 and designated much of the area now proposed for development as "unsuitable for development" because of the flooding risk. No major flood alleviation has been carried out since so the position cannot be reversed now for the sake of expediency.
- . Currently the land in question is largely used for agriculture or is wooded. In this state the land can absorb large quantities of rainwater into the water table above clay, with run-off available into water courses such as Tudeley Brook and streams unnamed when the land is saturated. It is estimated that the construction of 3,500 properties in the area will reduce the capability to drain naturally by at least 75% due to the footprint of the housing, drives, pathways, cycle tracks, parking areas, current industrial sites, and roads to be constructed. The run-off from the developments will have to drain into the existing water courses leading to a significantly increased risk of flooding of all housing in the area to the west and north west of Paddock Wood.
- . Mitigation, such as allowing water to be accommodated in a new lake to take surface water can seem to give an "appealing" environment as a paper exercise; if the lake is not allowed to fill it will be very unsightly in an urban situation, and when that lake becomes full where does the excess water go? Evaporation rates will be minimal, and it is known that severe weather events are likely to become more frequent and to cause much more flooding as Climate Change continues to occur in the future. Developers must indicate examples of similar developments in flood prone areas where mitigation has proved successful by the methods proposed and calculations should be checked by an "independent authority" which is not under the pressure to build housing: a Strategic Flood Risk Assessment must be carried out by an independent person and not one influenced by a desired outcome, as risk assessments are necessarily subjective and therefore potentially biased. The Environmental Agency must update their assessments based on the proposed new developments.
- . "Betterment" of the existing flood risks to property is required before any new schemes are considered.
- . Currently house holders in the areas of this development can get insurance cover, at a premium, based on historical data of flooding, despite the Environmental Agency's area classifications.

After building 3,500 houses in the designated flood zones, houses may well become uninsurable against flooding risk. Has the borough council consulted insurers on this issue?

- . If the development is completed and flooding occurs, as expected, with the losses to property and potentially human life, who will be held responsible for the decision to build in Flood Zones 2 and 3? Will it be the head of Planning at Tunbridge Wells Borough Council? Will it be the developers responsible for the construction? Will it be “consultants” employed by the above to provide the desired answers? Specific people are taking the decisions and those people must be accountable for any future flooding.
- . The Maidstone Road surface water drain is overloaded whenever heavy rain occurs. The solution to the regular flooding of the junction of Nursery Road and Eldon Way was to lay a new relief pipe from the flooding area in a westerly direction to the nearest fluvial take away stream. This will be effective as long as the water level in that stream allows flow and no reverse flow occurs. This was clearly the cheapest option and has been successful to date but not when new housing overloads that stream with substantially more run-off.
- . Very localised flooding has occurred in the past when water courses under roads have become blocked in times of high rainfall. Often there is considerable reduction in flow capability by small pipe diameters and inevitably these will be blocked by floating obstacles carried by the fast water flows. Housing to the north and north west of Paddock Wood is regularly threatened with flooding – I give the Environment Agency warnings as evidence.
- . The wooded area of land absorbs a substantial amount of water – I offer evidence with the Environment Agency’s maps showing where Flood Zone 3 merges into Flood Zone 2 where the land is heavily wooded: crops and trees soak up water, but concrete does not.

INFRASTRUCTURE

- . Paddock Wood has three major housing developments in progress – Mascall’s Court Farm, Mascall’s Farm and Church Road, which will add approximately 800 new houses with the option on these sites of a further 360. There have been no infrastructure changes coming from this current expansion so that the current residents can live their lives without increased difficulties due to the expected population increase. The Borough Council “infrastructure first” political statement has not been followed through, nor will it be as commercial interests are being allowed to dominate. Tunbridge Wells Borough Council has failed to offer any financial support to improve the infrastructure from current developments, with the likely 3,000 extra population.
- . Our bus service to surrounding local towns is woefully inadequate and has been severely cut in recent times and so all the new residents of the current developments will be car users of necessity.
- . The existing medical centre already struggles to cope, with no doctor working a 5- day week from choice. The Borough Council cannot force commercial interests to build another medical centre, despite the Medical Commissioning Team saying that a further centre will be needed. Often only locum doctors are available for residents with no continuity of care and the difficulties for all local residents of getting appointments.
- . Foul effluent capacity has been reached with new housing to the east of the town in some cases having to install cess pit collection. The pumping station has been at capacity for many years and simply limps along. One can foresee in times of high rainfall the effluent treatment plant for Paddock Wood overflowing raw sewage directly into the Medway without substantial investment.
- . Southern Water said some years ago that the Paddock Wood Pumping Station was at capacity: a proposed foul water ring main for Paddock Wood has **not** materialised. Southern Water has recently conducted an “internal review of modelling processes and standards” as an alternative to installing a Pumping Station and Rising Main and decided that their previous model was out of date and that a further 246 properties at Church Road can now be added to the drainage system. Modelling can produce almost whatever outcome the modeller desires, but this solution of course is so much more cost effective than building what is desperately required for Paddock Wood. When it is completely overwhelmed by heavy rainfall, we run the real risk of raw sewage flowing into our homes and streets because of this irresponsible modelling. There has been localised flooding in the Church Road area on several occasions and allowing these properties to connect to the network is a recipe for disaster. To accommodate the other new properties currently being built, Southern Water further propose putting holding tanks for sewage in Ringden Avenue which is archaic in this day and age, but it is a cheap solution. A new Pumping Station is required for all the new properties currently being built and most certainly before any other development is permitted.
- . Kent County Council refused to fund provision of a new primary school to coincide with the 3000 extra population expected with the current expansion in progress as it was not “required.” KCC

knows that it will be cheaper to provide extra Portakabins and another teacher on the existing primary school site and infill at all local primary schools. New schooling will have to be put in early within this proposed development project to improve infrastructure but needs to be funded and developers will not put in funding when houses are not sold.

- . Social Care has been significantly reduced in Paddock Wood, there is no care home for the elderly – Capel Grange is the nearest facility, and other facilities for the elderly are non-existent. The few child-care facilities are full and only one has purpose-built accommodation.
- . Carbon fibre networks are not widely available to existing houses for rapid internet service which will deter anyone working from home and thus put further pressure on the need to commute with over-crowded trains.
- . Fresh water supply will be an issue as it is noticeable that supply line pressure is dropping with the impact of demand from new housing taking its toll. This will require more investment from S.E. Water / Southern Water and / or the developers and they all seem to be extremely reluctant to make any sort of commitment.
- . In summary, infrastructure will be the last thing addressed based on historical performance and all the current residents of Paddock Wood will be made to suffer for many, many years to come.

FOOD SECURITY AND BIO-DIVERSITY

- . We have seen with Brexit, that the trading of goods and vaccine supplies across our borders is very susceptible to disruption. It is essential therefore, for our small island to be more self-sufficient. This proposal removes hundreds of acres of arable land from the food supply chain and that must not be permitted: one of the farms in question was mentioned in the Domesday Book.
- . There are large swathes of wooded areas under this threat and some are ancient woodlands, e.g. Whetsted Wood. Currently we have a wonderfully bio-diverse area with a vast variety of wildlife, from bats to badgers to foxes to hedgehogs to dormice etc. plus a significant array of birdlife including owls, woodpeckers, herons, hawks, buzzards, kingfishers, cuckoos, little egrets, and the more common garden birds regularly seen. The land is home to wood anemones, bluebells, wild garlic, lady's smock and many other plants too numerous to mention. Residents have witnessed the current developers cutting down trees with nesting birds and with preservation orders, demolishing bat habitats and more - Tunbridge Wells Borough Council Officers have not protected these trees and the wildlife, which gives no comfort in their future actions. When commercial interests hold sway, biodiversity is completely ignored, and it must be protected for our future and our children's future.
- . Much of the area earmarked for this development has been used for informal recreation for many decades and it has never been more important than during this last 18 months of the pandemic when it was so important to exercise outside. Areas of open land available for recreation and dog walking are rapidly disappearing. The developers are paying lip-service to "green spaces": we already have delightful green spaces and do not need to have any manufactured spaces, and do not need our current spaces covered in concrete with houses, roads and the like.
- . Housing must be built using methods and materials at low or zero carbon input but there appear to be no clear guidelines for developers. The current new housing developments in Paddock Wood are not incorporating low energy methods of heat pumps and solar cells by decree.

EMPLOYMENT

- . The plans show housing construction but little building for employment; perhaps this is because there is minimal profit in this type of building as opposed to housing which commands a premium. Most of the employment in Paddock Wood is warehousing and storage, with a little light industry, and very little office space. Warehousing offers a very limited number of jobs so where are all these new people going to work? Tunbridge Wells Borough Council are not doing anything to stimulate employment in the Paddock Wood area so why is a huge increase in housing being proposed as there is no demand for people to move here?
- . New buyers may well have to commute to London and hence the development of a thriving community in Paddock Wood may only become another commuter town and part of an ugly urban sprawl.

TRAFFIC

- . A recent inspection of the new development at Mascall's Court Farm (the most advanced) indicates that occupied houses have one and two cars. This means maybe three hundred further cars already into the local traffic systems. The effect therefore of 3,500 new houses in the West Paddock Wood / East Capel could lead to a further 5,000 vehicles. Buses and cycle lanes are good but as soon as substantial supermarket shopping is required a car is essential. People will

slowly change habits and attitudes, but cars will remain essential to buyers of these houses as the distance to the shops is too far to walk with shopping. Our supermarket carpark is always full now and it will be overwhelmed with so many more cars.

- . The nonsensical proposal to close the main east/west through route to all but buses in order to “force” people to walk beggars’ belief! We have an ambulance Make Ready Depot in Eldon Way, north of the railway bridge, and ambulances are regularly dispatched on emergency calls from the depot – despite a planning ruling stating that they must not. For residents north of the railway bridge a short journey into the centre of Paddock Wood would, with this proposal, result in a journey of some many miles and all the resultant particulates being emitted into the air. Heavy goods lorries will be forced to use small and unsuitable roads around the town for access and this will cause untold disruption to the residents of these small lanes. Residents of out-lying villages will all be deterred from coming to Paddock Wood because of the difficulties that this closure would cause and force them to make longer journeys further afield for their shopping.
- . This same document states that Old Kent Road is a “through road” when it is a narrow one-way road, unsuitable for anything other than light traffic.
- . The proposal to remove parking in the centre of Paddock Wood to “make it look more attractive” will effectively kill all the current small business who thrive there. As part of the Covid road closure schemes, Commercial Road was closed to through traffic which resulted in disabled drivers not being able to access shops, delivery vehicles being unable to supply the supermarkets and a marked drop in shoppers to all the local businesses. The Town Council successfully appealed against it to Kent County Council, and it was rescinded.
- . There are many existing pinch points to traffic flow on the Maidstone Road both to the south of the rail bridge by Evernden cycle shop and Tom Bell fish and chip shop and to the north by the Aycliffe dentist and residential properties. The proposed significant developments will have a huge increased traffic load on this vital link to the centre of Paddock Wood. Large articulated lorries currently use the road north of the railway where it is very narrow, to enter the Eldon Way industrial estate and then past the “back” way into Transfesa. Vehicles over 7.5t regularly cross the railway bridge contrary to the road sign. If this Local Plan is given approval, then as part of the infrastructure, a new road must be constructed to take the heavy vehicles away from these narrow pinch-points and residential properties.
- . There are no plans in the proposed Local Plan to improve roads other than a by-pass of Five Oak Green which was the cheapest option by creating a new road from Capel Hill towards Tonbridge, off an already busy road to Pembury. The Health and Safety of the local population is not being considered as young children and adults will be exposed to massive traffic dangers and air pollution which will blight their lives.
- . If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . We would welcome the 20-mph speed limit as no traffic, other than a very occasional vehicle, keeps within the 30mph limit on Maidstone Road the B2160 and it feels very dangerous waking on the pavement so close to speeding traffic. There has not been a speed check on vehicles by police in recent memory whereas it used to be checked maybe 2-3 times per year and was an effective measure. Police presence is rare unless there is a road accident and a recent attempt to contact a local PCSO proved almost impossible. If there was a presence of Traffic Wardens and PCSOs in Paddock Wood, then motorists who park illegally on pavements and yellow lines could be dealt with properly to enforce the law.
- . The County Police Commissioner states a significant increase in police numbers but they are not being deployed in Paddock Wood/East Capel as there is no evidence of their presence. Our police station has been sold for re-development and we must telephone a station 8 miles away if we need a policeman: Paddock Wood effectively has no police presence.

In conclusion the proposed Local Plan is an unmitigated disaster for Paddock Wood/East Capel residents on so many grounds, and if it is approved our quality of life will suffer greatly over many years. Commercial interests have been allowed to influence the planners to such a degree that there the needs of the residents have been completely subsumed: please do not permit this to happen.

Michèle Sinclair

Paddock Wood residents' Association.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1

Respondent's Name and/or Organisation	James Singleton
---------------------------------------	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 6 (Transport and Parking)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

While the objectives in the plan around transport (and also climate change) look good, I believe the plan does not provide the actions necessary to meet the objectives laid out in it. For example, there are no plans to build a new railway station at Tudeley Village, which is essential for development to meet objectives at this site. Otherwise there will simply be many more private cars driving into Tonbridge, Paddock Wood or elsewhere. This will have a negative impact on road safety, local air quality and climate change. There are also no detailed plans for public footpaths or segregated cycleways across the proposed Tudeley Village site.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A legally binding commitment to build a new railway station at Tudeley Village before development begins. Detailed plans for public footpaths (perhaps building on existing routes such as the Tunbridge Wells Circular) and segregated cycleways across the proposed Tudeley Village site, linking Tonbridge and Paddock Wood.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

While active travel and public transport are the most important there will inevitably be some private vehicle use and electrification is inevitable. The plans around electric car charging points are light on detail but it is important that they are high-powered and smart so that they can be both fast and flexible to grid demands or generation carbon intensity. A good example is Parc Eirin in Wales (<https://www.parceirin.co.uk/>). Top notch insulation, 3-phase electricity supplies, 22kW+ EV chargers, ground-source heat-pumps, solar panels and not a gas boiler, flue or chimney anywhere on the brownfield site.

Question 3

To which part of the Local Plan does this representation relate?	Policy
--	--------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

AL/LA1

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

If the land to the west of Spray Hill allocation is to be retained:

Policy AL/LA1, opening paragraph: Retention of the landscape buffer to prevent coalescence between Lamberhurst and The Down. The risk of coalescence will be significant unless the retention of the buffer is fully enforced.

Policy AL/LA1, para 2: Whilst there is current vehicle access onto Sand Road as pointed out in para 5.625, this would be inappropriate for access to a development of 25 dwellings. It would severely exacerbate the current issues on Sand Road which is narrow and busy, with pub customer parking and a great deal of conflicting traffic. Access should be to Spray Hill which has good sight lines, light traffic and good capacity.

Policy AL/LA1, paras 4 & 5: Linkages to the two Public Rights of Way mentioned are important and logical. The Policy should however state that provision of additional pedestrian/cycle linkages on the Land should be limited to these two in order to avoid further negative impact on the adjacent conservation area and heritage assets (EN5).

Policy AL/LA1, para 5: The Policy states that "...the location of the PRow that runs through the site and provides a suitable edge to the settlement..." This PRow bisects the part of the land allocated to residential use, so it is unclear that this is referring to a northern edge to the settlement.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

If the land to the west of Spray Hill allocation is to be retained:

Policy AL/LA1, opening paragraph: Modify to make it clear that retention of the landscape buffer should be fully enforced - to avoid its erosion and coalescence by future development.

Policy AL/LA1, para 2: Modify to state that vehicle access should be to Spray Hill and not Sand Road - to ensure optimal traffic management.

Policy AL/LA1, paras 4 & 5: Modify to state that provision of additional pedestrian/cycle linkages on the Land should be limited to the two identified - to avoid further negative impact on the adjacent conservation area and heritage assets (EN5).

Policy AL/LA1, para 5: Modify to make it clear that "...the location of the PRow that runs through the site and provides a suitable northern edge to the settlement..." - to avoid confusion.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

I have lived in Paddock Wood for over 30 years and am acutely aware of issues that affect the local area as result of development.

We have yet to see the effect of the current new developments around Paddock Wood, amounting to over 900+ homes, so increasing the town by a further 2000+ homes would be significantly detrimental:-

Paddock Wood already suffers from flooding affecting existing properties and a massive increase in the number of homes will exacerbate this problem dreadfully. The area of East Capel to the west of Paddock Wood lies on a flood plain so the idea of locating over 2000 here seems ridiculous!! Mitigation measures may be inadequate, have a detrimental effect on existing properties locally or cause problems downstream in East Peckham, Yalding, Golden Green, Tonbridge and elsewhere. Huge amounts of money spent on flood mitigation could result in diverting funds from other essential infrastructure.

There are problems with foul and surface water drainage in Paddock Wood with the current system unable to cope. A further large growth in the number of homes will require significant improvements to the system which should, in my opinion, involve increasing the capacity of the local treatment works as the current proposal to cope with the expected rise in the volume of waste from the 900+ homes currently being built merely involves expanding the pipe network for holding untreated waste.

There is already congestion on the local roads with some already difficult to negotiate due to on road parking and volume of traffic. The proposal for 2000+ homes in addition to the 900+ already being built will increase the number of vehicles in the local area phenomenally, causing horrendous additional congestion on roads that were not designed to accommodate large volumes of traffic and there would be significant detriment to the air quality from vehicle emissions.

The proposal to close Maidstone Road railway bridge to vehicle traffic (except buses) on page 48 of the LCWIP Local Cycling and Walking Infrastructure Plan (LCWIP) Phase 2 - Final Report is ridiculous as it is a key route into Paddock Wood and re-routing traffic along other roads into the town will cause immense congestion.

The area designated for development is Green Belt land specifically set aside for preventing urban sprawl and protecting the rural environment between existing conurbations. I understand that the Inspector's comments on the Site Allocation Local Plan 2016 referred to not accepting a need to allocate any land within Green Belt for development. Adding so much housing will result in the destruction of woodland, hedgerows, meadows, and farmland that should be maintained. It will spoil the landscape and kill wildlife when we should be protecting our environment and its precious biodiversity for future generations. This area should remain rural with agricultural land that can be used to provide food.

Brownfield sites and alternative locations within the borough should be developed and full use of the existing housing stock (ie occupation of ensure vacant properties) before Green Belt land is lost forever. With the increase in working from home the conversion of vacant office space to dwellings should be considered. Surely it would be more appropriate to focus on regenerating Tunbridge Wells town centre before destroying the beautiful countryside around Paddock Wood.

Tunbridge Wells BC do not appear to have addressed the concerns and objections raised by residents and responders to the Regulation 18 consultation in relation to the extent of housing proposed for Paddock Wood.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Paddock Wood for over 30 years and am acutely aware of issues that affect the local area as result of development.

There is already congestion on the local roads, especially en route through Capel to Tonbridge, and the B2017 at the green in Five Oak Green is particularly difficult to negotiate due to on road parking and volume of traffic. The proposal to create a new settlement, 'Tudeley Village', will increase the number of vehicles in the local area phenomenally, causing horrendous additional congestion on roads that were not designed to accommodate large volumes of traffic and there would be significant detriment to the air quality from vehicle emissions. This would be further exacerbated if the proposals for more quarrying in Capel Parish go ahead with not only lorries and other large vehicles from construction sites but also the long-term activity of heavy vehicles engaged in the movement of sand and gravel. In my opinion the infrastructure cannot cope with this and local roads will be wrecked!!!

Capel parish has suffered from flooding and a massive increase in the number of homes will exacerbate this problem dreadfully.

The building of 2800 homes in a parish that contains less than 1000 dwellings is grossly disproportionate. The area is Green Belt land specifically set aside for preventing urban sprawl and protecting the rural environment between existing conurbations. I understand that the Inspector's comments on the Site Allocation Local Plan 2016 referred to not accepting a need to allocate any land within Green Belt for development. Adding so much housing in Capel Parish will result in the destruction of woodland, hedgerows, meadows, and farmland that should be maintained. It will spoil the landscape and kill wildlife when we should be protecting our environment and its precious biodiversity for future generations. This area should remain rural with agricultural land that can be used to provide food.

Brownfield sites and alternative locations within the borough should be developed and full use of the existing housing stock (ie occupation of ensure vacant properties) before Green Belt land is lost forever. With the increase in working from home the conversion of vacant office space to dwellings should be considered. Surely it would be more appropriate to focus on regenerating Tunbridge Wells town centre before destroying the beautiful countryside of Capel Parish. It cannot be appropriate that Tunbridge Wells BC expect to put more than 50% of new homes for the borough into only one of its 20 wards. I therefore feel that the proposal for a new settlement (Tudeley Village) is NOT justified!!!

Tunbridge Wells BC do not appear to have addressed the concerns and objections raised by residents and responders to the Regulation 18 consultation in relation to the extent of housing proposed for Capel Parish.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
PSTR/SP1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy PSTR/SP1 is not justified as it will involve development on a site designated as an AONB allowable only in exceptional circumstances, which have not been demonstrated in policy PSTR/SP1. I do not believe the benefits of developing this land outweigh the damage that it will cause to our natural environment. Reference is made in 5.800 to a TPO on six trees located on the eastern frontage of the site, stating the trees are expected to be retained. The continued existence of these trees should be guaranteed. Policy PSTR/SP1 will involve an increase in traffic on a dangerous stretch of road. Policy PSTR/SP1 is ineffective as the strategies proposed to improve youth play areas, allotments and recreation space in AL/SP2 will have little real world benefit to the residents of Speldhurst. Residents would be required to travel by car or cycle down country lanes to access them. Policy PSTR/SP1 is further flawed if reference is made to National Planning Policy documents which state that suitable locations for development should take account of "sufficient access to services and employment opportunities" and that "a sufficient choice of school places is available to meet the needs of existing and new communities" and that the area is "well served by public transport". Speldhurst has very limited employment opportunities and access to services. The village shop is community run and its future is not necessarily guaranteed. Speldhurst CEP School is at full capacity. Speldhurst is a semi rural village with no cycle routes or realistic prospect of them. The village is not well served by public transport as is identified in the overview paragraph 5.788. The current Doctor's practice is housed in a building that would not allow for any expansion. Speldhurst clearly does not have the infrastructure to support this development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I do not believe any modifications can be made to make this development sound, effective or justified.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Graham Smith-Tilley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/SP1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	.	It is not effective
	.	It is not justified
	.	It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The indicative access detailed on this map is on a dangerous stretch of road where cars already routinely ignore speed restrictions, with dangerous overtaking a frequent occurrence. The visibility splays are insufficient and the TPOs on six trees further reduce this. The National Planning Policy Framework states that "transport issues should be considered at the earliest stages of plan making". I do not believe this to have been the case. Any traffic calming measures would urbanise a rural area and have a detrimental effect on the approach to the historic village of Speldhurst.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposed access to this site is problematic and I do not believe mitigation measures will be able to overcome the dangers caused by accessing the site on a bend, with restricted sight lines. Point 2 refers to traffic calming measures that will be needed. This will urbanise the approach to the historic village of Speldhurst referred to in point 4 which is unacceptable.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Policy PSTR/SP1 is not justified as it will involve development on a site designated as an AONB allowable only in exceptional circumstances, which have not been demonstrated in policy PSTR/SP1. I do not believe the benefits of developing this land outweigh the damage that it will cause to our natural environment. Reference is made in 5.800 to a TPO on six trees located on the eastern frontage of the site, stating the trees are expected to be retained. The continued existence of these trees should be guaranteed.

Policy PSTR/SP1 will involve an increase in traffic on a dangerous stretch of road.

Policy PSTR/SP1 is ineffective as the strategies proposed to improve youth play areas, allotments and recreation space in AL/SP2 will have little real world benefit to the residents of Speldhurst. Residents would be required to travel by car or cycle down country lanes to access them.

Policy PSTR/SP1 is further flawed if reference is made to National Planning Policy documents which state that suitable locations for development should take account of "sufficient access to services and employment opportunities" and that "a sufficient choice of school places is available to meet the needs of existing and new communities" and that the area is "well served by public transport". Speldhurst has very limited employment opportunities and access to services. The village shop is community run and its future is not necessarily guaranteed. Speldhurst CEP School is at full capacity. Speldhurst is a semi rural village with no cycle routes or realistic prospect of them. The village is not well served by public transport as is identified in the overview paragraph 5.788. The current Doctor's practice is housed in a building that would not allow for any expansion. Speldhurst clearly does not have the infrastructure to support this development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. Having grown up in Tonbridge, I have lived in Five Oak Green for 27 years with my husband and we raised our two daughters here. Not only is it a wonderful, caring community, but its proximity to countryside and walks make it a wonderful place in which to live.

The plan to build on the land at East Capel seems disastrous to me for the following reasons:

- 1 It is Green Belt land which should only be built on in "exceptional circumstances". TWBC's own assessment in their Sustainability Appraisal show that Paddock Wood can expand and meet most of the plan's aims without using the Green Belt land at East Capel.
- 2 It would effectively mean Five Oak Green merges into Paddock Wood, depriving the village of its own identity and character.
- 3 Whenever we have substantial rain, the sewers in the village cannot cope and pumping lorries are required to try to prevent floods and damage to properties and gardens. The land at East Capel forms part of the flood plain, so this situation would only get worse.
- 4 The plans to build at East Capel, together with the Tudeley village mean that half of the housing needs of Tunbridge Wells borough would be built in this parish of 913 homes.
- 5 Over the years, as the population has increased, the traffic flow has become worse with the village being used as a 'rat run' particularly at peak times. These rural roads would simply not be able to cope with the increased traffic such a development would bring.

There is a huge campaign against these proposals and I do not feel that Tunbridge Wells Borough Council have listened to its residents (the people they are supposed to represent) and the many comments and objections made during Reg 18.

Having grown up in Tonbridge, I have lived in Five Oak Green for 27 years with my husband and we raised our two daughters here. Not only is it a wonderful, caring community, but its proximity to countryside and walks makes it a wonderful place in which to live.

For me, part of the beauty of driving out of Tonbridge towards Five Oak Green are the fabulous views over fields and farmland towards Hadlow, the very fields that would disappear if this development went ahead.

The land designated for the Tudeley village is part of the flood plain. Many residents in Five Oak Green have been victim of flooding (last flood February 2020), and have had to move out of their homes whilst they were repaired. Building on the flood plain will only make the situation worse and more frequent. Whenever we have substantial rain, the sewers in the village cannot cope and pumping lorries are required to try to prevent floods and damage to properties and gardens.

Building the Tudeley garden village would effectively mean that Tonbridge/Tudeley/Five Oak Green/Paddock Wood becomes one large urban sprawl and will totally change the character of all these areas. The traffic flow is always congested going into Tonbridge and Tunbridge Wells and this would be exacerbated by these developments and the public transport infrastructure is not equipped to cope with the rise in demand.

The plans, along with those for East Capel mean that half of the housing needs of Tunbridge Wells borough would be built in this parish of 913 homes.

There is a huge campaign against these proposals and I do not feel that Tunbridge Wells Borough Council have listened to its residents (the people they are supposed to represent) and the many comments and objections made during Reg 18.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have lived in Five Oak Green with my family for the past 26 years and have been very happy due to the friendliness and community spirit generated by the whole mix of population number and closeness to both town and country. However, it has slowly been getting busier over time especially the road on which we have lived over this time and I feel that this massive increase in population levels can only make it a lot less attractive place to live. Already there are shortages of school places, doctors, dentists and other amenities for only the slight increase of people.

Another reason I object to such a vast increase in houses and people is the fact that the whole area already has serious flooding issues when we have heavy rain and many of these new houses are planned on the flood plain. Also, we frequently have sewerage problems in the village due to the size and poor condition of the infrastructure.

We really enjoy walking through the countryside and seeing all the varied wildlife around our village which is supposed to be protected by the green belt presently and so I am not sure how TWBC can build on this land.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- ☐ No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- ☐ Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Richard Songhurst
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- ☐ It is not effective
- ☐ It is not justified
- ☐ It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Proposal: Tunbridge Wells Borough Council Pre-Submission Local Plan

South East Water would like to thank Tunbridge Wells Borough Council for bringing the Tunbridge Wells Borough Council Pre-Submission version of its Local Plan to our attention.

Each water company is legally required to prepare a Water Resources Management Plan (WRMP) every five years. South East Water published our WRMP19 in August 2019. This plan sets out how we intend to maintain the balance between increasing demand for water and available supplies over the next 60 years up to 2080. The plan takes into account planned housing growth as well as the potential impact of climate change and includes our ambitious water efficiency programme. For more information please visit our

website:<https://corporate.southeastwater.co.uk/about-us/our-plans/water-resources-management-plan-2019/>

In South East Water's most recent business plan we have committed to play an active role regionally in relation to the impact of housing growth on water. We will develop a policy together with local stakeholders – appreciating the balance of supplying water, the need for society to ensure environmentally sustainable future water resources, and also the ongoing support of the south east region and its economic development. South East Water aims to respond to 100 per cent of all national, local and regional authority consultations and seeks to co-operate and maintain a good working relationship with local planning authorities in its area and to provide the support they need with regards to the provision of water supply infrastructure. Please see our business

plan:https://corporate.southeastwater.co.uk/media/2901/sew_five_year_business_plan_2020-2025.pdf

We are also committed partners in the Water Resources in the South East (WRSE) Group that works for the collective good of customers and the environment in the wider south east region and are nationally represented in the Water UK water resources long-term planning. Our aim of reducing demand requires the use of new approaches and technology. Although there is some uncertainty on the level of savings that can be achieved we are seeing a development of new technologies and we are committed to reduce personal water usage and leakage levels in order to be more sustainable for next generations.

Our preferred plan for the period 2020 to 2025 includes a mix of demand management initiatives such as leakage reductions and an ambitious water efficiency programme. During the period 2025 to 2045 we will continue our demand management initiatives to achieve further leakage and water efficiency savings. However, by this stage we will need additional water supply options to meet the increase in shortfall of our supply demand balance.

Several of the options within our preferred plan come directly from our engagement with third parties, for instance the regional transfers that resulted from our participation in WRSE. Other options, such as catchment management, rely upon our ability to work with stakeholders, or as with our water efficiency option, we rely on our ability to engage and influence customers' water use behaviour.

In our water resource zone 1 (Tunbridge Wells) we are developing regional water transfer schemes such as importing water from Sutton and East Surrey Water (2042) to our WRZ1 area (Tunbridge Wells) and a targeted catchment management interventions programme in the Pembury area (2034).

South East Water have now reviewed the plan and would like to comment that it is important and agree with Tunbridge Wells Borough Council on the points raised as part of the Local Plan strategic objectives

and would like to add that water efficiency should be a key aspect to be promoted to existing buildings and new buildings, either residential or non-residential across the Council as part of these objectives.

We welcome the changes and the introduction of a new target of 110 litres per person per day instead of the current mandatory target of 125 litres per person per day within Policy EN 24 -Water Supply, Quality, and Conservation. We recommend the Council to be ambitious and try to achieve lower targets as soon as regulation permits and to include a lower optional standard which could be trialled in selected new developments. South East Water fully support this policy as we are keen to collaborate with Tunbridge Wells Borough Council and understand how this policy will be implemented, monitored and the potential benefits of it. South East Water consider that it is important that the Council and developers liaise with South East Water to ensure the timely delivery of water supply infrastructure that is adequate to meet future demand.

South East Water support the introduction of sustainable design standards in Policy EN 2 - Sustainable Design Standards for all residential and non-residential developments where water use standards should be a main focus for developers as well as the monitoring responsibility from the Council.

Our main areas of concern are Capel Tudeley followed by Paddock Wood. South East Water would need to supply the bulk of the water for these sites from the north, from our water resource zone 6 (Maidstone) to our water resource zone 1 (Tunbridge Wells). Our preferred plan for the period 2020 to 2025 includes a new water supply option in WRZ6 to construct a new water treatment works at the former Aylesford Newsprint site. We are planning to increase the transfer capacity from AylesfordNP to Kingshill first (Water Resources Mains scheme) but will also require reinforcement from Beech reservoir down to Paddock Wood.

We would then connect across to the Tudeley development from there by laying new mains. The development in East and Central Paddock Wood will be easier to support from the existing network but a shorter length of main may be required for those on the East. This will require early confirmation that development is progressing.

South East Water will work with local authorities and developers to ensure that any necessary infrastructure reinforcement is delivered ahead of the occupation of development. Where there are infrastructure constraints, it is important not to under estimate the time required to deliver necessary infrastructure.

South East Water would like to reiterate that our primary concern is the water that we abstract and treat for public supply purposes and ensuring that the surface and groundwater abstracted does not fall below the tolerances of our water treatment works or the drinking water standards set by our regulators.

South East Water would like to be kept updated with any developments relating to the Tunbridge Wells Borough Council Local Plan and we welcome the collaboration with the Council. We look forward to working with Tunbridge Wells Borough Council to ensure that drinking water supplies remain protected in the area in the future.

Each water company is legally required to prepare a Water Resources Management Plan (WRMP) every five years. South East Water published our WRMP19 in August 2019. This plan sets out how we intend to maintain the balance between increasing demand for water and available supplies over the next 60 years up to 2080. The plan takes into account planned housing growth as well as the potential impact of climate change and includes our ambitious water efficiency programme. For more information please visit our

website:<https://corporate.southeastwater.co.uk/about-us/our-plans/water-resources-management-plan-2019/>

In South East Water's most recent business plan we have committed to play an active role regionally in relation to the impact of housing growth on water. We will develop a policy together with local stakeholders – appreciating the balance of supplying water, the need for society to ensure environmentally sustainable future water resources, and also the ongoing support of the south east region and its economic development. South East Water aims to respond to 100 per cent of all national, local and regional authority consultations and seeks to co-operate and maintain a good working relationship with local planning authorities in its area and to provide the support they need with regards to the provision of water supply infrastructure. Please see our business

plan:https://corporate.southeastwater.co.uk/media/2901/sew_five_year_business_plan_2020-2025.pdf

We are also committed partners in the Water Resources in the South East (WRSE) Group that works for the collective good of customers and the environment in the wider south east region and are nationally represented in the Water UK water resources long-term planning. Our aim of reducing demand requires the use of new approaches and technology. Although there is some uncertainty on the level of savings that can be achieved we are seeing a development of new technologies and we are committed to reduce personal water usage and leakage levels in order to be more sustainable for next generations.

Our preferred plan for the period 2020 to 2025 includes a mix of demand management initiatives such as leakage reductions and an ambitious water efficiency programme. During the period 2025 to 2045 we will continue our demand management initiatives to achieve further leakage and water efficiency savings. However, by this stage we will need additional water supply options to meet the increase in shortfall of our supply demand balance.

Several of the options within our preferred plan come directly from our engagement with third parties, for instance the regional transfers that resulted from our participation in WRSE. Other options, such as catchment management, rely upon our ability to work with stakeholders, or as with our water efficiency option, we rely on our ability to engage and influence customers' water use behaviour.

In our water resource zone 1 (Tunbridge Wells) we are developing regional water transfer schemes such as importing water from Sutton and East Surrey Water (2042) to our WRZ1 area (Tunbridge Wells) and a targeted catchment management interventions programme in the Pembury area (2034).

South East Water have now reviewed the plan and would like to comment that it is important and agree with Tunbridge Wells Borough Council on the points raised as part of the Local Plan strategic objectives

and would like to add that water efficiency should be a key aspect to be promoted to existing buildings and new buildings, either residential or non-residential across the Council as part of these objectives.

We welcome the changes and the introduction of a new target of 110 litres per person per day instead of the current mandatory target of 125 litres per person per day within Policy EN 24 -Water Supply, Quality, and Conservation. We recommend the Council to be ambitious and try to achieve lower targets as soon as regulation permits and to include a lower optional standard which could be trialled in selected new developments. South East Water fully support this policy as we are keen to collaborate with Tunbridge Wells Borough Council and understand how this policy will be implemented, monitored and the potential benefits of it. South East Water consider that it is important that the Council and developers liaise with South East Water to ensure the timely delivery of water supply infrastructure that is adequate to meet future demand.

South East Water support the introduction of sustainable design standards in Policy EN 2 - Sustainable Design Standards for all residential and non-residential developments where water use standards should be a main focus for developers as well as the monitoring responsibility from the Council.

Our main areas of concern are Capel Tudeley followed by Paddock Wood. South East Water would need to supply the bulk of the water for these sites from the north, from our water resource zone 6 (Maidstone) to our water resource zone 1 (Tunbridge Wells). Our preferred plan for the period 2020 to 2025 includes a new water supply option in WRZ6 to construct a new water treatment works at the former Aylesford Newsprint site. We are planning to increase the transfer capacity from AylesfordNP to Kingshill first (Water Resources Mains scheme) but will also require reinforcement from Beech reservoir down to Paddock Wood.

We would then connect across to the Tudeley development from there by laying new mains. The development in East and Central Paddock Wood will be easier to support from the existing network but a shorter length of main may be required for those on the East. This will require early confirmation that development is progressing.

South East Water will work with local authorities and developers to ensure that any necessary infrastructure reinforcement is delivered ahead of the occupation of development. Where there are infrastructure constraints, it is important not to under estimate the time required to deliver necessary infrastructure.

South East Water would like to reiterate that our primary concern is the water that we abstract and treat for public supply purposes and ensuring that the surface and groundwater abstracted does not fall below the tolerances of our water treatment works or the drinking water standards set by our regulators.

South East Water would like to be kept updated with any developments relating to the Tunbridge Wells Borough Council Local Plan and we welcome the collaboration with the Council. We look forward to working with Tunbridge Wells Borough Council to ensure that drinking water supplies remain protected in the area in the future.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Consultation Point	Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road (View)
Status	Processed
Submission Type	Web
Version	0.4
Question 1	
Respondent's Name and/or Organisation	Alain Lewis, Southborough and High Brooms Labour Party
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road	
Question 4	
Do you consider that the Local Plan:	

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not effective

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Due to the inclusion of the Caenwood development which would cause untold damage to the environment, to traffic and air quality

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We are encouraged that there is a commitment to more affordable housing in the borough. We believe however that there should be more genuinely affordable housing made available across the borough. There should as well be more social housing in the borough, as there is a dire need for this.

Our other major concern is the Caenwood development in Speldhurst Road. These 100 houses will have a detrimental effect on everyone in Southborough and the effect could potentially reach far into Tunbridge Wells. There will be around 100 to 200 extra cars on the road in Speldhurst Road, the A26 and Yew Tree Road. This will also be in addition to the extra cars on the road from the Spectrum development by the Civic Centre.

We are also none to happy about lines blurring between Southborough and Tunbridge Wells in the Caenwood development and how they have been so in this plan as well.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy AL/RTW 5 Land to the south of Speldhurst Road and west of Reynolds Lane at Caenwood Farm, Speldhurst Road

Paragraph No(s) 5.47 – 5.51

Question 4

Do you consider that the Local Plan:

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The proposals contained in policy AL/RTW 5 – removal of Caenwood Farm from the Green Belt to provide for the development of 100 homes is clearly **UNSOUND**.

The policy in paragraph 4.124 states “Green Belt boundaries should only be altered in exceptional circumstances and should be fully evidenced and justified” – yet no evidence for its removal is provided – other than glib words “improvements to the remaining Green Belt to justify the changes to the boundary in this location.” However, no improvements are detailed – only warm words.

The policy tries to justify this green belt removal by stating “The area to the south of the site, although included within the allocation area, should not be developed but rather retained and enhanced”. However, it is not evident that thought has been given to the North Side of the site – i.e., Southborough – that place that it appears TWBC likes to forget about. This land, with its current Green Belt status already provides an essential buffer zone between the Village of Southborough and the Town of Tunbridge Wells. This will now be lost forever.

Then the proposal to build homes on this land is again clearly **UNSOUND** because of lack of infrastructure. Speldhurst Road is a busy, narrow through road, linking Southborough with Rusthall and Speldhurst; together with being used as a “rat run” for traffic avoiding the A26 via Kibbles Lane. There is no evidence that it is capable of supporting the additional traffic generated by the homes. The lack of a detailed traffic analysis adds to the inadequacies of the proposal.

Furthermore, the junctions of Reynolds Lane with Speldhurst Road and the junction of Speldhurst Road with the A26 are extremely busy and congested at peak times – again making the provision of 100 homes close by **UNSOUND**. There are hundreds of school children crossing the roads at these points to attend the many secondary schools around the location – there is no evidence that any thought has been given to the safety of these children or the increased danger to them from the extra traffic generated by the proposed homes

Furthermore, there is no evidence in the policy that consideration had been given to the provision of school places for children from the proposed homes – where will junior school children attend - Southborough? Yet there is no mention of this or what the additional requirements will be.

Again, there is no evidence that consideration has been given to the medical needs of residents in the proposed homes and the impact on GP practices in Southborough.

The policy to develop Caenwood Farm is therefore totally **UNSOUND** as it – fails on unjustified loss of Green Belt, failure to take into account existing the inadequate roads infrastructure, failure to consider schools and GP provision.

Duty to Co-operate – Southborough is an independent community and in fact a significantly older Community than Tunbridge Wells. Whilst it appears that TWBC feels it can, as the Planning Authority, do just as it wishes – it would have been nice. It would have been considerate. It would have been caring and appropriate – if TWBC had talked seriously to Southborough Town Council regarding the removal of Caenwood from the Green Belt and the proposal to build 100 homes on the land. The development of Caenwood will have no impact on the Town of Tunbridge Wells, yet considerable impact on the Village of Southborough. There are already homes on the North Side of Speldhurst Road – Southborough homes. The development of Caenwood will have a substantial and detrimental impact to the lives of people in the area. Yet the land appears to have been removed from the Green Belt very late in the process and with no evidence of thought for the people and the effect on the infrastructure of Southborough. But no surprises there – just the usual disappointment with TWBC.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Keep Caenwood Farm as Green Belt and halt proposed development.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Society questions achievability of the Borough's objective of carbon neutrality by 2030, given that in 2018 35% of CO2 emissions were from roads and 34% from domestic gas/electricity. Such elements will require enormous and rapid change, beyond the Borough's powers of action/influence.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

It is unsound because it removes Green Belt land without proper public consultation

This was not included in the previous Draft Plan.

Although this site between Speldhurst Road and Reynolds Lane lies just outside the Southborough Town Council boundary, its development would have considerable effect on adjacent areas of the town. That has been recognised by the creation of the Speldhurst Road Community Action Group (SRCAG) which is opposed to the proposal. The Society has the following concerns:

- 1 Removal of Green Belt status of 5-6 hectares. This was the result of a Borough Council decision in February 2021, and SRCAG has sought a Judicial Review to allow democratic scrutiny before taking the matter back to Full Council. The Caenwood Farm site is the only green barrier between Tunbridge Wells and Southborough to the west of the A26: its diminution as a result of this proposal could lead to further similar reductions.
- 1 Increased traffic. Construction of some 100 residential dwellings of varying sizes will create more problems for an already difficult stretch of Speldhurst Road. It is highly unlikely that each new dwelling will have only one vehicle per household.
- 1 Site access. Policy AL/RTW5 provides for access from Speldhurst Road. At present the only such access is directly opposite the beginning of Prospect Road, which has significant traffic to/from the Primary School and a bus route. Reynolds Lane is both narrow and congested at peak times with children walking and school runs to/from St Gregory's School.
- 1 Widening of Speldhurst Road. This would only be possible on its southern edge, but at the expense of Tree Preservation Order 26/1984 along the entire northern edge of the Caenwood Farm site. A possible consequence is -
- 1 Parking for existing residents. At present their parking takes place on both sides of Speldhurst Road. If "an appropriate level" of such residents' parking is provided within the new site, they will have to cross back across a very busy road to access their properties.

For these reasons the Southborough Society is opposed to any development on the Caenwood Farm land.

Policy AL/RTW5 is not justified because it would remove Green Belt land without proper consultation with local residents, and therefore should be removed from the Local Plan as being unsound.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy AL/RTWS should be removed from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Concern at possible reduction in nearby Green Belt.

The concept of a luxury hotel with up to 200 rooms and spa/conference facilities would require substantial alteration to the listed Grade II mansion. There have been previous proposals for conversion to an hotel, none of which came to fruition. The viability of such significant private investment therefore must be debatable despite the opportunities for additional local jobs.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Whilst the objective of significantly boosting the supply of affordable housing is welcomed, priority should be given to use of brownfield sites with good access to services, rather than utilise greenfield land.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We do object also to the proposals AL/RTW 5 – removal of Caenwood Farm from the Green Belt providing for the development of 100 homes.

We do not see how and why the removal of Green Belt boundaries, especially as they 'should only be altered in exceptional circumstances and should be fully evidenced and justified'. Improving the remaining Green Belt does not justify this. Especially as there is no detail as to how this will be improved and where. We only see it being detrimental when placed alongside the blurring of lines between Southborough and RTW.

Speldhurst Road would not, as well, be able to cope with car traffic from an extra 100 homes on it. And the A26 junction and Yew Tree Road would not as well, with the current addition of 67 dwellings alongside the Southborough Civic Centre.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

TUNBRIDGE WELLS BOROUGH COUNCIL –LOCAL PLAN COMMENTS

Please find below the comments raised by STC Chairman of Planning and Transportation Councillor Alain Lewis:

The way the Local Plan is organised it appears that the town of Southborough has become an unparished area of RTW. This therefore diminishes the status of Southborough as being a separate entity to RTW.

- In the introduction to Place Shaping Policies para 5.1. "This section is arranged by non-parished and parished areas..." and list in para 5.3 has Southborough immediately after RTW, before strategic sites, not with the parished areas

- Not clear what areas of Southborough are included in the 'the town' and which are 'parished' and therefore what the policy covers.

We question why the plan designates the 'town of Southborough (as being) mainly urban in character and forms what is referred to as the Main Urban Area of the borough alongside RTW'. Also, the Southborough Common Conservation Area is described as being 'to the north of the parished area' and High Brooms is 'within the parished area' and High Brooms Station is 'just outside the parished area'

Therefore, as a result a perspective for Southborough and High Brooms is missing from the Policy as a result in relation to;

- Point 2: Providing additional housing (windfall developments)
- Point 3: making the best use of previously developed land
- Point 5: Retention of Key Employment Area – specifically for Southborough/High Brooms Industrial Area
- Point 8: Support active travel (for the mass of walking and cycling improvements in Southborough set out in the LCWIP).
- Point 9: Support improvements to local bus network and infrastructure
- Point 10: Deliver measures to reduce congestion on A26 – through Southborough
- Point 11: Plan for the expansion of electric vehicle charging points

In the existing policy for the non-urban Southborough as well, we make the following comments.

- Point 1: Set LBD for Southborough - Inset map 3 does not show an LBD boundary between Southborough and adjoining unparished areas of RTW.

- Point 2: Developments: No mention of AL/SO 2 Mabledon House (although the allocation policy is included in the Southborough Policies section) – the only hotel development in the whole plan and meets the identified need for a luxury hotel in the borough (see Hotel Capacity Study).

- Point 3: Identify Southborough hub as a local sports hub recreation – the policy should include words about future enhancements that are in RTW 1 point 15. Also, should this not be designated as a sport and recreation area?
- Point 4: Protect and retain public car parks as shown on Policies Map. Yew Tree Road car park is marked on map (TP4) but Pennington Road does not appear.
- Point 5: Appropriate mix of uses within town centre – maybe this could cover neighbourhood centres (Southborough North Parade, High Brooms) also?
- Point 6: We believe that any developer contributions from Southborough and High Brooms should go to Southborough and High Brooms facilities

In the Overview:

- . AQMA should be mentioned in relation to Southborough and the A26.
- . Our Conservation Area is more than Southborough Common and covers other green spaces such as Barnetts and Brokes Woods as well as ancient woodland and local wildlife sites. These are hugely valued by our local community which should attract developer contributions to pay for enhancements.
- . Southborough North Parade gets a mention in preamble to policy EN6 Shop Fronts and as a neighbourhood centre in ED8, but not in the Southborough Overview.
- Rural diversification – Mabledon and Honnington farms both offer alternative leisure and tourism activities.
- There are a number of listed buildings and sites of significant interest including the Railway Viaduct and Salomons Estate.

We do object also to the proposals AL/RTW 5 – removal of Caenwood Farm from the Green Belt providing for the development of 100 homes.

We do not see how and why the removal of Green Belt boundaries, especially as they 'should only be altered in exceptional circumstances and should be fully evidenced and justified'. Improving the remaining Green Belt does not justify this. Especially as there is no detail as to how this will be improved and where. We only see it being detrimental when placed alongside the blurring of lines between Southborough and RTW.

Speldhurst Road would not, as well, be able to cope with car traffic from an extra 100 homes on it. And the A26 junction and Yew Tree Road would not as well, with the current addition of 67 dwellings alongside the Southborough Civic Centre.

TUNBRIDGE WELLS BOROUGH COUNCIL –LOCAL PLAN COMMENTS

Please find below the comments raised by STC Chairman of Planning and Transportation Councillor Alain Lewis:

The way the Local Plan is organised it appears that the town of Southborough has become an unparished area of RTW. This therefore diminishes the status of Southborough as being a separate entity to RTW.

- In the introduction to Place Shaping Policies para 5.1. "This section is arranged by non-parished and parished areas..." and list in para 5.3 has Southborough immediately after RTW, before strategic sites, not with the parished areas

- Not clear what areas of Southborough are included in the 'the town' and which are 'parished' and therefore what the policy covers.

We question why the plan designates the 'town of Southborough (as being) mainly urban in character and forms what is referred to as the Main Urban Area of the borough alongside RTW'. Also, the Southborough Common Conservation Area is described as being 'to the north of the parished area' and High Brooms is 'within the parished area' and High Brooms Station is 'just outside the parished area'

Therefore, as a result a perspective for Southborough and High Brooms is missing from the Policy as a result in relation to;

- Point 2: Providing additional housing (windfall developments)
- Point 3: making the best use of previously developed land
- Point 5: Retention of Key Employment Area – specifically for Southborough/High Brooms Industrial Area
- Point 8: Support active travel (for the mass of walking and cycling improvements in Southborough set out in the LCWIP).
- Point 9: Support improvements to local bus network and infrastructure
- Point 10: Deliver measures to reduce congestion on A26 – through Southborough
- Point 11: Plan for the expansion of electric vehicle charging points

In the existing policy for the non-urban Southborough as well, we make the following comments.

- Point 1: Set LBD for Southborough - Inset map 3 does not show an LBD boundary between Southborough and adjoining unparished areas of RTW.

- Point 2: Developments: No mention of AL/SO 2 Mabledon House (although the allocation policy is included in the Southborough Policies section) – the only hotel development in the whole plan and meets the identified need for a luxury hotel in the borough (see Hotel Capacity Study).

- Point 3: Identify Southborough hub as a local sports hub recreation – the policy should include words about future enhancements that are in RTW 1 point 15. Also, should this not be designated as a sport and recreation area?
- Point 4: Protect and retain public car parks as shown on Policies Map. Yew Tree Road car park is marked on map (TP4) but Pennington Road does not appear.
- Point 5: Appropriate mix of uses within town centre – maybe this could cover neighbourhood centres (Southborough North Parade, High Brooms) also?
- Point 6: We believe that any developer contributions from Southborough and High Brooms should go to Southborough and High Brooms facilities

In the Overview:

- . AQMA should be mentioned in relation to Southborough and the A26.
- . Our Conservation Area is more than Southborough Common and covers other green spaces such as Barnetts and Brokes Woods as well as ancient woodland and local wildlife sites. These are hugely valued by our local community which should attract developer contributions to pay for enhancements.
- . Southborough North Parade gets a mention in preamble to policy EN6 Shop Fronts and as a neighbourhood centre in ED8, but not in the Southborough Overview.
- Rural diversification – Mabledon and Honnington farms both offer alternative leisure and tourism activities.
- There are a number of listed buildings and sites of significant interest including the Railway Viaduct and Salomons Estate.

We do object also to the proposals AL/RTW 5 – removal of Caenwood Farm from the Green Belt providing for the development of 100 homes.

We do not see how and why the removal of Green Belt boundaries, especially as they 'should only be altered in exceptional circumstances and should be fully evidenced and justified'. Improving the remaining Green Belt does not justify this. Especially as there is no detail as to how this will be improved and where. We only see it being detrimental when placed alongside the blurring of lines between Southborough and RTW.

Speldhurst Road would not, as well, be able to cope with car traffic from an extra 100 homes on it. And the A26 junction and Yew Tree Road would not as well, with the current addition of 67 dwellings alongside the Southborough Civic Centre.

Question 7

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/RTW 1 Former Cinema Site, Mount Pleasant Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory wastewater undertaker for Tunbridge Wells. Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/RTW 1

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Southern Water is the statutory wastewater undertaker for Tunbridge Wells. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 100 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

(Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/RTW 5

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Southern Water
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/RTW 7 Land at former Gas Works, Sandhurst Road	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory wastewater undertaker for Tunbridge Wells. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 200 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/RTW 7

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/RTW 21

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Respondent's Name and/or Organisation	Southern Water
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
<p>Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.</p> <p>Policy AL/SO 3 Land at Baldwins Lane, North Farm Road</p>	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory wastewater undertaker for Southborough. Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/SO 3

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory wastewater undertaker for Paddock Wood and Capel. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. The assessment reveals that local sewerage infrastructure in closest proximity to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of wastewater infrastructure.

Proposals for 3,490-3,590 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

In addition, our assessments have revealed that Southern Water's underground infrastructure crosses the site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

This site incorporates a few of Southern Water's Pumping Station (WPS). In order to mitigate any noise and/or vibration generated by their essential operation, a 15 metre gap between the pumping station and any residential dwelling would be required. This will also help ensure Policy EN27 bullet 2 of the Tonbridge Wells Local Plan is adhered to.

In addition, we note that this site is incorporates Paddock Wood Wastewater Treatment Works (WTW), which is owned and operated by Southern Water.

Southern Water endeavours to operate its sewage and sludge treatment works efficiently and in accordance with best practice to prevent pollution. However, unpleasant odours inevitably arise as a result of the treatment processes that occur. New development must be adequately separated from WTWs to safeguard the amenity of future occupiers. This is in line with paragraph 180 of the National

Planning Policy Framework (NPPF, 2018), which states that 'Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on [...] living conditions' and Paragraph 182 which states 'Planning policies and decisions should ensure that new development can be integrated effectively with existing businesses and community facilities [...] Existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established.'

In addition, paragraph 7.6.5 of the Kent Waste & Minerals Local Plan 2016 (p106) states that 'certain types of development which require a high quality amenity environment (e.g. residential) may not always be compatible with [...] waste management activities which are industrial in nature.' Policy DM 8 further stipulates 'Planning applications for development within 250m of safeguarded facilities need to demonstrate that impacts, e.g. noise, dust, light and air emissions, that may legitimately arise from the activities taking place at the safeguarded sites would not be experienced to an unacceptable level by occupants of the proposed development and that vehicle access to and from the facility would not be constrained by the development proposed.'

Southern Water believe that development that is sensitive to odour should only be permitted if the distance to the works is sufficient to allow adequate odour dispersion. We would expect an assessment to be carried out that would demonstrate that there would not be a detrimental impact on amenity by reason of odour.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion is added to Policy STR/SS 1

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing water and/or wastewater infrastructure for maintenance and upsizing purposes

A 15 metre gap between the pumping station and any sensitive development (such as housing) should be taken into consideration in the site layout.

The development layout must provide sufficient distance between Paddock Wood Wastewater Treatment Works and sensitive land uses, such as residential units, schools and recreational areas, to allow adequate odour dispersion, on the basis of an odour assessment to be undertaken in consultation with Southern Water.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Southern Water is the statutory wastewater undertaker for Paddock Wood. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 413 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

This site incorporates Southern Water's Badsell Road Paddock Wood Pumping Station (WPS). In order to mitigate any noise and/or vibration generated by its essential operation, a 15 metre gap between the pumping station and any residential dwelling would be required.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion be added to Policy AL/PW 1

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

A 15 metre gap between the pumping station and any sensitive development (such as housing) should be taken into consideration in the site layout.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Southern Water is the statutory wastewater undertaker for Cranbrook. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 204 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

This site incorporates Southern Water's Turnden Cranbrook Pumping Station (WPS). In order to mitigate any noise and/or vibration generated by its essential operation, a 15 metre gap between the pumping station and any residential dwelling would be required.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion to Policy AL/CRS 3

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

A 15 metre gap between the pumping station and any sensitive development (such as housing) should be taken into consideration in the site layout.

Southern Water is the statutory wastewater undertaker for Sissinghurst. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 204 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion to be added to Policy AL/CRS 6

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 1	
Respondent's Name and/or Organisation	Southern Water
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/HA 1 Land at the White House, Highgate Hill	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Yes

Is sound	Yes
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory wastewater undertaker for Hawkhurst. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 43 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/HA 1

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Southern Water is the statutory wastewater undertaker for Hawkhurst. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 25 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Our assessment has also revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for policy AL/HA 2

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Southern Water is the statutory wastewater undertaker for Benenden. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 20 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion to be added to Policy AL/BE 1
Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water is the statutory water and wastewater undertaker for Horsmonden. Our assessment has revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/HO 2

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Southern Water is the statutory wastewater undertaker for Lamberhurst. As such, we have undertaken a preliminary assessment of the capacity of our existing infrastructure and its ability to meet the forecast demand for this proposal. Our previous assessment of the site was only valid for 12 months due to our sewer network constantly evolving as new development connects upstream which will affect the available capacity downstream. The assessment reveals that existing local sewerage infrastructure to the site has limited capacity to accommodate the proposed development. Limited capacity is not a constraint to development provided that planning policy and subsequent conditions ensure that occupation of the development is phased to align with the delivery of new wastewater infrastructure.

Proposals for 30 dwellings at this site will generate a need for reinforcement of the wastewater network in order to provide additional capacity to serve the development. This reinforcement will be provided through the New Infrastructure charge to developers, and Southern Water will need to work with site promoters to understand the development program and to review whether the delivery of network reinforcement aligns with the occupation of the development. Connection of new development at this site ahead of new infrastructure delivery could lead to an increased risk of flooding unless the requisite works are implemented in advance of occupation.

Southern Water has limited powers to prevent connections to the sewerage network, even when capacity is limited. Planning policies and conditions, therefore, play an important role in ensuring that development is coordinated with the provision of necessary infrastructure, and does not contribute to pollution of the environment, in line with paragraph 170(e) of the revised National Planning Policy Framework (NPPF) (2019).

Our assessment has also revealed that Southern Water's underground infrastructure crosses this site. This needs to be taken into account when designing the site layout. Easements would be required, which may affect the site layout or require diversion. Easements should be clear of all proposed buildings and substantial tree planting.

In addition, we note that this site incorporates Lamberhurst Wastewater Treatment Works (WTW), which is owned and operated by Southern Water.

Southern Water endeavours to operate its sewage and sludge treatment works efficiently and in accordance with best practice to prevent pollution. However, unpleasant odours inevitably arise as a result of the treatment processes that occur. New development must be adequately separated from WTWs to safeguard the amenity of future occupiers. This is in line with paragraph 180 of the National Planning Policy Framework (NPPF, 2018), which states that 'Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on [...] living conditions' and Paragraph 182 which states

'Planning policies and decisions should ensure that new development can be integrated effectively with existing businesses and community facilities [...] Existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established.'

In addition, paragraph 7.6.5 of the Kent Waste & Minerals Local Plan 2016 (p106) states that 'certain types of development which require a high quality amenity environment (e.g. residential) may not always be compatible with [...] waste management activities which are industrial in nature.' Policy DM 8 further stipulates 'Planning applications for development within 250m of safeguarded facilities need to demonstrate that impacts, e.g. noise, dust, light and air emissions, that may legitimately arise from the activities taking place at the safeguarded sites would not be experienced to an unacceptable level by occupants of the proposed development and that vehicle access to and from the facility would not be constrained by the development proposed.'

Southern Water believe that development that is sensitive to odour should only be permitted if the distance to the works is sufficient to allow adequate odour dispersion. We would expect an assessment to be carried out that would demonstrate that there would not be a detrimental impact on amenity by reason of odour.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In consideration of the above, we recommend the following criterion for Policy AL/BE 2 [TWBC: this modification was likely intended for Policy AL/LA 1 given the references to Lamberhurst]

Occupation of development will be phased to align with the delivery of sewerage infrastructure, in liaison with the service provider.

Layout is planned to ensure future access to existing wastewater infrastructure for maintenance and upsizing purposes.

The development layout must provide sufficient distance between Lamberhurst Wastewater Treatment Works and sensitive land uses, such as residential units, schools and recreational areas, to allow adequate odour dispersion, on the basis of an odour assessment to be undertaken in consultation with Southern Water.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Southern Water welcomes the inclusion of a policy aimed at supporting the delivery of the utilities infrastructure required to meet the needs of current and future residents and businesses within Tunbridge Wells Borough. It's essential to ensure that development occurs in tandem with infrastructure delivery, we believe Policy EN 24 will support strategic infrastructure delivery where this is required.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Southern Water welcomes the inclusion of a policy aimed at supporting the delivery of sustainable drainage, the use of the sustainable urban drainage hierarchy and the statement 'It will not be acceptable for surface water runoff to enter the foul water system' in policy EN26, will minimise the impact of new developments on the sewerage system and the environment.

Southern Water supports the use of sustainable urban drainage as part of the approach set out in Policy EN26 as it is in line with section H3 of the Governments Building Regulations 2010 for the drainage of surface waters. Southern Water will be adopting many of these systems in line with national guidance within the SuDs Manual (CIRIA), Guidance on the Construction of SuDS (Ciria) and Sewers for Adoption in England as.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Southern Water welcomes the inclusion of a policy aimed at Noise. Southern Water endeavours to operate its sewage and sludge treatment works efficiently and in accordance with best practice to prevent pollution. However, noise inevitably arise as a result of the equipment used. New development must be adequately separated from WTWs and WPSs to safeguard the amenity of future occupiers. This is in line with paragraph 180 of the National Planning Policy Framework (NPPF, 2018), which states that '*Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on [...] living conditions*' and Paragraph 182 which states '*Planning policies and decisions should ensure that new development can be integrated effectively with existing businesses and community facilities [...] Existing businesses and facilities should not have unreasonable restrictions placed on them as a result of development permitted after they were established.*'

In addition, paragraph 7.6.5 of the Kent Waste & Minerals Local Plan 2016 (p106) states that '*certain types of development which require a high quality amenity environment (e.g. residential) may not always be compatible with [...] waste management activities which are industrial in nature.*' Policy DM 8 further stipulates '*Planning applications for development within 250m of safeguarded facilities need to demonstrate that impacts, e.g. noise, dust, light and air emissions, that may legitimately arise from the activities taking place at the safeguarded sites would not be experienced to an unacceptable level by occupants of the proposed development and that vehicle access to and from the facility would not be constrained by the development proposed.*'

We believe Policy EN27 bullet 2 '*For residential and other noise-sensitive development, users and occupiers will not be exposed to unacceptable noise disturbance from existing or planned uses*' adequately covers any issues that may arise from placing sensitive development near to our existing equipment and treatment works.

My name is Stephen Paul Spedding and I am a resident of Matfield. (xxxx, Matfield, Tonbridge, xxxx)
[TWBC: Full address redacted for data protection purposes]

I would like to comment on policy STR6

I appreciate the intent of the enhancement of public footpaths but I would like to make some comments specific to Matfield.

1) Although there is a large network of footpaths and bridleways in the parish, the interconnectivity is poor. This policy should reference improved interconnectivity by minimising the need to use roads without pavements.

2) Several of the sites mentioned in the call for sites in the parish have no footpaths (or no safe footpaths). To encourage foot traffic, sites should be encourage to install new all weather paths within their boundaries. Installing new hard surface pavements is an alternative but would detract from the rural qualities of the parish. A good example would be the site that adjoins Maycotts Lane/Chestnut Lane. This site was in the call for sites and has put forward for planning permission but is not in the Local Plan. (Call for sites reference: Reference: 18 Matfield House orchards and land, The Green, Matfield TN12 7JT.). I mention it as an example only.

Chestnut Lane and especially Maycotts Lane are used by residents to get to the village shop and by walkers to transit from WT268 to 284. An all weather path inside the boundary of this site along Maycotts Lane (and Chestnut Lane) would enhance its safety and encourage its use.

I think STR6 should be strengthened to emphasise improved connectivity wherever feasible. I think all site specific policies should encourage new pedestrian paths wherever feasible to improve safety and encourage foot traffic (sustainability)

Speldhurst Parish Council does not consider itself qualified to comment on the soundness or legal compliance of the Regulation 19 consultation, and therefore remains neutral on this aspect of the consultation.

However, we would like to take this opportunity to comment in relation to the allocated sites in our parish, as follows:

Site AL/SP1 (site 231)

Our concerns regarding the following have strengthened in light of changes since and proposals made following the Regulation 18 consultation:-

- . loss of green belt, building outside village environs/limits to build;
- . safety of access to/egress from this site, particularly, given the Tree Preservation Orders that were made subsequent to the Regulation 18 consultation and which further impact the safety aspects;
- . potential overspill parking on local roads, including the main road into the village passing the local primary school close by;
- . effect on travel, including the lack of regular local bus services or safe cycling provision. In particular, we would like reinstatement of the mention of irregular/lacking bus services in the comments on the site as this is an important local consideration;
- . allocation of developer's contributions, which the council feels strongly should solely benefit the village affected by the development. Speldhurst Parish Council objects in the strongest possible way developer contributions being allocated towards a development in a different village that is vehemently opposed by both this and the neighbouring parish council and their residents.

Policy AL/SP 2 Land at and adjacent to Rusthall Recreation Ground, Southwood Road

Paragraph No(s) 5.807 to 5.815

Policies Map (Inset Map No(s)) 76

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

It is not positively prepared
It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The plan is not positively prepared for the following reasons:

Meeting local needs:

We do not consider that the local need underpinning the policy has been adequately identified. The policy is based upon insufficient evidence that is not up-to-date. The Playing Pitch Strategy was published in 2017, and no further update has been made since. There are no teams registered as having Southwood Road as their home ground. The Jockey Farm pitch, not part of the proposed allocation, is owned by the Rusbridge family and is where the Rusthall teams play.

We are advised by the club that it is not the lack of facilities that is creating an issue, rather the quality of the pitches available. This is the case at the proposed development site: the quality of the existing pitches at the recreation ground is poor due to lack of adequate drainage. This means that they are not fully utilised in the winter months. It is considered that simply building more pitches, on equally waterlogged land, would not be the most efficient way to increase usage. Rather the existing pitches should be upgraded first to maximise their usage across the year.

This would conform to the Football Association's "SURVIVE. REVIVE. THRIVE. THE FA GRASSROOTS FOOTBALL STRATEGY 2020-24", published in March 2021, which promotes the need for "quality pitches", based on the Performance Quality Standard (PQS), where a key criteria is the ability to drain water.

A further assessment of demand could then be undertaken to ascertain how many additional pitches, of similar quality, would be required. Should a demand be identified, the prioritisation of a 3G (all-weather) pitch, may be a more prudent investment and would also reduce the amount of land required for provision.

Achieving sustainable development

We do not consider that the policy is consistent with achieving sustainable development for the reasons provided below:

Environmental sustainability:

1 Biodiversity

The site comprises two fields, divided by a mature hedgerow and the site lies within a larger Biodiversity Opportunity Area – it is unclear how development of the site would benefit this.

Furthermore, since the planning permission for the site was reapproved, a very large badger sett has been identified on the boundary of the proposed land. The Badger Trust has confirmed that this is currently in use.

Badgers are protected species and Paragraph 175(a) of the National Planning Policy Framework states, *“if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused”*.

A survey of the site should therefore be undertaken; whilst surveys can be undertaken at any time of the year, the Badger Trust recommend that the best time to survey is in early spring or late autumn when badgers are active but there is less vegetation to hide the signs.

The Badger Trust recommend an approach to assessing and mitigating impacts of development on badgers. Negative impacts should be avoided and mitigation measures (if considered suitable) would require, among other things, a 30-metre buffer zone. If not feasible, a licence to move the sett would be required.

1 Existing community uses

Rusthall Football Club currently lease land at Jockey Farm and have heavily invested in the Club and facilities over the last 35 years. This has included draining the pitch, at significant cost (circa £100,000), and provision of a club house. This has been supported by volunteers, the landowner and with grants from sporting foundations and TWBC.

The pitch is well-used by the local community and hosts a variety of football events. There is concern that by developing the land at Jockey Farm to provide additional pitches, this could jeopardise the existing Jockey Farm pitch, should the landowner consider it necessary to reutilise the land to enable the continued viability of the land. This important and much-valued facility could be lost.

1 Economic sustainability:

Two of the fields proposed for development belong to Jockey Farm, which has been in the Rusbridge family since 1925 and operates as a free range egg enterprise and a pedigree Sussex Beef Suckler herd.

The two fields proposed are surrounded on two sides by other fields that are in constant use by Jockey Farm and this will make it more difficult for the farm to continue to trade.

We understand that the landowner has a particular need in the short term for the land comprising the southern field, therefore the ability to safeguard this land from development would be paramount.

The Plan is not Justified

Within the Strategic Environment Assessment (p.192), the site itself has been scored as having no impact on ‘biodiversity’, despite the site lying within the AONB and a wider area recognised as a Biodiversity Opportunity Area. As noted above, the site also houses mature hedgerows and a badger sett.

Furthermore, the site is scored as having a neutral impact on ‘business growth’, in spite of it requiring the compulsory purchase of farmland, which is critical to the viability of Jockey Farm.

The site is considered to have neutral / slightly positive effect on services and facilities, defined as ‘improved access and range of key services and facilities’. Whilst the site would extend the existing recreation ground facilities, there is a concern, as noted above, on the potential impact on the existing football pitch owned by Jockey Farm, should that require reutilising as a result of lessened viability of the overall farm business. This well-used facility could be lost

It is also not clear to what extent reasonable alternatives to this site have been evaluated against other sites that would be capable of addressing the suggested need for additional playing pitch space. Within the SEA, for instance, the site is considered against other sites in Speldhurst Parish, but not against other sites suitable for this particular use. All of the other sites within the Parish had been put forward for residential / business / education development and not for recreational development.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

A comparison of alternative sites suitable for recreational use (as a sports hub) should be undertaken, to ascertain if the site at Speldhurst remains the most appropriate.

Assessments on the impacts on biodiversity should be undertaken, in particular the impact on the badger set. Any proposal for development must be supported by a biodiversity appraisal, which must demonstrate how negative impacts would be minimised and biodiversity net gain achieved.

The appraisal should demonstrate that where significant harm cannot be avoided, proposed development and other changes should adequately mitigate or, as a last resort, compensate for the harm. The appraisal must demonstrate a measurable biodiversity net gain of 10% by utilising the Defra biodiversity metric (or as amended). Where this is not demonstrated, we consider that the development should be refused.

Measures to achieve biodiversity net gain, mitigation or compensation involving the creation of habitat and/or relocation of species, must be agreed by the Local Planning Authority and include sufficient funding to support at least 30 years of post-development habitat management or land use change. This would be in line with the emerging Environment Bill.

A review of the current facilities at the recreation ground should be undertaken to ascertain the extent to which upgrading the existing pitches – which are currently under-used as a result of poor drainage, particularly in the winter months – would address demand. The prioritisation of a 3G pitch could assist this and would require only the northern field of Jockey Farm, retaining the southern field for economic use by the farm.

Should the additional evidence continue to point to a need for recreational use at this particular site, as the demand for the facilities has been calculated to the end of the Local Plan period, i.e. once the quantum of development has been delivered, it would appear sensible to incorporate a staged approach into the policy itself, informed by demand, for instance:

Phase 1:

- Investment to upgrade the existing pitches to bring them up to the required quality in terms of drainage; and
- Upgrading of the changing facilities to enable unisex use.

Phase 2:

- Development of a 3G pitch on the northern field

Phase 3:

- Consider need to expand further into the southern field.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Question 4

Do you consider that the Local Plan:

Is legally compliant

No

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

Policy STR1 is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate. As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy.

Furthermore, the distribution of development as currently set out in Policy STR1 is not balanced, and in particular Langton Green should be required to grow.

Background

The purpose of these representations is to examine closely the housing need and Green Belt policies in order to put forward for allocation a housing site. The site is known as land at High View, Langton Road Langton Green and was considered under site reference 42 of the Site Assessment Sheets for Speldhurst Parish - Strategic Housing & Economic Land Availability Assessment SHELAA– Regulation 19 Consultation January 2021.

Housing Need

The housing need for the authority in the draft Local Plan is premised upon the standard method for the 15 year period which requires 678 dwellings per year, or 12,200 dwellings over the period. At the time of drafting this Plan the development plan situation in Sevenoaks District Council was unclear. However, following the failure of their High Court challenge, Sevenoaks District Council is now required

to begin the preparation of their Local Plan again. Since NPPF expects any unmet housing needs within the adjoining Districts to be addressed by neighbouring authorities, it would be unreasonable for Tunbridge Wells not to accept that some additional housing must be found to alleviate the pressure for new homes within Sevenoaks District. Not to do so would be contrary to NPPF policy and in our view this suggests that additional housing sites must be identified.

Given the stage reached in the Tunbridge Wells Local Plan process, it would be unreasonable for this Council to not assist Sevenoaks District in meeting part of its housing need. Paragraph 4.16 of the draft Local Plan postulates that Sevenoaks may have an unmet need of 1900 dwellings. Paragraph 4.18 also notes that sites may need to be greater in size to enable delivery of the numbers predicted. Paragraph 4.53-4.54 then explains that sites and other supply with sufficient capacity for 13,059 to 13,444 dwellings has been found. The mid point gives a buffer of 1,000 dwellings above the 12,200 requirement.

Notwithstanding the buffer and the situation in Sevenoaks, it is the case that Wealden District Council has fallen short of providing its required housing need and is some way off producing a new Local Plan. It is a neighbouring authority and subject to constraints relating to Ashdown Forest and the Habitat Regulations. Since it is within the same housing market area, it may be necessary for Tunbridge Wells to consider meeting some of its unmet housing need. In fact, following the rejection by the Local Plan Inspector of Wealden's Submission Plan, Wealden have re-wound their Plan preparation process and started from the beginning with an issues and options consultation. It is likely that this Plan is several years from fruition.

There is also sufficient uncertainty with Tonbridge and Malling's Local Plan and this Plan seems likely to follow in the footsteps of the Sevenoaks Plan. A shock to the local housing market seems likely with supply side constraint pushing up house prices and hindering access to homes. In the circumstances, it is considered that additional housing allocations are required to be identified within the Tunbridge Wells Local Plan area and these should go beyond the 1,000 dwelling buffer currently identified.

Delivery of Homes

In relation to delivery of new homes, we are of the view that additional smaller housing sites are also required to ensure a sustainable delivery from early in the Plan period. The Council is relying on a number of very large strategic sites (Policy STR/SS1 and Policy STR/SS3). Together these total around 6,390 dwellings although it is acknowledged that delivery will spill beyond the Local Plan period. Such reliance upon strategic sites will inevitably take a long time to deliver the required housing and when they do start delivery, the housing market will only be able to sustain a certain volume of new homes per annum – otherwise the market is flooded in specific localities and homes take longer to sell. Consequently, additional smaller housing sites should be allocated in different locations. Since NPPF seeks to boost the supply of housing and there is nothing in the guidance preventing local authorities from providing more housing land than meets the standard methodology, it is entirely appropriate for additional sites to be identified.

Identifying additional sites should not be considered harmful where they are sustainable and the additional quantum will help meet a need early in the Plan period. If over provision occurs, it will simply enable the Council to offset this against future calculated housing needs – this is delivery in front of the curve.

Figure 9 of the draft Local Plan (page 477 of the draft Local Plan) sets out the Council's planned housing trajectory. However, the completions rate identified in Table 1 of the Housing Supply and Trajectory Topic Paper for Draft Local Plan (September 2019, see extract below) explains that in a 3 year period (2016-19) 1552 dwellings were built or 517 per annum – much lower than the annual trajectory predictions of the draft Local Plan. Whilst it is accepted that more allocations may help improve this figure, in our view the historic trends do not suggest delivery will be as positive as the Council imagines, which is why more smaller sites are needed.

The Settlement Hierarchy

No new sites are proposed in Langton Green which is surprising given its size and role in the settlement hierarchy. The Settlement Role and Function Study (February 2021) ranks 21 different settlements in a hierarchy according to the level of services and facilities available. Langton Green is number 8 on the list. The Study also groups settlements in terms of their characteristics, focusing on the range of services and facilities they provide (Table 6, page 24)

[TWBC: to view Table 6: Revised settlement groupings see full representation attached]

It seems unreasonable that Langton Green is not proposed to grow at all whilst other settlements in the same settlement category as Langton Green are due to grow significantly. Take for example, Horsmonden, which is expected to deliver 240 – 320 units. A more balanced approach should be adopted, and growth should be shared amongst settlements in order for the plan to be sustainable and in line with the National Planning Policy Framework.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is necessary to Modify STR1 to increase housing numbers to meet the unmet needs of Sevenoaks DC and other adjoining authorities. It is likely that this will require an addition 2000-3,000 more dwellings.

Langton Green should be required to accommodate some level of growth. 20 dwellings should come forward at Land at High View in Langton Green.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Kember Loudon Williams
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 9 Green Belt

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

The Plan is not legally compliant because insufficient consideration has been given towards the meeting of housing needs in adjoining authority areas and delivering sufficient small sites to ensure the housing trajectory can be delivered. As such it has resulted in a Plan which is unsound and does not properly comply with the duty to cooperate.

As a result of the lack of housing allocations (see below) the Plan cannot be said to be effective or consistent with National Policy. Further housing allocations in the Green Belt are required in order for the Plan to be justified.

Background

The purpose of these representations is to put forward for allocation a housing site which is currently in the Green Belt. The site is known as land at High View, Langton Road Langton Green and was considered under site reference 42 of the Site Assessment Sheets for Speldhurst Parish - Strategic Housing and Economic Land Availability Assessment – Regulation 19 Consultation January 2021.

Green Belt and Landscape

The individual SHELAA assessment for site 42, notes that the site included two structures and that existing housing adjoins the site to the north and west. Field boundaries were acknowledged to comprise

hedgerows to the south. In some respects this description doesn't fully express the context of the site since to the south is a wooded area spanning the entire southern boundary of the site. There is also built development to the east, north and west as noted on the aerial image of the site below together with a wide footway running alongside the northern boundary.. As a consequence, the landscape setting and effect on Green Belt are not as clear cut as the Council suggest.

TWBC: see full representation attached to view aerial image of site]

The Council rejected the site on Green Belt and Landscape grounds connected with the AONB. However, the site is visually contained by existing built development and the wooded setting of the site to the south.

In the NPPF great weight is attached to AONB's but the advice is that the scale and extent of development within designated areas should be limited. It is only major development which is guided against and given the scale of the site and the way in which the Council has defined other AONB sites, it is considered that the land would not constitute a major site.

Major developments will need to comply with three tests. Consequently, if the site is not defined as 'major' then its suitability is one of effect on the AONB. As noted the site is visually very well contained with strong woodland copses providing limited wider views from the south. The southern side of Langton Road comprises various houses and large gardens and would be typically described as suburban in character. The site has a greater association with the settlement of Langton Green than it does with the open landscape setting of the AONB and so its release for housing would not undermine the objectives of this landscape.

Green Belts are designed to serve 5 purposes – the check the unrestricted sprawl of large settlements, prevent the merging of settlements, safeguarding the countryside from encroachment, preserving the setting and character of historic towns and to assist with urban regeneration.

Given the position of the site and its shape – hugging the Langton Road, it would not result in the same level of encroachment as Hither Chantlers to the west or The Midway and Nevill Court to the east. The allocation of this site would be so visually contained and seen against the back cloth of existing buildings not to contribute towards unrestricted sprawl.

Directly to the south are no settlements for several miles and so there can be no conflict with the merging of towns or villages criteria. The small character of the site would have no material effect upon Tunbridge Wells and its historic character, particularly as Langton Green is considered a separate village settlement.

Where a housing need is confirmed, removal of a site from the Green Belt through a Local Plan Review is entirely reasonable.

In considering this Green Belt site, the Inspector would need to consider paragraph 139 of the NPPF which sets the parameters for identifying Green belts. Importantly, the policy guidance is that boundaries can be defined according to the development plan's strategy for sustainable development. If more housing sites are needed then site's can be identified even if they are within the Green Belt. Similarly it is important to consider whether this site needs to be kept permanently open given the surrounding built characteristics and the wooded enclosure afforded by the landscape to the south. Green belt boundaries are likely to be necessary in the longer term and so carefully considering where the boundary should be is important for addressing future development needs. Given the above characteristics of the site and the limited way in which it complies with the purposes for including land in the Green belt, the release of this land from Green Belt and allocation for housing is considered reasonable. Policy STR9 and the Proposals Map (Inset Map 33) should be altered accordingly.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify Policy STR9, inset map 33, paragraph 4.128 and Table 6 to include the site as a housing allocation for 20 dwellings and to remove the site from the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Policy PSTR/SP 1 The Strategy for Speldhurst parish

Question 4

Do you consider that the Local Plan:

Is sound

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Summary

Policy PSTR/SP1 does not enable the delivery of sustainable development. The lack of housing allocations in this Parish means that the Plan is unsound - it is not consistent with national policy and cannot be said to be effective.

Speldhurst Parish

Speldhurst is a large parish comprising of 4 villages: Ashurst, Langton Green, Old Groombridge and Speldhurst. The map provided below (taken from the Speldhurst Parish Council Parish Plan -September 2016) is a useful tool to appreciate the scale of the Parish and its proximity to nearby Tunbridge Wells.

[TWBC: see full representation to view image of map of Site 42 - Land at High View]

The Parish of Speldhurst is a highly desirable and thriving place to live. The Parish has two excellent primary schools (one at Langton Green and one at Speldhurst), local shops, pubs and restaurants and good public transport links and connections to Tunbridge Well to the east and East Grinstead to the west. It is therefore a sustainable community with good access to services and employment opportunities.

Despite the sustainable credentials of the parish, surprisingly, the Regulation 19 version of the plan only sets out a requirement to deliver 10-12 dwellings over the plan period (15 years plus). This is considered far too low and more units should be delivered in the Parish during the plan period.

Furthermore, no new sites are proposed in Langton Green which is surprising given its size and role in the settlement hierarchy. The Settlement Role and Function Study (February 2021) ranks the 21 settlements in Tunbridge Wells and Langton Green comes up as number 8 on the list. The Study also

groups settlements in terms of their characteristics, focusing on the range of services and facilities they provide (Table 6, page 24)

[TWBC: see full representation attached to view Table 6: Revised settlement groupings]

It seems unreasonable that Langton Green is not proposed to grow at all whilst other settlements in the same settlement category as Langton Green are due to grow significantly. Take for example, Horsmonden, which is expected to deliver 240 – 320 units. A more balanced approach should be adopted, and growth should be shared amongst settlements in order for the plan to be sustainable and in line with the National Planning Policy Framework.

Land at High View, Langton Road

Our client owns land known as 'Land at High View, Langton Road' (Site 42 of the Strategic Housing and Economic Land Availability Assessment January 2021) which is considered entirely suitable to deliver 20 new dwellings in the Parish. It is also available now and is deliverable.

Land at High View is in a highly sustainable location adjacent to the built-up edge of Langton Green/Tunbridge Wells. It is situated along a bus routes and is within easy walking distance of a range of facilities including a primary school, children's nursery, private school, dentist, church, village hall, shops and pubs. It is suitable, available and deliverable and should be identified as an allocation.

The SHELAA found that the site was unsuitable because of "landscape concerns and concerns about the release of the site from the Green Belt" which if released would cause "very high harm". We believe this level of harm has been exaggerated particularly given the fact that the site benefits from a strong and defensible wooded area spanning the entire southern boundary of the site (something that is just not mentioned at all in the SHELAA). This wooded boundary is clearly demonstrated in the aerial image below.

[TWBC: see full representation to view aerial image]

Furthermore, it is clear from draft Policy STR9 that the Council considers that there are exceptional circumstances to alter the boundaries of the Green Belt for other site allocations, particularly on sites which represent a logical extension the existing development boundary of a settlement or as 'rounding off' small local adjustments to the Green Belt boundary.

The subject site fulfils these criteria. It represents a logical extension to the limits to built development of Langton Green. It should be reconsidered and included as a housing allocation for 20 dwellings.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Modify PSTR/SP1, and include Land at High View, Langton Road (Site 42 SHELAA) as a housing allocation for 20 dwellings and to increase the housing numbers for Speldhurst to 30-32 dwellings. Remove the site from the Green Belt.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

. Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order for the Plan to be found sound.

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Under key issues in the PSLP:

Page 26 section 2.33

SFRA

2016s4793 - Appendix C - Flood Zones (A3 tiles - 31 to 38) – RevB

Pages 1,2, 6, 7 & 8 in particular (composite picture shown below)

Compare the proposed development area with the flood zones:

Of particular concern are the dark blue and lilac areas, flood zones 3a and 3b. In the PSLP it rightly notes that the key issue/challenge is “ensuring growth can be accommodated without further risk to areas vulnerable to flooding and, to provide **betterment**.”

Mitigation against flooding has been poor in the area in the past. Parts of Paddock Wood continue to flood regularly, with surface water flooding particularly an issue. Flood mitigation wasn't sufficient in the recent Persimmon development off Green Lane to stop the field earmarked for a new school to flood this January. It wasn't even a very wet winter. Drainage across Paddock Wood is inadequate, but it also has to be said that with the water table so high, there is nowhere for water to go. You can dig a pond as deep as you like. The water will fill it and the water table will not decrease. It may be possible to mitigate against flooding but at what cost? The inspector needs to look very carefully about the financial viability of building on this land, including careful examination of the green field runoff rates. In particular, the land to the West of Paddock Wood (that is East Capel plots 309, 141, 142), south of railway (the northern parts of plots 79 and 20 in Paddock Wood) and north of the railway (plots 51, 315, 316, 318, 319, 340, 347, 402, 216 and 218) is not suitable for building on, in my opinion. Thus this part of the plan is not sound. I call on the inspector to pay particular attention to this aspect of the plan. Regarding flooding, there has to be **betterment** or no building at all.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph 1

I question the need for so much building on Green Belt land.

Paragraph 2a

The table on page 24, paragraph 2.16 of the PSLP shows that between 2020 and 2038, the projected increase in population is from 118848 to 125003 people. This is an increase in population of 6155 people. So why, on page 36, paragraph 4.16 does the table say at the top that the housing need is 12204 dwellings? Specifically for Paddock Wood and east Capel, why are 3490-3590 dwellings allocated?

Paragraph 2c

With fewer houses built, there would be no need for two further primary schools.

Paragraph 2d

The location of this hub is unsuitable due to poor access by active travel. It's not even in Paddock Wood!

Paragraph 3 and 12

The houses being built already are not affordable to local people. How can you ensure that local people can afford these new houses? New houses being built are not being built to high standards. How will the council enforce green building?

Paragraph 13

Flooding is a very important consideration, with Paddock Wood having suffered years of flooding misery at the hands of council and water company's inaction. Page 139 para 5.165 says

"Surface water flooding risk is not considered particularly elevated, although the local network of urban surface water drains and foul water drains has flooded in recent rainfall events"

I disagree.

I have lived in Paddock Wood for nearly 30 years and there has been regular flooding here over that time, not just recent events, particularly in Church Rd, Maidstone Rd and the houses in the Allington Road area. Many of these are flash floods and have been exacerbated by further development since the mid 1990s. Any plan needs to specify flood mitigation to be better than for a "one-in-100-year-plus-climate-change-allowance" flood event.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Paragraph 1

Fully examine the potential of all existing and potential brownfield sites and reduce building on the Green Belt

Paragraph 2a

Reduce the housing allocation for Paddock Wood specifically where flood risk is greatest. See below.

Paragraph 2c

Only build one school

Paragraph 2d

Locate sports hub elsewhere, possibly on the eastern side

Paragraphs 3 and 12

More social housing. Also the plan needs to be much clearer about demanding that all housing be constructed as green buildings. This particularly applies to developers such as Persimmon, whose poor handiwork and disregard for green principles can already be seen in the estate off Green Lane.

Paragraph 13

Any plan needs to specify flood mitigation to be better than for a "one-in-100-year-plus-climate-change-allowance" flood event. Thorough consultation with the EA before any consideration to build on the western parcel and land just south of the railway line.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Local Plan Pre-Planning submission – Pembury

The Local Plan does not appear to include an S106 agreement to provide funds to support any new community facilities such as a new Community Hall in respect of which planning permission has already been granted or any development levy for this purpose for the benefit of the wider community.

Proposed Community Hall at St Peter's Pembury- Ref 20/02674/Full

St Peter's church, Hastings Road, Pembury, one of the Anglican Churches serving the village of Pembury (population 6,500 and growing) , has obtained planning permission for a community hall attached to the rear of the Church . the proposed building will be a light, airy, modern, carbon neutral building with its own independent entrance, heating, toilets kitchen facilities and parking. It will have a capacity for approximately 80 people, which meets the needs in the village for a medium sized facility, and is intended for use 95% by the community and 5% by St Peter's church, mainly on a Sunday.

Consultations with other community halls in the village has shown that, in normal non-covid times, all the other facilities are over subscribed at popular times. An ongoing survey of residents in the community has revealed an overwhelming need for opportunities to alleviate loneliness across all age ranges, for instance, older people have expressed a wish for a second lunch club (the Baptist Church organise one) and young mothers want a second Mums and Tots group or children's Centre, together with opportunities for all ages to join in activities that will enable greater social interaction, support those with mental health difficulties and provide more groups for young people to enjoy, such as an active youth club.. With more development planned for the village, the need for more community facilities will be all the greater and the proposed new community hall in Hastings Road, will be well within walking distance of most of the proposed new development.

The Purpose of this New Community Hall, is to provide physical infrastructure for a range of initiatives to help address some of the key Wellbeing concerns identified in the growing Pembury Community.

These initiatives will be driven by church, faith and other secular partners, working with specialist charities or statutory providers as appropriate, to utilise the proposed space to support the needs of the community as highlighted by village surveys, such as:

- . those with mental health challenges, particularly forms of dementia, depression and anxiety, or physical disabilities, through more social contact and engagement in relevant activities;
- . those carers of the house bound through a meeting place and social contact;
- . alleviation of loneliness across all age groups through social and activity groups;
- . social engagement and activity challenges tailored to age groups, including school holiday playschemes, parents of younger children, Youth groups and senior residents;
- . cultural events, including concerts and exhibitions, as a village centre that the local community can engage with to both deliver and experience;
- . provision of 'hospitality' facilities for key community services at the Church, including Funerals, Weddings, Baptisms and the popular Christmas services for local Schools and the wider community.

We understand there is no provision in the local plan for extending medical services. The new community hall would be ideal for medical clinics such as antenatal clinics if needed.

The congregation of St Peters has raised approximately £100,000 to date , which has enabled the appointment of a professional team to draw up the plans and take the project to planning permission. Thanks to the financial support of Kent County Councillor Paul Barrington-King, we have been able to appoint a design team to study the site , draw up more detailed plans, and obtain a Quantity Surveyor valuation of the project cost, which is anticipated to be in the region of £925,000.

Approximately half of this amount needs to be raised before we can approach Grant Making Trusts.

Further fundraising for the community hall has been hampered by covid restrictions and the fact that the church itself is currently having to fundraise to repair urgently the church tower and replace its AV system.

We request consideration for any S106 support for this facility that will benefit the people of Pembury for many years to come.

The need for this new building should be a priority for S106 agreements linked to the grant of any future development permissions and provision for this should be included in the Local Plan which recognises the need for enhanced facilities in the village over the immediate and longer term future.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 1	

Respondent's Name and/or Organisation Marguerita Morton

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Vision and Strategic Objectives 1 and 2 Development should help achieve the Council's goal of carbon neutrality for the borough by 2030. It should also help to conserve and enhance the borough's recognised heritage and environmental assets. All development should be of high-quality design that respects local identity and character.

Para 10

To support the goal to make the borough carbon neutral by 2030, and minimise the impact of climate change on communities, the economy, and the environment.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

It is not positively prepared
It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

In the specific cases of AL/RTW5 and AL/RTW17 and proposed development at Benenden East End How will the Council fulfil its goal by building on the Green Belt or AONB to help mitigate the effects of greenhouse gas if more and more housing is built on green open countryside. The Council should ensure that its plans and strategies including the Local Plan do not contribute to the degradation of the environment and/or increase CO2 emissions.

It should take into consideration a Tunbridge Wells Town Centre Action Plan before we know what opportunities there would be for building on previously developed land (PDL). Instead the Council have only now commissioned a Report from Nexus to provide an update on the current work in relation to town centres and retailing.

This is in response to the continuing work on the emerging Pre-Submission Local Plan, the comments received through the Draft Local Plan Regulation 18 consultation at the end of last year and in recognition of the need to formulate a new corporate strategy for Royal Tunbridge Wells town centre following the demise of the Calverley Square project.

This research is taking place to help the work of a Cross-Party group on Town Centre Development in connection with an Economic Development Strategy and the Five Year Plan. It will also help to understand the longer term consequences of the Covid-19 pandemic on the economic health and welfare of Tunbridge Wells. The consequent loss of office accommodation and retail could bring advantages if we use this space wisely. We should build affordable and environmentally sound new housing units for the young and the elderly who are locked out of decent, affordable homes. By concentrating on the urban town centre, we could find enough residential provision that would negate the need to build on Green Belt land.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The purpose of the planning system is to achieve sustainable development. CPRE believes that the NPPF tilts our Local Authorities towards development and *"they find it harder and harder to refuse planning permission even if they know that they should not."* A spokesman said *"We recognise the need to address the affordability gap...and to deliver it in a way that is consistent with our commitment to tackling the climate emergency"*.

An Appeal Court Decision on 29 January 2021 backed the disapplication of the NPPF sustainable development presumption when refusing a proposed housing scheme in an AONB area in the Monkhill Limited Case No. C1/2019/1955/QBACF

I believe that by abandoning the aforementioned development on the sites mentioned in Question 5, we would be able to meet our climate emergency objectives.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

EN9 BIODIVERSITY NET GAIN

The policy states that development will only be permitted where it can be demonstrated that there will be a measurable long term net gain for biodiversity

We think that by building on these Green Belt sites it would result in a net loss of biodiversity contrary to Paragraph 170 of the Framework which says that planning decisions should minimise impacts on and provide net gains for biodiversity, which requires that opportunities and locations for biodiversity enhancements will be identified.

EN 11- Net Gains for Nature: biodiversity

There is an abundance of wildlife, flora and fauna as evidenced in photos from residents. They would be at risk if the north east corner of the open field were to be built on that piece of land forming part of the larger habitat and providing a buffer from urban sprawl or encroachment.

EN14: Trees, Woodlands, Hedges and Development

Policies EN1 and EN14 will not allow development if it would damage or destroy one or more trees protected by a TPO. Furthermore, Para 170 NPPF states that planning decisions and policies should contribute to and enhance the natural and local environment. There will be a presumption in favour of the retention and enhancement of existing trees, woodland and hedgerow cover on site.

AIR QUALITY AT THE AL/RTW5 SITE

The Assessment says nothing about air quality due to its proximity to the A26 which is an AQMA zone and suffers moderate to severe air pollution during certain parts of the day, especially during morning and afternoon commuter travel hours. A new development is likely to add to this existing poor air quality and to traffic congestion at the Speldhurst Road access point as stated above.

Development on previously designated Green Belt Land is inconsistent with Para 137 and 139 NPPF and Para 4.73 and 4.74 of the PSLP Appendix 1

The land at Speldhurst Road and Reynolds Lane was included in a document known as Strategic Housing Land Availability Assessment (SHELAA) 2019. According to the sustainability assessment "This is a large site that would make a significant positive contribution to the housing objective. However, **the substantial use of private vehicles in this location causes the noise and air objectives to score very negatively. The site also has sensitive biodiversity, heritage and landscape features.**"

the Site Assessment Sheet states that **the site is unsuitable as a site allocation** due to landscape impact concerns as well as significant highway concerns so there is a contradiction in the assessment where it was previously described as appropriate for limited development, particularly the north and north eastern part of the site adjacent to existing residential development.

We do not accept that this is in accordance with Item 4, Appendix 1, para 4.73 of the PSLP which is not in favour of piecemeal development on a land ownership basis. Para 4.74 says that there should be overarching strategic framework such that the development taken as a whole provides a community with areas for housing, education, employment uses, retail, open space and so on. It emphasises the importance of habitat retention, improvement, and creating net gains for biodiversity. because the site lays predominantly within the Green Belt and Special Landscape Area, and contains ancient hedgerows and woodland, partly in special flood zone 3 and a landfill quarry, it is considered then as being **constrained**.

The Plan should ensure strategic transport corridors, shared infrastructure and meet cohesive design principles. None of these have been evidenced or justified in accordance with Para 139 NPPF. We believe that due to lack of traffic studies or biodiversity studies the Tunbridge Wells Borough Council has not made a sufficient case for "exceptional circumstances".

Para 109 of the NPPF and Policies TP1, Para 6.546 PSLP

No development must compromise the safe and free flow of traffic or the safe use of the road by others.

Section 4: Development Strategy and Strategic Policies

Para 4.46 In contrast, while the Main Urban Area of Royal Tunbridge Wells, along with Southborough, would be a prime candidate, it is wholly surrounded by the High Weald AONB and, where the AONB does not come up to the urban edge, mainly to the west and north, those areas are designated Green Belt. They are also reliant on the A26 and A264 for access, which are both observably congested for extended periods at peak times, with no obvious scope for significant relief, to the detriment of local amenities and the town's historic character.

The location of this proposed allocation would create a severe impact on Speldhurst Road which is narrow at the proposed access site. There is no footway on the adjacent road which is bordered by trees, hedges and only one gate into the field. That leads to a public footpath that runs south across Caenwood Farm and then turns east towards Reynolds Lane. Therefore, any traffic emerging from the Caenwood development site would be impeded by traffic using Speldhurst Road and contribute to that heavy traffic flow. Traffic comes to a virtual standstill during peak commuter times now without the addition of potentially hundreds of vehicles wishing to join in order to get to the A26 junction where there are now two sets of traffic lights with very complicated sequencing for pedestrian and vehicle crossing. The A26 coming from the south (the Town Centre of RTW) is a two lane carriageway enabling left turns into Speldhurst Road at the junction but continues as a single carriageway into Southborough London Road after the second set of lights. This causes heavy congestion during peak travelling hours.

Furthermore, traffic continuing north on the A26 is then joined by a second junction with Yew Tree Road on the right (and a third set of traffic lights) carrying heavy traffic from the Industrial Estate.

I would like the Inspector to consider the Traffic Modelling Appeals APP/U2235/W/20/3254134 and 3256952 relating to PINS Inquiry November 2020 Appeals A & B Bellway Homes -v- Maidstone Borough Council.

Para 50 of the report said amongst other things "*There is no national definition of what may constitute a severe impact in the context of Para.109 NPPF. No contrary evidence was provided by the Council as to how a severe impact should be considered or any quantification or threshold that should be applied in the context of these appeals to assess at what point, if any, an increase in congestion would amount to a severe residual impact on the road network.*"

Commentary by the Inspector on the efficient operation of the local highway

The effect of development of the Local Plan, **will generate additional traffic and could contribute to an increase in congestion, particularly at peak hours, even after mitigation in the form of road improvements and other measures to make sustainable travel more attractive and effective. However the concentration of development close to the town does allow alternative and more sustainable means of travel to be made available. That is less likely to be the case were the housing to be located away from the town in another part of the Borough where residents would still need access to employment and services in the town.**

[TWBC: Following comments moved from Question 3a]

We object specifically to the removal of the parcel of land from the Green Belt known as SO1a identified in the Green Belt Study 2 (GBS 2) of 2017. This site was considered at the time as part of the larger parcel, BA10, and was judged "too sensitive" to release.

The GBS2 judged SO1a made a "Moderate to Weak" contribution to Green Belt purposes (GBS 2 pg. 120 and 121) but the remainder of the land to the west designated as SO1b made a "Strong/Relatively Strong" contribution for GB purposes and not proposed for release (pages 122 to 123).

The most recent Green Belt Study Stage 3 (GBS3) confers a finding of "Low to Moderate" saying that "The impact of its release on the adjacent GB will be negligible. The proposed site was not even allocated a development reference at this stage. That was done in the PSLP dated 4 November 2020. We submit that due to the late allocation, it does not allow for full public consultation as would have been possible under Reg.18 Consultation and, therefore, deprives the public of adequate presentation or scrutiny. This is exacerbated by Reg. 19 Consultation being conducted under Covid-19 isolation or partial isolation conditions.

We do not accept this judgment as sound in that the evidence base from GBS2 had described the whole of the Caenwood Farm parcel as being too sensitive to release and we believe that GBS 3 was provided to support the change of use and cannot be justified to support the Local Plan on a strategic basis. Therefore, the removal of AL/RTW5 from the GB cannot be justified and therefore, the Plan is unsound.

We submit that the land at this site is clearly more connected to the countryside and the adjoining open fields and its loss will have a much greater impact than "negligible".

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

We believe that allocation AL/RTW5 should be removed from the Pre-Submission Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal Consultation Document

Appendix E Cumulative Impact Assessment for Green Belt page 165

Site AL/RTW5 appears on the impact assessment for allocated sites in the Green Belt. It was assessed as Site No.30 including 100, 199 and 205 described as Caenwood Farm and Whitegates Farm stating "This is a large site that would make a significant positive contribution to the housing objective. However, the substantial use of private vehicles in this location causes the noise and air objectives to score very negatively. The site also has sensitive biodiversity, heritage and landscape features."

The Assessment says nothing about air quality due to its proximity to the A26 which is an AQMA zone and suffers moderate to severe air pollution during certain parts of the day, especially during morning and afternoon commuter times. A new development is likely to add to this existing poor air quality and to traffic congestion at the Speldhurst Road access point.

EN 11- Net Gains for Nature: biodiversity

There is an abundance of wildlife, flora and fauna as evidenced in photos from residents. They would be at risk if the north east corner of the open field were to be built on that piece of land forming part of the larger habitat and providing a buffer from urban sprawl or encroachment.

EN14: Trees, Woodlands, Hedges and Development

Policies EN1 and EN14 will not allow development if it would damage or destroy one or more trees protected by a TPO. Furthermore, Para 170 NPPF states that planning decisions and policies should contribute to and enhance the natural and local environment. There will be a presumption in favour of the retention and enhancement of existing trees, woodland and hedgerow cover on site.

If a planning application does go forward providing for unavoidable loss of trees on site, the developer will be required to implement appropriate management measures. It will be necessary to obtain a tree survey in accordance with the current recommendations of BS5837. The tree survey information should include protection, mitigation and management measures including arboricultural site supervision where required.

Question 1	
Respondent's Name and/or Organisation	Marguerita Morton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW16

How will the Council fulfil its goal by building on the Green Belt or AONB to help mitigate the effects of greenhouse gas if more and more housing is built on green open countryside. The Council should ensure that its plans and strategies including the Local Plan do not contribute to the degradation of the environment and/or increase CO2 emissions.

It should take into consideration a Tunbridge Wells Town Centre Action Plan before we know what opportunities there would be for building on previously developed land (PDL). Instead the Council

have only now commissioned a Report from Nexus to provide an update on the current work in relation to town centres and retailing.

This is in response to the continuing work on the emerging Pre-Submission Local Plan, the comments received through the Draft Local Plan Regulation 18 consultation at the end of last year and in recognition of the need to formulate a new corporate strategy for Royal Tunbridge Wells town centre following the demise of the Calverley Square project.

This research is taking place to help the work of a Cross-Party group on Town Centre Development in connection with an Economic Development Strategy and the Five Year Plan. It will also help to understand the longer term consequences of the Covid-19 pandemic on the economic health and welfare of Tunbridge Wells. The consequent loss of office accommodation and retail could bring advantages if we use this space wisely. We should build affordable and environmentally sound new housing units for the young and the elderly who are locked out of decent, affordable homes. By concentrating on the urban town centre, we could find enough residential provision that would negate the need to build on Green Belt land.

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<input type="checkbox"/> It is not positively prepared
	<input type="checkbox"/> It is not consistent with national policy

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Delete the Allocation Site from the Local Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?	<input type="checkbox"/> No, I do not wish to participate in examination hearing session(s)
---	---

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

EN 11- Net Gains for Nature: biodiversity

There is an abundance of wildlife, flora and fauna as evidenced in photos from residents. They would be at risk if the north east corner of the open field were to be built on that piece of land forming part of the larger habitat and providing a buffer from urban sprawl or encroachment.

EN14: Trees, Woodlands, Hedges and Development

Policies EN1 and EN14 will not allow development if it would damage or destroy one or more trees protected by a TPO. Furthermore, Para 170 NPPF states that planning decisions and policies should contribute to and enhance the natural and local environment. There will be a presumption in favour of the retention and enhancement of existing trees, woodland and hedgerow cover on site.

If a planning application does go forward providing for unavoidable loss of trees on site, the developer will be required to implement appropriate management measures. It will be necessary to obtain a tree survey in accordance with the current recommendations of BS5837. The tree survey information should include protection, mitigation and management measures including arboricultural site supervision where required.

AIR QUALITY

The Assessment says nothing about air quality due to its proximity to the A26 which is an AQMA zone and suffers moderate to severe air pollution during certain parts of the day, especially during morning and afternoon commuter travel hours. A new development is likely to add to this existing poor air quality and to traffic congestion at the Speldhurst Road access point as stated above.

CLIMATE CHANGE AND NEW CORPORATE STRATEGY FOR A TUNBRIDGE WELLS TOWN CENTRE ACTION PLAN

Tunbridge Wells Borough Council has passed a Motion that declared that the Council recognises global climate change and committed to reduce its carbon emissions towards becoming carbon neutral by 2030.

How will the Council fulfil its goal by building on the Green Belt to help mitigate the effects of greenhouse gas if more and more housing is built on green open countryside. The Council should ensure that its plans and strategies including the Local Plan do not contribute to the degradation of the environment and/or increase CO2 emissions.

We could mitigate against CO2 emissions by the increased use of Brownfield Sites. There are 37 sites registered on the 2020/21 Brownfield Site Register with a capacity of 805 homes, of these 3 are located in Green Belt, 4 in AONB and 1 partly within the Green Belt and AONB. If we had a Tunbridge Wells Town Centre Action Plan in place, we would know what opportunities there would be for building on previously developed land (PDL). Instead the Council have only now commissioned a Report from Nexus to provide an update on the current work in relation to town centres and retailing.

This is in response to the continuing work on the emerging Pre-Submission Local Plan, the comments received through the Draft Local Plan Regulation 18 consultation at the end of last year and in recognition of the need to formulate a new corporate strategy for Royal Tunbridge Wells town centre following the demise of the Calverley Square project.

This research is taking place to help the work of a Cross-Party group on Town Centre Development in connection with an Economic Development Strategy and the Five Year Plan. It will also help to understand the longer term consequences of the Covid-19 pandemic on the economic health and welfare of Tunbridge Wells. The consequent loss of office accommodation and retail could bring advantages if we use this space wisely. We should build affordable and environmentally sound new housing units for the young and the elderly who are/may be locked out of decent, affordable homes. By concentrating on the urban town centre, we could find enough residential provision that would negate the need to build on Green Belt or AONB land.

Question 1	
Respondent's Name and/or Organisation	Standard Life Investment UK Real Estate Fund
Question 2	
Agent's Name and Organisation (if applicable)	Tetra Tech Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

Proposed Limit to Build Development (Policy STR10)

Inset Map 01 - RTW and Southborough

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of Standard Life Investments UK Real Estate Fund, Tetra Tech Planning **object** to the current alignment of the Limit to Built Development identified on the proposed Policies Map in respect of land at Knights Park. The definitive boundary to the Limit to Built Development which runs along the Parks' eastern extent is presently difficult to establish on the Policies Map due to thickness of red line. Moreover, the proposed Limit to Built Development appears to be too close to the rear elevations of the main leisure terrace and omits areas of the existing service yard and emergency escape routes. It is felt that the Limit to Built Development should follow route identified below on the former Draft Local Plan Policy AL/RTW 15 Land at Knights Park allocation, to allow appropriate servicing space to the rear of the leisure development. On the basis of the current alignment, the Policies Map is neither considered to be 'justified' or 'effective' and therefore remains 'unsound'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is:

- . Amend Limits to Built Development on Policies Map - It is recommended that the Policies Map should be amended to reflect the eastern boundary of the former Draft Local Plan Policy AL/RTW 15 Land at Knights Park allocation seen below. [TWBC: See supporting document for map]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is deemed that the consideration of Limits to Built Development matters relating to Knights Park requires our attendance at the public examination of the Tunbridge Wells Borough Local Plan up to 2038.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 5 Infrastructure and Connectivity

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Standard Life Investments UK Real Estate Fund stand by representations made in respect of the Draft Local Plan (Regulation 18) consultation document in respect of Policy STR 5 Essential Infrastructure & Connectivity (please refer to **Attachment A**) and maintain that the current wording of is not deemed to be 'positively prepared', 'justified', 'effective' or 'consistent with national policy' as required by the NPPF for the given reasons. As such, the Pre-Submission policy approach is deemed to remain 'unsound'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to **Attachment A** relating to Policy STR 5 Essential Infrastructure & Connectivity.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Executive Summary

Our client - Standard Life Investments UK Real Estate Fund own Knights Park which forms a leisure park located to the north east of Royal Tunbridge Wells, situated south of Longfield Road. The well-established park offers a range of leisure uses including an Odeon Cinema, Bowlplex, Nuffield Health fitness and well-being centre, a Punch pub and a Frankie & Benny's restaurant. The Park plays a critical role in the economic function of the Borough.

In respect of the Draft Local Plan consultation (2019), Tetra Tech Planning (formerly WYG) submitted representations to Tunbridge Wells Borough Council (TWBC) in support of Policy AL/RTW 15 (Land

at Knights Park), which previously allocated the site as a preferred location for leisure use (at Section 5.31). The draft Policy AL/RTW 15 stated:

“This site, as defined on the Royal Tunbridge Wells draft Policies Map, is allocated for compatible leisure uses that would deliver an intensification of the leisure offer currently provided within the site...”

After review of the Pre-Submission Local Plan (February 2021), it appears that the Council has opted to omit Policy AL/RTW 15 (Land at Knights Park) and the associated Policies Map allocation in its entirety, with no clear justification having been provided in support of this change in stance. In summary:

1. In the context of the Tunbridge Wells Retail & Leisure Study (Nexus, 2017) (“2017 Study”), the Draft Local Plan proposed the allocation of Knights Park (Policy AL/RTW 15) for compatible leisure use;
2. Without clear justification within the Council's evidence base (i.e. by virtue of the Tunbridge Wells Retail Commercial Leisure & Town Centre Uses Study Update (Nexus, February 2021) (“2021 Update”), Consultation Statement for the Draft Local Plan (March 2021) or otherwise) Knights Park has been deallocated for leisure use and now forms unallocated land within the Limits to Built Development;
3. In parallel, Policy ED 1 (Key Employment Areas) by virtue of its current wording places preference in policy terms for the development of new leisure and retail floorspace across c. 90 ha of land immediately adjacent to Knights Park (i.e. Royal Tunbridge Wells North Farm / Longfield Road).

On this basis, **we strongly object to the unjustified omission of Knights Park AL/RTW 15 (Land at Knights Park) as a leisure allocation**, and consider the decision renders the Plan ‘unsound’ for the following reasons.

Introduction

The Site Assessment Sheets for Royal Tunbridge Wells, Strategic Housing and Economic Land Availability Assessment (SHELAA) (January 2021) states;

“The site is not considered to be suitable for further commercial leisure uses which would conflict with the town centres first approach. Although it is a PDL [previously developed land] site and within the existing LBD [Limits to Built Development], it would not be appropriate to allocate for further commercial leisure uses in this location which might detract from supporting development in Royal Tunbridge Wells town centre”.

This statement is questionable on the grounds that there is evidence in the Council's own background papers to suggest that the existing designated town centres within the administrative area are physically incapable of accommodating certain leisure demands of the Borough (see below). Whilst it is acknowledged that neither the 2017 Study nor the 2021 Update consider there to be a specific quantitative need for the Council to allocate new leisure floorspace, we contend that the qualitative deficiencies of the town centres identified within the 2017 Study and 2021 Update justify the allocation. As there has been no change in the town centres first policy set out in the NPPF since the Draft Local Plan was published including Knights Park for leisure use, we question the Council's rationale for this change in stance.

Moreover, as set out below, the strategy being pursued by the Council in the Pre-Submission Local Plan assigns preference for leisure development at other out of centre locations within the Key Employment Areas by virtue of Policy ED1 (Key Employment Areas) (i.e. Royal Tunbridge Wells North Farm / Longfield Road Area and Southborough High Brooms Industrial Area) and Policy STR/RTW 1 (The Strategy for Royal Tunbridge Wells). This approach demonstrates a clear bias against future development at Knights Park based on an unsubstantiated assumption that development at the Park might result in significant adverse impact on the established town centres. The question as to why Knights Park as a vital economic driver within with Borough has been specifically excluded from the Key Employment Areas is equally seriously questioned.

The following section sets out how the Council's stance in respect of Knights Park is fundamentally at odds with the NPPF tests of ‘soundness’ in regard to the preparation of local plans and strategies (paragraph 35), which advise that a Plan should be a) positively prepared, b) justified, c) effective and d) consistent with national policy.

Economic importance of Knights Park

As previously highlighted, Knights Park is a vital element of the local economy in terms of hospitality and leisure for the Borough, contributing skilled and unskilled jobs and resulting in significant expenditure within the local area. The 2017 Study highlights the following in respect of Knights Park;

- In respect of the cinema provision (Odeon): *“There are two full-time cinemas in the Borough which together attract a healthy 50.6% of all cinema trips made by residents of the Study Area (55.0% overall). These are the Odeon cinema in Tunbridge Wells (9 screens) and the Kino cinema in Hawkhurst (1 screen), with the Odeon cinema attracting 44.7% of all trips and the Kino cinema attracting 5.9% of all trips”* (paragraph 8.21). *“The Borough benefits from notable inflow of cinema trade, with the Odeon in Tunbridge Wells also being the most popular designation for residents in Zones 2 (40.3% of all trips), 5 (95.3%), 8 (40.5%) and 12 (54.3%)”* (paragraph 8.22)
- In respect of the bowling alley provision (Bowlplex) this accounts for *“... all ten-pin bowling trips made by residents of the Borough. It also accounts for all ten-pin trips made by residents of Zones 5 and 8 outside of the Borough, and 90.8% of trips made by residents of Zone 2. Similarly to the Odeon in Tunbridge Wells, the Bowlplex **proves to be a key destination for leisure trade within the Borough itself, in terms of attracting those from outside**”*. (paragraph 8.31) (Tetra Tech emphasis)

In view of the above, it is clear that TWBC should be harnessing and safeguarding the ability for Knights Park to continue to draw in trade and keep pace with the wider leisure market, as one of its key existing economic assets.

Leisure Market Deficiencies

The NPPG (paragraph 005 Reference ID: 2b-005-20190722) states; *“It may not be possible to accommodate all forecast needs for main town centre uses in a town centre: there may be physical or other constraints which make it inappropriate to do so. **In those circumstances, planning authorities should plan positively to identify the most appropriate alternative strategy for meeting the identified need for these main town centre uses, having regard to the sequential and impact tests**”* (Tetra Tech Planning). Whilst the Council’s 2017 Study and 2021 Update suggest is that there is not any Borough wide quantitative leisure need, it is deemed unrealistic to conclude from the evidence base that the designated centres in Tunbridge Wells are currently able to accommodate all the different types of leisure development required by the residents of the Borough, particularly the requirement for modern large footplate units, for example those required for cinemas, bingo, certain restaurants, pubs and gyms. This is acknowledged through observations made within the 2017 Study and 2021 Update, which recognise that:

- In respect of the national cinema market, that: *“... with typical floorspace requirements of 2,790 - 4,180 sq m, the contracted rent obligations for cinema operators are significant, **making both the spatial and financial prospects of town centre sites unfeasible**”* (para 3.134, 2021 Update) (Tetra Tech emphasis). The 2017 Study indicates that: *“growth in population to 2035 will provide welcome additional patronage to the existing cinemas...”* (paragraph 8.65, 2021 Update). Tetra Tech note that whilst the desire of the Council to see another cinema delivered in Tunbridge Wells town centre is acknowledged, the former ABC cinema site in the town centre has remained derelict since 2001 and the mixed-use planning permission intended for an Everyman cinema is still yet to be delivered (albeit we acknowledge groundworks were recently commenced to ensure the permission did not expire). The potential inclusion of a cinema at Royal Victoria Place likewise never came to fruition. At paragraph 3.148, the 2021 Update advises that; *“...there may be requirements for these uses in the medium to longer term”*, whereas paragraph 8.17 indicates that; *“whilst town centre allocations for new cinema and theatre floorspace remains desirable (if not necessary), viability and deliverability remains challenging”*.
- In terms of food and beverage (F&B) uses, the 2021 Update confirms: *“At the time of our assessment, there was only one F&B unit to let in Royal Tunbridge Wells – a 257 sq m restaurant on Mount Ephraim to the north of the town centre. Over the past 5 years, the lowest annual take-up of F&B space was recorded in 2016 where c. 418 sq m was leased across two units. On this basis, **the current supply is insufficient to meet even the lowest level of typical demand...**”* (paragraph 3.84) (Tetra Tech emphasis). Whilst the 2021 Update goes on to suggest that there is unlikely to be high demand for F&B space in the immediate and short term (due to the after effects of the COVID-19 lockdowns), Tetra Tech would contest this suggestion and highlight that the Plan must look forward to consider the longer term requirements of the market going forward during the economic recovery post COVID-19 up to 2038. It is highly anticipated the desire for larger floorplate units will form part of that requirement.

Clearly, the physical constraints of the town centre locations are having an adverse impact of the Borough’s ability to service its’ own leisure needs. In this regard, the 2017 Study identifies a notable amount of leakage from the Study Area (i.e. the Tunbridge Wells Borough administrative area) indicating that of the 71.2% Study Area residents who make restaurant trips, under half (just 31.7%) were made

to venues within the Borough. Likewise, a high leakage in respect of residents visiting bars, pubs, social clubs and nightclub trade out of Zone 10 (Paddock Wood, 37.0%) was identified (paragraph 8.28, 2017 Study) which lies within a 10-minute drive-time of Knights Park. This current trend obviously raises several concerns regarding sustainability and need to travel for leisure use.

The allocation of Knight Park to accommodate the abovementioned deficiencies in the defined town centres seems an entirely rationale and practical approach, allowing the Council greater control over the location and provision of out of centre leisure floorspace. The allocation would curb other ad-hoc out of centre development in potentially less sustainable locations. It is deemed that Knights Park forms a sequentially preferable site for the provision of such new leisure floorspace, encouraging linked trips with the other leisure facilities at the site. The Park should be favourably utilised to accommodate the modern leisure floorplates / floorspace that are unable to be accommodated in constrained town centre locations. In parallel, the leisure allocation will favourably serve a newly established residential catchment, in a highly accessible location and reduce the need to travel to other leisure destinations further afield.

In respect of the identified deficiencies in the leisure market, the Pre-Submission Local Plan is currently deemed to be 'unsound' based in its failure to recognise the need to purposefully allocate sites to accommodate leisure floorspace beyond the centres defined in the retail hierarchy (Policy ED 8) and to provide certainty by allocating sequentially preferable sites to address such deficiencies.

Conflict with other plan policies

As is discussed in greater detail within our representations put forward in respect of Policy ED1 (Key Employment Areas), the Pre-submission Plan likewise places preference in policy terms on retail, food and drink and other leisure development in the neighbouring Royal Tunbridge Wells North Farm / Longfield Road area by virtue of the policy wording.

Policy ED1 states; "*The retention of existing, and proposals for new, employment provision, to include the following uses, will be acceptable within these defined areas...*" Table 12 then identifies various 'Key Employment Areas' including the Royal Tunbridge Wells North Farm / Longfield Road area as being suitable for –

- . Class B (general industry and storage and distribution)
- . Class E (financial, professional and other business uses, retail, food and drink, and leisure)
- . Class F (appropriate leisure uses) and
- . Other sui generis uses of an appropriate type and scale

The policy wording continues to state: "*Proposals for the retention of existing floorspace and the encouragement of new floorspace in the Key Employment Areas on allocated and non-allocated and vacant sites, and through the intensification or redevelopment of existing sites, **will be supported in principle***" (Tetra Tech emphasis). In respect of suitable uses, paragraph 6.446 likewise states: "*Such uses include leisure and retail where appropriate, particularly for the North Farm/Longfield Road area in Royal Tunbridge Wells, which is already established as a mixed employment, retail, and leisure destination*".

As previously mentioned, it is acknowledged that the NPPF advises that planning policies should; "(e) where suitable and viable town centre sites are not available for main town centre uses, allocate appropriate edge of centre sites that are well connected to the town centre. If sufficient edge of centre sites cannot be identified, **policies should explain how identified needs can be met in other accessible locations that are well connected to the town centre**" (paragraph 85) (Tetra Tech emphasis). Notwithstanding this, it is questioned whether it is in fact TWBC's intention to assign a policy preference for retail and leisure use across the c. 90 ha of land (i.e. the extent of the Royal Tunbridge Wells North Farm / Longfield Road Employment Area) within 1.7 km of the Tunbridge Wells town centre on the proposed Policies Map. These areas include; Stag Trading Park, Kingstanding Business Park, High Brooms Industrial Estate, Decimus Park, North Trading Estate, Colebrook Industrial Estate, The Fountain Retail Park, Longfield Retail Park, Tunbridge Wells Shopping Park and Great Lodge Retail Park and various standalone trade/retail units situated along Longfield Road.

Whilst it is noted that the supporting plan text at paragraph 6.445 indicates: "*Given that Class E of the revised Use Class Order could enable retail uses to occupy non-retail Class E premises in out-of-centre locations, circumventing any relevant 'town centre first' policies (as set out in Policies ED 9: Defined Town and Rural Service Centres and ED 10: Sequential Test and Local Impact Test), and where there is a risk that an alternative use within Class E (such as retail) would impact on the health of surrounding centres, a condition may be attached to any approval of planning permission in out-of-centre locations*

to restrict the use to that applied for”, this approach is not communicated in the policy wording, and moreover the proposed policy wording, in fact states that; “The retention of existing, **and proposal for new, employment provision**, to include the following uses, **will be acceptable within these defined areas**” (Tetra Tech emphasis). Whilst it is accepted that by virtue of the introduction of the Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020, that the Council retain no control over changes within Class E (Commercial, Business and Service) and Class F (Local Community and Learning), the policy wording which applies to new floorspace circumvents the impact test and pre-empts the outcome of the sequential test for both retail and leisure use, in a manner contrary to national policy (NPPF, Chapter 7). The policy is therefore quite clearly at odds with paragraph 16 (d) of the NPPF which requires “policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”. The same arguments likewise apply to Policy STR/RCTW 1 which similarly promotes; “the retention, expansion, and intensification where relevant of existing employment premises and **support leisure uses within the Key Employment Areas**” (Tetra Tech Emphasis). Significantly, the policy approach of Policy ED1 and STR/RTW 1 are clearly not ‘consistent with national policy’ nor in any way ‘justified’ by the Council’s own retail and leisure evidence base and therefore clearly renders the plan ‘unsound’.

Conclusion

Based on the foregoing, the current leisure use policy approach as set out in the Pre-submission Draft is fundamentally at odds with the thrust of national planning policy in respect of the location of main town centre uses as defined by the NPPF or the allocation of sites based on identified need (NPPF, paragraph 85). The current Pre-submission Local Plan clearly assigns preference to the neighbouring out of centre Royal TunbridgeWells North Farm / Longfield Road area for new retail, food and drink and leisure floorspace with no clear justification having been provided within its retail and leisure evidence base, as required by the NPPF, and therefore is clearly ‘unsound’ in this regard. Based on the preceding, we consider that Knights Park should be reallocated for leisure use, in line with our suggestion modifications outlined in response to Question 6 below. Likewise, please see our suggested modifications in respect of Policy ED 1 and Policy STR/RTW 1 in the following section.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is for the:

- Re-allocation of Knights Park for Leisure Use by virtue of Policy AL/RTW 15 (or alternative policy reference) and associated allocation on the Policies Map** - On the basis of the preceding, it is proposed that the land at Knights Park allocation should be positively re-introduced back into the Plan to address the leisure use deficiencies of the Borough on previously developed land and in a sustainable location capable of benefitting from linked trips. For this policy allocation to be deemed ‘effective’ and therefore ‘sound’ (and as recommended within our Draft Plan Regulation 18 representations (**see Attachment A**)), the policy wording should confirm the scope of ‘leisure’ use permitted for the purposes of this policy. It is advised that this definition should remain consistent with the ‘Leisure Activities’ identified in the Council’s evidence base – Tunbridge Wells Retail and Leisure Study (Nexus, 2017) (see Figure 8.1) which confirms ‘Leisure’ includes: indoor sports and health facilities, cinemas, restaurants, pubs and bars, ten pin bowling, bingo, theatre / concert hall, museum / art galleries, and outdoor sports. Other minor alterations to the

former policy wording are likewise suggested below, to ensure the policy remains clear, concise and effective. As such, the suggested policy wording is as follows:

"Policy AL/RTW XX (Land at Knights Park) - This site, as defined on the Royal Tunbridge Wells draft Policies Map, is allocated for compatible leisure uses that would deliver an intensification of the leisure offer currently provided within the site, to include; indoor sports and health facilities, cinemas, restaurants, pubs and bars, ten pin bowling, bingo, theatre / concert hall, museum / art galleries, and outdoor sports.

Development on the site shall accord with the following requirements:

1. **Provide suitable vehicular access and not result in an adverse**; impact upon wider highways network; 2. **Deliver suitable parking provision** (see Policy TP 3: Parking Standards); 3. **Positively respond to the surrounding landscape setting** assessment to inform by virtue of siting and design (see Policy EN 1: Design and other development management criteria); 4. **Where necessary, retain the Retention of trees belt between Knights Wood and Knights Park along the western boundary of the site** (see Policy EN 124: Trees, Woodlands, Hedges and Development); 5. **Development proposals will need to demonstrate, where appropriate, demonstrate a positive contribution to Biodiversity Opportunity Area targets** (see Policy EN 944: **Biodiversity Net Gain Net Gains for Nature: biodiversity**).

It is expected that contributions will be required, towards the following if necessary, to mitigate the impact of the development.:

a. ~~The provision of sustainable and active transport mitigation measures, particularly contributions to existing bus provision to extend bus routes into the site; and/or b. Potential highway works within the vicinity of the site, including the provision of pedestrian crossings; and/or c. Potential town centre-wide, or town-wide transport mitigation measures (for a. to c. see Policies TP 1: Transport Assessments, Travel Plans, and Mitigation and TP 2: Transport Design and Accessibility); d. The provision of buildings and spaces to provide cultural infrastructure; e. Other mitigation measures identified through the pre-application process and planning application."~~

Suggested Policies Map (Inset Map 01 - RTW and Southborough) update:

[TWBC: See supporting document for map]

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is deemed that the consideration of leisure matters requires our attendance at the public examination of the Tunbridge Wells Borough Local Plan up to 2038.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

The Sustainability Appraisal (SA) of the Pre-Submission Local Plan (February 2021) evaluates the Knights Park allocation for retail and leisure use (see Figure 1.1, Column 1 & 2 in the schedule below for reference). As the candidate site wasn't proposed to be allocated for retail use by ourselves, or as part of the Draft Local Plan, the 'summary' commentary regarding the negatives scores given, particularly in respect of Business Growth and Services and Facilities based on the assumed impact on the town centre are deemed to be unreasonable. When comparing with other sites allocated in the Pre-submission Local Plan (Columns 4 and 5 - for example), it appears as though the Knights Park site has been assigned diminished scores on certain objectives in error. After reviewing the 'Decision Aiding Questions used for Scoring SA Objectives' at Appendix B of the SA, the following

Sustainability Objectives were re-scored, resulting in a more positive scores for; Business Growth, Climate Change, Deprivation, Land Use, Landscape, Services and Facilities and Water. The associated explanation for the proposed uplift in scores for each of these objectives is provided, where applicable, in Column 3. The new SA scores of the revised AL/RTW 15 (Land at Knights Park) are now provided at Column 6 and demonstrates that the site scores equally, if not better than other sites which have been put forward for

allocation within the Pre- Submission Local Plan (for example: AL/RTW 18 and AL/RTW 17).

Figure 1.1 Knights Park SA Review

[TWBC: See supporting document for Figure 1.1]

Overall from a sustainability perspective, the fact that 550 homes and a primary school have recently been constructed surrounding the Park within easy walking distance at Knights Wood, only serves to substantiate the position that the de-allocation of the Park for leisure use within the Pre-submission Local Plan is entirely unwarranted, and not 'positively prepared' as required by the NPPF. Furthermore, the recent COVID-19 pandemic measures now place even greater emphasis on the need to ensure facilities are safeguarded within easy walking distance of resident populations, in the context of the 'stay local' messaging and lessons learnt from the pandemic. Similarly, the well-being and equalities benefits of facilitating new jobs within an area with the highest unemployment within the Borough should not be overlooked.

In conclusion, we are not aware of any reasoning as a result of the SA exercise which would preclude the proposed allocation of the site for leisure use.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Question 1	
Respondent's Name and/or Organisation	Standard Life Investment UK Real Estate Fund
Question 2	
Agent's Name and Organisation (if applicable)	Tetra Tech Planning
Question 3	

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/RTW 1 The Strategy for Royal Tunbridge Wells

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of Standard Life Investments UK Real Estate Fund, Tetra Tech Planning **object** to Policy STR/RTW 1 (The Strategy for Royal Tunbridge Wells) which assigns preference in policy terms to, *inter alia*, new leisure floorspace development within the Key Employment Areas. See commentary submitted in respect of overarching Policy ED 1 (Key Employment Areas).

In addition, no definition of 'leisure' is provided either in the policy wording or supporting text. Based on the Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020, the term 'leisure' could potentially cut across a range of use classes, theoretically comprising:

- . Class C1 (hotels)
- . Class E (b) (food & drink); (d) (indoor sport, recreation or fitness)
- . Class F2(d) (indoor or outdoor swimming pools)

- . *Sui Generis* (including theatres, amusements, hostels, nightclubs, casinos, public houses, wind bars, or drinking establishments, drinking establishments with expanded food provision, hot food takeaways, venues for live music performance, cinemas, bingo halls and dance halls)
- The vagueness in terms of not defining the scope of 'leisure' uses permitted and the potential for resultant significant adverse impacts on designated town centres within the Borough by not defining a quantum / threshold for leisure use is a fundamental flaw. As such, it is not considered the policy as it currently stands is 'positively prepared', 'justified', 'effective' nor 'consistent with national policy', and therefore is 'unsound' based on the requirements of the NPPF.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is to:

- . **Re-word the Policy STR/RTW 1** as follows:
"The strategy for the unparished area at Royal Tunbridge Wells, as defined on the Policies Map (Inset Map 1), is to: ...5. Promote the retention, expansion, and intensification where relevant of existing employment premises and support leisure uses within the Key Employment Areas"

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

☐ No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

☐ Yes, I wish to be notified of future stages of the Local Plan

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/RTW 18 Land at the former North Farm landfill site, North Farm Lane and land at North Farm Lane, North Farm Industrial Estate

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of Standard Life Investments UK Real Estate Fund, Tetra Tech Planning **object** to Policy AL/RTW 18 in respect of the open-ended nature of the current wording regarding the site allocation for "...renewable or sustainable energy, sport, recreation, or **leisure uses (including those that fall into associated sui generis use)**" (Tetra Tech emphasis added).

No definition of 'leisure' is provided either in the policy wording or supporting text. Based on the current Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020, the term 'leisure' could potentially cut across a range of use classes, theoretically comprising:

. Class C1 (hotels)

- Class E (b) (food & drink); (d) (indoor sport, recreation or fitness)
- Class F2(d) (indoor or outdoor swimming pools)
- Sui Generis* (including theatres, amusements, hostels, nightclubs, casinos, public houses, wind bars, or drinking establishments, drinking establishments with expanded food provision, hot food takeaways, venues for live music performance, cinemas, bingo halls and dance halls)

The current vagueness in terms of not defining the scope of 'leisure' uses permitted by the policy and the potential for resultant significant adverse impacts on designated town centres within the Borough by not defining a quantum / threshold for leisure use is a fundamental flaw. There is likewise an absence of any clear justification for an unrestricted leisure allocation within the Council's Leisure evidence base and the Strategic Housing and Economic Land Availability Assessment Site Assessment Sheets for Tunbridge Wells (January 2021).

At present, the site is, in theory, could be developed for unrestricted leisure use. As such, it is not considered the policy as it currently stands is 'positively prepared', 'justified', 'effective' nor 'consistent with national policy', and therefore is 'unsound' based on the requirements of the NPPF.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modifications are to either:

- Define the scope of 'leisure' uses permitted by the policy allocation and define the quantum / threshold of leisure floorspace permitted; or**
- Clarify that the permitted leisure provision is to be an 'ancillary leisure use' within the policy wording**

Our suggested Policy AL/RTW 18 wording is:

"...renewable or sustainable energy, sport, recreation, or **ancillary** leisure uses (including those that fall into associated *sui generis* use)"

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- ☐ No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

- ☐ Yes, I wish to be notified of future stages of the Local Plan

To which part of the Local Plan does this representation relate?

Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy EN 2 Sustainable Design Standards

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Standard Life Investments UK Real Estate Fund stand by representations made in respect of the Draft Local Plan (Regulation 18) consultation document in respect of Policy EN3 Sustainable Design Standards (now Policy EN2) (please refer to **Attachment A**) and maintain that the current wording should be altered as suggested to be 'effective' and 'consistent with national policy' as required by the NPPF for the given reasons. As such, the Pre- Submission policy approach is deemed to remain 'unsound'.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please refer to **Attachment A** relating to Policy EN3 Sustainable Design Standards (previously Policy EN 2).

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of Standard Life Investments UK Real Estate Fund, Tetra Tech Planning **object** to Policy ED1 (Key Employment Areas) which assigns preference in policy terms to new retail, food and drink and other leisure floorspace development in the Royal Tunbridge Wells North Farm / Longfield Road area by virtue of the policy wording.

Policy ED1 states; “The retention of existing, and proposals for new, employment provision, to include the following uses, will be acceptable within these defined areas...” Table 12 then identifies various ‘Key Employment Areas’ including the Royal Tunbridge Wells North Farm / Longfield Road area as being suitable for –

- . Class B (general industry and storage and distribution)
- . Class E (financial, professional and other business uses, retail, food and drink, and leisure)

- . Class F (appropriate leisure uses and
- . other *sui generis* uses of an appropriate type and scale

The policy wording continues to state: “*Proposals for the retention of existing floorspace **and the encouragement of new floorspace** in the Key Employment Areas on allocated and non-allocated and vacant sites, and through the intensification or redevelopment of existing sites, **will be supported in principle***” (Tetra Tech emphasis). In respect of suitable uses, paragraph 6.446 likewise states: “*Such uses include leisure and retail where appropriate, particularly for the North Farm/Longfield Road area in Royal Tunbridge Wells, which is already established as a mixed employment, retail, and leisure destination*”.

As previously mentioned, it is acknowledged that the NPPF advises that planning policies should; “(e) *where suitable and viable town centre sites are not available for main town centre uses, allocate appropriate edge of centre sites that are well connected to the town centre. If sufficient edge of centre sites cannot be identified, **policies should explain how identified needs can be met in other accessible locations that are well connected to the town centre***” (paragraph 85) (Tetra Tech emphasis). Notwithstanding this, it is questioned whether it is in fact TWBC’s intention to assign a policy preference for retail and leisure use across the c. 90 ha of land (i.e. the extent of the Royal Tunbridge Wells North Farm / Longfield Road Employment Area) within 1.7 km of the Tunbridge Wells town centre on the proposed Policies Map. These areas include; Stag Trading Park, Kingstanding Business Park, High Brooms Industrial Estate, Decimus Park, North Trading Estate, Colebrook Industrial Estate, The Fountain Retail Park, Longfield Retail Park, Tunbridge Wells Shopping Park and Great Lodge Retail Park and various standalone trade/retail units situated along Longfield Road.

Whilst it is noted that the supporting plan text at paragraph 6.445 indicates: “*Given that Class E of the revised Use Class Order could enable retail uses to occupy non-retail Class E premises in out-of-centre locations, circumventing any relevant ‘town centre first’ policies (as set out in Policies ED 9: Defined Town and Rural Service Centres and ED 10: Sequential Test and Local Impact Test), and where there is a risk that an alternative use within Class E (such as retail) would impact on the health of surrounding centres, a condition may be attached to any approval of planning permission in out-of-centre locations to restrict the use to that applied for*”, this approach is not communicated in the policy wording, and moreover the proposed policy wording, in fact, states that; “*The retention of existing, and **proposal for new, employment provision**, to include the following uses, **will be acceptable** within these defined areas*” (Tetra Tech emphasis). Whilst it is accepted that by virtue of the introduction of the Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020, that the Council retain no control over changes within Class E (Commercial, Business and Service) and Class F (Local Community and Learning), the policy wording which applies to new floorspace circumvents the impact test and pre-empts the outcome of the sequential test for both retail and leisure use, contrary to national policy. The policy is quite clearly at odds with paragraph 16 (d) of the NPPF which requires “*policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals*”. The same arguments likewise apply to Policy STR/RCTW 1 which similarly promotes; “*the retention, expansion, and intensification where relevant of existing employment premises and **support leisure uses within the Key Employment Areas***” (Tetra Tech Emphasis). Crucially, the policy approach of Policy ED1 (and STR/RTW 1) are clearly not ‘consistent with national policy’ nor in any way ‘justified’ by the Council’s own retail and leisure evidence base and therefore clearly renders the plan ‘unsound’.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant

or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is to:

- Remove reference to retail and leisure as acceptable new uses in the Policy ED 1 Key Employment Areas except Royal Tunbridge Wells Town Centre - It is advised that any reference to retail and leisure use within Policy ED 1 outside of the Royal Tunbridge Wells Town Centre Key Employment Area should be removed (i.e. in respect of Royal Tunbridge Wells North Farm / Longfield Road area and the Southborough High Brooms Industrial Area)

The following revised policy wording is therefore suggested;

“Policy ED 1 – The Key Employment Areas The Key Employment Areas, as defined on the Policies Map, are designated for the provision of employment uses to serve the borough over the plan period. The retention of existing, and proposals for new, employment provision, to include the following uses, will be acceptable within these defined areas.

Table 12 Mix of uses appropriate in the defined Key Employment Areas

Royal Tunbridge Wells Town

Centre

Class E – including retail, financial, professional services and other business uses, food and drink, non-residential institutions, assembly and leisure, education and health

Class F – appropriate leisure uses

Class C – hotels, dwelling houses and residential institutions and other sui generis uses of an appropriate type and scale, including drinking establishments and hot food takeaways

Royal Tunbridge Wells North

Farm/Longfield Road area

Class B – general industry and storage and distribution

Class E – financial, professional and other business uses, ~~retail, food and drink, and leisure~~

~~Class F – appropriate leisure uses~~

~~and other sui generis uses of an appropriate type and scale~~

Southborough High Brooms

Industrial Area

Class E – financial, professional and other business uses, ~~and appropriate leisure uses~~

~~Class F – appropriate leisure uses~~

Class B8 - storage and distribution

~~and other sui generis uses of an appropriate type and scale~~

Paddock Wood Eldon Way

and West of Maidstone Road

Class E – financial, professional and other business uses

Class B2 – general industry

Class B8 - storage and distribution

Gill's Green Business Park

Class E – financial, professional and other business uses

Class B2 – general industry

Class B8 - storage and distribution

Capel Brook Farm

Class E – financial, professional and other business uses

Class B2 – general industry

Class B8 - storage and distribution

Proposals for the retention of existing floorspace and the encouragement of new floorspace in the Key Employment Areas on allocated and non-allocated and vacant sites, and through the intensification or redevelopment of existing sites, will be supported in principle”.

The supporting policy text should likewise be updated to reflect the above changes relating to leisure and retail use.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is deemed that the consideration of the Key Employment Areas requires our attendance at the public examination of the Tunbridge Wells Borough Local Plan up to 2038.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Tetra Tech Planning
Question 3	

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy ED 10 Sequential Test and Local Impact Test

Paragraph 6.523

[TWBC: this representation has been input against Policies PSTR/RTW 1, ED 10, STR 1, ED 1, STR/RTW 1, AL/RTW 18, STR 5, EN 2, EN 7, TP 1 and TP 3 – see Comment Numbers PSLP_1954, PSLP_1959, PSLP_1960, PSLP_1961, PSLP_1963, PSLP_1965, PSLP_1966, PSLP_1967, PSLP_1968, PSLP_1969 and PSLP_1970]

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Standard Life Investments UK Real Estate Fund **object** to Policy ED 10 (Sequential Test and Local Impact Test) for the reasons previously set out on behalf of our client in respect of the Draft Local Plan (Regulation 18) (please refer to **Attachment A**). It is maintained that the policy continues to fail to provide a suitably worded over-arching retail, office and leisure use policy to oversee such proposals in TWBC. The policy as currently drafted is unclear and ambiguous, and therefore conflicts with the requirements of the NPPF. Our supplementary comments to those previously made are provided below.

With regard to the sequential approach, Tetra Tech fundamentally dispute paragraph 6.523 of the supporting text which states; “Applicants will be expected to have demonstrably followed a sequential approach when selecting development sites for town centre uses, ***including fully exploring how the scheme could be adapted so that it could be accommodated on a more central site (i.e.***

disaggregation: operating from a number of units within the centre rather than one single unit)” (Tetra Tech emphasis). Tetra Tech note that the supportive text misinterprets the sequential approach to site selection and the widely accepted position in respect of the application of the retail test that there is no explicit requirement to disaggregate development proposals as evidenced by various case law and Court decisions (see Dundee, Rushden Lakes, Aldergate, Scotch Corner). In view of this, we advise that the emphasised text highlighted above is removed from the supportive text.

In particular with regard to the local threshold approach, our key concerns remains; (1) the methodology utilised to evidence and justify the application of a local threshold approach necessitating the preparation of an impact assessment for new retail, office and leisure development outside of town and rural service centres; and (2) the ability to define a geographical catchment of the town centre, when setting varying local thresholds.

In respect of retail, office and leisure uses, Policy ED 10 now states:

“3. Applications for development above the following thresholds outside of the town and rural service centres, as defined on the Policies Map, should be accompanied by an impact assessment:

a) where there is a potential adverse impact on Royal Tunbridge Wells: 1,000sqm (net);b) where there is a potential adverse impact on Southborough, Paddock Wood, Cranbrook, and/orHawkhurst: 280sqm (net)”

Paragraph 89 of the NPPF states: *“When assessing applications for retail and leisure development outside town centres, which are not in accordance with an up-to-date plan, local planning authorities should require an impact assessment if the development is over a proportionate, locally set floorspace threshold (if there is no locally set threshold, the default threshold is 2,500m2 of gross floorspace)”*. NPPG (Paragraph 015 (Reference ID: 2b-015-20190722))clarifies that in respect of the setting of a locally appropriate threshold to be complied with, authorities are required to consider the:

- . Scale of proposals relative to town centres
- . The existing viability and vitality of town centres
- . Cumulative effects of recent developments
- . Whether local town centres are vulnerable
- . Likely effects of development on any town centre strategy
- . Impact on any other planned investment

As stated in our previous representations, the 2017 Study at paragraphs 9.52 to 9.65 attempt to address the NPPG guidance, with no more substantive justification having been provided in the 2021 Update. As it currently stands, the proposed floorspace thresholds would negatively impact on investment and stifle leisure growth within the Borough and have not been appropriately justified. The key issues with the ‘justification’ provided to date is:

- . Specifically in respect to the lower local threshold of 280 sqm net for Southborough, Paddock Wood, Branbrook, and/or Hawkhurst, the assessment provided in the 2017 Study conflates the notion of likely impact with the Sunday trading hours floorspace threshold (280 sqm) (see paragraph 9.62). We remain unclear how this association has been made and are not of the view that this assumption has been in any way substantiated in the context of the Tunbridge Wells administrative area.
- . It is unclear how catchment and likely impact of a development could be established / agreed with the LPA in order to understand which (if any) limb of Policy ED 10 (3) is applicable. This policy approach is vague and it is unclear how this policy would be applied in practice. Given this, as it stands the policy wording would currently give significant potential for TWBC to necessitate the requirement of the preparation of an Impact Assessment for essentially all development within the Borough over 280 sqm (net) which is disproportionate and burdensome on retail, office and leisure development in the Borough. The policy approach conflicts with paragraph 16 (d) of the NPPF which requires; *“policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”*. This approach is likewise flawed given that the Council’s own 2017 Study acknowledges: *“...taking account of the significant retail capacity in the Borough (and in particular Tunbridge Wells), we would caution against **imposing too low a threshold that would result in an overly onerous requirement, whereby an applicant needs to invest significant time and resource to promote relatively straightforward and uncontentious proposals**”* (paragraph 9.58) (Tetra Tech emphasis).
- . Furthermore, in terms of the justification provided by paragraphs 9.52 to 9.65, the 2017 Study focuses on retail – i.e. convenience and comparison trading only and pays no consideration to

either leisure or office use, notwithstanding that the draft policy itself applies to both. The recent 2021 Study Update clearly states: “We do not identify any changes in the wider context that would alter our recommendations for setting a local impact threshold, requiring the submission of a proportionate **Retail Impact Assessment** for development greater than 1,000 sq m within the catchments of Royal Tunbridge Wells Town Centre, or 280 sqm (net) for proposals within the catchments of Southborough, Paddock Wood, Cranbrook and Hawkhurst Town Centres” (paragraph 8.24). Notwithstanding this, the proposed Policy ED 10 thresholds as currently worded apply to retail, office and leisure uses. In the absence of any justification, we are of the view that the NPPF default threshold of 2,500 sqm gross should, at least, be applied to office and leisure use.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Proposed Modifications

The proposed modification is for the:

- . **Update paragraph 6.523 relating to the sequential test and the need to disaggregate as requested** – as per the reasons put forward in respect of Question 5.
- . **Re-introduce the nationally recognised default position of 2,500 sqm gross threshold for impact assessments relating to retail, leisure and office provision within Policy ED 10** – for the following reasons:
 - . The Retail and Leisure Study 2017 nor the 2021 Update is not considered to provide any justification for the local impact threshold to be necessary for leisure or office use, as required by the NPPG. As no evidence has been provided to assess reasonable scenarios in terms of leisure and office floorspace and provide a proportionate evidence base, the threshold approach is evidently not ‘justified’ or ‘consistent with national policy’ therefore the plan is presently ‘unsound’.
 - . Additionally, the threshold floorspace figures (280 sqm (net)) suggested by Nexus for application to retail development proposals have been arbitrarily selected on the basis that floorspace which would be subject to Sunday trading hours. There does not appear to have been any testing in respect of impact ‘catchments’ given the suggested geographic approach. It is accepted that a lower threshold can be utilised where local circumstance calls for it, however it should not be applied as a tool to unnecessarily restrict growth and investment. Again, the threshold approach for retail use is evidently not ‘justified’ or ‘consistent with national policy’, therefore the plan is presently ‘unsound’ on this basis.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

It is deemed that the consideration of leisure (and retail) matters requires our attendance at the public examination of the Tunbridge Wells Borough Local Plan up to 2038.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Standard Life Investments UK Real Estate Fund stand by representations made in respect of the Draft Local Plan (Regulation 18) consultation document in respect of Policy TP3 Parking Standards (please refer to **Attachment A**), that the current policy wording of Policy TP3 is bewildering to read and could not reasonably be concluded as being "...clearly written and unambiguous" (NPPF, paragraph 16). It is maintained that as currently worded the policy is not 'effective' nor 'consistent with national policy' as required by the NPPF and therefore the Pre- Submission policy approach is deemed to remain 'unsound'.

Question 6

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood for 33 years. My family have lived in the area for 65 years. It takes me anything between 50 -75 minutes to get to my job in Tunbridge Wells due to traffic and congestion. This will only be made severely worse by further development at the level being considered. The current drainage and sewerage system is unable to cope with the level of housing we have now and we suffer severe flooding in the area. I also have problems getting a doctors or dentists appointment as the surgeries are at capacity for patients.

I do not believe that Paddock Wood and East Capel is the right area for the level of housing proposed. Tunbridge Wells Borough Council want to add 2060 homes to East Capel and I believe this is a completely disproportionate amount that will destroy our rural greenbelt. There has been a complete lack of interest in other areas as alternatives such as Castle Hill or Blantyre. Hundreds of acres of good quality farming land will be lost if plans proceed in East Capel.

Tunbridge Wells Borough Council acknowledge much of their borough falls under Areas of Outstanding National Beauty so limited the potential for development so that Paddock Wood, Tudeley and Capel were areas of interest. But they are not suitable at all.

Reference-Strategic Site Master Planning and Infrastructure Paper-Paddock Wood sections 4.58-4.63 acknowledges the water table is so high, flood storage solutions are limited (s4.62). It also acknowledges recent flooding of Warrington Road (s4.63) and that building is reliant on local flood defences (s4.59). Section 4.64 states known drainage issues. Despite this, global warming and rising sea levels, Tunbridge Wells Borough Council is willing to put new homeowners as well as all existing ones to even higher flood risks. Despite all the problems this will in turn, eventually cause for Tunbridge Wells Borough Council.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Lesley Stanley
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS 3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

My mother has lived in Tudeley her whole life and I lived there for approximately 25 years, but still live locally. I have witnessed increasing levels of flooding which will only become worse as climate change and rising sea levels get worse.

I do not believe that Tudeley is the right area for the level of housing proposed. TWBC want to add 2800 homes to Tudeley which is an increase of over 500%. This is a completely disproportionate amount that will destroy up to 600 acres of rural greenbelt. There has been a complete lack of interest in looking into other areas as alternatives such as Blantyre which has 300 acres of government owned land available which is not greenbelt or Areas of Outstanding Natural Beauty. Hundreds of acres of good quality farming land will be lost if plans proceed in Tudeley and East Capel.

Presently 2,452 people live in Tudeley and the Capel area. The Local Plan would see that increase to potentially over 13,700 people, many with private cars which will further exacerbate traffic and congestion. Capel is a rural parish and only has 2% of the borough's population but is being allocated 45% of the entire borough housing plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

- . No, I do not wish to participate in examination hearing session(s)

Question 2

Agent's Name and Organisation (if applicable) n/a

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

STR/SS 1 Capel East and Paddock Wood

Question 4

Do you consider that the Local Plan:

Is legally compliant Don't know

Is sound No

Complies with the Duty to Cooperate Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Some of these comments are replicated in my submission under Policy STR/SS 3 although those are mainly by way of introduction

I have lived in Capel for 25 years and Paddock Wood for 35 years and know the area well. Accordingly, my comments are made from personal experience and knowledge of the area.

There are many reasons why this plan is ill conceived. The fundamental flaw begins with TWBC selecting sites based on the land being offered up at various times via "calls for sites" rather than seeking the most appropriate sites. The plan is then written from that perspective. Many sites were rejected for specified reasons; those reasons also apply to Capel which was selected!

The plan for Capel (in total) was not made known to the public until May 2019. It has been extremely time consuming and difficult for Capel parish residents to respond. Despite that there was a huge response to the plan at regulation 18 stage. The majority of the 2,000+ who responded to the consultation exercise, described as "the highest response to any consultation/engagement undertaken by TWBC Planning Services", objected to the plans for Capel Parish. I understand that over 95% objected to the plan and many of those participants were from outside the parish. That isn't "buy in" by the public.

I have attended in person or by Zoom all meetings relating to this matter held by TWBC. The Council has virtually ignored the opposition to Capel being unfairly/disproportionately treated and discussion has been limited to legal minimum requirements. It would be hard to detect from TWBC meetings that Capel was an issue. Regulation 18 did not resolve any issues; they were simply ignored. The Council leaders view throughout is his oft quoted "just get this through"

Throughout, the Planning Officer has stated that there is no alternative plan and Councillors have advised that it's this plan or letting the Government impose a plan. That doesn't seem much of a strategy to me!

I appreciate the Inspector considering this plan has, perhaps, a technical/legal approach but I hope that the views of ordinary people without detailed planning knowledge are properly considered. The objections to the plan and alternatives suggested have, throughout, been dismissed. The lack of any real democratic process has been alarming. We seem to have just gone through a tick box process and are otherwise invisible.

The plan is not proportionate. The rural parish of Capel with 2% of the borough's population has been allocated 45% of the entire borough housing plan; 3 times more than the largest town of Tunbridge Wells and 90 times more than the second largest town, Southborough. Many parishes with similar populations have no or minimal allocations. I understand that it is Government policy to regenerate and develop City and town centres but that is largely absent from this plan. I should also mention "local need". This may depend on the definition of local. Can so many houses be required in such a small area? Why are houses currently being built in PW being marketed in London and Hong Kong?

The most blatant and arrogant aspect is the total disregard for the parish boundary. Capel East is lumped in with Paddock Wood (PW) virtually as fact that PW will expand into and take over a significant area of land from the adjoining parish. A new floodlit sports facility for PW is included a half mile into Capel adjacent to the A228 road and would require users to drive to such facility. PW Town Council have always made it clear that they want users to be able to walk to facilities rather than drive. Capel Parish Council was not consulted; such arrogance by TWBC. I could mention the additional light pollution. It could be ventured that the late and strange choice to house a sport facility in such a location is because it's one of the possible exceptions to using greenbelt and as such can be quoted as such! (para 145 NPPF)

The boundary between PW and Capel is a Limit to Build. It was created for a purpose; to stop PW merging into Capel - specifically Five Oak Green which is the central village in the parish. This plan sees expansion almost to Five Oak Green, separated only by the A228.

The land in East Capel is greenbelt. It is approximately half a mile to the north of (& overlooked by) an AONB. The National Planning Policy Framework requires exceptional circumstances to allow building on greenbelt land and that they are fully evidenced and justified - otherwise the Metropolitan Greenbelt has no purpose. It appears that TWBC has already made the decision to remove greenbelt status as referred to in paragraph 5.160 of the Pre-Submission Local Plan - "Land to the west of the proposed extension, within Capel parish, was released from the Green Belt. The exceptional circumstances for this release are outlined in the Development Strategy Topic Paper". Again, Capel Parish Council was not consulted on this. I would also argue that there are not exceptional circumstances and that TWBC has not properly considered alternatives. It has treated greenbelt as the solution without adequate recourse to the alternatives.

It is difficult to be precise about the exact breakdown between East Capel and PW north/west new development but these proposed new communities will be separated by a rail line with an unprotected crossing. It would seem plausible that there will be a significant increase in use of that crossing which questions the decision to develop both sides of the railway.

East Capel and west PW are on the River Medway flood plain. I believe that Capel and PW are home to all of the borough's flood plain. Three times in the last 10 years the area has been subject to serious flooding; the most recent in January 2020 meant the fields were impassable. With climate change now accepted and recognised and with existing conditions certain to deteriorate it defies belief that it is the chosen site for major development when so many alternatives are available. Para 155 NPPF 2019 states "Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future)". No amount of "betterment" ((TWBC) can add thousands of houses to an existing flood plain and not adversely affect flooding for the area and others further down river in adjoining boroughs.

We have seen a significant increase in people using the countryside; seeking quiet open spaces. From the PW/ East Capel boundary there are immediate rural walks north, west and south. These walks will remain but only through housing estates. Anyone wishing to find peaceful walks will be required to drive elsewhere. As a very keen walker myself I know that I will not walk locally if housing is placed in this area.

The additional traffic caused by the proposed additional proposed housing in PW and Capel and current developments in PW cannot be resolved. The roads in the area cannot be adapted to cope with such a large increase in demand. I have seen the TWBC comments regarding people cycling/walking and not using cars. From parts of any East Capel development some residents will be more than a mile from PW shopping area/rail station and will not walk – many residents in west PW use cars rather than walk and they are half the distance away. There will be additional air pollution caused by such major development in a small area. Those with respiratory complaints will suffer. I need not comment further.

The rail system was at capacity pre-Covid and although no-one can predict the future it is likely to slowly return to that position with major developments along the line before Paddock Wood at Marden,

Staplehurst and Ashford (to name just three). There was insufficient parking and that can only worsen with thousands of additional houses.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The plan is unsound for reasons stated in Q 5 and for many other additional matters.

TWBC has not adequately considered alternative sites and dismissed many after little more than a cursory glance. It has rejected sites for a variety of reasons, many or all of which also apply to Capel!

As an example, of which there are many, – the plan rejects land north of Badsell Rd, Five Oak Green (Capel) because it is greenbelt, greenfield and noise near rail line. This site is within the village and would be considered as infill. The site at East Capel sites is greenbelt, greenfield and adjacent to the rail line - See appendix H – page 311 of Sustainability Appraisal.

Such inconsistencies exist throughout the plan

TWBC has not fully explored brownfield sites and has dismissed some on spurious grounds. Considering the numerous negative aspects relating to Capel it is difficult to understand how a large brownfield site at and adjacent to the former Blantyre Prison can be quickly rejected together with a greenfield site surrounding the area. The site is government owned and non AONB or greenbelt.

Capel Parish Council does support a development at Castle Hill which is located to the west of and with easy access to the A21 and to the north of industrial units at North Farm. This remains within the Capel parish boundary and also far exceeds a proportionate number of houses in the parish. This was rejected by TWBC. The concerns were that the area is an AONB and that Natural England objected. However, TWBC has granted planning permission for a business park in the same area at Kingstanding Way. TWBC also supports a re-routing of the A228 through AONB and greenbelt. It is apparent that TWBC simply amends its argument to suit itself; effectively arguing in opposing directions at the same time.

The density of housing at many of the sites questions the lack of adherence to the NPPF. Paragraph 123 states –“Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site. In these circumstances: a) plans should contain policies to optimise the use of land in their area and meet as much of the identified need for housing as possible”.

TWBC has not followed this advice and has generally adopted national planning guidelines of 30 properties per hectare thereby ignoring its own claim of shortage of suitable land! By increasing density levels TWBC could meet its own housing target on brownfield and greenfield sites and have no need to encroach on any greenbelt land. It is also anomalous that TWBC can claim a lack of land outside AONB/Greenbelt yet still decide to plan for more houses than it is legally required to and to offer to take some of a neighbouring borough's complement.

In my view the density of required housing is linked to the population forecast over the same period as the plan. The population under 65 is scheduled to fall over the planning period and increase over that age. An ageing population want smaller properties, residential or assisted care. Looking at building

densities proposed that is not the property that is proposed in this plan. It also fails to account for properties becoming available as the elderly downsize or move into the aforementioned care.

20% of the borough is non-designated yet very little of the proposed development is in that area. The old cinema site in Tunbridge Wells has been derelict for 20 years. There are other neglected areas.

There are many examples of this plan being manufactured around land being offered in the right quantities. Despite the length of the various reports this is a lazy plan which doesn't hold up when opened to detailed scrutiny. It falls down on all or most of the requirements of NPPF -section 11, paragraphs 122 and 123 being examples.

The Pre-submission plan does not, in my opinion, meet the requirements of the NPPF and does not evidence the exceptional circumstances required to develop the land at East Capel. To plan such a major development in the borough in a small rural area on the only flood plain seems perverse.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The estimated cost of the Local Plan is £339m with 102 costings yet to be agreed (infrastructure Delivery Plan -March 2021). In effect this is simply an unknown total cost. This results in an incredible risk depending on the viability of developers and funds available from local authorities. As we know with estimated costs, these will rise significantly by the time any work commences and considerably more as any project moves forward.

The cost of the plan is a calamity waiting to happen.

A significant reduction in costs can be achieved by using existing infrastructure which could be vastly reduced by utilising existing roads such as the A21 and developed areas around North Farm, Pembury Road and Longfield Road.

There is only minor reference to development within/regeneration of the two major towns in the borough, Tunbridge Wells and Southborough.

TWBC should look again at brownfield and other sites and apply detailed sustainability tests to those. The report discloses a distinct lack of testing of many potential sites, many ruled out for the same reasons that Capel was "ruled in".

TWBC has completed a Sustainability Appraisal for this site based on assessing and determining a score against 19 sustainability objectives. Scoring for each of the 19 objectives is informed by between 2 and 5 detailed and specific questions. In total there are 62 sub-questions based on a set of specific criteria. By going through this process it should provide a reasonably objective and transparent sustainability appraisal for each site.

TWBC has completed a sustainability appraisal for East Capel/Paddock Wood. The assessment is at the 19 strategic objective level – and doesn't address the sub-set questions. This is unsatisfactory considering how important the outcomes are for the borough and its neighbours!

As far as I'm aware sustainability appraisals have not been undertaken (even at the top strategic level) for the other sites as they were quickly ruled out.

I believe this to be a major flaw in TWBC assessments and adds further weight to the view that a sustainability assessment has not been adequately completed.

How can it be sustainable to put 6,000 houses in the borough's only flood plain? The NPPF is clear in the need to avoid areas subject to regular flooding. Climate change confirms that this will get worse. Throughout the report and its many referenced supporting documents there is a never-ending reference to Masterplanning which is clearly the get out of jail card for all problems. It may be a worthy thought

but it isn't the answer to the many failings of this lengthy and detailed Pre-submission plan.

In my view there is nothing that masterplanning can do with a plan that is ill conceived. I am surprised that with such masterplanning at the forefront, the Planning Officer has advised throughout that there is no back-up plan! So, does that mean entirely starting again? That does not suggest the Council is prepared to listen to any significant extent. All organisations have back-up plans on major projects and often more than one.

This plan has the hallmarks of a project which had the aim of just getting a plan with enough houses to appease government pressure and remove pressure from TWBC. I could be wrong.

It is extremely difficult from reading the documents to determine the extent of and cost of affordable housing. Irrespective of where development eventually takes place. I have real concerns that that developer profits will overcome the planning system.

Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Some of these comments are replicated in my submission under Policy STR/SS 1 although those are mainly by way of introduction.

I have lived in Capel for 25 years and Paddock Wood (PW) for 35 years and know the area well. Accordingly, my comments are made from personal experience and knowledge of the area.

There are many reasons why this plan is ill conceived. The fundamental flaw begins with TWBC selecting sites based on the land being offered up at various times via "calls for land" rather than seeking the most appropriate sites. The plan is then written from that perspective. Many sites were rejected for specified reasons which also apply to Capel – but Capel was selected!

The plan for Capel (in total) was not made known to the public until May 2019. It has been extremely time consuming and difficult for Capel parish residents to respond. Despite that there was a huge response to the plan at regulation 18 stage. The majority of the 2,000+ who responded to the consultation exercise, described as "the highest response to any consultation/engagement undertaken by TWBC Planning Services" objected to the plans for Capel Parish. I understand that over 95% objected to the plan and many of those participants were from outside the parish. That isn't "buy in" by the public. Following Regulation 18 additional houses were added for Capel!

I have attended in person or by Zoom all meetings relating to this matter held by TWBC. The Council has virtually ignored the opposition to Capel being unfairly/disproportionately treated and discussion has been limited to legal minimum requirements. It would be hard to detect from TWBC meetings that Capel was an issue. Regulation 18 did not resolve any issues; they were simply ignored. The Council leader's view throughout is his oft quoted "just get this through."

Throughout, the Planning Officer has stated that there is no alternative plan and Councillors have advised me that it's this plan or letting the Government impose a plan. That doesn't seem much of a strategy to me!

I appreciate the Inspector considering this plan has, perhaps, a technical/legal approach but I hope that the views of ordinary people without detailed planning knowledge are properly considered. The objections to the plan and alternatives suggested have, throughout, been dismissed. The lack of any real democratic process has been alarming. We seem to have just gone through a tick box process and are otherwise invisible.

The plan is not proportionate. The rural parish of Capel with 2% of the borough's population has been allocated 45% of the entire borough housing plan; 3 times more than the largest town of Tunbridge Wells and 90 times more than the second largest town, Southborough. Many parishes with similar populations have no or minimal allocations. I understand that it is Government policy to regenerate and develop city and town centres but that is largely absent from this plan. I should also mention "local need". This may depend on the definition of local. Can so many houses be required in such a small area? Why are houses currently being built in PW being marketed in London and Hong Kong?

The area “offered up” by Hadlow Estates to build “Tudeley Village” is entirely rural and given over to good quality agricultural land. It stretches from near Tonbridge to the edge of Five Oak Green village (also Capel). It is adjacent to and overlooked by an AONB. There are many footpaths in the proposed development area and these will all be lost as places of rural retreat. We have seen a significant increase in people using the countryside; seeking quiet open spaces. These walks will remain but only through housing estates. Anyone wishing to find peaceful walks will be required to drive elsewhere.

The National Planning Policy Framework requires exceptional circumstances to allow building on greenbelt land and that they are fully evidenced and justified - otherwise the Metropolitan Greenbelt has no purpose TWBC has treated greenbelt as the solution without adequate consideration of the alternatives. In my view, the lack of proper consideration of alternatives means the Council has not met the test to remove more than 5% of the borough’s greenbelt – all of it in Capel.

Tudeley is on the River Medway flood plain. I believe that Capel and PW are home to all of the borough’s flood plain. Three times in the last 10 years the area has been subject to serious flooding; the most recent in January 2020. Hartlake Road, which would be the main access road, is a rural country lane and floods regularly. It is accessed over a single lane rail bridge. It is adjacent to the River Medway and runs over that river. With climate change now accepted and recognised and with existing conditions certain to deteriorate it defies logic that Tudeley is the chosen site for major development when many alternatives are available. Para 155 NPPF 2019 states “Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future)”. No amount of “betterment” (TWBC) can add thousands of houses to an existing flood plain and not adversely affect flooding for the area and others further down river in adjoining boroughs.

The development is proposed both north and south of the existing rail line. The two separate parts of the development will therefore be separated by a rail line and connected by a country track (single file) under a rail bridge. That road at the point of the road bridge is subject to regular flooding. That country lane is entirely unsuitable for more than occasional traffic and no high-sided/large vehicles. No new bridge is planned and the cost would be prohibitive. As the site is close to PW and Tonbridge the rail authorities have stated there will not be a station added therefore residents will drive to Tonbridge. This will add considerable pressure on the surrounding road system and already stretched parking availability. Tonbridge and surrounding villages such as Golden Green and Hadlow will be badly affected by the proposal but those residents must speak for themselves.

The rail system itself was at capacity before Covid and although no-one can predict the future it is likely to slowly return to that position with major developments along the line before Tonbridge at Paddock Wood, Marden, Staplehurst and Ashford (to name just four). There was insufficient parking previously and that can only worsen with thousands of additional houses.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

TWBC has not adequately considered alternative sites and dismissed many after little more than a cursory glance. It has rejected sites for a variety of reasons, many or all of which also apply to Capel!

As an example, of which there are many, – the plan rejects land north of Badsell Rd, Five Oak Green (Capel) because it is greenbelt, greenfield and noise near rail line. This site is within the village and would be considered as infill. The site at Tudeley is greenbelt, greenfield and adjacent to the rail line - See appendix H – page 311 of Sustainability Appraisal.

Such inconsistencies exist throughout the plan

TWBC has not fully explored brownfield sites and has dismissed some on spurious grounds. Considering the numerous negative aspects relating to Capel it is difficult to understand how a large brownfield site at and adjacent to the former Blantyre Prison can be quickly rejected together with a greenfield site surrounding the area. It is understood that almost 300 acres of land is available in this area. That site is government owned and not AONB or greenbelt!

Capel Parish Council does support a development at Castle Hill which is located to the west of and with easy access to the A21 and to the north of industrial units at North Farm. This remains within the Capel parish boundary and also far exceeds a proportionate number of houses in the parish. This was rejected by TWBC. The concerns were that the area is an AONB and that Natural England objected. However, TWBC has granted planning permission for a business park in the same area at Kingstanding Way. TWBC also supports a re-routing of the A228 through AONB and greenbelt. It is apparent that TWBC simply amends its argument to suit itself; effectively arguing in opposing directions at the same time.

To add to the proposed destruction of Capel as a rural parish, TWBC (in conjunction with Kent County Council) to build a road from the A228 across to Tudeley through the quiet hamlet at The Alders. That should just about remove all quiet places from the parish. Capel Parish Council has put forward alternative suggestions (irrespective of the proposed development) but has been ignored.

The density of housing at many of the sites questions the lack of adherence to the NPPF. Paragraph 123 states –“Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site. In these circumstances: a) plans should contain policies to optimise the use of land in their area and meet as much of the identified need for housing as possible”.

TWBC has not followed this advice and has generally adopted national planning guidelines of 30 properties per hectare thereby ignoring its own claim of shortage of suitable land! By increasing density levels TWBC could meet its own housing target on brownfield and greenfield sites and have no need to encroach on any greenbelt land. It is also anomalous that TWBC can claim a lack of land outside AONB/Greenbelt yet still decide to plan for more houses than it is legally required to and to offer to take some of a neighbouring borough's complement.

In my view the density of required housing is linked to the population forecast over the same period as the plan. The population under 65 is scheduled to fall over the planning period and increase over that age. An ageing population want smaller properties, residential or assisted care. Looking at building densities proposed that is not the property that is proposed in this plan. It also fails to account for properties becoming available as the elderly downsize or move into the aforementioned care.

20% of the borough is non-designated yet very little of the proposed development is in that area. The old cinema site in Tunbridge Wells has been derelict for 20 years. There are other neglected areas. There are many examples of this plan being manufactured around land being offered in the right quantities. Despite the length of the various reports this is a lazy plan which doesn't hold up when opened to detailed scrutiny. It falls down on all or most of the requirements of NPPF -section 11, paragraphs 122 and 123 being examples.

The Pre-submission plan does not, in my opinion, meet the requirements of the NPPF and does not evidence the exceptional circumstances required to develop the land at Tudeley. To plan such a major development in the borough in a small rural area on the only flood plain seems perverse.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The estimated cost of the Local Plan is £339m with 102 costings yet to be agreed (infrastructure Delivery Plan -March 2021). In effect this is simply an unknown total cost. This results in an incredible risk depending on the viability of developers and funds available from local authorities. As we know with estimated costs, these will rise significantly by the time any work commences and considerably more as any project moves forward.

A significant reduction in costs can be achieved by using existing infrastructure which could be vastly reduced by utilising existing roads such as the A21 and developed areas around North Farm, Pembury Road and Longfield Road.

The cost of the plan is a calamity waiting to happen.

There is only minor reference to development within/regeneration of the two major towns in the borough, Tunbridge Wells and Southborough.

TWBC should look again at brownfield and other sites and apply detailed sustainability tests to those. The report discloses a distinct lack of testing of many potential sites, many ruled out for the same reasons that Capel was "ruled in".

TWBC has completed a Sustainability Appraisal for this site based on assessing and determining a score against 19 sustainability objectives. Scoring for each of the 19 objectives is informed by between 2 and 5 detailed and specific questions. In total there are 62 sub-questions based on a set of specific criteria. By going through this process it should provide a reasonably objective and transparent sustainability appraisal for each site.

TWBC has completed a sustainability appraisal for Tudeley Village. The assessment is at the 19 strategic objective level – and doesn't address its own sub-set questions. This is unsatisfactory considering how important the outcomes are for the borough and its neighbours!

As far as I'm aware sustainability appraisals have not been undertaken (even at the top strategic level) for other sites as they were quickly ruled out.

I believe this to be a major flaw in TWBC assessments and adds further weight to the view that a sustainability assessment has not been adequately completed.

How can it be sustainable to put 6,000 houses in the borough's only flood plain? The NPPF is clear in the need to avoid areas subject to regular flooding. Climate change confirms that this will get worse. Throughout the report and its many referenced supporting documents there is a never-ending reference to Masterplanning which is clearly the get out of jail card for all problems. It may be a worthy thought but it isn't the answer to the many failings of this lengthy and detailed Pre-submission plan.

In my view there is nothing that masterplanning (whatever that means in practice) can do with a plan that is ill conceived. I am surprised that with such masterplanning at the forefront, the Planning Officer has advised throughout that there is no back-up plan! So, does that mean entirely starting again? That does not suggest the Council is prepared to listen to any significant extent. All organisations have back-up plans on major projects and often more than one.

An example of Masterplanning: "Heritage is a key matter which needs addressing, especially regarding All Saints Church which is Grade I listed and lies to the west of the site. However, with a masterplanned approach to development it is considered the effects of the development on this and other heritage assets could be properly explored". Ref- Page 8, Site Assessment Sheets for Capel Parish. The one quoted explains how surrounding a world-renowned rural church visited by people worldwide with 2,800 houses can be made acceptable (or is so vague as to have no meaning).

Most references to masterplanning are as suitably vague throughout the documentation.

It is also understood that Tudeley development will be masterplanned by Hadlow Estates either solely or in conjunction with TWBC. It is interesting to note the density of housing proposed at this site for 2,100 houses initially; to be followed by a further 700. The proposed densities of 15-30 dph suggest that the NPPF is not being adhered to regarding land shortage and/or use of greenbelt and is being marketed at a certain level of clientele/cost. The fact that TWBC agree this position with the landowner is a matter of considerable concern.

This plan has the hallmarks of a project which had the aim of just getting a plan with enough houses to appease government pressure and remove pressure from TWBC. I could be wrong.

It is extremely difficult from reading the documents to determine the extent of and cost of affordable housing. Irrespective of where development eventually takes place. I have real concerns that that developer profits will overcome the planning system.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Tunbridge Wells Borough Council Local Plan

As a layman I cannot pretend to understand the technicalities of the SWECO report concerning the TWBC Local Plan and its implications for Capel/Tudeley in particular, and the consequent significant impact on the residents of the neighbouring Tonbridge and Malling Borough Council area.

I feel the duty to co-operate with neighbouring TMBC is clearly not evident when the site of Capel and Tudeley was chosen for this development.

Tonbridge will clearly be the nearest major town and will suffer all the major resulting congestion from the additional traffic flows, together with the implications for the education, health services and other amenities, which are already under tremendous existing pressure.

For the residents on the Hadlow/Golden Green side of the River Medway the half- baked (no I correct myself – I think its fully baked) suggestion that the Hartlake Road /B2017 should be closed to through traffic would be an act of complete lunacy, turning a journey into Tonbridge or Tunbridge Wells into a nightmare.

I have used the Hartlake Road for commuting to work in Tonbridge and Tunbridge Wells since the mid 1960's and can assure you that without this road I would have been driven insane long ago. Any military man will tell you that the key factors if there is a major river in the area are the bridges which cross it. For residents on the Hadlow side of the river

Hartlake Bridge is a vital artery in any journey to Tonbridge or Tunbridge Wells or beyond. The current Hartlake Bridge was rebuilt in 2005 at a reputed cost of two million pounds; this would seem to be a complete waste of public money if this proposal is approved.

The A26 from Hadlow to Tonbridge in the morning and afternoon/evening peak times is virtually grid-locked with vehicles stretching from Tonbridge to sometimes Three Elm Lane. Any local people would automatically use the Hartlake road as an alternative. The only other alternatives are the bridges at East Peckham which involve lengthy journeys on the side roads or via Seven Mile Lane. Obviously this adds to the pollution created by the extended car journeys, not a positive step when we are being urged to reduce our Carbon footprint.

On the occasions that Hartlake Road has been shut for repairs or floods the resulting tailbacks from Tonbridge have been catastrophic to journey times. It will be the residents of TMBC living on the Hadlow side of the Medway that will feel the real impact of this proposal and I think that TWBC have given this scant regard.

Local knowledge is the key, unfortunately I don't have any faith in any outside consultants bought in at great expense to advise organisation how to run their affairs or businesses. I expect the traffic surveys were conducted at periods when the school were on holiday or at non-peak hours.

If Hartlake Road is closed the commuting traffic into Tonbridge on the A26 will doubtless tail back to Hadlow village and beyond.

I feel I should mention schools for which Tonbridge has such a high reputation. High quality school such as Judd; Tonbridge Girls Grammar; Weald of Kent; Hayesbrook and Hillview, also the private schools at Somerhill are all situated on the South side of the river Medway and considerable traffic is generated during the school run periods by residents of the TWBC area.

These people will not be inconvenienced in the slightest by the increased journey times and stress experienced by people living north of the river in Tonbridge, Hildenborough, Hadlow or Golden Green, trying to get their children to school, if Hartlake Road is closed to through traffic.

Another example of the ill thought-out policy of situating the development in the Capel/Tudeley area with no consideration to co-operation with the residents of a neighbouring authority.

TWBC seem to think that pushing development to the outer fringes of their boundaries is the way forward. A glaring example of this is the excessive and continuing overdevelopment of Paddock Wood. This has had a major negative impact on road congestion to the Tonbridge area. Developing infrastructure before massive building developments take place seem to be anathema to TWBC.

I worked for a Tunbridge Wells printing company in Longfield road from 1968 until 1985, TWBC attitude appeared to be "Oh, its Industry, shove it next to the Sewage Works and the Refuse Tip, with access via a road through a Council house estate and another not much more than a farm track via a single carriageway railway bridge at High Brooms, which incidentally is still in use as one of the access routes to the Longfield Road Industrial Estate. It's nice to know TWBC haven't changed!

Of course TWBC would reap the benefits of 4000 new households Council Tax, while TMBC would reap all the congestion and aggravation. Seems a fine example of co-operation and fairness.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Progress seems to dictate that some development must take place, in my opinion that should take place in what is known as the Castle Hill scheme. A site nearer to Tunbridge Wells, with direct access onto the newly upgraded A21, with a railway station at High Brooms and good access to Tunbridge Wells Hospital and the schools at Tonbridge...

This site should be considered as a replacement for the Capel/ Tudeley scheme as it avoids the destruction of the beautiful village of Capel and the surrounding area and largely negates the problems of lack of infrastructure.

Also, I understand the same landowner owns large tracts of land on both sites so he won't feel out of pocket with the developers.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Complies with the Duty to Cooperate

Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of Paddock Wood my whole life (33 years). Most of my family and my friends reside in Paddock Wood and East Capel too.

Over recent years I have noticed how traffic congestion has increased severely, causing me daily delays and issues. I have noticed the GP surgery struggle with surges of new patients creating long waiting times for appointments, treatments and even blood tests. I have had a long term illness and have seen first hand how Paddock Wood health surgery has become overwhelmed with numerous GP's unable to take on new patients. This is without the proposed increase in housing and the large amount of people who would come with this. I have also seen how flooding devastates Paddock Wood, East Capel and its surrounding areas. The land between housing leading up to Five Oak Green has frequently been unwalkable with severe and repeated flooding issues.

I have been concerned about the proposals for numerous reasons including the lack of infrastructure to support the developments. I see Paddock Wood and East Capel struggling with its numbers already, with a lack of school places, lack of GP and dental availability. I have concerns over how much worse the traffic can possibly get with the possibility of thousands more cars on the road locally. I feel the proposals will create Paddock Wood and Capel into one large urban sprawl, ruining its beauty. Our beautiful green spaces will be stamped out, along with its bio-diversity- leaving us with an over-populated area, unequipped to cope or support its increased numbers and losing 600 acres of greenbelt land. Paddock Wood and East Capel's flooding issues will be worse than ever as the development is entirely on a flood plain. There has been a lack of engagement with the public response to Reg 18, and it has been clear this this has been a widely unpopular proposal to residents for all of the above reasons. 97% opposed the plans.

Tunbridge Wells Borough Council is set to get all the council tax from the proposed housing whereas Tonbridge and Malling will get nothing but an increase in issues regarding traffic, flooding and shortages in education and medical facilities. The council leader told Save Capel -'you will never win'. As a resident, I feel as though our opinions simply aren't being considered.

I do not believe that East Capel is the right area for the level of housing proposed. Tunbridge Wells Borough Council want to add 2060 homes to East Capel and I believe this is a completely disproportionate amount that will destroy our rural greenbelt. There has been a complete lack of interest in investigating other areas as alternatives such as Castle Hill or Blantyre. Hundreds of acres of good quality farming land will be lost if plans proceed in East Capel. Paddock Wood and Capel will be joined together by the housing eradicating all our beautiful green areas. I consider this area to be beautiful because of our green areas which will be lost and replaced with housing for people in an area that lacks the infrastructure to support them.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Other areas such as Castle Hill and Blantyre have not been given adequate consideration as locations for proposed housing.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I have been a resident of the area my whole life (33 years). Most of my family and my friends reside in Tudeley Village or surrounding areas and have lived their entire lives locally.

Over recent years I have noticed how traffic congestion has increased severely, causing me daily delays and issues. I have seen the effects of Tudeley becoming busier and this is without the proposed increase in housing and the large amount of people who would come with this. The primary school already generates huge traffic issues on the road and to add to this would bring further chaos. I have suffered with breathing issues such as asthma since childhood and am deeply concerned at the prospect of greater air pollution with more cars on the roads.

I have also seen how flooding devastates Tudeley which has many high risk areas. The land around Tudeley and Capel has frequently been unwalkable with severe and repeated flooding issues. Photos attached.

I have been concerned about the proposals for numerous reasons including the lack of infrastructure to support the developments. I see Tudeley struggling with its numbers already, with a lack of school places, lack of GP and dental availability. I have concerns over how much worse the traffic can possibly get with the possibility of thousands more cars on the road locally. I feel the proposals will create Tudeley and Paddock Wood into one large urban sprawl, ruining its beauty. Our beautiful green spaces will be stamped out, along with its bio-diversity- leaving us with an over-populated area, unequipped to cope or support its increased numbers and losing 600 acres of greenbelt land. There has been a lack of engagement with the public response to Reg 18, and it has been clear this this has been a widely unpopular proposal to residents for all of the above reasons. 97% opposed the plans.

Tunbridge Wells Borough Council is set to get all the council tax from the proposed housing whereas Tonbridge and Malling will get nothing but an increase in issues regarding traffic, flooding and shortages in education and medical facilities. The council leader told Save Capel -'you will never win'. As a resident, I feel as though our opinions simply arent being considered.

I do not believe that Tudeley is the right area for the level of housing proposed. Tunbridge Wells Borough Council want to add 2800 homes to Tudeley alone which is a 500% increase and I believe this is a completely disproportionate amount that will destroy our rural greenbelt. 51% of Local Plan housing is trying to be forced upon Capel Parish which clearly lacks any balance. There has been a complete lack of interest in investigating other areas as alternatives such as Castle Hill or Blantyre. Hundreds of acres of good quality farming land will be lost if plans proceed in Tudeley. The local plan is proposing 15 or more years of large construction sites with huge infrastructure issues that simply cannot support this.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Introduction

Tunbridge Wells Borough borders the southern edge of Staplehurst parish and includes Frittenden, Cranbrook and Sissinghurst and Goudhurst parishes. Other parishes in the borough where development might affect Staplehurst are Hawkhurst, Sandhurst, & Benenden. We have concentrated on the numbers of dwellings which it is proposed to permit within the borough and we have commented where appropriate. We have also commented on a number of highways and transportation matters in the plan. Where two figures are quoted for the number of dwellings which might be permitted in a parish these are minimum and maximum e.g. 161 – 170.

Cranbrook and Sissinghurst 453-467. Of these, 216 dwellings at Cranbrook already have outline planning permission. The Draft Plan seeks developer contributions towards the provision of improved medical facilities, primary and secondary education, sports facilities with increased library, adult learning and social care at the new Cranbrook Community Hub. It is clear that there will have to be more communal buildings to form the hub of a Rural Service Centre, e.g. a larger public library, a medical centre and sports facilities. The increased number of dwellings will probably result in more commuter traffic through the A229 to Staplehurst railway station though this is not mentioned in the Draft Plan. The plan says that there is a bus service between Cranbrook and Headcorn but this is incorrect. There is no mention of Colliers Green or the former Blantyre House Prison building but these small settlements are not thought to be viable to develop further as they are too remote.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Introduction

Tunbridge Wells Borough borders the southern edge of Staplehurst parish and includes Frittenden, Cranbrook and Sissinghurst and Goudhurst parishes. Other parishes in the borough where development might affect Staplehurst are Hawkhurst, Sandhurst, & Benenden. We have concentrated on the numbers of dwellings which it is proposed to permit within the borough and we have commented where appropriate. We have also commented on a number of highways and transportation matters in the plan. Where two figures are quoted for the number of dwellings which might be permitted in a parish these are minimum and maximum e.g. 161 – 170.

Hawkhurst 161-170. The roads running North-South (a Primary Route) and East-West cross at the traffic lights in the centre of the village which are the source of much delay and congestion to traffic. The Borough's Plan states that it will ensure that all development proposals establish an acceptable impact on the crossroads junction, but it does not give any idea as to how this will be achieved. The Annual Mean Objective for Nitrogen Dioxide (NO₂) are currently being exceeded at times on the A229 Northern approach to the traffic lights. The Borough has declared an Air Quality Management Area (AQMA) for 250m to the north of the crossroads because of this. Additional traffic generated by housing development could affect air quality. Improved library, adult learning and social care services would be provided by Cranbrook Community Hub.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Introduction

Tunbridge Wells Borough borders the southern edge of Staplehurst parish and includes Frittenden, Cranbrook and Sissinghurst and Goudhurst parishes. Other parishes in the borough where development might affect Staplehurst are Hawkhurst, Sandhurst, & Benenden. We have concentrated on the numbers of dwellings which it is proposed to permit within the borough and we have commented where appropriate. We have also commented on a number of highways and transportation matters in the plan. Where two figures are quoted for the number of dwellings which might be permitted in a parish these are minimum and maximum e.g. 161 – 170.

Benenden 87-95. The parish council are in the process of preparing a Benenden Neighbourhood Plan which it is understood may become part of the Tunbridge Wells Development Plan. Again library, adult learning and social care services would be provided by Cranbrook Community Hub. Further development at Benenden Hospital would require a daily mini-bus service to/from Benenden/Tenterden to link with primary school start and finish and with provision of a small, publicly accessible retail outlet and use of the onsite café for 10 years.

Question 7

We have also commented on a number of highways and transportation matters in the plan. Where two figures are quoted for the number of dwellings which might be permitted in a parish these are minimum and maximum e.g. 161 – 170.

Frittenden 25-30. Frittenden is somewhat isolated in relation to its adjoining parishes and it borders both Maidstone and Ashford Boroughs. It has no bus service apart from one bus per week to and from Maidstone. There is a high- pressure gas pipeline to the north of the village which is a significant constraint to development.

We have concentrated on the numbers of dwellings which it is proposed to permit within the borough and we have commented where appropriate. We have also commented on a number of highways and transportation matters in the plan. Where two figures are quoted for the number of dwellings which might be permitted in a parish these are minimum and maximum e.g. 161 – 170.

General

TW Borough Council has said that it will safeguard the Highways Agency's preferred alignment for the future A21 Kippings Cross to Lamberhurst Bypass dual carriageway. It has also stated that it will safeguard the route of the former Paddock Wood to Hawkhurst railway line by refusing proposals which would compromise its use as a green infrastructure corridor. Although the TW Borough Local Plan states it has liaised with neighbouring Boroughs and KCC there is no mention of an integrated transport plan across neighbouring boundaries. At this point in time the Sainsbury's effect is an unknown on increased traffic movements through Staplehurst. As a result of increased traffic from the parishes in Tunbridge Wells Borough, an air quality assessment may be required at the Staplehurst crossroads.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
AL/HA 5	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	No
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

The Local Plan is not sound because it is not positively prepared

1. AONB

Site 413 (the Site underlying Policy AL/HA 5) is virgin land, situated in an AONB. Government planning policy aims to protect AONB. Building a medical centre runs contrary to that policy, particularly given the likely size of the building (apparently two stories with significant parking requirements - ie for 53 vehicles). As the medical centre will undoubtedly hold drugs, there will presumably be various security requirements, not least lighting, further undermining the AONB, and running contrary to the dark skies policy adopted in Birchfield Grove.

AONB concerns are considerably exacerbated by the local topography. Site 413 is on a ridge and the proposed medical centre would dominate that ridge and would be a prominent and discordant feature when viewed from country lanes and footpaths to the north on the other side of the valley. From redacted minutes of a meeting between Rydon and TWBC Planning in January 2019, it is clear this is regarded as the most 'sensitive' part of the site.

Decision of the Secretary of State (13/00014) 14 April 2014 - In 2014 a Planning Inspector dismissed an appeal against the refusal of 120 dwellings at this very same site because (i) the development would have a materially harmful visual effect on the AONB and (ii) it would fail to represent the high standard of urban/rural design required by policy. Quoting from the Inspector's report, "*Great weight should be given to conserving landscape and scenic beauty in AONBs which have the highest status of protection in relation to landscape and scenic beauty*". The very significant weight given to the protection of AONB has not materially changed since the Inspector's decision of April 2014. The Site is no different seven years later and while the present plan is for a medical centre without houses, the proposed medical centre with its substantial parking would fulfil the conditions that made application no. 13/00014 unacceptable in 2014.

It should also be noted that Birchfield Grove is surrounded by an Ecological Mitigation Area (approximately 2 to 3 meters wide). Not only will this strip of land be breached to allow access to Site 413 but any protections to wildlife, fauna and flora that the strip was meant to offer will be undermined by building a medical centre next to it.

2. Increase in traffic congestion in Hawkhurst:

The medical centre would generate a considerable amount of additional traffic given that the two existing Hawkhurst doctors' surgeries are amalgamating and because of the additional services believed to be planned from the new centre. Many patients from both surgeries live further afield than Hawkhurst but many if not most patients who live in Hawkhurst will also find it necessary to use cars. The site is a good ten minutes' walk from the Hawkhurst Crossroads and for patients living to the north, south and west of this, car would be the preferred mode of transport.

The additional traffic generated by the medical centre would increase congestion at the Hawkhurst Crossroads, which is already very busy, as patients from the more populous areas south, west and

north of the Crossroads (as well as those from further afield) would very likely drive to the centre. KCC Highways has made the point that the Crossroads it is 'at capacity' - see the judgment against Hawkhurst Parish Council when it claimed for judicial review regarding a development to the south of the Crossroads at The White House (TWBC Planning 19/01271). In addition, KCC Highways recently objected to another proposed housing development (74 homes), also to the south of the Crossroads, "owing to worsening congestion at the Hawkhurst crossroads junction" which they also note, quoting an August 2020 TA is "already operating over capacity". To reinforce the point, this application has now been refused by TWBC's Planning Committee on the grounds of the impact on both the High Weald AONB and road congestion. (Decision made on 12 May 2021).

Air pollution - the increase in traffic generated by the siting of the medical centre to the east of the Crossroads (ie in the least populated area of the village) will also lead to an increase in air pollution. The air quality in Hawkhurst is already one of the worst in Kent due to the Crossroads. A bad position will be made even worse.

3. Birchfield Grove (including access to the Rye Road):

Birchfield Grove is a twisting road designed to serve a small development of 26 houses. If it had been planned as the access road to a large medical centre, with the constant to and fro of traffic that this entails, the current design and layout would never have been considered. Roadside parking for vehicles delivering goods and carrying out maintenance or small building works for residents at any reasonable time of day is permitted and would need to be maintained if the introduction of traffic restrictions in Birchfield Grove was ever contemplated.

Birchfield Grove would most likely become highly congested given the high volume of through traffic to and from the proposed medical centre with the likelihood of a complete breakdown in traffic flows in the event of vehicle breakdown and very considerable delays when parked vehicles and vans are encountered (as referenced above).

In addition, the junction between Birchfield Grove and Rye Road has poor sightlines and would struggle to handle the increased volume of traffic generated by the medical centre. In this context, a planning application to build six bungalows on the other side of the Rye Road (virtually opposite Birchfield Grove) was turned down recently mainly because of concerns around access to the Rye Road – see see weblink

This problem is exacerbated by the speed at which many cars travel when leaving Hawkhurst, heading east. Despite the fact that the turn into Birchfield Grove lies within a 30mph speed limit, vehicles regularly travel at up to 40mph.

The Local Plan is not sound because it is not justified

Policy AL/HA5 cannot be justified because it is not based on proportionate evidence, as detailed in the Guidance Notes.

1. Alternative and better sites

Specifically it has not taken in to account a number of viable alternative, and better, sites for the medical centre in Hawkhurst.

King George V Playing Fields at the Moor (KGV)

This was the very proposal put forward by TWBC in the January 2021 PSLP before the offer of free land at the AL/HA 5 site emerged. The proposal then was that the medical centre would be co-located with a new community centre at KGV, thereby generating a number of synergies, including parking. There are other advantages to KGV - notably, it is already developed (there is a Sports Pavilion; parking; tennis courts; playing fields and a playground) so would not damage or undermine the AONB; it is not on a ridge (unlike AL/HA 5) so will be very considerably less visible; access will be easier given that KGV already accommodates the traffic associated with its existing facilities; and, as the area around KGV is more populous than the area east of the Crossroads, congestion and air pollution at the Crossroads is likely to be less.

Hawkhurst Community Hospital

This is an already developed site so any adverse impact on the AONB would be minimal. In addition there are obvious synergies to be gained from having both the medical centre and the community hospital at the same site.

Hawkhurst Golf Course

The current planning application includes provision for a medical centre.

2. Future housing north of the site if the allocation were adopted

No account appears to have been taken of the fact that although the current proposal is limited to a new medical centre and parking, it seems highly unlikely that the owner of the land would offer it without any prospective benefit, notwithstanding the gift of the land for the medical centre. It is also virtually certain that Rydon, who own the 'Access Option' from Birchfield Grove to the site and beyond, would not allow access for the development of the medical centre unless it opened up the prospect of building houses beyond the site at some point in the future. The medical centre appears to be a trojan horse for future housing development.

The Local Plan is not sound because it is not consistent with national policy

NPPF 172 requires that great weight should be given to conserving and enhancing landscape and scenic beauty in the AONB and the scale and extent of development should be limited, and planning permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest.

The medical centre will constitute a major development in the AONB given its nature, scale and setting and its significant adverse impacts as described earlier. Given the number of viable alternative sites for the medical centre, in particular KGV, no exceptional circumstances exist to justify major development at AL/HA 5 or to outweigh the environmental harm identified.

Furthermore Government policy is clearly moving towards providing greater protection of the countryside, as evidenced by the plan to introduce a far higher policy test into the NPPF as a result of the January 2020 Building Better, Building Beautiful Commission "Living with Beauty" report. This reinforces the need to protect virgin areas of AONB (ie AL/HA 5).

The Local Plan fails to comply with the duty to co-operate

The process by which Site 413 (the Site underlying AL/HA5) came to be included in this version of the PSLP clearly shows how TWBC has failed to co-operate with the community in the preparation and revision of the Local Plan.

In September 2019, Site 413 was included in TWBC's draft Local Plan. At this stage the proposal was for a medical centre and 100 houses. This prompted significant objections and in early January 2021 Site 413 was removed from the Pre-Submission Local Plan (PSLP), as a result of various considerations, in particular AONB concerns and KCC Highways' objection to any significant increase in traffic along Rye Road. Instead TWBC suggested that the medical centre should be co-located with a new Community Centre at another site in Hawkhurst (The King George V (KGV) playing fields at the Moor).

Between the site's removal from the PSLP and the Extraordinary TWBC Council meeting on 3 February 2021 to approve the PSLP, what appears to have happened is that the owner of Site 413 offered land for a medical centre and parking for free and that representatives from the two medical surgeries in Hawkhurst approached TWBC Planning to reverse the decision made in January and alter the Local Plan to include a medical centre.

This abrupt reversal of policy was made without any public consultation, engagement or even notification and clearly shows a failure in the duty to co-operate.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question

5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

To make the Local Plan sound, it should be modified by moving the medical centre from the land allocated to Policy AL/HA5 to the King George V Playing Fields at the Moor (KGV), as originally proposed by TWBC in January 2021.

A medical centre at the land allocated to AL/HA5 is unsound as it would do irreparable damage to the AONB when there is an alternative site available that offers no damage to the AONB (ie KGV). Furthermore, it would lead to an increase in traffic congestion and, most likely, air pollution at the Hawkhurst Crossroads and on the Rye Road. Finally, traffic flows on Birchfield Grove would become excessive and unacceptable.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

To assist the Inspector understand local residents' concerns about the destruction of AONB (when viable alternative sites exist) and the profound impact in terms of harm to their amenities were the medical centre to be built at the land allocated to AL/HA5.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Marion Stevenson-Rouse [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Fosten Green Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Marion Stevenson-Rouse [REDACTED]
Comment ID	PSLP_163
Response Date	14/05/21 10:44
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Marion Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_163, PSLP_167 and PSLP_168]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Marion Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_163, PSLP_167 and PSLP_168]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development. ... (b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<p>Yes, I wish to be notified of future stages of the Local Plan</p>	<p>Plan</p>

Comment

Consultee	Marion Stevenson-Rouse [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Ashford [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Marion Stevenson-Rouse [REDACTED]
Comment ID	PSLP_168
Response Date	14/05/21 10:44
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Marion Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_163, PSLP_167 and PSLP_168]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none"> . It is not positively prepared . It is not effective . It is not justified . It is not consistent with national policy
---	--

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development. ... (b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<p>Yes, I wish to be notified of future stages of the Local Plan</p>	<p>Plan</p>

Consultee	Mr Edward Stevenson-Rouse [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Fosten Green Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Edward Stevenson-Rouse [REDACTED]
Comment ID	PSLP_169
Response Date	14/05/21 10:44
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.8
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Edward Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/BE 1 The Strategy for Benenden parish

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_169, PSLP_170 and PSLP_171]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not positively prepared
	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Edward Stevenson-Rouse [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Fosten Green Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Edward Stevenson-Rouse [REDACTED]
Comment ID	PSLP_170
Response Date	14/05/21 10:44
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Edward Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 3: Land at Benenden Hospital (south of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_169, PSLP_170 and PSLP_171]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none"> . It is not positively prepared . It is not effective . It is not justified . It is not consistent with national policy
---	--

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Paragraph No(s) Para 5.413, 5.414, 5.416, 5.420, 5.421, 5.422, 5.428, 5.452, 5.453, 5.454, 5.456, 5.458, 5.467, 5.468 Policy No. Objective 1, Objective 2, STR1, STR2, STR3, STR5, STR6, STR7, STR8, PSTR/BE1, Policy AL/BE1, Policy AL/BE3, Policy AL/BE4, EN1 Sustainability Appraisal SHELAA Policies Map (Inset Map No(s)) Inset Map 18

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development. ... (b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

No, I do not wish to be notified of future stages of the Local Plan

Comment

Consultee	Mr Edward Stevenson-Rouse [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] Fosten Green Biddenden [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Mr Edward Stevenson-Rouse [REDACTED]
Comment ID	PSLP_171
Response Date	14/05/21 10:44
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.7
Data inputter to enter their initials here	HB
Question 1	
Respondent's Name and/or Organisation	Edward Stevenson-Rouse
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy AL/BE 4: Land at Benenden Hospital (north of Goddards Green Road), East End

[TWBC: this representation has been input against Policies PSTR/BE 1, AL/BE 3 and AL/BE 4 - see Comment Numbers PSLP_169, PSLP_170 and PSLP_171]

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	<ul style="list-style-type: none"> . It is not positively prepared . It is not effective . It is not justified . It is not consistent with national policy
---	--

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>

- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that “I’m of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”
- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.

- . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA ‘Scoping Note’ on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been “no personal injury accidents” recorded within 1,000m. Castleton’s Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways’ email. The email talks of the “heavy car dependency” of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS’s plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC’s own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden’s housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates’s *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP’s Vision objectives nor with its strategies, nor with KCC’s policies, nor with the NPPF.**
- . The PSLP’s Vision Objective 1 is : “to improve access to suitable, especially affordable housing, including for local young people and older households.” But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or

any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- . **Policy PSTR/BE1**, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- . **Policy STR 2** "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- . **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- . A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- . **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- . **Policy STR 3** calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- . **Policy STR 5** states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.
- . **Policy STR 6** proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no

daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).
- . **Para 5.414** "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough."** In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland's Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

- . **Policy STR 7** proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.
- . **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.
- . **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- . The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- . There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- . The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*
- . Also, the NPPF section 2 para 11 states: *"Plans and decisions should apply a presumption in favour of sustainable development. ... (b) strategic policies should provide for objectively assessed needs for housing ... that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan"*

area.” And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 states: "The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on a habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site".

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iiii) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP's prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School." What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles north east of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.
4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield

site in the AONB and lack of services and facilities including public transport at the settlement.” This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that “At times the workshop was emotive ...” Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) “which may be allocated for development as part of a future Local Plan.” In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP’s SA as suffering from “a lack of services and facilities including public transport at the settlement.” This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 “A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area.” This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children’s playground and pub/restaurant. The SA information is unreliable and the PSLP’s use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Question 1	
Respondent's Name and/or Organisation	Michael & Brenda Stewart
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/PW 1 The Strategy for Paddock Wood

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We cannot believe that the proposal to restrict travel over this bridge to buses and emergency vehicles has been made with any serious thought for the impact this would have on the communities to the south of Paddock Wood. A great many people from Yalding and surrounding villages regularly travel to the town for shopping and for essential access to the railway station. Alternative routes to the town would either be significantly longer or via narrow country lanes, or both. It would therefore be environmentally harmful and unquestionably damaging to the commercial viability of many retail outlets in the town.

It is impossible to discern any sense or purpose in such a proposal and we wish to record our strongest objections to it.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

For office use only

If responder hasn't ticked an option on this box, data inputter to tick 'not stated' box. Not Stated

(see web link)

This Change.org petition has been signed by Paddock Wood residents, businesses and supporters, as follows:

"Tunbridge Wells Borough Council are about to consult (Regulation 19) on their new Local Plan. In this, they plan to place over 50% of their new housing allocation in Paddock Wood and East Capel, assimilating the two. Paddock Wood should perhaps be 'grateful' that the planned number of new houses has been reduced to 3.6K. However, this is in addition to the 1000+ already in progress over the 3 recent consented developments.

The plan states that TWBC desire public engagement and involvement, to 'include consideration of how the natural and historic environment of the local area is reflected and respected' yet the overwhelming response they received during the Regulation 18 in 2019 consultation have been mostly ignored.

The plan will include building on some of the best farmland in the borough, removing hundreds of trees and building on the floodplain around Paddock Wood, where many properties already suffer from surface water **flooding**.

Flooding - TWBC want to build on category 2 and 3a flood risk areas. Huge amounts of developers' money will inevitably be spent on flood mitigation, diverting funds from other essential infrastructure. Residents in East Paddock Wood have had to spend thousands of pounds purchasing their own pumps due to regularity of flooding down Castle Hill, Mile Oak Road and Queen Street. These areas are currently surrounded by apple orchards which are assisting to disperse the run-off, but if these are developed the situation will be exacerbated. The recently-started Church Farm development has already exacerbated Paddock Wood's flooding issue; indeed the developers have removed a number of mature oak trees, which were not mentioned in the original plans. Mature oaks can draw up 50 gallons of water per day, so any further development will significantly impact the environment, including the flooding issues, not to mention the ecological impact.

Biodiversity - wildlife and plants. Countless creatures will lose their habitat. Save Capel have done their own biodiversity report which can be found here: (see web link)

Green Belt land - an exceptional reason is needed to build upon green belt land. It is important to avoid 'urban sprawl' and its loss will effectively cause Tonbridge to join up with Paddock Wood. 407.576ha of Green Belt land will be de-designated. That's 5.71% overall green belt in the borough, with 148.194ha of this being PW/East Capel.

Sevenoaks has already had its local plan rejected by the government due to this.

Wellbeing - The accessible natural green space standard (ANGSt) recommends that everyone should have accessible natural green space of at least 2 hectares in size, no more than 5 minutes' walk from home... The candidate local nature reserves, to the SW and E of Paddock Wood will not meet this standard for those living in the NW of Paddock Wood.

TWBC already recognise that **air and noise pollution** is a downside to these developments. **Light pollution** will be a factor too (not just from street lamps, which will be low-pollution LED ones.)

If TWBC is successful and this local plan goes ahead, residents will be subjected to continuous development for the next 15-20 years.

Sports provision - A sports hub is now planned for the East side of Capel, with no associated building, i.e. no changing facilities. This area is in flood zones and is also inappropriately located for Paddock Wood residents, especially if they have no private transport.

Roads/Transport - The infrastructure will not be suitable for such an increase in population, without major disadvantages to residents. We are a small rural community, with narrow country lanes, which are already being used by unsuitable HGV traffic - this can only get worse over the next 15-20 years with 350 homes being planned every year, especially with an increased number of commuters vying to get to the railway station. There will be fewer parking spaces to go round, which will lead to more dangerous parking in residential roads. There will not be enough seats on trains (and there's an issue with length of platform so the rail company will not be able to just add more carriages.) Network Rail have suggested they will not increase the width of the current road bridge.

We also envisage a negative impact on **community services**. Our local police station is being sold off for development, but an increase in population = an increase in crime. TWBC wants to double the population of Paddock Wood, so we should at least have a part time police presence. With the removal of the police station, we will have nothing.

Health Provision - Our GP surgery is already over-subscribed. A new surgery has been promised but with fewer doctors taking up general practice, we fail to see how this will be staffed.

Housing need and type - The latest calculations show that much less housing is actually needed (some sources have said it's almost half!) 'Affordable' housing is rated at 80% of market value and Social housing is 60% of market value - but how many local people will actually be able to afford these homes? Homes on the current new developments are already being marketed with a 1-bed apartment at £252-275K. How many local people on low incomes can afford to buy a £200K 'affordable' flat? These are being marketed to people nationwide through Sage Housing. We are open to some new housing in our town and villages to provide housing for the local community but the disproportionate allocation to our area is unfair, unnecessary and environmentally disastrous.

This plan is not demonstrably sound and, we would suggest, not legally compliant.

Tunbridge Wells Borough Council needs to appreciate the scale of opposition to this development. Please sign this petition to help us become a voice they can hear.

We would like to encourage all residents of Paddock Wood to act now and write to their local borough councillors - details can be found at www.writetothem.com We also need proactive help to help organise the campaign over the Regulation 19 consultation. If you would like to join our Facebook group, head over to (see web link) which will give you the most up to date information on how we are progressing.

We, the respondents to this petition respectfully ask that considering the points mentioned, and the fact that this plan is overwhelmingly unpopular with residents and councillors alike, TWBC reconsider pressing forward with this process and rethink the local plan and its alternative options."

816 have signed as at 04/06/2021

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Take respondents' views into consideration.

Make a fresh plan, which takes into account the true housing need. Don't build on Green Belt, which is there to prevent urban sprawl.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Stop Overdevelopment of Paddock Wood is an unincorporated residents' association and needs to be actively involved in the planning Paddock Wood.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	Don't know
Question 4a	

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

I believe that the Local Plan is **not legally compliant** because the information that AL/RTW 5 was to be removed from Green Belt and developed was not made available to local residents and the general public in time for them to be able to raise objections at the full council meeting of the 3rd February. In November 2019 residents were assured that this site was deemed unsuitable to be part of any future development plan. This changed (though without any reason being given for the change) in November 2020 with the Green Belt Study 3. However, this Study was not made available to the General Public until "late Feb/Early March" (Steven Baughen Head of Planning's own words to me in an email dated 15th Feb). In that document the site was known as AL/RTW XX. Most people did not know of the inclusion of this site and the intention to remove it from the Green Belt until the meeting of the 3rd Feb. It is invidious to say that the documents were available to some members of council before that and so the public could have access to them. It is not reasonable, or legally compliant, to expect residents to constantly go on to TWBC's website to see if land, last deemed protected, is being removed from the Green Belt.

I claim the Local Plan is **not legally compliant** because it constantly uses the present tense to describe something that has not yet happened. Thus the site AL/RTW5 is described as "removed" from the Green Belt when this is not true. It does not allow for the possibility that this is still under discussion. The purpose of the exercise is to propose such a removal and allow argument against it. It is misleading to the general public. TWBC does explain this anomaly in one small paragraph but this is not sufficient in such a large document. To the uninitiated this is unfair and adds to the overall impression that representation in this form, and on this form, is only for the learned and legally competent.

I claim the Local Plan is **Not Sound** on the following Basis:

Positively Prepared: It was not positively prepared because as can be clearly understood from the minutes / transcript of the Full Council Meeting of the 3rd February, there were many councillors who had not had full access to all the documents before that meeting. This, it would appear, arose through a complicated system of (limited) access to passwords and codes. Whatever the system, it was the duty of TWBC to ensure that all councillors were in possession of all relevant documents and that they had time to read them and inwardly digest them before the 3rd February. No organisation that did not ensure such overall availability, and thus invalidate the outcome of the vote, could be called positively prepared.

It was **not positively prepared** because the insertion of the site AL/RTW5 shows signs of great haste and last minute lack of detail.

a) It was not given an official reference number originally. Having been regarded as an unsatisfactory site for development in November 2019, it was hastily inserted into the Green Belt study of November 2020 (not available to the public until Feb/March 2021). In this study it was known as AL/RTWXX as stated above, and was not given the site number AL/RTW5 until the PSLP under discussion now. (draft published 21st January 2021)

b) There are discrepancies in the area of the site shown on maps and descriptions. In the Reg 19 Consultation (Published Jan 2021) it is shown as AL/RTW5 sized **5.611 Ha** whereas in the Site Assessment Sheet for RTW also published January 2021 it is shown as **7.40 Ha**.

This does not indicate **positive preparation**.

It is not justified

The removal of the Green Belt from this site is not justified at all. The Green Belt Status can only be removed from established Green Belt Boundaries "under exceptional circumstances." (NPPF) Despite asking TWBC on many occasions what are the exceptional circumstances which allow their decision, they have been unable to come up with any satisfactory answer. I thus deduct it must be "the need for more houses". I therefore argue that based on **this** reason the removal of the green belt from this site is **not justified** as TWBC has **not** looked closely enough nor allowed enough time to consider the possible future availability of Brown Field Sites in the Borough.

a) The council itself recognises the need to "assist in urban regeneration by encouraging the recycling of derelict and urban land". (Green Belt Study).

b) They have employed consultants Nexus to (amongst other things) "look into the substantial number of properties which might become available due to the failing retail sector"

c) They are proudly instigating a Town Centre plan. (due to start 2022?). Why not wait until such a plan reveals facts before removing any green belt hastily. In the process of their investigation they will surely look into all windfall and brownfield sites. It would be improper not to wait until this information were available.

d) The large Royal Victoria Place has recently been bought by British Land who one presumes will want to make money from such a purchase. It is muted they will turn the top floors of the car park into a residential area. This would be very suitable for multiple **truly** affordable housing.

I am aware these are not facts but they are **real** possibilities. The idea that the council should remove Green Belt from certain sites solely to build houses before such alternatives are **fully** investigated **is not only unjustified it is irresponsible**. The council should pay more heed here to the *Government Response to local housing needs proposals in "Changes the current planning system"* ..i.e. "We should be clear that meeting housing needs is **never** a reason to cause unacceptable harm to such places (i.e. protected landscapes and Green Belt)"

Consistent with National Policy

It is **not** consistent with **Green Belt Policy**.

This site satisfies all 5 purposes of the Green Belt

1. It prevents the unrestricted sprawl of the built up areas of Tunbridge Wells and Southborough.
2. It prevents the two towns - Tunbridge Wells and Southborough from merging into one another and becoming a characterless border area
3. It assists, in a very positive and real manner, the countryside from encroachment. It is a breathing space between houses and ancient woodland with preserved wildlife.
4. It preserves the setting and special character of both towns, allowing each to have their own individual character and not merge into an indeterminate built up area
5. By doing all the above, it assists in the urban regeneration (as mentioned above) as it encourages the use of other urban and abandoned sites.

Therefore they are **not** consistent with Green Belt Policy

They are **not** consistent with NPPF Policy

I have already quoted the NPPF paras 135 and 136 i.e. that **"Once established Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified"**.

Not only have TWBC **NOT** fully evidenced and justified the exceptional circumstances that they believe allow them to remove the green belt from AL/RTW5, they have not even presented us with any circumstances, exceptional or otherwise.

Yet again, they are **not** in keeping with National Policy

In Conclusion : I therefore claim that the proposal in the PSLP to remove the Green Belt from site AL/RTW5 is totally unjustified and unsound.

1. . It is a totally inappropriate proposed development both as regards the reason (housing) in the area chosen (green belt)
2. TWBC have not fully investigated the possibility of other sites they can use for **affordable** housing before diminishing the Green Belt.
- 3 . The effect on the whole of the Green Belt in this area would not be "negligable" as they claim, but would have serious **long term** effects. The removal of what they describe as "3 fields of *moderate distinction*" would allow the first inroads into a very clearly defined and key area of the rural space that defines the separation of Tunbridge Wells and Southborough . An area, which for many years they have been defining, and rightly so, as being vital to such a task. I argue nothing has changed in the importance of the role played by this site towards the enhancement of **all** aspects of the local area.

Question 6

Please note: *In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.*

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

I have covered this I think in full above and do not want to repeat.

For the plan to be **sound** at all, TWBC should closely examine their belief that the need for housing constitutes *exceptional circumstances*. Are they sure such a need exists (census /population figures/ density of housing?) and have they looked at **all** other possible sites where such housing could be sited.

Until all that is done, and done thoroughly and over a reasonable period, any removal of Green Belt should not be countenanced.

Question 7

Please note *the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I consider this to be necessary, or at least perhaps useful, as filling in this form is so very difficult and limiting. . A chance to put forward an argument verbally and in response to intelligent questions would be welcome.

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/CRS 1 The Strategy for Cranbrook and Sissinghurst parish

Question 4

Do you consider that the Local Plan:

Is legally compliant Yes

Is sound No

Complies with the Duty to Cooperate Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not positively prepared
It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Due to the council's failure to meet the 5 year Land Supply for a number of years, they should be following Government advice as outlined in the NPPF, and providing a 20% buffer in their housing targets. This means that further sites, such as my clients, should be allocated as housing sites in the Plan. See my attached representations.

[TWBC: for full representation, please see supporting documents]

1 Site Description and Location

The site lies 1.2 km (0.75 miles) to the north east of Cranbrook between Wilsley Pond and Wilsley Green. It lies to the west of the junction of the A229 and the A262. The site originally included the curtilage of The Barracks, a Grade II listed house, together with various outbuildings which have now been converted to dwellings. These have all been sold, and what remains is 5.35 ha (13.2 acres) of pasture land contained within 3 paddocks.

The site lies within the High Weald Area of Outstanding Natural Beauty (AONB) and adjoins the Wilsley Green Conservation Area (The Barracks is within).

Figure 1 is the Land Registry title plan at 1:2500 and figure 2 is a site location plan showing the distance to Cranbrook.

1 Housing Land Supply

The site is 5.35 ha, and if 50 dwellings per ha could be achieved then approximately 268 dwellings could be provided. This is a significant number of dwellings on a medium size site.

The Council recently updated its 5 year housing land supply position for 2018/19 which identified that the Council, inclusive of a 5% buffer as determined by the Housing Delivery Test, does not have a 5 year housing land supply, but rather a 4.69 year supply.

The Council's current position on the Housing Delivery Test indicates that for 2018, the housing delivery requirement was 1,656, whereas the delivery in the borough was at 1,457, meaning that the Council was achieving 88% of its requirement. The consequence of this as per the national planning guidance is that the Council has to provide a 5% buffer on its 5 year housing land supply as well as produce an Action Plan outlining ways in which delivery will be improved in the forthcoming years.

I believe the shortfall will be even greater for the following reasons:

- 1 The Council rely on 'windfall' sites with as many as 1232 coming forward over the plan period. The problem with windfall sites is that they diminish over time. They become harder to find and therefore the figure must be reduced.
- 2 Obtaining planning permission has become a very expensive business and very time consuming. The introduction of validation requirements has caused time delays and costs, all of which have reduced the flow of housing sites. A typical large housing scheme, even on an allocated site may have to overcome a number of obstacles. For example:
 - . A planning application may need to have an ecology survey, a tree survey, a Section 106 Agreement to provide costs for highway improvements, a contribution towards education, a transport statement, a heritage assessment, a landscape assessment, affordable housing etc. etc.

against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than 5 years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- . **5% to ensure choice and competition in the market for land; or**
- . **10% where the Local Planning Authority wishes to demonstrate a 5 year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or**
- . **20% where there has been sufficient under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply."**

The position changes significantly if a 20% buffer is included (see Appendix 3).

Only 76% of dwellings will be realistically delivered and more sites must be allocated. This site could produce 268 dwellings giving 1725 dwellings (90% of requirement). This together with a few other sites would achieve the correct supply.

1 Appendices

1. Highway report of Mr. Rollings.
2. Historic hedgerow boundaries.
3. 20% buffer.

[TWBC: for appendices, please see supporting documents]

The Barracks, Wilsley Green, Cranbrook, Kent, TN17 2LG

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 Apply the 20% buffer and identify further sites accordingly.
- 2 Do not assume Windfall sites will come forward in the same numbers as historically.
- 3 Be mindful of additional costs L.A. seek in Section 106 Agreements which may reduce sites coming forward.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Question 1	
Respondent's Name and/or Organisation	Mr & Mrs Street
Question 2	
Agent's Name and Organisation (if applicable)	Downes Planning

Question 3

To which part of the Local Plan does this representation relate?

Paragraph(s)

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Paragraph No(s) 6.308-6.439 (Housing)

Question 4

Do you consider that the Local Plan:

Is legally compliant

Yes

Is sound

No

Complies with the Duty to Cooperate

Yes

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Due to the council's failure to meet the 5 year Land Supply for a number of years, they should be following Government advice as outlined in the NPPF, and providing a 20% buffer in their housing targets. This means that further sites, such as my clients, should be allocated as housing sites in the Plan. See my attached representations.

[TWBC: for full representation, please see supporting documents]

1 Site Description and Location

The site lies 1.2 km (0.75 miles) to the north east of Cranbrook between Wilsley Pond and Wilsley Green. It lies to the west of the junction of the A229 and the A262. The site originally included the curtilage of The Barracks, a Grade II listed house, together with various outbuildings which have now been converted to dwellings. These have all been sold, and what remains is 5.35 ha (13.2 acres) of pasture land contained within 3 paddocks.

The site lies within the High Weald Area of Outstanding Natural Beauty (AONB) and adjoins the Wilsley Green Conservation Area (The Barracks is within).

Figure 1 is the Land Registry title plan at 1:2500 and figure 2 is a site location plan showing the distance to Cranbrook.

1 Housing Land Supply

The site is 5.35 ha, and if 50 dwellings per ha could be achieved then approximately 268 dwellings could be provided. This is a significant number of dwellings on a medium size site.

The Council recently updated its 5 year housing land supply position for 2018/19 which identified that the Council, inclusive of a 5% buffer as determined by the Housing Delivery Test, does not have a 5 year housing land supply, but rather a 4.69 year supply.

The Council's current position on the Housing Delivery Test indicates that for 2018, the housing delivery requirement was 1,656, whereas the delivery in the borough was at 1,457, meaning that the Council was achieving 88% of its requirement. The consequence of this as per the national planning guidance is that the Council has to provide a 5% buffer on its 5 year housing land supply as well as produce an Action Plan outlining ways in which delivery will be improved in the forthcoming years.

I believe the shortfall will be even greater for the following reasons:

- 1 The Council rely on 'windfall' sites with as many as 1232 coming forward over the plan period. The problem with windfall sites is that they diminish over time. They become harder to find and therefore the figure must be reduced.
- 2 Obtaining planning permission has become a very expensive business and very time consuming. The introduction of validation requirements has caused time delays and costs, all of which have reduced the flow of housing sites. A typical large housing scheme, even on an allocated site may have to overcome a number of obstacles. For example:
 - . A planning application may need to have an ecology survey, a tree survey, a Section 106 Agreement to provide costs for highway improvements, a contribution towards education, a transport statement, a heritage assessment, a landscape assessment, affordable housing etc. etc.

against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than 5 years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- . **5% to ensure choice and competition in the market for land; or**
- . **10% where the Local Planning Authority wishes to demonstrate a 5 year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or**
- . **20% where there has been sufficient under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply."**

The position changes significantly if a 20% buffer is included (see Appendix 3).

Only 76% of dwellings will be realistically delivered and more sites must be allocated. This site could produce 268 dwellings giving 1725 dwellings (90% of requirement). This together with a few other sites would achieve the correct supply.

1 Appendices

1. Highway report of Mr. Rollings.
2. Historic hedgerow boundaries.
3. 20% buffer.

The Barracks, Wilsley Green, Cranbrook, Kent, TN17 2LG

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- 1 Apply the 20% buffer and identify further sites accordingly.
- 2 Do not assume Windfall sites will come forward in the same numbers as historically.
- 3 Be mindful of additional costs L.A. seek in Section 106 Agreements which may reduce sites coming forward.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

[TWBC Comment: Note response slight variation on PSLP_217, 218, 219 and 220]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
 - . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the

distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement*." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
 - . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
 - . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities.

This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to

prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes

The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from

changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC

to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when

considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.”

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_199
Response Date	08/05/21 16:34
Consultation Point	Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden (View)
Status	Processed
Submission Type	Email
Version	0.6
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy AL/BE1	
Inset Map 18	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_217, 218, 219 and 220]

[TWBC comment - representation copied against policy PST/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school

has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement*." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
 - . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
 - . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will

need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated

hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes

The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of

landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC

to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when

considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.”

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_200
Response Date	08/05/21 16:34
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy AL/BE3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_217, 218, 219 and 220]

[TWBC comment - representation copied against policy PST/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response to the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the

distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement*." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
 - . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
 - . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities.

This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to

prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes

The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from

changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC

to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when

considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.”

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_202
Response Date	08/05/21 16:34
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy AL/BE4	
Inset Map 18	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_217, 218, 219 and 220]

[TWBC comment - representation copied against policy PST/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.

- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan

to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.

- . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.
- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- . The *Sustainability Appraisal* (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
- . The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
- . The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school

has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

- . Appendix L (pp331-2) shows *Scores for Reasonable Sites in Benenden*. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and *lack of services and facilities including public transport at the settlement*." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ...". Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?
 - . Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.
 - . Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**

The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will

need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038.

The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

Policy PSTR/BE1, LBD 5.416 states "the LBD around Benenden village sets the extent of existing and planned development .." This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.

Policy STR 2 "The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments.." This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to "show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*" It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.

A masterplan is essential to avoid current inconsistencies on the size of areas to be developed: AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states "Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development.." They do not. The PSLP states that in the event of a successful referendum, the BNP's proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?

A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner's queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.

The PSLP claims building will only be within existing footprints, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.

Policy STR 3 calls for the use of brownfield sites "within settlements" and in "sustainable locations." AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the brownfield register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in "a way that makes as much use as possible of previously-developed or 'brownfield' land." AL/BE 4 contains in-use residential housing and an LWS and therefore is not brownfield.

Policy STR 5 states that "New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development." Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP's approach does not take comments to the first draft LP into account.

Policy STR 6 proposes to "Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough." In the case of the two isolated

hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is "Remote from a settlement centre," (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, "although promoted by the policy, shared transport and active travel options are unlikely to take precedence over private vehicle use thus air quality and climate change score negatively." This we feel is the nub of the issue. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP's supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

AL/BE3&4 also undermine TWBC's Full Council motion of July 2019 to reduce CO2 emissions. "The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles" (para 44 *Transport Review*). According to TW's own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough's priorities, sites chosen for development in Benenden would have included site 158.

PSLP paras 5.453 and 5.467 state that "residents of development in this location will rely heavily on private cars." These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC's Nov 13, 2019 letter on this subject).

Para 5.414 "The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School." The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.

Policy STR 6 The LP proposes to "**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**" In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.

Cycle routes

The PSLP's standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: "When more people cycle or walk the health of the population improves and our roads become safer and less congested." Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.

The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton's Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC's Rural Lanes: Supplementary Planning Guidance. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: "Rural lanes which are of

landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced." In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.

Policy STR 7 proposes, in dealing with TWBC's 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council's target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PSLP's statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

Policy STR1 promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals).

Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 "A presumption of sustainability lies at the heart of the NPPF", but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF's strategic priorities.

Policy STR 8 states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *"The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.

The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.

There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP's plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.

The PSLP claims that the hospital development "has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings" (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit's own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *"...In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan."*

Also, the NPPF section 2 para 11

“Plans and decisions should apply a presumption in favour of sustainable development... (b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.” And see Footnote 6: the policies referred to are those in the Framework ...relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs

NPPF para 177 requires that *“an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”* No such assessment has been undertaken.

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3&4.

1 Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC's April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners' consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC

to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital's café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village ("The Society is not a transport provider" is BHS' response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills' comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

1 The PSLP is unsound because of inconsistencies in the treatment of different sites.

- . **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they might be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, "the site lies within, or very close to the relevant impact risk zone for Parsonage Wood", a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) "Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval." The imbalance in the treatment of the two sites is substantial and suggests prejudice.
- . The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that "the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern". This is contrary to the views of TW's 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.
- . Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.
- . The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children's nursery and that there is a pavement on both sides of Iden Green's main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.
- . The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process 'hostile'. The interactive on-line site was unmanageable. The PSLP's prose entirely suited the opaqueness of the procedure. Here is one example from the SA (page 163) "However, the education objective does not deteriorate when

considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.”

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore a relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_217
Response Date	11/05/21 12:00
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policies: AL/BE1, AL/BE3 and AL/BE4	
Inset Map 18	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No
Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_194, 199, 200 and 202]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless*

confrontation with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only "31 residents from the East End" sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP's approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC's wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), "sacked" her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE's comments on the first draft LP (DLP_4556) - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*."
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden's East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS's response to the Independent Examiner's queries in relation to the BNP. TPA's information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states "There is an intermittent pavement along GGR". The GGR is a long road running from New Pond Road to Castleton's Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as "Serving the people of Benenden and Iden Green" without any reference to the East End.
 - . The TPA says that "a day nursery is located immediately to the north of the Site within 400m." There is incorrect, yet this error is repeated in para 5.413 of the PSLP "There are also nursery/pre-school facilities at Iden Green and East End." An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019

Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 &4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely

to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- The NPPF section 2 para 11 states *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer

costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_218
Response Date	11/05/21 12:00
Consultation Point	Policy AL/BE 1 Land adjacent to New Pond Road (known as Uphill), Benenden (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy: AL/BE1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_194, 199, 200 and 202]

[TWBC comment - representation copied against policy PSTR/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our

faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
 - . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in

only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely

to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- The NPPF section 2 para 11 states *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer

costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_219
Response Date	11/05/21 12:00
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy: AL/BE3	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_194, 199, 200 and 202]

[TWBC comment - representation copied against policy PSTR/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our

faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
 - . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in

only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely

to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- The NPPF section 2 para 11 states *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer

costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_220
Response Date	11/05/21 12:00
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Other
Version	0.5
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Policy: AL/BE4	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No

Complies with the Duty to Cooperate

No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

[TWBC Comment: Note response slight variation on PSLP_194, 199, 200 and 202]

[TWBC comment - representation copied against policy PST/BE1]

This submission concerns the parish of Benenden, the only parish in the borough to have made its own allocations. The Benenden Neighbourhood Plan (BNP) has been developed in close consultation with TWBC, with the BNP in the lead. The BNP announced its allocations in February 2019, before inviting AECOM to produce its Strategic Environmental Assessment. Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had been made and published in February 2019. Further, Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." BNP allocations were first published in February 2019 i.e. before LP site allocation policies.

Allocations made by the LP, when it took up the BNP's baton, are therefore inevitably linked to BNP's weaknesses. Yet if the BNP passes a referendum before acceptance of the LP, it is said that it will take precedence over the LP (see para 5.421), with the exception of its plans for the northern site at Benenden hospital, which will be overruled by the plans advanced in the LP (see Benenden Parish Council April 2021 response to Independent Examiner queries on the BNP). This is in contravention of para 5.422 which talks of making "modifications to the LP" so that it matches the BNP.

1 Community involvement. EN1: this requirement has not been respected.

- . In Benenden, almost all new housing is slated for the East End, yet the Friends of the East End (FEE), were never asked to meet with the BNP steering group.
- . See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others. The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the Informal Draft NP (published on February 23, 2019), in which the allocations later adopted by the LP were first set out. A FEE submission with 164 signatures was submitted in October 2019 objecting to the first draft of the LP, and in the same month, a FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. See the FEE's current online petition with more than 450 signatures <https://www.change.org/EastEndFriends>
- . Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our

faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward.”

- . One of the regular articles on the BNP submitted by the chair of the BNP Steering Group appeared in January 2020. It dismisses FEE opposition suggesting only “31 residents from the East End” sent in comments.
- . The core group behind the BNP has consistently tried to persuade those who support the FEE to desist. The chair of the Parish Council and the chair of the BNP Steering Group have twice asked to meet a Tunbridge Wells Alliance (TWA) Borough Councillor for the parish, once together with a TWA borough council candidate, in efforts to persuade them to adhere to the BNP’s approach and not to listen to the FEE.
- . The organiser of the FEE was a member of the Steering Committee 2017/2018 as chair of the Environmental Group. She expressed strong disagreement with a Borough Councillor who lives in the village (on occasion, he deputises as chair of the Steering Group) about his wish to step up allocations in the East End and suppress TWBC’s wish to build 174 houses on site 158. As a result, the Steering Group chair (using his own word), “sacked” her. This is contrary to EN1 para 9, encouraging early, proactive and effective engagements and the requirement that views expressed should be properly considered.
- . Consultation also failed in relation to the neighbouring parish of Biddenden. The Clerk of Biddenden Council has repeatedly responded to BPC in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP’s mismanagement of the parish of Biddenden in the Biddenden Parish Magazine, February 2021.
- . The LP is based on the BNP and BNP allocations were made before consultations with stakeholders such as the AONB. This is not consulting in a timely fashion. Further, the LP requires surveys of the hospital sites *after* the designation of the sites for development, for example, archaeological surveys (see AL/BE 3&4). Historic England (HE) asks for the surveys to be carried out *before*. See HE’s comments on the first draft LP (DLP_4556) - “we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted*.”
- 1 **The PSLP is not based on sound evidence**
 - . Throughout the LP process, misstatements have been made about amenities in Benenden’s East End. These may be traced back to a submission made by traffic and highways consultants, Transport Planning Associates (TPA) to Benenden Healthcare Society Ltd. (BHS). This submission was recently disclosed in BHS’s response to the Independent Examiner’s queries in relation to the BNP. TPA’s information is sometimes inaccurate and sometimes misleading and we consider it here in detail because it is difficult otherwise, to understand how the LP was able to continue, iteration after iteration, to relate false information about the hospital site.
 - . In October 2019, TPA reported (para 2.6) that there was a footpath along the southern edge of Goddards Green Road (GGR) and the PSLP, para 5.452 states “There is an intermittent pavement along GGR”. The GGR is a long road running from New Pond Road to Castleton’s Oak crossroads, and was formerly a lane. The pavement is limited to the short section immediately outside the hospital buildings. To say that there is an intermittent pavement along GGR is misleading.
 - . The TPA refers to the East End as a village, which it is not. The East End runs from the junction of GGR and Walkhurst Road, along the GGR to the border with Tenterden, then turns south to reach close to Hole Park in Rolvenden, then east back to Walkhurst Road at the site of the stream, then along Walkhurst Road back to GGR (see the old Electoral Roll for 2004 when the East End had its own polling station). It is a large, totally rural area of several square miles, which was why it was chosen as the site for an isolation hospital in 1906. Today it contains only 76 houses scattered across the entire area. The PSLP consistently refers to the East End as a hamlet. It is not, which is why BPC is able to advertise itself on its website as “Serving the people of Benenden and Iden Green” without any reference to the East End.
 - . The TPA says that “a day nursery is located immediately to the north of the Site within 400m.” There is incorrect, yet this error is repeated in para 5.413 of the PSLP “There are also nursery/pre-school facilities at Iden Green and East End.” An accurate account would mention Iden Green only.
 - . The TPA states that there are daily bus services along GGR provided by bus nos. 24 and 299, and twice a day service provided by the Hopper bus. This information is incorrect. The 2019 Hopper bus, operated by the Tenterden social services hub on an experimental basis, failed in

only a matter of months. While the 24 and the 299 buses pass along GGR, they do so on only one day a week. The 24 on Tuesdays and the 299 on Wednesdays. The East End has almost no public transport.

- . The TPA makes several statements in relation to traffic which have fed misinformation into the system to be reflected in AL/BA3&4. This misinformation was only recently revealed when documents were provided by BHS following April 2021 queries raised by the Independent Examiner on the BNP. These documents include a TPA 'Scoping Note' on road and traffic conditions at the site and a letter written in response to this Note from KCC Highways, dated 13 Nov. 2019. The TPA states that the GGR is 7m wide at the hospital site which detracts from the fact that it is actually a winding rural lane, now called a road, and varies considerably in width. It may at some point be 7m wide, but at others, it is so narrow that two lorries have difficulty passing each other. The TPA claims that there is no need for a road safety review because there have been "no personal injury accidents" recorded within 1,000m. Castleton's Oak crossroads lie 1.5 km from the site and accidents there are frequent, largely due to increasing traffic at the hospital. The hospital has turned itself into an almost exclusively out-patient centre and almost all its 300 employees drive in to work from outside the parish (formerly, they were housed on site in hospital staff buildings). Kent County Council (KCC) Highways make constant and repeated attempts to lower the risk of injury at the crossroads. Works there are ongoing at this time. The TPA claims that no traffic surveys are necessary which is a point queried in the KCC Highways' email. The email talks of the "heavy car dependency" of residents in any housing in this location and says this was one of its concerns, even at the time of the original application asking for only 24 houses. The email states that BHS's plans (and therefore AL/BE 3&4) are contrary to the NPPF and to KCC's own policy objectives, and points out that the hospital has not co-operated over the idea of a minibus to provide transport from the site to Benenden. The letter calls for: traffic counts along the GGR; a wider crash analysis; and expresses concern over the proposed access points to the SE Quadrant - 2 on Green Lane and 2 on GGR. Lastly, on trip generation, the TPA projects that 47 houses at the site will produce only 106 trips a day, though the consultants admit that they have difficulty in basing their estimate on comparable sites because there are none. These trip generation figures ignore existing traffic from local residents, from patients, from hospital staff and from the newly (January 2021) proposed housing estate at Cleveland. The AL/BE 3&4 fails to provide a traffic count, fails to ask for a road safety review and fails to acknowledge frequent traffic accidents near the sites.
- . Pre-submission supporting documents also produce inaccurate and sometimes irrelevant evidence. The hospital sites are within the setting of an AONB and even overlap into it, yet *Inset Map 18* (Benenden Hospital), unlike other maps attached, makes no reference to the AONB boundary. The BNP claims that the hospital is outside the AONB and on this basis, since the rest of the village is wholly within the AONB, largely justifies placing most of Benenden's housing in the East End. The relationship of the AONB boundary to the hospital sites is important yet it is ignored on the map. This looks like prejudice.
- . Hankinson Duckett Associates's *AONB Setting Analysis Report* (a supporting document for the PSLP, referred to as an evidence base) is, in its analysis of AL/BE3&4, unsound. The analysis argues that development at these sites will enhance the setting of the AONB. It illustrates the argument with photos of the hospital chapel and its carpark. Neither chapel nor car park are in the area up for development.
- 1 **Policies AL/BE3&4 are not consistent with the PSLP's Vision objectives nor with its strategies, nor with KCC's policies, nor with the NPPF.**
- . The PSLP's Vision Objective 1 is : "to improve access to suitable, especially affordable housing, including for local young people and older households." But this is inconsistent with allocations AL/BE 3 & 4. BHS is asking in its comments on the LP first draft, for a lower number of affordable homes because of the high cost of brownfield development. Living isolated in the countryside, families will need at least two cars. Old and young will be unable to walk to schools, shops or any other amenities. This is not a suitable site for a borough which (see para 2.16) expects the population over the age of 65 + to increase by around 40% between 2020 and 2038. The PSLP's Vision Objective 2 is to ensure sustainable development which allocations at AL/BE 3&4 do not achieve. On the contrary, the KCC warns that even with the existing permission for 24 houses on AL/BE3, the highway authority had concerns. This is an isolated location, deep in the countryside (see KCC Highways email 13 Nov 2019). More than 24 houses in this location is not sustainable.

- **Policy PSTR/BE1**, LBD 5.416 states “the LBD around Benenden village sets the extent of existing and planned development ..” This conflicts with the recommendation that major development be instated three miles beyond the LBD, on the border with Biddenden.
- **Policy STR 2** “The Council requires the use of masterplanning, including the use of design codes and sustainable design standards where appropriate, for strategic and larger-scale developments..” This is undermined by AL/BE 3&4 which calls for a masterplan for an area not included in the PSLP and not presented. Para 1a of Policy AL/BE3 states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not clearly indicated from the start.
- **A masterplan is essential to avoid current inconsistencies on the size of areas to be developed:** AL/BE3 excludes one of the 2 Local Wildlife Sites (LWS) at the site, yet the BNP includes both. Para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” They do not. The PSLP states that in the event of a successful referendum, the BNP’s proposals will prevail. If this is so, are we supposed to assume that AL/BE3 map is inaccurate?
- A similar problem arises at the northern site (AL/BE4) here there are currently 18 dwellings. The proposal allows for these to be demolished and another 25 dwellings added to the site. The size of the area to be developed varies between the LP and the BNP. The LP includes the LWS in the area to be developed but the BNP includes only a small section, but says in the event of a successful referendum the BNP plan will be over-ruled by the LP plan (see the BPC response April 2021 to the Independent Examiner’s queries). This is the reverse of 5.421 & 2. It is unsound to proceed with a plan when the NP and the LP are at odds with each other.
- **The PSLP claims building will only be within existing footprints**, an approach which is at odds with that of the BHS. Plans for 47 new houses in AL/BE3, presented to the village on 17th February 2020 by the hospital architects, show the buildings are not to be built within the footprint of previous buildings nor to respect LWS.
- **Policy STR 3** calls for the use of brownfield sites “within settlements” and in “sustainable locations.” AL/BE 3 consists of disused medical buildings and 2 LWS with parkland and veteran trees (depending on whether this second LWS is included or not). 5.448 is therefore incorrect. The site should be described not as brownfield but as partly brownfield. It is not on the Brownfield Register. Because of its remote location and its valuable LWS sites, it is not free from constraints which could be mitigated. As such, Policy AL/BE3 does not meet the criteria needed under the NPPF, Section 11, para 117 for development in “a way that makes as much use as possible of previously-developed or ‘brownfield’ land.” AL/BE 4 contains in-use residential housing and an LWS and therefore is not entirely brownfield.
- **Policy STR 5** states that “New residential ... development will be supported if sufficient infrastructure capacity is either available or can be provided in time to serve the development.” Will this happen at AL/BE3&4? Developers themselves are to provide the infrastructure at AL/BE 3&4. The LP proposes to take on trust suggestions that the BHS will avoid building on the LWS and will provide play-grounds, sports facilities and tennis courts. We know from submissions following the first draft LP, that BHS is actually planning to remove one LWS entirely and that its plans include building on the LWS and beyond the foot print of previous buildings. BHS suggests, in its response to the first draft LP (DLP_4956) that it is unlikely to provide play-grounds, sports facilities and tennis courts. The PSLP’s approach does not take comments to the first draft LP into account.
- **Policy STR 6** proposes to “Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.” In the case of the two isolated hospital sites, the PSLP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport. The Benenden hospital sites have no daily bus service and no active travel link to the village, and neither the PSLP nor the BHS provide credible information on how these links are to be provided. The KCC email of Nov 13 suggests that the hospital is uncooperative on the proposal to organise a minibus service and the SHELAA says of AL/BE3 that it is “Remote from a settlement centre,” (unlike sites 158, 222 and LS8); that residents will rely heavily on private cars and thus air quality and travel objectives score negatively; and that, “although promoted by the policy, shared transport and active travel options are unlikely

to take precedence over private vehicle use thus air quality and climate change score negatively.” This is crucial. For all the talk of mitigating the remoteness of the hospital sites with a minibus link and cycle routes, nobody actually believes that any of these measures will succeed. As for the proposal to create links suitable for electric personal vehicles, such as mobility scooters (as suggested under STR 6), it is difficult to see, when the closest link with the village is a single-track lane (Walkhurst Road), how any personal electric vehicle could make that journey. The PSLP is creating, through its policies AL/BE3&4, a car dependent community. This thereby negates the sense of the LP’s supporting document, *Transport Strategy Review Sept 2019* which urges reducing the need to travel.

- . AL/BE3&4 also undermine TWBC’s Full Council motion of July 2019 to reduce CO2 emissions. “The dominance of the car as a mode of transport can lead to congestion, more road accidents, air and noise pollution. In addition it contributes to climate change, reduces social cohesion and leads to less healthy lifestyles” (para 44 *Transport Review*). According to TW’s own SA from 2006, if social cohesion, reduction in air pollutants, and public health were indeed the borough’s priorities, site 158 would have been among those chosen for Benenden, as originally intended.
- . **PSLP paras 5.453 and 5.467** state that “residents of development in this location will rely heavily on private cars.” These plans runs counter to STR6 policy on the environment see paras 6.8, 6.9, 6.10, 6.11 and 6.13. It also contravenes KCC policies on climate change and the NPPF (see KCC’s Nov 13, 2019 letter on this subject).
- . **Para 5.414** “The parish provides two relatively large sources of employment: at Benenden Hospital and at Benenden School.” The inference is that the employment opportunities are linked somehow to the population of Benenden. There is in fact little connection. The 300 plus staff at the hospital drive into the parish along GGR to work and, since the hospital is isolated from the village, their contribution to the local economy is negligible.
- . **Policy STR 6** The LP proposes to “**Deliver future development in accessible locations, normally within or in close proximity to existing towns and villages across the borough.**” In the case of the two isolated hospital sites, the LP contradicts its own strategic policy and fails to offer choices in transport or to prioritise active travel and public transport.
- . **Cycle routes:** The PSLP’s standards on the public benefits of cycling and walking are based on the *Cycle Strategy Supporting Document*, but these standards are undermined by site allocation in Benenden. The Cycle document states that: “When more people cycle or walk the health of the population improves and our roads become safer and less congested.” Its objectives 4 and 5 are to improve safety for cyclists and air quality for all, but AL/BE 3 & 4 will create a community, deep in the countryside, entirely dependent on the car and will contribute to poorer air quality for all. The allocation of these sites, as opposed to sites such as 158, is difficult to understand.
- . The *Cycle Strategy* states that fear of traffic is possibly the main factor discouraging people from cycling. National Cycle Route 18 runs from the Rolvenden Road, down Stepneyford Lane, to Green Lane, before joining the Benenden Road near the hospital, turning right and leading to Castleton’s Oak Cross roads and Gribblebridge Lane. This route is a largely on-road ride travelling through the High Weald, using narrow, picturesque country lanes as much as possible. Green Lane/Stepneyford Lane is mentioned in TWBC’s *Rural Lanes: Supplementary Planning Guidance*. It is particularly high scoring in terms of its landscape, its recreational value, its natural beauty and its history. For these reasons, it is part of National Route 18. Rather than encouraging cycling, AL/BE3, which proposes two exits for this major development on GGR and two on Green Lane (where a second housing estate, at Cleveland Farm is already leading to Kent Highways calling for road widening and the elimination of grass verges - see building application 20/03267/FULL) will cause an increase in those factors, identified in *TW Cycle Strategy*, as discouraging cyclists, namely, traffic and the loss of unspoilt country lanes. Policy AL/BE3 also contravenes Kent Structure Plan Policy ENV13: “Rural lanes which are of landscape, amenity, nature conservation, historic or archaeological importance will be protected from changes which would damage their character, and enhanced.” In any event, the cycle route is purely recreational and will not enhance the sustainability of these sites.
- . **Policy STR 7** proposes, in dealing with TWBC’s 2019 legally binding commitment to manage climate change, that all development in the borough will support the Council’s target to achieve net zero emissions by 2030. It is unsound, with such a goal, to propose a major development on the parish periphery, 3 miles equidistant from two villages where there is no shop (in spite of the PLSP’s statement AL/BE 3&4) and no café (BHS says its café was built for its own use not for the use of the public - see comments on the first draft of the LP). Residents will need their cars for almost everything.

- **Policy STR1** promotes the effective use of previously developed land, having due regard to relevant Plan policies, but in promoting AL/BE3&4, the PSLP disregards STR6 (environmental goals) & STR7 (transport goals). Under the NPPF, sustainability is the priority, as the PSLP acknowledges in STR3, 4.65 “A presumption of sustainability lies at the heart of the NPPF”, but in allocating AL/BE 3&4, the PSLP fails to respect its own and the NPPF’s strategic priorities.
- **Policy STR 8** states that development should contribute to and enhance rural landscapes with particular regard to the High Weald (HW) AONB. The PSLP promotes nature conservation. Its biodiversity objective is to achieve net gains and, where possible, secure long-term management of sites for biodiversity. AL/BE3 runs counter to this strategy since the BHS has produced plans showing houses built over the LWS. It has, furthermore, produced a document requiring that one of the two LWS be dug up and removed to another unspecified location, thereby nullifying the terms of the existing Landscape and Ecology Management Plan (LEMP) for that site. Para 3.21 of the BHS submission on the first draft LP states: *“The Society supports the requirement for long-term management of the core areas of LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peak Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”* This is a particularly significant site for biodiversity. A letter from Keith Nicholson, former Planning and Conservation officer for the Kent Wildlife Trust, dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert states that the hospital LWS are of national importance, mainly for the large number of different varieties of waxcaps. He states that they could well have been designated SSSI. Both in terms of waxcaps and in terms of valuable acid grassland, the hospital sites have high environmental value, see Comment DLP_3458 on the first draft of the LP, from the High Weald AONB Unit. The Benenden Hospital site *“includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network.”* AL/BE3&4 threaten the biodiversity of significant species in the LWS at the hospital sites, contrary to EN1.
- The LWS to the south of AL/BE3 is included in the BNP and BPC argues that this has been done in order to protect it (see their response to the Independent Examiner April 2021). It is difficult to follow this logic. The inclusion of the site in the area to be developed suggests that it too could be under threat.
- There is no plan showing the placement of houses on AL/BE 4, which is currently home to a large LWS and is the site of 18 habitable dwellings, almost all of the them currently in use and let. The proposal allows for these to be demolished and another 25 dwellings added to the site. The PSLP includes the LWS in the area to be developed and the BNP excludes most of it. Benenden Parish Council (BPC), in its April 2021 response to the Independent Examiner, has said that, in this case of a successful referendum, the PSLP’s plan (which includes the LWS), will prevail. In other words, of the 3 LWS in AL/BE 3&4, one is slated for removal, one will be built over if the PSLP prevails and one may be built over if the BNP prevails. This undermines STR8.
- The PSLP claims that the hospital development “has the potential to improve the setting of the HW AONB through the delivery of a more sensitive redevelopment of existing buildings” (para 5.454), but the claim is not supported by evidence produced by the *Hankinson & Duckett* (see above) while the HW AONB unit’s own view is the opposite. See TW first Draft LP, **DLP_3458 High Weald AONB Unit** (which objects to the Plan) : *“....In our view the development at Benenden Hospital will have a significant effect on the setting of the AONB and the purposes of its designation, and this issue has not been properly considered by the Plan.”*
- The NPPF section 2 para 11 states *“Plans and decisions should apply a presumption in favour of sustainable development... ..(b) strategic policies should provide for objectively assessed needs for housing ...that cannot be met within neighbouring areas unless ... (i) the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.”* And see Footnote 6: the policies referred to are those in the Framework ... relating to habitat sites (and those sites listed in para 176) and /or designated as SSSI, AONBs
- NPPF para 177 requires that *“The presumption in favour of sustainable development does not apply where the plan or project is likely to have a significant effect on habitats site (either alone or in combination with other plans or projects), unless an appropriate assessment has concluded that the plan or project will not adversely affect the integrity of the habitats site.”*

PSLP EN1 para 5. Biodiversity and geodiversity.

AL/BE 3&4 run counter to this policy as stated above in relation to the LWS.

The Environment

STR8 sets high environmental standards but these are undermined in the site allocations. This is particularly startling in the light of the July 2019 Full Council motion to recognise the climate and biodiversity emergency, in fact, the Benenden allocations put into question whether the motion was passed in good faith.

EN1 para 5 (Biodiversity and geodiversity) says that proposals should maximise opportunities to increase biodiversity. This goal may make sense in an urban setting, but development in the countryside, as is proposed in AL/BE 3 & 4, cannot hope to ever mitigate biodiversity loss. The destruction of trees and wild spaces, the introduction of lighting, kerbs, driveways, wider roads and narrower verges, the use of concrete, tarmac, bricks and mortar in a deeply rural setting cannot “increase biodiversity”.

EN1 provides for Long-term Management plans which would be satisfactory within an urban context. In a rural location like the East End, such plans are no substitute for natural wild spaces. A ‘managed’ green space set among streets is less likely to promote biodiversity and less likely to conserve wildlife than ‘unmanaged’ green space. Further, the three LWS in AL/BE3 are all already part of an existing LEMP agreement, and since one or all would be removed in the case of development as outlined by BHS under AL/BE3&4, instead of creating a long-term management plan, AL/BE3&4 would all but terminate an existing one. The sentiments expressed in EN1 are mocked by AL/BE3& 4.

4. Site policies

AL/BE3 excludes one of the 2 LWS at the site, and the BNP includes both, yet para 5.458 states “Both this policy and BNP draft Policy SSP3 broadly follow the same approach towards the potential for developing this site for a residential development..” This does not appear to be the case. Further, the SHELAA treats this site twice, once including the southern LWS (and excluding Windmill Cottage) and once excluding the LWS and including Windmill Cottage (SHELAA pages 1-3 and pages 18-19). In the second instance, the suggestion is for 67-73 houses, presumably building over the LWS. The first plan is the one adopted in the PSLP and appears to be the more accurate of the two in that it describes the site as “mostly PDL”. The second ignores all greenfield aspects and is almost identical to the plan in the BNP, a plan which BNP claims will prevail if it wins a referendum. Is AL/BE3 presenting us with the wrong plan?

AL/BE3 and AL/BE4 provide for a phased timetable for development of the two sites at different time intervals without calling for a comprehensive masterplan for the hospital site as a whole i.e. for the entire built up area. This is inconsistent with STR2, which requires a masterplan for large developments. The full extent of the area to be developed must be clear. See para 1a of Policy AL/BE3 which states that there is a need to “show indicatively how the other areas included within Policies AL/BE3 and AL/BE 4 can be developed to meet the overall policy requirements as set out within each of these policies, and *how the future needs for Benenden Hospital will be met on areas to the north west and south west that currently comprise the hospital buildings and associated ancillary uses and is previously developed land.*” It is not sound to proceed with an LP where the land to be developed is not indicated from the start.

AL/BE3&4 both call for an active travel link between the site and Benenden village. This proposal has been costed (see BPC’s April 2021 reply to the Independent Examiner) at between £180,000 and £220,000 for a 3m wide tarmacked surface, plus costs to upgrade it to a bridleway, plus the costs associated with obtaining landowners’ consent or, failing that, of starting compulsory purchase proceedings which TWBC expresses reluctance to undertake because of the significant compensation costs and legal costs which would be involved. No steps have been taken either by the BNP or TWBC to ascertain the willingness of landowners to give up their land although the major landowner involved wrote to BNP on 11th Sept. 2019 objecting to the plan. It is understood that he was not contacted for subsequent discussion.

AL/BE3&4 calls for the repurposing of the existing tennis courts for the use of local residents, which BHS denies it will offer for public use; for the public use of the hospital’s café; for the creation of a hospital shop (5.413); for a minibus service linking the hospital to the village (“The Society is not a transport provider” is BHS’ response); for green space, a playground and provision of a community hall - most of these policies are refuted in Savills’ comments on behalf of BHS, in the first draft of the LP, DLP_ 4956 paras 3.14, 3.18, 3.19, 3.20, 3.46 and 3.47. Rather than agreeing to such policies, the hospital is calling on TWBC to introduce a more flexible funding system to allow a *reduction* of developer

costs. BHS argues these will be high because they wish to demolish existing buildings. It is unsound to propose policies which cannot be implemented. Once the sites are sold, no relevant conditions to this effect could be imposed.

5. The PSLP is unsound because of inconsistencies in the treatment of different sites.

(i) **Uphill, AL/BE1** is described as having archaeological potential (para 5.428) requiring possible mitigation measures. This is not because of historical finds on the site, but because they *might* be found. A listed manor house lies on the other side of New Pond Road and, according to AL/BE1, “the site lies within, or very close to the relevant impact risk zone for Parsonage Wood”, a SSSI which is, in fact, several miles away. The archaeological significance of AL/BE 3&4 is far more certain and substantial. The hospital sites are where a bronze age palstaff was found (see the National Monument Register - SMR Number /Hob UID)) and the sites lie close to two ancient routeways. A Roman Road runs west-east (on BHS farmland) a few yards to the south of AL/BE3 and a medieval drove road (GGR), runs west-east between the two sites. Further, two Grade II Listed Buildings are sited here, also on BHS land. The Lister building stands a few yards to the west of AL/BE3 and Cleveland Farm house (the farmyard of which BHS is trying to develop separately and simultaneously as if a minor planning project) lies a few yards to the south. Instead of mentioning these facts, AL/BE3&4 reads (5.456 and 5.468) “Kent County Council states that the site includes significant archaeology, which could be dealt with through suitable conditions on a planning approval.” The imbalance in the treatment of the two sites is substantial and suggests confirmatory bias or prejudice.

(ii) The SHELAA assessment of site 158 suggests a potential yield of 50-65 houses, but then concludes that only the Uphill part of the site is suitable (20 houses). It states that “the remainder of the site is sensitive in landscaping terms and there is concern regarding scale and impact on the character of the landscape and settlement pattern”. This is contrary to the views of TW’s 2006 SA; to the TW 2018 document proposing 174 houses; and to the first draft of the LP. The dismissal of 158 as a suitable site is not supported by the evidence and suggests prejudice.

(iii) Site 222, west of the cross roads, was also considered in 2006, as a possible site for the new village school, though it was not one of the top two sites put to a referendum. The SHELAA suggests 222 has a potential for 76 houses. The site is considered unsuitable partly because the new LBD, if adopted, will exclude all houses west of the cross roads, when the village actually extends a considerable length along this road to the west. There is no mention of the fact that the owners of this site are offering the pond at the south west corner of the crossroads as village green space. The dismissal of 222 is not supported by the evidence and suggests prejudice.

(iv) The SHELAA suggests a capacity of 26 houses at Site LS8 in Iden Green, stating that it lies adjacent to the recreation ground and a children’s nursery and that there is a pavement on both sides of Iden Green’s main road. It fails to mention that the easternmost side of this pavement connects the village to the village primary school. The SHELAA dismisses the site as unsuitable saying that it is located in a remote location relative to services, facilities and public transport, but this site is far less remote than sites AL/BE 3&4. The dismissal of site LS8 is not supported by the evidence and suggests prejudice.

(v) The proposed new LBD has been constructed so as to include the new site at Uphill and to exclude 222, when in fact, the actual built development extends westwards from the crossroads and includes site 222. The LBD is ignored in respect of AL/BE3&4. Manipulation of the LBD to suit allocated sites is inappropriate.

As a general comment, I have found the process unnecessarily difficult to navigate. In fact, from the point of view of the ordinary lay-man, I would term the process ‘hostile’. The interactive on-line site was unmanageable. Question 4a is very badly worded. The PSLP’s prose entirely suited the opacity of the procedure. Here is one example from the SA (page 163) “However, the education objective does not deteriorate when considering cumulative effects as the schools in Tenterden will be a viable option for residents in East End and thus are likely to take the pressure off Benenden Primary School.” What does that mean?

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on site AL/BE 3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE 4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites (such as 158 and 222 in the village centre or LS8 in Iden Green) which lie on bus routes or are within walking distance of the village centre and school.

Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

1. The Sustainability Appraisal (SA) is misleading. Table 58 on page 163 states that all Benenden sites "lack services, facilities and travel options". This belies the fact that AL/BE2 (Feoffee almshouses) is close to the Street as is AL/BE1 (Uphill). Both sites are within walking distance of the bus stop for daily bus services, the post office, village shop, the primary school, the village green, the butchers, pub, community hall, church, recreation ground and children's playground. AL/BE 3 & 4 are three miles northeast of the village with no daily bus service and no amenities whatsoever.
2. The commentary on Table 58, (page 163 of the SA), states that East End sites score badly on Climate Change and Travel, yet these are the sites promoted for most houses.
3. The SA argues on page 163 that East End residents will send their children to schools in Tenterden instead of to the village primary school, and that this will lessen the otherwise seriously negative effects of the two hospital sites. This is pure conjecture and possibly wishful thinking. The school has a good reputation and currently between 70 and 75% of children there come from outside the parish. East End children will have precedence over these, since intake depends on the distance of a child's

residence from the school. Pressure on Benenden Primary School will increase, not decrease. Further, the use of a car, whether it drives to Tenterden (5-6 miles) or to Benenden (3 miles), pollutes and deprives residents of the health-giving pleasure of walking to school. The AL/BE 3&4 are contrary to STR2, to the NPPF and to KCC policy on climate change.

4. Appendix L (pp331-2) shows Scores for Reasonable Sites in Benenden. Here we see scores for 158 and 222, two sites close to the village centre. Of 158, we read "A site that scores several neutrals with some positives, let down by its land use and landscape score impacted by a loss of a greenfield site in the AONB and lack of services and facilities including public transport at the settlement." This SA report compares poorly with the SA TWBC carried on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situating adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there.

5. In April 2018, BNP Steering Committee Deputy Chair, a borough councillor, showed the committee a piece of paper from TWBC saying that TWBC wishes to build 174 houses on site 158. He committed himself to seeing these numbers reduced and the numbers at the East End raised. After a meeting between representatives from the BNP group and TW planners on June 19th, 2018, the minutes reported that "At times the workshop was emotive ..." Following that meeting TW planners put site 158 on temporary hold, limiting development there to a future Local Plan by asking, in the first draft of the LP on page 270, that the Uphill site on New Pond Road, adjacent to 158 and allocated at that time as AL/BE3, should, under Clause 8, provide for vehicular access through Uphill to the site behind (158) "which may be allocated for development as part of a future Local Plan." In the PSLP, this wording for Clause 8 has disappeared. Where is the evidence-base for such wording to be included in the first draft and excluded in the second? Why is the site considered suitable in 2006, in 2018, and in the first draft, but not suitable in the PSLP?

6. Site 222, like 158 is described in Appendix L of the PSLP's SA as suffering from "a lack of services and facilities including public transport at the settlement." This is inaccurate. There is a daily bus service along Benenden Street and site 222 is within easy walking distance of the bus stop, shops, pub, community hall, primary school and all other amenities.

7. Site LS8, in the heart of Iden Green is, along with site 158 and 222, a site which on-the-ground evidence suggests is eminently suitable for development, but which the SA fails to allocate. Appendix L of the SA gives LS8 virtually the same scores as Uphill (LS16 of AL/BE1) yet the latter is included for development and the former is not. The commentary states of LS8 "A number of scores are negative however, reflecting the remote location of the site from services and facilities and public transport. It scores negatively in heritage terms as the site is a relatively sizeable piece of the Iden Green Conservation Area." This site is far less remote than sites AL/BE 3 & 4. It is one mile from the village and connected to it by a paved footpath running past a Roadside Conservation Area and then (still paved) through a field to the church and primary school. It is on a bus route and the bus stop is next to LS8. Iden Green has a community hall, tennis courts, a children's playground and pub/restaurant. The SA information is unreliable and the PSLP's use of it for site allocation is unwise.

8. In so far as Benenden is concerned, the sites were allocated before any sustainability appraisal was commissioned. It is not therefore relevant factor in the allocation of sites for housing.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_294
Response Date	22/05/21 08:40
Consultation Point	Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.8
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End	
Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End	
Inset Map 18	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

Looking at the issue in terms of its hectareage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectareage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be

superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments".

For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures see web link.

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called "Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment prior to the allocations being adopted."

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.

fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.

that the site is on an east-west ridge giving it a dominant position in relation to the AONB;

the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;

the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);

that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the

section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).

- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
- . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
- . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response,

13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

(see web link)

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned,

especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at see web link and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF" (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the

rest. Further, we now know from

([https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden Healthcare/ Savills for The Benenden Healthcare Society_full representation.pdf](https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf)),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it's appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground,

children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_299
Response Date	22/05/21 08:40
Consultation Point	Policy AL/BE 4 Land at Benenden Hospital (north of Goddards Green Road), East End (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy AL/BE 3 Land at Benenden Hospital (south of Goddards Green Road), East End	
Policy AL/BE4 Land at Benenden Hospital (north of Goddards Green Road), East End	
Inset Map 18	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No

Is sound No

Complies with the Duty to Cooperate No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

This representation relates to the Pre-submission Local Plan(PSLP) and its handling of the parish of Benenden

1. The plan is unsound because of inadequacies in the consultation process.

(i) Poor consultation between TWBC and other Borough Councils

A Statement of Common Ground (SoCG) between Maidstone and Tunbridge Wells Borough Councils (TWBC) is published, but nothing is apparently published in relation to Ashford Borough Council or Tonbridge and Malling Borough Council.

(ii) Poor consultation between TWBC, the parish of Benenden and the Benenden Healthcare Society (BHS), the single landowner of those sites in the East End of Benenden where most of Benenden's houses are allocated.

(iii) There is no Statement of Common Ground between TWBC and the Benenden Neighbourhood Plan (BNP) although a SoCG was listed as a supporting document to the BNP Reg 14. This is significant *because the two plans, though identical in their choice of sites, show different areas within those sites for development at the East End, and both plans differ from the view of BHS.* BHS's position is presented to the public through its comments on the first draft of the Local Plan (TWFDLP Comments) (see see web link

Looking at the issue in terms of its hectarage:

- . according to the PSLP the northern site (AL/BE4) is 3.72 ha and the South East Quadrant (SEQ or AL/BE3) is 3.07 ha;
- . according to the Benenden Neighbourhood Plan (BNP), the northern site (called LS41 in the BNP, see para 2.9.4.2.) is 1.9 ha and SEQ (called 424 plus LS40b, see para 2.9.3.2) is 4.24 ha.
- . according to BHS, the northern site is 3.7 ha and the southern site is 4.2 ha (see TWFDLP comments), Savills for BHS: DLP_4956)

The hectarage varies largely according to whether Local Wildlife Sites (LWS) are included in the development area. There are four LWS at the hospital. One of these lies in the northern area (AL/BE4) and two lie in the southern area (AL/BE3). The fourth is in an area not up for development.

- . For AL/BE3, the PSLP excludes the second and the most southerly of its two Local Wildlife Sites (LWS), while the BNP *includes* both LWS. *Currently, Strutt and Parker are advertising to developers the larger, BNP version of the site for sale, together with Cleveland Farm.* The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be

superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE3 is incorrect.

- . For AL/BE4, the PSLP *includes* all the LWS at the site, while the BNP includes only a small southerly section of it. The PSLP states that in the event of the BNP passing a referendum, its own plans for Benenden will be superseded by the BNP (see para 5.421). Which means the plan presented in the PSLP for AL/BE4 is incorrect.
- . For AL/BE4, Savills' comments on behalf of the BHS (see TWFDLP comments), propose 43 dwellings for the site, which will include the LWS (see TWFDLP Comments, item DLP_4956 para 3.6), "Unlike the BNP, the TWLP is broader in the site area by providing a boundary encompassing the entire hospital site, yet aside from the discrepancy addressed previously in this representation the two allocations align in terms of proposed numbers. The Society intends to bring forward the development on the two sites identified through the BNP and *within the boundary identified in the TWLP*. The Society welcomes the consistent approach to unit numbers, and the allocation of both parcels of land through the draft BNP and the TWLP."

In terms of boundaries:

- . BHS understands (see DLP_4956, para 2.8 in TWFDLP Comments) "The North East Quadrant occupies the North East of the site, bordered to the North and East by Mockbeggar Lane, to the south by Goddards Green Lane / Benenden Road and the West by existing hospital buildings." *In other words, it includes the entire LWS in its area.*
- . To the south, BHS understands (see DLP_4956, para 2.9 in TWFDLP comments), "The South East Quadrant occupies the South East of the site, bordered to the north by Goddards Green Lane / Benenden Road, to the West by Green Lane and to the South and East by agricultural land and the High Weald AONB boundary." *In other words, it includes the whole of the more southerly of the two LWS at the site.*

This means that PSLP's AL/BE3 is inaccurate because the larger BNP plan will likely prevail, while the PSLP's AL/BE4 could be challenged by the BNP (if successful in a referendum) (see PSLP para 5.421) and substantially reduced in size. The PSLP's plans for the two hospital plans are therefore both potentially inaccurate.

A failure to coordinate and effectively consult has produced unsound documents.

(iv) Poor consultation with stakeholders, the local community and the neighbouring parish (possibly even more affected by the plans than Benenden). These parties have either not been consulted, or consulted after the fact or consulted but not engaged with.

- . **The Friends of the East End (FEE)** are more affected by the plans than most in the parish but they were not consulted over the development of the BNP on which the PSLP is based. The FEE are mainly residents of the East End which covers about one third of the parish and is a wholly rural location of 76 scattered households. Because it is isolated, it was chosen as the site for an isolation hospital. This now makes up a small enclave close to the border with the neighbouring parish of Biddenden.
 - . The BNP Steering Committee is the only one in the borough to have made its own site allocations and these allocations were published in an Informal Draft Plan in February 2019, before consultations with the High Weald -AONB and before inviting AECOM to produce a Strategic Environmental Assessment (SEA). (N.B. Even when the HW-AONB were invited to assess sites, they were NOT asked to assess the hospital sites).
 - . The FEE object strongly to the proposal to site almost all the new housing in the East End, but the BNP Steering Committee never asked to meet the FEE nor engaged with them (See EN1 para 9 requiring the effective engagement of the local community, neighbours of sites and others).
 - . The FEE submitted three petitions, two to the BNP and one in relation to the LP. A FEE submission with 127 signatures was submitted on April 4th 2019 in response the IDP (published on February 23, 2019), in which the allocations, later adopted by the PSLP were first set out. A second FEE submission with 164 signatures was submitted in October 2019 objecting to the TWFDLP, and in the same month, a third FEE submission with 167 signatures was submitted in relation to the Reg 16 draft BNP. Instead of acknowledging the strength of these views and the number of people who held them, the chair of the BNP Steering Group, who wrote a regular column in the Parish Magazine about the BNP process, wrote in January 2020, that only "31 residents from the East End" had sent in "comments".

For the strength of today's opposition to the BNP, see the FEE's current online petition with over 450 signatures <https://www.change.org/EastEndFriends> .

Instead of being consulted, the FEE were ignored and belittled. They were informed on 11th March 2019 by the editor of the Parish Magazine (PM), husband of the Chair of the Parish Council, that "I'm of the view that much of the uncertainty has passed since the presentation of the plan to the village - to a highly favourable reception. At least we no longer have to give polite credence to *uninformed views* that fly in the face of TWBC policy and advocate direct and *pointless confrontation* with TWBC, thereby running the risk of having the entire BNDP thrown back in our faces. *The ensuing chaos hardly bears thinking about.* At least it seems the opinions now being afforded most weight are those of *people who have worked hard for two years to understand the issues* and come up with a coherent way forward."

Consultation also failed in relation to the neighbouring **parish of Biddenden**. The Clerk of Biddenden Council has repeatedly responded to Benenden Parish Council in the course of the BNP consultation process, but received only acknowledgments. A Kent County Councillor and Ashford Borough Councillor wrote an article about BNP's mismanagement of consultations with the parish of Biddenden in the Biddenden Parish Magazine, February 2021.

2. The plan is unsound because of the untimely publication of site allocations

Pre-Submission Local Plan, para 5.420 reads "The BNP was submitted to TWBC in October 2020 and was consulted on between 30 October and 11 December 2020." But the allocations had already been made and published by the BNP in February 2019 in its so called "Informal Draft Plan". The 2019 February allocations are virtually identical to the PSLP 2021 allocations. Para 5.420 states "The BNP proposes to include site "allocation policies that follow the approach of the site allocation policies for Benenden in this Local Plan." How can the BNP follow the PSLP's approach when its sites were already allocated? Because the PSLP is founded on site allocations made by the BNP, the unsoundness of the latter carries over and produces unsoundness in the former.

The LP is based on the BNP and BNP allocations were made before **consultations with stakeholders**. This is not consulting in a timely fashion. For example, the PSLP requires archaeological surveys of the hospital sites *after* the designation of the sites for development. Historic England (HE) asks for the surveys to be carried out *before* allocation (see TWFDLP Comments DLP_4556 - "we would expect the allocation of sites following on from this Strategy policy (STR1) to be subject to appropriately robust and detailed heritage impact assessment *prior to the allocations being adopted.*"

3. The plan is unsound because the evidence on which it is based is inaccurate or irrelevant

Supporting Documents

AONB Setting Analysis report: Main Report and AONB Study Plans and Photographs Benenden Hospital/Hankinson Duckett Associates. November 2020.

See para 4.4.2, the description of the hospital site is for the *entire built up-hospital area*, minus the southerly LWS in the SEQ. It is therefore a *report on an area not submitted in the PSLP*. As a result, it draws its conclusions from areas not included in the PSLP. The conclusions are therefore unsound.

The report:

- is concerned with adding 66-72 additional dwellings in addition to the 18 already extant on the northern site and presumably in addition to the 24 for which planning permission has been granted. That is between 108 and 114 new houses. The PSLP is talking about planning 43 houses for the northern site and 49 for the south. A total of 92 new houses. The report muddies the waters, leaving no clarity.
- fails to note items of critical importance in any attempt to evaluate the landscape and historic importance of the site e.g.
- that the site is on an east-west ridge giving it a dominant position in relation to the AONB;
- the east-west Roman Road running over Benenden Healthcare Society (BHS) land a few yards to the south of the site, and the medieval drove road (Goddards Green Road - GGR) which divides the northern site from the southern one;
- the National Monument Register which lists a Bronze Age palstaff (SMR Number/Hob UID) found at the hospital site, (though, oddly, the report does note Scheduled Monuments in the village);
- that the SEQ development proposes two entrances on to Green Lane and two on to GGR, see Transport Planning Associates (tpa)- October 2019 Scoping note for BHS, 1907-038 under the

- section headed 'Access', para 4.4 "The consented vehicle access arrangements will be retained. Therefore, vehicle access to the Site will be taken from two access points along Goddards Green Road and two on Green Lane." (This and other documents were revealed to the FEE in May 2021 as a result of the BNP Independent Examiner's queries. In spite of the Examiner's request that all such material be published on-line, this document and the KCC Highways 13 Nov 2019 "Pre-App Response" have been not been published). Such entrances will seriously impact the AONB. Both Goddards Green and Green Lane are designated Rural Lanes, and, of the two, Green Lane is mentioned as a particularly high scoring lane (for its beauty and tranquillity) in *TWBC's Rural Lanes: Supplementary Planning Guidance*. Creating a series of broad entrances large enough so that an "11.4 m refuse vehicle can enter and leave the site in forward gear (see KCC Pre-App Response 13-11-19, a document revealed to the FEE as a result of the BNP Examiner's queries but not made public) would have a substantial effect on the AONB. Hankinson Duckett Associates ignore the issue (see Section 4 on Benenden in the main report and photos B1 and B2 in *Supporting Plans and Photographs , Benenden*).
- . offers photos (B5 & B6) which are irrelevant to the site in question. These photos look south towards an area not up for development, and are taken from a point also not up for development. These omissions undermine the report's conclusion.
 - . ***Inset Map 18 (Benenden Hospital)***, unlike other maps attached as supporting documents to the PSLP, Inset Map 18 makes no reference to the AONB boundary. This is a significant omission because both the PSLP and the BNP claim that the hospital is outside the AONB and on this basis, largely justify placing most of Benenden's housing in the East End. Because AL/BE3&4 lie on a high ridge to the north of the parish and because the AONB boundary wraps tightly round the site which bulges, like a balloon, into the AONB, development at the East End significantly affects the AONB. While TWBC acknowledges this by requesting the Hankinson Duckett Report, by publishing Inset Map 18, which omits the AONB boundary, TWBC loses a critical opportunity to show the true relevance of AL/BE 3&4 to the AONB. It could even be said that by leaving out the boundary, there is an implication that the hospital sites are genuinely 'outside' the protected area.
 - . ***Previous Stages, Draft Local Plan, Benenden Overview***, p263, provides a basis for the PSLP but contains inaccuracies.
 - . There is no "pre-school/nursery" as stated in the Overview
 - . There is no "Small shop at hospital" as stated in the Overview
 - . The statement that there are tennis courts and a café at the site is misleading. In TWFDLP Comments, Savills requests (see DLP_4956 para 3.14) that "the requirement to incorporate the tennis courts and retain the sports pavilion is removed". As for the café, BHS states in its comments on the LP that the café is for hospital use only - "the existing hospital buildings ... have only been designed for hospital use". See TWFDLP detailed additional submissions from Savills "*Representation to the TWBC Draft Local Plan Regulation 18*" 2- Sept- 1Nov 2019 para 3.18 and 3.19)

4. Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the **Sustainability Appraisal**, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response,

13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)."

Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS *"includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network."* Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the rest. Further, we now know from

see web link

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that "The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area."

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. "In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement." Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC's 2006 SA on 158 decided (see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report), that 158 was one of two top sites. "Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158's owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that its appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned,

especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Many of the PSLP’s problems are associated with failure in the duty to co-operate and can therefore not be remedied.

Many are due to poor evidence or poor interpretation of evidence. This too cannot be remedied.

In summary, development on site AL/BE3 should be limited to the existing, so far unused, planning permission for 24 houses, preferably by adapting the Garland Wing, which is a building of historic value, either to a wellness centre, in accordance with its original intention, or to a row of up to 10 terraced houses. Site AL/BE4 already has 18 semi-detached houses on it, and cannot support any more. It should therefore be excluded. Housing should be allocated to sites such as 158 and 222 in the village centre, or to LS8 in Iden Green. These sites all lie within walking distance of shops, other amenities and the primary school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to present my case and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Sustainability Appraisal

As far as the East End of Benenden is concerned, the plan is unsound because the Sustainability Appraisal, which is the heart of the planning process, provides evidence that is often incorrect, sometimes inadequate, but always untimely because the evidence on which site allocation should depend, follows, instead of precedes, site allocation. This was first published February 2019 in the BNP's Informal Draft Plan. The allocations then made are identical (save for a few additional houses) to those now made in the PSLP. Site allocation cannot be supported in retrospect.

An examination of SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 shows faults in the SA's evidence base.

Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF" (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena).

Biodiversity: AL/BE3 is considered to be less at risk in terms of biodiversity than AL/BE4 though AL/BE 3 has two Local Wildlife Sites (LWS) while AL/BE 4 has only one. Where is the evidence to support the idea that the one is less important for biodiversity than the other?

The SA's scoring is not supported by evidence in a letter from Keith Nicholson of the Kent Wildlife Trust, former Planning and Conservation officer for the Kent Wildlife Trust (KWT), dated 4 March 2013, to TWBC Development Control Officer, Ellen Gilbert in which he states, "The 2012 survey has demonstrated that Benenden hospital LWS is more valuable than previously believed. The applicant's consultant is now more firmly of the belief that the Site would fulfil the criteria for it to be considered a Site of Special Scientific Interest (paragraph 4.3.6.). The waxcap community is of national importance when judged against both the Reid classification (para 4.3.4.) and the JNCC Guidelines (para 4.3.5.)." Nor is it supported by the view of the HW-AONB as stated in TWFDLP Comments (see DLP_3458) that the hospital LWS "includes rare and vulnerable acid grassland which should form a core area for unimproved grassland as part of a High Weald nature recovery network." Neither the KWT nor the HW-AONB offer any indication that one or other of the LWS at the hospital is of less value than the

rest. Further, we now know from
(https://ws.tunbridgewells.gov.uk/files/consulteessupportingdocuments/Benenden%20Healthcare/Savills%20for%20The%20Benenden%20Healthcare%20Society_full%20representation.pdf),

Regulation 18 Representation made by Benenden Healthcare Society, November 2019, that BHS intends to abolish one of the two LWS in AL/BE3, see para 3.21. that “The Society supports the requirement for long-term management of the core areas of the LWS associated with the hospital land. This includes all but the modest area within the SEQ adjoining Peek Lodge which is too constraining on the South East Quadrant redevelopment proposals. Accordingly, the soils in the area will be translocated to a nearby receptor site to try to ensure that the rare fungi can continue to thrive in this local area.”

In other words, far from supporting biodiversity, the BHS plan is to reduce it in AL/BE3 and the same is true of AL/BE4 see (in the same document) para 3.17. “In addition, as highlighted in paragraph 3.13 above, the Society do not intend to use the area in which the garage block is located as an extension to the Local Wildlife Site (LWS) or for additional sports provision. As such, the Society request that the requirement to specifically use the land occupied by the existing garage block and manage it in the long term for the benefit of the LWS and / or sports provision is removed from the policy requirement.” Given this, biodiversity scoring in Table 58 of sites AL/BE3&4 is substantially overrated. Biodiversity at both sites is under threat.

Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, on the other hand, will have no access to local businesses except by car.

Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with the SA which TWBC carried out on site 158 in 2006. 158 is parallel to and just north of the Street with its exit onto New Pond Road. In 2006 site 158 was chosen in a village referendum as the site for a new C of E primary school. It was the preferred site out of a choice of two, both of which were greenfield. TWBC’s 2006 SA on 158 decided (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report), that 158 was one of two top sites. “Situated adjacent to an area of ancient woodland, the site provides the potential for habitat linkages and wildlife corridors. The site is not adjacent to the CA [Conservation Area] and does not form a significant role in its setting. There are no Listed Buildings on or adjacent to the site. The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. In spite of the referendum result, the school was eventually built at the less preferred site and, since then, TWBC had been in consultation with 158’s owners to build houses there. If, in 2006, the SA offered site 158 as one of two top sites in the village for building the new primary school, where is the evidence that it’s appropriateness has somehow massively declined since then? Where is the evidence site 158 is less favourable to education than all the other sites mentioned, especially given that the hospital sites, so favoured for development, are three miles distant from the village school?

Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at the school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village?

Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website.

Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus

service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332) while the sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. LS8 is also described as being remote, but it is only one mile from the village and connected to it by a paved footpath. It is close to a bus stop, a playground, tennis courts and a community hall and it is within walking distance of a pub/restaurant. How can its Services and Facilities be offered the same score as AL/BE3&4? These assessments are not understandable except if the sites were chosen before the SA (as is the case) and the SA had to be manipulated to support those original choices.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

<input type="checkbox"/>	Yes, I wish to be notified of future stages of the Local Plan
--------------------------	---

Comment

Consultee	Ms Hazel Strouts [REDACTED]
Email Address	[REDACTED]
Address	
Event Name	Pre-Submission Local Plan
Comment by	Ms Hazel Strouts [REDACTED]
Comment ID	PSLP_1113
Response Date	02/06/21 21:29
Consultation Point	Policy PSTR/BE 1 The Strategy for Benenden parish (View)
Status	Processed
Submission Type	Email
Version	0.3
Data inputter to enter their initials here	AT
Question 1	
Respondent's Name and/or Organisation	Hazel Strouts
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
Policy PSTR/BE 1 The Strategy for Benenden parish	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Benenden & Iden Green

- 1 These representations are concerned with the policies in the draft Tunbridge Wells Local Plan (TWBC PSLP) affecting the parish of Benenden, where, contrary to PSTr1 (providing for the growth of existing settlements), contrary to PSTr5 (concern for infrastructure), PSTr6 (concern for the development of accessible locations), and PSTr7 (climate change and reducing the need to travel), almost all development is focused on the unsustainable, rural East End and any new housing in the hamlet of Iden Green is excluded. This also contravenes the NPPF (see PSLP para 1.23) which states that the NPPF operates with a presumption in favour of sustainable development.
- 1 The *Limits to Built Development (LBD) Topic Paper Boundary Review for Reg 18 Consultation under Previous Stages*, para 2.1, states that the object is "to ensure that Limits to Built Development are logical and reflect what is on the ground". The same document proposes that, for Iden Green, the LBD boundary "be removed as it is considered to be an unsustainable settlement for further development with a small number of facilities and services and limited bus services." (see also LBD Topic Paper to PSLP page 49).
- 1 It is illogical to remove the LBD boundary from the only hamlet in the parish, a hamlet with a far better connectivity to the village of Benenden than the land at the East End, where the plan proposes to site most houses. If Iden Green is unsustainable and therefore cannot support more houses, how can the East End, which is void of all amenities, be considered suitable? Iden Green is the only hamlet within the parish, see Benenden Parish Council website which states that the Parish Council serves the people of Benenden and Iden Green. It does not mention the East End. The East End is a rural area with no settlement. It was chosen, for this reason, as the site for an isolation hospital which forms a small enclave within the East End area.
- 1 The PSLP states that the focus is to be on new development within LBDs and to limit development in the countryside. (Vision Objective 1 "Important local services, infrastructure and amenities will be retained and where necessary, improved in line with community needs. Development should help achieve the Council's goal of carbon neutrality for the borough by 2030.") But this strategy is not supported by Policies AL/BE3&4 (both sites are outside the LBD and 3 miles distant from any settlement) nor by the proposal to remove the LBD around Iden Green, an existing and functioning sustainable hamlet (see Draft LP Reg 18, Draft Policies and Maps, Inset Map 18 for Iden Green, Inset Map 16 for Benenden and Inset Map 17 for the East End - N.B. The numbers of the maps change during the course of the development of the supporting documents).
- 1 The Inset Maps are unreliable and sometimes incorrect - see Draft LP Reg 18, Draft Policies and Maps, Inset Map 17 for the East End of Benenden which shows an area for development which does not reflect the area proposed for development elsewhere in the PSLP i.e AL/BE 3&4. Plans are also sometimes incorrect, see those for AL/BE 3 and AL/BE 4. Neither of these match the

BNP plans for those sites, although the BNP plans will override the PSLP in the event of the BNP being successful in a referendum (see para 5.420 and 5.421).

- 1 As currently drafted, the identified policies and maps are unsound and cannot be adopted. They are unjustified, ineffective and inconsistent with national policy.

Policy PTSR/BE1 – Limits to Built Development (LBD)

- 1 Policy PTSR/BE1 of the Local Plan seeks to define the strategy for Benenden parish. Paragraph 1 of Policy PTSR/BE1 states that:

The development strategy for Benenden parish is to:

- 1 *Set Limits to Built Development for Benenden village, as defined on the Policies Map (Inset Map 17) as a framework for new development over the plan period;*
- 1 The proposed LBD for Benenden are shown on Inset Map 17. Notably, the majority of development proposed for Benenden is actually outside of the LBD for Benenden and is in fact directed towards Benenden Hospital (Inset Map 18, Policies AL/BE3 and AL/BE4 of the Local Plan).
- 2 The Pre-Submission Local Plan (PSLP) proposes to remove the LBD established in the 2006 TWBC LP (see the Benenden Neighbourhood Plan (BNP) Reg 15/16, pp12-15. See Figure 2 for Iden Green). Under Figure 2, site LS8 is immediately next to Iden Green's Recreation Ground and both are immediately next to the LBD which skirts the eastern boundary of LS8. Both are within the Conservation Area (PSLP Iden Green Map 18).
- 1 No development is proposed for Iden Green though two sites, including LS8, are mentioned in the PSLP, but both are dismissed as being unsustainable. Iden Green is more sustainable than the East End, a site for almost all the housing proposed for the parish and outside the LBD. By removing Iden Green's LBD, the proposal is to freeze the only hamlet in the parish in a state of non-development. This is unsound.
- 1 The purpose of LBDs is to act as settlement boundaries, the effect of which is that development is focussed within LBDs. Policy STR1(2), (9) of the Local Plan states that:

"The broad development strategy for Tunbridge Wells borough over the period 2020-2038, as shown indicatively on the Key Diagram (Figure 5), is to ensure that a minimum of 12,204 dwellings and 14 hectares of employment (Use Classes B and E) land are developed, together with supporting infrastructure and services.

To achieve this, the Local Plan:

(i) Looks to focus new development within the Limits to Built Development of settlements, as defined on the Policies Map, where proposals accord with other relevant policies of this Plan;

[...]

(ii) Normally limits development in the countryside (being defined as that outside the Limits to Built Development) to that which accords with specific policies of this Plan and/or that for which a rural location is fully demonstrated to be necessary

- 1 This accords with the stated strategy for Benenden in the Local Plan. Paragraph 5.416 of the Local Plan states that:

"The LBD around Benenden village sets the extent of existing and planned development, and provides for any potential future windfall development. Any windfall sites that do come forward for residential development over the plan period should provide affordable housing in accordance with the relevant Local Plan policy in Section 6, having regard to information on local housing needs"

- 1 Accordingly, LBDs play a fundamental role in the Local Plan. They define areas to which development is directed (STR1; paragraph 5.416) and define areas beyond the LBD as countryside. As a result of this, development proposals outside of the LBDs will be significantly harder to obtain permission for and Iden Green is destined to be frozen in time, with no credible explanation for granting it exclusion from Policy STR1.
- 1 In our view the LBD currently proposed for Benenden and the removal of the LBD from Iden Green as proposed in the BNDP (which if passed in a referendum before the PSLP will prevail) fails to accord with the Local Plan. Around Benenden, the proposed LBD unjustifiably excludes built development to the west of the New Pond Road crossroads towards Benenden School, bordering the B2086. It also excludes Iden Green in its entirety. The purported basis for the exclusion of Iden Green is that this settlement has *"limited key facilities and bus service making them unsustainable in this context."* This is plainly untrue.
- 1 Furthermore, the LBD is tightly drawn around Benenden itself. This avoids any prospect of in-filling in these areas and has in turn informed the site-selection process for Policies AL/BE1 & AL/BE2.

- 1 It is our case that upon analysis the LBD as currently drawn for Benenden and its removal from Iden Green has resulted in sustainable, appropriate sites for development being excluded from Benenden and Iden Green. It has pushed development to unsustainable, isolated areas (AL/BE3 and AL/BE4). This is addressed in the submissions below on the sustainability of AL/BE3 and AL/BE4 but, in our view, the only conclusion that can be drawn is that the LBD for Benenden is unsound, undermines the Local Plan and should not be adopted.

The Sustainability Appraisal (SA)

- 1 The **Sustainability Appraisal** is the heart of the planning process, but the TWBC's SA provides evidence that is often incorrect, sometimes inadequate, but always untimely because site allocation for the parish of Benenden (the only parish in the borough for which the Neighbourhood Plan Steering Committee allocated its own sites) was first published in February 2019 in the BNP's Informal Draft Plan. This was prior to the BNP Steering Committee inviting AECOM to submit its Strategic Environmental Assessment (SEA). In other words, the process was done the wrong way round. The cart came before the horse.
- 1 Since that time (February 2019), there have been many meetings between the BNP Steering Committee and TWBC planners with the result that the PSLP allocations are identical (save for a few additional houses in the East End) to those made in the BNP's February 2019 Informal Draft Plan. Just as the SEA appears to have been interpreted selectively in order to provide the justifications required to fit site allocations made beforehand, so the SA appears to have been manipulated to make it fit the PSLP's site allocations.
- 1 **SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 which includes Site LS 8, show faults in the SA's evidence base.**
- 1 **Climate Change:** AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF" (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena). LS8, by contrast, is within walking distance of the village centre, of the church and of the village primary school.
- 1 Policies AL/BE 3&4 are contrary to the PSLP's plans for a post-Covid world (see para 2.41 and 2.42, page 28). The PSLP states that there will be pressure on "rural shops and services in village and other local centres, which provide an important supporting role at the heart of communities" and plans to counter such pressures. In Iden Green this process of decline was already underway in the pre-Covid world. Until recently, there were two pubs, a village shop and a post office in the hamlet. Now there is only one village pub and restaurant. Benenden village shop has only survived thanks to its transformation into a co-operative run by the village itself. By excluding Iden Green from development and forcing development out to the East End, the PSLP contributes to, rather than alleviates, the difficulties outlined in 2.42. It contributes to, rather than alleviates, climate change.
- 1 **Business Growth:** AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, will only be able to access commercial operations, whether in the village or anywhere else, by car, but residents of Iden Green are not car dependent. The hamlet is connected to the village by a paved footpath running along the Street, past a designated Roadside Nature Reserve and the up through Hilly Fields to the top of the village green (close to the church and the primary school). Iden Green residents play a significant role not just in the commercial life of the village but in maintaining its social life (the Women's Institute for the Parish is, for example, actually known as the Iden Green and Benenden Village Institute. It was started in Iden Green). In spite of these links, LS8 is scored in the SA as being less favourable to business growth than AL/BE 3&4.
- 1 **Education:** All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with TWBC's 2006 SA on site 158 which concluded that the site was **one of the two best sites in the village for the new village primary school**

(see page 18 of the *Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options* report). At that time, that SA stated that “The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site.” On page 38, we read, “This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels”. The site was chosen by the village in a referendum as the preferred site, but, nevertheless, the school was built at the other site. Since then, TWBC had been in consultation with 158’s owners to build houses there. Where is the evidence site 158 is now less favourable to education than it was in 2006 and that it is today, less favourable than all the other sites mentioned?

- 1 LS8 meanwhile, is within walking distance of the new village school and the path thither leads through a Roadside Nature Reserve and grassy fields. It is a pleasant, healthy, rural walk. There is however, no such existing paved pedestrian link between the hospital sites and the school. In spite of this, the SA scores LS 8 and the hospital sites identically.
- 1 Table 58 states that “the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End.” Children from the East End will have priority over the between 70 and 75% of the existing pupils at Benenden primary school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village? This argument is based on conjecture and is unsound.
- 1 **Heritage:** AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval driveway (GGR), which runs through the site and along the ridge; and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website. The omission suggests a ‘confirmatory bias’ - evidence is selected or ignored with a view to achieving a pre-conceived result.
- 1 **Services and Facilities:** How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children’s playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332). The conclusion beggars belief. At the same time, those sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. The same bias is shown in the SA’s description of LS8 as a “remote location ... (far) ..from services and facilities and public transport” yet it is one mile from the village and connected to it by a paved footpath. Further, it lies on a bus route, has a nursery school, church, playground, recreation ground, tennis courts, a community hall and a pub/restaurant. How can Services and Facilities in LS8 score the same as in AL/BE3&4? How can AL/BE 1&2 score the same as AL/BE 3&4? Such assessments raise questions rather than answering them.
- 1 AL/BE 3&4 were also found to be “remote” and “isolated” and therefore the unsustainable in the 2012 application for 24 houses on AL/BE3. No infrastructure has been introduced since then. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location. Iden Green however, has the infrastructure required under STR3 (green, grey and blue), yet it is excluded not only from development under the PSLP but, by the removal of the LBD, from all future development.
- 1 For these reasons, the omission of site LS8 and the inclusion of Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The modifications needed are included in the submissions set out above. In summary, development on sites AL/BE 3& 4 should be limited to the existing, so far unused, planning permission for 24 houses. Housing should be allocated to sites (such as LS8, 158 and 222 in the village centre and Iden Green) which lie on bus routes and are within walking distance of the village centre and school. Paragraphs 5.421 and 5.422 should be omitted.

Question 7

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Question 7a

***Please note** the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.*

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

In order to put over my case, and to answer those with vested interests who may seek to put forward arguments against it.

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

The Sustainability Appraisal (SA)

10. The Sustainability Appraisal is the heart of the planning process, but the TWBC's SA provides evidence that is often incorrect, sometimes inadequate, but always untimely because site allocation for the parish of Benenden (the only parish in the borough for which the Neighbourhood Plan Steering Committee allocated its own sites) was first published in February 2019 in the BNP's Informal Draft Plan. This was prior to the BNP Steering Committee inviting AECOM to submit its Strategic Environmental Assessment (SEA). In other words, the process was done the wrong way round. The cart came before the horse.

11. Since that time (February 2019), there have been many meetings between the BNP Steering Committee and TWBC planners with the result that the PSLP allocations are identical (save for a few additional houses in the East End) to those made in the BNP's February 2019 Informal Draft Plan. Just as the SEA appears to have been interpreted selectively in order to provide the justifications required to fit site allocations made beforehand, so the SA appears to have been manipulated to make it fit the PSLP's site allocations.

12. SA Table 58 pp 161-163 Sites AL/BE 3&4 and Appendix L pp 331-332 which includes Site LS 8, show faults in the SA's evidence base.

13. Climate Change: AL/BE3&4 are not scored for climate change, nor are sites 158 & 222, yet, inexplicably, climate change is scored for AL/BE1&2 (Uphill and Feoffee) and for LS8. Where is the explanation for the failure to assess all sites, especially when sites 158, 222, AL/BE1&2 are all close to each other? The issue is particularly concerning in that sites AL/BE3&4 are both 3 miles distant from the village and without any amenities. Residents at these sites will be heavily car dependent and this was of concern even when only 24 houses were proposed for the site. "You will see from KCC's comments on the hybrid application (12/03130) that in consideration of this earlier application for 24 dwellings, the highways authority raised concern that all residents will be very heavily car dependent, which is contrary to a number of policy objectives, including the NPPF." (see KCC Pre-App Response, 13 Nov 2019, revealed in response to the BNP's Independent Examiner's queries and still not in the public arena). LS8, by contrast, is within walking distance of the village centre, of the church and of the village primary school.

14. Policies AL/BE 3&4 are contrary to the PSLP's plans for a post-Covid world (see para 2.41 and 2.42, page 28). The PSLP states that there will be pressure on "rural shops and services in village and other local centres, which provide an important supporting role at the heart of communities" and plans to counter such pressures. In Iden Green this process of decline was already underway in the pre-Covid world. Until recently, there were two pubs, a village shop and a post office in the hamlet. Now there is only one village pub and restaurant. Benenden village shop has only survived thanks to its transformation into a co-operative run by the village itself. By excluding Iden Green from development and forcing development out to the East End, the PSLP contributes to, rather than alleviates, the difficulties outlined in 2.42. It contributes to, rather than alleviates, climate change.

15. Business Growth: AL/BE3&4 are scored as if they were more favourable to business growth than AL/BE1&2 and sites 158 and 222, but all four of these last-mentioned sites are in the heart of the village where residents will have ready access to local businesses as well as to daily bus services and other services and facilities. Residents at the East End, will only be able to access commercial operations, whether in the village or anywhere else, by car, but residents of Iden Green are not car dependent. The hamlet is connected to the village by a paved footpath running along the Street, past a designated Roadside Nature Reserve and the up through Hilly Fields to the top of the village green (close to the church and the primary school). Iden Green residents play a significant role not just in the commercial life of the village but in maintaining its social life (the Women's Institute for the Parish is, for example, actually known as the Iden Green and Benenden Village Institute. It was started in Iden Green). In spite of these links, LS8 is scored in the SA as being less favourable to business growth than AL/BE 3&4.

16. Education: All sites in this SA are scored equally for education, except for site 158 which scores less well. This SA report compares poorly with TWBC's 2006 SA on site 158 which concluded that the site was one of the two best sites in the village for the new village primary school (see page 18 of the Sustainability Appraisal Benenden Church of England Primary School Land Allocation DPD - Issues and Options report). At that time, that SA stated that "The site is consistent with the surrounding landscape character. There are limited views into the site and no public rights of way over the site." On page 38, we read, "This site is anticipated to have a major beneficial effect on improving educational standards and travel choice/traffic levels". The site was chosen by the village in a referendum as the preferred site, but, nevertheless, the school was built at the other site. Since then, TWBC had been in consultation with 158's owners to build houses there. Where is the evidence site 158 is now less favourable to education than it was in 2006 and that it is today, less favourable than all the other sites mentioned?

17. LS8 meanwhile, is within walking distance of the new village school and the path thither leads through a Roadside Nature Reserve and grassy fields. It is a pleasant, healthy, rural walk. There is however, no such existing paved pedestrian link between the hospital sites and the school. In spite of this, the SA scores LS 8 and the hospital sites identically.

18. Table 58 states that "the education objective does not deteriorate when considering the cumulative effects as the schools in Tenterden will be a viable option for residents in East End." Children from the East End will have priority over the between 70 and 75% of the existing pupils at Benenden primary school who come from outside the parish. On what basis is the assumption made that East End parents will prefer to drive their children 6 miles into Tenterden than drive to the primary school in their own village? This argument is based on conjecture and is unsound.

19. Heritage: AL/BE 3 scores slightly less well in terms of its heritage value than AL/BE4 without supporting evidence. How were heritage issues assessed when there is no apparent knowledge of the historic importance of the site, for example: the PSLP makes no mention of the Roman road a few yards south of AL/BE3; the medieval droveway (GGR), which runs through the site and along the ridge;

and the Bronze Age palstaff found at the hospital site (National Monument Register - SMR Number/Hob UID). How can a site be scored or evaluated without at least some knowledge of the sites historic significance? This is available at <https://www.benendenvillage.org.uk/History/benweb2006.pdf> and advertised on the Benenden village website. The omission suggests a 'confirmatory bias' - evidence is selected or ignored with a view to achieving a pre-conceived result.

20. Services and Facilities: How can sites which are in the heart of the village such as 158 and 222, score the same as sites which are 3 miles distant and isolated in the country? The village has a daily bus service, continuous pavements on both sides of the street, several shops, including a post office, a general store, a butcher and a florist, as well as a pub/restaurant, village green, recreation ground, children's playground, church, memorial hall, village hall and a primary school. In spite of this, sites 158 and 222, both as close to the centre as AL/BE1&2, are described as lacking services and facilities including public transport (Appendix L pp 331-332). The conclusion beggars belief. At the same time, those sites chosen for most houses are 3 miles out of the village where there are no amenities whatsoever. The same bias is shown in the SA's description of LS8 as a "remote location ... (far) ..from services and facilities and public transport" yet it is one mile from the village and connected to it by a paved footpath. Further, it lies on a bus route, has a nursery school, church, playground, recreation ground, tennis courts, a community hall and a pub/restaurant. How can Services and Facilities in LS8 score the same as in AL/BE3&4? How can AL/BE 1&2 score the same as AL/BE 3&4? Such assessments raise questions rather than answering them.

21. AL/BE 3&4 were also found to be "remote" and "isolated" and therefore the unsustainable in the 2012 application for 24 houses on AL/BE3. No infrastructure has been introduced since then. The only change is the extant permission for the development of 24 homes which further stresses the sustainability and connectivity of the Site. On this basis, there is no policy support for the allocation of development to this location. Iden Green however, has the infrastructure required under STR3 (green, grey and blue), yet it is excluded not only from development under the PSLP but, by the removal of the LBD, from all future development.

22. For these reasons, the omission of site LS8 and the inclusion of Policies AL/BE3 and AL/BE4 are unjustified, ineffective and inconsistent with the Local Plan and the NPPF. It therefore follows that these policies are unsound and cannot be adopted.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Comment

Consultee	Chris Sutton [REDACTED]
Email Address	[REDACTED]
Address	[REDACTED] [REDACTED] Paddock Wood [REDACTED]
Event Name	Pre-Submission Local Plan
Comment by	Chris Sutton [REDACTED]
Comment ID	PSLP_150
Response Date	22/05/21 14:18
Consultation Point	Strategic Sites: Tudeley Village and Paddock Wood, including land at east Capel (View)
Status	Processed
Submission Type	Web
Version	0.1
Question 1	
Respondent's Name and/or Organisation	Chris Sutton
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	
Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.	
STR/SS1	
Question 4	
Do you consider that the Local Plan:	
Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Background

I have lived for the past 27 years on Eastlands Lane, surrounded by open fields and right in the centre of the proposed development north west of Paddock Wood.

First comment

Proposed allocation of 126 hectares of greenfield agricultural land at Paddock Wood for development (area north of railway, west of Maidstone road)

I am surprised that there is no mention of the impact of the proposals on 1 and 2 Eastlands Cottages in the Local Plan, despite the fact that the map shows that they are squeezed into a tiny plot of land sandwiched within a massive new development on all sides. These two family homes are local heritage assets converted from a single large oast house in the 1950s, and their oast roofs are a distinctive feature of the local landscape. They sit 100m from Eastlands Farm (also known as 3 Eastlands Cottages) which sits on the other side of Tudeley Brook. Presumably these are among the properties mentioned in SHELAA for AL/PW1 where it states that “the negative heritage score reflects the land take required and thus negative impacts that would occur largely upon the setting of heritage assets.”

However, the more detailed SHELAA reports for sites 315 and 316 (the land immediately to the south and north of 1 and 2 Eastlands Cottages) states there are no buildings on the site. This is strictly true, but gives a very misleading impression as the Local Plan proposal is to develop both sites with Eastlands Cottages squeezed in between. Given the emphasis in the Local Plan that piecemeal development around Paddock Wood is unacceptable, and policies STR2 (Principle number 9) around avoiding overbearing development around existing residences and EN5 on Heritage Assets, it is unacceptable that there is no mention of any proposal of how Eastlands Cottages would be sensitively incorporated into the proposed development that would appear to completely surround it. Given this absence, I object to the development as it does not respect local residents or the local trees, hedgerows, vegetation and landscape.

The SHELAA report also has overlap between sites 315 and site 51. Why does this overlap exist? Is it in case the overall development of PW1.1 to 1.4 does not take place, and TWBC is trying to reserve the ability to develop site 51 in isolation? If so, this must be made very clear. Planning officers at TWBC will be very aware that previous versions of the Local Plan have proposed the area of site 51 for development, only to be overruled by the independent Planning Inspector who decided that the site was unsuitable for development due to flooding and other risks. The Local Plan should acknowledge this, and not only be specific on the grounds of how it will seek to develop land that the Planning Inspector rejected for development, but also acknowledge that the Local Plan causes stress for local residents who relied on the judgement of the Planning Inspector in terms of continuing to invest in their properties believing that current values, influenced by the rural setting, would be maintained. TWBC planning officers will recall the “Fight the Blight” campaign by residents of Paddock Wood living north

of the railway line to protect 51 from development in the late 1990s, on the basis that this would cut off residents of Maidstone Road, Lucknow Road and Nursery Road from access to green open spaces and can be assured that this campaign would resume if the Local Plan continues to include this site for development in the next version of the Local Plan.

The descriptions of the two overlapping sites are inconsistent. Site 315 talks of existing buildings (plural – there is only one) to the north, site 51 talks of sporadic buildings to the north. The word sporadic suggests multiple buildings, again wrong. Site 51 correctly mentions public footpath WT176 on the western edge of the site, Site 315 ignores it. Site 51 has the two word sentence “Appears Lacking” in the Site Description. What is the significance of this statement (other than perhaps to suggest that the assessment was not properly quality reviewed?). The SHELAA report for adjacent site 313 states “The site is a managed arable greenfield which appears to be in agricultural use.” What is the significance of the word “appears” here? The reality is that all of PW1.1 to PW 1.4 (except for a very tiny area at the south of site 51) has been in continual agricultural use since before the existence of Paddock Wood, first as hop fields, then as orchards, and now for more than thirty years for growing crops.

The Local Plan also fails to mention that this land is a very popular area for walkers, or how residents of Maidstone Road (north of the railway line) will be able to walk to other green areas. Eastlands Lane is a bridleway which leads from the north of Paddock Wood to Whetstead, and WT176 follows the west bank of Tudeley Brook from the railway level crossing up to the A228 where it continues into Hop Farm land on the other side of the A228. The northern edge of the field marked as 316 is also popular with walkers, enabling a circuit route around 316 which is an important open space for residents of Paddock Wood who live north of the railway line, given that the Transfesa estate provides no green walking opportunities to the eastern side of Maidstone Road. The circuit route described is accessed either from Maidstone Road or Nursery Road. The July 2018 Landscape Sensitivity Assessment for Paddock Wood, commissioned by TWBC suggests that arable agricultural land is not a distinctive feature of the Low Weald, and therefore is relatively attractive for development. Local residents beg to differ. TWBC officers might wish to consider that comments in the Local Plan which state how the Common is integral to the character of Royal Tunbridge Wells cause offense to residents of Paddock Wood when there is no acknowledgement that the greenfield land surrounding Paddock Wood is integral to Paddock Wood’s character. TWBC thereby creates an impression that the preservation of the environment of Royal Tunbridge Wells is more important than the preservation of the environment of Paddock Wood.

From the publication of the David Locke Associates map of the proposed developments at Paddock Wood, it is clear that the nearest access to open countryside (as opposed to narrow green corridors) for residents living on Maidstone Road to the north of the railway line is being moved considerably further than the current start of open space at the junction of Eastlands Lane and Maidstone Road. The nearest access to genuine countryside would now start just south of the point where the A228 crosses Tudeley Brook – this is about 20 minutes walk from the junction of Eastlands Lane and Maidstone Road. This means that residents / home workers living north of the railway line will no longer be able to enjoy a walk in the countryside in their lunch break, and thus has negative impact on wellbeing. It also means crossing a fast and busy road where the sight lines are extremely poor, which is a real deterrent to dog walkers. There are no proposals in the local plan to build a safe crossing of the A228 for walkers at the Tudeley Brook bridge.

Planners will be aware that residents living north of the railway line are disinclined to walk across the busy railway bridge to access the parks in Paddock Wood – it really is the case that the fields alongside and to the north of Eastlands Lane comprise the principal recreation area for those who live north of the railway bridge, and the local plan would obliterate this area. In so doing it also obliterates many hectares of productive arable farmland.

Section 5.231 talks of the large irregular arable fields to the north and west. It does not mention that these will no longer be a feature of the north and west of Paddock Wood if the development takes place. The David Locke map leaves no space for economically viable arable farming between the A228 and the railway line.

The David Locke map allows for two very narrow corridor views to the north. Today walkers along Eastlands Lane enjoy panoramic 180 degree views to the north, to the Greensand Ridge and further on to the radio mast north of Wrotham Heath on the North Downs, some twelve miles away. This is the only area in Paddock Wood from which people can enjoy long distance north facing views to the ridges that are so distinctive in our landscape. The plan will obliterate those views. The David Locke map allows for no views whatsoever to the south. Walkers along Tudeley Brook in the area proposed

for development can get unlimited 180 degree views south to the High Weald AONB which are not available from the Hop Farm fields in Tonbridge and Malling Borough Council further north. The grand view from the development area south ranges from Pembury to the west as far as Curtisden Green to the east, a broad ten mile vista which is not possible to see south of the railway line. All of these views are obliterated by the Local Plan. I invite the Inspector to come and see these views.

A further comment in Section 5.231 says that fields to the north west contain a mix of agricultural land uses, including arable farmland, pasture, and orchards. I invite the Inspector to come and identify any orchards to the north west of the town. There aren't any. Section 5.232 says "Ponds are common to the north west of the town". I would like to invite the inspector to come and find them. There aren't any. This illustrates the very slapdash way that the Plan has been put together, with such poor research and lack of attention to detail. It suggests that the planning team at TWBC and borough councillors have not actually visited the development site. In this and in so many other aspects, this not a sound plan.

On a related theme, there is a major problem for residents in north Paddock Wood to access the main part of the town by cycle or car to go shopping, in that there is no left turn allowed at the southern end of the railway bridge, and thus you have to drive / cycle all the way to White's Corner and then back up Commercial Road. The local plan has not considered how this road configuration would have to be seriously altered if the town centre traffic is going to be able to absorb thousands of new residents coming in to the town centre from housing developments in north Paddock Wood.

I did not comment on Flooding in my response to the local plan in 2019, but this bad issue has got significantly worse since 2019, with multiple occasions of Tudeley Brook running outwith the capacity of its banks in December 2019 and December 2020, and crossing over the top of the concrete bridge on Eastlands Lane, which has flooded 3 Eastlands Lane and caused Eastlands Lane itself to become a fast flowing stream threatening 1 and 2 Eastlands Lane. There is much talk of investment in flood protection in the new development, but a complete lack of any detail which might indicate that the planners have given any serious thought about what betterment measures they will take to address it.

Second comment

Masterplanned approach

The Local Plan makes extensive references to the concept of Masterplanned approach but there is no definition of it in the Glossary. The Local Plan simply states that Masterplanning is an enabling policy with no specific targets but progress to be monitored regularly.

It appears that the use of the word "Masterplanning" (together with words such as "Garden Settlement" and "Exemplar" which are also not defined in the Glossary) are used in the Local Plan document to create a sense that TWBC will be working with Developers to ensure exceptionally well managed development, and thereby to try to allay concerns from local residents who are impacted by the very substantial nature of the proposed developments, particularly in Tudeley Village and around Paddock Wood. But none of these words are defined in the Glossary. They are therefore assumed to be Public Relations spin. The use of Masterplanning in particular seems to be an excuse for TWBC to say "we don't need to provide detail now, because it will come later once the Local Plan has been approved".

Given the very extensive impact of these developments on the local communities, surely we should expect substance rather than spin from TWBC. We need to know now what we are being asked to support. This should include much more detail about local community involvement in the proposals.

Perhaps TWBC could point the residents of Paddock Wood to the implementation of recent developments in Paddock Wood, because presumably at least some of the concepts of Masterplanning would have been used in those? Could they perhaps cite Mascalls Grange as an example, where executive homes have been built with cesspits because the sewage infrastructure was simply not there? The Local Plan talks of the importance of good landscaping at the entrances to our communities to create a positive impression for visitors – which is absolutely not the case with steel fencing that enclosed the Badsell Road site for many months. There is absolutely no mention of the piecemeal development of the Mascalls Grange and Badsell Road sites in the Local Plan. Has TWBC not paused to reflect that the proposed additional new development will create even more concern for potential homebuyers on the current development sites? The Local Plan sets off huge alarm bells for anyone

thinking of moving to Paddock Wood, because of its lack of infrastructure and wave after wave of new development proposed by the distant Planning Office in leafy Royal Tunbridge Wells.

Perhaps TWBC could also point to the proposed community centre for Paddock Wood. The Local Plan is completely silent on the fact that PWTC arranged a ballot of local residents on whether this site was appropriate for a community centre, and the result was that local residents said no. This may be an item that TWBC feels does not strictly need to be mentioned in the Local Plan – but surely it must be mentioned in the context that TWBC are claiming in the Local Plan that local communities will be fully involved and engaged as Paddock Wood future development will be under a “Masterplanning” approach.

I understand the some Masterplanning meetings relating to the proposed developments around Paddock Wood have already started. As a local resident living right in the middle of the site I would have thought I would have been invited to participate. But no one from the Planning department has reached out to me, and I am hugely concerned at the lack of engagement to my response to Reg 18.

The reality is that over the course of successive Local Plans TWBC has subjected Paddock Wood residents to a totally disjointed, piecemeal approach, and, given residents’ experience, it stretches all credibility to suggest that TWBC Planners have got it right this time round, both with regard to design and implementation of new developments. We are told that Councillors and Officers in the TWBC have felt serious personal stress because of the challenges of working with private developers to firstly demolish and now build on the old cinema site opposite the Town Hall. Given that they know what this stress feels like, TWBC Councillors and Officers should be wary about exporting such stress to the current residents of Paddock Wood and Capel.

I concur with the views of many other residents of Tudeley, Capel and Paddock Wood that this plan is unbalanced, putting a disproportionate number of houses right on the very edge of the borough, in a way which not only passes infrastructure challenges on to neighbouring Maidstone and Tonbridge & Malling boroughs, but also does not in any way represent a reasonable share of development across all areas of the borough.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

STR/SS1 is so fundamentally unsound that it needs to go right back to the drawing board. It cannot be soundly modified by making minor modifications.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? Yes, I wish to participate in hearing session(s)

Question 7a

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

I am a resident whose house is right in the middle of the proposed development.

Question 1	
Respondent's Name and/or Organisation	Andrew Sweeney
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Strategy for Paddock Wood, including land at east Capel

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:	. It is not effective
	. It is not justified
	. It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Flood Risk

There was a significant flood event in 2013/14 affecting Tonbridge and Golden Green.

Development of East Capel is entirely on the flood plain.

HOW can development of such an area even be considered both from a common-sense point of view and in light of Govts concern over sustainability and global warming.

These proposals are surely a future scandal if allowed to proceed.

Finally, it should be noted the South-East of England is prone to a lack of water; with the reservoir at Bewl Water frequently suffers low levels in summer. Has proper research to be done to evaluate the impact of a new town on supply?

Rail Transport

A huge expansion of housing at Capel and Tudeley, along with other housing development downline in Kent will put significant demand on peak time train services. It is unclear if Tudeley will have a station and if not then of course commuters will be drawn to Tonbridge via road.

Tonbridge station parking is already limited and constrained so thousands more commuters and or vehicle movements really could be disastrous.

Schools

East Capel has a 200 student primary school which already causes severe congestion at the location.

These proposals seek to add 2000 pupil secondary school.

This is not much improvement on their previous proposal.

Process

I question the integrity of this process.

TWBC has 20 wards and is seeking to put half of their proposed new housing in 1 ward, obliterating the existing local communities, green belt land materially impacting Tonbridge which already suffers from severe peak time congestion on road and rail infrastructure.

Has TWBC worked to identify brownfield sites to the same extent as they have targeted greenfield sites for development? Despite the assertion that no other brownfield sites exist some might suspect TWBC prefers to deal with a single transaction, rather than engage in the hard work to identify multiple but more suitable locations.

Para 137 NPPF requires local planning authorities to “examine fully all other options for meeting its identified need for development” before concluding whether exceptional circumstances exist to justify changes to Green Belt boundaries.

Does this draft plan fail this test?

The land to be used is Green Belt that lies adjacent to Kent's Area of Outstanding Natural beauty (AONB) and in close proximity to at least one Area of Ancient Woodland. To use Green Belt land, there must be “exceptional circumstances”, and housing need is NOT sufficient to overrule currently protected Green Belt.

It is understood that the housing need figure is not a mandatory target and the NPPF is clear that only in exceptional circumstances may a Green Belt boundary be altered, through the Local Plan process.

Consequently, Government-imposed housing targets are disproportionate for a borough and parish with such a high proportion of Green Belt and/or AONB land.

Sevenoaks Council has pushed back on this external imposition of housing targets from central government which in any case, uses out of date 2014 ONS data, not the updated 2016 numbers.

Finally, TWBC received extensive comments objecting to the local plan in 2019 and apart from dropping its grossly ill-conceived proposals for another school in Tonbridge has ignored the responses and is just carrying on trying to bludgeon its way through.

It seems TWBC is simply paying lip service to “community engagement” but I suppose as the communities affected are not voters in TWBC they simply don’t care.

In summary

Unwarranted proposals to build on green belt and on flood plain.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Do you consider that the Local Plan is not sound because:

- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Flood Risk

There was a significant flood event in 2013/14 affecting Tonbridge and Golden Green.

Tudeley is in a flood risk area.

HOW can development of such an area even be considered both from a common-sense point of view and in light of Govts concern over sustainability and global warming.

These proposals are surely a future scandal if allowed to proceed.

It should also be noted the South-East of England is prone to a lack of water; with the reservoir at Bewl Water frequently suffers low levels in summer. Has proper research to be done to evaluate the impact of a new town on supply?

Road Transport

Congestion in and around Tonbridge at Peak hours is already terrible.

This is due to the high number of secondary schools in the area plus Tonbridge main line station is a major draw for commuters.

Placing a new town on the border will obviously impose a huge negative impact for Tonbridge.

My daughter attends school at TWGGS and her bus journey of 6 miles frequently takes around 45 minutes and this is primarily due to the amount of time it takes for the bus to transit Tonbridge (as it exists now).

It is no exaggeration to say these proposals could inflict utter chaos to the finely balanced Tonbridge transport network.

Finally I note the proposal to close Hartlake Road, a well-used route particularly at peak times

I often use Hartlake road to avoid the considerable congestion in Tonbridge and TWBC plan is to shut this vital route whilst simultaneously seeking to worsen the congestion in Tonbridge.

This is simply outrageous.

Rail Transport

A huge expansion of housing at Tudeley & Capel, along with other housing development downline in Kent will put significant demand on peak time train services. It is unclear if Tudeley will have a station and if not then of course commuters will be drawn to Tonbridge via road.

Tonbridge station parking is already limited and constrained so thousands more commuters and or vehicle movements really could be disastrous.

Process

Has TWBC worked to identify brownfield sites to the same extent as they have targeted greenfield sites for development? Despite the assertion that no other brownfield sites exist some might suspect TWBC prefers to deal with a single transaction, rather than engage in the hard work to identify multiple but more suitable locations.

Para 137 NPPF requires local planning authorities to “examine fully all other options for meeting its identified need for development” before concluding whether exceptional circumstances exist to justify changes to Green Belt boundaries.

Does this draft plan fail this test?

The land to be used is Green Belt that lies adjacent to Kent's Area of Outstanding Natural beauty (AONB) and in close proximity to at least one Area of Ancient Woodland. To use Green Belt land, there must be “exceptional circumstances”, and housing need is NOT sufficient to overrule currently protected Green Belt.

It is understood that the housing need figure is not a mandatory target and the NPPF is clear that only in exceptional circumstances may a Green Belt boundary be altered, through the Local Plan process.

Consequently, Government-imposed housing targets are disproportionate for a borough and parish with such a high proportion of Green Belt and/or AONB land.

Sevenoaks Council has pushed back on this external imposition of housing targets from central government which in any case, uses out of date 2014 ONS data, not the updated 2016 numbers.

Finally, TWBC received extensive comments objecting to the local plan in 2019 and apart from dropping its grossly ill-conceived proposals for another school in Tonbridge has ignored the responses and is just carrying on trying to bludgeon its way through.

In summary

Unwarranted proposals to build on green belt and on flood risk areas.

TWBC will benefit from receipt of council tax while residents of TMBC will suffer the considerable degradation in the environment and their quality of life.

As a resident of Hildenborough and TMBC am I wrong to view this as a cynical attempt by TWBC to offload the impact of their proposals onto residents of a neighbouring authority which has its own housing needs to address?

Question 7

Question 1	
Respondent's Name and/or Organisation	Paul Tanner: Tanner Architecture
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Delivery of Housing: Policies H1 - H5

Question 4

Do you consider that the Local Plan:

Is legally compliant	Yes
Is sound	Don't know
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because: . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

National Planning Policy Framework (Feb 2019 version) Paragraph 127, item f, footnote 46 indicates that

'Planning policies for housing should make use of the Government's optional technical standards for accessible and adaptable housing, where this would address an identified need for such properties. Policies may also make use of the nationally described space standard, where the need for an internal space standard can be justified.'

The Draft Local Plan contains no reference to minimum space standards within the proposals. This is a missed opportunity to ensure that the quality of residential accommodation to be provided during the applicable period (over 12,000 dwellings proposed during the 18 year period) will be of a minimum decent standard.

The omission of minimum space standards within the Local Plan presents a serious risk of new homes being created that would, in fact, be detrimental their residents' mental and physical health and well-being.

Following a series of high profile abuses of recent changes to Permitted Development Rights legislation, in October 2020, the Housing Secretary, Robert Jenrick, announced that all homes built through permitted development rights must now have to meet these standards.

To omit ensuring that new build dwellings will be designed to these minimum standards must be considered careless, if not negligent.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

There is plenty of precedent of Local Authorities including reference to Nationally Prescribed Minimum Space Standards within their policies or including reference to them on their website. The London Plan incorporates the standards into its own text.

But essentially the proposed modification is:

New dwellings are to be designed to meet the standards as set out in 'Nationally Prescribed Minimum Space Standards'.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

Agent's Name and Organisation (if applicable)	Trix Tanzarella
---	-----------------

Question 3

To which part of the Local Plan does this representation relate?	Policies Map
--	--------------

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

AL/RTW6

Question 4

Do you consider that the Local Plan:

Is legally compliant	Don't know
Is sound	No
Complies with the Duty to Cooperate	Don't know

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified
- . It is not consistent with national policy

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We have found, based on the below, that the proposed policy AL/RTW6 is unsound as it is not consistent with national policy and does not enable the delivery of sustainable development in accordance with the policies in the NPPF. We present the following reasons.

1) OVERDEVELOPMENT:

NPPF paragraph 117 states that: “Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions.”

The allocation of 40-45 residential dwellings constitutes an overdevelopment of the site. The site, at 0.47 hectare not taking the access road and pedestrian access into account, is constrained, isolated and ill proportioned for a development of this scale. If the premise is that the trees under TPO on the borders need to be maintained in order to protect amenity and biodiversity and to make the new development pleasant and liveable, then the effective developable area is indeed only 0.29 hectare, given the extent of the root protection areas required (as illustrated by the arboricultural report submitted in support of the current planning application for this site).

A number of previous planning applications for this site have been unsuccessful over the years due to the cramped nature of the site, for developments constituting 24 dwellings (2004), 14 dwellings (2004), and 2 dwellings (2005). One of the reasons cited by the planning dept. for the refusal of the application in 2005 was that the proposal “would give rise to a cramped and discordant form of backland development... The development would threaten existing trees (some of which are covered by Area tree preservation order No.8 2005) and Laurel hedge screen, which act as significant landscape features, the potential loss of which... would severely impact on the visual amenity and character of the area and create overlooking to the rear gardens of no’s 204-220 Upper Grosvenor Road, thereby harming the privacy and amenity of the occupants of those properties...”

Although these conditions on site have not changed, we understand that the housing context has changed, and there is a greater need than ever to satisfy demand. The NPPF however requires that decisions should promote an effective use of land and that safe and healthy living conditions should be achieved. We understand that councils should be responsive to the demand, but we also believe it is of critical importance for this to be done with sensitivity and in the spirit of the NPPF, which encourages the creation of well-designed and liveable spaces. Extreme care should be taken to ensure that any available land is used well and overdevelopment should be avoided where it will lead to an environment that is cramped, over-occupied, isolated and overshadowed. Higher density developments should have adequate surrounding spill-over space to accommodate the needs of the residents and to create an environment generous enough to carry the inhabitants of the development. A development of 40-45 units with its substantial building footprint and towering nature, as is illustrated by the current planning application, will require extensive parking, ample room for services and waste, generous external amenity space for its many users, play areas and ample access to sunlight. The site is simply not big enough to accommodate such needs adequately. The planning application for this site currently at council illustrates this fact clearly, as they are only able to provide very minimally in respect of

external amenity space. In order to establish such a density on this site, deep blocks will be required, with single aspect apartments and with limitations on proper orientation in regards to solar gain and daylighting due to the limiting factors of preventing overlooking and the problems of facing onto the adjacent railway line.

In regards to local biodiversity, this site is an important stepping stone from Hilbert Wood to gardens along UGR. The site will sustain a heavy loss in biodiversity over the span of the construction works, especially given that the works area will be cramped, particularly if the boundary trees are to be maintained. In addition to accommodating the needs of any future residents, the area remaining around the building footprints should be large enough to sustain a nett biodiversity gain through landscaping measures – the smaller an area remains for such measures, the more difficult and costly for a developer to achieve the nett gain. Policies put in place should make it feasible for developers to achieve these requirements without excessive strain, or the requirements simply won't be achieved.

2) BOUNDARY TREES AS SCREEN & HIGH RISK OF DAMAGE TO TREES:

The AL/RTW6 proposal states that “The layout of any development within the site will need to have regard to the amenities of the existing properties and to retain an appropriate level of screening” with one of the requirements (No. 4) being that the layout and design of the development should protect the trees of most amenity value. It states that “Particular regard shall be had to the retention and reinforcement of the trees along the eastern and southern boundaries to retain an appropriate level of screening”. The proposal therefore relies heavily on the presence of trees on the boundary to prevent overlooking and protect amenity.

It's worth mentioning however, that the tall trees which are seen on plan to act as a visual screen all along the boundaries of the development do not do so uniformly as much depend on the crown height, density and whether they are indeed evergreen. Some trees are not in good health and require removal. Much of the existing “screen” is currently provided by lower infill vegetation which will likely be removed. There is no guarantee that any retained trees will remain in place into the future and won't be excessively pruned throughout the lifetime of a development. Cumulatively these factors indicate that the trees alone cannot be the means by which the harmful effects on amenity could be overcome.

Furthermore and probably more problematic, is that fact that a development at this scale poses a real risk to the health of the trees under TPO surrounding the site.

Extensive root protection areas would be required to reasonably protect the TPO trees on the boundary, as has been shown in the arboricultural report submitted under the current planning app for this site. The same planning application illustrates the large building footprints which would be required to establish 40-45 units. The root protection areas and building footprints combined would leave an excessively narrow works area around the building perimeter – with single access to the site for works, operations will be cramped and damage to these established TPO trees, will invariably become very difficult to avoid.

3) NOISE DISTURBANCE, AIR & LIGHT POLLUTION:

Paragraph 180 of the National Planning Policy Framework (2019) states:

Planning policies and decisions should ensure that new development is appropriate for its location taking into account the likely effects... and should:

- 1 *Mitigate and reduce to a minimum potential adverse impact resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life.*
- 2 *Identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and*
- 3 *Limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.*

Noise disturbance and air pollution are both existing problems along Upper Grosvenor Road. These problems will be deepened substantially by the introduction of 40-45 units. Currently there is some refuge from the existing road pollution and noise disturbance on UGR to the rear of the properties facing onto the green and undisturbed gardens of 230 UGR, which would be lost if this previously unaffected site were to be overdeveloped at the proposed scale.

Currently the residents along UGR facing onto 230 UGR have the benefit of dark sky to the rear with minimal artificial light in the evenings. The development itself but especially the streetlights required for the access road and new parking will likely drastically affect the amenity to the rear in this regard.

4) SAFE ACCESS & ROAD SAFETY:

Paragraph 108 of the National Planning Policy Framework (2019) states:

In assessing sites that may be allocated for development in plans, or specific

applications for development, it should be ensured that: safe and suitable access to the site can be achieved for all users;

and Paragraph 110 states:

that applications for development should: create places that are safe, secure and attractive – which minimise the scope for conflicts between pedestrians, cyclists and vehicles.

Upper Grosvenor Road is a busy road with many existing safety hazards to pedestrians and road users – especially being a main route for various large vehicles. This particular stretch of road is a school route and is in frequent use by large numbers of pedestrians due to the nearby High Brooms train station, Grosvenor & Hilbert Park and the Co-op on Silverdale Lane. The proposed access road joins to UGR on a bend with very poor visibility, especially to the north where there is a down slope. Residents on UGR have witnessed many accidents on this bend over the years and there are two known pedestrian deaths due to car accidents (please see attached photo record provided by Luke Engleback in his objection to the current planning app for this site: 21/00460/OUT). The bus stop and Silverdale Ln opposite the proposed entrance are further compounding factors on an already unsafe bend.

The Transport Statement provided by Motion for the current planning application determines that the proposed access achieves a required 43.3m visibility splay to the north. It is clear from the plan submitted that this is only achieved by drawing the splay almost on top of the adjacent property boundary. Furthermore, the traffic counter used to determine vehicle speeds which the required visibility splays are based on was recording traffic during tier 3 lockdown restrictions and the sample taken therefore does not represent real traffic conditions outside lockdown times. The determination in terms of the splay thus lacks due care on two counts. We are quite confused as to why the KCC Highways report for this same application considers that this splay is achieved, as in so doing it clearly does not take into account the particularities of the location. Bins put out along this boundary and the existing (or any future) boundary treatments of the property adjacent the sidewalk actually drastically impede the view. The hedging in question is reasonably well maintained and not overhanging to an inordinate extent (photograph attached) – it is not unreasonable to suppose that future boundary treatments might well impede the view even more drastically. Minimal caution has been applied here and setting the bar so low is an incredible oversight. This is of critical importance and should not be considered an auxiliary point as the combination of conditions on this bend, at a point of such low visibility will put lives in real danger. This is not a safe location for an access road to the site.

With Grenfell in our recent history we need no greater reminder of the real effects of decisions at these early stages of the planning process. With very many residents having highlighted the on-ground dangers of this road and the seriously inappropriate location of the proposed access road on the recent planning application, it would not be fair to say at any future evaluation, that caution had not been raised by local residents.

5) EMERGENCY ACCESS:

It should be noted that there is a single emergency access road to the proposed site. The narrow existing access to the north is not wide enough to accommodate emergency vehicles. With a single emergency access to the site and very tight turning circles one has to consider what the conditions might be like in the case of a fire.

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Access should be provided at a location where suitable visibility of oncoming traffic can be achieved, so that paragraphs 108 & 110 of the NPPF can be satisfied.

The scale of development and density should be proportionate to the site with the number of residential units at a much lower number than proposed, so that paragraph 117 & 180 of the NPPF can be satisfied and so that the land can be used effectively. Development should be proposed at a scale where it will be feasible for a developer to achieve the requirements set out in regards to well-designed and liveable spaces, adequate external amenity spaces, adequate daylighting and solar control, limiting impact on the amenity of existing residents, achieving of nett biodiversity gains etc. Development should be proposed at a scale where it would be feasible to construct and maintain the development without adverse impacts on the existing trees under TPO.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

We have found, based on the below, that the proposed policy AL/RTW6 is unsound as it is not consistent with national policy and does not enable the delivery of sustainable development in accordance with the policies in the NPPF. We present the following reasons.

1) OVERDEVELOPMENT:

NPPF paragraph 117 states that: "Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions."

The allocation of 40-45 residential dwellings constitutes an overdevelopment of the site. The site, at 0.47 hectare not taking the access road and pedestrian access into account, is constrained, isolated and ill proportioned for a development of this scale. If the premise is that the trees under TPO on the borders need to be maintained in order to protect amenity and biodiversity and to make the new development pleasant and liveable, then the effective developable area is indeed only 0.29 hectare, given the extent of the root protection areas required (as illustrated by the arboricultural report submitted in support of the current planning application for this site).

A number of previous planning applications for this site have been unsuccessful over the years due to the cramped nature of the site, for developments constituting 24 dwellings (2004), 14 dwellings (2004), and 2 dwellings (2005). One of the reasons cited by the planning dept. for the refusal of the application in 2005 was that the proposal "would give rise to a cramped and discordant form of backland development... The development would threaten existing trees (some of which are covered by Area tree preservation order No.8 2005) and Laurel hedge screen, which act as significant landscape features, the potential loss of which... would severely impact on the visual amenity and character of the area and create overlooking to the rear gardens of no's 204-220 Upper Grosvenor Road, thereby harming the privacy and amenity of the occupants of those properties..."

Although these conditions on site have not changed, we understand that the housing context has changed, and there is a greater need than ever to satisfy demand. The NPPF however requires that decisions should promote an effective use of land and that safe and healthy living conditions should be achieved. We understand that councils should be responsive to the demand, but we also believe it is of critical importance for this to be done with sensitivity and in the spirit of the NPPF, which encourages the creation of well-designed and liveable spaces. Extreme care should be taken to ensure that any available land is used well and overdevelopment should be avoided where it will lead to an environment that is cramped, over-occupied, isolated and overshadowed. Higher density developments should have adequate surrounding spill-over space to accommodate the needs of the residents and to create an environment generous enough to carry the inhabitants of the development. A development

of 40-45 units with its substantial building footprint and towering nature, as is illustrated by the current planning application, will require extensive parking, ample room for services and waste, generous external amenity space for its many users, play areas and ample access to sunlight. The site is simply not big enough to accommodate such needs adequately. The planning application for this site currently at council illustrates this fact clearly, as they are only able to provide very minimally in respect of external amenity space. In order to establish such a density on this site, deep blocks will be required, with single aspect apartments and with limitations on proper orientation in regards to solar gain and daylighting due to the limiting factors of preventing overlooking and the problems of facing onto the adjacent railway line.

In regards to local biodiversity, this site is an important stepping stone from Hilbert Wood to gardens along UGR. The site will sustain a heavy loss in biodiversity over the span of the construction works, especially given that the works area will be cramped, particularly if the boundary trees are to be maintained. In addition to accommodating the needs of any future residents, the area remaining around the building footprints should be large enough to sustain a nett biodiversity gain through landscaping measures – the smaller an area remains for such measures, the more difficult and costly for a developer to achieve the nett gain. Policies put in place should make it feasible for developers to achieve these requirements without excessive strain, or the requirements simply won't be achieved.

2) BOUNDARY TREES AS SCREEN & HIGH RISK OF DAMAGE TO TREES:

The AL/RTW6 proposal states that “The layout of any development within the site will need to have regard to the amenities of the existing properties and to retain an appropriate level of screening” with one of the requirements (No. 4) being that the layout and design of the development should protect the trees of most amenity value. It states that “Particular regard shall be had to the retention and reinforcement of the trees along the eastern and southern boundaries to retain an appropriate level of screening”. The proposal therefore relies heavily on the presence of trees on the boundary to prevent overlooking and protect amenity.

It's worth mentioning however, that the tall trees which are seen on plan to act as a visual screen all along the boundaries of the development do not do so uniformly as much depend on the crown height, density and whether they are indeed evergreen. Some trees are not in good health and require removal. Much of the existing “screen” is currently provided by lower infill vegetation which will likely be removed. There is no guarantee that any retained trees will remain in place into the future and won't be excessively pruned throughout the lifetime of a development. Cumulatively these factors indicate that the trees alone cannot be the means by which the harmful effects on amenity could be overcome.

Furthermore and probably more problematic, is that fact that a development at this scale poses a real risk to the health of the trees under TPO surrounding the site.

Extensive root protection areas would be required to reasonably protect the TPO trees on the boundary, as has been shown in the arboricultural report submitted under the current planning app for this site. The same planning application illustrates the large building footprints which would be required to establish 40-45 units. The root protection areas and building footprints combined would leave an excessively narrow works area around the building perimeter – with single access to the site for works, operations will be cramped and damage to these established TPO trees, will invariably become very difficult to avoid.

3) NOISE DISTURBANCE, AIR & LIGHT POLLUTION:

Paragraph 180 of the National Planning Policy Framework (2019) states:

Planning policies and decisions should ensure that new development is appropriate for its location taking into account the likely effects... and should:

- 1 *Mitigate and reduce to a minimum potential adverse impact resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life.*
- 2 *Identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and*
- 3 *Limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.*

Noise disturbance and air pollution are both existing problems along Upper Grosvenor Road. These problems will be deepened substantially by the introduction of 40-45 units. Currently there is some refuge from the existing road pollution and noise disturbance on UGR to the rear of the properties facing onto the green and undisturbed gardens of 230 UGR, which would be lost if this previously unaffected site were to be overdeveloped at the proposed scale.

Currently the residents along UGR facing onto 230 UGR have the benefit of dark sky to the rear with minimal artificial light in the evenings. The development itself but especially the streetlights required for the access road and new parking will likely drastically affect the amenity to the rear in this regard.

4) SAFE ACCESS & ROAD SAFETY:

Paragraph 108 of the National Planning Policy Framework (2019) states:

In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that: safe and suitable access to the site can be achieved for all users;

and Paragraph 110 states:

that applications for development should: create places that are safe, secure and attractive – which minimise the scope for conflicts between pedestrians, cyclists and vehicles.

Upper Grosvenor Road is a busy road with many existing safety hazards to pedestrians and road users – especially being a main route for various large vehicles. This particular stretch of road is a school route and is in frequent use by large numbers of pedestrians due to the nearby High Brooms train station, Grosvenor & Hilbert Park and the Co-op on Silverdale Lane. The proposed access road joins to UGR on a bend with very poor visibility, especially to the north where there is a down slope. Residents on UGR have witnessed many accidents on this bend over the years and there are two known pedestrian deaths due to car accidents (please see attached photo record provided by Luke Engleback in his objection to the current planning app for this site: 21/00460/OUT). The bus stop and Silverdale Ln opposite the proposed entrance are further compounding factors on an already unsafe bend.

The Transport Statement provided by Motion for the current planning application determines that the proposed access achieves a required 43.3m visibility splay to the north. It is clear from the plan submitted that this is only achieved by drawing the splay almost on top of the adjacent property boundary. Furthermore, the traffic counter used to determine vehicle speeds which the required visibility splays are based on was recording traffic during tier 3 lockdown restrictions and the sample taken therefore does not represent real traffic conditions outside lockdown times. The determination in terms of the splay thus lacks due care on two counts. We are quite confused as to why the KCC Highways report for this same application considers that this splay is achieved, as in so doing it clearly does not take into account the particularities of the location. Bins put out along this boundary and the existing (or any future) boundary treatments of the property adjacent the sidewalk actually drastically impede the view. The hedging in question is reasonably well maintained and not overhanging to an inordinate extent (photograph attached) – it is not unreasonable to suppose that future boundary treatments might well impede the view even more drastically. Minimal caution has been applied here and setting the bar so low is an incredible oversight. This is of critical importance and should not be considered an auxiliary point as the combination of conditions on this bend, at a point of such low visibility will put lives in real danger. This is not a safe location for an access road to the site.

With Grenfell in our recent history we need no greater reminder of the real effects of decisions at these early stages of the planning process. With very many residents having highlighted the on-ground dangers of this road and the seriously inappropriate location of the proposed access road on the recent planning application, it would not be fair to say at any future evaluation, that caution had not been raised by local residents.

5) EMERGENCY ACCESS:

It should be noted that there is a single emergency access road to the proposed site. The narrow existing access to the north is not wide enough to accommodate emergency vehicles. With a single emergency access to the site and very tight turning circles one has to consider what the conditions might be like in the case of a fire.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Access should be provided at a location where suitable visibility of oncoming traffic can be achieved, so that paragraphs 108 & 110 of the NPPF can be satisfied.

The scale of development and density should be proportionate to the site with the number of residential units at a much lower number than proposed, so that paragraph 117 & 180 of the NPPF can be satisfied and so that the land can be used effectively. Development should be proposed at a scale where it will be feasible for a developer to achieve the requirements set out in regards to well-designed and liveable spaces, adequate external amenity spaces, adequate daylighting and solar control, limiting impact on the amenity of existing residents, achieving of nett biodiversity gains etc. Development should be proposed at a scale where it would be feasible to construct and maintain the development without adverse impacts on the existing trees under TPO.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 1	
Respondent's Name and/or Organisation	Targetfollow
Question 2	

Agent's Name and Organisation (if applicable) Lambert Smith Hampton

Question 3

To which part of the Local Plan does this representation relate? Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy PSTR/RU 1 The Strategy for Rusthall parish

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

On behalf of our client, Targetfollow, please find enclosed a representation to the Tunbridge Wells Draft Local Plan Regulation 19 consultation. We welcome the opportunity to engage with the Council for the duration of the Local Plan process.

This representation relates to the Land at Tunbridge Wells Golf Course and aspirations for the site to be allocated in the draft Local Plan for the delivery of up to 100 residential (C3) dwellings (mix of affordable, market and retirement units), public open space and community facilities. The representation outlines a detailed draft masterplan and assessment of the site and our recommended changes to the draft Plan so that it can be found sound.

This letter is supported by the following suite of technical documents, which are to be read as a single representation:

i. Vision Document for the site, prepared by Lambert Smith Hampton; ii. Flooding and Drainage Technical Note prepared by Logika; iii. Access and Trip Technical Note prepared by Sweco; iv. Green Belt Assessment prepared by Pegasus; and v. Ecology note prepared by Eight Associates.

Background

Representations in relation to the site were submitted to the Regulation 18 consultation in November 2019. Since then, Targetfollow has instructed a full consultancy team to review the previous Regulation 18 representation submission to strengthen the masterplan to ensure that it is robust and adequately responds to previous feedback from officers. Amendments to the masterplan have therefore been made in line with the recommendations set out in the supporting consultants' reports as well as responding to various planning policy designations that impact the site.

The Site

The site comprises a golf course which measures 14.6ha. Part of the site also includes an area of Ancient Woodland. The site is located adjacent to the settlement boundaries of Rusthall to the west and Tunbridge Wells to the east. The site is bounded to the north by residential development and open countryside and to the south by Langton Road.

The site is located In Flood Zone 1 and is therefore at low risk of flooding. The site is located in the metropolitan Green Belt.

There are no heritage assets located within the site boundaries but the site is located adjacent to the Tunbridge Wells and Rusthall Conservation Areas. The site will be accessed by the existing access onto Langton Road. An Access and Trip Technical Note has been prepared by SWECO and is appended to the enclosed representation. The note concludes that the site is accessible by sustainable modes of transport such as bus, walking and rail. The site is therefore a sustainable location for development.

Regulation 19 – Draft Local Plan Assessment

Site Proposals and Assessment

The draft Local Plan identifies an overall housing need of 12,204 dwellings (approximately 5,814 affordable) across the plan period. Although 5,259 units are identified through extant planning permissions and windfall allowances there is a consequent need for the draft plan to allocate additional sites to provide a minimum of 7,221 dwellings. In addition, we note that Tunbridge Wells Council has only delivered 86% of its Housing Delivery Test measurement (2020) in the last three years, and consequently there is a need for the Council to prepare an Action Plan to ensure that sufficient sites are delivered in accordance with the requirements of the National Planning Policy Framework (NPPF).

The draft Local Plan outlines that the AONB and the Green Belt collectively cover 75% of the Borough. This has put a constraint on housing delivery within the Borough. The Council acknowledge that the release of Green Belt land is required to meet housing demand and therefore the draft plan proposes the release of approximately 5% of green belt land in the Borough for development.

The Tunbridge Wells Golf Course is located within the Green Belt and at this stage in the plan process has not been allocated for development. The enclosed representation promotes the land for allocation within the draft Local Plan to provide up to 100 residential (C3) dwellings (mix of affordable, market and retirement units, subject to viability), public open space and community facilities. The representation includes a detailed draft masterplan, which is set out in the enclosed Vision Document.

New community facilities and a new cricket pitch or leisure facilities, for use by the local community, are proposed in the central and southern portion of the site. A country park will extend from the north of the site along the existing water course. It is proposed that the cricket pavilion and pitch will replace the existing facilities on Rusthall Common and that the land at Rusthall Common would be returned to common land.

We acknowledge that the provision of appropriate facilities for outdoor sports and recreation are considered to be, in principle, acceptable in the Green Belt and therefore the provision of outdoor community or leisure facilities alone are not sufficient to justify an amendment to the Green Belt. Nevertheless, the proposals for residential dwellings on site have been assessed on the weight of the 'exceptional circumstances' that justify proposals within the Green Belt (in line with the requirements of paragraph 136 of the NPPF) against the substantial weight accorded to the harm of inappropriate development in the Green Belt.

It is therefore appropriate to assess the benefits of amending the Green Belt boundary in order to promote the use of the site for residential use (including affordable, market and retirement units), which is considered in further detail below.

Proposed Layout

The proposed layout has been designed to minimise the harm of the proposals on the Green Belt. The proposed residential accommodation is located on the western boundary of Tunbridge Wells and the eastern boundary, acting as logical extension to the built up settlement. The Council's Green Belt review has acknowledged that Rusthall and Tunbridge Wells are considered to be one settlement and therefore development of small parcels of land within the site would not contribute to coalescence of settlements.

The two parcels are relatively well screened from the remainder of the site due to tree planting undertaken for the development of the golf course and are therefore not considered to be a strong

contributor to the openness of the site. The preservation of the existing central ancient woodland and the proposed location of the community facilities to the south, ensure that the open nature of the site is preserved.

An allocation in this location is not considered to contribute to urban sprawl or coalescence. This is because the proposed residential units will be contained within three small development parcels. Given that the extent of development will be limited to the three development parcels, development will not extend northwards beyond Grange Road and Thirlmere Road. Consequently, the proposed development is not considered to contribute to encroachment of development on the countryside.

In accordance with paragraph 136 of the NPPF, the 'exceptional circumstances' that would be considered in respect of development proposals on this site are considered to be the contribution that the development of the site would make to housing needs in terms of delivering much needed affordable, market and retirement units and community facilities.

Exceptional Circumstances

a) General Housing Need

Whilst a site's contribution to housing need alone is not considered to be an 'exceptional circumstance', unmet housing demand can be weighed against the harm to the Green Belt in combination with other factors. This approach has been confirmed by the Inspector in the appeal decision for a retirement living scheme in West Malling (APP/H2265/W/18/3202040). The appeal also included that the provision of specialist properties and extra care housing contributes to housing need figures. Therefore the ability for the site to meet the Borough's pressing housing need is relevant to this consideration.

As noted previously, the draft Local Plan is required to allocate sites to provide an additional minimum of 7,221 dwellings. Whilst the draft Local Plan has allocated some sites to meet the identified need a significant proportion of the need is to be met through two large scale allocations at Capel and Paddock Wood (STR/SS1) and Tudeley Village (STR/SS3). Capel and Paddock Wood has been allocated for the delivery 3,490-3,590 residential units, across four masterplan areas whilst Tudeley village has been allocated for the delivery 2,800 residential dwellings, 2,100 of which are to be delivered within the plan period. These two draft allocations account for approximately 47% of the Borough's housing allocations across the plan period.

The strategic allocations outline that 40% affordable housing should be delivered at the site. The sites combined would provide circa 2,276 affordable units, which equates to approximately 39% of the Borough's affordable housing need across the plan period. Additional allocated sites, such as the Golf Course, should therefore be identified to contribute towards meeting this potential shortfall in affordable housing need.

Whilst we recognise the ambitions of the Borough to aid the delivery of the draft allocations across the plan period, we consider that the draft plan is overly reliant on large scale allocations. The delivery of enabling infrastructure works and the scale of such proposals are likely to incur a level of delay during the planning and construction period and therefore it is unlikely that all the required new market and affordable homes will be delivered across the plan period within the required five year period.

To ensure that the Council can deliver the required market and affordable housing need across the plan period, we strongly recommend that the Council ensures that sufficient numbers of small and medium sites that can be built out in the short term, including the Golf Course site, are allocated through the Local Plan process. This will help to provide variety and also aid with the provision of smaller sites that do not rely so heavily on the need for new infrastructure or funding to unlock delivery and meet the potential shortfall in allocated sites.

b) Older Persons Housing Need

In addition to the Borough's general housing need, the TWBC Housing Needs Survey (2018) details that there is expected to be an approximate 40% increase in the population of over 65s (TWBC's definition of 'older people') within the Borough across the plan period. This equates to approximately an additional 9,200 older residents within the Borough. Whilst the majority of respondents surveyed expressed a desire to remain in their homes, approximately a quarter of those surveyed would consider living in alternative specialist accommodation. Based on the data within the needs survey approximately 10% of older residents will consider relocating to sheltered accommodation/ Extra Care units. Therefore the Council will need to ensure that there is a sufficient supply of specialist retirement accommodation to accommodate the growth of older residents within the Borough.

Paragraph 6.363 of the draft plan states that the need identified within the Housing Needs Survey will be addressed through a combination of site allocation policies and planning permissions being granted. Whilst many of the larger draft site allocations have been worded to state that, if deemed appropriate, part of the site's residential offering could be used for delivering housing for older people; there is no policy requirement to provide certainty that such housing must be delivered.

There are only three draft allocation sites that specifically include a provision for the delivery of retirement (C3) housing for older people. These include:

(1) Site AL/RTW 4 (Arriva Kent and Sussex Ltd, Bus Depot, 36-40 St. John's Road, Royal Tunbridge Wells) is allocated to provide 65 residential dwellings or approximately 90 dwellings for older people; (2) Site AL/HA 1 (Land at The White House Highgate Hill, Hawkhurst) is allocated for the provision of 43 retirement apartments; and (3) Site AL/PE 6 (Woodsgate Corner, Pembur) is allocated for the provision of specialist housing for older people this is either as extra care housing (approximately 80 units) and/or residential care (approximately 120 units).

The draft allocations within the Regulation 19 Consultation document, therefore, equate to the provision of maximum 213 retirement living/ sheltered accommodation/ extra care units. Although the Housing Needs Survey does not detail a specific numerical housing need for the over 65s, based on the data within the survey the authors (Arc4) would expect approximately 920 older residents to seek extra care units/ sheltered accommodation across the plan period. This is a significant increase when compared with the number of units allocated in the draft plan and suggests there is likely to be a significant shortfall in housing for older people.

The Housing Needs Survey concludes that the range of housing options available to older people within the Borough will need to be diversified to meet the projected growing need. At present, the draft Local Plan is largely relying on future planning applications to meet the need, rather than through allocating sites in the Local Plan. Based on the available data in the Housing Needs Survey, this approach is likely to result in an under-supply of accommodation for older residents, and an already aging population, within the Borough. Accordingly, we recommend that additional sites should be allocated to address this serious shortfall.

Furthermore, we have undertaken a review of recent and current proposals for older persons housing within the Borough. At present a proposed scheme for 43 retirement living units at The White House in Cranbrook (19/01271/FULL) has been approved and a scheme for 42 retirement living units have been approved at Pinewood Court in Tunbridge Wells (17/01191/FULL). The approvals should result in a total of 85 units for older people being delivered within the plan period. Nevertheless, it is important to note that the approval at Pinewood Court was for the demolition of 39 vacant retirement flats and the erection of 42 units. The net increase in approved provision of units for older persons is therefore only 46 units. At the time of submission of this representation, there are currently no applications for older persons housing (C3 use) pending. It is also relevant to note that, in establishing if there were 'very special circumstances' to permit development in the Green Belt, the demand for extra care housing could be attributed substantial weight (West Malling appeal decision APP/A0665/W/18/3203413).

The NPPF (2019) encourages the need for housing for different groups to be reflected within planning policies. Whilst it is acknowledged that draft Policy H6 (Housing for Older People and People with Disabilities) confirms the requirement for the provision of homes for older people, in line with the requirements of the NPPF and taking into account recent approvals, the draft Local Plan would be more robust if the provision for retirement units was increased further via an explicit additional site allocations in the draft Plan. As currently drafted, therefore, we conclude that the Regulation 19 Local Plan is unsound although this could be remedied through the allocation of the Golf Course site.

c) Public Benefits

The site is considered to be underused. A number of public benefits would arise from the proposed development on site. The proposed community facilities and cricket pitch/leisure facilities will provide the local community with modern community facilities and access to new public open space. The proposed layout of the site will also provide improved access to the ancient woodland, improving the accessibility of this natural asset to the local community. Additionally, as aforementioned, it is proposed that the cricket pavilion and pitch will replace the existing facilities on Rusthall Common and therefore the land at Rusthall Common would be returned to common land. This would result in the common being accessible to the public and therefore provide a significant public benefit to the local community.

Furthermore, the proposed cricket pitch and ancient forest could be designated as village green land to protect against future development of the land. This would ensure that the land is protected for community use, providing a direct public benefit of any development on site. Pegasus' Green Belt Assessment concludes that the potential harm to the Green Belt in this case is clearly outweighed by other considerations including a clear housing need (including retirement units), the creation of infrastructure which would be a community benefit and the creation of a sustainable development proposal.

A full planning assessment of the site is outlined in section 9 of the enclosed Green Belt report. Our assessment concludes that at present there is a risk that the draft Local Plan will not be found sound due to an over reliance on large strategic allocations to meet the required housing need and the under provision of new homes to meet the assessed older persons housing need. The Tunbridge Wells Golf Course site is located in a sustainable location and would contribute to meeting the required housing need across the Borough.

Green Belt Impact

In determining that the site is suitable for limited release from the green belt, we have undertaken a detailed assessment of the key characteristics of the site and prepared an indicative masterplan that demonstrates how the development could provide limited infill sites that would not harm the overall function of the green belt in this location.

A Green Belt Assessment has been undertaken by Pegasus and should be reviewed in full as part of this representation. A summary of the assessment of the site and the proposed development's contribution to the Green Belt principles is assessed against the Borough's Green Belt Assessment within Section 7 of the Vision Document.

The Green Belt Assessment confirms that from a landscape and visual perspective, the site is located in a sustainable location contiguous with an existing residential neighbourhood. The site benefits from a considerable degree of physical and visual containment due to the surrounding mature tree cover and existing residential development and as such, development of the site is only likely to have a bearing upon views within the site itself, and not beyond the wider surrounding countryside. As a consequence, the sense of openness associated with the wider landscape would remain unchanged if the site were developed in line with the masterplan. Vehicular and pedestrian access linkages to the wider area and the adjacent residential neighbourhood could be effectively provided. From a landscape and visual perspective, the site is suitable for residential development as it can be effectively assimilated into the surrounding existing green infrastructure and wider environment.

The site benefits from an existing access point off the main road to the south. Beyond the site itself, the sense of visual and physical separation between the settlements of Rusthall and Tunbridge Wells would continue to remain in terms of the sense of openness associated with the existing Green Belt beyond the site. The visual amenity of the area which is designated as Green Belt would not be materially adversely affected by the proposed development as it would be substantially screened from wider views by the existing and proposed topography, together with tree cover. It is considered that the proposal would not harm the openness of the Green Belt accordingly.

The assessment therefore concludes that having analysed the proposals it is considered that the proposal would not conflict with either the Framework (NPPF) in that it would not harm the openness of the Green Belt nor harm the purposes of the designation.

Transport and Road Safety

Sweco has prepared an Access and Trip Technical Note which has been used to inform the amendments to the proposed masterplan.

As outlined on the illustrative masterplan, the proposals will retain the existing site access to Langton Road. As existing, this access has reduced visibility to the east along Langton Road. As shown on the Main Site Access Arrangement drawing in Appendix B of the Technical Note, improvements can be made to this access and it is advised that the proposals include the provision of a more formal kerbed radii access junction with footways and improved visibility parameters to ensure suitable safe access arrangements to the site. The suggested access upgrades have been incorporated into the illustrative masterplan layout to provide safe access to the site.

In addition to re-using the existing site access to Langton Road there are potential pedestrian/cycle access points to the surrounding area some of which could be utilised as an emergency access.

The Technical Note also assessed the sustainability of the site and outlined that the site is accessible by sustainable modes of transport other than the private car. Frequent bus services are available from stops less than 100m from the existing and proposed site accesses with Tunbridge Wells Railway Station located an 18 minute walk to the east of the Site.

The Technical Note outlines that when taking into account the permitted use of the Site the net increase in traffic of the proposals will equate, on average, to about 2 additional vehicle movements every 3 minutes during the peak hours. This is based on a proposed housing scheme that does not include retirement units. It is important to note that inclusion of any retirement dwelling in the proposals will reduce the peak hour vehicle movements. The proposals are therefore considered to be acceptable in terms of trip generation.

The Access and Trip Technical Note concludes that the site could support development with appropriate mitigation without affecting highway safety or capacity and promote travel by sustainable modes. The masterplan has been designed, in line with the safety advice set out within the note and now proposes a safe site entrance via onto Langton Road. The masterplan therefore aligns with the requirements of draft Local Plan Policy TP2 (Transport Design and Accessibility).

Flooding and Drainage

The Flood and Drainage Technical Note, prepared by Logika, concludes that the proposed masterplan takes into account the potential flood risk on the Site associated with the on-Site watercourse. The pluvial flood maps have been considered to ensure the masterplan is designed robustly with all development located outside of the 1 in 1000 year flood extent. Easements are provided to ensure that the watercourse is protected, and a highly sustainable drainage strategy will be incorporated into the detailed design of the scheme. The masterplan therefore aligns with the requirements of draft Local Plan Policy EN25 (Flood Risk).

Ecology

Eight Associates prepared an Ecology Scoping Note to support the proposed representation and draft masterplan for the site. The Scoping Note confirms that the site is located within a SSSI Impact Zone. The proposed development does not, however, fall into any of the at-risk categories for this SSSI Impact Zone.

The site is bounded by stretches of woodland to the north, east and west, with residential properties bounding the remaining areas. Parcels of wood pasture and parkland Biodiversity Action Plan (BAP). Priority Habitat, ancient woodland and deciduous woodland are present within 500m of the site and extend inside the site boundary, acting as an ecological corridor to green space and designated sites within the wider local area. The proposed illustrative masterplan layout has, however, been designed to protect the parcel of Ancient Woodland within the site boundary and to seek to limit the loss of trees which are important in the landscape or as natural habitats, or historically.

The site is located within a Natural England network enhancement zone, which seek to connect existing patches of primary habitat, with land that is likely to be suitable for the creation of primary habitat, such as the site. The Ecology Scoping Note recognises that this has been considered as part of the amended masterplan design, incorporating a landscape framework of green corridors with retained trees and water courses will provide a significant boost to public open space in Tunbridge Wells.

The Ecology Scoping Note identifies that the proposals include green corridors of public open space that will provide setting for the new development, accommodate SuDs and provide a resource for the new and existing communities as well as promoting ecology. Therefore there is an opportunity for the development to enhance the ecology of the site in line with draft Local Plan Policy STR 8 (Conserving and Enhancing the Natural, Built and Historic Environment).

Conclusions

The required amendment to the Green Belt boundary, as set out in this representation, is considered justifiable in order to meet the Borough's need for retirement and market/affordable housing. Draft Policy H6 requires proposals for residential care homes and retirement living properties to be located in accessible locations. The site is located in a sustainable location on the edge of Tunbridge Wells, approximately 1 mile from the town centre, 0.7 miles from the Pantiles shopping centre and 0.9 miles from the station. The site is adjacent to the Rusthall Road bus stop, providing a regular service to both the town centre and the Pantiles. The site is also in an accessible location and is therefore considered suitable for retirement units.

Previous concerns regarding the safety of the proposed Langton Road junction have been addressed in the masterplan, in line with the junction improvement advice set out in Sweco's Access and Trip Technical Note. As such, it has been determined that the site could support development without affecting highway safety or capacity and promote travel by sustainable modes.

Through architectural design and layout it is considered that any potential impact on the historic character of the Tunbridge Wells Conservation Area can be mitigated and the heritage asset can be preserved and enhanced.

As outlined in the representation, the Local Plan as drafted is overly reliant on large strategic sites to deliver housing. Due to the scale of such proposals and the requirement for the delivery of enabling infrastructure works, it is likely that delays in delivery will be incurred. Therefore, it is unlikely that all the new homes required will be delivered across the plan period within the required five year period, resulting in a shortfall of housing provision.

In order to ensure that the Council can deliver the required housing need across the plan period, we strongly recommend that sufficient numbers of small and medium sites are allocated for development in the short term, including the Golf Course site. This will help to provide variety and also aid with the provision of smaller sites that do not rely so heavily on the need for new infrastructure or funding to unlock delivery and meet the shortfall in allocated sites. This approach would also allow the Plan to be found sound.

Regarding potential impact on the Green Belt, the supporting Green Belt Assessment has demonstrated that the proposals are not considered to conflict with either the NPPF as the proposals would not harm the openness of the Green Belt nor harm the purposes of the designation. The proposed country park, cricket pavilion and grounds, or leisure facilities, will incorporate public open space and a significant public benefit to the local community that can only be facilitated through the minor amendment of the Green Belt boundary and the proposed allocation of the site.

In summary, the site presents an opportunity for the development of an accessible site for the provision of much needed retirement housing within the Borough. The site's ability to contribute to the provision of housing for older people, alongside the site's contribution to the Borough's general housing need and provision of community facilities is considered to justify the limited amendment of the site's Green Belt boundaries via the Local Plan process.

This representation has, therefore, demonstrated that there are exceptional circumstances for amending the Green Belt boundary and allocating the site for development of up to 100 residential units (including market, affordable and retirement units).

Proposed Amendments to the Draft Local Plan

To ensure that the Local Plan can be found sound at examination, we urge the Council to allocate the site at Tunbridge Wells Golf Course, for older persons housing and standard housing together with public open space, to ensure that the housing need across the Borough can be met and delivered within the plan period. Below is our suggest text for a site allocation policy for the Golf Course site:

'Policy AL/RU 2 Tunbridge Wells Golf Course, Langton Road

The site, as defined on figure xxx, is allocated for residential (C3 development) up to 100 dwellings (mix of affordable, market and retirement units), public open space, leisure and community facilities.

Development on the site shall accord with the following requirements:

- 1. Vehicular access shall be taken from the existing accesses onto Langton Road (see Criterion 2 of Policy EN 1: Sustainable Design);***
- 2. Pedestrian linkages shall be provided into wider network (see Policy TP 2: Transport Design and Accessibility);***
- 3. Proposals should conserve and enhance the Conservation Area (see Policy EN 5: Heritage Assets);***
- 4. Improvements to existing allotments, amenity/natural green space, parks and recreation grounds, children's play space and youth play space in accordance with the requirements of Policy OSSR 2: Provision of publicly accessible open space and recreation. It is expected that***

contributions will be required towards the following if necessary, to mitigate the impact of the development:

- a. Improvements to public realm;**
- b. Any other highway related works;**
- c. Improvements to bus services’.**

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS LOCAL PLAN REGULATION 19 PRE-SUBMISSION CONSULTATION - REPRESENTATIONS ON BEHALF OF TARMAC TRADING LIMITED

We are writing on behalf of Tarmac Trading Limited (Tarmac) with regard to their land interest north west of Paddock Wood. The purpose of this letter is to outline the availability and suitability of the site for consideration by the Borough Council and local developers in securing potential offsetting/off site biodiversity net gain contributions in coordination with nearby land which is proposed to accommodate strategic growth as set out within the emerging Local Plan.

We would also like to comment on the consistency of proposed policy EN 9 against the National Planning Policy Framework (NPPF) in relation to the locational hierarchy for biodiversity net gain.

Background

The site lies to the north west of Paddock Wood within the wider extent of Stonecastle Farm Quarry, an existing sharp sand and gravel quarry which straddles the administrative boundaries of Tonbridge and Malling and Tunbridge Wells.

Tarmac's freehold land interests in this area extend to ca. 80 hectares (Ha); a map showing the extent of Tarmac's freehold interest is enclosed at Appendix 1. The wider extent of Tarmac's freehold interest contains operational areas associated with Stonecastle Farm Quarry plant site. The operational areas are illustrated on drawing reference SC/003/A enclosed at Appendix 2. These areas are to be retained in operational use over the plan period of the Tunbridge Wells Pre-submission Local Plan (the 'Plan').

The site subject of this letter is promoted to highlight its potential for biodiversity net gain contributions. The site extends 22 Ha across the north east of the freehold interest. It includes Ancient Woodland (1.8 Ha) and National Forest (5.9 Ha) with designated Priority Habitats (7 Ha) and bare ground surrounding three former silt lagoons.

The site hereby promoted is shown at Appendix 3.

[TWBC: for appendices, please see supporting documents]

Policy and Legislation

The Plan sets out the overarching development strategy for the Borough covering the period between 2020 and 2038. One of the key challenges identified in the Plan is meeting the housing needs of the Borough, which has been assessed in line with national policy using the standard methodology at approximately 678 per annum, equivalent to 12,200 additional homes over the Plan period as a minimum.

Combined, the designated High Weald AONB and Metropolitan Green Belt cover approximately 75% of the Borough. These designations are instrumental in determining the development strategy and location of future growth within the Borough. There is an identified need to deliver a minimum of 12,200 additional homes over the Plan period

The Plan sets out two strategic growth areas which comprise a strategic extension to Paddock Wood including east Capel (Policy STR/SS 1) and a garden village at Tudeley (Policy STR/SS 3). Paddock Wood strategic growth area is located on existing agricultural land and woodland and is facilitated through the release of ca. 150 Ha of Green Belt land. The proposed extension to Paddock Wood comprises 3,490-3,590 new dwellings, considerable employment use, and associated education, leisure, retail, and health facilities and is to be delivered using garden settlement principles.

Policy STR/SS 1 (The strategy for Paddock Wood, including land at east Capel) requires certain environmental enhancements to offset the overall impact of development in that location. These include:

- . Creation of a Paddock Wood 'Wetland Park' to the north of the western parcel to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks;
- . For development on land to the west, to provide compensatory improvements to the Green Belt; and
- . Provide a scheme for the management and funding for green spaces and green infrastructure for each parcel of land, for both amenity and biodiversity for the lifetime of the development.

The Plan also introduces a requirement for all development to contribute towards delivering net gains for nature, in accordance with the emerging Environmental Bill. The Environmental Bill will, through various mechanisms, provide a new framework for improving the natural environment. The 'biodiversity gain objective' set out in Part 6 (supporting Schedule 14) is one of these mechanisms, whereby the biodiversity attributable to developments covered by the Town & Country Planning Act (1990) will be required to exceed the pre-development biodiversity value of the 'onsite habitat' by at least 10%, which is defined as the habitat on the land to which the planning permission relates.

Strategic Objective 8 of the Plan seeks to 'conserve and enhance the natural environment' and achieve 'net gains for nature'. Biodiversity compensation will be achieved, if required, through a combination of on-site provision, off-site contribution or through purchasing biodiversity credits. Part 6 (supporting Schedule 14) section 93 sets out the 'Biodiversity gain site register' which will be used by Local Planning Authorities (LPAs) when off-site biodiversity compensation is required. The Government register will set out compensation receptor sites to be used by developers and the LPA to achieve biodiversity net gains through development.

Proposed Policy EN 9 of the Plan (Biodiversity Net Gain) sets out the criteria for development to achieve biodiversity net gain. All major development (10 dwellings plus, 1,000 sqm plus of floorspace, new build, or conversion or outline proposals capable of accommodating either) is required to provide mitigation, compensation, and enhancement measures for biodiversity on or adjacent to the development site.

The National Planning Policy Framework (NPPF) is the overarching planning policy guide for England and provides guidance on the principles required when determining planning applications. Paragraph 175 (a) states that 'if significant harm to biodiversity resulting from a development cannot be avoided..., adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused'.

Sustainable development is achieved by balancing economic, social and environmental objectives (NPPF Para. 8). In order to achieve the levels of housing and economic growth anticipated over the plan period, it is important to ensure that planning policies provide adequate flexibility to ensure that development is achievable. It is preferable to provide biodiversity offsetting in proximity to the development site, however, the overall objective is to achieve a net gain in biodiversity within the LPA.

Part 1 (a) of proposed Policy EN 9 states that the location and type of net gain shall be provided in accordance with 'the supporting text or as otherwise required by supplementary planning guidance'. Paragraph 6.135 of the supporting text to proposed Policy EN 9 states that, for major development, off-site proposals will only be considered in 'exceptional circumstances' and in the interests of biodiversity. We do not consider that the requirement for 'exceptional circumstances' is consistent with the approach at paragraph 175 (a) of the NPPF.

The approved Defra Biodiversity Metric (2019) used to calculate biodiversity net gain has an in-built locational hierarchy whereby if habitat creation, enhancement and accelerated succession is undertaken off-site, an additional spatial risk multiplier is applied. The offsite risk multiplier seeks to ensure that compensation habitat is provided locally to where biodiversity losses occur. Where off-site compensation is local, within the local planning authority area (LPA) or the same National Character Area (NCA), it is considered acceptable and no off-site risk multiplier is applied.

We are supportive of providing compensation habitat locally within the LPA/NCA.

Key Opportunity for Net Gain at Stonecastle Farm

As previously set out, the site comprises ca. 22 Ha and includes an area of Ancient Woodland and National Forest with Priority (Deciduous Woodland) and bare ground surrounding three former silt lagoons. The bare ground at present has low value for biodiversity.

The site falls within an area identified for Network Enhancement (Zone 2) which is defined by Natural England as "land connecting existing patches of primary and associated habitats which is less likely to be suitable for creation of the primary habitat. Action in this zone that improves the biodiversity value through land management changes and/or green infrastructure provision can be targeted here." 1 (emphasis added)

The site is located 500 m north of the village of Whetsted and ca. 1.5 km north west of the existing settlement of Paddock Wood. The A228 Whetsted Road separates the site from the settlement of Paddock Wood. The A228 Whetsted Road will form the new western settlement boundary of Paddock Wood taking into consideration the strategic growth site STR/SS 1. Therefore, the site will be located less than 500 m from the new settlement boundary of Paddock Wood. The site is therefore in close proximity and can, if required, accommodate biodiversity enhancement to offset potential biodiversity losses as a result of the proposed strategic-scale development at Paddock Wood, or indeed anywhere else within the Borough.

The site is located within the Metropolitan Green Belt and contains areas of Ancient Woodland and Priority Habitats which are protected under proposed policies STR 9 (Green Belt), EN10 (Protection of designated sites and Habitats), and EN13 (Ancient Woodland and Veteran Trees). The safeguarded areas are illustrated on Inset Map 4 of the Plan (Paddock Wood). Proposed policy STR 9 (Green Belt) supports improvements to the environmental quality and accessibility of the Green Belt through developer contributions.

Tarmac hereby seeks to promote the site for biodiversity offsetting in accordance with the emerging Environment Bill and planning policies set out above. Promotion of the site for biodiversity enhancement is considered to support the environmental objectives of the emerging Plan and assist in the sustainable development of strategic growth site STR/SS 1. Off-site biodiversity offsetting is the least favoured mechanism to achieve net gains through development. However, given the proximity of the strategic growth site (STR/SS 1) to our client's land, it is considered that the biodiversity offsetting in this location is supported through proposed policy EN 9 (Biodiversity net gain).

The proposed restoration strategy demonstrates the ability of the site to achieve a high-quality scheme that provides a wide range of habitats to support biodiversity gains. The size of the site provides further opportunities to establish a wide variety of environmental improvements on the wider scale through off-site compensatory measures.

One of the two key locations for sustainable growth within the Plan is proposed in close proximity to the site as an extension to Paddock Wood (Policy STR/SS 1). Development of the site is governed by various environmental parameters including requirement for a Paddock Wood 'Wetland Park', compensatory improvements to the Green Belt and a scheme for the management and funding for green spaces and green infrastructure. Furthermore, proposed policy EN 9 requires all major development to provide mitigation, compensation, and enhancement measures for biodiversity on or adjacent to the development site with off-site proposals considered in exceptional circumstances.

In addition to proposed strategic growth at Paddock Wood, there are a number of consented development sites at Mascalls (476 houses), Church Farm (300 houses) and Residential and Secondary Expansion site (350 houses). Development coming forward on these sites, in combination with the strategic growth sites at Paddock Wood and Tudeley, strengthens the need to provide mitigation, compensation, and enhancement measures for biodiversity on or in close proximity to these development sites.

Our client's land is available, well related to the proposed strategic growth site west of Paddock Wood and extends across a large area of designated Green Belt land where improvements to environmental quality are highly supported through the Plan.

Concluding Remarks

We would welcome consideration by the Council of the potential for our client's land north west of Paddock Wood to be used as a site for potential biodiversity offsetting to enhance biodiversity within the Borough, in line with the contents of the emerging Plan and the approach set out in the Environment Bill. The strategic location of our client's landholding in close proximity to the strategic growth site surrounding Paddock Wood strongly supports use of the site for off-site biodiversity compensation.

We would be delighted to discuss a holistic future development strategy for the site which mutually supports the Council's growth aspirations for Paddock Wood, east Capel, and Tudeley, as well as the environmental gains required through emerging legislation and planning policy.

We would also like to highlight the in-consistency of proposed Policy EN 9 against the NPPF in relation to biodiversity net gain and the potential limitations this places on achieving the required levels of development.

We trust that these representations are of benefit to the Council in refining the emerging Local Plan and its associated evidence base. Should any matters require clarification we would be delighted to assist. Likewise, we look forward to further discussions to explore the timely delivery of compensatory environmental uses at the site.

TUNBRIDGE WELLS LOCAL PLAN REGULATION 19 PRE-SUBMISSION CONSULTATION - REPRESENTATIONS ON BEHALF OF TARMAC TRADING LIMITED

We are writing on behalf of Tarmac Trading Limited (Tarmac) with regard to their land interest north west of Paddock Wood. The purpose of this letter is to outline the availability and suitability of the site for consideration by the Borough Council and local developers in securing potential offsetting/off site biodiversity net gain contributions in coordination with nearby land which is proposed to accommodate strategic growth as set out within the emerging Local Plan.

We would also like to comment on the consistency of proposed policy EN 9 against the National Planning Policy Framework (NPPF) in relation to the locational hierarchy for biodiversity net gain.

Background

The site lies to the north west of Paddock Wood within the wider extent of Stonecastle Farm Quarry, an existing sharp sand and gravel quarry which straddles the administrative boundaries of Tonbridge and Malling and Tunbridge Wells.

Tarmac's freehold land interests in this area extend to ca. 80 hectares (Ha); a map showing the extent of Tarmac's freehold interest is enclosed at Appendix 1. The wider extent of Tarmac's freehold interest contains operational areas associated with Stonecastle Farm Quarry plant site. The operational areas are illustrated on drawing reference SC/003/A enclosed at Appendix 2. These areas are to be retained in operational use over the plan period of the Tunbridge Wells Pre-submission Local Plan (the 'Plan').

The site subject of this letter is promoted to highlight its potential for biodiversity net gain contributions. The site extends 22 Ha across the north east of the freehold interest. It includes Ancient Woodland (1.8 Ha) and National Forest (5.9 Ha) with designated Priority Habitats (7 Ha) and bare ground surrounding three former silt lagoons.

The site hereby promoted is shown at Appendix 3.

[TWBC: for appendices, please see supporting documents]

Policy and Legislation

The Plan sets out the overarching development strategy for the Borough covering the period between 2020 and 2038. One of the key challenges identified in the Plan is meeting the housing needs of the Borough, which has been assessed in line with national policy using the standard methodology at approximately 678 per annum, equivalent to 12,200 additional homes over the Plan period as a minimum.

Combined, the designated High Weald AONB and Metropolitan Green Belt cover approximately 75% of the Borough. These designations are instrumental in determining the development strategy and location of future growth within the Borough. There is an identified need to deliver a minimum of 12,200 additional homes over the Plan period

The Plan sets out two strategic growth areas which comprise a strategic extension to Paddock Wood including east Capel (Policy STR/SS 1) and a garden village at Tudeley (Policy STR/SS 3). Paddock Wood strategic growth area is located on existing agricultural land and woodland and is facilitated through the release of ca. 150 Ha of Green Belt land. The proposed extension to Paddock Wood comprises 3,490-3,590 new dwellings, considerable employment use, and associated education, leisure, retail, and health facilities and is to be delivered using garden settlement principles.

Policy STR/SS 1 (The strategy for Paddock Wood, including land at east Capel) requires certain environmental enhancements to offset the overall impact of development in that location. These include:

- . Creation of a Paddock Wood 'Wetland Park' to the north of the western parcel to deliver flood water attenuation and new wetland habitat, and allowing for informal recreation via a network of footpaths and boardwalks;
- . For development on land to the west, to provide compensatory improvements to the Green Belt; and
- . Provide a scheme for the management and funding for green spaces and green infrastructure for each parcel of land, for both amenity and biodiversity for the lifetime of the development.

The Plan also introduces a requirement for all development to contribute towards delivering net gains for nature, in accordance with the emerging Environmental Bill. The Environmental Bill will, through various mechanisms, provide a new framework for improving the natural environment. The 'biodiversity gain objective' set out in Part 6 (supporting Schedule 14) is one of these mechanisms, whereby the biodiversity attributable to developments covered by the Town & Country Planning Act (1990) will be required to exceed the pre-development biodiversity value of the 'onsite habitat' by at least 10%, which is defined as the habitat on the land to which the planning permission relates.

Strategic Objective 8 of the Plan seeks to 'conserve and enhance the natural environment' and achieve 'net gains for nature'. Biodiversity compensation will be achieved, if required, through a combination of on-site provision, off-site contribution or through purchasing biodiversity credits. Part 6 (supporting Schedule 14) section 93 sets out the 'Biodiversity gain site register' which will be used by Local Planning Authorities (LPAs) when off-site biodiversity compensation is required. The Government register will set out compensation receptor sites to be used by developers and the LPA to achieve biodiversity net gains through development.

Proposed Policy EN 9 of the Plan (Biodiversity Net Gain) sets out the criteria for development to achieve biodiversity net gain. All major development (10 dwellings plus, 1,000 sqm plus of floorspace, new build, or conversion or outline proposals capable of accommodating either) is required to provide mitigation, compensation, and enhancement measures for biodiversity on or adjacent to the development site.

The National Planning Policy Framework (NPPF) is the overarching planning policy guide for England and provides guidance on the principles required when determining planning applications. Paragraph 175 (a) states that 'if significant harm to biodiversity resulting from a development cannot be avoided..., adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused'.

Sustainable development is achieved by balancing economic, social and environmental objectives (NPPF Para. 8). In order to achieve the levels of housing and economic growth anticipated over the plan period, it is important to ensure that planning policies provide adequate flexibility to ensure that development is achievable. It is preferable to provide biodiversity offsetting in proximity to the development site, however, the overall objective is to achieve a net gain in biodiversity within the LPA.

Part 1 (a) of proposed Policy EN 9 states that the location and type of net gain shall be provided in accordance with 'the supporting text or as otherwise required by supplementary planning guidance'. Paragraph 6.135 of the supporting text to proposed Policy EN 9 states that, for major development, off-site proposals will only be considered in 'exceptional circumstances' and in the interests of biodiversity. We do not consider that the requirement for 'exceptional circumstances' is consistent with the approach at paragraph 175 (a) of the NPPF.

The approved Defra Biodiversity Metric (2019) used to calculate biodiversity net gain has an in-built locational hierarchy whereby if habitat creation, enhancement and accelerated succession is undertaken off-site, an additional spatial risk multiplier is applied. The offsite risk multiplier seeks to ensure that compensation habitat is provided locally to where biodiversity losses occur. Where off-site compensation is local, within the local planning authority area (LPA) or the same National Character Area (NCA), it is considered acceptable and no off-site risk multiplier is applied.

We are supportive of providing compensation habitat locally within the LPA/NCA.

Key Opportunity for Net Gain at Stonecastle Farm

As previously set out, the site comprises ca. 22 Ha and includes an area of Ancient Woodland and National Forest with Priority (Deciduous Woodland) and bare ground surrounding three former silt lagoons. The bare ground at present has low value for biodiversity.

The site falls within an area identified for Network Enhancement (Zone 2) which is defined by Natural England as "land connecting existing patches of primary and associated habitats which is less likely to be suitable for creation of the primary habitat. Action in this zone that improves the biodiversity value through land management changes and/or green infrastructure provision can be targeted here." 1 (emphasis added)

The site is located 500 m north of the village of Whetsted and ca. 1.5 km north west of the existing settlement of Paddock Wood. The A228 Whetsted Road separates the site from the settlement of Paddock Wood. The A228 Whetsted Road will form the new western settlement boundary of Paddock Wood taking into consideration the strategic growth site STR/SS 1. Therefore, the site will be located less than 500 m from the new settlement boundary of Paddock Wood. The site is therefore in close proximity and can, if required, accommodate biodiversity enhancement to offset potential biodiversity losses as a result of the proposed strategic-scale development at Paddock Wood, or indeed anywhere else within the Borough.

The site is located within the Metropolitan Green Belt and contains areas of Ancient Woodland and Priority Habitats which are protected under proposed policies STR 9 (Green Belt), EN10 (Protection of designated sites and Habitats), and EN13 (Ancient Woodland and Veteran Trees). The safeguarded areas are illustrated on Inset Map 4 of the Plan (Paddock Wood). Proposed policy STR 9 (Green Belt) supports improvements to the environmental quality and accessibility of the Green Belt through developer contributions.

Tarmac hereby seeks to promote the site for biodiversity offsetting in accordance with the emerging Environment Bill and planning policies set out above. Promotion of the site for biodiversity enhancement is considered to support the environmental objectives of the emerging Plan and assist in the sustainable development of strategic growth site STR/SS 1. Off-site biodiversity offsetting is the least favoured mechanism to achieve net gains through development. However, given the proximity of the strategic growth site (STR/SS 1) to our client's land, it is considered that the biodiversity offsetting in this location is supported through proposed policy EN 9 (Biodiversity net gain).

The proposed restoration strategy demonstrates the ability of the site to achieve a high-quality scheme that provides a wide range of habitats to support biodiversity gains. The size of the site provides further opportunities to establish a wide variety of environmental improvements on the wider scale through off-site compensatory measures.

One of the two key locations for sustainable growth within the Plan is proposed in close proximity to the site as an extension to Paddock Wood (Policy STR/SS 1). Development of the site is governed by various environmental parameters including requirement for a Paddock Wood 'Wetland Park', compensatory improvements to the Green Belt and a scheme for the management and funding for green spaces and green infrastructure. Furthermore, proposed policy EN 9 requires all major development to provide mitigation, compensation, and enhancement measures for biodiversity on or adjacent to the development site with off-site proposals considered in exceptional circumstances.

In addition to proposed strategic growth at Paddock Wood, there are a number of consented development sites at Mascalls (476 houses), Church Farm (300 houses) and Residential and Secondary Expansion site (350 houses). Development coming forward on these sites, in combination with the strategic growth sites at Paddock Wood and Tudeley, strengthens the need to provide mitigation, compensation, and enhancement measures for biodiversity on or in close proximity to these development sites.

Our client's land is available, well related to the proposed strategic growth site west of Paddock Wood and extends across a large area of designated Green Belt land where improvements to environmental quality are highly supported through the Plan.

Concluding Remarks

We would welcome consideration by the Council of the potential for our client's land north west of Paddock Wood to be used as a site for potential biodiversity offsetting to enhance biodiversity within the Borough, in line with the contents of the emerging Plan and the approach set out in the Environment Bill. The strategic location of our client's landholding in close proximity to the strategic growth site surrounding Paddock Wood strongly supports use of the site for off-site biodiversity compensation.

We would be delighted to discuss a holistic future development strategy for the site which mutually supports the Council's growth aspirations for Paddock Wood, east Capel, and Tudeley, as well as the environmental gains required through emerging legislation and planning policy.

We would also like to highlight the in-consistency of proposed Policy EN 9 against the NPPF in relation to biodiversity net gain and the potential limitations this places on achieving the required levels of development.

We trust that these representations are of benefit to the Council in refining the emerging Local Plan and its associated evidence base. Should any matters require clarification we would be delighted to assist. Likewise, we look forward to further discussions to explore the timely delivery of compensatory environmental uses at the site.

Question 1	
Respondent's Name and/or Organisation	Peter Tate
Question 3	
To which part of the Local Plan does this representation relate?	Policy
Question 3a	

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR/SS 3 The Strategy for Tudeley Village

Paragraph No(s) 5.199 to 5.229

Policies Map (Inset Map No(s)) 31, 32, 33, 34

Question 4

Do you consider that the Local Plan:

Is legally compliant	No
Is sound	No
Complies with the Duty to Cooperate	No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

- . It is not positively prepared
- . It is not effective
- . It is not justified

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

Legally compliant. Little community involvement, if there was the plan would not go ahead as nobody wants it!

Sustainability: "To meet the needs of the present without compromising the ability of future generations to meet their own needs". This is not true as there will be considerable loss of open country, location dictates car usage which will generate considerable on-going traffic congestion and poorer air quality than currently exists, rail transport overcrowding, inadequate rail car parking at Tonbridge and Paddock Wood, inadequate water treatment facilities and water supply. Development will last for years affecting a large area from lorry movements and congestion, exhaust fumes and noise, This is all apart from the unsustainability of the manufacture of millions of bricks, blocks, roof tiles, thousands of tons of concrete and numerous other building materials.

Sound. Not positively prepared in conjunction with neighbouring authorities. No cross boundary working. Not consistent as it's not sustainable.

No duty of co-operation as little or no consultation with neighbouring authorities.

Question 6

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at Question 5 above. (Please note that non-compliance with the duty to cooperate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The whole site could be re-located elsewhere where there is better transport links e.g. the area around North Farm which is already being developed. It is closer to Tunbridge Wells has easy access to the

A21 has a large choice of shops (and therefore employment) and has local leisure facilities. There is less or no impact on neighbouring authorities therefore less need for cross boundary working.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)?

No, I do not wish to participate in examination hearing session(s)

Question 8

If you have any separate comments you wish to make on the accompanying Sustainability Appraisal, please make them here.

Refer to 5 above.

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box:

Yes, I wish to be notified of future stages of the Local Plan

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Legal Compliance and Duty to Co-Operate

Sustainability Appraisal (TWBC, February 2021)

Table 12. Updated growth strategy options for the Local Plan considered by this SA.

This table summarises the reasonable alternative options TWBC have tested through the SA process to arrive at, '*an appropriate strategy.....based on proportionate evidence;*' (Paragraph 35, NPPF). Option 11 seeks to assess the implications for accommodating uncapped local housing need and the unmet needs from Sevenoaks District. The latter is acknowledged to be in the order of 1900 homes. However, rather than exploring the most sustainable options to distribute this additional growth, including to the main towns and large villages, TWBC assess a distribution consistent only with Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan. At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this as a reasonable alternative. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged

unmet needs for housing in the area (see our comments on the Duty to Cooperate Statement below). Our client contends that distributing unmet needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as an 'appropriate strategy'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution that more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils 'Settlement Role and Function Study' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken '*into account the reasonable alternatives*', contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be 'reasonable'. In its current form therefore the Local Plan is not in our view legally compliant. The SA and Local Plan should be updated to address such matters, with an additional round of consultation held prior to its formal submission.

As we outline in our comments on the Duty to Cooperate Statement (TMBC, 2021), there are additional unmet needs that TWBC arguably ought to have accounted for in the reasonable alternatives, tested through the SA process. For example, in the SHMA the Council commissioned as far back as 2015, GL Hearn advised Sevenoaks and Tunbridge Wells Councils '*to engage with the Greater London Authority and London Boroughs in respect of any unmet needs arising from London.*' (Paragraph 2.72, Sevenoaks & Tunbridge Wells SHMA, GL Hearn, 2015). No mention is made to this in any of the reasonable alternatives tested through the SA process.

As we outline in our comments to Policy STR1, in addition to the unmet needs of adjoining LPAs, there are equally compelling grounds to test higher housing requirements as reasonable alternatives to SA Option 13. Firstly to help address affordable housing needs that are evidently not being met by the proposed PSLP housing requirement; and secondly to build in further contingency into the boroughs housing land supply to ensure a continuous supply of housing is delivered, particularly in the first five years of the plan period. We contend the delivery expectations for the two proposed strategic site allocations, which between them account for between 67-69% of new allocations proposed in the Local Plan, are wholly unrealistic and contrary to the evidence we reference. Additional allocations capable of being delivered within the first five years of the plan period are therefore strongly recommended to ensure the plan is both positively prepared and effective.

We suggest that TWBC revisits the SA process to objectively assess reasonable alternatives to meet such needs, including around more sustainable settlements such as Cranbrook. In this respect, we note at Table 53 of the SA, that SHELAA Ref: 25 is listed as a 'reasonable alternative site' at Cranbrook.

Table 53. List of reasonable alternative sites in Cranbrook and Sissinghurst Parish

If one compares the assessment of Site 25 at SA Appendix J (Page 317) with the assessments of the proposed allocation sites at Table 54 (SA Page 153), it is evident that Site 25 outperforms 4 of the 7 allocations proposed. The commentary provided at Table 54 states that, '*where sites were not allocated but had a better range of scores than the allocated sites, there were frequently reasons outside of the SA remit to consider for example highway problems, access issues or deliverability concerns within the plan period e.g. site 409. (our emphasis)*

Further commentary can be found in Appendix J.'

However, if one examines and compares the individual site assessments in SA Appendix J, the grounds for exclusion of Site 25 in favour of others is even less evident. No mention is made in the summary of Site 25 to any 'highway problems, access issues or deliverability concerns' (our emphasis) that would lead one to conclude that Site 25 is not suitable, or performed worse than those proposed for allocation and listed above. Indeed, as is evident at Figure 14 (Page 152) of the SA, and from site visits, Site 25 is well contained, is partially within the built up area and is well located to reduce the need to travel. Yet, as we elaborate on below, the accompanying SHELAA (TWBC, Jan 2021) has since added references to highway matters to justify the exclusion of this site without citing evidence or grounds to substantiate this.

As we highlight below, there are fundamental flaws and errors in the way TWBC have assessed SHELAA Site 25 as a reasonable alternative against others, particularly those proposed for allocation, through both the SA and SHELAA site selection process. This has led to the unjustified omission of Site 25 in our view. Rather than informing 'an appropriate strategy' for Cranbrook, the site selection process appears instead to have been designed with a pre-determined outcome in mind. This is even

more evident if one examines and compares the published SHELAA for 2019 and 2021, where factual errors, poorly evidenced statements and inconsistent assessments are noted. These are matters we have sought to highlight to TWBC throughout the drafting stages of the Local Plan; and as outlined below, in meetings with TWBC in February 2021.

In February 2021, our client met with Officers to discuss discrepancies and inconsistencies in the SA, SHELAA and site selection process at Cranbrook. Our firm conclusion was that Site 25 had been incorrectly categorised as unsuitable, particularly when assessed consistently with others that the LPA had classified as suitable.

This is particular evident if one compares the assessment of Site 25 at Appendix J of the SA (Feb 2021), with other sites selected as suitable in Table 54 of the SA. Site 25 performs better than 4 of the 7 sites selected. Site 25 represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and through pre-application engagement Kent County Council Highways have confirmed there to be no overriding highway access or capacity constraints to development (see Documents A and B). This is also supported by a Stage 1 Road Safety Audit undertaken by our client in respect of the proposed access. We therefore expressed surprise over why the Council had concluded Site 25 to be unsuitable. Moreover, why such a suitable and sustainable site had been overlooked in favour of less favourable options.

Officers confirmed in the meeting in February that they were in the process of updating the SHELAA (2019) prior to publication and would correct inconsistencies where necessary. One fundamental error Officers acknowledged needed updating, was the assertion the site did not have deliverable access via Frythe Way.

The comments we provided to the LPA in our email of 25th February (Document C) can be summarised as follows:

SHELAA (2019) – Site 25 Assessment Comments (By Sub-Header)

Potential Yield: The Council's assessment should be for 70 units, rather than the 85 units shown, as confirmed to Officers through site submissions to date.

Issues to consider:

Landscape Sensitivity Study (CR1):

The 'Landscape Sensitivity Assessment of additional settlements in Tunbridge Wells (LUC, 2018)' [LSS] included Site 25 within sub-area CR1 for assessment. This parcel as a whole was considered to comprise moderate – high sensitivity to small development scenarios; but importantly concluded at page 122 that the 'open field adjacent to Frythe Way is relatively well contained by tree cover and so has a more moderate level of sensitivity to development that is modest enough in scale to avoid appearing above tree lines.' (Our emphasis).

It is evident from comparing the LSS parcel assessments (p.119-153) that Parcel CR1, specifically the part comprising Site 25, was concluded to be less sensitive to development than most of the other parcels proposed for allocation. No evidence is provided by TWBC to demonstrate why, despite performing better than others, Site 25 should therefore be concluded to be unsuitable on landscape grounds.

Our client referenced their representations to the Regulation 18 consultation plan, which included our own landscape submission and a vision document for the site (see Documents A and D). These concluded there was a strong case for development, and supported a conclusion of suitability for such a modest well screened and urban influenced site.

Heritage – Cumulative impact on setting of Conservation area in context of other 20th/21st century development – further loss of rural setting:

Unlike many of the proposed allocation sites, which abut or are in close proximity to the Conservation Area, Site 25 is well screened and well beyond the area likely to impact on the setting of the Conservation Area. Also on a point of consistency, the 'cumulative impact' comment raised for Site 25, had not been raised in the SHELAA assessments for sites within the zone of influence of the Conservation Area (such as sites 396 and 430). This did not therefore in our view justify a conclusion that Site 25 was unsuitable.

Highway matters:

In the meeting of 25th February, Officers acknowledged that the properties in Frythe Way formed part of Site 25, and that an appropriate means of access could be achieved in principle. Our client also shared correspondence of a meeting with Kent County Council Highways (see Document B), confirming there were no overriding highway constraints to the sites delivery in principle. The site is close to and has good footpath access to Cranbrook High Street, significantly reducing the need to use the car for some journeys. Our client therefore reasonably expected this to be accounted for in the revisions to the SHELAA, including a revised conclusion of site suitability.

Sustainability Assessment:

The SA concluded the site scored largely neutral, with some benefit to housing, and negatively on land use and landscape impact informed by the loss of a greenfield site in the AONB, which lies adjacent to an historic settlement and route ways. In light of the fact Site 25 scores better in landscape terms than most of the sites proposed for allocation, which are more peripheral in sustainability terms, and within the zone of influence of the Conservation Area, it is difficult to understand why this comment hasn't been added to any of the other sites proposed for allocation. It highlights an inconsistency of approach to assessment first and foremost.

Reason:

It is important to note that the reasons the LPA cite for unsuitability are limited to two grounds. Firstly, landscape concerns, which we address and contend are unjustified and inconsistent with conclusions reached with more landscape sensitive sites in the SA.

Secondly, the Council conclude there is '*concern about the ability to provide an appropriate means of vehicular access to the site, which is likely to require access through adjacent site*' (our emphasis). This was a factual error conceded by Officers, as the site did have an appropriate means of access to Frythe Way.

Accordingly, our client reasonably expected to see the SHELAA (2019) updated with a revised conclusion of the site being suitable. This being a fair and consistent approach to assessment with other sites the LPA had concluded to be suitable.

SHELAA (Jan 2021)

On release of the final SHELAA (Jan 2021) our client was surprised to see the suitability conclusion for Site 25 had not been revised. Instead, Officers had revised and added alternative and additional reasons to support the original conclusion reached.

In the SHELAA (2019) Officers concluded the site did not have an appropriate means of vehicular access, which our clients had shown to be factually incorrect. Rather than omitting this, Officers have instead changed the wording to now add in that this is from '*the wider road network*', referencing impacts from increased traffic movements on junctions from the site into the centre of Cranbrook. No evidence has been presented to substantiate this in the transport assessments accompanying the plan, or elsewhere we can find. Neither does it align with the advice of Kent County Council Highways in their response to such matters (see Document B).

Importantly, this traffic impact comment has not been added to proposed allocation CRS4, which arguably has the potential for greater traffic impacts on the same set of junctions. It is unclear therefore why the Council have retrospectively sought to update their conclusion by adding yet further grounds against suitability, other than to avoid altering the conclusion reached to date on this site. Our client is keen to elaborate on the inconsistent approach the Council have taken to such site assessment and SA matters at the Examination into the subsequently submitted version of this plan.

In conclusion, we contend the SA as drafted is not legally compliant, as it does not allow one to conclude the Local Plan strategy is an appropriate one, having been based on objective assessments of reasonable alternatives. This includes reasonable alternatives to the quantum of growth proposed (including unmet needs from adjoining LPAs) and to those sites proposed around Cranbrook. We would recommend the SA is updated to include 'reasonable' alternatives, with amendments made to the plan following a further round of consultation. In this respect, we note at Table 53 of the SA, our client's site (SHELAA Ref: 25) is listed as a 'reasonable alternative site' at Cranbrook. We would respectfully request this site is reassessed and allocated as a logical, modest and suitable allocation for around 70 homes, located a short walk from the heart of Cranbrook. This will assist in meeting local needs for housing, including affordable housing, and contribute to the contingency we contend is

needed to ensure a continuous supply of land for housing is delivered, particularly in the first five years of the plan period (see comments in relation to Policy STR1).

Duty-to-Cooperate Statement (TWBC, 2021)

Paragraph 60 of NPPF confirms that, *'In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.'*

'Figure 1: Local housing market area (from SHMA)' of the Housing Needs Assessment Topic Paper (Paragraph 2.36, TWBC, February 2021) is based on the travel to work area data for Tunbridge Wells within the SHMA (GL Hearn, 2015). This illustrates a strong functional and travel to work relationship with London. As a consequence, GL Hearn advised Sevenoaks and Tunbridge Wells Councils as far back as 2015 *'to engage with the Greater London Authority and London Boroughs in respect of any unmet needs arising from London.'* (Paragraph 2.72, Sevenoaks & Tunbridge Wells SHMA, GL Hearn, 2015). Yet, at Section 4 of the Duty to Co-operate Statement (TWBC, 2021) no mention is made of efforts to understand what such unmet needs may be, or the implications this may have for adjoining LPAs and TWBC over the plan period. This context we argue is key to understanding the extent of pressure adjoining authorities are likely to face over the plan period to assist in meeting such needs.

The Secretary of State for Housing, Communities and Local Government is on record saying there is a significant level of unmet housing need across London that needs to be addressed. The Panel examining the London Plan recommended the overall requirement for many boroughs be reduced to a capacity led figure to account for deliverability over the requisite 10 year period. Whilst initially interceding, the SoS has allowed the Mayor to progress the London Plan to adoption as an interim or transitional action. In his letter to the Mayor of London dated 29 January 2021, the SoS stated that following publication of the Local Plan, *'I fully expect you to start working to dramatically increase the capital's housing delivery and to start considering how your next London Plan can bridge the significant gap between the housing it seeks to deliver and the actual acute housing need London faces. I would again ask you to work closely with those authorities that surround London to develop a strategy to help alleviate the housing pressure that is faced both inside and immediately outside the capital.'* (our emphasis)

The revised standard method for calculating housing need, published by the government in December 2020, confirmed the housing requirements for the London Boroughs. Prior to the publication of Tunbridge Wells Local Plan Regulation 19 Consultation therefore, it seems likely there was an awareness of a growing likelihood of such significant unmet needs across this area; something that has been well documented in the SoS Directions on the London Plan over the last 12 months. In the context of NPPF Paragraph 35 requirement to ensure plans are positively prepared, we therefore find it surprising the Council has not sought with its neighbours to better understand the implications for emerging Local Plans. The London Plan requirement has now been confirmed as an interim figure for the next five years only, and will rise significantly thereafter as a consequence. This will occur within the first five years of the TWBC Local Plan period, which emphasises the importance of preparing a positive plan to face into such issues proactively.

TWBC note at paragraph 4.18 Duty to Co-operate Statement (TWBC, 2021) that SDC have made a formal request for assistance, to help meet a shortfall of 1900 homes. As has been well rehearsed in the recent Inspector's Reports into the Local Plans for both Tonbridge & Malling and Sevenoaks Councils, an identified shortfall of various magnitudes has been known about since at least 2018. At Paragraph 4.19 of the Duty to Cooperate Statement (TWBC, 2021), TWBC outline steps they have taken to conclude they are unable to assist SDC. This can be summarised into two broad points. Firstly, that TWBC have tested options through the SA process to accommodate 1900 additional homes and found this to be unsustainable. Secondly, that SDC may be able to meet more of this unmet need themselves.

Turning to the first point. As we set out in our comments to the SA itself, rather than assessing a reasonable alternative option to distribute this additional growth in a sustainable manner, including to the main towns and large villages, TWBC assess a distribution consistent only with SA Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan. At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this option. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged unmet needs for housing in the area. Our client contends distributing unmet needs solely in line with Option 9 is not a reasonable

alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils 'Settlement Role and Function Study' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken '*into account the reasonable alternatives*', contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be 'reasonable'. Similarly, therefore, nor can the conclusion deduced from it that TWBC cannot assist SDC be relied upon. In its current form therefore the Local Plan is not in our view legally compliant in SA or Duty to Cooperate terms, as it has failed to test reasonable alternatives, and is not the product of constructive and ongoing engagement with SDC on options to assist meeting some or all of these needs.

Turning to the second point. It is clear that Sevenoaks district, arguably even more than TWBC, faces significant influence and housing need pressures from the London Boroughs. In the context of the scale of unmet needs evident in London, it is highly likely that SDC will be called upon themselves to explore even higher housing requirements to assist. The pressures on this area are not therefore likely to reduce, but are increasing, requiring adjoining authorities to work together to positively prepare emerging plans that face into such matters within the next five years.

The London Borough of Bexley (LBB), abutting the northern edge of Sevenoaks is just one example. Their draft Regulation 18 Local Plan in February 2019 noted they were planning for a target of 446 homes pa for 10 years. This has risen to 685pa in the confirmed London Plan, and will rise to 2404pa within the next five years once the transitional period ends. This is four times what is currently planned, and almost double the annual SHLAA capacity figure (1245pa) confirmed by Bexley in the London SHLAA (GLA, 2017) for the same 10 year period. Notably, many other London boroughs are also seeing significant rises. In light of this evidence, it is clear that Bexley and other London Boroughs will almost certainly need assistance to address such needs with neighbours in overlapping housing market areas. Indeed, it is notable that representatives of this London Borough were present in stated Duty-to-Cooperate meetings between TWBC and SDC (21 April 2019 entry at Appendix B6 of the Duty to Cooperate Statement (TWBC, 2021), yet no strategy or outcome is stated in relation to such matters.

It is also important to examine the context emerging with the adjoining authorities. In March 2020 Sevenoaks DC received the Inspectors Report into their submitted Local Plan. The Inspector concluded the Council had not discharged its statutory duty to cooperate and that the plan was not consequently legally compliant. SDC have been unsuccessful in challenging that decision, so the delivery of much needed homes for households in acute need will be delayed yet further.

In 2020, Wealden District Council also withdrew its emerging Local Plan following the Inspectors concerns the Council had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters.

In March 2021, Tonbridge and Malling BC received a letter from the Planning Inspector also confirming the authority had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters. TMBC requested the Inspectors issue their final report before confirming next steps, but since that request, SDC have received confirmation their own challenge had failed. We therefore wait to hear whether TMBC follow the same path, but either way, the plans housing strategy will be delayed.

As a consequence, three of the adjoining authorities are delayed in their plan preparation and housing delivery strategies; and the SoS has confirmed there are significant unmet and mounting housing needs requiring collaborative action in London within the next five years. All of which highlights how important it is for the emerging TWBC Local Plan to be as positively prepared as possible.

As we outline, the SA process and the nature of the authority's engagement with adjoining authorities is insufficient in our view to satisfy these statutory requirements. The strategic context highlighted above serves to illustrate just how important it is for TWBC to positively prepare their plan to assist adjoining authorities, particularly over the next five years, pending the removal of the transitional arrangements for the London Plan. As we set out, the justification for not assisting SDC with their unmet needs is not based on an assessment of 'reasonable alternatives' through the SA process. In light of this and the above context, we have significant concerns with TWBC claim they have a legally compliant Local Plan.

We would urge the Council to revisit the quantum of growth proposed and tested through the SA process, and put in place strategies to address this and unmet needs through the duty to co-operate. As we outline in our comments to Policy STR1 below, we contend there are strong grounds to suggest further growth is justified to ensure the plan is positively prepared and effective for the plan period envisaged. As a consequence, we would urge the Council to go further in quantifying what needs in the area are, and importantly devise the strategies needed to address these.

This should assist in ensuring the emerging plan does not meet the same fate as the plans recently examined for both Sevenoaks, Wealden and Tonbridge and Malling Councils, all of which about TWBC. The housing requirement should accordingly be adjusted and tested through the SA process to account for this and other factors we outline in respect of Policy STR1 below.

We trust these comments are useful and duly noted. We would welcome the opportunity to elaborate on such matters at the forthcoming Examination into the subsequently submitted version of this Plan.

Question 7

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

If your representation is seeking a modification to the Plan, do you consider it necessary to participate in examination hearing session(s)? . Yes, I wish to participate in hearing session(s)

Future Notifications

Please let us know if you would like us to use your details to notify you of any future stages of the Local Plan by ticking the relevant box: Yes, I wish to be notified of future stages of the Local Plan

Question 2	
Agent's Name and Organisation (if applicable)	Turley
Question 3	
To which part of the Local Plan does this representation relate?	Policy

Question 3a

Please state which paragraph number(s), Policy Number, or Policies Map (Inset Map number(s)) this representation relates to.

Policy STR 1 The Development Strategy

[TWBC: this representation has been input against the Pre-Submission Local Plan as a whole, Policies STR 1, STR 7, STR/SS 1, STR/SS 3, STR/CRS 1, AL/CRS 3, PSTR/HO 1, EN 2, EN 9, EN 14 and EN 26– see Comment Numbers PSLP_1772, PSLP_1813, PSLP_1818, PSLP_1819, PSLP_1820, PSLP_1821, PSLP_1823, PSLP_1824, PSLP_1825, PSLP_1826, PSLP_1827, and PSLP_1828. The full representation has been attached as Supporting Information]

Question 4

Do you consider that the Local Plan:

Is legally compliant No

Is sound No

Question 4a

If you consider that the Local Plan is not sound, please answer this question.

Do you consider that the Local Plan is not sound because:

Question 5

Please note: In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to cooperate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to cooperate, please also use this box to set out your comments.

TUNBRIDGE WELLS PRE-SUBMISSION LOCAL PLAN (REGULATION 19) CONSULTATION LAND WEST OF FRYTHE WAY, CRANBROOK (SHELAA REF: 25)

Thank you for the invitation to comment on the above consultation. We write on behalf of our client, Taylor Wimpey UK Ltd, who control land west of Frythe Way, which abuts the south eastern edge of Cranbrook (SHELAA Site Ref: 25).

We have examined the Pre-submission Local Plan (PSLP) and conclude that as drafted it is neither legally compliant, nor sound. The Council's Sustainability Appraisal (TWBC, 2021) concludes Option 13 (The Pre-Submission Local Plan) to be an 'appropriate strategy'. We are unable to reach the same conclusion, as the SA has not first taken into account 'reasonable' alternative strategies, contrary to paragraph 35 of the NPPF and the corresponding SEA Regulations.

We also conclude that Tunbridge Wells Borough Council's (TWBC) statutory Duty to Cooperate under Section 33A of the 2004 Act has not been discharged. The Council has not in our view demonstrated that there has been active, constructive or on-going engagement with adjoining authorities, including Sevenoaks District Council (SDC), in respect of known unmet housing needs. Nor has an effective strategy been put in place between the authorities to address such needs. The justification drawn from the SA process that TWBC are unable to assist SDC is contested. Distributing such unmet needs solely in line with SA Option 9 (Dispersed Countryside) is not a reasonable alternative in our client's

opinion. It serves only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the 'appropriate strategy'.

In addition, the site selection process that flows from the SA (TWBC, 2021) and SHELAA (TWBC, 2021) contains notable errors and inconsistencies, which appear to have contributed significantly to the omission of more suitable and sustainable sites in favour of those proposed in the PSLP.

The quantum of growth proposed in the PSLP, and the over reliance placed on two large strategic sites to deliver between 67-69% of newly allocated supply is also questioned. In relation to the first, we contend adjustments are required to the overall housing requirement to both reduce the evident shortfall in affordable homes, and to assist adjoining authorities with known and growing unmet housing needs. We contend this is particularly important given three of the adjoining LPAs have been reported on as failing to discharge their statutory duty to cooperate, with their Local Plan's either withdrawn or delayed as a consequence. In addition, the Secretary of State for Housing, Communities and Local Government has confirmed there are significant unmet and mounting housing needs requiring collaborative action with London within the next five years. All of which highlights how important it is for the emerging TWBC PSLP to be positively prepared.

Turning to the second issues, we outline concerns over the justification for, lead in times and annual yields purported for the two strategic sites. It is our contention that these are unrealistic, and are contrary to leading evidence bases published for sites of this scale. As a consequence, we suggest the quantum of growth envisaged will not come forward as fast or at the rates envisaged, nor will it be delivered within the plan period. We accordingly recommend additional allocations are made to compensate for this shortfall, in sustainable locations that are capable of being delivered in the first five years of the plan period. We outline concerns in relation to TWBC's land supply assumptions in this period to evidence such a need.

We also outline concerns over the quantum of growth directed to certain locations and settlements. We contend these proposals are unlikely to support the climate change objectives set out in Policy ST7 of the PSLP. Our client supports the justification for and benefits of strategic growth at Cranbrook, ranked 2nd in the Settlement Role and Function Study (TWBC, 2021). In this respect, our client's site (Site 25) represents a modest proposal for 70 homes that is well contained by woodland, is partly within the settlement, has good accessibility to the high street and other facilities by foot (far better than some of those chosen for allocation), and no other overriding constraints to development. We set out in detail the factual errors, inconsistencies and missing evidence in our comments on the SA and SHELAA process below, which has thus far led to the omission of this site for allocation.

Our client continues to respectfully purport the justification for and benefits of this site's allocation. This includes the sharing of an emerging vision for the future of this site (See Document A); and confirmation from Kent County Highways there are no overriding highway constraints to the delivery of the site (see Document B). The land required to deliver the proposed development, its accompanying infrastructure and community benefits is in the control of Taylor Wimpey. It is available for development now, can be delivered well within five years and is considered a suitable and logical location to direct some of the future growth needed at Cranbrook. The emerging vision document appended confirms there to be no known overriding constraints to the delivery of these proposals.

Given the nature and detail of our representations, specifically in relation to the plans legal compliance and soundness, we would respectfully request attendance to participate in the examination of the PSLP. In the interim, the following representations are made to assist the Council and Inspector in their examination of the PSLP.

Soundness

STR1 – The Development Strategy

Housing Requirement

National guidance [Paragraph: 010 Reference ID: 2a-010-20201216 (NPPG, 2020)] confirms that:

'The standard method for assessing local housing need provides a minimum starting point in determining the number of homes needed in an area. It does not attempt to predict the impact that future government policies, changing economic circumstances or other factors might have on demographic behaviour. Therefore, there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates. (Our emphasis).

The same guidance confirms that such 'factors' could include, 'but are not limited to', various situations.

Unmet Needs from Adjoining Authorities

PPG confirms one such factor is where an authority agrees to assist an adjoining authority with their unmet housing needs. This flows from the NPPF Paragraph 35 requirement to ensure plans are '*Positively Prepared*'.

For brevity we refer to our previous comments in relation to legal compliance and Duty to Cooperate matters. Whilst TWBC acknowledge their neighbours request to assist with the unmet needs of Sevenoaks district (1900 homes), insufficient evidence is provided to justify why TWBC cannot assist in any way.

Table 12 of the SA (TWBC, February 2021) summarises the reasonable alternative options TWBC have tested through the SA process to arrive at, '*an appropriate strategy.....based on proportionate evidence*;' (Paragraph 35, NPPF). Option 11 seeks to assess the implications for accommodating uncapped need and the unmet needs from Sevenoaks District. The latter is acknowledged to be in the order of 1900 homes. However, rather than exploring the most sustainable options to distribute this additional growth, including to the main towns and large villages, TWBC assess a distribution consistent only with Option 9 (Dispersed Countryside). This understandably leads to a more negative consequence, as this leads to growth in less sustainable locations that run contrary to many of the sustainability objectives of the plan.

At paragraph 6.2.7 of the SA, TWBC use this conclusion to dismiss this option. The same evidence is then used to justify why TWBC are unable to assist meeting acknowledged unmet needs for housing in the area. Our client contends distributing unmet needs solely in line with Option 9 is not a reasonable alternative. It appears only to support a pre-determined outcome to select Option 13 (Pre-Submission Local Plan) as the '*appropriate strategy*'.

We contend the Council ought to have explored distribution options for unmet needs more objectively, including an assessment of the contribution more sustainable settlements could make to this. For example at Cranbrook, which is ranked second only after Southborough in the Councils '*Settlement Role and Function Study*' (TWBC, Feb 2021). The outcome of the SA process therefore cannot be relied upon to conclude Option 13 is an appropriate strategy, as it has not taken '*into account the reasonable alternatives*', contrary to paragraph 35 of NPPF and the corresponding SEA Regulations requiring such alternatives to be '*reasonable*'. In its current form therefore the Local Plan is not in our view legally compliant or positively prepared. The SA and Local Plan should be updated to address such matters, with an additional round of consultation held prior to its formal submission.

In addition, TWBC will be aware of the significant unmet needs arising from the London Plan. A strategy for which the Secretary of State for Housing, Communities and Local Government has requested be agreed with adjoining authorities as a matter of urgency, and within the next five year transition period. This merits further consideration in our opinion to accord with paragraph 60 of the NPPF, as no mention is made of such needs in the Duty to Cooperate Statement (TWBC, 2021). At the very least this serves to highlight the importance of testing sufficiently robust reasonable alternative housing requirements.

Further justification for such an approach is evident if one examines the context emerging with the adjoining authorities. In March 2020, Sevenoaks DC received the Inspectors Report into their submitted Local Plan. The Inspector concluded the Council had not discharged its statutory duty to cooperate and that the plan was not consequently Legally Compliant. SDC have been unsuccessful in challenging that decision, so the delivery of much needed homes for households in acute need will be delayed yet further.

In 2020, Wealden District Council also withdrew its emerging Local Plan following the Inspectors concerns the Council had not discharged its statutory duty to cooperate with adjoining authorities over unmet needs amongst other matters.
